Re: In-State North Carolina Registration Requirements

To Whom It May Concern:

The North Carolina Department of Agriculture, Food and Drug Protections Division is responsible for the registration and licensing of all firms engaged in the manufacturing or wholesale distribution of prescription drugs within the state of North Carolina. **Our present interpretation of our General Statutes does not require a license for the distribution of medical devices, unless that device contains a prescription drug and does not have the 510K FDA clearance.** Circassia Pharmaceuticals Inc. is a wholesale distributor for products defined by the FDA as medical devices and maintains establishment registration **FEI# 3006173825** with the FDA. It is my understanding that Circassia Pharmaceuticals Inc. handles devices that would not be considered human prescription drugs, and by the classification as a medical device, **Circassia Pharmaceuticals Inc. is not required to maintain a license as a Wholesale Prescription Drug Manufacturer as required by NCGS Article 12 (Food, Drugs, and Cosmetics) §106-140.1(a) or as a Wholesale Prescription Drug Distributor as required by NCGS Article 12A (Wholesale Prescription Drug Distributors) §106-145.3 (a).**

Should you have any further questions or require assistance with information please don't hesitate to contact us.

Sincerely,

Jeremy Evans, PharmD
Drug Administrator

Exhibit A **Press Release**

Jazz Pharmaceuticals Completes Acquisition of GW Pharmaceuticals plc

DUBLIN, May 5, 2021 – Jazz Pharmaceuticals (Nasdaq: JAZZ) today announced the completion of its acquisition of GW Pharmaceuticals plc (Nasdaq: GWPH) ("GW"), a leader in the science, development and commercialization of cannabinoid-based prescription medicines.

"We are excited to welcome our GW colleagues to Jazz as we mark a transformative milestone in creating an innovative, high-growth, global biopharma leader in neuroscience with a worldwide commercial and operational footprint," said Bruce Cozadd, chairman and chief executive officer of Jazz Pharmaceuticals. "The addition of GW further diversifies our commercial portfolio and innovative pipeline with therapies that are complementary to our existing business, including *Epidiolex*, a high-growth commercial product with near-term blockbuster potential. We are fortunate to be combining two companies that share a passion for, and track record of, developing differentiated therapies that advance science and the care of patients with often-overlooked diseases. We look forward to building an even stronger company together and are excited about the greater impact we will continue to drive for patients, customers and shareholders."

Compelling Strategic Rationale •

Adds third high-growth commercial franchise: Epidiolex® (cannabidiol) oral solution is a transformative treatment for childhood-onset epilepsy that provides a critical therapeutic option for refractory seizures. Launched in the U.S. in 2018, *Epidiolex* exceeded \$500 million in annual net sales in 2020. With a recent launch in Europe (under the tradename Epidyolex®) and ongoing research in additional indications, the Company believes *Epidiolex* has near-term blockbuster potential. •

Diversifies pipeline to drive sustainable growth: The Company's robust pipeline now includes clinical-stage development programs addressing significant unmet patient needs across neuroscience and oncology, including in sleep, movement disorders, psychiatry, hematology and solid tumors. •

Shared culture and exceptional talent advances our goal to support patients: The global teams at Jazz and GW possess unique talents and expertise, as well as a shared commitment to, and proven success in, delivering differentiated therapies to support people with serious, often-overlooked diseases. GW, like Jazz, has a demonstrated history of honoring values that include integrity, collaboration, passion, innovation and the pursuit of excellence, and a culture where diversity, equity, inclusion and belonging are a priority. •

Expected to deliver substantial shareholder value: This transaction is expected to provide accelerated double-digit top-line revenue growth and to be accretive in the first full calendar year of combined operations, and substantially accretive thereafter. Jazz's strong cash flow profile provides the capability to rapidly deleverage to a target net leverage of less than 3.5x by the end of 2022.

Business Updates •

Chris Tovey, chief operating officer (COO) of GW since 2012, will join Jazz's executive management as executive vice-president, chief operating officer, and managing director Europe & International, reporting to Dan Swisher, president. Mr. Tovey brings over 30 years of commercial and operations experience in the pharmaceutical industry and deep knowledge of GW's growing global cannabinoid business. In his role, Mr. Tovey will be responsible for commercialization activities outside North America, manufacturing and supply chain, and information systems and security.

The Company plans to provide 2021 financial guidance for the combined Jazz/GW organization within the next 45 days.

Under the terms of the agreement, holders of GW ADSs, which each represented 12 GW ordinary shares, will be entitled to receive \$220.00 for each GW ADS, consisting of \$200.00 in cash and \$20.00 in Jazz ordinary shares. The number of Jazz ordinary shares received per GW ADS is 0.12036, based on the volume weighted average price of Jazz ordinary shares on Nasdaq for the 15 consecutive trading day period beginning on the 18th trading day immediately preceding the closing date of the transaction. Holders of GW ordinary shares that are not in ADS form will be entitled to receive the foregoing consideration divided by 12 per GW ordinary share.

INTERCOMPANY SUPPLY AND DISTRIBUTION AGREEMENT

THIS INTERCOMPANY SUPPLY AND DISTRIBUTION AGREEMENT ("**Agreement**") is effective as of June 5, 2020 ("**Effective Date**"), is entered into by and between:

Immunocore Commercial, LLC, a limited liability company organized and existing under the laws of the State of Delaware, with an office at Six Tower Bridge, Suite 540, 181 Washington Street, Conshohocken, Pennsylvania 19428, USA ("**Distributor**"), and

Immunocore Limited, a limited company organized and existing under the laws of the United Kingdom, with offices at 101 Park Drive, Milton Park, Abingdon, Oxfordshire, OX14 4RY, United Kingdom ("**Supplier**").

Distributor and Supplier will be referred to together as the "**Parties**" and each individually as a "**Party**".

RECITALS

- A. Supplier is dedicated to the development and commercialization of certain biological therapies for oncology and infectious and autoimmune diseases.
- B. Distributor is a newly-formed limited liability company and an indirect wholly-owned subsidiary of Supplier.
- C. The Parties desire to begin a relationship whereby Supplier shall supply its Tebentafusp products to Distributor who shall serve as Supplier's exclusive distributor of such products in the United States.

NOW THEREFORE, in consideration of the mutual undertakings and covenants contained herein, the Parties agree as follows:

TERMS AND CONDITIONS

1. Definitions. Unless the context clearly requires otherwise, as used herein, the following capitalized terms shall have the following meanings:

"Adverse Event" means any undesirable medical occurrence in a patient administered a pharmaceutical product, which does not necessarily have a causal relationship with this treatment.

"Established Policies and Procedures" means those (intercompany) policies and procedures which were agreed and are in place between the Parties, on a particular subject governed by this Agreement, as such policies and procedures may be amended or supplemented by the Parties from time to time; and

"Products" means all Tebentafusp related products marketed by Supplier.

2. Appointment as Distributor

- 2.1. Grant of Exclusive Distribution Rights. Subject to the terms and conditions of this Agreement and unless otherwise agreed by the Parties, Supplier hereby grants to Distributor the exclusive right to market, sell and distribute the Products in the United States on behalf of Supplier. Distributor hereby accepts such right. Distributor may appoint sub-distributors only with the prior written consent of Supplier.
- 2.2. Subcontractors. Distributor acknowledges and agrees that Supplier has contracted with Integrated Commercialization Solutions, LLC ("ICS") as its exclusive provider of third-party logistics (3PL) services for the Products to be sold in the United States, Guam, Puerto Rico and the U.S. Territories. Distributor shall not delegate, assign or subcontract its distribution rights or obligations under this Agreement in any manner that would conflict with the ICS agreement or otherwise subcontract its rights or obligations hereunder, without the prior written consent of Supplier.

3. Distributor's Obligations

In line with the Established Policies and Procedures, Distributor hereby agrees to:

- a. Obtain and maintain all registrations, approvals, licenses or other official measures required by federal, state and local laws and regulations to distribute the Products on behalf of Supplier within the United States.
- b. Under no circumstances modify, repackage, combine with other components or otherwise alter in any way the Products, their labeling, accompanying literature (such as instructions for use), unless otherwise agreed by the Parties or required by local laws and regulations.
- c. Ensure that the traceability of the Products at all times is guaranteed and also that the market observation obligations according to applicable laws and regulations are adhered to.
- d. Be responsible for obtaining all required documentation, regulatory approval, licenses or the like for the import of the Products into the United States, unless otherwise agreed by the Parties.
- e. Ensure the Products are transported in such a way that (i) their identification is not lost, (ii) adequate precautions are taken against damage, contamination or theft, and (iii) they are secure and not subject to unacceptable degrees of heat, cold, light, moisture, or other adverse influence. The Products requiring controlled temperatures and storage should also be transported by appropriate means.
- f. Inform Supplier of any damage to the Products received that is visually obvious (e.g., damaged or punctured containers and temperature monitoring results outside of predetermined specifications) immediately upon receipt of the Product.
- g. Provide such other technical, marketing, regulatory or other logistics support, logistics services or other services as the Parties may, from time to time, agree.

- h. As directed by the Supplier, unless otherwise agreed, maintain the capacity and resources to distribute and sell Products regardless of volume fluctuations and/or changing market conditions.

4. Obligations of Supplier

In line with the Established Policies and Procedures, Supplier hereby agrees to:

- a. Sell and deliver to Distributor in a timely fashion all Products ordered by Distributor from time to time.
- b. Provide Distributor with necessary information concerning the specifications, availability and delivery of the Products that will enable Distributor to distribute the Products effectively.
- c. Provide such other technical, marketing, regulatory or other support or services as the Parties may agree from time to time.

5. Regulatory

- 5.1. General Considerations. The Parties shall each comply in all material respects with all applicable laws and regulations that pertain to the activities for which each Party is responsible under this Agreement, including without limitation, laws and regulations: (a) of any regulatory authority that are applicable to the development, manufacture, supply and distribution of the Products, (b) governing importation and exportation of the Products, (c) prohibiting bribery in any form, and (d) concerning data protection and privacy.
- 5.2. Product Complaints. Distributor shall notify Supplier of any information Distributor receives regarding the safety or efficacy of a Product, including any customer complaint or investigation relating to the Products (such as product tampering, counterfeit product or contamination). Each Party shall cooperate fully with the other Party in dealing with customer complaints or claims concerning the Products and shall take reasonable action to promptly resolve and follow up with regard to such complaints.
- 5.3. Recordkeeping and Reporting. Distributor shall keep accurate books and records of all Products distributed and sold during the term of this Agreement and the financial transactions related thereto. Supplier shall be responsible for complying with the regulatory reporting requirements as set out in the applicable laws and regulations.
- 5.4. Field Actions. In the event that Supplier is required or requested by any regulatory authority, or voluntarily decides, to conduct a recall, market withdrawal or field correction (a "Recall"), Supplier will conduct the Recall or designate a third party to do so, and Distributor will cooperate and comply with Supplier's requests in the Recall. Notwithstanding any responsibility Supplier may have, each Party shall be obligated to act in accordance with local law and regulations and the Established Policies and Procedures in case of a Recall.
- 5.5. Audit Rights. In accordance with the Established Policies and Procedures, Supplier shall have the right to perform audits of Distributor's books, records and facilities that

relate to the Products, their traceability and related regulatory requirements and Distributor's quality procedures. An audit shall be conducted during normal business hours and shall not unreasonably disrupt Distributor's normal operations. Any deficiencies in Distributor's processes or procedures shall be corrected in a manner that shall be agreed between the Parties.

- 5.6. Notice of Inspections. Distributor agrees to inform Supplier in accordance with Established Policies and Procedures of any governmental or regulatory review, audit or inspection of its facility or processes which directly or indirectly relates to the Products supplied and distributed under this Agreement. In the event of such an inspection, Distributor shall notify Supplier of the issuance of the notice of inspection or the presence of the inspector. If there are written observations (or any other written communication) by a governmental or regulatory authority which involve a Product, or any proposed written response by Distributor to any such inspection, Supplier will be provided with copies of all documentation and will have the opportunity to review and provide input and assistance to Distributor in responding to any such review, audit or inspection.
- 5.7. Submissions and Approvals. Unless otherwise agreed by the Parties, Supplier shall be responsible for all required submissions and approvals of internal documentation relating to new indications, clinical data, labeling, instruction for use and the like under the applicable (local) laws and regulations.
- 5.8. Traceability. In line with the Established Policies and Procedures, Distributor shall ensure that Products are traceable up to the end customers (sites of care). The records of such traceability system shall be retained for at least fifteen (15) years and shall be stored in a manner as shall be agreed between the Parties.
- 5.9. Adverse Event. Distributor shall notify Supplier of any information Distributor receives regarding a possible Adverse Event relating to any Product. The Parties shall investigate all reports of an Adverse Event in order to assure the safety and efficacy of the Products.

6. Purchase Orders and Payment Terms

- 6.1. Orders for Products. Orders for Products shall be made in accordance with the Established Policies and Procedures.
- 6.2. Inability to Fill Orders. In the event that Supplier is unable to fulfill (part of) an order, Supplier shall notify Distributor as soon as reasonably possible, which notification may be sent via e- mail to the appropriate contact person.
- 6.3. Transfer Pricing. The Parties acknowledge that the pricing for the Products under this Agreement has not been determined as of the Effective Date and, when available, shall be set forth on Exhibit A hereto. It is the intention of the Parties that the initial pricing of the Products to Distributor under this Agreement will be based upon the forecasted selling price of all Products to customers, less the forecasted direct and indirect costs of Distributor related to the sale and distribution of such products, and less an arm's-length profit margin to be determined by the Parties ("Transfer Price"). The arm's-length profit opportunity of Distributor shall reflect the intent of the Parties that Supplier shall ultimately bear any economic costs including, but not limited to: loss or obsolescence of inventory; foreign exchange losses (or gains); and interest expense or the carrying costs

of assets. Transfer Prices will be subject to review and may be modified by the Parties from time to time.

- 6.4. Payment Terms. Payments shall be made in accordance with Established Policies and Procedures on payments, which may be amended by mutual agreement between the Parties.
- 6.5. Delivery. Supplier shall deliver the Products to the location designated in Distributor's order or such other location as may be agreed upon by the Parties in accordance with Established Policies and Procedures.
7. Term and Termination. This Agreement shall become effective as of the Effective Date and shall remain in effect until terminated by either Supplier or Distributor upon thirty (30) days' prior written notice to the other party. In the event of termination of this Agreement, the Parties shall mutually agree on the transition of distribution operations, which transition shall be conducted in such a manner that customer needs are not disrupted and no material inconvenience is caused to either Party.
8. Miscellaneous
 - 8.1. Choice of Law. This Agreement shall be governed by and construed in accordance with the laws of the State of New York, USA, without giving effect to that jurisdiction's choice of law rules. The Parties expressly agree that the provisions of the United Nations Convention on Contracts for the International Sale of Goods shall not apply to this Agreement.
 - 8.2. Notices. Any notice, consent, request, instruction, demand, approval, acceptance or other communication shall be in writing and shall be given by hand delivery, by confirmed facsimile, by nationally recognized courier service or by certified mail, postage prepaid, addressed to the Parties as mentioned in the preamble of this Agreement. Unless agreed otherwise between the Parties, notices may also be sent by e-mail to the known contact person of a Party.
 - 8.3. Relationship of the Parties. The relationship of the Parties shall be that of a company and its independent distributor. Nothing in this Agreement shall be construed to constitute either Party as the partner, legal representative or agent of the other or to authorize either Party to assume or undertake any obligations of any kind, express or implied on behalf of the other Party. Neither Party shall have any authority to bind the other in any respect.
 - 8.4. Severability. If any provision of this Agreement is, becomes or is deemed invalid, illegal or unenforceable in any jurisdiction, such provision shall be construed or deemed amended to conform to the applicable laws so as to be valid and enforceable; or, if it cannot be so construed or deemed amended without materially altering the intention of the Parties, it shall be deleted and the remainder of this Agreement shall remain in full force and effect.
 - 8.5. Entire Agreement. This Agreement, including all exhibits (which are hereby incorporated herein and shall be made a part hereof) sets forth and constitutes the entire agreement and understanding of the Parties with respect to the matters set forth herein or therein.

- 8.6. Amendment and Modification. This Agreement may be amended only by a written instrument executed by authorized representatives of each of the Parties.
- 8.7. Waiver. None of the terms of this Agreement shall be deemed to have been waived by either Party hereto, unless such waiver is in writing and signed by that Party. The waiver by either Party hereto of a breach of any provision of this Agreement shall not operate or be construed as a waiver of any other provision of this Agreement or of any further breach of the provision so waived or of any other provision of this Agreement.
- 8.8. Headings. Headings are used herein to facilitate the reading and do not define or affect in any way the meaning and interpretation of this Agreement.
- 8.9. Counterparts. This Agreement may be executed simultaneously in one or more counterparts, each of which shall be deemed an original, but all of which together shall be one and the same instrument.
- 8.10. Further Assurance. The parties shall make, execute, acknowledge and deliver such other instruments and documents, and take all such other actions, as may be reasonably required in order to effectuate the purposes of this Agreement and to consummate the transactions contemplated hereby.

To Whom It May Concern:

On behalf of Immunocore Commercial LLC ("Immunocore"), attached is Immunocore's initial application.

Immunocore is a pioneering, clinical- stage T cell receptor biotechnology company working to develop and commercialize a new generation of transformative medicines to address unmet needs in cancer, infection, and autoimmune disease.

Immunocore is a "Virtual Manufacturer". Their product is manufactured by a contract manufacturer and distributed by a Third-Party Logistics Provider, who meets licensure requirements to ship pharmaceutical products into your state. Therefore, at no time does Immunocore physically manufacture or distribute product. Immunocore's product is not a controlled substance. Accordingly, Immunocore is not required to obtain DEA registration. At the time of this filing, Immunocore is also licensed in Pennsylvania and West Virginia.

I hope this narrative is helpful as you review Immunocore's application. PART I

ITEM 1. BUSINESS

Overview

Glaukos is an ophthalmic medical technology and pharmaceutical company focused on developing novel therapies for the treatment of glaucoma, corneal disorders, and retinal disease. We developed Micro-Invasive Glaucoma Surgery (MIGS) to serve as an alternative to the traditional glaucoma treatment paradigm and launched our first MIGS device commercially in 2012. We have developed a proprietary bio-activated pharmaceutical therapy for the treatment of a corneal disorder, keratoconus, that was approved by the U.S. Food and Drug Administration (FDA) in 2016. We are also developing a pipeline of surgical devices, sustained pharmaceutical therapies, and implantable biosensors intended to treat glaucoma progression, corneal disorders such as keratoconus, dry eye and refractive vision correction, and retinal diseases such as neovascular age-related macular degeneration (AMD), diabetic macular edema (DME), and retinal vein occlusion (RVO).

Ophthalmic diseases and disorders are a national and global health concern and, as the population ages, the number of individuals with vision impairment and blindness is increasing. Moreover, improving access to cost-effective tools is increasing the diagnosis of sight-threatening ocular diseases globally and driving demand for innovative products, technologies, and therapies that improve clinical outcomes, and provide ease of use and reliability. In response to the significant unmet needs that exist within ophthalmology we have designed commercial and development-stage solutions to provide ophthalmologists with treatment options.

Our commercial solutions and development-stage product candidates include:

- MIGS products that primarily involve the insertion of a micro-scale device or drug delivery system designed to reduce intraocular pressure (IOP) by restoring the natural aqueous humor outflow pathways for patients suffering from glaucoma and MIGS biosensors to measure pressure within the eye;
- topical pharmaceuticals that are bio-activated on the eye by one of our proprietary systems intended to strengthen, stabilize, and reshape the cornea for patients impacted by corneal ectatic disorders or refractive disorders; and
- topical pharmaceuticals that are applied to the eyelid and meant to treat dry eye, glaucoma and other ocular surface diseases and disorders, and
- proprietary micro-invasive, bio-erodible sustained release drug delivery implants that are designed to elute pharmaceuticals over time to improve the vision of patients impacted by retinal diseases such as AMD, DME, RVO, and diabetic retinopathy (DR).

Impact of COVID-19 Pandemic and Current Economic Environment

In December 2019, a novel strain of coronavirus (COVID-19) emerged in Wuhan, Hubei Province, China. The World Health Organization declared COVID-19 to be a “pandemic,” spreading across the globe and impacting worldwide economic activity. In the U.S., certain federal, state and local governmental authorities issued stay-at-home and other orders, proclamations and/or directives, including restrictions on elective procedures and therapies, aimed at minimizing the spread of COVID-19. Although some of these governmental restrictions have since been lifted or scaled back, recent surges of COVID-19 have in some cases led, and future surges could lead, to the reinstitution of stay-at-home or other orders and may further result in restrictions being re-implemented in response to efforts to reduce the spread of COVID-19. Even if stay-at-home or other orders are removed, potential patients may elect to stay at home voluntarily. The COVID-19 pandemic and subsequent economic slowdown has materially impacted the global demand for our products, which are used in procedures and therapies that are considered elective. This decrease in demand was most significantly felt in the latter part of the quarter ended March 31, 2020 and the earlier part of the quarter ended June 30, 2020. Beginning in May 2020, we began to see an early recovery toward more normalized levels for cataract and

keratoconus procedures, a trend that continued through the quarter ended December 31, 2020. The ultimate impact of the COVID-19 pandemic on our operations going forward is unknown and will depend on future developments which are highly uncertain and cannot be predicted with confidence, including the duration and severity of the COVID-19 outbreak, the status of health and safety actions taken to contain its spread and any additional preventative and protective actions that governments, or we, may take, any future surges of COVID-19 that may occur, the dynamics associated with the rollout of the COVID-19 vaccines, and how quickly and to what extent economic and operating conditions normalize within the markets in which we operate. For additional information, see the section titled *Risks Related to Our Business* within Item 1A. Risk Factors of this Annual Report on Form 10-K.

We have taken a number of steps aimed at minimizing the spread of COVID-19 and protecting our employees, including shifting the majority of our workforce to remote operations, which continues through the date hereof. We have maintained streamlined manufacturing and assembly processes in order to consistently provide product to our customers who depend on us. In addition to other health and safety protocols that follow applicable guidance and regulations, employees involved in such operation-critical processes have been organized into a number of small shifts designed to minimize the time any one individual is required to be onsite. Further, in an effort to identify, and avoid further infection from, asymptomatic cases, we have offered periodic voluntary COVID-19 viral testing to on-site employees.

We also sought to preserve our cash position by instituting a number of cost saving initiatives, the majority of which have been reinstated, although we continue to carefully manage our discretionary spending. These actions were designed to preserve jobs and core research and development programs. Further, in June 2020, we issued an aggregate principal amount of \$287.5 million of 2.75% convertible notes due 2027 (the Convertible Notes), the net proceeds of which will be used for working capital and general corporate purposes. As of December 31, 2020, we had cash, cash equivalents, short-term investments, and restricted cash of approximately \$413.9 million, compared to \$183.3 million as of December 31, 2019.

We continue to actively assess the impact of COVID-19 on our clinical trials and other pipeline products. The closure of ophthalmic practices and deferral of elective procedures beginning in the first quarter of 2020 in response to COVID-19 disrupted new patient enrollment in our ongoing clinical trials. This disruption has continued even as facilities have reopened as doctors prioritize their standard procedures over clinical trial enrollment. In particular, patient enrollment for our *iDose* clinical trials remains impacted, which has delayed our estimated *iDose* approval timeline, where we now expect a potential FDA approval of this product in 2023.

Material Changes and Transactions

Glaukos was formed in 1998 with a focus on treating glaucoma progression, initially developing MIGS to serve as an alternative to traditional glaucoma treatment and management paradigms. We launched the *iStent*, our first MIGS device, in the U.S. in 2012, our next-generation *iStent inject* device in late 2018, and our latest *iStent inject W* device in the second half of 2020, while also developing a broader portfolio of development-stage product candidates designed to treat glaucoma progression. In recent years, we began to execute a long-term strategy that leverages our core competencies and extends our focus to include therapies for chronic eye diseases beyond glaucoma into corneal disorders and retinal health.

In June 2020, we issued \$287.5 million in aggregate principal amount of 2.75% convertible notes due 2027 (the Convertible Notes), the proceeds of which are expected to be used for working capital and general corporate purposes.

Products and Pipeline

The Company operates in one operating segment as our primary business activity is the development and commercialization of therapies across several end markets within ophthalmology. In an effort to provide greater visibility into our performance and progress, the following discussion is presented based on our three principal franchises: glaucoma, corneal disorders and retinal diseases.

Glaucoma

Glaucoma is a group of eye diseases characterized by progressive, irreversible and largely asymptomatic vision loss in which elevated levels of IOP are often associated with optic nerve damage that can cause blindness. While some glaucoma patients do not experience an increase in IOP, it is widely considered a major risk factor in glaucoma's progression, and reduction in IOP is the only clinically proven treatment for the disease. Elevated IOP occurs when aqueous humor is not circulating normally or properly draining from the front part of the eye.

We have three primary commercialized products designed to treat mild-to-moderate open-angle glaucoma, the *iStent*, the *iStent inject*, and the *iStent inject W*. The *iStent*, the *iStent inject*, and the *iStent inject W* are FDA-approved micro-bypass stents that improve aqueous humor outflow inserted through the small corneal incision made during cataract surgery. Our *iStent*, which reduces IOP by restoring the natural physiologic pathways for aqueous humor, was the first commercially available MIGS treatment solution. Our next generation *iStent inject* and *iStent inject W* devices include two stents pre-loaded in an auto-injection system designed to allow the surgeon to inject stents through a single corneal entry. The *iStent*, *iStent inject*, and *iStent inject W* procedures are currently reimbursed in the U.S. by Medicare and all major national private payors. The *iStent* and *iStent inject* technologies are commercially available in Japan, Brazil, Canada, Australia, and certain European Union (EU) and other countries, even though reimbursement may not always be available for all such procedures.

We are also developing several pipeline products, including the *iStent Infinite*, *iStent SA* and *iDose TR*, none of which have been commercialized. The *iStent Infinite* consists of three stents that are designed for use as a standalone procedure in patients with refractory glaucoma. In 2019, we completed patient enrollment of an IDE study of *iStent Infinite* in order to pursue future FDA clearance. Similar to the *iStent inject* and the *iStent inject W*, the *iStent SA* is a two-stent product that uses a different auto-injection inserter. However, the *iStent SA* is designed for use as a standalone glaucoma procedure. The *iDose* drug delivery system is a targeted injectable implant based on our micro-scale device-platform that is designed to continuously deliver therapeutic levels of medication from within the eye for extended periods of time. We commenced our Phase III IND clinical trial for *iDose TR* in 2018. Additionally, our glaucoma pipeline includes the extended release *iDose (TRES)*, *iDose (ROCK)*, *iPrime* and the IOP Sensor which are still in a research and development (R&D) stage.

In addition to our organic R&D efforts, in 2019 we entered into a multi-year agreement with Santen, which appointed us to serve as the exclusive U.S. partner for the sale of the Preserflo MicroShunt, which is currently being studied in an FDA pivotal study and has not yet been approved by the FDA. The MicroShunt is an ab-externo device being developed for treatment of glaucoma where IOP is uncontrolled with maximum tolerated medical therapy or where progression of the disease warrants surgery.

In addition, in 2018 we entered into a research and development collaboration agreement with D. Western Therapeutics Institute (DWTI) in which we are conducting the evaluation and development of novel intraocular products for the treatment of glaucoma using compounds from DWTI's proprietary Rho Kinase inhibitor compound library.

Corneal Disorders

The cornea, the eye's outermost layer, is a clear, dome-shaped surface that functions best as a lens when the cornea is strong and shaped properly. The cornea is responsible for the majority of the eye's total focusing power and corneal disorders, including ectasia, refractive vision errors and dry eye, among others, can cause vision impairment. Corneal ectatic disorders are comprised of a class of diseases characterized by an ectatic, or misshaped, cornea. Corneal ectasia is typically caused by a weakening of the cornea, which can be due to a number of factors, including genetic causes, adverse side effects from ophthalmic refractive procedures such as LASIK, or excessive eye rubbing. We are currently targeting two primary corneal ectatic disorders with our bio-activated pharmaceuticals: keratoconus and corneal ectasia following refractive surgery, although our therapies may also offer benefits to individuals with presbyopia and myopia. Keratoconus is mostly a hereditary, degenerative ectatic disease that is often first seen in older children or young adults in which the typically round, dome-shaped cornea progressively thins and weakens, causing a cone-like corneal bulge due to normal internal pressure of the eye. Corneal ectasia following refractive surgery is a serious complication that involves the cornea becoming weakened following a refractive procedure, such as LASIK, with symptoms similar to naturally occurring keratoconus. Refractive vision errors, or the inability of the cornea to

properly focus light, are prevalent in the U.S. and abroad and include disorders such as presbyopia and myopia. Presbyopia is a natural part of aging due to the hardening of the eye's crystalline lens over time, resulting in a loss of lens elasticity or the ability of the lens to change shape in order to focus incoming light on the retina. Myopia, or nearsightedness, is a vision condition in which close objects are seen clearly, but objects farther away appear blurred, and is usually caused by an elongation of the eyeball or a cornea having too much curvature. Presbyopia affects nearly everyone over the age of 40 while myopia first occurs in school-age children and typically progresses until about age 20.

Our pharmaceutical *iLink* therapies, a suite of novel single-use drug formulations that are bio-activated by our proprietary systems, address both keratoconus and corneal ectasia. These *iLink* therapies, bioactivated upon the delivery of ultraviolet A (UVA) light to the cornea induce a biochemical reaction called corneal collagen cross-linking, or corneal cross-linking (CXL). CXL strengthens, stabilizes and reshapes the cornea to treat corneal ectatic disorders. The KXL System, which delivers UVA light to a large portion of the cornea, is approved by the FDA for use in the U.S. following removal of the epithelium (often referred to as "*iLink* epi-off"), a procedure familiar to ophthalmologists. In May 2019, patient enrollment in a pivotal Phase 3 clinical trial was completed to evaluate the safety and efficacy of our latest pharmaceutical *iLink* therapeutic system for the treatment of keratoconus without the removal of the epithelium (often referred to as "*iLink* epi-on"). We now expect a potential approval of *iLink* epi-on product in 2023, with the delay being primarily the result of our decision to change contract drug manufacturers in advance of completing registration batches and, ultimately, commercialization. Outside the U.S., our pharmaceutical therapies can also be administered with the KXL System to address corneal weakening caused by refractive surgery such as LASIK. Our next generation systems are being developed to provide metered beams of UVA light to a targeted portion of the cornea. Our pharmaceutical products bio-activated by these systems may also offer a means of improving the vision of patients with presbyopia, myopia or other corneal diseases.

We have also entered into an exclusive global licensing arrangement with Intratus to research, develop, manufacture and commercialize a patented, non-invasive transdermal drug delivery platform designed for application on the eyelid in the treatment of dry eye disease, glaucoma, and other ocular surface diseases and disorders.

Retinal Diseases

Retinal diseases vary widely but universally affect the retina, a thin layer of tissue inside the back wall of the eye containing light-sensitive cells that convert light into neural signals. Most retinal diseases cause visual impairment, including blurred or distorted vision and vision loss. Our R&D efforts in our retinal franchise are focused on treating AMD, DME, RVO, and other retinal diseases. AMD is a progressive disease that occurs when the macula, the central portion of the retina, is impaired, which can result in severe vision problems. DME is highly prevalent among individuals with type 2 diabetes and is associated with DR, the impairment of small blood vessels in the retina caused by increased glucose levels. Advanced DR can lead to fluid leaking into the macula, which causes DME and severe vision impairment. RVO occurs when the flow of blood from the retina is blocked, often due to a blood clot blocking the retinal vein, which can result in severe vision problems.

We are developing sustained release pharmaceutical retinal platforms leveraging our expanded pharmaceutical and sustained drug delivery R&D capabilities, including Triamcinolone Acetonide SR, Multi-Kinase Inhibitor SR and Anti-VEGF SR. If commercialized, these platforms would be designed to treat AMD, DME, RVO, and other retinal diseases. The focus of our retinal research and development efforts is to develop potential treatment options with a longer duration-of-effect than current standards of care products.

Research & Development

We devote significant resources to our R&D efforts, which are focused on developing new products, and enhancing the effectiveness, ease of use, safety, and reliability of our commercialized products. Our R&D objectives are:

- to advance glaucoma patient care through continuous improvement of our MIGS technologies;
- to further enhance treatment options for keratoconus, while expanding *iLink* and CXL indications to include treatment for certain refractive and other corneal conditions and developing pharmaceutical therapies for dry eye disease and other corneal disorders; and

- to leverage our expertise in sustained pharmaceutical systems to identify and develop viable treatment options for retinal diseases such as AMD, DME and RVO.

A considerable portion of our R&D investment includes clinical trials and the collection of evidence that provide data for use in regulatory submissions and required post-market approval studies involving applications of our products. We expect our R&D and clinical expenditures to increase as we continue to devote significant resources to clinical trials and regulatory approvals of our pipeline products. We currently conduct R&D activities primarily in the U.S. but are expanding our clinical capabilities to sites outside the U.S.

Sales and Marketing

Our global sales efforts and promotional activities are currently aimed at ophthalmic surgeons and other eye care professionals and our primary customers include ambulatory surgery centers, hospitals and physician private practices. In the U.S., we sell our products through a direct sales organization. Outside the U.S., we sell our products through direct sales organizations in sixteen countries and a network of distribution partners in other markets where we do not have a direct commercial presence or maintain a modest commercial presence. In 2020, sales to customers inside and outside the U.S. accounted for 77% and 23% of our net sales, respectively. No single customer or distributor accounted for more than 10% of our total net sales in 2020. For the year ended December 31, 2020, our *iStent* technologies, the *iStent*, the *iStent inject*, and the *iStent inject W* and related accessories, which comprise our key product family, accounted for approximately 80% of our net sales, while our *iLink* therapies accounted for approximately 20% of our net sales.

Competition

The medical technology and pharmaceutical industries are highly competitive. We may compete with many companies, including divisions of companies much larger than us that may have greater resources and name recognition, and smaller companies that compete against specific products or in certain geographies. Furthermore, new product development, discoveries, and technological change characterize the areas in which we compete. Our present or future products could be rendered obsolete as a result of advances by one or more of our present or future competitors or by other surgical or pharmaceutical therapy development. We must continue to develop and commercialize new products, technologies, and therapies to remain competitive in the ophthalmology industry. We believe that we compete primarily on the basis of clinical superiority supported by extensive data, and innovative features that enhance patient benefit, product performance, and safety.

The ophthalmic segment of the medical technology and pharmaceutical industries is dynamic and subject to significant change due to cost-of-care considerations, regulatory reform, industry and customer consolidation, and evolving patient needs. The ability to provide products, technologies, and therapies that demonstrate value, are reimbursed through government or third-party payors, improve clinical outcomes and provide ease of use and reliability is becoming increasingly important for companies within ophthalmology.

In glaucoma, our MIGS offerings primarily compete against Ivantis, however there are a considerable number of large and small companies providing more invasive surgical glaucoma technologies, laser-based therapies, and pharmaceuticals that may provide indirect competition or with whom we may compete should our broad clinical development pipeline be approved and commercialized. In corneal disorders, we have, under an orphan drug designation, the only FDA approved bio-activated pharmaceutical therapy for the treatment of keratoconus, but globally we compete against numerous providers of corneal crosslinking therapies such as PeschkeTrade GmbH. Our corneal disorder pipeline, if approved, would vastly expand our competition to numerous large companies such as AbbVie Inc., Alcon and Johnson & Johnson, and small companies that provide medical technology and pharmaceutical therapies for several areas including dry eye and refractive conditions. Our retinal health pipeline, if approved, may face substantial competition from large pharmaceutical companies such as AbbVie Inc., Novartis AG, Genentech/Roche, Regeneron, and Bayer, and there are also a considerable number of large and small companies with development efforts in the field.

Facilities, Manufacturing and Distribution

Our corporate headquarters and our manufacturing operations for the *iStent*, *iStent inject* and *iStent inject W* are located in an approximately 98,000 square foot campus in San Clemente, California which is comprised of two main buildings. Our pharmaceutical therapies for keratoconus are primarily manufactured and supplied by third parties in the U.S. and Germany. We lease approximately 27,000 square feet of office and laboratory space in Waltham, Massachusetts, and our manufacturing operations for the majority of our proprietary systems are located in Burlington, Massachusetts, with some limited manufacturing operations in Dublin, Ireland. In the fourth quarter of 2018, we entered into an office building lease pursuant to which we lease one property containing three existing office buildings, comprising approximately 160,000 rentable square feet of space, located in Aliso Viejo, California (Aliso Facility). The term of the Aliso Facility lease commenced on April 1, 2019 and will continue for thirteen years, with an option to extend the lease for two additional five-year periods at market rates. We intend to relocate our corporate administrative headquarters, along with certain laboratory, research and development and warehouse space previously based in San Clemente, to the Aliso Facility. We currently intend to maintain manufacturing facilities for the *iStent*, *iStent inject*, and *iStent inject W* at our San Clemente location for the foreseeable future. Our international subsidiaries also lease facilities in Australia, Brazil, Canada, Germany, Japan and the United Kingdom.

Intellectual Property

The strength of our competitive position depends substantially upon our ability to obtain and enforce intellectual property rights protecting our technology both domestically and internationally. We rely on a combination of intellectual property rights, including patents, trademarks, service marks, copyrights, trade secrets and other similar intellectual property, as well as customary contractual protections and security measures used to protect our proprietary, trade secret information.

In the aggregate, our intellectual property assets are of material importance to our business. We are significantly dependent on our patent and other intellectual property rights and the failure to protect such rights could negatively impact our ability to sell current or future products or prohibit us from enforcing our patents or other intellectual property rights against others. For additional information see the section titled *Risks Related to Our Intellectual Property* within Item 1A. Risk Factors of this Annual Report on Form 10-K.

As of December 31, 2020, we owned or exclusively licensed in certain fields of use over 300 issued patents, pending U.S. patent applications, issued foreign patents and pending foreign patent applications. We may, from time to time, choose to acquire or license additional patents and patent applications, or we may choose to abandon, sell, or license certain Company patents and patent applications, depending on our needs. The issued patents that protect our commercial products and current product pipeline expire between 2021 and 2038.

Government Regulation

Our products and operations are subject to extensive and rigorous regulation by federal, state, and local authorities, as well as foreign regulatory authorities. These governmental agencies regulate, among other things, the research, development, testing, manufacturing, approval, labeling, storage, recordkeeping, advertising, promotion and marketing, distribution, post approval monitoring and reporting, and import and export of medical devices and drugs (including drug/device combination products) in their respective jurisdictions to assure the safety and effectiveness of medical products and pharmaceuticals for their intended use. In general, there has been a trend of increased regulation of medical device and drug products, which has resulted in, and will likely continue to result in, increased prices to bring new products to market.

Regulation & Reimbursement in the United States

The FDA has broad regulatory authority over medical devices and drugs in the U.S. The FDA regulates, among other things, product safety, efficacy, manufacturing, advertising, labeling and safety reporting.

Medical Device Requirements

Each medical device commercially distributed in the United States requires one of the following: (i) clearance under a 510(k) premarket notification; (ii) approval under a Premarket Approval (PMA) application; (iii) approval of a de-novo classification petition; or (iv) approval under an IDE.

The FDA classifies devices into one of three classes—Class I, Class II or Class III—depending on the degree of risk associated with each medical device and the extent of manufacturing and regulatory control needed to ensure its safety and effectiveness. Class III devices, which include our *iStent* products that produce the majority of our revenue, are deemed to pose the greatest risk, such as life-sustaining, life-supporting or implantable devices and devices deemed not substantially equivalent to a predicate device. Class III devices require FDA approval of the more demanding PMA application before marketing of a Class III device can proceed.

PMA Approval Pathway

Class III devices typically require a PMA before they can be marketed. In a PMA, the manufacturer must demonstrate that the device is safe and effective for its intended use, and the PMA must be supported by extensive data, including data from preclinical studies and human clinical trials. If the FDA accepts the application for review, it has 180 days under the FDCA to complete its review of a PMA, although in practice, the FDA's review can take up to several years. The FDA will generally conduct a pre-approval inspection of the applicant or its third-party manufacturers' or suppliers' manufacturing facility or facilities to ensure compliance with the QSR. Even after a PMA approval, the FDA may require post-approval conditions to ensure the safety and effectiveness of the device, including additional clinical studies or post-market surveillance. Failure to comply with the conditions of approval can result in material adverse enforcement action, including withdrawal of the approval. Certain changes to an approved device, such as changes in manufacturing facilities, methods, or quality control procedures, or changes in the design performance specifications, which may affect the safety or effectiveness of the device, require submission of a PMA supplement.

Clinical Trials of Medical Devices

Clinical trials are almost always required to support a PMA for a Class III device. All clinical investigations must be conducted in accordance with the FDA's IDE regulations. If the device presents a "significant risk," to human health, as defined by the FDA, the FDA requires the device sponsor to submit an IDE application to the FDA, showing with appropriate data that it is safe to test the device in humans and that the testing protocol is scientifically sound.

Regardless of the degree of risk presented by the medical device, clinical studies must be approved by, and conducted under the oversight of, an Institutional Review Board (IRB) for each clinical site, which is responsible for the initial and continuing review of the IDE. During a study, the sponsor and any clinical investigators are required to comply with the applicable FDA requirements. After a trial begins, the sponsor, the FDA or the IRB could suspend or terminate a clinical trial at any time for various reasons, including a belief that the risks to study subjects outweigh the anticipated benefits.

Post-Market Regulation

After a device is approved for marketing, numerous and pervasive regulatory requirements continue to apply. These include:

- Establishment registration and device listing with the FDA;
- QSR requirements, which require manufacturers, including third-party manufacturers, to follow stringent design, testing, control, documentation and other quality assurance procedures during all aspects of the design and manufacturing process;

- Labelling, advertising and promotion regulations, which require that promotion is truthful, not misleading, fairly balanced and provide adequate directions for use and that all claims are substantiated, and also prohibit the promotion of products for unapproved or “off-label” uses and impose other restrictions on labeling;
- Approval of product modifications of approved devices that affect safety or effectiveness or that would constitute a major change in intended use of an approved device;
- Medical device reporting regulations, which require that a manufacturer report to the FDA if a device it markets may have caused or contributed to a death or serious injury, or has malfunctioned and the device or a similar device that it markets would be likely to cause or contribute to a death or serious injury, if the malfunction were to recur;
- Correction, removal and recall reporting regulations, which require that manufacturers report to the FDA field corrections and product recalls or removals if undertaken to reduce a risk to health posed by the device or to remedy a violation of the FDCA that may present a risk to health; and
- Post-market surveillance activities and regulations, which apply when deemed by the FDA to be necessary to protect the public health or to provide additional safety and effectiveness data for the device.

The FDA has broad regulatory compliance and enforcement powers. If the FDA determines that we failed to comply with applicable regulatory requirements, it can take a variety of compliance or enforcement actions, which may result in any of the following sanctions:

- warning letters, untitled letters, fines, injunctions, consent decrees and civil penalties;
- recalls, withdrawals, or administrative detention or seizure of products;
- operating restrictions or partial suspension or total shutdown of production;
- refusing or delaying requests for approvals of new products or modified products;
- withdrawing 510(k) clearances or PMA approvals that have already been granted;
- refusal to permit the export or import of our products; or
- criminal prosecution.

Drug Requirements

The development and commercialization of drug products is subject to extensive regulation by governmental authorities in the U.S. and other countries. Before marketing in the U.S., a drug must undergo rigorous preclinical and clinical studies and an extensive regulatory approval process implemented by the FDA under the FDCA.

Before commencing clinical studies in humans in the US, we must submit to the FDA an investigational new drug application (IND) that includes, among other things, the general investigational plan and protocols for specific human studies and the results of preclinical studies. Once clinical studies have begun under the IND, they are usually conducted in three phases and under FDA oversight. These phases generally include the following:

Phase 1. Introduction into patients or healthy human volunteers and is tested for safety, dose tolerance and pharmacokinetics.

Phase 2. Introduction into a limited patient population to assess the efficacy of the drug in specific, targeted indications, assess dosage tolerance and optimal dosage, and identify possible adverse effects and safety risks.

Phase 3. Expansion to further demonstrate clinical efficacy, optimal dosage and safety within an expanded patient population.

The results of drug development, preclinical studies and clinical studies must be submitted to the FDA as part of a New Drug Application (NDA). The NDA also must contain extensive manufacturing information. The Prescription Drug User Fee Act (PDUFA) establishes timeframes for FDA review of NDAs and the 2007 Food and Drug Administration Amendments Act gave the FDA authority to require implementation of a formal Risk Evaluation and Management Strategy to ensure that the benefits of a drug outweigh its risks. At the end of the review period, the FDA communicates either approval of the NDA or a complete response listing the application's deficiencies.

Once approved, the FDA may require post-marketing studies, sometimes referred to as Phase 4 studies, to monitor the safety and effectiveness of approved drugs, and may limit further marketing of the drug based on the results of these post-marketing studies.

If regulatory approval for a drug is obtained, the clearance to market the drug will be limited to those diseases and conditions approved by FDA and for which the drug was shown to be effective, as demonstrated through clinical studies and specified in the drug's labeling. Even if this regulatory approval is obtained, a marketed drug, its manufacturer and its manufacturing facilities are subject to continual review and periodic inspections by the FDA. The FDA ensures the quality of approved drugs by carefully monitoring manufacturers' compliance with its current Good Manufacturing Practice ("cGMP") regulations, which contain minimum requirements for the methods, facilities, and controls used in manufacturing, processing, and packaging of a drug. The FDA may withdraw drug approval if compliance with post-marketing regulatory standards is not maintained or if safety or quality issues are identified after the drug reaches the marketplace.

We are also subject to various laws and regulations regarding laboratory practices, the experimental use of animals and the use and disposal of hazardous or potentially hazardous substances in connection with our research. In each of these areas, as above, the FDA and other regulatory authorities have broad regulatory and enforcement powers, including the power to withdraw approvals.

Health Care Regulatory Laws

Additional laws and regulations also govern our business operations and products in the U.S., including among others:

- the federal health care Anti-Kickback Statute which prohibits, among other things, persons from knowingly and willfully soliciting, receiving, offering or paying remuneration, directly or indirectly, in cash or in kind, to induce or reward either the referral of an individual for, or the purchase, lease, order, arrangement for, or recommendation of, items or services for which payment may be made, in whole or in part, under federal health care programs;
- the federal civil False Claims Act prohibits, among other things, knowingly presenting or causing the presentation of a false or fraudulent claim for payment of government funds, or knowingly making, using, or causing to be made, a false record or statement material to a false or fraudulent claim to avoid, decrease or conceal an obligation to pay money to the federal government. False Claims Act liability is significant in the healthcare industry because the statute provides for treble damages and significant mandatory penalties per false claim or statement for violations (adjusted annually for inflation);
- federal and state laws and regulations that govern the collection, dissemination, security, use, disclosure and confidentiality of patient-identifiable health and other proprietary and personally-identifiable information, in particular, the Health Insurance Portability and Accountability Act of 1996 (HIPAA), as amended by the Health Information Technology for Economic and Clinical Health Act of 2009 (HITECH). HIPAA created federal criminal statutes that prohibit, among other actions, knowingly and willfully executing, or attempting to execute, a scheme to defraud any healthcare benefit program; and

- the Physician Payments Sunshine Act, which requires applicable manufacturers like us to report annually to the Centers for Medicare and Medicaid Services (CMS) information related to payments and other "transfers of value" made to physicians and teaching hospitals, and ownership and investment interests held by physicians and their immediate family members. Beginning in 2022, applicable manufacturers also will be required to report information regarding payments and transfers of value provided (starting in 2021) to physician assistants, nurse practitioners, clinical nurse specialists, certified nurse anesthetists, and certified nurse-midwives.

Certain states also mandate implementation of corporate compliance programs, require compliance with the industry's voluntary compliance guidelines, impose restrictions on manufacturer marketing practices, require registration or licensing of manufacturers and their sales representatives, and/or require tracking and reporting of gifts, compensation, and other remuneration to healthcare professionals and entities. Some states have proposed or enacted legislation that will create new data privacy and security obligations for certain entities, such as the California Consumer Privacy Act that went into effect January 1, 2020. Violations of these laws may subject us to administrative, civil, and criminal penalties, including imprisonment of individuals, the imposition of significant fines, monetary penalties, and damages, exclusion from participation in (or reimbursement for our products from) federal health care programs like Medicare or Medicaid, imposition of compliance obligations or monitoring, curtailment or restructuring of our operations, and damage to our reputation.

Reimbursement

Ambulatory surgery centers, hospitals and physician private practices that purchase our products typically bill various third-party payors, such as government programs, private insurance plans and managed care programs, to cover all or a portion of the costs and fees associated with the therapeutics or procedures in which our products are used and bill patients for any applicable deductibles or co-payments. In the U.S., physicians are typically paid separately from the facility for surgical procedures involving our products; however, there is no published Medicare payment schedule at the national level for physician payment amounts. The physician payment rate is left to the discretion of the regional Medicare Administrative Contractors (MACs), with each MAC separately determining coverage and no assurance that coverage and adequate reimbursement will be obtained from, or maintained by, the MACs. MACs have in the past, and may in the future, change coverage terms.

In the U.S., no uniform policy of coverage and reimbursement exists among third-party payors; coverage and reimbursement can differ significantly from payor to payor. In addition, payors continually review new products for possible coverage and existing products for changes in coverage and can, without notice, deny coverage.

One key aspect of reimbursement in the U.S. are the distinct billing codes that are used by healthcare providers to report the provision of medical procedures and the use of supplies for specific patients to payors. There are different categories of Current Procedural Terminology (CPT) codes (Category I, II and III) based on the procedure or supply. Although we have received a permanent healthcare common procedure coding system J code for our *Photrex* pharmaceutical therapies, we have only obtained temporary Category III CPT codes for the professional fees associated with CXL and *iStent*-related procedures. Prior to expiration, there are two options: submit an application to convert a temporary code to a permanent code or submit an application for a five-year extension of the temporary code. With the approaching expiration of our temporary Category III CPT code for the professional fees associated our *iStent*-related procedures, we have applied for a permanent Category I CPT code. In connection with this transition to a permanent code, both the physician fee and facility fee associated with the procedures using our *iStent* products will be reevaluated. In some cases, the physician fees and/or facility fees have been decreased at the time codes are transitioned from temporary to permanent. Further, even when a permanent billing code has been assigned to a product, there is no guarantee that coverage will be provided.

Regulation & Reimbursement outside the U.S.

In addition to regulations in the U.S., we are subject to a variety of regulations in other jurisdictions governing clinical trials, commercial sales and distribution of our products and reporting of payments to physicians. Whether or not we obtain FDA approval for a product, we must obtain authorization before commencing clinical trials or obtain marketing authorization or approval of a product under the comparable regulatory authorities of countries outside the

U.S. The approval process varies from country to country and the time may be longer or shorter than that required for FDA approval. The requirements governing the conduct of clinical trials, product licensing, pricing and reimbursement vary greatly from country to country. In addition, certain countries have adopted transparency legislation that requires us to report contracts with or payments made to physicians in those countries and many have enacted anti-kickback laws and regulations, which generally prohibit the offer, receipt, or payment of remuneration in exchange for or to induce the use of our products.

Similar to the trend within the U.S., other major international markets are also moving toward more stringent regulatory frameworks for medical device and drug products. For example, in May 2017, the EU adopted a new regulatory scheme for medical devices under the Medical Device Regulation (MDR). The MDR is expected to become fully effective in May 2021 and will bring significant new requirements for many medical devices, including enhanced requirements for clinical evidence and documentation, increased focus on device identification and traceability, and additional post-market surveillance and vigilance, which could result in substantial additional expense.

The EU has also adopted increasingly stringent data protection and privacy rules that have and will continue to have a substantial impact on the use of patient data across the healthcare industry. The EU General Data Protection Regulation, or GDPR, became effective in May 2018 and applies across the EU and includes, among other things, a requirement for prompt notice of data breaches to data subjects and supervisory authorities in certain circumstances and significant fines for non-compliance.

Reimbursement

Outside the U.S., reimbursement levels vary significantly by country and by region within some countries. Reimbursement is obtained from a variety of sources, including government-sponsored and private health insurance plans, and combinations of both. Some countries require additional clinical data before granting or expanding coverage and reimbursement for our products. In general, obtaining broad-based reimbursement and adequate payment for new technologies is more difficult in these markets than in the U.S. Many countries require new medical technologies to not only be safe and effective, but also to be able to demonstrate clinical benefits that outweigh the costs when compared to the standard of care. As in the U.S., reimbursement decisions can change, resulting in the elimination or reduction of reimbursement payments, which could adversely affect our financial results and our ability to invest in and grow our business.

Other

Our operations and many of the products we manufacture or sell are subject to extensive regulation by numerous other governmental agencies, both within and outside the U.S. In the U.S., apart from the agencies discussed above, our facilities, operations, employees, products (their manufacture, sale, import and export) and services are regulated by the Environmental Protection Agency, the Occupational Health & Safety Administration, the Department of Labor, Customs and Border Protection, the Department of Commerce, the Department of Treasury, the Department of Justice and others. State agencies also regulate our facilities, operations, employees, products and services within their respective states. Government agencies outside the U.S. also regulate public health, product registration, manufacturing, environmental conditions, labor, exports, imports and other aspects of our global operations.

These regulatory agencies and any current or future legislation could impact our business operations, reimbursement for our products, and the healthcare environment generally, which could adversely affect our ability to operate our business and our financial results. Compliance with these regulations has not had a material effect on our capital expenditures, earnings, or competitive position to date, but current or new legislation could have such an effect in the future. We cannot estimate the expenses we may incur to comply with potential new laws or changes to existing laws, or the other potential effects these laws may have on our business.

Human Capital Management

Glaukos is committed to developing a comprehensive, cohesive and positive employee experience. We consider talent attraction, development, engagement and retention a key driver of our business success. As of December 31, 2020, we had 653 full-time employees. Our Board of Directors, through the Compensation, Nominating and Governance

Committee, retains direct oversight of our human capital management process, including demographics, talent development, employee retention, material aspects of employee compensation as well as diversity and inclusion recruitment, retention and compensation efforts. Additionally, the Compensation, Nominating and Governance Committee assists management with the implementation of the Company's diversity strategy. We report on human capital matters at each regularly scheduled Board of Directors meeting and periodically throughout the year. The most significant human capital measures or objectives that we focus on in managing our business and our related human capital initiatives include the following:

- **Workforce Diversity:** We believe that truly innovative companies must find new ways to address the marketplace's needs and the most effective innovation happens when our workforce represents a diversity of ideas and experiences. We embrace diversity in our employee recruiting, hiring, and development practices. Our workforce was made up of 37% female employees and 39% racially or ethnically diverse employees as of December 31, 2020, with 34% and 23% of management positions being filled by female and racially or ethnically diverse individuals, respectively. During 2020, of the promotions that were earned within our workforce, 37% were earned by female employees and 32% were earned by racially or ethnically diverse employees.
- **Inclusion and Belonging:** We strive to create a work environment that emphasizes respect, fairness and dignity and do not tolerate discrimination or harassment. Individuals are evaluated based on merit, without discrimination, including discrimination based on race, color, religion, national origin, citizenship, marital status, gender (including pregnancy), gender identity, gender expression, sexual orientation, age, disability, veteran status, or other characteristics protected by law. We are committed to providing equal opportunities to every member of our workforce.
- **Health, Safety, and Wellness:** Above all else, we are dedicated to the safety and wellbeing of our employees. As the COVID-19 pandemic unfolded in 2020, we quickly shifted to a remote work environment and provided employees with the resources necessary to effectively perform their job responsibilities. Additionally, we implemented changes to our manufacturing and distribution operations to include the use of personal protective equipment and ensure social distancing. In an effort to identify, and avoid further infection from, asymptomatic cases, we have offered periodic voluntary COVID-19 viral testing to on-site employees. Further, we adopted COVID-19 pay policies that provide our employees up to ten additional days of paid leave if they experience COVID-19 exposure or illness or to need time to care for exposed or ill family members.
- **Philanthropy and Volunteerism:** We created the Glaukos Charitable Foundation to assist the company in its philanthropic endeavors. Glaukos has donated over \$10 million worth of its products to assist individuals in need. Additionally, we regularly hold local volunteer events and fundraising campaigns, over 20 total in 2020, to encourage our employees to give back to our communities, a commitment that we further support by offering employees paid time off for charitable volunteering. One of our more impactful volunteer events involved Glaukos employees adopting over 50 disadvantaged families globally to help provide a more special holiday experience.
- **Training and Development:** Employees receive regular development feedback through quarterly management reviews during which they are encouraged to cultivate new skills and opportunities. We coach our leaders to facilitate effective conversations and measure the effectiveness of these conversations by surveying our employees. In addition to training and development opportunities, all new employees are required to participate in substantial training seminars to introduce them to Glaukos' business, pipeline and position within ophthalmology. We value knowledge and continuous improvement and conduct frequent informational sessions to further expose our employees to different departments, projects and business priorities.
- **Compensation and Benefits:** To attract, retain and recognize talent, we aim to ensure merit-based, equitable compensation practices and strive to provide competitive compensation and benefit packages to our workforce. Employees at all levels are eligible for discretionary cash bonuses. To align employees

One other item I neglected to provide from the law. In the document, Page 53 provides the requirement that from the date of the Act, no state can have a regulation that is inconsistent with the section referenced below. That section references USC 360eee-4 which is linked below.

Part I

Item 1. BUSINESS

Overview

We are a late-stage biopharmaceutical company focused on developing and commercializing treatments for dermatological diseases with high unmet medical needs. Our current portfolio is comprised of topical treatments with significant potential to address immune-mediated dermatological diseases and conditions, or immuno-dermatology. Our strategy is to identify and develop treatments against validated biological targets in dermatology that deliver a differentiated clinical profile that addresses major shortcomings of existing therapies in our targeted indications. We believe this strategy uniquely positions us to rapidly progress towards our goal of bridging the treatment innovation gap in dermatology, while maximizing our probability of technical success and financial resources.

Our lead product candidate, ARQ-151, is in Phase 3 clinical trials in plaque psoriasis. ARQ-151 is a topical cream formulation of roflumilast, a highly potent and selective phosphodiesterase type 4, or PDE4, inhibitor, which we are developing for the treatment of plaque psoriasis, including psoriasis in intertriginous regions such as the groin, axillae, and inframammary areas, as well as atopic dermatitis. PDE4 is an established biological target in dermatology, with multiple PDE4 inhibitors approved by the U.S. Food and Drug Administration, or FDA. We have successfully completed a Phase 2b study of ARQ-151 in plaque psoriasis, demonstrating potential symptomatic improvement and favorable tolerability of ARQ-151 in this population. We have initiated three Phase 3 studies in plaque psoriasis, with topline data expected in the first half of 2021. We have also completed enrollment in a long-term safety study of ARQ-151 in plaque psoriasis patients, and expect to report topline data in the first half of 2021. We also completed a Phase 2 proof of concept study of ARQ-151 in atopic dermatitis and plan to initiate a Phase 2b study in the second half of 2020, with topline results expected in the second half of 2021.

In addition, we are developing ARQ-154, a topical foam formulation of ARQ-151, and have initiated a Phase 2 proof of concept study in seborrheic dermatitis and a Phase 2b study in scalp psoriasis. We expect to report topline data in the second half of 2020 with respect to seborrheic dermatitis and in Q4 2020/Q1 2021 with respect to scalp psoriasis. Beyond this, in 2020 we also plan to initiate clinical studies of ARQ-252, a potent and highly selective topical janus kinase type 1, or JAK1, inhibitor for the treatment of hand eczema and vitiligo. Additionally, we have formulation and preclinical efforts underway for ARQ-255, an alternative topical formulation of ARQ-252 designed to reach deeper into the skin in order to potentially treat alopecia areata.

Dermatological diseases such as psoriasis, atopic dermatitis, seborrheic dermatitis, hand eczema, alopecia areata, and vitiligo affect hundreds of millions of people worldwide each year, impacting their quality of life, and physical, functional and emotional well-being. There are many approved treatments for these conditions, but a large opportunity remains due to issues with existing treatments. Topical treatments are used for nearly all patients, but are limited by one or more of the following: modest response rates, side effects, patient adherence, application site restrictions, and limits on duration of therapy. Topical corticosteroids, or TCS, are commonly used as the first-line therapy for the treatment of inflammatory skin conditions such as psoriasis and atopic dermatitis. While many patients see improvements, long term TCS treatment carries the risk of a variety of significant side effects. As a result, TCS are typically used intermittently, which can lead to disease flares. In psoriasis, vitamin D analogues have demonstrated lower response rates than TCS and are frequently irritating. In atopic dermatitis, topical calcineurin inhibitors, or TCIs, and Eucrisa, a topical non-steroidal PDE4 inhibitor, have lower response rates than TCS and are associated with application site burning. TCIs also have a boxed warning for cancer risk.

Biologic and systemic therapies are also available, but are indicated for a small percentage of the affected population. Biologics for psoriasis and atopic dermatitis have shown impressive response rates but are only indicated for the minority of patients with moderate-to-severe forms of disease, are expensive, and often face reimbursement and access restrictions. Use of oral systemic therapies such as methotrexate and Otezla are also limited to more severe psoriasis patients and have significant side effect risks. Additionally, many patients on biologic and systemic therapies still require adjunctive topical therapy.

Given the limitations associated with TCS, other topical therapies, biologics, and systemic therapies, we believe patients with inflammatory skin conditions are dissatisfied with their current treatment options. We believe that there is a significant opportunity to leverage developments in other fields of medicine, particularly inflammation and immunology, to address the significant need for effective chronic treatments in immuno-dermatology. Our initial focus is to address patients' significant need for innovative topical treatments that directly target molecular mediators of disease, have the potential to show significant symptomatic improvement, maintain a low risk of toxicity or side effects, and are suitable for chronic use on all areas of the body.

We are developing ARQ-151 for the treatment of plaque psoriasis and atopic dermatitis. High-potency steroids are the current standard of care for plaque psoriasis, and low- to mid-potency steroids are the current standard of care for atopic dermatitis, but steroids are associated with suppression of the hypothalamic-pituitary-adrenal axis, or HPA axis (one of the body's four neuroendocrine systems, playing a central role in regulating portions of the metabolic, cardiovascular, immune, reproductive and central nervous systems), skin atrophy (thinning), striae (stretch marks), and telangiectasias (spider veins), among other side effects. Furthermore, some of these side effects (e.g., striae) are irreversible, persisting even after therapy is discontinued. Based on market research and our internal estimates, we estimate the population of patients treated with prescribed topical therapies in the United States is approximately 2.5 million patients and 5.4 million patients for psoriasis and atopic dermatitis, respectively. We estimate our addressable market opportunity, which focuses on patients treated by dermatologists with topical therapies, for each of psoriasis and atopic dermatitis is 2.0 million patients and 1.0 million patients, respectively.

We cannot at this time predict the specific extent, duration, or full impact that the COVID-19 outbreak will have on our ongoing and planned clinical trials and other business operations. We do, however, believe that there will be an impact on the clinical development of our product candidates, which may include potential delays, halts or modifications to our ongoing and planned trials.

Our Pipeline

The following charts summarize our product pipeline, including our lead product candidate, ARQ-151, and our upcoming anticipated milestones:

We may not actually achieve the plans, intentions or expectations disclosed in our forward-looking statements, and you should not place undue reliance on our forward-looking statements. Actual results or events could differ materially from the plans, intentions and expectations disclosed in the forward-looking statements we make. We have included important factors in the cautionary statements included in this Annual Report on Form 10-K, particularly in the “Risk Factors” section, that we believe could cause actual results or events to differ materially from the forward-looking statements that we make. Our forward-looking statements do not reflect the potential impact of any future acquisitions, mergers, dispositions, joint ventures or investments we may make.

You should read this Annual Report on Form 10-K and the documents that we reference in this Annual Report on Form 10-K and have filed as exhibits to this Annual Report on Form 10-K completely and with the understanding that our actual future results may be materially different from what we expect. The forward-looking statements contained in this Annual Report on Form 10-K are made as of the date of this Annual Report on Form 10-K, and we do not assume any obligation to update any forward-looking statements except as required by applicable law.

This Annual Report on Form 10-K includes statistical and other industry and market data that we obtained from industry publications and research, surveys and studies conducted by us and third parties as well as our estimates of potential market opportunities. Industry publications, third-party and our own research, surveys and studies generally indicate that their information has been obtained from sources believed to be reliable, although they do not guarantee the accuracy or completeness of such information. Our estimates of the potential market opportunities for EYSUVIS, INVELTYS and our product candidates include several key assumptions based on our industry knowledge, industry publications, third-party research and other surveys, which may be based on a small sample size and may fail to accurately reflect market opportunities. While we believe that our internal assumptions are reasonable, no independent source has verified such assumptions.

Risks Factor Summary

Our business is subject to a number of risks that if realized could materially affect our business, financial condition, results of operations, cash flows and access to liquidity. These risks are discussed more fully in the “Risk Factors” section of this Annual Report on Form 10-K. Our principal risks include the following:

- We have incurred significant losses from operations and negative cash flows from operations since our inception. We expect to incur additional losses and may never achieve or maintain profitability. As of December 31, 2020, we had an accumulated deficit of \$399.8 million.
- We may need substantial additional funding. If we are unable to raise capital when needed, we could be forced to delay, reduce or eliminate our product development programs or commercialization efforts.
- Our substantial indebtedness may limit cash flow available to invest in the ongoing needs of our business.

Table of Contents

- The ongoing novel coronavirus pandemic and the efforts to prevent its spread have adversely impacted our operations and the market for INVELTYS, could impact the launch and commercialization of EYSUVIS and may continue to adversely affect our business, results of operations and financial condition.
- EYSUVIS, INVELTYS or any of our product candidates that receive marketing approval may fail to achieve market acceptance by clinicians and patients, or adequate formulary coverage, pricing or reimbursement by third-party payors and others in the medical community, and the market opportunity for these products may be smaller than we estimate.
- Even if we are able to successfully commercialize EYSUVIS, INVELTYS or any product candidate that we may develop, the products may become subject to unfavorable pricing regulations, third-party coverage or reimbursement practices or healthcare reform initiatives, which could harm our business.
- If we are unable to maintain our sales, marketing and distribution capabilities, establish additional capabilities if and when necessary, or enter into sales, marketing and distribution agreements with third parties, we may not be successful in commercializing EYSUVIS, INVELTYS or any of our product candidates that we may develop if and when they are approved.
- We face substantial competition, which may result in others discovering, developing or commercializing products before or more successfully than we do. Our product candidates will, if approved, also compete with existing branded, generic and off-label products.
- We are dependent on the success of EYSUVIS, INVELTYS, and any product candidate for which we receive marketing approval. If we are unable to successfully commercialize our products and product candidates, our business will be materially harmed.
- We contract with third parties for the manufacture of EYSUVIS and INVELTYS and plan to contract with third parties for clinical and commercial supply of any future product candidates. This reliance on third parties increases the risk that we will not have sufficient quantities of our products and product candidates or such quantities at an acceptable cost, which could delay, prevent or impair our development or commercialization efforts.
- We may be unable to obtain and maintain patent protection for our technology, products and product candidates, or the scope of the patent protection obtained may not be sufficiently broad or enforceable, such that our competitors could develop and commercialize technology, products and product candidates similar or identical to ours, and our ability to successfully commercialize our technology, products and product candidates may be impaired.
- EYSUVIS, INVELTYS and certain aspects of our AMPPLIFY technology are protected by patents exclusively licensed from other companies or institutions. Item 1. BUSINESS

Overview

We are a biopharmaceutical company focused on the discovery, development and commercialization of innovative therapies for diseases of the eye. We have worldwide rights to a portfolio of innovative products and product candidates that include two marketed therapies utilizing our proprietary mucus penetrating particle, or MPP, drug delivery technology, which we refer to as our AMPPLIFY® technology, to address medical needs for the front of the eye, and a pipeline of proprietary new chemical entities, or NCEs, targeted to address front and back of the eye diseases.

Our two marketed products are EYSUVIS™ (loteprednol etabonate ophthalmic suspension) 0.25%, for the short-term (up to two weeks) treatment of the signs and symptoms of dry eye disease, and INVELTYS® (loteprednol etabonate ophthalmic suspension) 1%, a topical twice-a-day ocular steroid for the treatment of post-operative inflammation and pain following ocular surgery. Both products apply our AMPPLIFY technology to loteprednol etabonate, or LE, a corticosteroid designed for ocular applications. The AMPPLIFY technology uses selectively-sized nanoparticles that each have a proprietary coating. We believe that these two key attributes enable even distribution of drug particles on mucosal surfaces and significantly increase drug delivery to target tissues by enhancing mobility of drug particles through mucus and preventing drug particles from becoming trapped and eliminated by mucus.

EYSUVIS is the first and only FDA-approved prescription product with an indication for the short-term (up to two weeks) treatment of the signs and symptoms of dry eye disease. The U.S. Food and Drug Administration, or FDA, approved EYSUVIS in October 2020 based on results from four clinical trials, including three Phase 3 clinical trials and one Phase 2 clinical trial, which demonstrated significant improvements in both the signs and symptoms of dry eye disease. Specifically, statistical significance was achieved after two weeks of dosing for the sign endpoint of conjunctival hyperemia in all three Phase 3 clinical trials. Statistical significance was observed in two of the three Phase 3 clinical trials for the symptom endpoints of ocular discomfort severity in both the overall intent-to-treat, or ITT, population and in a predefined subgroup of ITT patients with more severe ocular discomfort at baseline. EYSUVIS was well-tolerated across the four trials, with adverse events and intraocular pressure, or IOP, increases comparable to that observed with vehicle. We believe that EYSUVIS' broad mechanism of action, rapid onset of relief of both signs and symptoms, favorable tolerability profile and potential to be complementary to existing therapies, will result in a favorable profile for the management of dry eye flares and other dry eye associated conditions that would benefit from short-term treatment of dry eye signs and symptoms. We further believe that these features of EYSUVIS may be attractive to prescribing clinicians and EYSUVIS could become the preferred first-line prescription therapy for the short-term treatment of the signs and symptoms of dry eye disease, including the treatment of dry eye flares that affect the vast majority of dry eye patients. We commenced full promotional launch of EYSUVIS in January 2021.

INVELTYS is the first and only FDA-approved ocular corticosteroid product with a twice-a-day dosing regimen for the treatment of post-operative inflammation and pain following ocular surgery. In clinical trials, INVELTYS showed statistical significance in the primary efficacy endpoints of complete resolution of inflammation at day eight maintained through day 15 with no need for rescue medication compared to placebo and complete resolution of pain at day eight maintained through day 15 with no need for rescue medications compared to placebo. The FDA approved INVELTYS in August 2018, and we commercially launched the product in January 2019.

We are also progressing our pipeline of proprietary preclinical development programs targeted to address front and back of the eye diseases. These preclinical development programs, all of which are NCEs, include our receptor Tyrosine Kinase Inhibitor program, or rTKI, that is designed to inhibit the vascular endothelial growth factor pathway, for the treatment of retinal diseases, including wet age-related macular degeneration, or Wet AMD; our selective glucocorticoid receptor modulators, or SEGRMs, which are a novel class of therapies designed to modify the downstream activity of the receptors to exhibit the anti-inflammatory and immunomodulatory properties of the corticosteroid class of therapies without their associated side effects; and our novel surface targeting steroid, or STS, designed to target the ocular surface and thus have the potential to have fewer side effects compared to traditional topical steroids. We own all intellectual property and worldwide rights to these pipeline preclinical development programs.

Table of Contents

We have retained worldwide commercial rights for EYSUVIS, INVELTYS and our preclinical development programs. Starting with FDA approval of INVELTYS, we have built a commercial infrastructure with our own focused, specialty sales force which now includes 91 territory sales managers, or TSMs, 14 regional sales leaders, or RSLs, two area sales leaders, or ASLs, and three directors of national accounts, or DNAs. In 2021, we plan to increase our sales force from 91 TSMs to approximately 125 TSMs, pending the status of the COVID-19 pandemic. Our sales representatives promote both EYSUVIS and INVELTYS. We expect to commercialize in the United States any of our product candidates that receive marketing approval as well. We also expect to explore commercialization of EYSUVIS for the treatment of dry eye disease in certain markets outside the United States, including the European Union, or EU, utilizing a variety of collaboration, distribution and other marketing arrangements with one or more third parties.

We own and/or exclusively license patents relating to EYSUVIS, INVELTYS, our preclinical development programs and our AMPPLIFY technology, including U.S. and foreign issued patents and pending patent applications. The expiration dates of issued U.S. and ex-U.S. patents covering EYSUVIS and INVELTYS are in 2033. The expiration dates of issued U.S. and ex-U.S. patents relating to our AMPPLIFY technology are in 2025 through 2036.

The following table describes our marketed products and the stage of each of our current preclinical development programs:

EYSUVIS for Dry Eye Disease

Dry eye disease is a chronic, episodic, multifactorial disease affecting the tears and ocular surface that can result in tear film instability, inflammation, discomfort, visual disturbance and ocular surface damage. Dry eye disease can have a significant impact on quality of life and can potentially cause long-term damage to the ocular surface. Due to the impact of dry eye disease on tear film dynamics, the condition can affect performance of common vision-related activities such as reading, using a computer and driving, and can lead to complications associated with visual impairment. In addition, the vast majority of dry eye patients experience acute exacerbations of their symptoms, which are commonly referred to as flares, at various times throughout the year. These flares can be triggered by numerous factors, including exposure to allergens, pollution, wind and low humidity, intense visual concentration such as watching television and working at a computer, hormonal changes, contact lens wear, smoking and sleep deprivation, which cause ocular surface inflammation and impact tear production and/or tear film stability.

Table of Contents

We estimate dry eye disease affects approximately 38 million people in the United States based on an estimated dry eye disease prevalence of 14.5% described below and applied to the population of the United States over 20 years old. Based on third-party academic research, we believe dry eye disease results in approximately \$55 billion in direct and indirect costs in the United States each year, of which approximately \$3.8 billion are direct medical costs. The exact prevalence of dry eye disease is unknown due to the difficulty in defining the disease and the lack of a single diagnostic test to confirm its presence. The Beaver Dam Offspring Study, a major epidemiological study published in 2014 in the *American Journal of Ophthalmology*, reported that in a cohort of over 3,000 patients, dry eye disease was self-reported by 14.5% of the patients. The prevalence of dry eye disease increases with age, and we expect that the number of dry eye disease cases will increase as the U.S. population continues to age. Epidemiology and market research commissioned by us indicate that there are an estimated 17.2 million patients with a diagnosis of dry eye disease in the United States. We also commissioned three surveys of 503, 297 and 500 dry eye disease patients, which we refer to as our patient surveys, in 2017, 2018 and 2020, respectively. The patient surveys included a representative set of dry eye patients based on demographics and disease characteristics, such as age, sex and therapeutic history. The patients represented a broad range of dry eye disease severity. Based upon our review of the patient surveys as well as a 2020 independent study of 774 dry eye sufferers, we believe dry eye disease is a burdensome disease that has a significant impact on the quality of life of patients with dry eye disease.

The most commonly used treatments for dry eye disease in the United States are over-the-counter eye drops, often referred to as “artificial tears,” and three prescription pharmaceutical products, Restasis®, Cequa™ and Xiidra®. Artificial tears are intended to be palliative in nature to supplement insufficient tear production or improve tear film instability, but do not treat the underlying inflammation in dry eye disease. Restasis and Cequa increase tear production and Xiidra treats the signs and symptoms of dry eye disease, however, Restasis, Cequa and Xiidra are typically used chronically for dry eye patients who have continuous symptoms. As each of Restasis, Cequa and Xiidra have a relatively long onset of action, they are not generally used for the short-term treatment of episodic dry eye flares. We believe there is a larger proportion of dry eye patients whose symptoms are primarily episodic as opposed to chronic, and for whom a chronic therapy is not necessary. For these patients, we believe an FDA-approved, acute, short-term therapy can address a significant unmet need. For example, our patient surveys and the independent study of 774 dry eye sufferers indicate that approximately 75% to 90% of surveyed patients experience dry eye flares, with flares lasting on average approximately four days and occurring approximately six times per year. These results are also consistent with a multi-sponsored Gallup Poll survey indicating that dry eye patients suffer on average five to six flares per year lasting on average four days. In addition, according to our patient surveys, the most common reason given by patients for discontinuing the two leading branded dry eye treatments were insufficient efficacy, side effects and product price.

We developed EYSUVIS for the short-term treatment of the signs and symptoms of dry eye disease, utilizing a two-week course of therapy administered four times a day. We believe that EYSUVIS’ broad mechanism of action, rapid onset of relief of both signs and symptoms, favorable tolerability profile and potential to be complementary to existing therapies, offers a favorable profile for the management of dry eye flares and other dry eye associated conditions that would benefit from temporary relief of dry eye signs and symptoms. We further believe that these features of EYSUVIS may be attractive to prescribing clinicians and that EYSUVIS could become the preferred first-line prescription therapy for the short-term treatment of the signs and symptoms of dry eye disease, including the treatment of dry eye flares that affect the vast majority of dry eye patients. In our 2020 survey of 201 eye care professionals, or ECPs, nearly all, 99%, reported that their dry eye disease patients experience flares, but many underestimated the actual number of patients with flares. This survey also revealed that interest in prescribing a product with the EYSUVIS profile was high among the surveyed ECPs.

The FDA approved EYSUVIS based on results from four clinical trials, including three Phase 3 clinical trials and one Phase 2 clinical trial, which demonstrated significant improvements in both the signs and symptoms of dry eye disease. Specifically, statistical significance was achieved after two weeks of dosing for the sign endpoint of conjunctival hyperemia in all three Phase 3 clinical trials. Statistical significance was observed in two of the three Phase 3 clinical trials for the symptom endpoints of ocular discomfort severity in both the ITT population and in a predefined subgroup of ITT patients with more severe ocular discomfort at baseline. EYSUVIS was well-tolerated across the four trials, with adverse events and interocular pressure, or IOP, increases comparable to that observed with vehicle.

INVELTYS for Post-Operative Inflammation and Pain

Ocular inflammation and pain are common complications following ocular surgery. According to Marketscope, a third-party provider of market data, in 2019 there were approximately 8.6 million ocular surgeries in the United States. Tissue damage caused by ocular surgery leads to the production of prostaglandins, lipids that aid in recovery at the site of an injury, and an increase in blood flow to the affected area, which contribute to inflammation. The standard of care for post-operative inflammation and pain includes anti-inflammatory drugs such as corticosteroids, which improve patient comfort and accelerate recovery through disruption of the inflammatory cascade.

INVELTYS received FDA approval in August 2018 for the treatment of post-surgical inflammation and pain following all ocular surgery, and was commercially launched in the United States in January 2019. INVELTYS is the first and only post-operative ocular steroid shown effective and FDA approved for twice-a-day, or BID, dosing, has the highest concentration (1%) of LE on the market in the United States and is formulated with our AMPPLIFY technology, which enables INVELTYS to deliver 3.75x more drug to the target ocular tissue compared to an active comparator. We believe INVELTYS offers advantages over existing post-surgical treatment options due to its AMPPLIFY technology and being the first and only topical twice daily dosing, two-week course of treatment and safety data, including low incidence of reported IOP spikes, and efficacy data from our clinical trials.

In each of the two Phase 3 clinical trials of INVELTYS in patients who had undergone cataract surgery, administration of INVELTYS two times a day for 14 days achieved statistical significance for both primary efficacy endpoints of complete resolution of inflammation at day eight maintained through day 15 with no need for rescue medication and complete resolution of pain at day eight maintained through day 15 with no need for rescue medication. In each of these trials, INVELTYS was well tolerated with similar increases in IOP, a common side effect of steroids, compared to placebo and with no treatment-related significant adverse events observed during the course of either trial.

Our Preclinical Development Programs

We are progressing a pipeline of proprietary NCE development programs targeted to address front and back of the eye diseases, including our rTKI program, SEGRM program and STS program.

rTKI Program for Retinal Diseases (KPI-285/KPI-286)

The vascular endothelial growth factor, or VEGF, pathway plays a critical role in the formation of new blood vessels and increased permeability, two pathological processes that contribute to the vision loss associated with certain retinal diseases. These retinal diseases include Wet AMD, which involves either the leakage of existing blood vessels or the proliferation of poorly formed and leaky blood vessels at the back of the eye. These eye diseases can significantly reduce vision and eventually lead to blindness.

We have developed several novel, potent, selective rTKIs, including K0066, which can inhibit the VEGF pathway. We are assessing K0066 in two formulations, topical (KPI-285) and injectable depot (KPI-286) for the treatment of various retinal diseases. In preclinical rabbit studies, topical administration of KPI-285 achieved concentrations in tissues in the back of the eye well above the concentrations required for in vitro inhibition of 50% of the VEGF receptor kinase activity. We are exploring a depot formulation (KPI-286) that could provide extended release of the kinase inhibitor to the back of the eye, which would potentially reduce the need for frequent IVT injections.

SEGRM Program

Activation of the glucocorticoid receptor, or GR, can result in regulation of gene expression along both the transactivation, or TA, and transrepression, or TR, pathways. There is considerable third-party scientific evidence that the TR pathway alone is likely sufficient for anti-inflammatory and immunomodulatory activity. Furthermore, we believe the TA pathway is likely responsible for the adverse effects associated with ocular and systemic administration of corticosteroids, including elevated IOP, hypertension, and osteoporosis.

SEGRMs are a novel class of compounds designed to selectively regulate gene expression through the TR pathway while avoiding the TA pathway. As a result, we believe our SEGRM program has the potential for anti-inflammatory and immunomodulatory activity comparable to corticosteroids without their associated side effects. Our SEGRM program is currently in the lead optimization stage, and we are aiming to identify a development candidate for the program by the end of 2021.

Surface Targeted Steroid Program (KPI-333)

Although corticosteroids are potent inhibitors of ocular surface inflammation, long-term use is limited due to potential significant adverse effects, including elevated IOP and cataract formation. These adverse events are mediated by steroid exposure to the aqueous humor, trabecular meshwork and lens. A topical steroid that targets the ocular surface only could overcome the safety issues associated with long-term use of steroids.

We are developing KPI-333, an NCE, as a topical steroid that targets the ocular surface. In our preclinical animal studies, KPI-333 shows excellent efficacy without raising IOP. Based on this data, we believe KPI-333 may have the potential to address the significant unmet need for an effective chronic treatment of ocular surface inflammation associated with diseases such as dry eye.

Strategy

Our goal is to become a leading biopharmaceutical company focused on the discovery, development and commercialization of innovative therapies primarily for diseases of the front and back of the eye. Key elements of our strategy include:

- ***Successfully launch, and maximize the commercial potential of, EYSUVIS for the short-term treatment of dry eye disease.*** EYSUVIS is the first and only FDA-approved prescription product with an indication for the short-term (up to two weeks) treatment of the signs and symptoms of dry eye disease. EYSUVIS was approved in October 2020, and we commenced a full promotional launch in January 2021. We estimate that approximately 17.2 million people in the United States have been diagnosed with dry eye disease. We believe that EYSUVIS' broad mechanism of action, rapid onset of relief of both signs and symptoms, favorable tolerability profile and potential to be complementary to existing therapies, offers a favorable profile for the management dry eye associated conditions that would benefit from short-term treatment. We further believe that EYSUVIS could become the preferred first-line prescription therapy for treating dry eye flares, which affect the vast majority of dry eye patients. We plan to commercialize EYSUVIS with our specialty sales force which includes 91 TSMs, 14 RSLs, two ASLs and three DNAs. In 2021, we plan to increase our sales force from 91 TSMs to approximately 125 TSMs, pending the status of the COVID-19 pandemic.
- ***Maximize the commercial potential of INVELTYS for post-operative inflammation and pain.*** INVELTYS is the first and only FDA approved ocular corticosteroid product with a twice-a-day dosing regimen for the treatment of post-operative inflammation and pain following ocular surgery. Other approved topical ocular corticosteroid products for this indication are dosed three or four times a day. In January 2019, we began to commercialize INVELTYS in the United States with our own focused, specialty sales force, which promotes both EYSUVIS and INVELTYS.

- Advance our pipeline of preclinical development programs.** We are also progressing our pipeline of proprietary preclinical development programs targeting front and back of the eye diseases. These programs, all of which contain NCEs, include our rTKI compounds that inhibit the VEGF pathway, for the treatment of retinal diseases, including Wet AMD, our SEGRMs, which are a novel class of therapies designed to modify the downstream activity of the receptors to exhibit the anti-inflammatory and immunomodulatory properties without side effects associated with corticosteroids, and our novel surface targeting steroid designed to target the ocular surface and thus have the potential to have fewer side effects compared to traditional topical steroids. We own all intellectual property and worldwide rights to these preclinical development programs. Prior to initiating IND-enabling studies, we may consider potential collaborative partnership opportunities to advance product candidates we develop, including through these programs. We may also evaluate additional opportunities to address significant unmet medical needs by leveraging our proprietary AMPPLIFY technology.
- Business development through selective acquisitions and licensing.** We plan to pursue value-driven business development opportunities as they arise in order to enhance our business and product pipeline through strategically acquiring clinical or commercial-ready product candidates or approved revenue-generating products with growth potential, particularly in the ophthalmic area. We will also continue to assess the addition of other specialty therapeutic areas through both product/portfolio acquisitions or other business development activity with a similar focus on opportunities that we anticipate are or will become revenue generating and accretive.

Our AMPPLIFY Technology

Opportunities in Drug Delivery across Eye and other Mucosal Barriers

The body is surrounded by boundary tissues that play the important physiological role of preventing foreign bodies from penetrating into the body. The mucus that coats these tissues, the eyes, lung, cervical/vaginal tract and gastrointestinal tract, for example, serves as a protective barrier to trap and eliminate particulate matter, such as viruses, bacteria and allergens, before these agents can enter the underlying tissues and cause infections or elicit reactions. However, in playing this pivotal role of protection, mucus can also hinder medical treatments by limiting the penetration of medications to mucus-protected tissues, thereby reducing their therapeutic effect.

Mucus also makes it difficult to treat many ophthalmic diseases. The body can rapidly eliminate drugs delivered to the eye via the tear film protecting the surface of the eye, which can significantly limit the effectiveness of these drugs. This is the case both for drugs designed to treat conditions in the front of the eye, such as dry eye disease and post-operative inflammation and pain, as well as for drugs designed to treat conditions in the back of the eye, such as retinal diseases. We believe that our proprietary MPP technology, which we refer to as our AMPPLIFY technology, has the potential to address this clear unmet medical need for more efficient delivery of drugs. Our AMPPLIFY technology may have applications to other areas of the body that are protected by mucus, such as the lung, cervical/vaginal tract and gastrointestinal tract. We have demonstrated in preclinical studies that AMPPLIFY technology can be used to increase mucus penetration of over 15 classes of drugs.

MPP Technology

Our MPPs are selectively-sized nanoparticles, with average diameters of approximately 330 nanometers, and have non-covalent proprietary coatings. We believe that these two key attributes enable even distribution of drug particles on mucosal surfaces and significantly increase drug delivery to target tissues by enhancing mobility of drug particles through mucus and preventing drug particles from becoming trapped and eliminated by mucus. We believe this enables enhanced efficacy at equal or lower doses as well as less frequent dosing for improved patient convenience and compliance.

In a preclinical study, MPPs or conventional particles in a hypotonic solution were administered intravaginally to mice. Ten minutes after administration, the vaginal tissues were dissected and stained. The image on the left below shows the distribution of the conventional particles and the image on the right below shows the distribution of the MPPs.

The conventional particles aggregated in the luminal mucus and did not reach the target tissues. In contrast, the MPPs coated the entire vaginal epithelium, including all the target surfaces.

Source: Laura M. Ensign et al., Mucus-Penetrating Nanoparticles for Vaginal Drug Delivery Protect Against Herpes Simplex Virus, *Science Translational Medicine*, June 14, 2012.

Also, for ophthalmic applications, while a significant portion of conventionally formulated ophthalmic drugs are rapidly eliminated via the tear film, we have shown that our MPPs are capable of achieving higher concentration on the surface of the eye, thereby enabling the active drug substance to reach cells in the underlying ocular tissue at higher levels.

Table of Contents

The graphic below illustrates the ability of our MPP drug nanoparticles to penetrate the tear and membrane-bound mucins to reach the ocular surface, as compared to conventional, non-coated particles, which adhere to the mucins in the tear film and are cleared with the tears through blinking.

This graphic is included for illustrative purposes only and is not intended to provide a complete representation of the way in which our MPP drug nanoparticles interact with the ocular surface.

Our primary focus is to leverage our MPP technology, to enhance delivery of drugs into the eye. In preclinical studies, KPI-121 demonstrated favorable pharmacokinetic characteristics and increased drug penetration into ocular tissues as compared to a branded form of LE. In a preclinical study of ocular inflammation in rabbits, KPI-121 0.5% administered four times a day, or QID, showed a larger reduction of inflammation as compared to a branded form of LE 0.5% given QID, as measured by the mean aqueous humor cell counts after intravitreal injection of lipopolysaccharide. We also administered either 0.4% KPI-121 or 0.5% branded LE to the eyes of two groups of rabbits. As illustrated in the line graph below, the concentrations of LE in aqueous humor, a transparent gelatinous fluid that fills the anterior and posterior chambers between the lens and the cornea, of the rabbit eyes treated with KPI-121 were more than three times higher than the rabbit eyes treated with branded LE 30 minutes after dosing, at a 20% lower concentration.

LE in Aqueous Humor

We administered KPI-121 0.5%, LE suspension 0.5%, or 0.5% of an LE non-MPP nanoparticle, to the eyes of three groups of rabbits and measured the amount of LE that was delivered to the cornea. The non-MPP nanoparticle was similar in size to our MPP nanoparticles but lacked the proprietary surface coating used in our MPP nanoparticles. As illustrated in the line graph below, concentrations of LE in the cornea of the rabbit eyes treated with KPI-121 were more than three times higher than the concentrations in rabbits treated with branded LE between 20 and 40 minutes after dosing. In addition, the rabbit eyes treated with the non-MPP nanoparticles had concentrations of LE similar to that in the rabbit eyes treated with branded LE and did not display the improved drug bioavailability properties observed with KPI-121. We believe these results highlight the importance of our proprietary MPP technology and show that KPI-121's improved pharmacokinetic profile has the potential to reduce the dosing strength and/or frequency of administration of LE with KPI-121 as compared to LE suspension 0.5%.

LE in Cornea

Table of Contents

We also have demonstrated the potential of our MPP nanoparticles to increase the mucus penetration of over fifteen classes of drugs. While our primary focus is in ophthalmology, in preclinical studies, our MPP technology has been effective in delivering drugs to the lungs, cervical/vaginal tract, gastrointestinal tract and other mucus-protected tissues. We have the ability to vary the rate of drug release as appropriate for the targeted disease state and tissue. As a result, drugs can be delivered either in rapid release formulations or as sustained release formulations that slowly release drug over a time period that ranges from hours to days.

Eye Disease

The human eye is often segmented into two sections—the front and back of the eye. The front of the eye consists of tissues and structures responsible for the protection and maintenance of the eye (including the cornea, conjunctiva and tear film), for providing nutrition to the various tissues of the eye (aqueous humor) and for facilitating the optimal transfer and focusing of light to the retina (including the cornea, iris and lens). Front-of-the-eye diseases include ocular inflammation, dry eye disease, infection, allergy and refractive disorders. Clinicians typically treat diseases that affect the front of the eye with topically applied eye drops. A major limitation of these treatments is that the eye rapidly eliminates topically applied medications via the tear film, limiting the penetration of drugs into the ocular tissue.

The back of the eye contains the retina, which is the light sensing layer of tissue, the choroid, which is a key vascular layer of the eye, the vitreous humor, which is a transparent gel that fills the vitreous chamber between the lens and the retina, and the optic nerve, which transmits visual information from the retina to the brain. Common retinal diseases include AMD, Diabetic Retinopathy, or DR, Diabetic Macular Edema, or DME, and Retinal Vein Occlusion, or RVO. These diseases frequently result in damage to the vasculature of the eye, leading to poor function and/or leaking of existing vessels and often leading to proliferation of new, abnormal and leaky blood vessels in the back of the eye. These conditions can lead to retinal damage, scarring and irreversible loss of vision. The most common treatments for these diseases involve administration of biologic agents that block the VEGF pathway and prevent or retard the blood vessel leakage and/or proliferation. Unfortunately, clinicians must inject these biologic agents directly into the vitreous of the eye via frequent intravitreal injections, or IVTs, to maintain vision. An effective therapeutic to treat retinal diseases with improved dosing regimen would bring significant benefits to patients.

EYSUVIS for Dry Eye Disease

Dry Eye Disease Overview

Dry eye disease is a chronic, episodic, multifactorial disease affecting the tears and ocular surface that can result in tear film instability, inflammation, discomfort, visual disturbance and ocular surface damage. While the precise cause of dry eye disease is not fully understood, it often involves impairment of the lacrimal unit, which consists of the lacrimal glands, ocular surface and the sensory and motor nerves that connect them, and has a significant inflammatory component. There is significant published research that suggests that inflammation plays a major role in the development of dry eye disease. Dry eye disease can have a significant impact on quality of life and can potentially cause long-term damage to the ocular surface. Due to the impact of dry eye disease on tear film dynamics, the condition can affect performance of common vision-related activities such as reading, using a computer and driving, and can lead to complications associated with visual impairment. Dry eye disease is commonly treated by ophthalmologists and optometrists.

Hi Maria,

Everything official says STAAR Surgical Company, however we are branded as just "STAAR Surgical". For consistency, lets use STAAR Surgical Company.

Hi,

One last thing I wanted to confirm, on every item in the application the company name is "STAAR Surgical Company". But on page 1 of the application is just STAAR Surgical? Is "Company" part of the name?

Regards,

This statement does not include any fines that are deemed non-disciplinary by the issuing state (for example, it does not include non-disciplinary Citations and Fines issued by California). Please let us know if your state requires information regarding non-disciplinary fines.*

In January 2017, **McKesson** entered into an agreement (the "DEA Settlement") with the DEA and DOJ to settle all potential administrative and civil claims stemming from investigation into McKesson's practices for identifying and reporting suspicious orders of controlled substances, beginning in 2009. In addition, the following distribution centers' DEA registrations were or will be suspended for the following specified products and time periods: Aurora, Colorado - all controlled substances from January 17, 2017 to January 17, 2020; Livonia, Michigan - all controlled substances from January 17, 2017 to January 17, 2019; Washington Court House, Ohio - all controlled substances for the two-year period following completion of the Livonia suspension, from February 17, 2019 to February 17, 2021; and Lakeland, Florida - hydromorphone products from January 17, 2017 to January 17, 2018. "Our notable performance in fiscal 2021 reflects the continued momentum in our businesses and is a testament to the leadership role McKesson plays in the healthcare supply chain. McKesson's differentiated capabilities make us the partner of choice for our customers and government entities in their COVID-19 response efforts. I am proud of our employees and what we have accomplished together," said Brian Tyler, chief executive officer. "Despite the dynamic macro environment, the business demonstrated strong execution as we grew Adjusted Earnings per diluted share by 15%. These results allowed us to generate \$3.9 billion of Free Cash Flow."

"As we enter fiscal 2022, our top priorities remain the safety of our employees, the success of our customers, and fulfilling our leadership responsibility as the centralized distributor of COVID-19 vaccines and ancillary supplies in the U.S.," Mr. Tyler continued. "We have positioned the business for long-term growth through strategic investments in the areas of oncology and biopharma services and successful transformation of our operating model. Our accomplishments in fiscal 2021 are the foundation for the future and we remain confident in our ability to create long-term value for our shareholders."

Fourth-quarter revenues were \$59.1 billion, up 1% from a year ago, driven by market growth and higher volumes from retail national account customers in the U.S. Pharmaceutical segment, partially offset by the prior year acceleration in demand driven by the onset of the COVID-19 pandemic. Non-GAAP Financial Measures

GAAP refers to the U.S. generally accepted accounting principles. This press release includes GAAP financial measures as well as Non-GAAP financial measures, including Adjusted Gross Profit, Adjusted Operating Expenses, Adjusted Other Income, Adjusted Equity Income from Change Healthcare, Adjusted Income Tax Expense, Adjusted Earnings, Adjusted Earnings per Diluted Share, Adjusted Segment Operating Profit, Adjusted Segment Operating Profit Margin, Adjusted Corporate Expenses, Adjusted Operating Profit, FX-Adjusted results and Free Cash Flow which are financial measures not calculated in accordance with GAAP. Refer to the "Supplemental Non-GAAP Financial Information" section of the accompanying financial statement tables for the definitions and usefulness of the Company's Non-GAAP financial measures and the attached schedules for reconciliations of the differences between the Non-GAAP financial measures and their most directly comparable GAAP financial measures.

The Company does not provide forward-looking guidance on a GAAP basis as McKesson is unable to provide a quantitative reconciliation of this forward-looking Non-GAAP measure to the most directly comparable forward-looking GAAP measure, without unreasonable effort, because McKesson cannot reliably forecast LIFO inventory-related adjustments, gains from antitrust legal settlements, restructuring, impairment and related charges, and other adjustments, which are difficult to predict and estimate. These items are inherently uncertain and depend on various factors, many of which are beyond the company's control, and as such, any associated estimate and its impact on GAAP performance could vary materially.

Cautionary Statements

Except for historical information contained in this press release, matters discussed may constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, that involve risks and uncertainties that could cause actual results to differ materially from those in those statements. It is not possible to identify all such risks and uncertainties. The reader should not place undue reliance on forward-looking statements, such as financial performance forecasts, which speak only as of the date they are first made. Except to the extent required by law, the company undertakes no obligation to publicly update forward-looking statements. Forward-looking statements may be identified by their use of terminology such as "believes", "expects", "anticipates", "may", "will", "should", "seeks", "approximately", "intends", "plans", "estimates" or the negative of these words or other comparable terminology. The discussion of financial trends, strategy, plans, assumptions or intentions may also include forward-looking statements. We encourage investors to read the important risk factors described in the company's Form 10-K, Form 10-Q and Form 8-K reports filed with the Securities and Exchange Commission.

These risk factors include, but are not limited to: we experience costly and disruptive legal disputes and settlements, including regarding our role in distributing controlled substances such as opioids; we might experience losses not covered by insurance; we might be adversely impacted by changes in tax legislation or challenges to our tax positions; we from time to time record significant charges from impairment to goodwill, intangibles and other assets or investments; we experience cybersecurity incidents and might experience significant computer system compromises or data breaches; we might experience significant problems with information systems or networks; we may be unsuccessful in retail pharmacy profitability; we might be harmed by large customer purchase reductions, payment defaults or contract non-renewal; our contracts with government entities involve future funding and compliance risks; we might be harmed by changes in our relationships or contracts with suppliers; we might be adversely impacted by healthcare reform such as changes in pricing and reimbursement models; we might be adversely impacted by changes or disruptions in product supply and we have experienced and may experience difficulties in sourcing products and changes in pricing due to the effects of the COVID-19 pandemic on supply chains; we might be adversely impacted as a result of our distribution of generic pharmaceuticals; we might be adversely impacted by an economic slowdown (including the effects we have experienced from the COVID-19 pandemic) or recession and by disruption in capital and credit markets that might impede our access credit, increase our borrowing costs and impair the financial soundness of our customers and suppliers; we might be adversely impacted by fluctuations in foreign currency exchange rates; we might be adversely impacted by events outside of our control, such as widespread public health issues (including the effects we have experienced from the COVID-19 pandemic), natural disasters, political events and other catastrophic events; we may be adversely affected by global climate change or by legal, regulatory or market responses to such change; and we face uncertainties and risks related to vaccination distribution and related ancillary supply kit programs.

(b) We calculate loss per diluted common share from continuing operations attributable to McKesson Corporation (GAAP) for the year ended March 31, 2021 using a weighted average of 160.6 million common shares, which excludes dilutive securities from the denominator due to their antidilutive effect when calculating a net loss per diluted share. We calculate adjusted earnings per diluted share (Non-GAAP) for the year ended March 31, 2021 on a fully diluted basis, using a weighted average of 162.0 million common shares. Because we show the GAAP to Non-GAAP per share reconciling items on a fully diluted basis, any footing differences in those items are due to different weighted average share counts. This methodology results in per share difference of \$0.24 for the year ended March 31, 2021.

(c) Adjusted earnings per diluted share on an FX-adjusted basis for the three months and year ended March 31, 2021 was \$5.01 and \$17.15, respectively, which excludes the foreign currency exchange effect of \$0.04 and \$0.06, respectively.

McKESSON CORPORATION
FINANCIAL STATEMENT NOTES

- (1) Amortization of acquisition-related intangibles includes our proportionate share of loss from investment in Change Healthcare Joint Venture within Other. Such amount includes the amortization of equity investment intangibles and other acquired intangibles of \$64 million for the three months ended March 31, 2020 and \$267 million for the year ended March 31, 2020. These charges are included under "equity earnings and charges from investment in Change Healthcare Joint Venture" in the reconciliation of McKesson's GAAP operating results to adjusted results (Non-GAAP) provided in Schedule 2 of the accompanying financial statement tables.
 - (2) Transaction-related expenses and adjustments for the year ended March 31, 2020 includes a pre-tax charge of \$246 million (\$184 million after-tax) within Other, representing the difference between our proportionate share of the IPO proceeds and the dilution effect on our investment in Change Healthcare Joint Venture carrying value. This charge is included under "equity earnings and charges from investment in Change Healthcare Joint Venture" in the reconciliation of McKesson's GAAP operating results to adjusted results (Non-GAAP) provided in Schedule 2 of the accompanying financial statement tables.
 - (3) Transaction-related expenses and adjustments for the three months and year ended March 31, 2020 includes an estimated gain of \$414 million (pre-tax and after-tax) within Other recognized upon the separation of our investment in Change Healthcare LLC ("Change Healthcare"). The separation was completed on March 10, 2020 and involved a series of transactions, including an exchange offer to split-off our wholly-owned subsidiary PF2 SpinCo, Inc. ("SpinCo") which held all of McKesson's interest in Change Healthcare and a merger of SpinCo with and into Change Healthcare, Inc. ("Change"). McKesson no longer holds an interest in any securities of Change Healthcare or Change following the transactions. After the separation, Change Healthcare is required under an agreement to pay McKesson 85% of the net cash tax savings realized, or so deemed, from the depreciation or amortization allocated to Change by McKesson. The receipt of any payments from this agreement is dependent upon Change benefiting from this depreciation or amortization in future tax return filings, which creates uncertainty such that McKesson accounts for the agreement as a gain contingency. This estimated gain is included under "Equity earnings and charges from investment in Change Healthcare Joint Venture" in the reconciliation of McKesson's GAAP operating results to adjusted results (Non-GAAP) provided in Schedule 2 of the accompanying financial statement tables.
 - (4) Transaction-related expenses and adjustments for the years ended March 31, 2021 and 2020 includes charges of \$58 million (pre-tax and after-tax) and \$275 million (pre-tax and after-tax) to remeasure assets and liabilities held for sale to fair value less costs to sell related to the contribution of the majority of our German pharmaceutical wholesale business to create a joint venture in which McKesson has a non-controlling interest within our International segment. On November 2, 2020, McKesson announced the completion of the creation of the joint venture. These charges are included under "total operating expenses" in the reconciliation of McKesson's GAAP operating results to adjusted results (Non-GAAP) provided in Schedule 2 of the accompanying financial statement tables.
 - (5) Restructuring, impairment, and related charges, net for the three months and year ended March 31, 2021 includes pre-tax charges of \$63 million (\$47 million after-tax) and \$334 million (\$275 million after-tax), primarily for our Europe and Canada businesses as well as Corporate expenses, net. The three months and year ended March 31, 2020 includes charges of \$64 million (\$48 million after-tax) and \$268 million (\$215 million after-tax), primarily for our Canada and Europe businesses as well as Corporate expenses, net. Our Europe and Canada businesses are included within International. These charges are included under "total operating expenses" in the reconciliation of McKesson's GAAP operating results to adjusted results (Non-GAAP) provided in Schedule 2 of the accompanying financial statement tables. Additionally, restructuring, impairment, and related charges, net for the three months ended March 31, 2020, and the years ended March 31, 2021 and 2020 includes immaterial amounts under "gross profit" in the reconciliation of McKesson's GAAP operating results to adjusted results (Non-GAAP) provided in Schedule 2 of the accompanying financial statement tables.
 - (6) Claims and litigation charges, net for the year ended March 31, 2021 includes a pre-tax charge of \$8.1 billion (\$6.8 billion after-tax) related to our estimated liability for opioid-related claims of states, their political subdivisions, and other government entities, within Corporate expenses, net. This charge is included under "total operating expenses" in the reconciliation of McKesson's GAAP operating results to adjusted results (Non-GAAP) provided in Schedule 2 of the accompanying financial statement tables.
-

FINANCIAL STATEMENT NOTES (continued)

- (7) Claims and litigation charges, net for the year ended March 31, 2021 includes a pre-tax net gain of \$131 million (\$97 million after-tax) related to insurance proceeds received, net of attorneys' fees and expenses awarded to plaintiffs' counsel, in connection with the \$175 million settlement of the shareholder derivative action related to our controlled substances monitoring program within Corporate expenses, net. This gain is included under "total operating expenses" in the reconciliation of McKesson's GAAP operating results to adjusted results (Non-GAAP) provided in Schedule 2 of the accompanying financial statement tables. In financial reporting periods prior to the three months ended December 31, 2020, this gain was included under other adjustments, net.
- (8) Claims and litigation charges, net for the year ended March 31, 2020 includes a pre-tax charge of \$82 million (\$61 million after-tax) recorded in connection with an agreement to settle all opioids related claims filed by two Ohio counties within Corporate expenses, net. This charge is included under "total operating expenses" in the reconciliation of McKesson's GAAP operating results to adjusted results (Non-GAAP) provided in Schedule 2 of the accompanying financial statement tables. In financial reporting periods prior to the three months ended December 31, 2020, this charge was included under other adjustments, net.
- (9) Other adjustments, net for the year ended March 31, 2020 includes pre-tax charges of \$122 million (\$90 million after-tax) representing settlement charges related to our frozen U.S. defined benefit pension plan, within Corporate expenses, net. This charge is included under "other income (expense), net" in the reconciliation of McKesson's GAAP operating results to adjusted results (Non-GAAP) provided in Schedule 2 of the accompanying financial statement tables.
- (10) Other adjustments, net for the year ended March 31, 2020 includes a pre-tax charge of \$1.2 billion (\$864 million after-tax) representing an other-than-temporary impairment of McKesson's investment in Change Healthcare Joint Venture within Other. This charge is included under "equity earnings and charges from investment in Change Healthcare Joint Venture" in the reconciliation of McKesson's GAAP operating results to adjusted results (Non-GAAP) provided in Schedule 2 of the accompanying financial statement tables.
- (11) Other adjustments, net for the year ended March 31, 2021 includes a non-cash goodwill impairment charge of \$69 million (pre-tax and after-tax) within International related to our European retail business, partially offset by the related indirect effect of \$4 million benefit in net income attributable to noncontrolling interests. This impairment charge is included under "total operating expenses" in the reconciliation of McKesson's GAAP operating results to adjusted results (Non-GAAP) provided in Schedule 2 of the accompanying financial statement tables.
- (12) Other adjustments, net for the year ended March 31, 2021 includes a pre-tax charge of \$50 million (\$37 million after-tax) related to our estimated liability under the New York ("NY") state Opioid Stewardship Act ("OSA") within U.S. Pharmaceutical for calendar years 2017 and 2018. In December 2018, a federal district court struck down the law as unconstitutional and NY replaced the OSA with an excise tax on opioid sales in the state of NY covering calendar year 2019 sales and beyond. In September 2020, an appellate court reversed on procedural grounds the district court's decision. An amendment to the Act made clear that the OSA applies only to NY opioid sales or distributions for calendar years 2017 and 2018. To the extent that further court decisions do not strike down the law, we will face liability under the OSA and we believe the estimated OSA liability is one-time in nature because the liability is retroactively imposed on sales or distributions in 2017 and 2018, and is not indicative of future results. Inclusion of this accrual in our adjusted results would distort current period performance. This charge is included under "total operating expenses" in the reconciliation of McKesson's GAAP operating results to adjusted results (Non-GAAP) provided in Schedule 2 of the accompanying financial statement tables.

McKESSON CORPORATION
SUPPLEMENTAL NON-GAAP FINANCIAL INFORMATION

In an effort to provide investors with additional information regarding the Company's financial results as determined by generally accepted accounting principles ("GAAP"), McKesson Corporation (the "Company" or "we") also presents the following Non-GAAP measures in this press release.

- **Adjusted Gross Profit (Non-GAAP):** We define Adjusted Gross Profit as GAAP gross profit, excluding transaction-related expenses and adjustments, last-in, first-out ("LIFO") inventory-related adjustments, gains from antitrust legal settlements, restructuring, impairment, and related charges, and other adjustments.
 - **Adjusted Operating Expenses (Non-GAAP):** We define Adjusted Operating Expenses as GAAP total operating expenses, excluding amortization of acquisition-related intangibles, transaction-related expenses and adjustments, restructuring, impairment, and related charges, claims and litigation charges, and other adjustments.
 - **Adjusted Other Income (Non-GAAP):** We define Adjusted Other Income as GAAP other income, net, excluding amortization of acquisition-related intangibles, transaction-related expenses and adjustments, and other adjustments.
 - **Adjusted Equity Income from Change Healthcare (Non-GAAP):** We define Adjusted Equity Income from Change Healthcare as GAAP equity earnings and charges from investment in Change Healthcare Joint Venture, excluding amortization of acquisition-related intangibles, transaction-related expenses and adjustments, and other adjustments. We completed the separation from our investment in Change Healthcare Joint Venture during the fourth quarter of fiscal 2020.
 - **Adjusted Income Tax Expense (Non-GAAP):** We define Adjusted Income Tax Expense as GAAP income tax benefit (expense), excluding the income tax effects of amortization of acquisition-related intangibles, transaction-related expenses and adjustments, LIFO inventory-related adjustments, gains from antitrust legal settlements, restructuring, impairment, and related charges, claims and litigation charges, and other adjustments. Income tax effects are calculated in accordance with Accounting Standards Codification ("ASC") 740, "Income Taxes," which is the same accounting principle used by the Company when presenting its GAAP financial results.
 - **Adjusted Earnings (Non-GAAP):** We define Adjusted Earnings as GAAP income (loss) from continuing operations attributable to McKesson, excluding amortization of acquisition-related intangibles, transaction-related expenses and adjustments, LIFO inventory-related adjustments, gains from antitrust legal settlements, restructuring, impairment, and related charges, claims and litigation charges, other adjustments as well as the related income tax effects for each of these items, as applicable.
 - **Adjusted Earnings per Diluted Share (Non-GAAP):** We define Adjusted Earnings per Diluted Share as GAAP earnings (loss) per diluted common share from continuing operations attributable to McKesson, excluding per share impacts of amortization of acquisition-related intangibles, transaction-related expenses and adjustments, LIFO inventory-related adjustments, gains from antitrust legal settlements, restructuring, impairment, and related charges, claims and litigation charges, other adjustments as well as the related income tax effects for each of these items, as applicable, divided by diluted weighted-average shares outstanding. Adjusted Earnings per Diluted Share was not previously adjusted for the effect of potentially dilutive securities issued by the Change Healthcare Joint Venture.
 - **Adjusted Segment Operating Profit (Non-GAAP) and Adjusted Segment Operating Profit Margin (Non-GAAP):** We define Adjusted Segment Operating Profit as GAAP segment operating profit (loss), excluding amortization of acquisition-related intangibles, transaction-related expenses and adjustments, LIFO inventory-related adjustments, gains from antitrust legal settlements, restructuring, impairment, and related charges, and other adjustments. We define Adjusted Segment Operating Profit Margin as Adjusted Segment Operating Profit (Non-GAAP) divided by GAAP segment revenues.
 - **Adjusted Corporate Expenses (Non-GAAP):** We define Adjusted Corporate Expenses as GAAP corporate expenses, net, excluding transaction-related expenses and adjustments, restructuring, impairment, and related charges, claims and litigation charges, and other adjustments.
-

SUPPLEMENTAL NON-GAAP FINANCIAL INFORMATION (continued)

- **Adjusted Operating Profit (Non-GAAP):** We define Adjusted Operating Profit as GAAP income (loss) from continuing operations before interest expense and income taxes, excluding amortization of acquisition-related intangibles, transaction-related expenses and adjustments, LIFO inventory-related adjustments, gains from antitrust legal settlements, restructuring, impairment, and related charges, claims and litigation charges, and other adjustments.

The following provides further details regarding the adjustments made to our GAAP financial results to arrive at our Non-GAAP measures as defined above:

Amortization of acquisition-related intangibles - Amortization expenses of intangible assets directly related to business combinations and the formation of joint ventures.

Transaction-related expenses and adjustments - Transaction, integration, and other expenses that are directly related to business combinations, the formation of joint ventures, divestitures, and other transaction-related costs including initial public offering costs. Examples include transaction closing costs, professional service fees, legal fees, severance charges, retention payments and employee relocation expenses, facility or other exit-related expenses, certain fair value adjustments including deferred revenues, contingent consideration and inventory, recoveries of acquisition-related expenses or post-closing expenses, bridge loan fees, gains or losses on business combinations, and divestitures of businesses that do not qualify as discontinued operations.

LIFO inventory-related adjustments - LIFO inventory-related non-cash expense or credit adjustments.

Gains from antitrust legal settlements - Net cash proceeds representing the Company's share of antitrust lawsuit settlements.

Restructuring, impairment, and related charges - Restructuring charges that are incurred for programs in which we change our operations, the scope of a business undertaken by our business units, or the manner in which that business is conducted as well as long-lived asset impairments. Such charges may include employee severance, retention bonuses, facility closure or consolidation costs, lease or contract termination costs, asset impairments, accelerated depreciation and amortization, and other related expenses. The restructuring programs may be implemented due to the sale or discontinuation of a product line, reorganization or management structure changes, headcount rationalization, realignment of operations or products, integration of acquired businesses, and/or company-wide cost saving initiatives. The amount and/or frequency of these restructuring charges are not part of our underlying business, which include normal levels of reinvestment in the business. Any credit adjustments due to subsequent changes in estimates are also excluded from adjusted results.

Claims and litigation charges - Adjustments to certain of the Company's reserves, including those related to estimated probable settlements for its controlled substance monitoring and reporting, and opioid-related claims, as well as any applicable income items or credit adjustments due to subsequent changes in estimates. This does not include our legal fees to defend claims, which are expensed as incurred.

Other adjustments - The Company evaluates the nature and significance of transactions qualitatively and quantitatively on an individual basis and may include them in the determination of our adjusted results from time to time. While not all-inclusive, other adjustments may include: other asset impairments; gains or losses from debt extinguishment; and other similar substantive and/or infrequent items as deemed appropriate.

The Company evaluates the aforementioned Non-GAAP measures on a periodic basis and updates the definitions from time to time. The evaluation considers both the quantitative and qualitative aspects of the Company's presentation of Non-GAAP adjusted results. A reconciliation of McKesson's GAAP financial results to Non-GAAP financial results is provided in Schedules 2 and 3 of the financial statement tables included with this release.

Additionally, the Company's investment in Change Healthcare Joint Venture's financial results are adjusted for the above noted items, except for the effect of potentially dilutive securities issued by the joint venture on our adjusted results per diluted share.

SUPPLEMENTAL NON-GAAP FINANCIAL INFORMATION (continued)

- **FX-Adjusted (Non-GAAP):** McKesson also presents its GAAP financial results and adjusted results (Non-GAAP) on an FX-Adjusted basis. To present our financial results on an FX-Adjusted basis, we convert current year period results of our operations in foreign countries, which are recorded in local currencies, into U.S. dollars by applying the average foreign currency exchange rates of the comparable prior year period. To present Adjusted Earnings per Diluted Share on an FX-Adjusted basis, we estimate the impact of foreign currency rate fluctuations on the Company's noncontrolling interests and adjusted income tax expense, which may vary from quarter to quarter. The supplemental FX-Adjusted information of the Company's GAAP financial results and adjusted results (Non-GAAP) is provided in Schedule 3 of the financial statement tables included with this release.
- **Free Cash Flow (Non-GAAP):** We define free cash flow as net cash provided by (used in) operating activities less payments for property, plant and equipment and capitalized software expenditures, as disclosed in our condensed consolidated statements of cash flows. A reconciliation of McKesson's GAAP financial results to Free Cash Flow (Non-GAAP) is provided in Schedule 6 of the financial statement tables included with this release.

The Company believes the presentation of Non-GAAP measures provides useful supplemental information to investors with regard to its operating performance, as well as assists with the comparison of its past financial performance to the Company's future financial results. Moreover, the Company believes that the presentation of Non-GAAP measures assists investors' ability to compare its financial results to those of other companies in the same industry. However, the Company's Non-GAAP measures used in the press tables may be defined and calculated differently by other companies in the same industry.

The Company internally uses both GAAP and Non-GAAP financial measures in connection with its own financial planning and reporting processes. Management utilizes Non-GAAP financial measures when allocating resources, deploying capital, as well as assessing business performance, and determining employee incentive compensation. The Company conducts its businesses internationally in local currencies, including Euro, British pound sterling, and Canadian dollars. As a result, the comparability of our results reported in U.S. dollars can be affected by changes in foreign currency exchange rates. We present FX-Adjusted information to provide a framework for assessing how our business performed excluding the estimated effect of foreign currency exchange rate fluctuations. We believe free cash flow is important to management and useful to investors as a supplemental measure as it indicates the cash flow available for working capital needs, re-investment opportunities, strategic acquisitions, dividend payments, or other strategic uses of cash. Nonetheless, Non-GAAP adjusted results and related Non-GAAP measures disclosed by the Company should not be considered a substitute for, nor superior to, financial results and measures as determined or calculated in accordance with GAAP.

Please note that the disciplinary actions described below do NOT pertain to operations at the location set forth in this application.

McKesson Corporation and its subsidiaries (hereinafter “McKesson”) delivers pharmaceutical and medical products and business services to retail pharmacies and institutional providers like hospitals and health systems throughout North America and globally. Over the past 185 years, McKesson has developed multiple businesses that operate pharmacies, medical supply distribution centers, wholesale drug distribution centers, 3PL facilities, repackaging facilities, and other entities subject to federal and state regulation. Currently, McKesson owns and operates over 97 facilities in the United States that are licensed, permitted, or registered with the respective state agency with jurisdiction over its business type. Due to the breadth of its operations, it is practical that we limit this summary to disciplinary actions taken against these facilities during the last five years or the time frame specified in the question. *The information in this statement is provided to the best of our knowledge and belief and includes all public disciplinary actions. This statement does not include any fines that are deemed non-disciplinary by the issuing state (for example, it does not include non-disciplinary Citations and Fines issued by California). Please let us know if your state requires information regarding non-disciplinary fines.*

In 2015, **McKesson** entered into a Final Consent Order with the Maryland Board of Pharmacy concerning Landover DC. The Final Consent Order resolved allegations that, from January 2009 – December 2009, McKesson’s Landover DC purchased approximately \$2.5 million of prescription drugs/devices from an unlicensed wholesale distributor. Since the period when the alleged violations occurred, McKesson has made numerous enhancements and significant additional investments in its compliance program related to the acquisition and distribution of pharmaceutical drug products. McKesson paid a \$15,000 fine in June 2015.

In April 2016 the **McKesson Medical-Surgical Inc.** Clear Brook, VA facility, which is a wholly-owned subsidiary of McKesson Corporation, was fined by the California Board of Pharmacy for failure to report a new Designated Representative within 30 days of change. McKesson paid \$200 fine. The fine is related to a non-disciplinary action.

In September 2016, **McKesson Medical Surgical, Inc.** entered into a Consent Agreement for a \$2,750 fine with the Louisiana Board of Drug and Device concerning its St. Rose, Louisiana distribution center (the “St. Rose DC”). McKesson Medical Surgical, Inc agreed that it failed to maintain copies of current licenses for customers that are shipped or sold drugs or devices, or, if customer licenses are maintained offsite, by failing to maintain at the licensed distribution location a list of customer names, addresses, license numbers, and license expiration dates for all customers that are shipped or sold drugs or devices.

In 2016 **McKesson Corporation** was fined by the California Board of Pharmacy related to the fact that its Washington Court House, OH distribution center failed to timely notify the state of California when their designated representative left the company. The designated representative required by the home state was always in place. The new designated representative is now and has been since August 6, 2014 fully licensed. McKesson paid \$400 fine. The fine is related to a non-disciplinary action.

In 2016 **McKesson Medical-Surgical Inc.** a wholly-owned subsidiary of McKesson Corporation was fined by the California Board of Pharmacy at its Clear Brook, VA location for failure to report a new Designated Representative within 30 days of change. McKesson paid \$200 fine. The fine is related to a non-disciplinary action.

In January 2017, **McKesson** entered into an agreement (the "DEA Settlement") with the DEA and DOJ to settle all potential administrative and civil claims stemming from investigation into McKesson's practices for identifying and reporting suspicious orders of controlled substances, beginning in 2009. Under the settlement McKesson agreed to pay \$150 million and to implement remedial measures related to its controlled substances monitoring program. In addition, the following distribution centers' DEA registrations were or will be suspended for the following specified products and time periods: Aurora, Colorado - all controlled substances from January 17, 2017 to January 17, 2020; Livonia, Michigan - all controlled substances from January 17, 2017 to January 17, 2019; Washington Court House, Ohio - all controlled substances for the two-year period following completion of the Livonia suspension, from February 17, 2019 to February 17, 2021; and Lakeland, Florida - hydromorphone products from January 17, 2017 to January 17, 2018. The terms of the suspensions of the Livonia, Washington Court House, and Lakeland facilities permit those distribution centers to continue shipping controlled substances to customers that purchase products under McKesson's contract with the Department of Veterans Affairs.

In March 2017, in response to the DEA Settlement, the New York State Department of Health, Bureau of Narcotic Enforcement, suspended the Class 2A (Out-of-State) controlled substance license for **McKesson's** Livonia, Michigan distribution center. The permit was suspended until January 1, 2019, consistent with the suspension timeframes of the DEA Settlement. No other suspensions or fines were issued, and the New York action aligned with the suspension periods and expectations agreed to in the DEA Settlement.

In June 2017, in response to the DEA Settlement, the Idaho Board of Pharmacy suspended the Controlled Substance Registrations of **McKesson** distribution centers in Washington Court House, Ohio and the Livonia, Michigan. The Livonia Idaho controlled substance registration was suspended for two years, effective 6/17/17 to 1/17/19. The Livonia Louisiana controlled substance registration was suspended for two years, effective 6/17/17 to 1/17/19. The Washington Court House Louisiana controlled substance registration is suspended for two years, effective 1/18/19 to 1/18/21. McKesson also agreed to reimburse the Louisiana Board \$250.00 for administrative costs. No other suspensions or fines were issued, and the Louisiana action aligns with the suspension periods and expectations agreed to in the DEA Settlement.

In December 2017, in response to the DEA Settlement, the New Hampshire Board of Pharmacy suspended the right of **McKesson's** distribution centers in Washington Court House, Ohio and Livonia, Michigan to distribute controlled substances. The Livonia distribution center's ability to distribute controlled substance was suspended, effective 12/12/17 to 1/17/19. The Washington Court House distribution center's ability to distribute controlled substance will be suspended for two years, effective 1/18/19 to 1/18/21. McKesson also agreed to pay an administrative fine of \$2,000.00. No other suspensions of fines were issued, and the New Hampshire action aligns with the suspension periods and expectations agreed to in the DEA Settlement.

McKesson also agreed to pay a settlement amount of \$10,000.00. No other suspensions of fines were issued.

On March 14, 2018, in response to the DEA Settlement, the Iowa Board of Pharmacy voted to issue Controlled Substance Act registrations for two of **McKesson Corporation's** distribution centers. The Board issued the registrations pursuant to Controlled Substances Act Registration by Consent Agreements (the "Agreements"). The Agreements are applicable only to the registrations and do not impose discipline upon the distribution center's wholesale permits. The general terms of the Agreements are summarized below:

- Livonia, Michigan - the facility's Iowa controlled substance registration was issued but was restricted. The facility was prohibited from distributing controlled substances into the state until 1/17/2019 except for various exceptions that mirror exceptions in the DEA settlement; and
- Washington Court House, Ohio - the facility's Iowa controlled substance registration was issued but is restricted and the facility will be prohibited from distributing controlled substances into the state from 1/18/19 to 1/18/2021 except for various exceptions that mirror exceptions in the DEA settlement.

On March 20, 2018, in response to the DEA Settlement, the Maryland State Board of Pharmacy suspended the right of **McKesson's** distribution center in Washington Court House, Ohio to distribute controlled substances. The stipulations apply to the McKesson distribution centers located in Washington Court House, Ohio and Aurora, Colorado. The Washington Court House facility's right to distribute controlled substances into Utah has been suspended effective 1/18/2019 to 1/18/2021 and the Aurora facility's right to distribute controlled substances into Utah has been suspended from 4/9/2018 to 1/17/2020. The Utah Board of Pharmacy's action mirrors the suspension and exceptions agreed to in McKesson's settlement with the DEA Settlement.

In 2018 May **McKesson Corporation** was fined by the California Board of Pharmacy related to the fact that its Memphis, TN distribution center failed to timely notify the state of California when their designated representative left the company. The designated representative required by the home state was always in place. The new designated representative is now and has been since December 1, 2017 fully licensed. McKesson paid \$1,000 fine. The fine is related to a non-disciplinary action.

On May 31, 2018, in response to the DEA Settlement, **McKesson** entered into a consent agreement with the Oregon Board of Pharmacy (the "Oregon Consent"). The suspension period imposed by Virginia aligns with the federal DEA suspensions and with those imposed by other states that have taken reciprocal action based on the DEA Settlement.

On January 14, 2019 **McKesson Corporation** entered into a settlement for a payment of \$10,000 on behalf of a now-closed facility in Connecticut. This settlement arose from the failure of employees of McKesson's contracted local delivery carrier to secure their vehicles when making deliveries within Connecticut. Importantly, there were never any reports of theft or loss based on this failure and McKesson's contract with the local delivery carrier specifically required security measures, including the securing of vehicles.

On February 27, 2019, in response to the DEA Settlement, **McKesson** entered into a consent agreement with the Wisconsin Pharmacy Examining Board (the "Wisconsin Consent"). Hi Maria

The Hanover Park facility is devices only. For that reason, IL will not issue a license. See the attached explanation from the board.

The Bartlett location will/does handle drugs so they were able to obtain the IL wholesaler license. A copy of the bond is also attached. Please let me know if you need anything else.

Thanks!

Hello Danna,

Thank you for your response.

Please note that the Department does NOT issue a wholesale drug distributor license for medical devices (prescription or non-prescription) unless there is a prescription drug within the medical device. Please see the definition of wholesale drug distributor below:

"Wholesale distributor" means anyone engaged in wholesale distribution of prescription drugs, including, but not limited to, manufacturers; repackers; own-label distributors; private-label distributors; jobbers; brokers; warehouses, including manufacturers' and distributors' warehouses, chain drug warehouses, and wholesale drug warehouses; independent wholesale drug traders; and retail pharmacies that conduct wholesale distributions.

As this facility does not distribute prescription drugs, I am unable to issue a license.

Please send me an email to cancel this application. Also, the old ownership will need to email me to close out their license.

Thank you,

Please note that the disciplinary actions described below do NOT pertain to operations at the location set forth in this application.

McKesson Corporation and its subsidiaries (hereinafter “McKesson”) delivers pharmaceutical and medical products and business services to retail pharmacies and institutional providers like hospitals and health systems throughout North America and globally. Over the past 185 years, McKesson has developed multiple businesses that operate pharmacies, medical supply distribution centers, wholesale drug distribution centers, 3PL facilities, repackaging facilities, and other entities subject to federal and state regulation. Currently, McKesson owns and operates over 97 facilities in the United States that are licensed, permitted, or registered with the respective state agency with jurisdiction over its business type. Due to the breadth of its operations, it is practical that we limit this summary to disciplinary actions taken against these facilities during the last five years or the time frame specified in the question. ***The information in this statement is provided to the best of our knowledge and belief and includes all public disciplinary actions. This statement does not include any fines that are deemed non-disciplinary by the issuing state (for example, it does not include non-disciplinary Citations and Fines issued by California). Please let us know if your state requires information regarding non-disciplinary fines.***

In 2015, **McKesson** entered into a Final Consent Order with the Maryland Board of Pharmacy concerning Landover DC. The Final Consent Order resolved allegations that, from January 2009 – December 2009, McKesson’s Landover DC purchased approximately \$2.5 million of prescription drugs/devices from an unlicensed wholesale distributor. Since the period when the alleged violations occurred, McKesson has made numerous enhancements and significant additional investments in its compliance program related to the acquisition and distribution of pharmaceutical drug products. McKesson paid a \$15,000 fine in June 2015.

In April 2016 the **McKesson Medical-Surgical Inc.** Clear Brook, VA facility, which is a wholly-owned subsidiary of McKesson Corporation, was fined by the California Board of Pharmacy for failure to report a new Designated Representative within 30 days of change. McKesson paid \$200 fine. The fine is related to a non-disciplinary action.

In September 2016, **McKesson Medical Surgical, Inc.** entered into a Consent Agreement for a \$2,750 fine with the Louisiana Board of Drug and Device concerning its St. Rose, Louisiana distribution center (the “St. Rose DC”). McKesson Medical Surgical, Inc agreed that it failed to maintain copies of current licenses for customers that are shipped or sold drugs or devices, or, if customer licenses are maintained offsite, by failing to maintain at the licensed distribution location a list of customer names, addresses, license numbers, and license expiration dates for all customers that are shipped or sold drugs or devices.

In 2016 **McKesson Corporation** was fined by the California Board of Pharmacy related to the fact that its Washington Court House, OH distribution center failed to timely notify the state of California when their designated representative left the company. The designated representative required by the home state was always in place. The new designated representative is now and has been since August 6, 2014 fully licensed. McKesson paid \$400 fine. The fine is related to a non-disciplinary action.

In 2016 **McKesson Medical-Surgical Inc.** a wholly-owned subsidiary of McKesson Corporation was fined by the California Board of Pharmacy at its Clear Brook, VA location for failure to report a new Designated Representative within 30 days of change. McKesson paid \$200 fine. The fine is related to a non-disciplinary action.

In January 2017, **McKesson** entered into an agreement (the "DEA Settlement") with the DEA and DOJ to settle all potential administrative and civil claims stemming from investigation into McKesson's practices for identifying and reporting suspicious orders of controlled substances, beginning in 2009. Under the settlement McKesson agreed to pay \$150 million and to implement remedial measures related to its controlled substances monitoring program. In addition, the following distribution centers' DEA registrations were or will be suspended for the following specified products and time periods: Aurora, Colorado - all controlled substances from January 17, 2017 to January 17, 2020; Livonia, Michigan - all controlled substances from January 17, 2017 to January 17, 2019; Washington Court House, Ohio - all controlled substances for the two-year period following completion of the Livonia suspension, from February 17, 2019 to February 17, 2021; and Lakeland, Florida - hydromorphone products from January 17, 2017 to January 17, 2018. The terms of the suspensions of the Livonia, Washington Court House, and Lakeland facilities permit those distribution centers to continue shipping controlled substances to customers that purchase products under McKesson's contract with the Department of Veterans Affairs.

In March 2017, in response to the DEA Settlement, the New York State Department of Health, Bureau of Narcotic Enforcement, suspended the Class 2A (Out-of-State) controlled substance license for **McKesson's** Livonia, Michigan distribution center. The permit was suspended until January 1, 2019, consistent with the suspension timeframes of the DEA Settlement. No other suspensions or fines were issued, and the New York action aligned with the suspension periods and expectations agreed to in the DEA Settlement.

In June 2017, in response to the DEA Settlement, the Idaho Board of Pharmacy suspended the Controlled Substance Registrations of **McKesson** distribution centers in Washington Court House, Ohio and the Livonia, Michigan. The Livonia Idaho controlled substance registration was suspended for two years, effective 6/17/17 to 1/17/19. The Washington Court House Idaho controlled substance registration is suspended for two years, effective 1/18/19 to 1/18/21. No other suspensions or fines were issued, and the Idaho action aligns with the suspension periods and expectations agreed to in the DEA Settlement.

In September 2017, in response to the DEA Settlement, the Colorado State Board of Pharmacy placed the wholesaler registration of **McKesson's** distribution center in Aurora, Colorado (14500 39th Ave) on probation. Re: Affidavit of Janelle Lazo

Dear Mr. Sedar,

I, Janelle Lazo, will have moved to Reno, Nevada by no later than August 20, 2021 – specifically to the following residential address:

██████ Sharlands Avenue ██████
Reno, NV 89523

I have purchased this property as my new residence. The reason that I am not already residing at this address is because the prior owner needs times to move out. I will gladly provide any additional information needed to establish this as my new residence.

I promise, under the penalty of perjury according to the laws of Nevada, that all of my statements in this document are true and accurate to the best of my ability.

Re: Letter of Explanation for Misdemeanor Arrest

To Whom it May Concern:

I was living with my mother and her boyfriend, whom I got in an argument with on July 25th 2006. Words were exchanged and he tried to kick me out of the house, so I obliged and packed my belongings. However, I was not "fast enough" because he wanted me out of there as soon as possible. He was getting in my face while I packed, and, as a result, I shoved him away from me. He immediately called the cops on me, and when two police officers arrived, I was already in my car preparing to find a place to move to. The officers took my statement, but because I strive to uphold my integrity, I admitted to pushing him. As a part of their duty to protect and serve, they had to arrest me, even though they both stated that it was ridiculous for them to respond there in the first place. They assured me that nothing drastic would probably result from this and a judge might throw this case out since there was no physical harm done. I was held in jail for a few hours and was given a court date after my immediate release. When I went for my court appearance a month later, my name was not on the docket. I was informed that the case was denied/dismissed by the District Attorney's Office, and, according to the letter they provided, the office was not filing formal charges against me either. Enclosed is a copy of that letter, which I have previously furnished to the Board when I answered "YES" on a question on prior applications (technician renewal, intern license, new pharmacist license). Hopefully, this explanation and attached documentation are sufficient and, if there are any additional questions, contact me via phone at [REDACTED]

Sincerely,

Nicolle Gunn, PharmD #17890

BOARD OF PHARMACY

IN RE:	)	
	)	
VALISURE RX, LLC	)	
	)	CONSENT AGREEMENT
Case No. 2020-PHA-16340	)	

PARTIES

This document is a Consent Agreement regarding disciplinary action against the mail order prescription pharmacy license of Valisure RX, LLC ("Valisure RX") in the State of Maine. The parties to this Consent Agreement are: Valisure RX, the Maine Board of Pharmacy ("the Board"), and the Maine Office of the Attorney General ("the Attorney General"). This Consent Agreement is entered into pursuant to 10 M.R.S. § 8003(5-A).

FACTS

1. At all times relevant to this matter, Valisure RX was licensed by the Board as a mail order prescription pharmacy, license no. MO40002463, located at 5 Science Park, Suite 1 FL E in New Haven, Connecticut.
2. On August 5, 2019, Theo Blaise Rukundo replaced Paul Barry, Jr. as the pharmacist in charge ("PIC") of Valisure RX, thereby requiring Valisure RX to submit a Change of PIC application to the Board within 7 days after the PIC change.
3. Valisure RX, however, did not file a change of PIC application with the Board until August 16, 2019.
4. On June 10, 2020, Board Administrator, Geraldine Betts, filed an administrative complaint with the Board alleging that Valisure RX had failed to file a timely change of PIC application.

5. This administrative complaint was docketed as Case No. 2020-PHA-16340.
6. Under Board Rules Chapter 11, § 3, upon a change of PIC, a mail order pharmacy must file a new application with the Board by registered mail no later than seven (7) days after the change.
7. Pursuant to the Board's delegation of authority dated January 3, 2019, which authorizes Board Staff to offer prescribed consent agreements to resolve first-time violations of PIC change notification requirements, this Consent Agreement is being offered to finally resolve Case No. 2020-PHA-16340.
8. Absent acceptance of this Consent Agreement by signing and dating it and returning it to Board of Pharmacy, Complaint Division, Office of Professional and Occupational Regulation, 35 State House Station, Augusta, ME 04333 by **July 31, 2020**, , the Board will resolve this matter by holding an adjudicatory hearing.

COVENANTS

9. Valisure RX admits to the facts as stated above and admits that such conduct constitutes grounds for discipline pursuant to 10 M.R.S. § 8003(5-A)(A)(5) for violating a rule of the Board, specifically Board Rules Chapter 11, § 3, by failing to file a new application with the Board by registered mail no later than 7 days after a change of PIC.
10. As **DISCIPLINE** for the violation admitted to in paragraph 9 above, Valisure RX agrees to accept the imposition of:
 - a. A **WARNING**; and
 - b. A **CIVIL PENALTY** in the amount of two hundred fifty dollars (\$250.00). Payment of the civil penalty shall be made by check or money order payable to the "Treasurer, State of Maine" and delivered to Board of Pharmacy, Complaint Division, Office of Professional and Occupational Regulation, 35 State House Station, Augusta, Maine 04333, and must be submitted with the signed Consent Agreement.

11. This Consent Agreement is not appealable and is effective until modified or terminated by the parties hereto.

12. Violation of any of the terms or conditions of this Consent Agreement by Valisure RX shall constitute grounds for discipline, including but not limited to modification, suspension, or revocation of licensure or the denial of licensure or re-licensure.

13. The Board and the Office of the Attorney General may communicate and cooperate regarding any matter related to this Consent Agreement.

14. This Consent Agreement is a public record within the meaning of 1 M.R.S. § 402 and will be available for inspection and copying by the public pursuant to 1 M.R.S. § 408-A.

15. Nothing in this Consent Agreement shall be construed to affect any right or interest of any person not a party hereto.

16. The Board and Valisure RX agree that no further agency action will be initiated against Valisure RX's license by the Board based upon the specific violations admitted to herein, except or unless Valisure RX fails to comply with the terms and conditions of this Consent Agreement. The Board may however consider the conduct described above as evidence of a pattern of misconduct in the event that other allegations are brought against Valisure RX, and this Consent Agreement will be introduced as evidence in any future adjudicatory hearing involving Valisure RX. The Board may also consider the fact that discipline was imposed by this Consent Agreement in determining discipline in any further complaints against Valisure RX.

17. Valisure RX acknowledges by its duly authorized representative's signature hereto that it has had an opportunity to consult with an attorney before executing this Consent Agreement, that it executes this Consent Agreement voluntarily, and that it agrees to abide by all terms and conditions set forth herein.

Re: Change of Ownership for Well Care Apothecary, LLC (License #: PH03076) and Well Care Discount Pharmacy LLC (License #: PHN02869)

Dear Sir or Madam,

Enclosed please find an application for a change of ownership of Well Care Apothecary, LLC (License #: PH03076) and Well Care Discount Pharmacy LLC (License #: PHN02869) (collectively, the "Licensees" and each individually a "Licensee"). The change of ownership results from a restructuring of the Licensees and various other affiliated businesses. The current sole owner of each of the Licensees is Marcelino Casal. After the restructuring, Marcelino Casal will continue to own indirectly more than a 50% beneficial ownership interest in the Licensees, however, the direct owner of the Licensees will become a limited liability company taxed as a partnership. More specifically, following the restructuring, the Licensee will be owned as follows:

1. Each of the Licensees will be 100% owned by Well Care Group Parent Holdings LLC, a Delaware limited liability company registered in Nevada ("Parent Holdings"), which is manager-managed by Marcelino Casal.
2. Parent Holdings will be owned by individuals and various limited liability companies with the top four largest direct and indirect individual beneficial owners listed on the enclosed applications, including Marcelino Casal who will continue to own an indirect beneficial ownership interest in Parent Holdings equal to 68.46%.

Even though the restructuring will not result in a change in more than 50% of the indirect beneficial ownership of the Licensees, we are nonetheless filing the enclosed applications for change of ownership consistent with NAC 639.227 sec. 1 because of the change of the direct owner of the Licensees from Marcelino Casal to Parent Holdings. In the event that the Nevada State Board of Pharmacy determines that we may proceed with the restructuring of the Licensees prior to the expiration of the 15-day period specified under NAC 639.227 sec. 1, we would appreciate you communicating that to us so that we may proceed with the restructuring prior to the expiration of the 15-day period.

Should you have any questions or concerns, please do not hesitate to contact me at [REDACTED]

Sincerely,

Marcelino Casal, CEO

Lyn E. Beggs, Esq.
Attorney for Respondent David Potter, M.D.

Statement of Dr. David Potter

I, Dr. David Potter, do hereby swear that the following information to the best of my recollection, as provided to Nevada State Board of Pharmacy (NBOP) investigator Monica S. Segedy and Nevada State Board of Medical Examiners (NSBME) investigator Samantha M. Hendricks is true and accurate. Also present for the interview was Attorney Eric Steiner, NBOP General Counsel Courtney Lee, and NBOP Deputy Executive Secretary Yen Long.

I am a licensed medical doctor in the state of Nevada and the state of Colorado, and I specialize in Anesthesiology.

On 10/23/2019, in the early evening, I had completed providing anesthesia for a surgery at the Northern Nevada Medical Center. Prior to the surgery I acquired between 1-3 vials of Diphenhydramine (Benadryl) from the Pyxis machine I placed the vial(s) in my sock during surgery with the intention of injecting the drug prior to going home.

After the surgery was complete, I went into the hospital Locker/Bathroom and injected the Diphenhydramine. Shortly thereafter, I was approached by Dr. Scott Parkhill, the head of the Associated Anesthesiologists with whom I was employed. Dr. Parkhill asked me if I had placed medication vials in my socks during surgery and I advised that I had. Dr. Parkhill asked me to turn the vial(s) over and then gave me the option to immediately resign from my employment. Dr. Parkhill advised if I did not immediately resign, I would be fired. I advised that I would resign, and I turned over a vial, or vials, of Diphenhydramine along with a used syringe to Dr. Parkhill. I do not recall how many vials of Diphenhydramine I had taken. Shortly after I resigned, I left the state of Nevada and returned to my home in Colorado.

I self-reported to the Colorado Board of Medical Examiners and on the recommendation of the Colorado Physician Health Program (CPHP) I entered into a rehabilitation program. Since this incident occurred, I spent 90 days in the Talbott Recovery Program for Health Care Professionals in Atlanta.

Since my 90 days with Talbott, I have continued to work on my recovery and follow the recommendations of CPHP as I suffer from polysubstance abuse including alcohol and pain medications as well as depression. I currently participate in more than three (3) group therapy style meetings, such as Healthy

Healers and LifeRing. I also see a recovery therapist every two weeks, and I report to an addiction doctor once a month.

I am currently taking oral naltrexone daily to treat my opioid and alcohol disorders. I continue to work with CPHP, and the above noted recovery groups report my participation and progress each week to the CPHP, and quarterly to the Colorado Board of Medical Examiners.

I would welcome the opportunity to return to my duties as an Anesthesiologist in Nevada and Colorado. Once I resume my duties, CPHP has recommended that I receive injections of Vivitrol or Naltrexone in an effort to ensure I do not have a relapse.

I am truly sorry for my actions, and I take full responsibility for the mistakes I have made. I am working daily to better myself and I want nothing more than to return to work as a licensed medical doctor.

**NOTICE OF INTENDED ACTION
AND ACCUSATION**

J. David Wuest, in his official capacity as Executive Secretary of the Nevada State Board of Pharmacy, makes the following that will serve as both a notice of intended action under NRS 233B.127(3) and as an accusation under NRS 622A.300(1) and NRS 639.241.

JURISDICTION

1. The Nevada State Board of Pharmacy ("Board") has jurisdiction over this matter because at the time of the events alleged herein, Respondent Walgreens Pharmacy #5814 ("Walgreens #5814") held a Nevada Pharmacy License No. PHN01519, and Respondent Shanela Blas-Catacutan, RPh, ("Blas-Catacutan") held a Nevada Pharmacist Certificate of Registration No. 17360, and Rexequiel Ner, RPh, ("Ner") held a Nevada Pharmacist Certificate of Registration No. 18472, all issued by the Board.

FACTUAL ALLEGATIONS

2. Blas-Catacutan was employed as the pharmacy manager of Walgreens #5814 and Ner was employed as a staff pharmacist at Walgreens #5814 during the alleged and relevant timeframes.

3. On October 1, 2018, patient B.D. received a prescription for oxycodone 30 mg, for 28 days, quantity 120 tablets, with no refills.
4. On the same day, October 1, 2018, patient B.D. presented her prescription at Walgreens #5814, the prescription information was entered into Walgreens' computer system, and designated as prescription #3246240.
5. During the filling process, it was discovered that Walgreens #5814 was out of stock of oxycodone 30 mg tablets. Ner returned the written prescription to patient B.D without cancelling prescription #3246240 in Walgreens' computer system.
6. On or about October 4, 2018, patient B.D. presented her written prescription for oxycodone at Walgreens #10783 (NOT Respondent Walgreens #5814), which dispensed prescription #738113 for patient B.D. Pharmacy records confirm that patient B.D. picked up her prescription for oxycodone from Walgreens #10783.
7. On or about October 17, 2018, Walgreens' computer system prompted Walgreens #5814 staff to fill the prescription when oxycodone 30 mg tablets were back in stock. A computer-generated text was sent to patient B.D. indicating that her prescription for oxycodone (which was already filled at Walgreens #10783) was available for pick up at Walgreens #5814.
8. Ner overrode the duplication therapy flag drug utilization review (DUR) warning in the computer system, and Blas-Catacutan failed to recognize the duplication error upon verification of the prescription. Pharmacy records confirm that patient B.D. picked up a second fill for her single oxycodone prescription on October 17, 2018.
9. Blas-Catacutan stated that she did not place the fill tag or sticker on the back of the hard copy written prescription at the time she verified the prescription.

10. The error was discovered when the prescribing practitioner A.V.L. reported the duplicate fill for patient B.D. to the Prescription Monitoring Program.

FIRST CAUSE OF ACTION

Failure to Verify Dispensed Medication/Unprofessional Conduct (Respondent Ner)

11. Unprofessional conduct includes the failure by a licensee to follow strictly the instructions of a practitioner when filling, labeling, and dispensing a prescription. NAC 639.945(1)(d). It also includes a licensee performing his or her duties in an "incompetent, unskillful, or negligent manner." NAC 639.945(1)(i).

12. Ner engaged in unprofessional conduct in violation of NAC 639.945(1)(d) and (i) when she failed to cancel the original written prescription returned to patient B.D., failed to act upon the DUR warning in the computer system and overrode the DUR alert for prescription #738113, which resulted in Walgreens #5814 dispensing a duplicate fill for a single oxycodone prescription. Ner is therefore subject to discipline pursuant to NRS 639.210(4).

SECOND CAUSE OF ACTION

Failure to Verify Dispensed Medication/Unprofessional Conduct (Respondent Blas-Catacutan)

13. Blas-Catacutan engaged in unprofessional conduct in violation of NAC 639.945(1)(d) and (i) when she verified data entry as accurate and the final product on prescription #738113 as accurate when it was not, which resulted in Walgreens #5814 dispensing a duplicate fill for a single oxycodone prescription. Blas-Catacutan is therefore subject to discipline pursuant to NRS 639.210(4).

THIRD CAUSE OF ACTION

Pharmacy/Pharmacy Owner Responsibility (Respondent Walgreens #5814)

14. NRS 639.230(5) provides: "Any violation of any of the provisions of this chapter [NRS Chapter 639] by a managing pharmacist or by personnel of the pharmacy under the supervision of the managing pharmacist is cause for the suspension or revocation of the license of the pharmacy by the Board." Further, the owner of any business or facility licensed, certified

or registered by the Board is responsible for the acts of all personnel in his or her employ. NAC 639.945(2).

15. As the pharmacy/pharmacy owner at which the violations of law alleged herein occurred, Walgreens #5814 is responsible for those violations, including those of the pharmacy's employees, pursuant to NRS 639.230(5) and NAC 639.945(2) and is therefore subject to discipline.

WHEREFORE it is requested that the Nevada State Board of Pharmacy take appropriate disciplinary action with respect to the certificates of license/registration of these Respondents.

Signed this 1st day of April, 2021.

J. David Wuest, R.Ph., Executive Secretary
Nevada State Board of Pharmacy

8. Pharmacy records speak for themselves. Aside from those records, Respondents specifically deny that Ner failed to recognize a duplication error upon verification of the prescription. There was no duplication error when Ner performed the DUR. The DUR was conducted on or about October 1, 2018. At that time, there was no clinically significant drug duplication because the patient had been receiving Oxycodone at regular, appropriate intervals. The October 4, 2018, fill at Walgreens #10783 had not yet occurred. Respondents lack sufficient knowledge to admit or deny the other allegations in paragraph 8 and therefore deny the same.

15. Respondents deny the allegations in paragraph 15.

OTHER DEFENSES

16. Each cause of action fails to state a claim upon which relief can be granted.

RESERVATION OF RIGHTS, DEFENSES, AND GENERAL DENIAL

17. Respondents reserve the right to assert other affirmative defenses in this matter and in any civil litigation that may follow and to provide additional facts and mitigating circumstances.

18. To the extent Respondents did not specifically admit allegations in the Notice of Intent and Accusation, they deny such allegations.

PRAYER FOR RELIEF

19. That the Board find that the allegations in the Notice and all evidence presented to the Board do not support imposing discipline on any of the Respondent.

20. That the Board dismiss all Causes of Action in the Notice.

21. That the Board provide further relief to Respondents as it finds just and proper.

1. The Board has jurisdiction over Respondents and this matter.
2. On or about April 1, 2021, Board Staff served Respondents Walgreens 5814, Blas-Catacutan, and Ner with the Notice of Intended Action and Accusation ("Accusation") on file in this matter together with the Statement to Respondents and Notice of Hearing.

7. Respondents admit that evidence exists, and that Board staff prosecuting this case could present such evidence at an administrative hearing, to establish a factual basis for certain of the violations alleged in the Accusation, that:

A. Respondent Ner discovered the pharmacy did not have oxycodone in stock and returned the prescription to the patient without deleting the existing prescription in the computer system, which left a duplicate prescription in the patient's profile, in violation of NAC 639.945(1)(d) and (i).

B. Respondent Blas-Catacutan mistakenly dispensed a duplicate prescription in violation of NAC 639.945(1)(d) and (i).

C. As the pharmacy at which the violation of law alleged herein occurred, Respondent Walgreens 5814 is responsible for the violations pursuant to NRS 639.230(5) and NAC 639.945(2).

8. Those violations are plead with particularity in the Accusation and are grounds for action pursuant to NRS 639.210 and/or NRS 639.255.

9. In order to resolve this matter without incurring any further costs or the expense associated with a hearing, the Board and Respondent Walgreens 5814 stipulate to the following penalties:

A. Respondent shall pay a fine of Five-Hundred Dollars (\$500.00) for the violation(s);

B. Respondent shall pay Five-Hundred Dollars (\$500.00) to partially reimburse the Board for recoverable attorney's fees and costs incurred in investigating and prosecuting this matter; and

10. In order to resolve this matter without incurring any further costs or the expense associated with a hearing, the Board and Respondent Blas-Catacutan stipulate to the following penalties:

A. Respondent shall pay a fine of Five-Hundred Dollars (\$500.00) for the violation(s);

AND ACCUSATION**

J. David Wuest, in his official capacity as Executive Secretary of the Nevada State Board of Pharmacy, makes the following that will serve as both a notice of intended action under NRS 233B.127(3) and as an accusation under NRS 622A.300(1) and NRS 639.241.

JURISDICTION

1. The Nevada State Board of Pharmacy ("Board") has jurisdiction over this matter because at the time of the events alleged herein, Respondent Walgreens Pharmacy #5814 ("Walgreens #5814") held a Nevada Pharmacy License No. PHN01519, and Respondent Shanela Blas-Catacutan, RPh, ("Blas-Catacutan") held a Nevada Pharmacist Certificate of Registration No. 17360, both issued by the Board.

FACTUAL ALLEGATIONS

2. Respondent Blas-Catacutan was employed as the managing pharmacist of Walgreens #5814 during the alleged and relevant timeframes.

3. On or about April 20, 2018, practitioner I.C. prescribed for patient M.P., who was 7 years old at the time, Methylphenidate 5 mg tablets: two (2) written prescriptions were tendered to Walgreens #5814 on April 30, 2018, one with the notation "Do not fill before 05/20/2018" and the other with the notation "Do not fill before 06/20/2018". The prescription

information was scanned by J.C.E. and entered into Walgreens' computer system, and designated as prescription #3161427.

4. On or about May 30, 2018, upon a request by patient M.P.'s mother to fill one of the held written prescriptions, the written prescription with the notation "Do not fill before 06/20/2018" was selected.

5. On or about May 30, 2018, Blas-Catacutan performed the final data entry, data verification, filling, and product verification for prescription #3161427. Prescription #3161427 was misfilled with Methadone 5 mg tablets instead of the Methylphenidate 5 mg tablets as prescribed. Blas-Catacutan failed to detect the error when she verified data entry as accurate during the final product review.

6. On or about May 31, 2018, patient M.P. reportedly ingested 1 tablet of the misfilled Methadone and was rushed to Centennial Hills Hospital by his mother, then transferred to Summerlin Hospital, children's ward, for observation. Subsequently, patient M.P. displayed symptoms of multiple mood swings.

FIRST CAUSE OF ACTION

Failure to Verify Dispensed Medication/Unprofessional Conduct (Respondent Blas-Catacutan)

7. Unprofessional conduct includes the failure by a licensee to follow strictly the instructions of a practitioner when filling, labeling, and dispensing a prescription. NAC 639.945(1)(d). It also includes a licensee performing his or her duties in an "incompetent, unskillful, or negligent manner." NAC 639.945(1)(i).

8. Blas-Catacutan violated NAC 639.252(2) and engaged in unprofessional conduct in violation of NAC 639.945(1)(d) and (i) when she failed to strictly follow the practitioner's order not to fill the prescription for Methylphenidate 5 mg before June 20, 2018, and filling the prescription on May 31, 2018. Blas-Catacutan further violated NAC 639.252(2) and engaged in

unprofessional conduct in violation of NAC 639.945(1)(d) and (i) when she verified data entry as accurate and the final product on prescription # 3161427 as accurate when it was not, which resulted in Walgreens #5814 dispensing *Methadone* 5 mg tablets instead of the *Methylphenidate* 5 mg tablets as prescribed. Blas-Catacutan is therefore subject to discipline pursuant to NRS 639.210(4).

SECOND CAUSE OF ACTION
Pharmacy/Pharmacy Owner Responsibility
 (Respondent Walgreens #5814)

9. NRS 639.230(5) provides: "Any violation of any of the provisions of this chapter [NRS Chapter 639] by a managing pharmacist or by personnel of the pharmacy under the supervision of the managing pharmacist is cause for the suspension or revocation of the license of the pharmacy by the Board." Further, the owner of any business or facility licensed, certified or registered by the Board is responsible for the acts of all personnel in his or her employ. NAC 639.945(2).

10. As the pharmacy/pharmacy owner at which the violations of law alleged herein occurred, Walgreens #5814 is responsible for those violations, including those of the pharmacy's employees, pursuant to NRS 639.230(5) and NAC 639.945(2) and is therefore subject to discipline.

WHEREFORE it is requested that the Nevada State Board of Pharmacy take appropriate disciplinary action with respect to the certificates of license/registration of these Respondents.

Signed this 1st day of April, 2021.

 J. David Wuest, R.Ph., Executive Secretary
 Nevada State Board of Pharmacy

NEVADA STATE BOARD OF PHARMACY,

Petitioner,

v.

**JOCELYN SANTIAGO, RPH,
Certificate of Registration No. 15240, and**

**WALGREENS PHARMACY #4579,
License No. PH01283,**

Respondents.

**CASE NOS. 19-064-RPH-S
19-064-PH-S**

**NOTICE OF INTENDED ACTION
AND ACCUSATION**

J. David Wuest, in his official capacity as Executive Secretary of the Nevada State Board of Pharmacy, makes the following that will serve as both a notice of intended action under NRS 233B.127(3) and as an accusation under NRS 622A.300(1) and NRS 639.241.

JURISDICTION

1. The Nevada State Board of Pharmacy (Board) has jurisdiction over this matter because at the time of the events alleged herein, Respondent Jocelyn Santiago, RPh (Santiago), Certificate of Registration No. 15240, was a pharmacist registered with the Board, and Respondent Walgreens Pharmacy #4579 (Walgreens #4579), License No. PH01283, was a pharmacy licensed by the Board.

DISCIPLINARY HISTORY

2. In April 2019, the Board entered a Stipulation and Order in the case of *Board of Pharmacy v. Walgreens Pharmacy #4579*, Case No. 17-086-PH-A-S. The Board found Walgreens #4579 responsible for the actions of its employee for violations resulting in a dispensing error. The Board ordered Walgreens #4579 to pay a fine of \$1,000.00 and an administrative fee of \$1,000.00.

FACTUAL ALLEGATIONS

3. Santiago was employed by Walgreens #4579 at the time of the events alleged herein.

4. On December 5, 2018, I.N. saw his physician and received a prescription for Metforminⁱ 1000 mg. tablets #60 with directions to take one tablet twice daily. The prescription allowed for two (2) refills.

5. I.N. tendered the prescription to Walgreens #4579 where pharmaceutical technician Kalin Pascacio-Bayles (Pascacio-Bayles) performed data entry in Walgreens' computer system. The computer system designated the prescription as no. 1625043.

6. Prior to data entry, Pascacio-Bayles consulted with Santiago to verify the name of the drug which was unclear to her on the handwritten prescription.

7. Santiago incorrectly advised Pascacio-Bayles that the drug name was Levetiracetamⁱⁱ rather than the Metformin as written. Santiago did not consult the prescriber to verify the name of the medication.

8. Prescription no. 1625043 was erroneously entered into the computer system as Levetiracetam 1000 mg. tablets with instructions to take one tablet twice daily.

9. Walgreens dispensed the initial fill of prescription no. 1625043 on December 5, 2018, and dispensed a refill on January 4, 2019, and again on February 7, 2019.

10. Santiago is on record as the verifying pharmacist for prescription no. 1625043. She failed to detect the medication error when she verified data entry as accurate and performed the final product review.

11. Prescription no. 1625043 was a new prescription requiring patient counseling.

12. Walgreens computer patient counseling field documents that patient consultation was completed. Santiago is on record as the counseling pharmacist.

13. I.N. did not receive counseling on prescription no. 1625043.

ⁱ Metformin is an anti-diabetic medication.

ⁱⁱ Levetiracetam is an anticonvulsant medication used in the treatment of seizures.

14. I.N. ingested Levetiracetam from December 5, 2018 to approximately February 17, 2019. He experienced high blood sugar levels, drowsiness, blurred vision, weakness, dizziness, and loss of energy while ingesting the wrong medication.

15. I.N. discovered the medication error when he researched the internet to check the side effects he was experiencing and learned that Levetiracetam is an anticonvulsant not the anti-diabetic medication prescribed.

FIRST CAUSE OF ACTION

Failure to Verify Dispensed Medication/Unprofessional Conduct (Respondent Santiago)

16. Unprofessional conduct includes the failure by a licensee to follow strictly the instructions of a practitioner when filling, labeling, and dispensing a prescription. NAC 639.945(1)(d). It also includes a licensee performing his or her duties in an “incompetent, unskillful, or negligent manner.” NAC 639.945(1)(i). Additionally, NAC 639.252 states in relevant part:

If a pharmaceutical technician performs one or more of the functions necessary to prepare a prescription, *the pharmacist supervising the pharmaceutical technician* is responsible for the filled prescription, including, but not limited to, verifying:

- (a) The selection and strength of the drug;
- (b) The dosage form; and
- (c) The labeling of the prescription.

NAC 639.252(2) (emphasis added.)

17. Santiago violated NAC 639.252(2) and engaged in unprofessional conduct in violation of NAC 639.945(1)(d) and (i) when she verified data entry as accurate and the final product on prescription no. 1625043 as accurate when it was not, which resulted in Walgreens dispensing *Levetiracetam* 1000 mg. tablets rather than the *Metformin* 1000 mg. tablets as prescribed. Santiago is therefore subject to discipline pursuant to NRS 639.210(4) and (12).

SECOND CAUSE OF ACTION

Failure to Counsel/Unprofessional Conduct (Respondent Santiago)

18. NRS 639.266(1) requires a pharmacist to “communicate matters which will enhance therapy through drugs with the patient or a person caring for the patient.” NAC 639.707(1), (2) and/or (4) further requires counseling for all new prescriptions and provide a list

of elements to be included as part of proper counseling, including, but not limited to, dose, intended use, expected response and precautions. Additionally, NAC 639.707(6) requires the pharmacist to create a record regarding counseling “at the time that counseling is provided or refused.” A pharmacist who performs those duties in an “incompetent, unskillful or negligent manner” engages in unprofessional conduct in violation of NAC 639.945(1)(i).

19. Santiago violated NRS 639.266(1), NAC 639.707(1), (2) and/or (4) and engaged in unprofessional conduct in violation of NAC 639.945(1)(i) by marking that counseling was completed, and, to the extent any counseling actually occurred, by failing to counsel adequately to detect that she was dispensing the wrong medication. That error, combined with other errors within the pharmacy, caused Walgreens to dispense *Levetiracetam* 1000 mg. tablets rather than the *Metformin* 1000 mg. tablets as prescribed. Santiago is therefore subject to discipline pursuant to NRS 639.210(4) and (12).

THIRD CAUSE OF ACTION
Pharmacy/Pharmacy Owner Responsibility
 (Respondent Walgreens Pharmacy #4579)

20. NRS 639.230(5) provides: “Any violation of any of the provisions of this chapter [NRS Chapter 639] by a managing pharmacist or by personnel of the pharmacy under the supervision of the managing pharmacist is cause for the suspension or revocation of the license of the pharmacy by the Board.” Additionally, “[t]he owner of a pharmacy, the managing pharmacist of the pharmacy and the registered pharmacist on duty at the pharmacy are responsible for the acts and omissions of pharmaceutical technicians and other personnel who are not pharmacists working in or for the pharmacy, including, but not limited to, any errors committed or unauthorized work performed by such personnel, if the owner, managing pharmacist or registered pharmacist knew or reasonably should have known of the act or omission.” NAC 639.702. Further, the owner of any business or facility licensed, certified or registered by the Board is responsible for the acts of all personnel in his or her employ. NAC 639.945(2).

21. As the pharmacy/pharmacy owner at which the violations of law alleged herein occurred, Walgreens Pharmacy #4579 is responsible for any violations of law by Santiago pursuant to NRS 639.230(5), NAC 639.702 and NAC 639.945(2).

WHEREFORE it is requested that the Nevada State Board of Pharmacy take appropriate disciplinary action with respect to the certificates of registration of these respondents.

Signed this 30th day of March, 2021.

Nevada State Board of Pharmacy

**ANSWER AND NOTICE OF DEFENSE
OF RESPONDENT RAVI KRISHNAN, M.D.**

Respondent Ravi Krishnan, M.D., hereby files with the Nevada State Board of Pharmacy ("Board"), his Answer and Notice of Defense to the Notice of Intended Action and Accusation ("Accusation") filed on March 30, 2021.

ANSWER TO ACCUSATION

1. Dr. Krishnan hereby objects to the Accusation as being incomplete and failing to state clearly the charges against him as the Accusation fails to provide any time period or dates on which the alleged violations are to have occurred rendering it impossible for Dr. Krishnan fully respond to the allegations set forth therein.

2. Dr. Krishnan answers to the Jurisdiction and the Factual Allegations set forth in the Accusation as follows:

Paragraph 1: While the Accusation fails to provide any time period or dates for the alleged events set forth in the Accusation, Dr. Krishnan does confirm that he has held a controlled substance registration from the Board since 1997.

Paragraph 2: Dr. Krishnan confirms that he owns Bright Futures Pediatrics located in Las Vegas and has held the role of acting medical director on occasion for the practice, but other physicians employed by Bright Futures have also acted in that capacity. As the Accusation provides no specificity as to when these events were alleged to occur, Dr. Krishnan is without sufficient information to address the accuracy of the statements contained in Paragraph 2.

Paragraph 3: Dr. Krishnan is without sufficient knowledge or information to address the accuracy of the assertions contained therein as no time frame or dates for the alleged events has been provided. While Sheila Fischer did act as practice manager for Bright Futures for a period of time, she has not been with the practice since June 2019.

Paragraph 4: Dr. Krishnan denies all factual allegations set forth in Paragraph 4 and again asserts that no date or time period has been given for the alleged conduct.

Paragraph 5: Dr. Krishnan denies the allegations set forth in Paragraph 5 to the extent that he authorized and permitted Ms. Fisher to purchase, access, store, possess, furnish and/or dispense any dangerous drugs. Dr. Krishnan is without sufficient knowledge and information to address the specific drugs listed in Paragraph 5.

Paragraph 6: Dr. Krishnan denies all allegations set forth in Paragraph 6.

Paragraph 7: Dr. Krishnan denies all allegations set forth in Paragraph 7.

Paragraph 8: Dr. Krishnan denies all allegations set forth in Paragraph 8.

Paragraph 9: Dr. Krishnan denies all allegations set forth in Paragraph 9.

Paragraph 10: Dr. Krishnan admits that he received a cease and desist notice on September 12, 2019 via e-mail from prior counsel for the Board, however Dr. Krishnan is without sufficient knowledge and information about what conduct the cease and desist notice was addressing as it did not specify any time frame or other date. Further attempts made to obtain

further information from counsel from the Board regarding the cease and desist letter were never responded to.

As to the First through Nine Causes of Action contained in the Accusation, Dr. Krishnan denies all allegations set forth therein and Dr. Krishnan renews his objection that the Accusation has failed to provide any dates or even general time period in which these alleged events took place.

NOTICE OF DEFENSE

Dr. Krishnan asserts that the Accusation has failed to state a claim upon which relief can be granted. Dr. Krishnan further reserves the right to provide further evidence related to the allegations set forth in the Accusation as well as the right to present mitigating evidence should a hearing be held in this matter.

Respectfully submitted this 30th day of April, 2021.

2. That, in answer to the Notice of Intended Action and Accusation, he/she admits, denies and alleges as follows:

My name is Jill Oliver M.D. and I am writing this statement to the State of Nevada Board of Pharmacy. At my yearly pharmacy inspection on January 23rd, 2020 Luis Curras discovered that my dispensing technician license for Dianne Racosas was not valid and up to date. I assured him that we had submitted her application months before when she resumed working for us and told him I would get him the information immediately. After researching things on my end and talking to my office manager we discovered the error we made and took steps to remedy it immediately.

Dianne Racosas was a licensed dispensing technician when she worked for me from 2013 - 2016. She left on maternity leave and was gone for several years. It was during this time that her license expired. She returned to work for me in 2018 but did not perform any dispensing technician duties, only medical assistant duties at another office. When my licensed dispensing technician Samantha Lapalme left my employment in July 2019 Dianne was moved back into the role as dispensing technician.

Somehow, after doing this for so many years, we submitted the "Managing Pharmacist Certification of Pharmaceutical Technician in Training" instead of the "Technician Dispensing in Training Application" for Dianne. Unfortunately, I did not follow up on this mistake so no license was ever generated and Dianne continued to act as a dispensing technician. Upon review of my logs, Dianne Racosas performed technician dispensing duties for 115 days between July 2019 and January 2020. I did not realize that I could go on the Board of Pharmacy website to verify licenses. Of course now it is too late, but had I checked this I would have been able to submit the correct form right away instead of months later.

Please accept my sincere apologies for allowing these errors to occur and know that I take the privilege of being a dispensing practitioner very seriously. I take full responsibility for this and please know that I would never intentionally do anything to jeopardize the privileges you have granted me.

I hereby declare, under penalty of perjury, that the foregoing Answer and Notice of Defense, and all facts therein stated, are true and correct to the best of my knowledge.

COUNT I

NRS 630.306(1)(b)(2) (Violation of Standards of Practice)

3. All of the allegations in the preceding paragraphs are hereby incorporated by reference as though fully set forth herein.

4. Violation of a standard of practice adopted by the Board is grounds for disciplinary action pursuant to NRS 630.306(1)(b)(2).

5. Pursuant to NAC 630.187, the Board adopted by reference the *Model Policy on the Use of Opioid Analgesics in the Treatment of Chronic Pain*, July 2013, published by the Federation of State Medical Boards of the United States, Inc. (Model Policy).

6. Pursuant to NAC 630.230(1)(k), a licensee shall not engage in the practice of writing prescriptions for controlled substances to treat acute pain or chronic pain in a manner that deviates from the Model Policy.

7. Patient A had a reported history of a brain aneurysm and chronic headaches, chronic neck and back pain, attributed to her work for a parcel delivery service. Patient A had previously been prescribed opioids for pain, and was referred to Respondent by another provider in November 2016 for pain management.

8. In November 2016, Respondent began regularly prescribing to Patient A various opioid medications for pain control, including: oxycodone/acetaminophen 10-325 mg, 120 ct., 30 days (November 2016 through September 2018); Belbuca 300 mcg film, 60 ct., 30 days, hydromorphone 4 mg, 28 ct., 7 days, and hydromorphone 8 mg, 90 ct., 30 days (November 2018); hydrocodone/acetaminophen 10-325 mg, 56 ct., 14 days, and oxycodone/acetaminophen 10-325 mg, 108 ct., 18 days (December 2019). 9. Respondent prescribed to Patient A 90 MME per day, and for more than 90 days (January 2019 through July 2019), without establishing the medical necessity of such a high-dose of opioid therapy. Respondent failed to develop a revised treatment plan.

1 10. Respondent failed to conduct any detailed neurologic or musculoskeletal
2 examinations that would establish an indication for Patient A to receive long-term, high-dose
3 opioid medication for pain control.

4 11. Respondent failed to recommend other conservative treatments before or
5 concurrent with high-dose opioid therapy, including but not limited to, physical therapy, exercise
6 and movement, or massage therapy, among others, which may have alleviated these findings on
7 physical examination.

8 12. Pursuant to the Model Policy, a physician's patient evaluation should include,
9 without limitation: complete medical history and physical examination targeted to the pain
10 condition, evaluation of the nature and intensity of the pain, and history of current and past
11 treatments, including interventional treatments. Respondent consistently omitted such
12 information in Respondent's medical records for Patient A.

13 13. Respondent's records do not contain and show no indication of recent or
14 contemporaneous imaging (e.g. X-rays, MRIs, or CT scans) that would substantiate the need for
15 high-dose opioids for pain control.

16 14. Based on but not limited to the foregoing, Respondent wrote prescriptions to
17 Patient A for opioid analgesics to treat chronic pain in a manner that deviated from the Model
18 Policy.

19 15. By reason of the foregoing, Respondent is subject to discipline by the Board as
20 provided in NRS 630.352.

In the Matter of Charges and Complaint

Case No. 21-11804-1

Against:

GAIL POPELKA KRIVAN, M.D.,

Respondent.

SETTLEMENT AGREEMENT

The Investigative Committee (IC) of the Nevada State Board of Medical Examiners (Board), by and through Aaron Bart Fricke, Esq., Senior Deputy General Counsel for the Board and attorney for the IC, and Gail Popelka Krivan, M.D. (Respondent), a licensed physician in Nevada, assisted by her attorney, Lyn E. Beggs, Esq., of the law firm of Law Offices of Lyn E. Beggs, PLLC, hereby enter into this Settlement Agreement (Agreement) based on the following:¹

A. BACKGROUND

1. Respondent is a medical doctor currently licensed in active status by the Board pursuant to Chapter 630 of the Nevada Revised Statutes (NRS) and Chapter 630 of the Nevada Administrative Code (NAC) (collectively, the Medical Practice Act). Her license was originally issued on March 20, 2001 (License No. 9735).

2. On May 12, 2021, in Case No. 21-11804-1, the IC filed a formal First Amended Complaint (Complaint) charging Respondent with violating the Medical Practice Act. Specifically, the Complaint alleges one (1) violation of NRS 630.306(1)(b)(2) Violation of Standards of Practice.

///

¹ All agreements and admissions made by Respondent are solely for final disposition of these matters and any subsequent related administrative proceedings or civil litigation involving the Board and Respondent. Therefore, Respondent's agreements and admissions are not intended or made for any other use, such as in the context of another state or federal government regulatory agency proceeding, state or federal civil or criminal proceeding, any state or federal court proceeding, or any credentialing or privileges matter.

3. By reason of the foregoing, Respondent is subject to discipline by the Board as provided in NRS 630.352.

4. Respondent was properly served with a copy of the Complaint, has reviewed and understands the Complaint, and has had the opportunity to consult with competent counsel concerning the nature and significance of the Complaint.

5. Respondent is hereby advised of her rights regarding these administrative matters, and of her opportunity to defend against the allegations in the Complaint. Specifically, Respondent has certain rights in these administrative matters as set out by the United States Constitution, the Nevada Constitution, the Medical Practice Act, the Nevada Open Meeting Law (OML), which is contained in NRS Chapter 241, and the Nevada Administrative Procedure Act (APA), which is contained in NRS Chapter 233B. These rights include the right to a formal hearing on the allegations in the Complaint, the right to representation by counsel, at her own expense, in the preparation and presentation of her defense, the right to confront and cross-examine the witnesses and evidence against her, the right to written findings of fact, conclusions of law and order reflecting the final decision of the Board, and the right to judicial review of the Board's order, if the decision is adverse to her.

6. Respondent understands that, under the Board's charge to protect the public by regulating the practice of medicine, the Board may take disciplinary action against Respondent's license, including license probation, license suspension, license revocation and imposition of administrative fines, as well as any other reasonable requirement or limitation, if the Board concludes that Respondent violated one or more provisions of the Medical Practice Act.

7. Respondent understands and agrees that this Agreement, by and between Respondent and the IC, is not with the Board, and that the IC will present this Agreement to the Board for consideration in open session at a duly noticed and scheduled meeting. Respondent understands that the IC shall advocate for the Board's approval of this Agreement, but that the Board has the right to decide in its own discretion whether or not to approve this Agreement. Respondent further understands and agrees that if the Board approves this Agreement, then the terms and conditions enumerated below shall be binding and enforceable upon her and the Board.

///

B. TERMS & CONDITIONS

NOW, THEREFORE, in order to resolve the matters addressed herein, i.e., the matters with regard to the Complaint, Respondent and the IC hereby agree to the following terms and conditions:

1. **Jurisdiction.** Respondent is, and at all times relevant to the Complaint has been, a physician licensed to practice medicine in Nevada subject to the jurisdiction of the Board as set forth in the Medical Practice Act.

2. **Representation by Counsel/Knowing, Willing and Intelligent Agreement.** Respondent acknowledges she is represented by counsel, and wishes to resolve the matters addressed herein with said counsel. Respondent agrees that if representation by counsel in this matter materially changes prior to entering into this Agreement and for the duration of this Agreement, that counsel for the IC will be timely notified of the material change. Respondent agrees that she knowingly, willingly and intelligently enters into this Agreement after deciding to have a full consultation with and upon the advice of legal counsel.

3. **Waiver of Rights.** In connection with this Agreement, and the associated terms and conditions, Respondent knowingly, willingly and intelligently waives all rights in connection with these administrative matters. 4. **Acknowledgement of Reasonable Basis to Proceed.** As of the time of entering into this Settlement Agreement, the allegations of the Complaint remain unproven. Respondent acknowledges that the IC believes it has a reasonable basis to allege that Respondent engaged in conduct that is grounds for discipline pursuant to the Medical Practice Act. The IC acknowledges

that Respondent is not admitting that the IC's claims/counts as alleged in the Complaint have merit and Respondent is agreeing to resolve this matter to avoid the costs of hearing and potential subsequent litigation. Respondent asserts that if these matters were to proceed to hearing, she has evidence, witnesses, expert witness(es) and defenses to the count/claim alleged in the Complaint, but for the purposes of resolving these matters and for no other purpose, Respondent waives the presentation of evidence, witnesses, expert witnesses, and defenses in order to effectuate this Agreement.

In the course of seeking Board acceptance, approval and adoption of this Agreement, counsel for the IC may communicate directly with the Board staff and the adjudicating members of the Board.

Respondent acknowledges that such contacts and communications may be made or conducted ex parte, without notice or opportunity to be heard on her part until the public Board meeting where this Agreement is discussed, and that such contacts and communications may include, but may not be limited to, matters concerning this Agreement, the Complaint and any and all information of every nature whatsoever related to these matters. The IC and its counsel agree that Respondent and/or Counsel for the Respondent may appear at the Board meeting where this

///

Agreement is discussed and, if requested, respond to any questions that may be addressed to the IC or the IC's counsel.

8. **Effect of Acceptance of Agreement by Board.** In the event the Board accepts, approves and adopts this Agreement, the Board shall issue a final order, making this Agreement an order of the Board, and, pending full compliance with the terms herein, the case shall be closed and any and all remaining claims arising out of the Complaint shall be dismissed with prejudice.

9. **Effect of Rejection of Agreement by Board.** In the event the Board does not accept, approve and adopt this Agreement, this Agreement shall be null, void and of no force and effect except as to the following agreement regarding adjudications: (1) Respondent agrees that, notwithstanding rejection of this Agreement by the Board, nothing contained in this Agreement and nothing that occurs pursuant to efforts of the IC to seek the Board's acceptance of this Agreement shall disqualify any member of the adjudicating panel of the Board from considering the Complaint and from participating in disciplinary proceedings against Respondent, including adjudication of this case; and (2) Respondent further agrees that she shall not seek to disqualify any such member absent evidence of bad faith.

Any failure by Respondent to comply with the terms of this Order may result in issuance by the Executive Secretary of an order to show cause pursuant to NAC 639.965 directing that Respondent to appear before the Board at the next regularly-scheduled meeting for a show cause hearing. If such a hearing results in a finding of a violation of this Order by Respondent, the Board may lift the stay of suspension, and immediately suspend Certificate of Registration No. CS18989. The Board may impose additional discipline upon Respondent consistent with the provisions of NRS Chapter 453 and/or Chapter 639.

12. General Counsel will present this Stipulation to the Board for approval pursuant to NRS 622.330 at the Board's regularly scheduled public meeting on September 1, 2021. Respondent will appear at the meeting to answer questions from the Board Members and/or Board Staff. 1. That his/her objection to the Notice of Intended Action and Accusation as being incomplete or failing to state clearly the charges against him/her, is hereby interposed on the following grounds: (State specific objections or insert "none").

- 15 of the 21 items mentioned were over the counter supplements not requiring a practitioner's approval. The OTC supplements were billed through HGH's computer system and by default FNP Deveny's name appeared on the billing for payment through payroll deduction. The other medications, namely Cialis and Propranolol, were prescribed by my personal physician, Dr Len Perkinson, since May 2012 through March 2019. In my haste I inadvertently transposed the physician code and billed the prescriptions under FNP Deveny's name.

2. That, in answer to the Notice of Intended Action and Accusation, he/she admits, denies and alleges as follows:

I take full and absolute responsibility for my actions set forth before the board. I broke one of my most cardinal rules, that is, "You only hurry to make a mistake." And in this instance, it had just propagated on future entries. There was no intended fraud or deceit involved during the time frame mentioned. My PCP, Dr Perkinson, had prescribed the legend medications for approximately six years and again my haste in incorrectly transcribed the wrong prescriber. I want to assure the Board that at no time were any of my patients and their care in any jeopardy. The safety of my patients was and always will be my number one priority. Please find the attached letter from Dr Perkinson, stating our relationship as patient/doctor and other letters from my colleagues defending my professional competence and character as a pharmacist.

Any sanctions imposed by the Board concerning this matter will be fully accepted and adhered to. I wish to fulfill any judgement against myself so that I may fully retire after 42 years as a practicing pharmacist without a "black mark" on my license. Re: Robert Hall

To Whom It May Concern:

It is my pleasure to be a character reference for Mr. Robert Hall as a pharmacist. My relationship with Mr. Hall is over many years, and on a professional basis has been most rewarding and beneficial. I have worked with Mr. Hall regarding inpatient care, as Medical Director and admitting physician at Humboldt General Hospital, for the long term nursing home, skilled nursing unit, and memory care unit of Humboldt General Hospital. I cannot emphasize enough his value and worth to the patient care and their wellbeing. He was and remains a valuable source of colleague support and information for my many clinic patients. Amongst his many virtues as a respected professional, he is a knowledgeable and well informed team player providing valuable and beneficial input to all discussions regarding medical intervention and patient care. He makes himself available to any need and discussion, whether patient or health care provider. Going beyond his onsite responsibilities, Robert makes himself available with extended hours by phone as needed to maintain the continuity of a discussion in patient care. His level of cooperation contributed to more than being a vital team member in decision making but a trusted colleague.

Should you have any questions please feel to contact me at the above.

Nevada State Board of Pharmacy

To Whom it may concern:

I'm writing to you today on the behalf of Robert Hall Pharmacist. I have worked with Mr. Hall for over eight years while he was employed at Humboldt General Hospital (HGH) in Winnemucca, Nevada. I worked closely with him in the capacity of being a Hospitalist and a clinical professor for the rural residency program at HGH, and later as an attending in the Emergency Department. In these capacities, I worked closely with Robert and depended on him regularly in critical care emergencies, regular care, and discharge of hospitalized patients, as well as helping educate and inform physicians in residency training.

I found Mr. Hall to be very thorough and conscientious in all of or patient interactions. He has been at the patient bedside for multiple codes with the residents and me and has never failed to be professional and accurate in these high stress situations. We have managed many complex patients together in the ICU requiring pressors, TPN, and multiple antibiotics. In these complicated situations Robert has checked and rechecked doses and interactions tirelessly. Even when we moved to a new EMR (electronic medical record) system and errors were occurring in our hospital, Mr. Hall always made sure my patients received the correct medications and doses. This was no small feat as we moved between EMRs.

Providing high acuity care to patients in a rural setting always has its own set of challenges, which includes limited resources. This results in a greater deal of dependence on your care team than occurs at large institutions with more pharmacists and other care providers. Having practiced on both ends of this spectrum, I can unequivocally state there are few pharmacists I would trust in any clinical situation as much as I trust Mr. Hall.

I had the great pleasure of working with Robert Hall at Humboldt General Hospital from 2013 to 2019. I am a board certified Internist currently working as a hospitalist at that facility and Robert worked as one of the pharmacists during that time period. During that time, he had been immensely helpful in helping me manage many of the medications that I prescribed for my patients. I found him to be willing to help at a moment's notice and very accomodating with whatever I needed. I encountered no major issue with him during the time we worked together. I felt he was a valuable member of the hospital team

This is a letter attesting to Pharmacist Robert Hall's character & professionalism along with a recommendation for leniency in his upcoming Board hearing on September 1st.

I have known Robert for about 10 years. The first 8-years I was his direct supervisor (as the director of pharmacy) at Humboldt General Hospital (HGH) where he worked as a staff pharmacist and most currently as his direct supervisor (the PIC) at the Corner Drug in Winnemucca where he is working as a relief pharmacist.

Robert was well liked & respected at HGH. He was always available to work extra shifts and respond to call backs. HGH was not an easy place to work as it was routine to work 50-60 hours per week along with after-hours calls for service. At his current relief position at the Corner Drug, he is likewise well liked & respected by the staff & patients, save the one patient complaint for whom this Board hearing is about.

I believe in Robert's honesty, integrity and professionalism and that the incident in question was out of character for Robert considering everything else Robert has done professionally over the last 10-years that I have known him, and as such I believed in him enough that I recruited him as a relief pharmacist for the Corner Drug.

I would plead for consideration & leniency at the Board hearing of the matter in question based on his past 10-years of service to the community. There is no question that the matter in question should be taken seriously and not dismissed, however, I do believe that justice to the aggrieved practitioner, the community and to Robert can be addressed compassionately.

Finally, I believe reflection upon this by Robert over the past year while the Board reviewed & investigated has had a lasting impact on Robert such that this will never occur again in his career.

Thank you for your consideration of my thoughts regarding Robert.

ANSWER AND NOTICE
OF DEFENSE

FILED

AUG 17 2021

NEVADA STATE BOARD
OF PHARMACY

Respondent above named, in answer to the Notice of Intended Action and Accusation filed in the above-entitled matter before the Nevada State Board of Pharmacy, declares:

1. That his/her objection to the Notice of Intended Action and Accusation as being incomplete or failing to state clearly the charges against him/her, is hereby interposed on the following grounds: (State specific objections or insert "none").

My name is Ghayda Alrass, I'm pharmacist for more than 20 years. During all those years I perform my job with professional conduct & never have any unlawful acquisition, possession or use of controlled substance & dangerous drug.

On May 13th 2021, I had an accident inside my house (Broken back) which required me to do an emergency back surgery:
"T6, T7 Laminectomy & T6-T8 Fusion."

I left the hospital on 5/19/21 & got an order of Rx for Oxycodone 10mg. This is the first surgery & the first time taking Oxycodone in my whole life.

I really hope that the hearing on 9/1/21 will prove that those unlawful act, possession & use of controlled substance & dangerous drugs are wrong & fully incorrect.

I'm content with my career as a pharmacist & enjoy providing service to my community.

2. That, in answer to the Notice of Intended Action and Accusation, he/she admits, denies and alleges as follows:

I do deny the Factual Allegations that on or about May 3rd 2021 Raley's start an investigation into allegations that Respondent had diverted drugs from multiple pharmacy locations.

The day I admit taking one tablet of Amlodipine 10mg & some office supply (paper folder & sharpie pen) happened after May 3rd. So Raley's start the investigation before I took the above mentioned & Also Raley's didn't state that May be somebody else ~~is~~ is doing those Unlawful act? (the schedule of hours & locations will show that clearly).

I really wish that some of the history of my work as a pharmacist been mentioned:

I worked 12-13 years as a staff pharmacist @ CVS (24 hours) in Aliso Viejo, California.

I worked as a consultant pharmacist for "Doctor without Border" overseas in Amman, Jordan.

I was a consultant pharmacist at high dessert state prison in Susanville, California.

I was a staff pharmacist @ 24 Hour Walgreen Pharmacy in Reno, NV.

I hereby declare, under penalty of perjury, that the foregoing Answer and Notice of Defense, and all facts therein stated, are true and correct to the best of my knowledge.

25 through Seventh Causes of Action, violate Dr. Rashid's Sixth Amendment rights and are
26 unconstitutionally vague because they fail to apprise the Respondent, with reasonable certainty, of
27 the allegations against him and, thus, deprive him of the ability to prepare a defense. *United States*
28 *v. Estrada-Iglesias*, 425 F. Supp. 3d 1265, 1269 (D. Nev. 2019). Paragraphs 5, 6, and 7 generally
allege that Dr. Rashid authorized and directed unnamed registered nurses employed by Regenerate

1 Me IV (RNs) to treat unnamed patients at unspecified times and places with unspecified
2 intravenous (IV) and/or injectable dangerous drugs. By failing to identify specific persons and
3 instances on dates certain, the Notice of Intended Action and Accusation deprives Respondent of
4 the ability to defend himself adequately.

5 b. The purpose of the foregoing paragraph was to place the Board on notice of
6 Respondent's legal objections to its Notice. Respondent respectfully reserves the right to brief
7 further and expand upon these objections at the appropriate juncture, if necessary.

8 2. That, in answer to the Notice, he admits, denies, and alleges as follows:

9 a. As a preliminary issue, Respondent is without knowledge as to facts and
10 circumstances related to Dr. Minesh Amin, nor are Respondent and Dr. Amin jointly defended in
11 this matter. Respondent therefore responds to the allegations in the Notice only as to himself, and
12 submits no response on behalf of Dr. Amin. To the extent the Notice references "respondents",
13 Respondent denies coordinating any action or activity with Dr. Amin, and responds herein as if
the Notice referenced "respondent" only.

14 b. With regard to Paragraph 1, Respondent admits that the Board has
15 jurisdiction over this matter as to himself, and that Respondent held and still holds Certificate of
16 Registration No. CS14471.

17 c. With regard to Paragraph 2, Respondent admits he was medical director of
18 Regenerate Me IV beginning in approximately January 2018, but states he has continued as
19 medical director to the present.

20 d. Paragraph 3 does not contain allegations against the Respondent. To the
21 extent an answer is required, the Respondent denies the allegations in this paragraph.

22 e. With regard to Paragraph 4, Respondent denies that he personally employed
23 the RNs at Regenerate Me IV. Upon information and belief, Respondent states the RNs were
employed or engaged by Regenerate Me IV.

24 f. With regard to Paragraphs 5, 6, and 7, Respondent cannot respond
25 adequately to the allegations contained therein without further information, as set forth in his
26 objection above, and, thus, denies the allegations on that basis.

27 g. The allegations in Paragraphs 8 through 19 contain conclusions of law for
28 which no answer is required.

h. For the reasons set forth in his objection, and based on his denials of the

1 allegations in Paragraphs 5, 6, and 7, Respondent denies the allegations in the First through
2 Seventh Causes of Action.

3
4 I hereby declare, under penalty of perjury, that the foregoing Answer and Notice of
5 Defense, and all facts therein stated, are true and correct to best of my knowledge.

6 Dated this 20th day of May, 2021.
