To Whom It May Concern:

On behalf of Aadi Bioscience, Inc. ("Aadi"), attached is Aadi's initial application for a license in your state.

Aadi Bioscience, Inc. is a clinical-stage biopharmaceutical company developing precision therapies for genetically-defined cancers. Aadi's primary goal is to bring transformational therapies to cancer patients with mTOR pathway driver alterations such as alterations in TSC1 or TSC2 genes, where other mTOR inhibitors have not or cannot be effectively exploited due to problems of pharmacology, effective drug delivery, safety, or effective targeting to the disease site. Aadi's lead product is FYARROTM (sirolimus albumin-bound nanoparticles for injectable suspension; nab-sirolimus; ABI-009), an mTOR inhibitor bound to human albumin that has demonstrated significantly higher tumor accumulation, greater mTOR target suppression, and increased tumor growth inhibition over other mTOR inhibitors in preclinical models. FYARRO is an investigational drug that has not been approved by the FDA for commercial distribution in the United States.

Aadi is a "Virtual Manufacturer". Their product is manufactured by a contract manufacturer and distributed by a Third-Party Logistics Provider, who meets licensure requirements to ship pharmaceutical products into your state. Therefore, at no time does Aadi physically manufacture or distribute product. Aadi's product is not a controlled substance. Accordingly, Aadi is not required to obtain a DEA registration.

In California, the definition of "Manufacture" under the California Sherman Food Drug and Cosmetic Law, Chapter 1 - General Provisions and Definitions, section 109970 defines "Manufacture" as the preparation, compounding, propagation, processing, or fabrication of any food, drug, device, or cosmetic. By this definition, Aadi is neither eligible nor required to obtain a Manufacturer's license from the state of California as it does not do any of the "preparation, compounding, propagation, processing, or fabrication" at its headquarters in Pacific Palisades, CA.

I hope this narrative is helpful as you review Aadi's application. If you have a question regarding this application, please contact me at 614-578-3827 or via email at Jordan.spadafora@twolabs.com. Please also address all written communication to me. My address is 1340 Acton Rd., Columbus, OH 43224.

Thank you in advance for your consideration.

**Subject:** Sherman Definition of Manufacture

Hello Daniel,

I was wondering if you could please provide some clarification as to the Department's interpretation of the definition of "Manufacture" as listed under the Sherman Food Drug and Cosmetic Law? Under Chapter 1 General Provisions and Definitions 109970 lists "Manufacture" as the preparation, compounding, propagation, processing, or fabrication of any food, drug, device, or cosmetic. The term "manufacture" does not include repackaging from a bulk container by a retailer at the time of sale to its ultimate consumer. By this definition a "Virtual Manufacturer" (meaning a company who owns the drug's NDA but utilizes a CMO to manufacture, therefore no drugs are ever on the Virtual Manufacturer's property) would not be eligible to obtain a Manufacturer's license from the state of California as it does not do any of the "preparation, compounding, propagation, processing, or fabrication." Is that a correct assumption of the Department's interpretation of this definition?

## ITEM 1. BUSINESS

### Our Company

Boston Scientific Corporation is a global developer, manufacturer and marketer of medical devices that are used in a broad range of interventional medical specialties. Our mission is to transform lives through innovative medical solutions that improve the health of patients around the world. As a medical technology leader for more than 40 years, we have advanced the practice of less-invasive medicine by helping physicians and other medical professionals diagnose and treat a wide range of diseases and medical conditions and improve patients' quality of life by providing alternatives to surgery and other medical procedures that are typically traumatic to the body. We advance science for life by providing a broad range of high performance solutions to address unmet patient needs and reduce the cost of healthcare. When used in this report, the terms "we," "us," "our" and "the Company" mean Boston Scientific Corporation and its divisions and subsidiaries.

### Business Strategy

We operate pursuant to five strategic imperatives. We aim to: Strengthen Category Leadership, Expand into High Growth Adjacencies, Drive Global Expansion, Fund the Journey to Fuel Growth and Develop Key Capabilities. We believe that our execution of these strategic imperatives will help us deliver on our mission, drive innovation and increase value for our customers and employees, while strengthening our leadership position in the medical device industry and delivering profitable revenue growth.

We expect to continue to invest in our core franchises and pursue opportunities to diversify and further expand our presence in strategic, high-growth adjacencies and new global markets, including growth within the countries we define as emerging markets. Maintaining and expanding our international presence is an important component of our long-term growth strategy. Through our international presence, we seek to increase net sales and market share, leverage our relationships with leading physicians and their clinical research programs, accelerate the time to bring new products to market and gain access to worldwide technological developments that we can implement across our product lines. Our research and development efforts are focused largely on the development of next-generation and novel technology offerings across multiple programs and all divisions. In the past several years, we have completed numerous acquisitions in support of our growth strategy, both strengthening our core franchises and expanding into high growth adjacent markets. We continue to develop digital tools and technologies that enable us to compete more effectively and deliver first class remote physician education, drive deeper patient engagement and increase digitally-enabled sales force productivity.

We have a firm commitment to corporate social responsibility and living our values as a global business and global corporate citizen. This includes taking actions to combat discrimination and advancing equality and diversity, including through financial support of racial equity initiatives in the communities where we live and work, protecting the environment, investing in our employees' health and well-being, and many other initiatives that we believe ultimately help us create value responsibly. Refer to discussion of *Community Outreach* below and *Corporate Sustainability* included in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations of this Annual Report on Form 10-K for additional information regarding measures we are undertaking.

Markets

*Competition*

We encounter significant competition across our product lines and in each market in which we sell our products and solutions, some from companies that may have greater financial, sales and marketing resources than we do. Our primary competitors include Abbott Laboratories and Medtronic plc, as well as a wide range of medical device companies that sell a single or limited number of competitive products or participate in only a specific market segment. In certain countries, and particularly in China, we also face competition from domestic medical device companies that may benefit from their status as local suppliers. We also face competition from non-medical device companies, which may offer alternative therapies for disease states that could also be treated using our products, or from companies offering technologies that could augment or replace procedures using our products.

We believe that our products and solutions compete primarily on their ability to deliver both differentiated clinical and economic outcomes for our customers by enabling physicians to perform diagnostic and therapeutic procedures safely and effectively often in a less-invasive and cost effective manner. We also compete on ease of use, comparative effectiveness, reliability and physician familiarity. In the current environment of managed care, with economically motivated buyers, consolidation among healthcare providers, increasing prevalence and importance of regional and national tenders, increased competition and declining reimbursement rates, we have been increasingly required to compete on the basis of price, value, reliability and efficiency. We believe the current global economic conditions and healthcare reform measures could continue to put additional competitive pressure on us, including on our average selling prices, overall procedure rates and addressable market sizes. We recognize that our continued competitive success will depend upon our ability to:

- •offer products and solutions that provide differentiated clinical and economic outcomes,
- •create or acquire innovative, scientifically advanced technologies,
- •apply our technology and solutions cost-effectively and with superior quality across product lines and markets,
- •develop or acquire proprietary products and solutions,
- •attract and retain qualified personnel,
- •obtain patent or other protection for our products,
- •obtain required regulatory and reimbursement approvals,
- •continually provide quality products and enhance our quality systems,
- •supply sufficient inventory at competitive prices to meet customer demand.

*Research and Development*

Our investment in research and development is critical to driving our future growth. Our investment in research and development supports the following:

- internal research and development programs, regulatory design and clinical science, as well as other programs obtained through our strategic acquisitions and alliances, and
- engineering efforts that incorporate customer feedback into continuous improvement efforts for currently marketed and next-generation products.

We have directed our development efforts toward innovative technologies designed to expand current markets or enter adjacent markets. We continue to transform how we conduct research and development by identifying best practices, driving efficiencies and optimizing our cost structure, which we believe will enable increased development activity and faster concept-to-market timelines. Focused, cross-functional teams take a formal approach to new product design and development, helping us to manufacture and offer innovative products consistently and efficiently. Involving cross-functional teams early in the process is the cornerstone of our product development cycle. We believe this collaboration allows our teams to concentrate resources on the most viable and clinically relevant new products and technologies and to maximize cost and time savings as we bring them to market.

In addition to internal development, we work with hundreds of leading research institutions, universities and clinicians around the world to develop, evaluate and clinically test our products. We continue to expand our collaborations to include research and development teams in our emerging market countries; these teams will focus on both global and local market requirements at a lower cost of development. We believe that these efforts will play a significant role in our future success.

*Marketing and Sales*

In 2022, we marketed our products and solutions to approximately 36,000 hospitals, clinics, outpatient facilities and medical offices in 130 countries worldwide. Large group purchasing organizations, hospital networks and other buying groups have become increasingly important to our business and represent a substantial portion of our net sales. Each of our businesses maintains dedicated sales forces and marketing teams focused on physicians who specialize in the diagnosis and treatment of different medical conditions, as well as on key hospital service line administrators.

The majority of our net sales are derived from countries in which we have direct sales organizations. We also have a network of distributors and dealers who offer our products in certain countries and markets. We expect to continue to leverage our infrastructure in markets where commercially appropriate and use third party distributors in those markets where it is not economical or strategic to establish or maintain a direct presence.

Resources

*Manufacturing and Raw Materials*

We are focused on continuously improving our supply chain effectiveness, strengthening our manufacturing processes and increasing operational efficiencies within our organization worldwide. In doing so, we seek to focus our internal resources on the development and commercial launch of new products and the enhancement of existing products. We also drive continuous improvement in product quality through process controls and validations, supplier and distribution controls and training and tools for our operations team. In addition, we remain focused on examining our operations and general business activities to enhance our operational effectiveness by identifying cost-improvement opportunities.

We remain committed to maintaining appropriate investments to ensure supply chain stability. We have an ongoing supplier resiliency program which identifies and mitigates risk and have taken measures to mitigate the impact of challenges within the global supply chain, including those caused in part by the COVID-19 pandemic. We consistently monitor our inventory levels, manufacturing, sterilization and distribution capabilities and partnerships and maintain recovery plans to address potential disruptions. Many components used in the manufacturing of our products are readily fabricated from commonly available raw materials or off-the-shelf items available from multiple supply sources; however, certain items are custom made to meet our specifications.

On an on-going basis, we track supplier status and inventory in risk areas and take action to prevent shortages, monitoring safety stock levels and building up product supplies as warranted, and mitigating risk of technology and material shortages by identifying new vendors.

We have experienced increased levels of unpredictability in the supply of certain raw materials and components used in the manufacturing of our products. While we continue to believe we will have access to the raw materials and components that we need, these supply chain dynamics could result in increased costs to us or an inability to fully meet customer demand for certain of our products.

*Proprietary Rights and Patent Litigation*

We rely on a combination of patents, trademarks, trade secrets and other forms of intellectual property to protect our proprietary rights. We generally file patent applications in the U.S. and other countries where patent protection for our technology is appropriate and available. We hold patents worldwide that cover various aspects of our technology. In addition, we hold exclusive and non-exclusive licenses to a variety of third-party technologies covered by patents and patent applications. In the aggregate, these intellectual property assets and licenses are of material importance to our business; however, we believe that no single patent, technology, trademark, intellectual property asset or license is material in relation to our business as a whole.

We rely on non-disclosure and non-competition agreements with employees, consultants and other parties to protect, in part, trade secrets and other proprietary technology. There has been substantial litigation regarding patent and other intellectual property rights in the medical device industry, particularly in the areas in which we compete. We continue to defend ourselves against claims and legal actions alleging infringement of the patent rights of others. Additionally, we may find it necessary to initiate litigation to enforce our patent rights, to protect our trade secrets or know-how and to determine the scope and validity of the proprietary rights of others. Accordingly, we may seek to settle some or all of our pending litigation, particularly to manage risk over time. Settlement may include cross licensing of the patents that are the subject of the litigation as well as our other intellectual property and may involve monetary payments to or from third parties.

We maintain insurance policies providing limited coverage against securities claims. We are substantially self-insured with respect to product liability claims and fully self-insured with respect to intellectual property infringement claims. The absence of significant third-party insurance coverage increases our potential exposure to unanticipated claims or adverse decisions. See *Note I – Commitments and Contingencies* to our 2022 consolidated financial statements included in Item 8. Financial Statements and Supplementary Data of this Annual Report on Form 10-K for a discussion of intellectual property, product liability and other litigation and proceedings in which we are involved.

Regulatory Environment

*Medical Device Regulatory Approvals*

The medical devices that we manufacture, market and commercialize are subject to regulation by numerous worldwide regulatory bodies, including the U.S. FDA and comparable international regulatory agencies. These agencies require manufacturers of medical devices to comply with applicable laws and regulations governing development, testing, manufacturing, labeling, marketing and distribution. Medical devices are also generally subject to varying levels of regulatory control based on risk level of the device.

In the U.S., authorization to distribute a new device can generally be met in one of two ways. The first process requires that a premarket notification (510(k)) be made to the FDA to demonstrate that the device is as safe and effective as, or substantially equivalent to, a legally marketed device (the "predicate" device). Applicants must submit performance data to establish substantial equivalence. In some instances, data from human clinical trials must also be submitted in support of a 510(k) premarket notification. If so, these data must be collected in a manner that conforms to the applicable Investigational Device Exemption (IDE) regulations. The FDA must issue a decision finding substantial equivalence before commercial distribution can occur. Changes to cleared devices that could not significantly affect the safety or effectiveness of the device can generally be made without additional 510(k) premarket notifications; otherwise, a new 510(k) is required.

The second process requires the submission of a premarket approval (PMA) application to the FDA to demonstrate that the device is safe and effective for its intended use. This approval process applies to most Class III devices and generally requires clinical data to support the safety and effectiveness of the device, obtained in adherence with IDE requirements. The FDA will approve the PMA application if it finds that there is a reasonable assurance that the device is safe and effective for its intended purpose and that the proposed manufacturing is in compliance with the Quality System Regulation (QSR). For novel technologies, the FDA may seek input from an advisory panel of medical experts and seek their views on the safety, effectiveness and benefit-risk of the device. The PMA process is generally more detailed, lengthier and more expensive than the 510(k) process.

In the European Union (EU), we are required to comply with the Medical Device Regulation (MDR or EU MDR) which became effective May 2021, superseding the existing Medical Device and Active Implantable Medical Device Directives. Medical devices which have a valid CE Certificate to the prior Directives (issued before May 2021) can continue to be sold during the applicable transition period or until the CE Certificate expires, whichever comes first, providing there are no significant changes to the design or intended use. The CE Mark, which is required to sell medical devices in the EU is affixed following a Conformity Assessment and either approval from the appointed independent Notified Body or through self-certification by the manufacturer. The selected pathway to CE marking is based on device risk classification. CE marking indicates conformity to the applicable General Safety and Performance Requirements (GSPRs) for the MDR. The MDR changes multiple aspects of the regulatory framework for CE marking, such as increased clinical evidence requirements, changes to labelling, and new requirements, including Unique Device Identification (UDI), and many new post-market reporting obligations. MDR also modifies and increases the compliance requirements for the medical device industry and will continue to require significant investment over the next few years to transition all products. The CE mark continues to be a prerequisite for successful registration in many other global geographies. In addition, other EU countries continue to impose significant local registration requirements despite the implementation of MDR, and the United Kingdom has introduced new requirements following its exit from the EU.

We are also required to comply with the regulations of every other country where we commercialize products before we can launch or maintain new products on the market, including regulations that have been introduced in many countries in the Middle East and Southeast Asia that previously did not have medical device regulations, or had minimal regulations. In Japan we are required to comply with Japan's Ministry of Health, Labor and Welfare (MHLW) regulations. In conjunction with the MHLW, the Pharmaceutical and Medical Device Agency is an independent agency that is responsible for reviewing drug and medical device applications and works with the MHLW to assess new product safety, develop comprehensive regulations, and monitor post-market safety.

The FDA and other worldwide regulatory agencies and competent authorities actively monitor compliance to local laws and regulations through review and inspection of design and manufacturing practices, record-keeping, reporting of adverse events, labeling and promotional practices. The FDA can ban certain medical devices, detain or seize adulterated or misbranded medical devices, order recall or market withdrawal of these devices and require notification of health professionals and others with regard to medical devices that present unreasonable risks of substantial harm to the public health. The FDA may also enjoin and restrain a company for certain violations of the Food, Drug and Cosmetic Act and the Safe Medical Devices Act, pertaining to medical devices, or initiate action for criminal prosecution of such violations. Regulatory agencies and authorities in the countries where we do business can halt production in or distribution within their respective country or otherwise take action in accordance with local laws and regulations.

International sales of medical devices manufactured in the U.S. that are not approved by the FDA for use in the U.S., or that are banned or deviate from lawful performance standards, are subject to FDA export requirements. Additionally, exported devices are subject to the regulatory requirements of each country to which the device is exported.

Our quality system is designed to enable us to satisfy various international quality system regulations, including those of the U.S. FDA with respect to products sold in the U.S. All of our medical device manufacturing facilities and distribution centers are certified under the ISO 13485 quality system standard, established by the International Standards Organization (ISO) for medical devices, which includes requirements for an implemented quality system that applies to component quality, supplier control, product design and manufacturing operations.

*Healthcare Policies and Reimbursement*

Political, economic and regulatory influences around the world continue to subject the healthcare industry to potential fundamental changes that could substantially affect our results of operations. We maintain a global Government Affairs presence, headquartered in Washington, D.C., to actively monitor and advocate on myriad legislation and policies that may potentially impact us, both on a domestic and an international front. The Government Affairs office works closely with members of Congress and committee staff, the White House and administration offices, state governors, legislatures and regulatory agencies, embassies and global governments on issues affecting our business. The Government Affairs office also advocates for public policy that benefits our employees and the patients we serve, and supports the communities in which we live.

Our products are purchased principally by hospitals, physicians and other healthcare providers around the world that typically bill various third-party payers, including government programs (e.g., Medicare and Medicaid in the U.S.) and private insurance payers, for the items and services provided to their patients. Government and private sector initiatives related to limiting the

growth of healthcare costs (including price regulation), coverage and payment policies, comparative effectiveness reviews of therapies, technology assessments, price transparency and healthcare delivery and payment structure reforms, are continuing in many countries where we do business. We believe that these changes are causing the marketplace to place increased emphasis on the delivery of treatments that can reduce costs, improve efficiencies and/or increase patient access. Although we believe our products and technologies generate favorable clinical outcomes, value and cost efficiency, while also being less invasive than alternatives, the resources necessary to demonstrate value to our customers, patients, payers and other stakeholders are significant and new therapies may take significantly longer periods of time to gain widespread adoption.

Implementation of cost containment initiatives and healthcare reforms in significant markets such as the U.S., China, Australia, and other markets may limit the price of, or the level at which reimbursement is provided for, our products or procedures using our products, which in turn may make it less likely that a hospital or physician will select our products to treat patients.

*Environmental Regulation and Management*

We are subject to various environmental laws, directives and regulations both in the U.S. and abroad. Our operations involve the use of substances regulated under environmental laws, primarily in manufacturing and sterilization processes. We are focused on continuous improvement in environmental metrics with a goal of reducing pollution, minimizing depletion of natural resources and reducing our overall environmental footprint. Specifically, we are working to optimize energy and resource usage, ultimately reducing greenhouse gas emissions and waste. Refer to *Corporate Sustainability* included in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations of this Annual Report on Form 10-K for further discussion.

Human Capital

At Boston Scientific, our work is guided by core values that define our culture and empower our employees, including Caring, Diversity, Global Collaboration, High Performance, Meaningful Innovation and Winning Spirit. As of December 31, 2022, we had approximately 45,000 employees, of which approximately 56 percent were outside the U.S. We believe the collective talent of our employees and our shared corporate culture and values give us a competitive advantage.

Hiring, developing and retaining talented employees are key parts of our strategy and are critical to our success, particularly in the current environment of labor shortages and unprecedented job market conditions. We strive to do this by fostering a diverse, equitable and inclusive workplace, providing competitive pay and benefits and flexible work conditions, offering ongoing employee growth and development opportunities and cultivating a culture that prioritizes employee health, safety and well-being.

*Diversity, Equity and Inclusion*

We do our best work to advance health care when we have a diverse range of perspectives and experience on our team. Innovation thrives in a culture of engagement, inclusion and equity. The society in which we live and the customers and patients we serve are diverse and our employees at all levels of the organization must reflect this. In recent years, we have made steady progress to increase the overall representation of employees who identify as women and as African American/Black, Asian, Hispanic/Latinx, American Indian/Alaska Native, Native Hawaiian/Other Pacific Islander, and two or more races (together, multicultural talent). As of December 31, 2022, women represented 30 percent of our Board of Directors, and 49 percent of our employees. In addition, 36 percent of employees in the U.S. and Puerto Rico identified as multicultural.

We are committed to our goal of making further progress toward expanding our workforce diversity. In 2020, we set measurable Diversity, Equity & Inclusion (DE&I) goals with our "3UP by 2023" initiative, which included aspirations of a three percentage point increase in representation of both women and multicultural talent at the supervisor and manager level to 43 percent and 23 percent, respectively, by December 31, 2022. As of December 31, 2022, 42.6 percent of management roles were held by women and, within the U.S and Puerto Rico, 22.6 percent were held by multicultural employees. While we are making progress, our work is far from over. We are committed to intentional action to drive meaningful change. We listen to our employees and use that feedback to complement and expand our existing DE&I programs to emphasize initiatives aimed at developing our pipeline of talent and fostering a psychologically safe and inclusive workplace for all. Additionally, our Executive Committee and our Board of Directors have oversight of employee diversity metrics and hiring trends. As evidence of our commitment to expand DE&I, in 2021, we introduced an ESG scorecard, including DE&I metrics, to our Annual Bonus Plan.

In addition, our ten Employee Resource Groups (ERGs) are at the heart of our DE&I strategy. ERGs are voluntary, company-sponsored employee groups that foster and celebrate our diverse work environment. They provide forums for us to learn from

one another, celebrate our uniqueness and develop inclusive leadership skills. We support each ERG by designating global and local executive sponsors and providing financial resources. Our ERG chapters around the world collaborate across the business at all levels and are powerful voices for change in the company.

Additionally, our approach to supplier selection involves building DE&I throughout the Boston Scientific supplier network. We are committed to the increased and sustained support of diverse businesses that share our dedication to improving the quality of patient care. As part of our strategy to combat racism, we have taken steps to further expand the number of Black-owned enterprises that provide supply chain services for our business in the U.S., and are also supporting small and diverse vendors by shortening our standard payment terms.

*Compensation and Benefits*

We offer competitive, performance-based compensation programs, recognizing that employee well-being, safety, culture, engagement and recognition are all critical to a healthy work environment and productive workforce. We offer programs that acknowledge, respect and support an individual's life and work choices. Our holistic programs are guided by overall workforce health, focusing on physical, financial and emotional well-being as well as a healthy work environment. We believe that investing in employee well-being leads to improved performance for the individual and the organization.

As part of our broader rewards portfolio, we offer competitive pay and benefits that are flexible and affordable to meet the individual needs of our employees. In addition to cash-based salaries, our rewards portfolio includes cash bonus programs, sales incentives, stock awards, recognition awards, health insurance, paid time off and family leave, retirement savings plans, childcare and Employee Assistance Programs that encourage overall well-being, including help with finances, inclusive family planning and support, elder/child care, legal support and mental health resources.

Equal pay for equal work is rooted in our values and foundational to fostering an inclusive environment. Pay equity is an important part of our long-standing global compensation planning practices. Sustaining pay equity requires constant measurement and attention, so we regularly conduct comprehensive audits, internal and external analyses and company-wide benchmarking of salaries to identify and eliminate disparities. In addition, we periodically contract with an independent, third party to assess pay equity across all positions. Our most recent pay equity study, completed in 2021, reported no statistically significant pay disparity for approximately 99 percent of our employees across gender globally and for multicultural talent in the U.S. and Puerto Rico. We continue to educate and train our people, update policies and expand benefits to decrease bias, increase gender and racial representation within our organization, and foster a culture where all employees feel valued and included.

*Employee Health and Safety*

We take a global approach to prioritizing and monitoring employee health and safety and we strive to foster a safety-oriented culture in all of our offices and facilities. We set health and safety goals which measure the number of injuries per 100 employees for the global organization. Our Employee Health & Safety Global and Regional Councils review performance monthly to discuss trends and risks, as well as opportunities for improvement. We have obtained ISO 45001:2018 Occupational Health and Safety Management System at eight of our key global locations. This is a globally recognized standard for employee Occupational Health and Safety, established by the International Standards Organization, which provides a voluntary framework to identify key occupational health and safety aspects associated with our business helping to deliver continuous improvement. We have established a company-wide safety goal of 0.25 or fewer injuries per 100 employees by 2030, cutting our year-over-year incident rate by approximately 50 percent from a base year of 2019. As of December 31, 2022, we have achieved a safety level of 0.28 per 100 employees.

*Employee Growth and Development*

Developing our people professionally is one of the most important things we do. We have robust succession planning to ensure our future leaders are ready to assume roles as they become available. At every level of the company, employees have access to training and tools they can use to advance their skills and expertise and create greater possibilities for their careers. We offer professional and technical courses, including on-the-job training, skills-based learning, mentoring opportunities and leadership development programs for high-potential employees.

*Employee Engagement*

We seek ongoing feedback from our employees to better understand what we are doing well and, conversely, how we can improve their experience. In addition to encouraging ongoing communication and feedback between employees and their

managers, we conduct periodic employee engagement surveys to ensure all employees have an opportunity to share their insights and we take appropriate action in response. As evidence of our commitment to foster employee engagement, we include these metrics within the ESG scorecard that forms part of our Annual Bonus Plan.

Community Outreach

We are united by a goal to make a difference in the lives of the over 33 million patients we serve annually. The Boston Scientific Caring value guides us in the work we do each day including how we invest in the well-being of communities. We work to advance possibilities in our three focus areas of health, STEM education and community. Our efforts evolve frequently as do the pressing needs of our communities. In 2022, we focused on supporting Ukrainian refugees, providing aid to those impacted by natural disasters and addressing the basic needs of underserved populations in communities where we live and work. In February 2023, we provided donations to charitable organizations providing earthquake relief efforts in Türkiye and Syria, including overnight stays, meals, hygiene items and critical emergency supplies.

Our global community programs empowered employees to participate in and influence the way we care for local communities through volunteerism and personal donations. Many employees chose to support their communities through use of the Employee Matching Gifts program, which was doubled in 2022 on Giving Tuesday, the global day of giving that highlights the importance of supporting local communities around the world during the holiday season. Through employee contributions and the Boston Scientific match, a total of nearly $2 million was donated in 2022. In February 2023, we launched an additional match campaign through our Employee Matching Gifts Program for aid to Türkiye and Syria and are also providing volunteer opportunities for our employees based in Türkiye to give back to their local communities.

We have also collaborated with non-profit community organizations to decrease health disparities and reduce the risk for chronic disease for the underserved by increasing access to healthcare and screenings. Within many of the communities in which we operate, we have launched and funded a multi-year program to combat racism, inequity and injustice focused on five pillars: community, economic empowerment, education, healthcare disparities and government policies. We also continue our long-term Close the Gap initiative, which focuses on raising awareness and empowering healthcare providers to reach more patients of color, fight longstanding inequities, and address barriers to care. Through Close the Gap, hospitals and health systems are provided with zip code level data that highlight the disease prevalence and disparities occurring in their communities. The information, along with our health equity resources, allows health care administrators and providers to focus on improving care to underserved populations within their communities.

We are also passionate about inspiring young learners to see themselves in a Science, Technology, Engineering and Math (STEM) roles in the future. Employees on our global STEM teams worldwide work with underrepresented K-12 students to share their passion for STEM by providing interactive product demos, development programs, and hands-on activities for young learners in their communities.

Seasonality

Our net sales are influenced by many factors, including product launches, acquisitions, regulatory and reimbursement approvals, patient, physician and employee holiday schedules and other macro-economic conditions. While our consolidated net sales do not reflect any significant degree of seasonality, customer purchases of our medical devices have historically been lower in the first and third quarters of the year.

# AMGEN SUCCESSFULLY COMPLETES ACQUISITION OF CHEMOCENTRYX

## TAVNEOS® (avacopan), a First-in-Class Medicine for Patients With Severe Active ANCA-Associated Vasculitis, Added to Inflammation Portfolio

THOUSAND OAKS, Calif., (Oct. 20, 2022) – Amgen (NASDAQ: AMGN) today announced that it has successfully completed its previously announced acquisition of ChemoCentryx, Inc. (NASDAQ: CCXI), a biopharmaceutical company focused on orally administered therapeutics to treat autoimmune diseases, inflammatory disorders and cancer, for $52 per share in cash, representing aggregate merger consideration of approximately $3.7 billion.

"ChemoCentryx enhances Amgen's leading inflammation and nephrology portfolio and includes TAVNEOS® (avacopan), a first-in-class treatment for severe active anti-neutrophil cytoplasmic autoantibody-associated vasculitis (ANCA-associated vasculitis), an autoimmune disease for which there remains significant unmet medical need," said Robert A. Bradway, chairman and chief executive officer at Amgen. "We look forward to welcoming the dedicated professionals from ChemoCentryx who share our passion for advancing innovation that makes a difference for patients. Together, we aim to serve more patients affected by serious diseases."

The acquisition includes TAVNEOS®, an orally administered selective complement 5a receptor inhibitor that was approved by the U.S. Food and Drug Administration (FDA) in October 2021 as an adjunctive therapy for adults with severe active ANCA-associated vasculitis in addition to standard of care, which generally consists of glucocorticoids and either rituximab or cyclophosphamide immunosuppressant therapy. Beyond its approved ANCA-associated vasculitis indication, TAVNEOS® is also being studied in additional inflammatory diseases, including hidradenitis suppurativa (HS), a severe and deforming chronic dermatological condition, and complement 3 glomerulopathy (C3G), a rare genetic kidney disease.

In addition to TAVNEOS®, the acquisition adds three early-stage drug candidates that target chemoattractant receptors and other inflammatory diseases and an oral checkpoint for cancer.

**About ChemoCentryx**
ChemoCentryx is a biopharmaceutical company commercializing and developing new medications for inflammatory and autoimmune diseases and cancer. ChemoCentryx targets the chemokine and chemoattractant systems to discover, develop and commercialize orally administered therapies. In the United States, ChemoCentryx markets TAVNEOS® (avacopan), the first approved orally administered inhibitor of the complement 5a receptor as an adjunctive treatment for adult patients with severe active ANCA-associated vasculitis. TAVNEOS is also in late-stage clinical development for the treatment of severe hidradenitis suppurativa and C3 glomerulopathy (C3G). Additionally, ChemoCentryx has early-stage drug candidates that target chemoattractant receptors in other inflammatory and autoimmune diseases and in cancer. For more information about ChemoCentryx visit www.chemocentryx.com.

**About TAVNEOS® (avacopan)**
TAVNEOS (avacopan), approved by the FDA as an adjunctive treatment of ANCA-associated vasculitis, is a first-in-class, orally administered small molecule that employs a novel, highly targeted mode of action in complement-driven autoimmune and inflammatory diseases. While the precise mechanism in ANCA vasculitis has not been definitively established, TAVNEOS, by blocking the complement 5a receptor (C5aR) for the pro-inflammatory complement system fragment known as C5a on destructive inflammatory cells such as blood neutrophils, is presumed to arrest the ability of those cells to do damage in response to C5a activation, which is known to be the driver of ANCA vasculitis. TAVNEOS's selective inhibition of only the C5aR leaves the beneficial C5a pathway through the C5L2 receptor functioning normally.

ChemoCentryx is also developing TAVNEOS for the treatment of patients with C3 glomerulopathy (C3G), severe hidradenitis suppurativa (HS) and lupus nephritis (LN). The U.S. Food and Drug Administration granted TAVNEOS orphan drug designation for ANCA-associated vasculitis and C3G. The European Commission has granted orphan medicinal product designation for TAVNEOS for the treatment of two forms of ANCA-associated vasculitis: microscopic polyangiitis and granulomatosis with polyangiitis (formerly known as Wegener's granulomatosis), as well as for C3G.

**About ANCA-Associated Vasculitis**
ANCA-associated vasculitis is an umbrella term for a group of multi-system autoimmune diseases with small vessel inflammation. Inflamed vessels may rupture or become occluded giving rise to a broad array of clinical symptoms and signs related to a systemic inflammatory response which may result in profound injury and dysfunction in the kidneys, lungs and other organs. Prior to the approval of TAVNEOS, treatment for ANCA-associated vasculitis was limited to courses of non-specific immuno-suppressants (cyclophosphamide or rituximab), combined with the administration of daily glucocorticoids (steroids) for prolonged periods of time, which can be associated with significant clinical risk including death from infection.

**U.S. PRESCRIBING INFORMATION**
TAVNEOS (avacopan) is indicated as an adjunctive treatment of adult patients with severe active anti-neutrophil cytoplasmic autoantibody (ANCA)-associated vasculitis (granulomatosis with polyangiitis [GPA] and microscopic polyangiitis [MPA]) in combination with standard therapy including glucocorticoids. TAVNEOS does not eliminate glucocorticoid use.

IMPORTANT SAFETY INFORMATION

Contraindications

Serious hypersensitivity to avacopan or to any of the excipients

Warning and Precautions

Hepatotoxicity: Serious cases of hepatic injury have been observed in patients taking TAVNEOS, including life-threatening events. Obtain liver test panel before initiating TAVNEOS, every 4 weeks after start of therapy for six months and as clinically indicated thereafter. Monitor patients closely for hepatic adverse reactions, and consider pausing or discontinuing treatment as clinically indicated (refer to section 5.1 of the Prescribing Information). TAVNEOS is not recommended for patients with active, untreated and/or uncontrolled chronic liver disease (e.g., chronic active hepatitis B, untreated hepatitis C, uncontrolled autoimmune hepatitis) and cirrhosis. Consider the risk and benefit before administering this drug to a patient with liver disease.

Serious Hypersensitivity Reactions: Cases of angioedema occurred in a clinical trial, including one serious event requiring hospitalization. Discontinue immediately if angioedema occurs and manage accordingly. TAVNEOS must not be re-administered unless another cause has been established.

Hepatitis B Virus (HBV) Reactivation: Hepatitis B reactivation, including life threatening hepatitis B, was observed in the clinical program. Screen patients for HBV. For patients with evidence of prior infection, consult with physicians with expertise in HBV and monitor during TAVNEOS therapy and for six months following. If patients develop HBV reactivation, immediately discontinue TAVNEOS and concomitant therapies associated with HBV reactivation, and consult with experts before resuming.

Serious Infections: Serious infections, including fatal infections, have been reported in patients receiving TAVNEOS. The most common serious infections reported in TAVNEOS group were pneumonia and urinary tract infections. Avoid use of TAVNEOS in patients with active, serious infection, including localized infections. Consider the risks and benefits before initiating TAVNEOS in patients with chronic infection, at increased risk of infection or who have been to places where certain infections are common.

Adverse Reactions

The most common adverse reactions (≥5% of patients and higher in the TAVNEOS group vs. prednisone group) were: nausea, headache, hypertension, diarrhea, vomiting, rash, fatigue, upper abdominal pain, dizziness, blood creatinine increased, and paresthesia.

Drug Interactions

Avoid coadministration of TAVNEOS with strong and moderate CYP3A4 enzyme inducers. Reduce TAVNEOS dose when co-administered with strong CYP3A4 enzyme inhibitors to 30 mg once daily. Monitor for adverse reactions and consider dose reduction of certain sensitive CYP3A4 substrates.

**Amgen Forward-Looking Statements**
This news release contains forward-looking statements that are based on the current expectations and beliefs of Amgen. All statements, other than statements of historical fact, are statements that could be deemed forward-looking statements, including any statements on the outcome, benefits and synergies of collaborations, or potential collaborations, with any other company (including BeiGene, Ltd., Kyowa-Kirin Co., Ltd., or any collaboration to manufacture therapeutic antibodies against COVID-19), the performance of Otezla® (apremilast) (including anticipated Otezla sales growth and the timing of non-GAAP EPS accretion), the Five Prime Therapeutics, Inc. acquisition, the Teneobio, Inc. acquisition, or the ChemoCentryx, Inc. acquisition (including the prospective performance and outlook of ChemoCentryx's business, performance and opportunities and any potential strategic benefits, synergies or opportunities expected as a result of such acquisition), as well as estimates of revenues, operating margins, capital expenditures, cash, other financial metrics, expected legal, arbitration, political, regulatory or clinical results or practices, customer and prescriber patterns or practices, reimbursement activities and outcomes, effects of pandemics or other widespread health problems such as the ongoing COVID-19 pandemic on our business, and other such estimates and results. Forward-looking statements involve significant risks and uncertainties, including those discussed below and more fully described in the Securities and Exchange Commission reports filed by Amgen, including our most recent annual report on Form 10-K and any subsequent periodic reports on Form 10-Q and current reports on Form 8-K. Unless otherwise noted, Amgen is providing this information as of the date of this news release and does not undertake any obligation to update any forward-looking statements contained in this document as a result of new information, future events or otherwise.

No forward-looking statement can be guaranteed and actual results may differ materially from those we project. Our results may be affected by our ability to successfully market both new and existing products domestically and internationally, clinical and regulatory developments involving current and future products, sales growth of recently launched products, competition from other products including biosimilars, difficulties or delays in manufacturing our products and global economic conditions. In addition, sales of our products are affected by pricing pressure, political and public scrutiny and reimbursement policies imposed by third-party payers, including governments, private insurance plans and managed care providers and may be affected by regulatory, clinical and guideline developments and domestic and international trends toward managed care and healthcare cost containment. Furthermore, our research, testing, pricing, marketing and other operations are subject to extensive regulation by domestic and foreign government regulatory authorities. We or others could identify safety, side effects or manufacturing problems with our products, including our devices, after they are on the market. Our business may be impacted by government investigations, litigation and product liability claims. In addition, our business may be impacted by the adoption of new tax legislation or exposure to additional tax liabilities. If we fail to meet the compliance obligations in the corporate integrity agreement between us and the U.S. government, we could become subject to significant sanctions. Further, while we routinely obtain patents for our products and technology, the protection offered by our patents and patent applications may be challenged, invalidated or circumvented by our competitors, or we may fail to prevail in present and future intellectual property litigation. We perform a substantial amount of our commercial manufacturing activities at a few key facilities, including in Puerto Rico, and also depend on third parties for a portion of our manufacturing activities, and limits on supply may constrain sales of certain of our current products and product candidate development. An outbreak of disease or similar public health threat, such as COVID-19, and the public and governmental effort to mitigate against the spread of such disease, could have a significant adverse effect on the supply of materials for our manufacturing activities, the distribution of our products, the commercialization of our product candidates, and our clinical trial operations, and any such events may have a material adverse effect on our product development, product sales, business and results of operations. We rely on collaborations with third parties for the development of some of our product candidates and for the commercialization and sales of some of our commercial products. In addition, we compete with other companies with respect to many of our marketed products as well as for the discovery and development of new products. Discovery or identification of new product candidates or development of new indications for existing products cannot be guaranteed and movement from concept to product is uncertain; consequently, there can be no guarantee that any particular product candidate or development of a new indication for an existing product will be successful and become a commercial product. Further, some raw materials, medical devices and component parts for our products are supplied by sole third-party suppliers. Certain of our distributors, customers and payers have substantial purchasing leverage in their dealings with us. The discovery of significant problems with a product similar to one of our products that implicate an entire class of products could have a material adverse effect on sales of the affected products and on our business and results of operations. Our efforts to collaborate with or acquire other companies, products or technology, and to integrate the operations of companies or to support the products or technology we have acquired, may not be successful. There can be no guarantee that we will be able to realize any of the strategic benefits, synergies or opportunities arising from the ChemoCentryx acquisition, and such benefits, synergies or opportunities may take longer to realize than expected. We may not be able to successfully integrate ChemoCentryx, and such integration may take longer, be more difficult or cost more than expected. A breakdown, cyberattack or information security breach could compromise the confidentiality, integrity and availability of our systems and our data. Our stock price is volatile and may be affected by a number of events. Our business and operations may be negatively affected by the failure, or perceived failure, of achieving our environmental, social and governance objectives. The effects of global climate change and related natural disasters could negatively affect our business and operations. Global economic conditions may magnify certain risks that affect our business. Our business performance could affect or limit the ability of our Board of Directors to declare a dividend or our ability to pay a dividend or repurchase our common stock. We may not be able to access the capital and credit markets on terms that are favorable to us, or at all.

Shannon,

Delaware licensing requirement is for this form to be completed by the state in which the facility is located, and to be mailed to their address on the form.

I do recall that NC may not perform such license verification? If not, I wanted to be sure to send this to you. But I don't recall.

**Discussion/Education:**
1) **California Code of Regulations Section 1732.5 – Pharmacist Renewal Requirement:** Pharmacist are required to complete 2 of the 30 hours of Continuing Education in the prior 24 months to renew their pharmacist license by participation in a Board provided CE course in Law and Ethics. The two hours of continuing education are currently posted on the board's website at www.pharmacy.ca.gov. Pharmacist renewing their licenses which expires on or after July 1, 2019 are subject to this requirement. Print certificate of completion after online course is completed and maintain for four years.Available on Board's website: http://www.pharmacy.ca.gov/licensees/webinars/law_ethics.shtml.
2) Recommend reviewing USP 795, which becomes official and enforceable on 11/1/2023.
3) Recommend not compounding hazardous compounded drug products until the hazardous compounding room has been certified to have at least 12 air changes per hour and maintain negative pressure in the range of (-0.01-0.03" water column). On top of modular room the fan motor has a red light today. Fan or motor may have stopped working today. The pressure was last checked at 930am today and was -0.03" water column.
4) Recommend labeling the compounded drug quarantine area (currently red "on-hold labels placed on quarantined compounded drugs which are placed in an area away from active inventory, a green label is then placed on the compounded drugs over the red label when they are approved and released for use).
5) Recommend revising cleaning document for area where pharmacists work, it states they are cleaning compounding work surfaces.
6) Recommend revising SOP 6.004 for non-sterile compounding finished preparation testing, as it states all compounded products shall be quarantined until documentaiton of results of release testing and inspections are complete which is not the current practice.

**Corrections/Violations:**
1) CCR 1735.4(a)(3): There are no storage instructions on the compounded drug prescription label.
2) CCR 1735.4(a)(5): The date compounded is not listed on the compounded drug prescription label.
3) CCR 1735.6(e)(1): Hazardous non-sterile compounding room does not have the number of air changes per hour documented by a certification company.
4) CCR 1735.63(e)(2): Hazardous non-sterile compounding room had positive pressure on the ENV cerification report from 4/7/2022 (0.0343" water column), instead of negative pressure. During the inspection, the room had positive pressure noted by PIC and Inspector by feeling airflow on hands coming out of the vent in the door to the room and the magnahelic gauge read 0.01" positive pressure. However, the print out of the electronic pressure was -0.03 " water column today at 9:34.
5) CCR 1735.3(a)(2)(F): The compounding records reviewed showed the manufacturer does not always print out under the ingredients used in compounding the drug product. For ingredients compounded in house, please be sure they state (compounded in house or similar).
6) BPC 4076.7: Opioids are dispensed without a warning of risk of overdose and addiction.

WARNING:

erik.clausen@bravacare.com

Hi Denise,

Please find attached the following documents:

1. CCR 1735.3(a) - a sample worksheet for Methimazole showing manufacturer information for the methimazole lot in question. We identified that the lot number for the methimazole that was missing from the manufacturer was due to that lot number coming over incorrectly during the data transition from our old software to the new software. We re-added the lot number under the correct manufacturer so it will be accurate moving forward. For our anhydrous suspension base, we added "manf in house" to the title to meet the requirement. See the attached master formula. We have not yet used a new batch, so it is still printing without the manufacturer, but all future batches should indicate that in the title. In the meantime, we are putting it in the notes (see methimazole sample formula). We also notified staff that if they see a similar situation moving forward with any other products, to a) notify management so we can rectify and b) notate the manufacturer in the notes until the problem is resolved.
2. CCR 1735.4(a)(5) - a sample label showing the "date compounded" on the label. This was actually something that the software was doing, but the date compounded was cut off on the sample label provided to you that day.
3. CCR 1735.4(a)(3) - a sample label showing the room temperature storage requirement added to the label. All room temperature formulations are currently being updated to reflect this requirement.
4. CCR 1735.6(e)(1) - an updated certification report showing negative pressure and air changes per hour in the USP 800 Hazardous Lab
5. CCR 1735.6(e)(2) - an updated certification report showing negative pressure and air changes per hour in the USP 800 Hazardous Lab as well as previous documentation showing that the HVAC units were being serviced at the time of the inspection resulting in the positive pressure at that time.
6. BPC 4076.7 - A sample of the opioid auxiliary label in use since the inspection

Please let me know if there is anything else that you should need from me. Thank you very much for your time and guidance.

Regards,

Erik Clausen

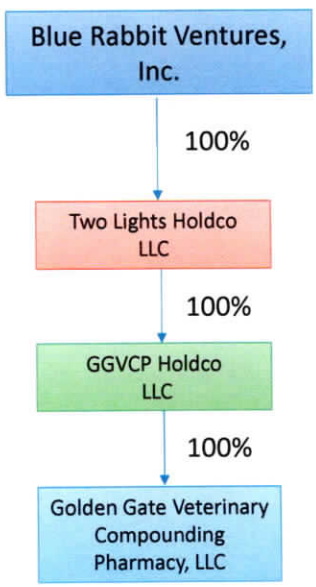
**Re: Brava CA LLC (Nevada License No. PH04110)**

Dear Nevada Board of Pharmacy:

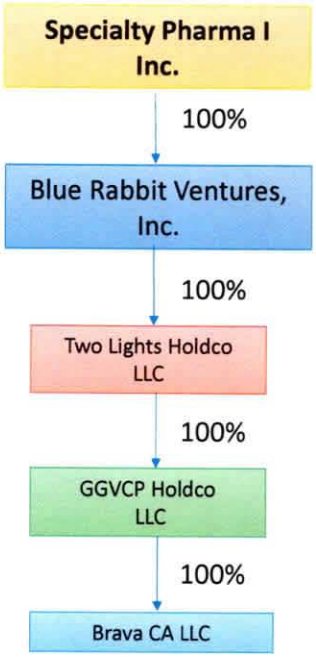
On behalf of the applicant Brava CA LLC ("Brava CA"), please accept the enclosed Pharmacy Application and accompanying forms and attachments for review and approval. Also enclosed is a check made out to Nevada State Board of Pharmacy in the amount of $500.00.

By way of background, Brava CA is a veterinary compounding pharmacy located in Novato, California. On or about **June 13, 2023**, Brava CA will undergo a **change of ownership at the great-great grandparent level**. On or about that date, Specialty Pharma I, Inc. will purchase all of the issued and outstanding common shares of Blue Rabbit Ventures Inc., the great grandparent owner of Brava CA. Accordingly, post-closing, Specialty Pharma I, Inc. will be the new great-great grandparent owner of Brava CA.

As a result of this change of ownership, Brava CA will obtain a new home state permit from the California Board of Pharmacy. There will be **no change** to Brava CA's name, location, FEIN, corporate status as a limited liability company, and day-to-day management and operations post-closing. For ease of reference, we have enclosed before and after organization structure charts demonstrating the nature of the change, as well as updated ownership information.



Should you require any additional information during the application review process, please contact me at 415-659-4756 and kkearney@reedsmith.com, or my colleagues Amica Nesbitt at 312-207-2777 and anesbitt@reedsmith.com and Madhav Bhatt at 312-207-2903 and mbhatt@reedsmith.com.



Very truly yours,

*Kelly J. Kearney*

14. Shipping

Kings maintains processes for selecting appropriate packaging for specific drugs, based on specific medication temperature requirements, light sensitivity of medication, fragility of product, size of product, and manufacturer guidelines.

Medications are packaged to maintain the appropriate temperatures throughout the delivery process; all packages are stable for 24 hours. Refrigerated products are maintained between 2-8°C, (36-46°F) and room temperature products are maintained between 20°C to 25°C (68-77°F). Kings conducts initial and ongoing qualification testing for new packaging products/processes and when products or shipping process are modified, to demonstrate the ability to maintain appropriate temperature ranges and ensure product stability/efficacy. Qualification testing is based on different geographic areas served and different temperature profiles.

8. Hazardous products

Kings Pharmacy provides all patients with education and counseling related to proper handling, storage, and disposal of medications and ancillary supplies, including hazardous drug products/containers. The following information is provided to patients/consumers who receive hazardous products:

Handling:

**"Red Flags" Checklist for Pharmacies**
**YOU MIGHT BE A PILL MILL IF...**

*Check all that apply:*

| | |
|---|---|
| | (1) Your pharmacy fills a discernable pattern of prescriptions for prescribers who write essentially the same prescriptions for numerous persons, indicating a lack of individual drug therapy |
| | (2) Your pharmacy operates with limited hours of operation or closes after a certain threshold of controlled substance prescriptions are dispensed, and has overall low prescription dispensing volume. |
| | (3) Prescriptions presented to the pharmacy are for controlled substances with popularity as street drugs, such as opiates, benzodiazepines, muscle relaxants, psychostimulants, and/or cough syrups, or any combination of these drugs. |
| | (4) The prescriptions for controlled substances contain nonspecific or no diagnoses. |
| | (5) The prescriptions are commonly for the highest strength of the drug and/or for large quantities. |
| | (6) Dangerous drugs or OTC products (such as multi-vitamins or laxatives) are added to the controlled substance prescriptions, maintaining relatively consistent 1:1 ratio of controlled substances to dangerous drugs and/or OTC products dispensed as prescriptions. |
| | (7) Prescriptions are authorized by the same prescriber with what appears to be different handwriting on the hardcopy prescription drug order forms. |
| | (8) Upon contact with the prescriber's office, you are unable to engage in comprehensive discussion with the actual prescriber, or he/she is unconcerned about your apprehensions regarding his/her prescribing practices or unwilling to provide additional information, such as treatment goals and/or prognosis with prescribed drug therapy. |
| | (9) You rely solely on the prescriber's representation, or on the representation of the individual answering the phone at the number on the prescription, that prescriptions are legitimate. |
| | (10) The prescriber's clinic is not registered as a pain management clinic by the Texas Medical Board, despite routinely receiving prescriptions from the prescriber foropiates, benzodiazepines, and/or muscle relaxants. |
| | (11) Drugs prescribed are inconsistent with the prescriber's area of practice. |
| | (12) The prescriber of the drugs is located a significant distance from your pharmacy. |
| | (13) The prescriber has been subject to disciplinary action by the licensing board, had his/her DEA registration removed, or been subject to criminal action. |
| | (14) The Texas PMP system indicates that persons are obtaining prescriptions for the same drugs from multiple prescribers or that persons are filling prescriptions for the same drugs at multiple pharmacies. |
| | (15) The person's address is a significant distance from your pharmacy and/or from the prescriber's office. |
| | (16) Multiple persons with the same address present prescriptions from the same prescriber. |
| | (17) Persons pay with cash or credit card more often than through insurance. |
| | (18) Persons presenting controlled substance prescriptions are doing so in such a manner that varies from seeking routine pharmacy services (e.g., willing to wait in long lines to receive drugs, persons arrive in the same vehicle with prescriptions from same prescriber, one person presents to pick up prescriptions for multiple others, persons refer to drugs by "street names" and/or comment on drug's color, persons seek early refills, persons travel from outside reasonable trade area of pharmacy). |
| | (19) Your pharmacy charges and persons are willing to pay more for controlled substances than they would at nearby pharmacies. |
| | (20) Your pharmacy routinely orders controlled substances from more than one drug supplier, or your pharmacy has been discontinued by a drug supplier related to controlled substance orders. |
| | (21) Sporadic and non-consistent dispensing volume (including zero dispensing) varies from day to day and week to week, and your pharmacy does not maintain operational hours each week on Monday through Friday. |
| | (22) Your pharmacy employs or contracts security personnel during operational hours to prevent problems. |
| | (23) Your pharmacy has been previously warned or disciplined by the Texas State Board of Pharmacy for inappropriate dispensing of controlled substances (i.e., corresponding responsibility). |

If you checked any of the above items, you should review the laws and rules regarding corresponding responsibility and non-therapeutic dispensing, especially Board rule §291.29, in the law book or on our website: www.pharmacy.texas.gov (click on Texas Pharmacy Rules and Laws). Additional educational material is available at: http://www.pharmacy.texas.gov/Nontherapeutic.asp. Failure of pharmacies and pharmacists to detect patterns of inappropriate dispensing of prescription drugs is unprofessional practice and constitutes grounds for disciplinary action.

A complaint was made concerning grants made by the Board of Pharmacy to PRN, Inc. under the care of Mary Grear, Executive Director. The Board of Pharmacy sent notice of a request for hearing to the wrong mailing address even though the corect address was on file at the Board Office. This resulted in my not being aware that I needed to appear until after the Board Meeting. I subsequently prepared the requested documents and submitted them to the Board Auditors who found no discrepencies in the funds granted by the Board of Pharmacy to PRN and ethe expense record under my administration. A rehearing was held and the case was closed finding all monies were accounted for the PRN, Inc. grants.

**Section 6: NAC 639.403 A registered pharmacist who is NOT employed by or under contract with a pharmacy and who is NOT an employee of the State Government MUST complete this section.**

1. Provide a description of the services that you intend to provide at the site, to include only those services listed in Section 7 (A) of this application.

My initial focus will be the independent practice of pharmacy into Idaho via telehealth to provide pharmaceutical care services inclusive of prescribing drugs and devices, to Idaho residents under the authorities granted by my pharmacist licence in Idaho (P10492) and in accordance with the laws of the state of Idaho.

I also intend to expand my telehealth practice to include patients in NV on a more limited scale consistent with the scope of practice in NV. Services I would like to offer to NV residents include Part D Medication Therapy Management services, consultation on use of pharmacotherapy, prescribing of drugs for preventing the acquisition of human immunodeficiency virus and ordering laboratory tests necessary for therapy that uses such drugs, and potentially engaging in a Collaborative Practice Agreement with a NV licensed physician.

2. Provide the identification of the types of patients or other persons to whom you intend to provide services.

A. For initial services offered in Idaho: Patients throughout Idaho who self identify and refer as a patient in need of services we offer, patients referred by contracted Managed Medicare Plans for Part D MTM, and patients referred by pharmacies and medical practices we have established referral arrangements with. Patients must be able to consent to treatment and operate telehealth technology in order to establish a valid patient-practitioner relationship.
B. For services offered in NV: Patients in NV who self identify or are referred for services that we offer (other than CPA services). If a CPA service is established, a referral from the participating practitioner would be required.

3. Provide a description of all resources, both paper and electronic, that will be available to you in the course of providing the services.

Dynamed, Micromedex, Facts and Comparisons, Natural Medicine Database, PubMed, medical librarian on staff.

4. Provide an explanation of the policy for users of the services when you are unavailable.

For the initial services to be provided in ID, I have a contract pharmacist located in OR and licensed in ID who will provide call coverage and triage when I am unavailable to staff the service due to time off or sick time. Patients will additionally be established with a PCP and care cordinated with the primary team to manage in any downtime. Patients will additionally be notified to seek care in emergency situations with local Urgent Care/ED services. This notice will be on our phone message, website and in the content of our counseling.
NV services would similarly be coordinated with the primary team, triaged to urgent care/ED or for CPA services, coordinated with the referring provider. Before launching non-CPA NV services, I will be seeking a contract NV RPh.

5. Provide an explanation of the policy regarding the confidentiality and security of the patient data that will be gathered, made, and maintained as part of the services which are provided, including without limitation, paper and electronic records.

We have established a HIPAA and HITECH Compliant Privacy Policy and all staff will be appropriately trained. All clinical records will be maintained in the cloud based EMR that is Hitrust CSF Certified and messaging of PHI with patients will only occur via the embedded EMR patient messanger or mail to the address on file. Telehealth visits will be conducted via doxy.me HIPAA compliant AV technology. We have a ROI form to designate permissable contacts or permit release of any PHI outside of the permissions of HIPAA authorized use. BAAs have been established for all vendors who may come into contact with PHI in the course of our business. Staff will confirm two patient identifiers and review authorized individuals before release of any PHI verbally.

6. Provide a description of the business plan for the services provided.

All services will be via telehealth. Services will be provided on a fee for service basis (flat charge per service provided as defined by the fee schedule and CPT code for the service provided). Patients with multiple chronic conditions will be eligible to enroll in chronic care management subscription services where a monthly fee is charged for a group of services delivered over a month as defined by the CCM/PCM CPT codes. Idaho services will be on a self pay/no insurance basis as most major payers in ID cover telehealth only when provided in state. NV services may be provided on a cash pay or insurance basis.
Services will be deliverd by myself as the primary pharmacist clinician with assistance of an office manager / medical librarian for scheduling and clinical research. General, professional, and workmans comp insurance has been established.

**Provide explanation below:**

On 03/27/2010 my Boyfriend Justin Angel and I got into a disagreement about me drinking that morning. He had broke my computer and because I was angry about him breaking my property, I started tossing the laundry that was in a basket near by around the living room. Because of me tossing the clothes around he called the police. The police came while I was still intoxicated and In my current state my language towards the police was not as kind as it should of been while anserwing questions. As a result of the language I was using the police had said that because this was a Domestic Violence call that one of us had to be taken in, and since I was the intoxicated individual it resulted in me being under arrest.

**Provide explanation below:**

During this time I was banking with Educators Credit Union. I remember receiving a check in the mailbox for about $900. Mr being young and in need of cash, I went and cashed the check at my bank. The check was a bad check. So in return I was summoned to go to the station to provide a statement and plea (guilty) I lost my account, had to repay the credit Union and also be charged a misdemeanor. I have no record from this case taken it was 13 years ago.

On Wednesday, 03-03-2010 I received a packet of info Educators Credit Union Security Officer Angela M Langdon [redacted] The information documented the following:

On 11-04-2009 a person identified as Vesta Denise Johnson (f/b 08-08-1990) cashed check #5041 at Educators Credit Union for $850.75. The check was purportedly drawn on the Legacy Bank account of Great Wealth LLC, DBA Pondersosa, 2730 N Martin Luther King Dr, Milwauk[redacted]e transaction was completed by bank employee Destiny L Halbert [redacted].

Check #5041 was returned to Educators Credit Union as an account closed check. A Legacy Bank Security Alert advised that the account was closed in September of 2009 due to fraud.

Johnson attempted to cash another check some time between 11-04-2009 and 11-17-2009 at the Glendale branch. The check was purportedly drawn on the Wells Fargo Bank account of Green Bay Beef, LLC of Green Bay, WI. She was denied the transaction due to the cashing of check #5041. She attempted to cash the same Wells Fargo check at the St Joseph's Hospital branch. The validity of the Wells Fargo check has not yet been determined.

At the time Johnson cashed the Legacy Bank check she had $2.02 in her account. A demand letter was sent to Johnson at 1924 N 19th St on 11-17-2009. No response was received.

The packet from Langdon included original check #5041. The back of the check w[redacted] the name Vesta Johnson. It also showed the social security number [redacted]

A search of the on-line data bank Accurint showed the social security number assigned to Vesta D Johnson. An additional entry showed the name Valerie D Johnson, also at 1924 N 19th St. It appeared, based on additional information, that Valerie might be Vesta's mother.

The packet included two video still photos showing the transaction on 11-04-2009. A comparison of the video photos to a photo of Vesta D Johnson obtained from WI DOT confirmed that Johnson was the person who completed the transaction.

Educators Credit Union has suffered a loss of $863.43.

Vesta Johnson is not wanted. She has suspended DL status and no CIBR.

The original check was inventoried under #45329. The packet of

On Friday, 04-09-2010 at 6:42pm, Vesta Denise Johnson came to Glendale PD regarding this incident. I escorted her to an interview room. I read the Miranda right to her from a DOJ issued card. She stated she understood the rights and agreed to speak with me.

Johnson admitted that she was the person shown in the Educators Credit Union video photos, which showed the cashing of the Great Wealth LLC check. Johnson claimed she could not recall exactly how she obtained the check, but believed she received it in the mail. Johnson admitted that she has never worked for a company called Great Wealth LLC, Pondersosa or Ponderosa. She stated that she didn't notice that Ponderosa was spelled incorrectly on the check. She admitted that none of the companies would have had a reason to owe her money or write her a check. She stated that she simply received it in the mail and thought she would try cashing it. Johnson claimed that she did not receive the demand letter from Educators Credit Union and claimed not to know the check came back to the bank as Account Closed. Johnson claimed to have no memory of trying to cash the Green Bay Beef check at two locations.

Johnson was booked for Forgery. I issued municipal citation #N1045335 for Forgery/Uttering to Johnson. I provided her with Angela Langdon's mailing information and advised Johnson that it might benefit her during court proceedings if she repaid the loss prior to the court date. Johnson was then released into the lobby.

Stilling, of and for Stilling & Harrison, PLLC, answer and provide notice of their defense to the Notice of Intended Action and Accusation ("Notice") in the above-entitled matter and declare as follows.

## REQUEST FOR HEARING

Respondents request a hearing on the Notice.

## RESPONSES TO ALLEGATIONS AND CAUSES OF ACTION

In answer to the Notice, Respondents admit, deny, and allege as follows:

## JURISDICTION

1. Respondents admit the allegations in paragraph 1.

2. Respondents admit the allegations in paragraph 2.

## FACTUAL ALLEGATIONS

3. Respondents admit the allegations in paragraph 3.

4. Respondents lack sufficient knowledge to admit or deny the allegations in paragraph 4 and therefore deny the same.

5. Respondents admit the allegations in paragraph 5.

6. Respondents admit the allegations in paragraph 6.

7. Respondents admit the allegations in paragraph 7.

8. Respondents admit the allegations in paragraph 8.

9. Respondents admit the allegations in paragraph 9.

10. Respondents admit the allegations in paragraph 10.

11. Respondents admit that on or about December 24, 2017, prescription no. 1874629, post-dated 11/07/2017, was processed, filled and dispensed and that data entry review was performed by Cruz. However, there was nothing on the prescription 1874629 to indicate that it had been previously filled. Respondents deny all remaining allegations in paragraph 11.

12. Respondents admit that: (i) on or about January 29, 2018, prescription no. 1886042, post-dated 12/07/2017, was processed, filled and dispensed; (ii) data entry review and final verification were performed by Nguyen who did not place a fill sticker on the back of the original hard copy of the prescription. Respondents deny all remaining allegations in paragraph 12.

13. Respondents admit that: (i) on or about February 28, 2018, prescription no. 1896898, post-dated 12/07/2017, was processed, filled and dispensed and (ii) data entry review was performed by Cruz. However, there would have been nothing on the prescription 1896898 to indicate that it had been previously filled. Respondents deny all remaining allegations in paragraph

**COUNT ONE**
**Recordkeeping Violations**
(Respondents Nguyen and Efstathiou)

14. Paragraph 14 is a statement of law and is not susceptible to admission or denial. To the extent that paragraph 14 implies any unprofessional or unlawful conduct, Respondents deny the same.

15. Respondents deny the allegations in paragraph 15.

**COUNT TWO**
**Failure to Identify Duplicate Dispensed Medication/Unprofessional Conduct**
(Respondents Nguyen and Cruz)

16. Paragraph 16 is a statement of law and is not susceptible to admission or denial. To the extent that paragraph 16 implies any unprofessional or unlawful conduct, Respondents deny the same.

17. Respondents deny the allegations in paragraph 17.

18. Respondents deny the allegations in paragraph 18.

**COUNT THREE**
**Managing Pharmacist Responsibility**
(Respondent Nguyen)

19. Respondents deny the allegations in paragraph 19.

**COUNT FOUR**
**Pharmacy/Pharmacy Owner Responsibility**
(Respondent Walgreens Pharmacy #4854)

20. Paragraph 20 is a statement of law and is not susceptible to admission or denial. To the extent that paragraph 20 implies any unprofessional or unlawful conduct, Respondents deny the same.

21. Respondents deny the allegations in paragraph 21.

**RESERVATION OF RIGHTS, DEFENSES, AND GENERAL DENIAL**

22. Each Count fails to state a claim upon which relief can be granted.

23. To the extent Respondents did not specifically admit allegations in the Notice, they deny such allegations.

24. Sanctioning Respondent Maria Cruz would be unfair and unjust in light of her circumstances. Maria Cruz retired March 2021. She now lives in the Philippines. She no longer has a pharmacy license and never intends to practice pharmacy again. Her decision to retire had nothing to do with this case. Ms. Cruz has never been sanctioned for any act or omission during her eleven years of practice in Nevada or anywhere else. Maria Cruz recognizes that the Board needs to be consistent in its decisions. But some cases are different and require wise use of discretion as fairness requires. This is such a case. If the Board agrees to dismiss the claims against Maria Cruz, it would not set a precedent that a pharmacist can escape sanctions by retiring. Rather, a decision to dismiss the claims against her or to forego any sanctions would simply recognize that it is fair not to impose sanctions on a pharmacist who retires some three years after an alleged violation and before any Notice of Intended Action is filed, who moves back to her native country, and who has never before been sanctioned by a board of pharmacy. Ms. Cruz did not act unprofessionally or unlawfully because she had no reason to believe there was a duplicate of the prescription she was filling as described in paragraphs 11 and 13. Even if this Board finds that Maria Cruz engaged in

unprofessional conduct, it should not impose sanctions. Just because a government body has the power to do something does not necessarily mean that it should do so—especially when fairness dictates otherwise.

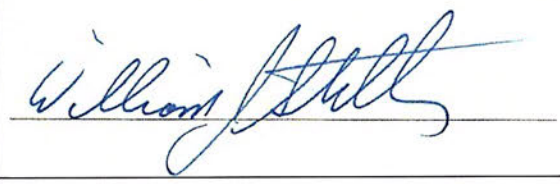
## PRAYER FOR RELIEF

25. Respondents pray for the following relief:

a. That the Notice be dismissed or that the Board finds that the allegations in the Notice and all evidence presented to the Board do not support imposing discipline on any of the Respondents.

b. That the Board dismiss all Causes of Acton in in the Notice.

c. That the Board provide further relief to Respondents as it finds just and proper.



DATED this 31st day of May 2023.

## FACTUAL ALLEGATIONS

2. From March 2022 to March 2023, Respondent issued 119 controlled substance prescriptions for 6 family members with whom Respondent had not established a bona fide therapeutic relationship, for whom Respondent had neither diagnosed nor determined that a controlled substance was medically necessary, and without reviewing each patient's utilization report in the Prescription Monitoring Program (PMP) database.

6. Conspiring to violate the Controlled Substances Act is a felony offense. 21 U.S.C. § 846; NRS 453.401(l)(a).

7. A practitioner must hold a license to practice his or her profession in this State and be registered with both the DEA and the Board to possess, administer, prescribe and/or otherwise dispense any controlled substance. NRS 453.226(1); 21 U.S.C. § 822(a)(2); 21 U.S.C. § 823(f); 21 CFR § 1306.03.

8. The surrender, revocation or a suspension that has not been stayed of any registration of a practitioner by the DEA operates as an immediate suspension of a registration issued by the Board pursuant to NRS 453.226. NRS 639.2107.

9. Performing or in any way being a party to any fraudulent or deceitful practice or transaction constitutes unprofessional conduct or conduct contrary to the public interest pursuant to NAC 639.945(1)(h) and is grounds for suspension or revocation of any license or registration issued by the Board. 13. Violating, attempting to violate, assisting or abetting in the violation of or conspiring to violate any law or regulation relating to drugs is grounds for suspension or revocation of any license or registration issued by the Board. NRS 639.210(12).

14. The Board may suspend or revoke a registration issued pursuant to NRS 453.231 to prescribe or otherwise dispense a controlled substance upon a finding that the registrant has committed an act that would render registration inconsistent with the public interest, or upon a finding that the registrant no longer possesses his or her federal registration to dispense controlled substances and is no longer authorized by federal law to dispense those substances. NRS 453.236(1)(d) and NRS 453.241(1).

J. David Wuest, in his official capacity as Executive Secretary of the Nevada State Board of Pharmacy, makes the following that will serve as both a notice of intended action under NRS 233B.127(3) and as an accusation under NRS 622A.300(1) and NRS 639.241.

## JURISDICTION

1. The Nevada State Board of Pharmacy (Board) has jurisdiction over this matter because at the time of the events alleged herein, Respondent Juan Peidra Flores, RPh (Flores), Certificate of Registration No. 20887, was a pharmacist registered with the Board, and Respondent Walgreens Pharmacy #6425, Pharmacy License No. PH01594, was a pharmacy licensed by the Board.

## FACTUAL ALLEGATIONS

2. Flores was employed as managing pharmacist by Walgreens Pharmacy #6425 at the time of the events alleged herein.

J. David Wuest, in his official capacity as Executive Secretary of the Nevada State Board of Pharmacy, files the following document that will serve as both a notice of intended action under NRS 233B.127(3) and an accusation under NRS 622A.300(1) and NRS 639.241.

## JURISDICTION

1. The Nevada State Board of Pharmacy (Board) has personal jurisdiction over Respondent Sandra Le, RPH ("Respondent Le"), because Respondent Le holds a certificate of registration issued by the Board pursuant to NRS 639.127, authorizing her to engage in the practice of pharmacy within the state of Nevada.

2. The Board has personal jurisdiction over Respondent Khanh V. Pham, RPH ("Respondent Pham"), because Respondent Pham holds a certificate of registration issued by the Board pursuant to NRS 639.127, authorizing him to engage in the practice of pharmacy within the state of Nevada.

3. The Board has personal jurisdiction over Respondent CVS Pharmacy #8804 ("Respondent CVS Pharmacy") because Respondent CVS Pharmacy holds a license issued by the

Board pursuant to NRS 639.230, authorizing Respondent CVS Pharmacy to operate a pharmacy located 1408 West Craig Road in North Las Vegas, Nevada.

4. The Board has jurisdiction over the subject matter of this accusation because, at the time of the violations alleged herein, Respondent Le and Respondent Pham were Nevada registered pharmacists engaged in the practice of pharmacy at a business location operated by Respondent CVS Pharmacy in North Las Vegas, Nevada.

## FACTUAL ALLEGATIONS

5. On or about July 17, 2019, Respondent Le was a registered pharmacist on duty at the CVS Pharmacy #8804 in North Las Vegas, Nevada. While on duty, Respondent Le processed a prescription for patient TC. The prescription was for Endometrin, a medication containing progesterone. Patient TC's physician had written the prescription with instructions to fill a quantity of forty-two suppositories to be inserted vaginally by patient TC three times per day in connection with *in vitro* fertilization ("IVF"). Endometrin is used to increase the level of progesterone in patients undergoing fertility treatments.

6. On or about July 17, 2019, Respondent Le processed another prescription for patient TC in connection with her IVF. Patient TC's physician had written that prescription for a quantity of four 250mg tablets of Zithromax, an antibiotic. The Zithromax prescription was written with instructions for patient TC to take two tablets with dinner on the evening before the IVF procedure and two tablets with breakfast on the morning of the IVF procedure.

7. Pharmaceutical Technician Haydee Martinez (PT Martinez), the holder of license no. PT16676, performed the data entry for the prescription identified in paragraph 5 above. Pharmaceutical Technician Vanessa Cardozo (PT Cardozo), the holder of license no. PT07016, performed the data entry for the prescription identified in paragraph 6 above. Respondent Le performed the verifications for both prescriptions.

8. Regarding the prescription described in paragraph 5 above, PT Martinez mistakenly identified the medication as misoprostol, believing that misoprostol was the generic name for

Endometrin. PT Martinez entered instructions for patient TC to insert one misoprostol tablet vaginally three times per day as directed by her physician. When inserted vaginally, misoprostol is used to terminate a pregnancy, not to assist with fertility treatments.

9. Regarding the prescription described in paragraph 6 above, PT Cardozo correctly identified the medication and the prescribed dose, but she mistakenly entered the prescribed quantity as six 250 mg tablets. PT Cardozo also entered incorrect dosage instructions, advising patient TC to "take two tablets by mouth today, then take 1 tablet daily for 4 days." This conflicted with the physician's instructions to take two tablets with dinner on the evening before the IVF procedure and two tablets with breakfast on the morning of the IVF procedure.

10. Respondent Le verified each of the prescriptions identified in paragraphs 5 and 6 above. Respondent Le did not discover the data entry mistakes by PT Martinez or PT Cardozo. Notably, Respondent Le overrode a DUR system warning pertaining to the data entry error relating to misoprostol. The warning indicated that the stated dose was incorrect and that the medication was contraindicated for persons of child-bearing age. Despite the warning, Respondent verified the prescription as entered.

11. On or about July 20, 2019, Respondent Pham was the registered pharmacist on duty at CVS Pharmacy #8804, when patient TC arrived to pick up her prescription medications prior to her IVF procedure. Respondent Pham neglected to counsel patient TC before she left the pharmacy with an incorrect prescription for misoprostol. Had Respondent Pham properly counseled patient TC, the counseling would have alerted patient TC that she had been given the wrong medication.

12. On or about July 23, 2019, patient TC's physician performed the scheduled IVF procedure, transferring two embryos into patient TC's uterus. Thereafter, in accordance with the instructions that Respondent Le had incorrectly prepared for her, patient TC vaginally inserted the misoprostol that Respondent Le had incorrectly supplied to her. This caused patient TC to suffer from stomach cramps, which in turn prompted patient TC to search for relevant information on the internet.

When she discovered that misoprostol is used to terminate pregnancies, she filed a complaint with the Board.

13. Following receipt of patient TC's complaint, Investigator Dena McClish conducted an investigation. Respondent Le and Respondent CVS Pharmacy fully cooperated with the investigation, providing business records that confirm the allegations stated above. Respondent Pham had left the employ of CVS Pharmacy by the time of the investigation. It is unknown whether patient TC lost her embryos due to the errors and/or omissions described above.

## APPLICABLE LAW

14. The Board may revoke or suspend the registration of any pharmacist who has been guilty of unprofessional conduct or conduct contrary to the public interest. *See* NRS 639.210(4). Likewise, the Board may revoke or suspend the registration of any pharmacist who has violated any provision of Nevada law relating to prescription drugs. *See* NRS 639.210(12). In lieu of revoking or suspending such a pharmacist's registration, the Board may impose fines as a disciplinary measure. *See* NRS 639.255; NAC 639.955.

15. A pharmacist's conduct is deemed unprofessional if the pharmacist fails to strictly follow the instructions of the person writing, making, or ordering a prescription as to its filling or refilling. *See* NAC 639.945(1)(i). Additionally, a pharmacist's conduct is deemed unprofessional if the pharmacist performs his or her duties in an incompetent, unskillful or negligent manner. *See* NAC 639.945(1)(i). Finally, a pharmacist's conduct is deemed unprofessional if the pharmacist fails to confer with the person writing, making or ordering a prescription if there is an error or omission in it which should be questioned. *See* NAC 639.945(1)(e).

16. Unless otherwise provided by law, a pharmacist must verbally provide a patient or a person caring for the patient with information about each prescription drug or device dispensed to the patient. Failure to provide appropriate counseling to the patient constitutes a violation of NRS 639.707(1). Pursuant to NRS 639.210(12), the Board may discipline a pharmacist who violates NRS 639.707(1).

17. Each pharmacy in Nevada must be managed by a registered pharmacist, approved by the Board, who is responsible for compliance by the pharmacy and its personnel with all state and federal laws and regulations relating to the operation of the pharmacy and the practice of pharmacy. *See* NRS 639.220(1). Pursuant to NRS 639.230(5), NAC 639.702 and NAC 639.945(2), pharmacies, pharmacy mangers, and/or pharmacists are responsible for the acts and omissions of the pharmacy employees under their supervision.

**COUNT ONE**

**Unprofessional Conduct by a Pharmacist (Respondent Le)**

18. On or about July 17, 2019, Respondent Le engaged in unprofessional conduct as described above. Respondent's Le's conduct was unprofessional because: she failed to strictly follow the instructions of patient TC's physician as to the filling of patient TC's prescriptions for Endometrin and Zithromax; she failed to properly verify the data that the pharmacy technician had entered in the pharmacy management system regarding patient TC's prescriptions for Endometrin and Zithromax; and/or she failed to confer with patient TC's physician concerning errors that should have been readily apparent to her after seeing the system warning as described in paragraph 10 above. Any of these mistakes amounts to unprofessional conduct for which the Board may impose discipline pursuant to NRS 639.210(4), NRS 639.255(1), NAC 639.945, and NAC 639.955.

**COUNT TWO**

**Supervisory Liability (Respondent Le)**

19. On or about July 17, 2019, Respondent Le failed to adequately supervise PT Martinez and PT Cardozo, the pharmaceutical technicians who made the data entry mistakes as described above. These technicians were under Respondent Le's supervision at the time. Pursuant to NAC 639.702, the data entry errors and/or omissions may be attributed to Respondent Le. Accordingly, the Board may discipline Respondent Le pursuant to NRS 639.210(4), NRS 639.255(1), NRS 639.945(1), and NAC 639.955.

**COUNT THREE**

**Violation of NRS 639.707(1) (Respondent Pham)**

20. On or about July 20, 2019, Respondent Pham was the pharmacist on duty responsible for counseling patient TC when she arrived at CVS Pharmacy to pick up her prescriptions. By neglecting to counsel patient TC before she left the pharmacy with an incorrect prescription for misoprostol, Respondent Pham violated the provisions NRS 639.707(1). Had Respondent Pham properly counseled patient TC, the counseling would have alerted patient TC that she had been given the wrong medication. Accordingly, the Board may discipline Respondent Pham pursuant to NRS 639.210(12), NRS 639.255(1), and NAC 639.955.

**COUNT FOUR**

**Vicarious Liability (Respondent CVS Pharmacy)**

21. Between July 17 and 20, 2019, Respondent CVS Pharmacy employed Respondent Le and Respondent Pham as staff pharmacists. Pursuant to NRS 639.230(5), NAC 639.702, and NAC 639.945(2), Respondent CVS Pharmacy is liable for their unprofessional conduct and/or statutory violations as described above. Accordingly, the Board may discipline CVS Pharmacy pursuant to NRS 639.210, NRS 639.255, and NAC 639.955.

WHEREFORE it is requested that the Nevada State Board of Pharmacy take appropriate disciplinary action with respect to the certificate of registrations of Respondent Le and Respondent Pham, and the pharmacy license of Respondent CVS Pharmacy.

DATED this 21st day of APRIL 2023.

Nevada State Board of Pharmacy

**NOTICE OF INTENDED ACTION AND ACCUSATION**

J. David Wuest, in his official capacity as Executive Secretary of the Nevada State Board of Pharmacy, files the following document that will serve as both a notice of intended action under NRS 233B.127(3) and an accusation under NRS 622A.300(1) and NRS 639.241.

## JURISDICTION

1. The Nevada State Board of Pharmacy (Board) has personal jurisdiction over Respondent Craig Pivo ("Respondent Pivo") because Respondent Pivo holds a certificate of registration issued by the Board pursuant to NRS 639.127, authorizing him to engage in the practice of pharmacy within the state of Nevada.

2. The Board has personal jurisdiction over Respondent Genoa Healthcare LLC ("Respondent Genoa") because Respondent Genoa holds a license issued by the Board pursuant to NRS 639.230, authorizing Respondent Genoa to operate a pharmacy at 2500 W. Washinton Avenue in Las Vegas Nevada. The Board had formerly licensed Respondent Genoa to operate a pharmacy at 1901 S. Jones Boulevard in Las Vegas, Nevada.

3. The Board has jurisdiction over the subject matter of this accusation because, at the time of the violations alleged herein, Respondent Pivo was a Nevada registered pharmacist engaged in the

practice of pharmacy at Respondent Genoa's pharmacy at 1901 S. Jones Boulevard in Las Vegas, Nevada.

## FACTUAL ALLEGATIONS

4. At the time of each of the violations alleged herein, Respondent Pivo was a registered pharmacist employed by Respondent Genoa at its pharmacy on 1901 S. Jones Boulevard in Las Vegas, Nevada.

5. On March 4, 2020, while employed by Respondent Genoa, Respondent Pivo was tasked with filling a prescription for adult patient IS. The prescription had been written by the patient's healthcare provider for alprazolam, a medication used to treat anxiety.

6. Upon receiving the prescription for alprazolam, a pharmacy technician incorrectly transferred the information from the hand-written prescription to Respondent Genoa's prescription management system. The pharmacy technician who performed the data entry mistakenly attributed the prescription to patient TS, a 12-year-old boy with a history of receiving prescriptions at Respondent Genoa's pharmacy. Patient TS had a history of receiving prescriptions for various medications related to attention-deficit/hyperactivity disorder (ADHD). Those medications did not include alprazolam.

7. Adult patient IS and minor patient TS share the same last name but are not related. Respondent Pivo performed the verification of patient IS's prescription for alprazolam. Respondent Pivo failed to recognize that the pharmacy technician had incorrectly attributed the prescription to patient TS. Respondent Pivo thereafter caused a supply of 60 alprazolam tablets (1mg) to be delivered to patient TS at his home in Pahrump, Nevada. The supply arrived at patient TS's home on or about March 5, 2020. The supply of alprazolam arrived in a pill bottle with a label instructing patient TS to take the tablets twice daily.

8. Patient TS's caregivers failed to notice that alprazolam was not among the medications that TS was taking for his ADHD. TS's caregivers had recently discussed changing his medications and assumed that Respondent Genoa had delivered the correct medication. They gave TS one tablet that evening, and another tablet the following morning. TS then went to school, where his teachers

noticed that he was staggering and otherwise exhibiting symptoms of a drug overdose. TS returned home and slept for the remainder of the day.

9. On or about March 4, 2020, Respondent Pivo filled patient IS's prescription for alprazolam a second time, this time correctly attributing it to patient IS. Respondent filled the prescription under prescription number 11226, the same prescription number that was previously and incorrectly attributed to patient TS. Respondent Pivo did not contact patient TS or his caregivers to explain the mistake. Respondent voided the previous transaction so that it appeared that prescription number 11226 had only been filled once.

10. On March 26, 2020, Patient IS's health care provider contacted the Board with a complaint about the facts as alleged above. Following receipt of the complaint, Investigator Dena McClish attempted to ascertain why Respondent Genoa's drug utilization review (DUR) system had not flagged the mistakes related to prescription number 11226, and/or why the company's representatives did not disclose or self-report the mistakes after it became apparent that Respondent Pivo had twice filled prescription number 11226.

11. During her investigation, Investigator McClish interviewed Respondent Pivo, among others. In response to questions about his failure to notify TS's caregivers that he had mistakenly delivered alprazolam to TS at his home in Pahrump, Nevada, Respondent Pivo told Investigator McClish that filled prescriptions are accompanied by a toll-free telephone number that patients may call with questions.

12. When Investigator McClish inquired about Respondent Genoa's DUR system, Respondent Genoa's corporate representatives could not explain why its DUR systems had not flagged the mistakes related to prescription number 11226. A corporate representative provided Investigator McClish with written protocols and procedures that were not followed. Respondent Genoa had no record of whether Respondent Pivo offered counseling to patient TS or his caregivers.

13. In 2008, in connection with his application to renew his Nevada certificate of registration, Respondent Pivo was disciplined by the Board for having failed to disclose that he

voluntarily surrendered pharmacist licenses in California and Utah. In the 2008 case, the Board ordered Respondent to enroll in a substance abuse treatment program, among other things, as a condition of retaining his Nevada registration.

## APPLICABLE LAW

14. The Board may revoke or suspend the registration of any pharmacist who has been guilty of unprofessional conduct or conduct contrary to the public interest. *See* NRS 639.210(4). Likewise, the Board may revoke or suspend the registration of any pharmacist who has violated any provision of Nevada law relating to prescription drugs. *See* NRS 639.210(12). In lieu of revoking or suspending such a pharmacist's registration, the Board may impose fines as a disciplinary measure. *See* NRS 639.255; NAC 639.955.

15. A pharmacist's conduct is deemed unprofessional if the pharmacist fails to strictly follow the instructions of the person writing, making, or ordering a prescription as to its filling or refilling. *See* NAC 639.945(1)(i). Additionally, a pharmacist's conduct is deemed unprofessional if the pharmacist performs his or her duties in an incompetent, unskillful or negligent manner. *See* NAC 639.945(1)(i). Finally, a pharmacist's conduct is deemed unprofessional if the pharmacist fails to confer with the person writing, making, or ordering a prescription if there is an error or omission in it which should be questioned. *See* NAC 639.945(1)(e).

16. Unless otherwise provided by law, a pharmacist must verbally provide a patient or a person caring for the patient with information about each prescription drug or device dispensed to the patient. Failure to provide appropriate counseling to the patient constitutes a violation of NAC 639.707(1). Pursuant to NRS 639.210(12), the Board may discipline a pharmacist who violates NAC 639.707(1)

17. Pursuant to NRS 639.230(5), NAC 639.702 and NAC 639.945(2), pharmacies, pharmacy managers, and/or pharmacists are responsible for the acts and omissions of the pharmacy employees under their supervision.

## COUNT ONE
### Unprofessional Conduct by a Pharmacist

18. In March of 2020, as alleged above, Respondent Pivo engaged in unprofessional conduct because he failed to strictly follow the instructions of patient IS's health care provider as to the filling of patient IS's prescription for alprazolam.

19. In March of 2020, Respondent Pivo performed his duties as a pharmacist in an incompetent, unskillful or negligent manner by causing an adult dose of alprazolam to be delivered to and ingested by minor patient TS, thus causing harm to patient TS.

20. Respondent Pivo performed his duties as a pharmacist in an incompetent, unskillful or negligent manner by delaying patient IS's receipt of his prescription medication.

21. Respondent Pivo engaged in unprofessional conduct when he failed to notify and/or confer with TS's health care provider and/or caregivers upon discovering that alprazolam was incorrectly delivered to TS at his home in Pahrump, Nevada.

22. Any one or all of the errors and/or omissions described above amounts to unprofessional conduct for which the Board may discipline Respondent Pivo pursuant to NRS 639.210(4), NRS 639.255(1), NAC 639.945, and NAC 639.955.

23. Respondent Genoa is also subject to discipline because Respondent Genoa is responsible for Respondent Pivo's unprofessional conduct as described above. NRS 639.230(5), NAC 639.702 and NAC 639.945(2).

## COUNT TWO
### Supervisory Liability

24. On or about March 4, 2020, Respondent Pivo failed to adequately supervise the pharmacy technician who made the data entry mistakes described above. The pharmacy technician was under Respondent Pivo's supervision at the time. Pursuant to NAC 639.702, the pharmacy technician's errors and/or omissions may be attributed to Respondent Pivo. Accordingly, the Board may discipline Respondent Pivo pursuant to NRS 639.210(4), NRS 639.255(1), NRS 639.945(1), and NAC 639.955.

25. Respondent Genoa is also subject to discipline because Respondent Genoa is responsible for the unprofessional conduct of Respondent Pivo and/or the pharmacy technician under his supervision. NRS 639.230(5), NAC 639.702 and NAC 639.945(2).

**COUNT THREE**
**Violation of NAC 639.707(1)**

26. On or about March 5, 2020, Respondent Pivo was the pharmacist on duty responsible for counseling patient TS's caregivers regarding the alprazolam that he had caused to be delivered to TS at his home in Pahrump, Nevada. By neglecting to telephone or otherwise contact TS's caregivers before TS ingested alprazolam, Respondent Pivo violated the provisions NAC 639.707(1). Accordingly, the Board may discipline Respondent Pivo pursuant to NRS 639.210(12), NRS 639.255(1), and NAC 639.955.

27. Respondent Genoa is also subject to discipline because Respondent Genoa is responsible for Respondent Pivo's unlawful conduct as described above. NRS 639.230(5), NAC 639.702 and NAC 639.945(2).

WHEREFORE it is requested that the Nevada State Board of Pharmacy take appropriate disciplinary action with respect to the certificate of registration of Respondent Pivo and the pharmacy license of Respondent Genoa.

DATED this 3rd day of JULY 2023.

Nevada State Board of Pharmacy

J. David Wuest, in his official capacity as Executive Secretary of the Nevada State Board of Pharmacy, by and through its Senior General Counsel, Gregory L. Zunino, and Respondent Craig Pivo ("Respondent"), Certificate of Registration No. 09999, hereby stipulate and agree as follows:

1. The Nevada State Board of Pharmacy ("Board") has jurisdiction over Respondent and this matter.

2. The Board's staff properly served Respondent with the Notice of Intended Action and Accusation ("Accusation") on file in this matter, together with the Statement to Respondent and Notice of Hearing.

3. Respondent acknowledges that he understands the terms of this Stipulation and Proposed Order ("Stipulation"), and that he has executed it knowingly and voluntarily.

4. Respondent is aware of his right to a hearing on the matters alleged in the Accusation, his right to reconsideration of a Board determination in a contested case, his right to appeal a Board determination in a contested case, and all other rights afforded him under NRS Chapter 233B, the Nevada Administrative Procedure Act, NRS Chapter 622A, which governs administrative procedure before the Board, NRS Chapter 639, the Nevada Pharmacy Act, and NRS Chapter 453, the Nevada Uniform Controlled Substances Act.

5. Conditioned on the acceptance of this Stipulation by the Board, and excluding the right to challenge any determination that Respondent has failed to comply with the provisions of the paragraphs below, Respondent hereby freely and voluntarily waives his rights to a hearing, reconsideration, appeal, and other rights related to this action as identified above.

6. Respondent admits that evidence exists, and that Board staff prosecuting this case could present such evidence at an administrative hearing, to establish a factual basis for the violation alleged in Count One of the Accusation, *to wit*:

A. On March 4, 2020, while employed as a pharmacist in Las Vegas, Nevada, Respondent filled a prescription for adult patient IS. The prescription had been written by the patient's healthcare provider for alprazolam, a medication used to treat anxiety.

B. Upon receiving the prescription for alprazolam, a pharmacy technician incorrectly transferred the information from the hand-written prescription to the pharmacy's prescription management system. The pharmacy technician who performed the data entry mistakenly attributed the prescription to patient TS, a 12-year-old boy with a history of receiving prescriptions at the pharmacy. Patient TS was then awaiting a prescription for a different drug.

C. Respondent verified the above prescription and failed to recognize that the pharmacy technician had incorrectly attributed the prescription for alprazolam to patient TS. Respondent thereafter caused a supply of 60 alprazolam tablets (1mg) to be delivered to patient TS at his home. Patient TS subsequently ingested two of the tablets and experienced drowsiness and loss of balance while at school.

D. As alleged above, Respondent engaged in unprofessional conduct by failing to strictly follow the instructions of patient IS's physician, by negligently causing an incorrect prescription drug to be delivered to patient TS, and/or by failing to notify patient TS after Respondent was reasonably placed on notice of his mistake concerning the prescription.

E. Based upon the above facts, Respondent is subject to discipline by the Board pursuant to NRS 639.210(4), NRS 639.255(1), NAC 639.945, and NAC 639.955.

7. Respondent has retired from the practice of pharmacy and currently resides in Hawaii. Respondent has notified the Board that he has retired from the practice of pharmacy and has no plans to resume the practice of pharmacy. Respondent's certificate of registration is currently designated as being in a "retired" status. Respondent has been advised that he cannot practice pharmacy in Nevada unless he renews or reinstates his license.

8. In consideration of Respondent's cooperation in this matter, the amount of time that has passed since the offense, and Respondent's retirement, the violations stated in Count Two and Count Three of the Accusation shall be dismissed upon the approval of this Stipulation by the Board.

9. To resolve this matter without incurring any further costs or the expenses associated with a hearing, the Board and Respondent agree to the imposition of the following penalties:

A. Respondent shall pay an administrative fine of One Thousand and 00/100 Dollars ($1000.00) for the violation alleged in Count One of the Accusation. Further, Respondent shall pay the sum of Five Hundred and 00/100 Dollars ($500.00) to partially reimburse the Board for recoverable attorney's fees and costs incurred in investigating and prosecuting this matter.

10. Any failure by Respondent to comply with the terms stated herein may result in issuance by the Executive Secretary of an order to show cause, pursuant to NAC 639.965, directing Respondent to appear before the Board at the next regularly scheduled meeting for a show cause hearing. If such a hearing results in a finding of a violation by Respondent, the Board may impose additional discipline upon Respondent not inconsistent with the provisions of NRS Chapter 639.

11. The Board's Senior General Counsel will present this Stipulation to the Board for approval pursuant to NRS 622.330 at the Board's regularly scheduled public meeting on September 6, 2023, in Las Vegas, Nevada. The Board Members and Staff may discuss and deliberate regarding this Stipulation, even if Respondent or her attorney fails to appear for the meeting.

12. The Board may accept this Stipulation, but it is not obligated to do so. If this Stipulation is approved by the Board, it shall be a public record pursuant to NRS 622.330 and shall be reported to the National Practitioner Data Bank pursuant to 42 U.S.C. § 1396r–2 and 45 CFR Part 60.

13. If the Board rejects any part or all this Stipulation, and unless the parties reach an alternative agreement on the record during the hearing, the parties agree that the Board may hear a full contested hearing on the merits of all alleged violations as stated in the Accusation. The terms and admissions herein may not be used, relied upon, or referred to by any party during any such hearing.

14. Upon approval of this Stipulation by the Board, Respondent shall pay the fine agreed to herein by *personal, cashiers,* or *certified check* or *money order* made payable to **"State of Nevada, Office of the Treasurer."** Respondent shall remit payment in full to the Board's Reno office, located at 985 Damonte Ranch Parkway, Suite 206, Reno, Nevada 89521, within thirty (30) days after the effective date of the Board's Order as stated below.

15. Upon approval of this Stipulation by the Board, Respondent shall pay the attorney's fees and costs agreed to herein by *personal, cashiers,* or *certified check* or *money order* made payable to **"Nevada State Board of Pharmacy."** Respondent shall remit payment in full to the Board's Reno office, located at 985 Damonte Ranch Parkway, Suite 206, Reno, Nevada 89521, within thirty (30) days of the effective date of the Board's Order as stated below.

16. Subject to the approval of this Stipulation by the Board, the Board and Respondent agree to release each other from any or all additional claims arising from the facts set forth in the Accusation on file herein.

J. David Wuest, in his official capacity as Executive Secretary of the Nevada State Board of Pharmacy, files the following document that will serve as both a notice of intended action under NRS 233B.127(3) and an accusation under NRS 622A.300(1) and NRS 639.241.

## JURISDICTION

1. The Nevada State Board of Pharmacy (Board) has personal jurisdiction over Respondent Smith's Pharmacy #390 (Smith's Pharmacy) because Smith's Pharmacy is licensed by the Board to dispense dangerous drugs and controlled substances in Nevada. Smith's Pharmacy holds pharmacy license number PH01126.

2. The Board has personal jurisdiction over Respondent Chance Warr (Warr) because Warr is registered by the Board to engage in the practice of pharmacy in Nevada. Warr holds certificate of registration number 21098.

3. The Board has jurisdiction over the subject matter of this accusation because, as alleged below, Smith's Pharmacy and Warr engaged in conduct that implicates their fitness to dispense dangerous drugs and/or controlled substances in Nevada.

## FACTUAL ALLEGATIONS

4. At all times relevant to this accusation, Smith's Pharmacy operated a pharmacy located at 1855 West Wendover Boulevard in West Wendover, Nevada. Between May 13, 2020, and

September 2, 2021, Smith's Pharmacy employed Alan Minson, certificate of registration number 18352, as its managing pharmacist. After September 2, 2021, Smith's Pharmacy employed Warr as its managing pharmacist. At no time did Smith's Pharmacy notify the Board that Warr had replaced Alan Minson as its managing pharmacist.

5. When Warr assumed his position as managing pharmacist for Smith's Pharmacy, he held a temporary certificate of registration issued by the Board pursuant to NAC 639.200. Warr's temporary certificate of registration expired on March 2, 2022. Warr did not obtain his permanent certificate of registration until April 11, 2022. Smith's Pharmacy continued to employ Warr as its managing pharmacist after March 2, 2022, even though Warr's temporary certificate of registration had expired.

6. Warr had no authority to dispense dangerous drugs and/or controlled substances, or to act as the managing pharmacist of Smith's Pharmacy, after his temporary certificate of registration expired on March 2, 2022, and before he obtained his permanent certificate of registration on April 11, 2022.

7. The expiration date of Warr's temporary certificate of registration appeared on the face of the certificate, thus putting Warr on notice that he was without authority to dispense dangerous drugs and/or controlled substances, or to act as the managing pharmacist of Smith's Pharmacy after March 2, 2022.

8. At no time between March 2, 2022, and April 11, 2022, did Smith's Pharmacy replace Warr with another pharmacist qualified to act as its managing pharmacist. During this time frame, Smith's Pharmacy effectively operated without a managing pharmacist due to the expiration of Warr's temporary certificate of registration.

## APPLICABLE LAW

9. It is unlawful for any person to sell or dispense, or permit to be sold or dispensed, any dangerous drug or controlled substance unless the person holds the appropriate permit or license issued by the Board and complies with the regulations adopted by the Board. NRS 639.100(1).

10. Every person who dispenses dangerous drugs or controlled substances in Nevada must secure and maintain a certificate of registration from the Board based upon demonstrated expertise and training in the practice of pharmacy. NRS 639.120; NRS 639.127; NAC 639.205–.212.

11. "'Dispense' means to deliver a controlled substance or dangerous drug to an ultimate user, patient or subject of research by or pursuant to the lawful order of a practitioner, including the prescribing by a practitioner, administering, packaging, labeling or compounding necessary to prepare the substance for that delivery." NRS 639.0065. "'Deliver' or 'delivery' means the actual, constructive, or attempted transfer of a controlled substance or dangerous drug from one person to another, whether or not there is an agency relationship.

12. Every pharmacy in Nevada must be licensed by the Board to dispense dangerous drugs and/or controlled substances. NRS 639.230; NRS 639.231. Every pharmacy must be managed by a registered pharmacist, approved by the Board, who is responsible for compliance by the pharmacy and its personnel with all state and federal laws and regulations relating to the operation of the pharmacy and the practice of pharmacy. NRS 639.220. Every pharmacy must promptly notify the Board of a change in the managing pharmacist. NRS 639.220(4).

13. It is unlawful for any person who is not a registered pharmacist to manage a pharmacy or dispense dangerous drugs or controlled substances. NRS 639.284; NRS 639.100(1). A "registered pharmacist" is a natural person registered by the Board to engage in the practice of pharmacy only as authorized by Nevada law. NRS 639.015; NRS 639.120; NRS 639.127; NAC 639.205–.212. A "managing pharmacist" is a registered pharmacist who is responsible for the operation of a pharmacy. NRS 639.0087.

14. The Board may revoke or suspend the license of any pharmacy that has violated any Nevada law or regulation relating to the practice of pharmacy. NRS 639.210(12); NRS 639.230(5). Likewise, the Board may revoke or suspend the certificate of registration of any pharmacist who has violated any Nevada law or regulation relating to the practice of pharmacy. The "practice of pharmacy"

includes the performance or supervision of activities associated with dispensing a dangerous drug or controlled substance. NRS 639.0124.

15. The Board may revoke or suspend the license of any pharmacy, and/or the certificate of registration of any pharmacist, upon finding that the pharmacy and/or pharmacist committed unprofessional conduct or conduct contrary to the public interest. NRS 639.210(4).

16. A pharmacist commits unprofessional conduct and/or conduct contrary to the public interest when the pharmacist: (1) performs his duties as the holder of a license issued by the Board in an incompetent, unskillful, or negligent manner, *see* NAC 639.945(1)(i); (2) performs or participates in any fraudulent or deceitful practice or transaction, *see* NAC 639.945(1)(h); (3) aids or abets a person not licensed to practice pharmacy in Nevada, *see* NAC 639.945(1)(j); or (4) performs any act, task or operation for which licensure, certification or registration is required without the required license, certificate or registration, *see* NAC 639.945(1)(k).

17. Pursuant to NRS 639.230(5), NAC 639.702 and NAC 639.945(2), pharmacies, pharmacy managers; and/or pharmacists are responsible for the acts and omissions of the pharmacy employees under their supervision.

18. In addition to or in lieu of revoking or suspending a license or certificate of registration due to unprofessional conduct and/or conduct that violates Nevada law relating to the practice of pharmacy, the Board may impose an administrative fine upon the offending pharmacy and/or pharmacist. NRS 639.255(1) The fine may not exceed $10,000 for each offense. NRS 639.255(3).

**COUNT ONE**

**Dispensing without a Managing Pharmacist (Smith's Pharmacy)**

19. Between March 2, 2022, and April 11, 2022, Smith's Pharmacy, acting through its employees, agents, and/or representatives, dispensed dangerous drugs and/or controlled substances to consumers in Nevada without having employed a managing pharmacist qualified to supervise the operation of its pharmacy and/or the dispensing activities of its employees, agents, and/or representatives.

20. Smith Pharmacy's conduct as alleged above violated Nevada law relating to the practice of pharmacy, including NRS 639.100(1), NRS 639.220 and NRS 639.284. Further, such conduct was unprofessional and/or contrary to the public interest. Accordingly, Smith's Pharmacy is subject to discipline pursuant to NRS 639.210(4), NRS 639.210(12), and NAC 639.945(1)(k).

## COUNT TWO
### Permitting Others to Dispense without a Registration (Smith's Pharmacy)

21. Between March 2, 2022, and April 11, 2022, Smith's Pharmacy permitted Warr to dispense dangerous drugs and/or controlled substances in Nevada while Warr was not registered by the Board to dispense dangerous drugs and/or controlled substances. Such conduct violated Nevada law relating to the practice of pharmacy, including NRS 639.100(1) and NRS 639.284.

22. Pursuant to NRS 639.210(4) and NAC 639.945(1)(j), the conduct alleged above constitutes unprofessional conduct and/or conduct contrary to the public interest. More specifically, Smith's Pharmacy aided or abetted one or more persons not licensed to practice pharmacy in Nevada.

23. Pursuant to NRS 639.210(4) and/or NRS 639.210(12), Smith's Pharmacy may be disciplined for violating Nevada law and/or for engaging in unprofessional conduct as alleged above.

## COUNT THREE
### Dispensing Without a Registration (Warr)

24. Between March 2, 2022, and April 11, 2022, Warr dispensed dangerous drugs and/or controlled substances in Nevada while employed by Smith's Pharmacy. During this time frame, Warr did not hold a certificate of registration issued by the Board authorizing him to dispense dangerous drugs and/or controlled substances in Nevada.

25. Respondent's conduct as alleged above violated Nevada law relating to the practice of pharmacy, including NRS 639.100(1) and NRS 639.294, and it constitutes unprofessional conduct and/or conduct contrary to the public interest pursuant to NAC 639.945(1)(k). Accordingly, Respondent is subject to discipline pursuant to NRS 639.210(4) and NRS 639.210(12).

## COUNT FOUR
### Performing Duties in a Negligent Manner (Smith's Pharmacy)

26. Between March 2, 2022, and April 11, 2022, Smith's Pharmacy permitted Warr to dispense dangerous drugs and/or controlled substances in Nevada while Warr did not hold a certificate of registration issued by the Board authorizing Warr to dispense dangerous drugs and/or controlled substances.

27. Between March 22, 2022, and April 11, 2022, Smith's Pharmacy employed Warr as its managing pharmacist even though Warr did not hold a certificate of registration issued by the Board authorizing Warr to dispense dangerous drugs and/or controlled substances in Nevada.

28. As the operator of a Nevada-licensed pharmacy, Smith's Pharmacy had a duty to ensure that Warr was properly registered with the Board and/or authorized to serve as the managing pharmacist of Smith's Pharmacy. As of September 2, 2021, Smith's Pharmacy knew or should have known that Warr had recently relocated from Idaho and/or that he did not hold a permanent certificate of registration issued by the Board.

29. By failing to monitor Warr's application for a permanent certificate of registration, and/or by permitting Warr to engage in the practice of pharmacy after his temporary certificate of registration had expired, Smith's Pharmacy performed its duties as the holder of a license and/or registration issued by the Board in an incompetent, unskillful or negligent manner. This constitutes unprofessional conduct for which Smith's Pharmacy may be disciplined pursuant to NRS 639.210(4) and NAC 639.945(1)(i).

## COUNT FIVE
### Engaging in Deceitful Practices (Warr)

30. Between March 2, 2022, and April 11, 2022, Warr dispensed dangerous drugs and/or controlled substances in Nevada while employed by Smith's Pharmacy. During this time frame, Warr did not hold a certificate of registration issued by the Board authorizing him to dispense dangerous drugs and/or controlled substances.

31. By dispensing dangerous drugs and/or controlled substances without a valid certificate of registration, Warr impliedly represented to prescribing practitioners and/or patients that he was authorized by the Board to dispense dangerous drugs and/or controlled substances in Nevada. Warr further represented to patients, to his employer, and/or to his co-workers at Smith's Pharmacy that he was authorized by the Board to serve as the managing pharmacist for Smith's Pharmacy. Respondent knew that these representations were untrue.

32. By making the false representations alleged above, Warr engaged in unprofessional conduct for which the Board may impose administrative discipline. *See* NRS 639.210(4); NAC 639.945(1)(h).

WHEREFORE it is requested that the Nevada State Board of Pharmacy take appropriate disciplinary action with respect to the pharmacy license of Smith's Pharmacy #390 and the certificate of registration of Chance Warr.

J. David Wuest, in his official capacity as Executive Secretary of the Nevada State Board of Pharmacy, by and through its Senior General Counsel, Gregory L. Zunino, and Smith's Pharmacy #390 ("Smith's Pharmacy"), by and through its authorized representative, hereby stipulate and agree as follows:

1. The Nevada State Board of Pharmacy ("Board") has jurisdiction over Smith's Pharmacy and this matter.

2. The Board's staff properly served Smith's Pharmacy with the Notice of Intended Action and Accusation ("Accusation") on file in this matter, together with the Statement to Respondent and Notice of Hearing.

3. The undersigned representative of Smith's Pharmacy hereby warrants and represents that she has all necessary corporate power and authority to execute this Stipulation and Proposed Order ("Stipulation").

4. On behalf of Smith's Pharmacy, the undersigned representative acknowledges that she understands the terms of this Stipulation, and that she has executed it knowingly and voluntarily.

5. On behalf of Smith's Pharmacy, the undersigned representative acknowledges that she is aware of the right to a hearing on the matters alleged in the Accusation, the right to reconsideration of a Board determination in a contested case, the right to appeal a Board determination in a contested case, and all other rights afforded the Respondent under NRS Chapter 233B, the Nevada Administrative Procedure Act, NRS Chapter 622A, which governs administrative procedure before the Board, NRS

Chapter 639, the Nevada Pharmacy Act, and NRS Chapter 453, the Nevada Uniform Controlled Substances Act.

6. Conditioned on the acceptance of this Stipulation by the Board, and excluding the right to challenge any determination that Smith's Pharmacy has failed to comply with the provisions of the paragraphs below, the undersigned representative hereby freely and voluntarily waives the right to a hearing, reconsideration, appeal, and other rights related to this action as identified above.

7. On behalf of Smith's Pharmacy, the undersigned representative admits that evidence exists, and that Board staff prosecuting this case could present such evidence at an administrative hearing, to establish a factual basis for the violation alleged in Count One of the Accusation, *to wit*:

A. Between May 13, 2020, and September 2, 2021, Smith's Pharmacy employed Alan Minson, certificate of registration number 18352, as its managing pharmacist. After September 2, 2021, Smith's Pharmacy employed Chance Warr (Warr), certificate of registration 21098, as its managing pharmacist.

B. When Warr assumed his position as managing pharmacist for Smith's Pharmacy, he held a temporary certificate of registration issued by the Board pursuant to NAC 639.200. Warr's temporary certificate of registration expired on March 2, 2022. Warr did not obtain his permanent certificate of registration until April 11, 2022.

C. Between March 2, 2022, and April 11, 2022, Smith's Pharmacy operated a pharmacy in Nevada without a managing pharmacist as required by NRS 639.220.

D. Based upon the above facts, Smith's Pharmacy is subject to discipline by the Board pursuant to NRS 639.210, NRS 639.255, NAC 639.945, and NAC 639.955.

8. Based upon an investigation by Smith's Pharmacy, the parties agree that Chance Warr did not work as a pharmacist in Nevada between March 2, 2022, and April 11, 2022. Accordingly, the charges stated in Count Two through Count Five of the Accusation have been dismissed.

9. To resolve this matter without incurring any further costs or the expenses associated with a hearing, the Board and Smith's Pharmacy agree to the imposition of the following penalties:

A. Smith's Pharmacy shall pay an administrative fine of Two Thousand and 00/100 Dollars ($2000.00) for the violation alleged in Count One of the Accusation.

B. Further, Smith's Pharmacy shall pay the sum of Five Hundred and 00/100 Dollars ($500.00) to partially reimburse the Board for recoverable attorney's fees and costs incurred in investigating and prosecuting this matter.

10. Any failure by Smith's Pharmacy to comply with the terms stated herein may result in issuance by the Executive Secretary of an order to show cause, pursuant to NAC 639.965, directing the undersigned representative to appear before the Board at the next regularly scheduled meeting for a show cause hearing. If such a hearing results in a finding of a violation by Smith's Pharmacy, the Board may impose additional discipline upon Smith's Pharmacy not inconsistent with the provisions of NRS Chapter 639.

11. The Board's Senior General Counsel will present this Stipulation to the Board for approval pursuant to NRS 622.330 at the Board's regularly scheduled public meeting on September 6, 2023, in Las Vegas, Nevada. The Board Members and Staff may discuss and deliberate regarding this Stipulation, even if a representative of Smith's Pharmacy fails to appear for the meeting.

12. The Board may accept this Stipulation, but it is not obligated to do so. If this Stipulation is approved by the Board, it shall be a public record pursuant to NRS 622.330 and shall be reported to the National Practitioner Data Bank pursuant to 42 U.S.C. § 1396r–2 and 45 CFR Part 60.

13. If the Board rejects any part or all this Stipulation, and unless the parties reach an alternative agreement on the record during the hearing, the parties agree that the Board may hear a full contested hearing on the merits of all alleged violations as stated in the Accusation. The terms and admissions herein may not be used, relied upon, or referred to by any party during any such hearing.

14. Upon approval of this Stipulation by the Board, Smith's Pharmacy shall pay the fine agreed to herein by *personal, cashiers,* or *certified check* or *money order* made payable to "**State of Nevada, Office of the Treasurer.**" Smith's Pharmacy shall remit payment in full to the Board's Reno

J. David Wuest, in his official capacity as Executive Secretary of the Nevada State Board of Pharmacy, files the following document that will serve as both a notice of intended action under NRS 233B.127(3) and an accusation under NRS 622A.300(1) and NRS 639.241.

## JURISDICTION

1. The Nevada State Board of Pharmacy (Board) has personal jurisdiction over Respondent Delta Drugs (Respondent), an out-of-state pharmacy, because Respondent is licensed by the Board to dispense dangerous drugs and controlled substances in Nevada. Respondent holds license number PH04105.

2. The Board has jurisdiction over the subject matter of this accusation because at the time of the violations alleged below Respondent was engaged in the "practice of pharmacy" as that term is defined at NRS 639.0124.

## FACTUAL ALLEGATIONS

3. Respondent, a California corporation, operates a pharmacy based in Glendale, California. On or about May 17, 2019, Respondent submitted to the Board its application to conduct business in Nevada as an out-of-state pharmacy. The Board first issued a pharmacy license to Respondent on July 23, 2019.

4. Prior to July 23, 2019, Respondent was licensed to operate a pharmacy in California but not in Nevada. Between October 20, 2018, and July 22, 2019, Respondent sold and delivered dangerous drugs and/or controlled substances to consumers in Nevada. During this time frame, according to

Respondent's own dispensing records, Respondent shipped dangerous drugs and/or controlled substances into Nevada on thirty-one separate occasions.

5. As alleged above, Respondent's activity, and that of its employees, agents, and/or representatives, amounted to "dispensing" as that term is defined at NRS 639.0065.

6. Between October 20, 2018, and July 23, 2019, Respondent employed Michael Groman (Groman) as its pharmacist-in-charge. In its application for a Nevada pharmacy license, Respondent identified Groman as its managing pharmacist. Groman, now deceased, was never registered by the Board to engage in the practice of pharmacy in Nevada.

7. Sometime after July 23, 2019, Respondent employed Jerry Whittemore (Whittemore) as its pharmacist-in-charge. Whittemore cooperated with the Board's investigation of the allegations stated herein. In a written statement dated November 12, 2020, Whittemore confirmed that Respondent had dispensed dangerous drugs and/or controlled substances to patients in Nevada between October 20, 2018, and July 23, 2019.

J. David Wuest, in his official capacity as Executive Secretary of the Nevada State Board of Pharmacy files the following document that will serve as both a notice of intended action under NRS 233B.127(3) and as an accusation under NRS 622A.300(1) and/or NRS 639.241.

## JURISDICTION

1. The Nevada State Board of Pharmacy ("Board") has personal jurisdiction over this matter because, at the time of the events alleged herein, Respondent Carson Tahoe Regional Medical Center ("Carson Tahoe"), held Pharmacy License No. IA00531, issued by the Board, pursuant to NRS 639.230, on June 19, 1995, which authorized Carson Tahoe to operate a pharmacy within the State of Nevada.

2. The Board has personal jurisdiction over this matter because, at the time of the events alleged herein, Respondent, Kelly Schott, RPh. ("Schott"), held Pharmacist Certificate of Registration No. 15719, issued by the Board, pursuant to NRS 639.127, on January 10, 2001, which authorized her to engage in the practice of pharmacy within the State of Nevada.

3. The Board has jurisdiction over the subject matter of this accusation because, at the time of the events alleged herein, Schott was a Nevada registered pharmacist engaged in the practice of pharmacy at Carson Tahoe, an operating Nevada pharmacy.

## PRIOR DISCIPLINE

4. On April 10, 2019, Carson Tahoe entered Stipulation in Case No. 18-041-PH-N to pay a fine of $1,500.00 to the Board to resolve allegations the hospital pharmacy had improperly compounded bupivacaine epidurals resulting in administration by an anesthesiologist of a bupivacaine epidural which erroneously contained a methylparaben preservative, in violation of NAC 639.945(1)(a), (b), (d) and/or (i); NAC 639.6701(1)(a) and (c); NAC 639.6702; NRS 639.230(5); and NAC 639.702.

## FACTUAL ALLEGATIONS

5. Carson Tahoe owns and operates a hospital located at 1600 Medical Parkway in Carson City, Nevada. The hospital is a "medical facility" as that term is defined at NRS 449.0151.

6. To provide its patients with controlled substances and/or dangerous drugs as necessary or appropriate for their treatment at the medical facility, Carson Tahoe holds Pharmacy License No. IA00531 issued by the Board. The license authorizes Carson Tahoe to operate a pharmacy on the premises of its medical facility. The pharmacy is an "institutional pharmacy" as that term is defined at NRS 639.0085.

7. At all times relevant to this accusation, Carson Tahoe employed Schott, Certificate of Registration No. 15719, as the Managing Pharmacist of its institutional pharmacy. As Managing Pharmacist, Schott was responsible for maintaining possession of and controlling access to all dangerous drugs and controlled substances acquired by Carson Tahoe for subsequent use by physicians and other medical practitioners at the medical facility.

8. As relevant to this accusation, Carson Tahoe's institutional pharmacy stored dangerous drugs and controlled substances in Pyxis Medstation RX Systems ("Pyxis machines") for patient administration within the hospital. Carson Tahoe's Pyxis machines were programmed with a fingerprint security system.

9. At all times relevant to this accusation, Carson Tahoe employed Walter Allen Fink, M.D. ("Fink") as the Chief Medical Officer of its medical facility, and it employed Kevin Harlow, M.D. ("Harlow"), as the Chief of Staff of its medical facility. On information and belief, Fink and/or Harlow, acting individually or through subordinates, directed certain of Schott's activities in connection with the management of Carson Tahoe's institutional pharmacy.

10. Carson Tahoe contracted with Clinical Colleagues, Inc. ("Clinical Colleagues") by way of an Anesthesia Services Agreement ("the Agreement") to provide anesthesia services at its medical facility. Pursuant to the Agreement, Carson Tahoe granted hospital privileges to Patsy Langford ("Langford"), a certified registered nurse anesthetist.

11. At no time relevant to this accusation was Langford a "practitioner" as that term is defined at NRS 453.126 and NRS 639.0125.

12. At no time relevant to this accusation was Langford issued a Certificate of Registration to Dispense Controlled Substances in Nevada pursuant to NRS 453.226.

13. Although Langford was not a "practitioner" within the meaning of NRS 453.126 and NRS 639.0125, and did not hold a Certificate of Registration to Dispense Controlled Substances, Carson Tahoe's pharmacy, acting through Schott and/or other pharmacy employees, gave Langford physician/practitioner level independent access to controlled substances stored in certain of Carson Tahoe's Pyxis machines.

14. On information and belief, Fink and/or Harlow, acting individually or through subordinates, directed Schott and/or other pharmacy employees to program Carson Tahoe's Pyxis machines so that Langford could independently access and withdraw dangerous drugs and controlled substances, without a practitioner's order, by applying her fingerprint to a touch screen on the Pyxis machine.

15. On December 19, 2022, Langford, using her fingerprint, accessed the Carson Tahoe Pyxis machine in Operating Room 6 ("OR6"). Langford did so without a practitioner order and selected and administered controlled substances including: 25 mcg fentanyl IT and 0.1 mg morphine sulfate 5 mg/ml to a patient as part of a Cesarean section procedure at Carson Tahoe. On December 19, 2022, Langford also selected and obtained a vial of midazolam 2mg (2mL) from the Pyxis machine in OR6 intended for administration to the same Cesarean section patient; however, the midazolam was not administered to the patient.

16. Carson Tahoe's Care Fusion system reflects Langford regularly used her hospital privileges to access Pyxis machines located throughout Carson Tahoe's hospital to select, order, and administer controlled substances to Carson Tahoe hospital patients.

17. Langford was not authorized to possess or administer controlled substances except under the circumstances authorized by NRS 453.375 and NRS 454.213, all while acting under the supervision of a licensed anesthesiologist.

TO THE RESPONDENT ABOVE-NAMED: PLEASE TAKE NOTICE THAT:

On or about April 24, 2023, the Nevada State Board of Pharmacy ("Board") ordered Respondent Cobalt Medical Supply, Inc. ("Cobalt"), a company based in Wayne, New Jersey, to cease and desist furnishing to persons in Nevada any drugs or medical devices that are restricted by federal law to sale by or on the order of a physician. Additionally, pursuant to NRS 639.2895(3), the Board imposed upon Cobalt a fine of Five Thousand and No/100s Dollars ($5,000.00). By email dated May 11, 2023, Cobalt appealed the fine. Pursuant to NRS 639.070, NRS 639.2895, and NRS 233B.121-.126, *inclusive*, the Board has the authority and jurisdiction to adjudicate Cobalt's appeal. For purposes of said appeal, it is alleged that:

## FACTUAL ALLEGATIONS

1. During an inspection of Pacific Crest Dermatology in Sparks, Nevada, the Board's inspector reviewed shipping documents indicating that on or about March 7, 2023, Cobalt shipped prescription-only drugs and/or medical devices into Nevada. The shipment included cephalexin, clindamycin, and valacyclovir, among other prescription-only products.

2. Cobalt's representatives have stated that they no longer intend to conduct business in Nevada, and that they have stopped shipping prescription-only products into Nevada. Cobalt has appealed the fine referenced above. Cobalt's representatives state that Cobalt is a small company that operates primarily in the Northeastern region of the United States. According to Cobalt's representatives, it is not cost-effective for Cobalt to maintain a license in Nevada.

3. On or about April 24, 2023, the Board served upon Cobalt a letter ordering Cobalt to cease and desist its unlicensed activity in Nevada. By that same letter, the Board imposed upon Cobalt a fine of FIVE THOUSAND and 00/100 DOLLARS ($5,000.00) for the unlicensed furnishing of prescription-only drugs and/or medical devices into and/or within Nevada.

4. By email dated May 11, 2023, Cobalt appealed the Board's order imposing a $5,000 fine as described above.

## APPLICABLE LAW

5. Any manufacturer, wholesaler, or other person engaged in the business of distributing prescription-only medical products within or into Nevada must secure a Nevada license pursuant to NRS 639.233. As used herein, "prescription-only products" means controlled substances, poisons, drugs, devices, or appliances that are restricted by federal law to sale by or on the order of a physician to any person located within Nevada. *See* NRS 639.233.

6. Under Nevada law, the term "drug" is defined to include "[a]rticles and devices intended for use in the diagnosis, cure, mitigation, treatment or prevention of disease in humans." *See* NRS 639.007.

7. The term "wholesaler" is defined to include any "person who derives, produces, prepares or repackages drugs, medicines or chemicals or devices or appliances that are restricted by federal law to sale by or on the order of a physician on sales orders for resale." NRS 639.016.

8. The term manufacturer is defined to include any person who "[d]erives, produces, prepares, compounds, mixes, cultivates, grows or processes any drug or medicine; . . . [r]epackages any drug or medicine for the purposes of resale; or . . . [p]roduces or makes any devices or appliances that are restricted by federal law to sale by or on the order of a physician."

9. The term "medical products provider" means any person sells, leases, or otherwise provides prescription-only medical products to a consumer in Nevada.

10. Nevada licensure is required of out-of-state wholesalers, manufacturers, and medical products providers who sell or ship prescription-only medical products into or within

Nevada. *See* NRS 639.233. Licensure is also required of any such person who "stores" prescription-only medical products in Nevada, or who "solicits or accepts orders" for prescription-only medical products that enter Nevada. *See* NRS 639.233(2).

11. The Board may impose an administrative fine of not more than $5,000.00 against any person who, without a license, engages in any activity that requires licensure by the Board. *See* NRS 639.100(1); NRS 639.2895(3).

## COUNT ONE

## (FURNISHING PRESCRIPTION-ONLY PRODUCTS WITHOUT A LICENSE)

12. By shipping prescription-only medical products into Nevada as alleged above, Cobalt violated the provisions of NRS 639.100(1). Therefore, pursuant to NRS 639.2895(3), Cobalt is liable for a fine of not more than $5,000.00.

**CEASE-AND-DESIST and CITATION-AND-FINE ORDER: Case No. 23-122-O, Unlicensed Furnishing of Drugs and/or Medical Devices**

Dear Ms. Juan:

The Nevada State Board of Pharmacy (Board) has determined that Cobalt Medical Supply, Inc., based in New Jersey, has engaged in the business of furnishing prescription-only drugs and/or medical devices to persons in Nevada without having secured a license as required by Nevada Revised Statutes (NRS) 639.233. Pursuant to NRS 639.233, any manufacturer or wholesaler of prescription-only drugs and/or medical devices must secure a Nevada license if it receives, stores, or ships such products within or into Nevada.

Under Nevada law, the term "drug" is defined to include "[a]rticles and devices intended for use in the diagnosis, cure, mitigation, treatment or prevention of disease in humans." *See* NRS 639.007. The terms "manufacturer" and "wholesaler" are defined at NRS 639.009 and NRS 639.016, respectively. Nevada licensure is required of out-of-state wholesalers and manufacturers who sell or ship drugs or medical devices "that are restricted by federal law to sale by or on the order of a physician to any person located within this State." See NRS 639.233(1).

During an inspection of Pacific Crest Dermatology in Sparks, Nevada, the Board's inspector reviewed shipping documents indicating that on or about March 7, 2023, Cobalt Medical Supply, Inc. shipped prescription-only drugs and/or medical devices into Nevada. The shipment included cephalexin, clindamycin, and valacyclovir, among other prescription-only products.

Given the above findings, the Board hereby orders Cobalt Medical Supply, Inc. to immediately **CEASE and DESIST** furnishing to persons in Nevada any drugs or medical devices that are restricted by federal law to sale by or on the order of a physician. Further, this notice shall serve as a **CITATION** pursuant to NRS 639.2895(2) for the unlicensed furnishing of drugs and/or medical devices to persons in Nevada. Pursuant to NRS 639.2895(3), the Board has assessed an

**administrative fine** against Cobalt Medical Supply, Inc. in the amount of **Five Thousand and 00/100 Dollars ($5,000.00).**

You must pay this administrative fine within 30 days of receipt of this citation, or otherwise contact Board staff to request an alternative payment plan. Payment must be by *cashier's check*, *certified check* or *money order* made payable to "State of Nevada, Office of the Treasurer," to be received at the Board's Reno office, located at 985 Damonte Ranch Parkway – Suite 206, Reno, NV 89521.

You have the right to appeal this citation by submitting a written request for a hearing to the Board at the Board's Reno office no later than 30 days after receipt of this notice. *See* NRS 639.2895(2). Please be aware that the foregoing does not preclude the filing of administrative or criminal charges if deemed appropriate based upon evidence not currently available to the Board. Dear Ms. Juan and Mr. Mazon,

The Board of Pharmacy will accept the below email as an appeal of the $5,000 fine that was imposed by letter dated April 24, 2023. Based upon my telephone conversation with Ms. Juan, I understand that you have stopped shipping products into the state of Nevada and will not resume any such activity unless you have secured a license. I further understand, based upon cost considerations, that Cobalt has no immediate plans to pursue licensure in Nevada. Instead, it will conduct business in other states. I appreciate your attention to this matter. As I said, the Board will follow up with information regarding the status of your appeal.

Sincerely,

Greg Zunino
Senior General Counsel
Nevada State Board of Pharmacy

**WARNING** - This email originated from outside the State of Nevada. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Hello State of Nevada,

The customer who is a new customer of Cobalt Medical had ordered multiple pharmaceutical products. We had the customers products on hold for almost 90 days as the doctor was not ready to take delivery. The order had stayed on “hold” in our system with a “drop ship purchase order” from our pharmaceutical wholesale distributor who is registered in the State of Nevada.

We do carry all the products that were sold to “Pacific Derm Crest” located in Sparka Nevada. We are registered with a pharmaceutical wholesale distributor for multiple states so all the products that were sold to Pacific Derm Crest were in our stock. However our system had the products listed as a “DROP SHIP” purchase order which means those pharmaceutical items are to ship from our supplier who is licensed in Nevada and sent directly from our supplier to the end user.

When the order was released, it was quickly put on hold because the customer had stalled her delivery another 2 weeks.

When we put the order back on hold it must have deleted the “DROP SHIP” option per pharmaceutical line item and when the order was released to our warehouse 2 weeks later those items were printed on a pick ticket for FEDEX delivery. It was never our intention to ship from our facility. We have no problem having the customer return all the pharmaceutical items to our facility and we will issue a full refund.

We are hoping that we can avoid paying a maximum fine of $5,000 as we had no intention of sending these items to this customer. This is one of our FIRST sales into Nevada that was from a referral. We do not sell to any customers in this State. We will insure this does not happen again however fining a small business this amount of money is very hurtful to our business. Our sale made by our sales representative will also be losing a large amount of money if this fine is not waived. We appreciate any courtesy considering this was a simple mistake by our system and we have ensured with our system expert this will not happen again.

Please advise.

When you have some time, can you put together something in writing of what you wanted to say to appeal this?

This matter came before the Nevada State Board of Pharmacy ("Board") at its regularly scheduled meeting on Thursday, September 8, 2022, in Las Vegas, Nevada. Courtney K. Lee, Esq., appeared on behalf of Petitioner Board. Respondent Las Vegas Scripts, Rx ("LV Scripts"), Pharmacy License No. PH03930, and Nathan Edouard, RPH ("Edouard"), appeared jointly through counsel Chandon Alexander, Esq. of Spartacus Law Firm. Respondent Sherman Washington, MD ("Washington"), appeared through counsel Michael Mee, Esq., and agreed to a separately executed Stipulation and Order. Upon hearing the case, and based upon the evidence presented, the Board determined the following Findings of Facts, Conclusions of Law, and Order ("Order").

## FINDINGS OF FACTS

The allegations against Respondents, as stated in the Notice of Intended Action and Accusation ("Accusation") on file herein, and upon which the Board determined findings of facts, incorporated along with the parties' stipulated facts, are as follows:

1. The Board has jurisdiction over Respondents because at the time of the events alleged herein, Respondent LV Scripts held Pharmacy License No. PH03930 with the Board, and

Respondent Edouard held a pharmacist registration, Certificate of Registration No. 19462 with the Board.

2. Respondent LV Scripts Rx is a pharmacy located 2920 N. Green Valley Parkway, #814, in Henderson, Nevada.

3. Respondent Edouard was/is the owner of LV Scripts and was/is employed as the managing pharmacist during the alleged and relevant timeframes.

4. Respondent Washington was/is a physician who wrote prescriptions with copied signatures filled by LV Scripts during the relevant timeframes.

5. On or about June 10, 2019, LV Scripts received a prescription written by Dr. M.B. for patient M.W. for "Cold Cough & Chest rub 240 grams". The prescription was designated prescription #4000099 and was compounded with Dimethyl Sulfoxide Liquid and Promethazine-Codeine Syrup, which were not written on the prescription.

6. On or about September 25, 2019, Board inspectors completed their annual inspection at LV Scripts. At the inspection, the following violations were discovered:

a. LV Scripts appeared to be filling faxed, hand-delivered, or picked up prescriptions that were not signed by practitioners, but contained copied signatures.

b. LV Scripts is providing pre-printed prescription forms.

c. Respondent Edouard failed to provide proper documentation of telephoned orders.

/ / /

## CONCLUSIONS OF LAW

Based upon the foregoing findings of facts, the Board concludes as a matter of law:

7. Respondent Edouard engaged in unprofessional conduct when he failed to strictly follow the directions of the prescribing practitioner when compounding prescription #4000099 for patient M.W., which were compounded with Dimethyl Sulfoxide Liquid, a substance not to be used for medicinal purposes on humans, and Promethazine-Codeine Syrup; the ingredients were not written on the prescription in violation of NRS 585.485(2)(b)(1), NAC 639.6703(1)(a), and NAC 639.945(1)(c)(d), and (i), and Respondent Edouard is therefore subject to discipline pursuant to NRS 639.210(4), (12), and/or NRS 639.255.

8. Respondent Edouard engaged in unprofessional conduct and conduct contrary to the public interest, and performed his duties in an incompetent, unskillful or negligent manner when he processed copied signatures on prescriptions for Respondent Washington in violation of NAC 453.440(2), NAC 454.060, and is therefore subject to discipline pursuant to NRS 453.236, NRS 453.241, NRS 639.210, and/or NRS 639.255.

9. Respondent Edouard failed to provide proper documentation of telephoned orders in violation of NAC 639.712, and is therefore subject to discipline pursuant to NRS 639.210(12), (15), and/or NRS 639.255.

10. As a pharmacy owner/pharmacist registered with the Board, Respondent Edouard engaged in unprofessional conduct and conduct contrary to the public interest when he utilized pre-printed forms as unearned rebates in marketing his business in violation of NRS 639.264, NAC 639.945(1)(i), and is therefore subject to discipline pursuant to NRS 639.210 and/or NRS 639.255.

11. As the pharmacy at which the violations of law alleged herein occurred, Respondent LV Scripts is responsible for those violations, including those of the pharmacy's employees, pursuant to NAC 639.702, NAC 639.945(2) and is therefore subject to discipline pursuant to NRS 639.210 and/or NRS 639.255.

3. Does your facility utilize biological indicators? ☑ Yes ☐ No

4. If yes, describe how they are utilized:

Prior to making our sterile compounded preparations, the glassware and stir bars are sterilized and depyrogenated using a dry heat convection oven. Biological indicators are placed inside each cycle and incubated to validate the effectiveness of each cycle. An endotoxin challenge test is performed annually to ensure that the oven and process is capable of achieving a 3-log reduction in endotoxin.

I certify under penalty of perjury that the information contained in this form is accurate, true and complete in all material respects. I understand that making any false representation in this form is a crime under NRS 639.281. ## Comments

Pharmacy is solely veterinary compounding.

The pharmacy has a pharmacist on-call for after hours and on weekends to field patient concerns or questions.

The pharmacy either ships or delivers medications via delivery driver to the patients. The pharmacy is open door, so patients can pick medication up at the pharmacy as well, but that happens very seldom.

The pharmacy has a non-sterile hazardous negative pressure room to store hazardous non-sterile APIs and to make hazardous non-sterile preparations.

The pharmacy has an ISO 8 anteroom that leads into another IS0 7 anteroom. The ISO 7 anteroom leads into a negative pressure cleanroom, which has a BSC that maintains ISO 5. Also in that room is another BSC for weighing out hazardous non-sterile powders for sterile preparations. The ISO 7 anteroom also leads into a positive pressure cleanroom, which does not currently house a PEC.

Pharmacy currently only compounds two sterile products, Cyclosporine ophthalmic and Tacrolimus ophthalmic. Both have a stability indicating assay and are sterility tested with each batch. The pharmacy use ARL for sterility testing of hazardous high risk sterile preparations. The pharmacy currently uses ARL for potency testing and stability testing on some non-sterile preparations.

Texas State Board of Pharmacy
"Red Flags" Checklist for Pharmacies
YOU MIGHT BE A PILL MILL IF...

*Check all that apply:*

| | |
|---|---|
| | (1) Your pharmacy fills a discernable pattern of prescriptions for prescribers who write essentially the same prescriptions for numerous persons, indicating a lack of individual drug therapy |
| | (2) Your pharmacy operates with limited hours of operation or closes after a certain threshold of controlled substance prescriptions are dispensed, and has overall low prescription dispensing volume. |
| | (3) Prescriptions presented to the pharmacy are for controlled substances with popularity as street drugs, such as opiates, benzodiazepines, muscle relaxants, psychostimulants, and/or cough syrups, or any combination of these drugs. |
| | (4) The prescriptions for controlled substances contain nonspecific or no diagnoses. |
| | (5) The prescriptions are commonly for the highest strength of the drug and/or for large quantities. |
| | (6) Dangerous drugs or OTC products (such as multi-vitamins or laxatives) are added to the controlled substance prescriptions, maintaining relatively consistent 1:1 ratio of controlled substances to dangerous drugs and/or OTC products dispensed as prescriptions. |
| | (7) Prescriptions are authorized by the same prescriber with what appears to be different handwriting on the hardcopy prescription drug order forms. |
| | (8) Upon contact with the prescriber's office, you are unable to engage in comprehensive discussion with the actual prescriber, or he/she is unconcerned about your apprehensions regarding his/her prescribing practices or unwilling to provide additional information, such as treatment goals and/or prognosis with prescribed drug therapy. |
| | (9) You rely solely on the prescriber's representation, or on the representation of the individual answering the phone at the number on the prescription, that prescriptions are legitimate. |
| | (10) The prescriber's clinic is not registered as a pain management clinic by the Texas Medical Board, despite routinely receiving prescriptions from the prescriber foropiates, benzodiazepines, and/or muscle relaxants. |
| | (11) Drugs prescribed are inconsistent with the prescriber's area of practice. |
| | (12) The prescriber of the drugs is located a significant distance from your pharmacy. |
| | (13) The prescriber has been subject to disciplinary action by the licensing board, had his/her DEA registration removed, or been subject to criminal action. |
| | (14) The Texas PMP system indicates that persons are obtaining prescriptions for the same drugs from multiple prescribers or that persons are filling prescriptions for the same drugs at multiple pharmacies. |
| | (15) The person's address is a significant distance from your pharmacy and/or from the prescriber's office. |
| | (16) Multiple persons with the same address present prescriptions from the same prescriber. |
| | (17) Persons pay with cash or credit card more often than through insurance. |
| | (18) Persons presenting controlled substance prescriptions are doing so in such a manner that varies from seeking routine pharmacy services (e.g., willing to wait in long lines to receive drugs, persons arrive in the same vehicle with prescriptions from same prescriber, one person presents to pick up prescriptions for multiple others, persons refer to drugs by "street names" and/or comment on drug's color, persons seek early refills, persons travel from outside reasonable trade area of pharmacy). |
| | (19) Your pharmacy charges and persons are willing to pay more for controlled substances than they would at nearby pharmacies. |
| | (20) Your pharmacy routinely orders controlled substances from more than one drug supplier, or your pharmacy has been discontinued by a drug supplier related to controlled substance orders. |
| | (21) Sporadic and non-consistent dispensing volume (including zero dispensing) varies from day to day and week to week, and your pharmacy does not maintain operational hours each week on Monday through Friday. |
| | (22) Your pharmacy employs or contracts security personnel during operational hours to prevent problems. |
| | (23) Your pharmacy has been previously warned or disciplined by the Texas State Board of Pharmacy for inappropriate dispensing of controlled substances (i.e., corresponding responsibility). |

If you checked any of the above items, you should review the laws and rules regarding corresponding responsibility and non-therapeutic dispensing, especially Board rule §291.29, in the law book or on our website: www.pharmacy.texas.gov (click on Texas Pharmacy Rules and Laws). Additional educational material is available at: http://www.pharmacy.texas.gov/Nontherapeutic.asp. Failure of pharmacies and pharmacists to detect patterns of inappropriate dispensing of prescription drugs is unprofessional practice and constitutes grounds for disciplinary action.

| Section Name: Facility and Personnel Monitoring | SOP Name: Investigation and Remediation in the Event Sampling Exceeds Alert or Action Levels |
|---|---|
| | Date of Initial: 08/02/21 |
| SOP/Version #: 205.5 | Last Revision/Review: 09/16/21 |

## 1.0 Purpose Statement

This SOP defines what an excursion is and establishes when and how action is taken to regain a microbial state of control. It outlines a logical set of information sought during initial and ongoing investigations of microbial excursions in environmental and personnel sampling. No document can provide all-encompassing guidance for specific investigation and remediation of new or ongoing excursions, but Matrix of Actions for First-Time Excursions; F-205.b and Matrix of Actions for Consecutive and Repeat Excursions; F-205.c provide actions to be considered in these instances. This SOP also provides the general guidance followed in any investigation as well as parameters that are included and the documentation of these actions.

## 2.0 Policy Statements

2.1 It is not alarming and is, in fact, expected that small numbers of CFUs (below designated action levels) will be found in ISO 7 and 8 environments and even 1 CFU in ISO 5 spaces.

2.2 The occurrence of consistent 0 CFU returns in viable air, surface, or gloved fingertip sampling prompts a high degree of suspicion that sampling procedures and activities are flawed.

2.3 USP 797 (2019) requires the identification of growth in viable air and surface samples when growth exceeds the action level (as specified for each type of sampling per USP 797).

2.4 An excursion is said to exist under the following conditions:

2.4.1 Action level: When the CFUs counted in any sample (air, surface, gloved fingertip) exceed the established action level for the type of sampling. Refer to specific SOPs on each type of sampling for action levels. All sections of Facility and Personnel Sampling Action Report; F-205.a must be completed.

2.4.2 Alert level: When the CFUs counted in any sample (air, surface, gloved fingertip) exceed the established alert level but are below the established action level for the type of sampling. Refer to specific SOPs on each type of sampling for alert levels. Facility and Personnel Sampling Action Report; F-205.a is used as a tool to evaluate factors that could be contributing to elevated microbial levels. The use of alert levels is not required by USP 797 but is a best practice recommendation.

2.4.3 Organism of concern: When the CFUs counted in any sample (air, surface, gloved fingertip) are *below* the established alert and action levels for the type of sampling, but an organism of concern is recovered. Organisms of concern are certain gram-positive spore-forming rods, certain gram-negative rods, coagulase-positive *Staphylococcus,* and some yeasts and molds. Facility and Personnel Sampling Action Report; F-205.a is used as a tool to evaluate factors that could be contributing to recovery of organisms that are not typically seen as part of the facility's microbial population or should be further investigated if they are being repeatedly recovered in the facility.

2.5 There are three types of excursions.

2.5.1 First excursion: The very first time a location has an EM excursion.

2.5.2 Consecutive excursion: When a location has back-to-back EM excursions, either organisms of concern or an exceeded action level.

2.5.3 Repeat excursion: When a location has an excursion again, either organisms of concern or an exceeded action level, but the excursions have not occurred consecutively.

2.6 Facility has established a contractual relationship with a properly licensed pharmaceutical microbiology laboratory that has been accredited to ISO 17025 and is registered with the FDA.

2.7 Plates are sent to the laboratory for identification of growth for the following reasons:

2.7.1 Anytime an established action level is exceeded for viable air and surface samples, the growth is identified as required by USP 797.

2.7.2 Consideration may be given to performing identifications when an established alert level in a specific location is exceeded more than once. Gathering additional information may be helpful in identifying the source of the microorganisms.

2.7.3 If sample counts are below the action and alert levels but an organism of concern is recovered, identification of the microorganism may be sought to provide additional information about an unexpected change in work practices or facility control.

## 4.0 Specific Work Practices and Procedure Descriptions

| Section Name: Facility and Personnel Monitoring | SOP Name: Investigation and Remediation in the Event Sampling Exceeds Alert or Action Levels |
|---|---|
| SOP/Version #: 205.5 | Last Revision/Review: 09/16/21 |

4.1 When an excursion is realized, the following forms are used: Facility and Personnel Sampling Action Report; F-205.a and Matrix of Actions for First-Time Excursions; F-205.b. For a consecutive or repeat excursion, use Matrix of Actions for Consecutive and Repeat Excursions; F-205.c.

4.1.1 If the number of CFUs recovered exceeds the action level, all sections of F-205.a are completed.

4.1.2 If the number of CFUs recovered exceeds the alert level but falls below the action level, F-205.a is used to document the evaluation that must occur.

4.1.2.1 Follow-up sampling is not required but may be considered during the first occasion that a sample location alert level is exceeded (but below the action level).

4.1.2.2 In the event an alert level is exceeded during two consecutive samplings for a given location, an investigation, remediation, and resampling are required.

4.1.3 If the number of CFUs recovered is below the alert level (if applicable) or below the action level but an organism of concern is recovered, F-205.a may be used to determine the possible source of the microorganism and identify any work practice changes.

4.2 F-205.a is used to guide the investigation and to document actions. By completing the first section of F-205.a, the appropriate information is collected, identifying the proper actions to be taken as described on F-205.b.

4.3 Take the actions as outlined on F-205.b based on whether the sample is a viable air, surface, or gloved fingertip sample and the ISO classification of the space.

4.4 Additional actions may be required beyond the actions specified in F-205.b if the first set of remedial actions does not reestablish a microbial state of control. Follow F-205.c.

4.5 Continue completing F-205.a as information becomes available.

4.6 The investigation described on F-205.a includes identification and documentation of any or all of the following:

4.6.1 Type of sample and conditions under which sampling occurred

4.6.2 Type of excursion

4.6.3 Verification that activities related to sampling were performed correctly

4.6.4 Microbial control actions taken since sampling and before receiving results

4.6.5 Evaluation of certification reports, work logs (pressure, cleaning, humidity, etc.), competencies

4.6.6 Review of the environmental sampling results, which is to include the following questions:

4.6.6.1 Was growth isolated to one location?

4.6.6.2 Was growth found in adjacent sites?

4.6.6.3 If so, was the organism the same in contiguous sites?

| Section Name: Facility and Personnel Monitoring | SOP Name: Investigation and Remediation in the Event Sampling Exceeds Alert or Action Levels |
|---|---|
| SOP/Version #: 205.5 | Last Revision/Review: 09/16/21 |

4.6.7 Evaluation of historical growth trends and determination of the frequency of the organism's recovery, which is to include the following questions:

4.6.7.1 Was the location positive for this growth in last 6 months?

4.6.7.2 Has the location been retested previously?

4.6.7.3 Has the employee had other positive findings?

4.6.7.4 If so, what were they?

4.6.8 Review of the microbiological results, which is to include the following questions:

4.6.8.1 Was the typical reservoir for the microbe or microbes identified?

4.6.8.2 What is the typical reservoir?

4.6.8.3 Was the excursion found close to a location that would be considered a typical reservoir?

4.7 All excursions require remediation, and the plan of remediation is documented on F-205.a.

4.7.1 It may take several follow-up actions and samples to identify, remediate, and bring the sample location back into a state of control.

4.7.2 Those initial and follow-up actions and their results are documented on the form.

4.7.3 The excursion and any follow-up action must be concluded, and the date that the remediation plan is closed must be documented and reviewed by the designated person(s).

4.8 Any additional aspects related to the excursion that are included in the investigation must be thoroughly documented, including dates of action, specific action taken, and the outcome of the actions.

## 5.0 Documentation Elements

5.1 When using Facility and Personnel Sampling Action Report; F-205.a, consider the following:

5.1.1 Any line items that are not required or used must be checked as not applicable or an explanation given.

5.1.2 Any action level requires a complete investigation, which is documented by completing Section 2 of the form; and a specific plan of remedial action must be developed, executed, and documented in Section 3 of the form.

5.1.3 Serial documentation of actions and outcomes must be documented on page 4 of the form.

5.2 Additional pages may be attached if needed, and the added pages must be clearly numbered.

5.3 The dates when the investigation and remediation are officially closed must be documented on the form and signed by the designated person(s).

## Procedure:

### Normal Delivery Protocols and Delivery Times

The pharmacy will only accept out of state prescriptions for states in which the pharmacy holds an active Non-Resident Pharmacy License. The toll free phone number (800-610-2521) will be provided to all patients.

Patients residing outside of Texas will be contacted upon receipt of a new prescription for verification of patient information and establish a patient profile, consent to receive prescription from the pharmacy, and counseling on medication. Patients will be contacted five to seven days prior to refill due, or instructed to contact us five to seven days prior to refill due dates to ensure a

continuous supply of medications. Patients not consenting to receiving the prescription from the pharmacy will have the prescription transferred as legally allowed to the pharmacy of their choice.

Prescriptions may be shipped via FedEx regular two to three business days, standard overnight, or priority overnight. Out of state patients receiving medical care locally will have the ability to pick up the prescription. Each patient is contacted by the pharmacy team for address verification, counseling from a pharmacist on the medication, and anticipated time of delivery prior to scheduling. A designated area is set up in the pharmacy for packaging and shipping. Each prescription is reviewed and checked by a pharmacist before dispensing or delivery. Each delivery will include:

- HIPAA information and Privacy Practices
- Medication information, patient education materials

**Packaging**

Each medication will be package with the appropriate shipping materials. Picked-up and deliveries containing medications that require refrigeration will be sent standard overnight and will be packed into non-descript cardboard shipping boxes with fitted foam dividers, sealed with tape along with any required paperwork, and frozen cold packs as appropriate. For room temperature medications, frozen cold packs are added in each box when outside temperature reaches 80 $^{O}$ F or above. Contents will not be identified on the outside of package to protect privacy and discourage theft or diversion. Patients will be aware of incoming delivery and advised to contact pharmacy if package is damaged, appears tampered or does not arrive as expected.

**Shipping Temperature Verification**

Shipping temperature maintenance will be verified twice annually with an actual shipping test. A package will be sent standard overnight delivery with a temperature monitoring device to a designated location in the coldest months of the year and the hottest months of the year. The Shipping Temperature Test Log will be completed and sent with the package. Upon arrival the temperature will be validated and the remainder of the Shipping Temperature Test Log will be completed on arrival to ensure package arrives with medication in the desired storage range. If an exception is found, packaging and shipping processes will be reevaluated and revised. Repeat testing will occur with any changes to shipping/packaging processes are made.

**Shipping Tracking and Monitoring**

All FedEx shipments are sent based on the convenience for the patient, regular two to three business days, standard overnight delivered by 8pm the next day, or priority overnight delivered by 10am next day unless the service is not supported for the specific region or patients request a later date. Changes to overnight delivery times will be adjusted depending on the mediation.

Electronic logs are maintained for all packages shipped via FedEx. Logs include the name of the patient, shipping address, prescriptions numbers in shipment, and tracking numbers. FedE shipping logs are archived weekly and electronically filed. All shipping logs are maintained for two years.

Electronic logs are downloaded daily and reviewed to ensure that all packages are delivered to the recipient in the time frame chosen. Packages delayed or not delivered will be reviewed and responded to within 48 hours.

Packages shipped through FedEx are picked up on Monday through Thursday before 5:00PM, unless the patient requests Saturday delivery.

**Delivery Accuracy**

Every patient will have a delivery ticket that is created during the delivery preparation step. The delivery ticket will include all medications, information and supplies provided to the patient. A daily log for all deliveries and the method of delivery (FedEx) will be noted on the log unless otherwise specified. Anytime an error occurs in the delivery process (wrong patient, wrong address) a complaint will be documented.

## When Medication is Not Available or Delivery is Delayed

Upon receipt of a new prescription if the pharmacy is unable to fill the medication or the medication has to be ordered, the patient will be contacted. For new prescriptions, delivery will be coordinated with the patient to ensure patient can start medication as soon as needed. For immediate need, the pharmacist will transfer the prescription to another pharmacy more convenient to the patient. For prescription refills, the patient will be asked if they have a sufficient supply of medication to last until the medication can be delivered. If the patient does not have a sufficient supply of medication, the prescription will be transferred to another pharmacy more convenient to the patient.

If FedEx notifies the pharmacy due to weather or logistics of a delayed shipment, the patient will be notified as soon as possible of the delay. The patient will be asked if they have a sufficient supply of medication to last until the medication can be delivered. If the patient does not have a sufficient supply of medication, the pharmacist will reship the medication immediately, or transfer the prescription to another pharmacy more convenient to the patient. The pharmacy will re-route the original package to be returned to the pharmacy.

## Prescriptions for Acute Illness

Upon receipt of a prescription for an acute condition, the patient will be contacted and delivery will be coordinated to ensure the patient can start medication as soon as needed. For immediate need, the pharmacist will transfer the prescription to another pharmacy more convenient to the patient. For prescription refills, the patient will be asked if they have a sufficient supply of medication to last

until the medication can be delivered. If the patient does not have a sufficient supply of medication, the prescription will be transferred to another pharmacy more convenient to the patient.

## When Medication Did Not Arrive As Scheduled

If the pharmacy discovers a delay in delivery or when a patient reports delayed or lost shipment, pharmacy personnel will refer to shipment log to verify shipment information and contact appropriate courier and track the package for the patient. If shipment is further delayed, lost, or incorrect a replacement supply is sent overnight to the patient. A signature authorization is required for the second delivery. The pharmacy will re-route the original package to be returned to the pharmacy. If the patient does not have a sufficient supply of medication, the pharmacist will transfer the prescription to another pharmacy more convenient to the patient. If the patient does not wish to continue to receive the medication from the pharmacy, the pharmacist will have the prescription transferred as legally allowed to the pharmacy of their choice

All SOP's are reviewed at the end of each calendar year and when policy changes are made. Revisions, if deemed necessary, are added as amendments to the original SOP.
