SURFACES & WALLS: The surfaces of ceilings, walls, floors, doors, door frames, fixtures, shelving, work surfaces, counters, and cabinets in the classified area are smooth, impervious, free from cracks and crevices, and non-shedding. Walls are constructed of/or covered with durable material. [USP 797 Section 4.3.1]	Yes
CEILINGS & FLOORS: Inlaid panels of ceilings are caulked around each panel to seal them to the support frame. Junctursa between the ceiling and the walls and between the walls and the floor are sealed to eliminate cracks and crevices where dirt can accumulate. Floors include coving to the sidewall, or the juncture between the floor and the wall are caulked. [USP 797 Section 4.3.1] *Ceiling tiles caulked July 2024*	Yes
LEDGES & OVERHANGS: Overhangs and ledges are easily cleanable, and the exterior lens surface of ceiling light fixtures are smooth, mounted flush, and sealed. [USP 797 Sections 4.3.1]	Yes
FURNITURE, EQUIPMENT, & MATERIALS: Only furniture, equipment, and other materials necessary for performing compounding activities are permitted in a classified area or SCA. Tacky mats are not placed within ISO-classified areas. [USP 797 Sections 4.2.1 & 4.5]	Yes
CARTS: Carts used to transport components or equipment into classified areas are constructed from nonporous materials with cleanable casters and wheels. [USP 797 Section 4.5]	Yes
TEMPERATURE & HUMIDITY MONITORING: Temperature and humidity in the cleanroom suite are controlled through a heating, ventilation, and air conditioning (HVAC) system. The temperature and humidity are monitored in each room of the cleanroom suite each day that compounding is performed, either manually or by a continuous recording device. They are documented at least once daily or stored in the continuous recording device and are retrievable and are reviewed as described in the facility's SOP. [USP 797 Section 4.2] *per SImplify*	Yes
PRESSURE DIFFERENTIATION MONITORING & DOCUMENTATION: Facility maintains e minimum differential positive pressure of 0.020-inch water column between the buffer room and anteroom and anteroom and unclassified area. A pressure differential monitoring device is used to continuously monitor the pressure differentials. Quantitative results from the pressure monitoring device are reviewed and documented at least daily on the days when compounding is occurring. [USP 797 Sections 4.2.5] *per Simplify*	Yes
PEC LOCATION: PECs sre located in a buffer room in a manner that minimizes conditions that could increase the risk of microbial contamination (strong air currents, personnel traffic, or air streams from HVAC system(s)) and allows for cleaning around the PEC. [USP 797 Sections 4.2.2 & 4.2.3] *PEC locations: 8 horizontal flow hoods, 4 Air Clean powder hoods and 5 Nuaire vertical flow BSC's*	Yes
INTEGRATED VERTICAL LAMINAR FLOW ZONES: IVLFZ is separated from ISO Class 7 area with a physical barrier and there is full coverage of HEPA filters above the work surface. [USP 797 Section 4.2.3]	N/A

H. CERTIFICATION AND RECERTIFICATION -- ALL CATEGORIES

PEC CERTIFICATION: The PEC is certified initially and every 6 months to meet ISO Class 5 or better conditions, during dynamic operating conditions. [USP 797 Sections 4.1 & 5.0] *MTA Oct 25, 2024-new business* *8 horizontal flow hoods Germfree, 4 powder hoods and 5 vertical flow Nuaire Class II A2 BSC's (certified as ISO 5)*	Yes
SEC CERTIFICATION: SECs are certified initially and every 6 months to meet ISO Class 7 or 8 or better conditions, during dynamic operating conditions (including presterilization activities if applicable). Anterooms providing access to positive-pressure buffer rooms are at least ISO 8 and at least ISO 7 for anterooms providing access to negative-pressure buffer rooms. Classified areas are recertified when changes occur that could affect airflow or air quality [USP 797 Sections 4.1, 4.2.6, & 5.0] *MTA Oct 25, 2024*	Yes

ISO CLASS 7 & 8 REQUIREMENTS: ISO Class 7 rooms maintain a minimum of 30 total HEPA-filtered ACPH during dynamic operating conditions, at least 15 ACPH come from the HVAC through HEPA filters located in the ceiling. ISO Class 8 rooms maintain a minimum of 20 total HEPA-filtered ACPH during dynamic operating conditions; 15 ACPH must come from the SEC. The ACPH from HVAC, ACPH contributed from the PEC, and the total ACPH are documented on the certification report. [UPS 797 Section 4.2.4] *MTA Oct 25, 2024 certification-certifier has documented ACPH provided from HVAC for positive pressure room Sterile 1, 2 and 3 and Sterile ISO 5 room Mixing will occur in powder hoods in ISO 7*	Yes
DOCUMENTATION OF PERSONNEL PRESENT DURING CERTIFICATION: The number of personnel present in each PEC and SEC during total particle counts and dynamic airflow smoke-pattern tests is documented on the certification report. [USP 797 Section 5.0] *Between 3 and 11 personnel documented by certifier*	Yes
PEC DYNAMIC SMOKE PATTERN TEST: Smoke pattern tests are performed under dynamic conditions initially to demonstrate minimal disruption in airflow and repeated if equipment is placed in a different location. Smoke pattern tests are performed under dynamic conditions every 6 months to demonstrate unidirectional airflow and sweeping action over and away from the preparation(s). [USP 797 Section 5.0] *Recorded -dated Nov 14, 2024*	Yes
ROBOTICS / ROBOTIC ENCLOSURES: Robotic enclosures used as a PEC or placed within a PEC have a dynamic airflow smoke pattern test is performed initially and at least every 6 months that confirms 1) the robotic device is properly integrated into the facility, 2) there is no turbulence or refluxing at any critical site(s), 3) room air does not enter the PEC where sterile products and/or preparations may be exposed, and 4) all processes can be performed without introducing contamination to the DCA(s). [USP 797 Section 4.2.3]	N/A
HEPA FILTER INTEGRITY TESTING: HEPA filter integrity testing for both SECs & PECs is conducted initially and every 6 months as part of total particle testing. [USP 797 Section 5.0]	Yes
MONITORING DEVICE CERTIFICATION: Temperature and humidity monitoring devices are verified for accuracy at least every 12 months or as required by the manufacturer. [USP 797 Section 4.2]	Yes
CONTAINMENT DEVICES USED FOR PRESTERILIZATION PROCEDURES: CVEs, BSCs, or CACIs used for presterilization procedures are certified at least once every 6 months. [USP 797 Section 4.2.6] *Oct 25, 2024 4 -certified Air Clean powder hoods -Hood 104, Hood 106-in Sterile 1 room, Hood 103 in Sterile 2, Hood 107 in Sterile 3*	Yes
CERTIFICATION REPORT REVIEW BY DESIGNATED PERSON: All certification and recertification records are reviewed by the designated person(s). A corrective action plan is implemented and documented in response to any out-of-range results on certification report and data reviewed to confirm that the actions taken have been effective. [UPS 797 Section 5.0] *MTA report signed by Deisgnated Person KY*	Yes

I. RABS

LOCATION: If used to prepare Category 2 or Category 3 CSP's RABS are located in a cleanroom suite with an ISO Class 7 or better buffer room with an ISO Class 8 or better anteroom. [USP 797 Section 4.2.3]	
RECOVERY TIME: When a RABS is used, the recovery time after opening the transfer chamber to achieve ISO Class 5 air is documented and internal procedures are developed to ensure that adequate recovery time is allowed after opening and closing the RABS. [USP 797 Section 4.2.3]	
STERILE GLOVES: are worn over gloves attached to RABS sleeves. [USP 797 Section 3.3]	

J. CATEGORY 2 CSPs WITHOUT STERILITY TESTING

CATEGORY 2 COMPOUNDING ENVIRONMENT: Category 2 CSPs are compounded in an ISO class 5 PEC located within an ISO classified anteroom and buffer room. [USP 797 Sections 4.1 & 14.3] *Pharmacy will be compounding patient-specific Intrathecal formulations such as Hydromorphone, Baclofen inj for pain in syringes or vials compounded from Category 3 stock solutions*	Yes
CATEGORY 2 BUDs FROM STERILE COMPONENTS WITHOUT STERILITY TESTING: Category 2 CSPs compounded aseptically from all sterile starting components and in the absence of sterility testing do not exceed the following BUDs: 4 days room temperature, 10 days refrigerated, or 45 days frozen. [USP 797 Section 14.3]	N/A
CATEGORY 2 BUDs FROM NONSTERILE COMPONENTS WITHOUT STERILITY TESTING: Category 2 CSPs compounded aseptically from one or more nonsterile starting components and in the absence of sterility testing do not exceed the following BUDs: 1 day room temperature, 4 days refrigerated, or 45 days frozen. [USP 797 Section 14.3] *Examples of Cat 2 CSP's from non-sterile components will be assigned a 4 day BUD-Clonidine, Bupivacaine, Baclofen Intrathecal -under refrigeration*	N/A

K. CATEGORY 2 EXTENDED BUD REQUIREMENTS

CATEGORY 2 BUDs FOR ASEPTICALLY PROCESSED CSPs WITH STERILITY TESTING: Category 2 CSPs compounded aseptically, and which have passed sterility testing do not exceed the following BUDs: 30 days room temperature, 45 days refrigerated, or 60 days frozen. [USP 797 Section 14.3]	
CATEGORY 2 BUDs FOR TERMINALLY STERILIZED CSPs WITHOUT STERILITY TESTING: Category 2 CSPs terminally sterilized and in the absence of sterility testing do not exceed the following BUDs: 14 days room temperature, 28 days refrigerated, or 45 days frozen. [USP 797 Section 14.3]	
CATEGORY 2 BUDs FOR TERMINALLY STERILIZED CSPs WITH STERILITY TESTING: Category 2 CSPs terminally sterilized, and which have passed sterility testing do not exceed the following BUDs: 45 days room temperature, 60 days refrigerated, or 90 days frozen. [USP 797 Section 14.3]	
ANTIMICROBIAL EFFECTIVENESS TESTING FOR MULTI-DOSE CSPs: Aqueous multiple-dose CSPs (e.g., injectables and ophthalmics) pass USP <51> compliant antimicrobial effectiveness testing once for each unique formulation and each container closure system in which it is packaged. Bracketing studies are allowed. [USP 797 Section 14.5 & 16.1]	
CONTAINER CLOSURE TESTING: Container closure integrity testing is performed once for each unique CSP formulation and container closure system in which it is packaged. For multi-dose (i.e., preserved CSPs), container integrity testing is performed per fill volume for each unique CSP formulation and container closure system. [USP 797 Sections 14.3.3 & 14.5]	
MULTI-DOSE, NON-PRESERVED AQUEOUS CSPs: Multi-dose, non-preserved aqueous CSPs (i.e., topical, or ophthalmic solutions) are assigned are prepared as a Category 2 CSP, for use by a single patient, and labeled to indicate that once opened, the CSP must be discard after 24 hours if stored at controlled room temperature or 72 hours when stored under refrigeration. [USP 797 14.5]	
OUTSOURCED STERILITY TESTING: Sterility testing is performed for all Category 2 CSPs assigned a BUD requiring sterility testing according to USP <71> or a validated alternative and noninferior method. Membrane Filtration as described in USP <71> is the preferred method when the formulation allows. [USP 797 Section 12.2]	
INHOUSE STERILITY TESTING: Sterility testing is according to USP <71> or a validated alternative and noninferior method. Membrane filtration is used if appropriate and filters are rinsed according to USP <71>. Direct inoculation is done only when membrane filtration cannot be carried out. Volume inoculated does not exceed 10% of the culture media volume. Growth promotion test has been done on the media with the 5 specified organisms (not more than 100 CFU) according to USP <71>. TSB or SCD is incubated at 20-25C for 14 days; FTM is incubated at 30-35C for 14 days. (2 incubators present).	
METHOD SUITABILITY TEST: A Method Suitability Test (or equivalent validation for alternative testing methods) is performed to validate suitability of the sterility testing method. [USP 797 Section 12.2]	

MAXIMUM BATCH SIZE: The maximum batch size for all CSPs requiring sterility testing is 250 final yield units. [USP 797 Section 12.2]	
STERILITY TESTING QUANTITY & VOLUME DETERMINATION: The minimum quantity of each container tested for sterility is per USP <71> Table 2 and the number of containers tested in relation to the batch size is per USP <71> Table 3. For 1-39 CSPs compounded as single batch, sterility testing is performed on a number of containers or units equal to 10% of the number of CSPs prepared rounded to the next whole number. [USP 797 Section 12.2]	
INVESTIGATION OF STERILITY TEST FAILURES: Sterility tests resulting in failure undergo prompt investigation into possible causes and requires identification of the microorganism(s) as well as evaluation of sterility testing procedure, compounding facility, process, and/or personnel that may have contributed to the failure. Impact to other CSPs is assessed. Investigation and resulting corrective actions are documented. [USP 797 Section 12.2]	
ENDOTOXIN TESTING: Category 2 injectable CSPs compounded from one or more nonsterile component(s) and assigned a BUD that requires sterility testing are tested for bacterial endotoxins. [USP 797 Section 12.3]	
ENDOTOXIN LIMITS: In the absence of a bacterial endotoxin limit in an official USP–NF monograph or other CSP formula or scientifically supported source, the CSP does not exceed the endotoxin limit calculated as described in USP <85> for the appropriate route of administration for humans or largest recommend dose per weight for nonhuman species. [USP 797 Section 12.3]	

L. CATEGORY 3 CSPs, BUDs, & RELATED REQUIREMENTS

CATEGORY 3 REQUIREMENTS: All requirements associated with Category 3 compounding (e.g., garbing, cleaning, environmental monitoring) apply to all personnel entering the buffer room where Category 3 CSPs are compounded and always apply regardless of whether Category 3 CSPs are compounded on a given day. [USP 797 Section 14.4.2] *Not currently compounding but does meet criteria for Cat 3 compounding, given full garbing of sterile PPE and the BUD's in SOP 0096*	N/A
STERILE/SINGLE USE GARB: When compounding Category 3 CSPs, skin is not exposed in buffer room (i.e., face and neck are covered) and all low lint outer garb is sterile, including sterile sleeves over RABS gauntlet sleeves. Disposable garb items are not reused. [USP 797 Section 3.3]	Yes
STERILIZED/REUSABLE GARB: Non-disposable garb is not reused without being laundered and resterilized with a validated cycle. Disinfection procedures described in facility SOPs are followed before reusing goggles, respirators, and other equipment. [USP 797 Section 3.3] *Sterile coveralls*	Yes
CATEGORY 3 BUDs FOR ASEPTICALLY PROCESSED CSPs: Category 3 CSPs aseptically processed, sterility tested, and passing all applicable tests (including stability indicating assay, endotoxin, and other dosage form appropriate tests) do not exceed the following BUDs: 60 days room temperature, 90 days refrigerated, or 120 days frozen. Shorter BUDs are assigned when physical or chemical stability of the CSP is less than the maximum allowable Category 3 BUDs for aseptically processed CSPs. [USP 797 Section 14.4.3] *ARL studies provided for Sermorelin Inj 2mg/ml-Stability indicating assays initiated 7-22-24 and almost to completion for assignment of 90 day BUD. Please provide final report to inspector.*	Yes
CATEGORY 3 BUDs FOR TERMINALLY STERILIZED CSPs: Category 3 CSPs aseptically processed, sterility tested, and passing all applicable tests (including stability indicating assay, endotoxin, and other dosage form appropriate tests) do not exceed the following BUDs: 90 days room temperature, 120 days refrigerated, or 180 days frozen. Shorter BUDs are assigned when physical or chemical stability of the CSP is less than the maximum allowable Category 3 BUDs for terminally sterilized CSPs. [USP 797 Section 14.4.3] *Not terminally sterilizing and aqueous intrathecal formulations*	N/A
MAXIMUM BATCH SIZE: Category 3 CSP batch sizes do not exceed 250 final yield units. [USP 797 Section 12.2] *Available for bags, vials, syringes*	Yes
STABILITY INDICATING ASSAYS: All Category 3 CSP formulations are supported by data obtained using a validated stability-indicating analytical method that can distinguish active ingredients from degradants and impurities and quantify the amount of active ingredient. CSPs are prepared according to the exact formulation, components, and packaged in a container closure system of the same materials of composition. Facilities have documentation of the stability study, its results, and the method validation available for review. [USP 797 Section 14.3.3] *Available for Baclofen and Clonidine intrathecal*	Yes
STERILITY TESTING: All category 3 CSPs and batches undergo sterility testing performed according to USP <71> or a validated alternative and noninferior method. [USP 797 Sections 12.2 & 14.4.4] *per ARL lab -available per batch -when compounding is initiated at this location using USP <71> compendial methods*	Yes
METHOD SUITABILITY TEST: A Method Suitability Test (or equivalent validation for alternative testing methods) is performed to validate suitability of the sterility testing method for each formulation. [USP 797 Section 12.2] *Available for Clonidine 5mg/ml Intrathecal Inj, Baclofen 4mg/ml Intrathecal Inj. -from ARL*	Yes
STERILITY TESTING QUANTITY & VOLUME DETERMINATION: The minimum quantity of each container tested for sterility is per USP <71> Table 2 and the number of containers tested in relation to the batch size is per USP <71> Table 3. For 1-39 CSPs compounded as single batch, sterility testing is performed on a number of containers or units equal to 10% of the number of CSPs prepared rounded to the next whole number. [USP 797 Section 12.2] *per SOP*	N/A
INVESTIGATION OF STERILITY TEST FAILURES: Sterility tests resulting in failure undergo prompt investigation into possible causes and requires identification of the microorganism(s) as well as evaluation of sterility testing procedure, compounding facility, process, and/or personnel that may have contributed to the failure. Impact to other CSPs is assessed. Investigation and resulting corrective actions are documented. [USP 797 Section 12.2]	N/A
ENDOTOXIN TESTING: Category 3 injectable CSPs compounded from one or more nonsterile component(s) are tested for bacterial endotoxins. [USP 797 Section 12.3] *Awaiting DEA permit prior to compounding Intrathecal controlled substance CSP's.*	N/A
ENDOTOXIN LIMITS: In the absence of a bacterial endotoxin limit in en official USP–NF monograph or other CSP formula or scientifically supported source, the CSP does not exceed the endotoxin limit calculated as described in USP <85> for the appropriate route of administration for humans or largest recommend dose per weight for nonhuman species. [USP 797 Section 12.3] *See ARL COA establishing Endotoxin limits as NMT 7EU/ml for Baclofen 4mg/ml and Clonidine 5mg/ml Intrathecal*	Yes
PARTICULATE MATTER TESTING: Category 3 injectable CSPs undergo USP <788> (Particulate Matter in Injections) and ophthalmic solutions undergo USP <789> (Particulate Matter in Ophthalmic Solutions) test once per formulation with acceptable results. [USP 797 Section 14.3.3] *Available at this time for non-controlled intrathecal formulations from ARL labs (follows USP <788>)-this is a one time requirement for the formulation*	Yes
ANTIMICROBIAL EFFECTIVENESS TESTING FOR MULTI-DOSE CSPs: Aqueous multiple-dose CSPs (e.g., injectables and ophthalmic) pass USP <51> compliant antimicrobial effectiveness testing once for each unique formulation and each container closure system in which it is packaged. Bracketing studies are allowed. [USP 797 Section 14.5 & 16.1] *Non-preserved intrathecals-not required*	N/A
CONTAINER CLOSURE TESTING: Container closure integrity testing is performed once for each unique CSP formulation and container closure system in which it is packaged. For multi-dose (i.e., preserved multi-dose CSPs), container closure integrity testing is also performed per fill volume for each unique CSP formulation and container closure system. [USP 797 Sections 14.3.3 & 14.5] *Available for Clonidine 5mg/ml Inj 30ml in 50ml bag and Baclofen 4mg/ml Inj 100ml in 100ml bag by Intrathecal inj*	Yes
MULTI-DOSE, NON-PRESERVED AQUEOUS CSPs: Multi-dose, non-preserved aqueous CSPs (i.e., topical, or ophthalmic solutions) are prepared for use by a single patient, and labeled to indicate that once opened, the CSP must be discard after 24 hours if stored at controlled room temperature or 72 hours when stored under refrigeration. [USP 797 14.5]	N/A

MULTI-DOSE COMPONENT CSPs: Multiple-dose CSP after initially entered or punctured, are not used for longer than the assigned BUD or 28 days, whichever is shorter. [USP 797 Section 16.1] *The intrathecals will be non-preserved and used within the BUD*	N/A

M. PERSONNEL TRAINING & COMPETENCIES - ALL CATEGORIES

TRAINING PROGRAM & SOP: Facility maintains a written training program and corresponding SOP which defines required trainings, frequency of training and the process for evaluating the performance of individuals who compound, have direct oversight of compounding personnel, perform in-process checks, final verification and dispensing of CSP's. [USP 797 Section 2] *per SOP AHCT-WI-0043 'Vial and Lyo Batch' -frequency is every 3 months*	Yes
INITIAL CORE SKILLS KNOWLEDGE & COMPETENCY ASSESSMENT: Before beginning to compound CSPs independently or have direct oversight of compounding personnel, personnel complete training and can demonstrate knowledge of principles and competency of skills for performing sterile manipulations and achieving and maintaining appropriate environmental conditions as applicable to their assigned job functions. [USP 797 Section 2.1]	Yes
INITIAL GLOVED FINGERTIP & HAND HYGIENE/GARBING COMPETENCY: Before beginning to compound independently or have direct oversight of compounding personnel, personnel successfully complete an initial gloved fingertip (GFT) competency no fewer than 3 separate times, with a documented visual audit while performing hand hygiene and garbing procedures. GFT samples are collected before applying sterile 70% IPA to gloves. [USP 797 Section 2.2] *Available for SE*	Yes
GLOVED FINGERTIP INCUBATION: Documentation includes the name of the person evaluated; evaluation date and time; media and components used to include manufacturer, expiration date, and lot number; starting temperature for each interval of incubation; dates of incubation; results and identification of the observer and personnel reading and documenting the results. USP 797 Section 2.2]	Yes
INITIAL MEDIA FILL & ASEPTIC TECHNIQUE ASSESSMENT: Before beginning to compound independently or have direct oversight of compounding personnel, personnel who compound or have direct oversight of compounding successfully complete an initial aseptic manipulation competency evaluation which consists of a visual observation, media-fill testing followed by a gloved fingertip and thumb sampling on both hands, and surface sampling of the direct compounding area. [USP 797 Section 2.3]	Yes
MEDIA INCUBATION: Documentation includes the name of the person evaluated, evaluation date and time, media and components used to include their manufacturer or supplier, expiration dates and lot numbers, starting temperature for each interval of incubation, dates of incubation, the results, and the names or other identification of the observer and the person who reads and documents the results. [USP 797 Section 2.3]	Yes
CATEGORY 1 AND 2-ONGOING GFT & GARBING ASSESSMENT: After initial garbing competency evaluations, compounding personnel complete garbing competency evaluation and GFT every 6 months for Category 1 and Category 2 CSP's. Direct oversight personnel who do not compound complete garbing competency and GFT every 12 months. GFTs are appropriately incubated. [USP 797 Section 2.2] *See Cat 3 section*	N/A
CATEGORY 1 AND 2-ONGOING MEDIA FILL & ASSESSMENT: After initial aseptic manipulations competency evaluations, compounding personnel complete aseptic technique competency, media fill, GFTs, and surface sampling of DCA every 6 months for Category 1 and Category 2 CSP's. Direct oversight personnel who do not compound complete media fill every 12 months. GFTs and surface samples are appropriately incubated. [USP 797 Section 2.3]	N/A
ONGOING KNOWLEDGE & COMPENTENCY OF CORE SKILLS: Training and knowledge assessment of sterile compounding principles or core skills is completed at least every 12 months. [USP 797 Section 2.1] *Critical Point SE 3-28-24, CB 1/2024*	Yes
FAILED COMPETENCY INVESTIGATION: Initial and ongoing competency assessment failures are investigated, remediated, and documented in a Corrective Action Plan. [USP 797 Sections 2.2 & 2.3]	N/A
STAFF TRAINING IN VIABLE AIR AND SURFACE SAMPLING: Personnel are trained and competent in air and surface sampling procedures to ensure accurate and reproducible sampling. [USP 797 Section 6.1] *Completed by Microbiologist supervisor and training available for the 3 microbiology technicians* *In-house EMPQ air sampling binder.* *Air sampling will be daily in ISO 5,weekly ISO 7 surface sampling and air every other week for Air sampling in SEC's*	Yes

FACILITY COMPOUNDS CATEGORY 3

CATEGORY 3-ONGOING GFT & GARBING ASSESSMENT: After initial garbing competency evaluations, compounding personnel complete garbing competency and GFT every 3 months for Category 3 CSP's. Direct oversight personnel who do not compound complete garbing competency and GFT every 12 months. GFTs are appropriately incubated. [USP 797 Section 2.2] *New business, Initial for compounding personnel was completed 11/5/24*	N/A
CATEGORY 3-ONGOING ASEPTIC PROCESSING COMPETENCY: Aseptic competency is repeated at least one time every 3 months for personnel compounding Category 3 CSPs. The simulation must capture elements that could potentially affect the sterility of the CSP. Immediately following the media-fill test, gloved fingertip and thumb sampling is performed on both hands and surface sampling of the direct compounding area. Direct oversight personnel who do not compound must complete media fill every 12 months. [USP 797 Section 2.3] *New business -last media fill for SE was 11/2024*	N/A

N. MICROBIOLOGICAL AIR AND SURFACE MONITORING: ALL CATEGORIES

ENVIRONMENTAL MONITORING PROGRAM & SOPs: The microbiological air and surface monitoring program is clearly described in the facility's SOPs, which includes a diagram of the sampling locations, procedures for collecting samples, frequency of sampling, size of samples (e.g., surface area, volume of air), time of day of sampling in relation to activities in the compounding area, and action levels that trigger corrective action. [USP 797 Section 6] *AHCT-SOP-0093 'Environmental Monitoring Program for the Sterile Suite'* *Bi-weekly Air Sample, weekly surface sampling using Hardy TSA and SDA plates with L&T under dynamic conditions*	Yes
VIABLE AIR SAMPLING: Volumetric active air sampling using an impaction air sampler collecting at least 1000L of air is conducted in each classified area [e.g., ISO Class 5 PEC and ISO Class 7 and 8 room(s)] during dynamic operating conditions and is completed at least every 6 months. [USP 797 Section 6.2] *In-house, most recent Oct 4, 2024, per EMPQ binder*	Yes
AIR IMPACTION DEVICE: Device is serviced and calibrated according to the manufacturer's recommendations. [USP 797 Section 6.1] *SAS air samplers x 3 most recently calibrated 10-28-24 by Bioscience*	Yes
SURFACE SAMPLING: Microbiological surface sampling is conducted in all classified areas and pass-through chambers under dynamic operating conditions and performed at least once monthly. [USP 797 Section 6.3] *Daily in ISO 5, weekly in ISO 7 and 8 and after each batch*	Yes
GROWTH MEDIA: A general microbiological growth media that supports the growth of bacteria and fungi is used and a COA from the manufacturer is available. Growth media used for surface sampling contains neutralizing agents (e.g., lecithin and polysorbate 80). [USP 797 Sections 6.2 & 6.3] *Dual plate method used -Hardy TSA with L&T plates P520 and Hardy SDA with L&T W70*	Yes

INCUBATION: Samples are incubated at 30°C - 35°C for 48 hours and 20°C - 25°C for an additional 5 days; if dual growth media are used, incubate one media device at 30°C - 35°C for 48 hours and the second media device at 20°C - 25°C for 5 days. The incubator temperature is monitored during incubation, either manually or by a continuous recording device, and results are reviewed and documented as described in the facility's SOPs. Incubators are placed in a location outside of the sterile compounding area. [USP Sections 6.2.2 (Box 5) & 6.3.2 (Box 6)]	Yes
ENVIRONMENTAL MONITORING TREND ANALYSIS: Regular review of sampling data is performed to detect trends and review of trending data is documented. [USP 797 Section 6.1] *In EMPQ Binder*	Yes
CORRECTIVE ACTION: When microbial growth exceeds action levels, the cause is investigated, and corrective action is taken; corrective actions taken are reviewed for effectiveness. An attempt to identify microorganisms at the genus level is made. [USP Sections 6.2.3 & USP 6.3.3]	Yes

FACILITY COMPOUNDS CATEGORY 3

CATEGORY 3-VIABLE AIR SAMPLING: Volumetric air sampling is completed within 30 days prior to the commencement of any Category 3 compounding and at least monthly thereafter regardless of the frequency of compounding Category 3 CSPs.Air sampling sites are selected in all classified areas. [USP 797 6.2.1] *per policy AHCT-SOP-0093 'Environmental Monitoring Program for the Sterile Suite'*	Yes
CATEGORY 3-SURFACE SAMPLING: Surface sampling for any Category 3 CSPs, is completed in all classified areas, and pass-through chambers connecting to classified areas, prior to assigning a BUD longer than BUD limits for Category 2 CSPs (defined in Table 13 of USP 797) and at least weekly on a regularly scheduled basis regardless of the frequency of compounding Category 3 CSPs. [USP 797 6.2.2]	Yes
CATEGORY 3-BATCH SURFACE SAMPLING: Surface sampling is conducted within the PEC used to prepare Category 3 CSPs, at the end of each batch before cleaning and disinfection occurs, unless a self-enclosed robotic device is used. When a self-enclosed robotic device is used as the PEC, surface sampling is conducted at least once daily at the end of compounding operations before cleaning and disinfection occurs. [USP 797 Section 6.3.2] *Weekly surface sampling plan and daily in ISO 5 and after the batch*	Yes

O. CLEANING AND DISINFECTING: ALL CATEGORIES

CLEANING SOPS: The frequency, method(s), documentation requirements, and location(s) of cleaning, disinfecting, and applying sporicidal disinfectants are described in written SOPs; use of agents is in accordance with manufacturer's instructions, procedures, and in adherence with minimum wet contact times. [USP 797 Section 7] *AHCT-SOP-0095 'Cleaning and Disinfection of the Sterile Suite'*	Yes
CLEANING PERSONNEL: Cleaning and disinfecting activities are performed by trained and appropriately garbed personnel using facility-approved agents and procedures. Cleaning personnel demonstrate knowledge and competency of core skills related to cleaning, disinfection, and maintenance of environmental conditions initially and at least once every 12 months. [USP 797 Sections 7 & 2.1] *11/5/24 for SE*	Yes
REUSABLE GARB: Disinfection procedures described in facility SOPs are followed before reusing goggles, respirators, and other equipment used. [USP 797 Section 3.3]	Yes
DAILY PEC CLEANING & DISINFECTION: Equipment and all interior surfaces of the PEC are cleaned and disinfected daily on days when compounding occurs and when surface contamination is known or suspected. [USP 797 Section 7] *Documented in Simplify*	Yes
CATEGORY 1 AND 2-MONTHLY PEC SPORICIDAL DISINFECTION: Equipment and all interior surfaces of the PEC, including underneath of removable work trays, are cleaned with a sporicidal agent monthly. [USP 797 Section 7] *per detailed Simplify task*	Yes
DAILY SEC & SCA CLEANING & DISINFECTION: Work surfaces, floors, sink surfaces, and pass-through chambers are cleaned and disinfected daily on days when compounding occurs. [USP 797 Section 7] *10/31/24*	Yes
CATEGORY 1 AND 2 -MONTHLY SEC & SCA SPORICIDAL DISINFECTION: A sporicidal disinfectant is applied to work surfaces, pass-through chambers, storage shelving and bins, equipment outside of PEC's, sink surfaces, floors, ceilings*, walls, doors, and doors frames at least once monthly. *SCA ceilings are only cleaned, disinfected, and have sporicidal agents applied when visibly soiled and when surface contamination is known or suspected. [USP 797 Section 7]	Yes
CLEANING & DISINFECTING AGENTS: Cleaning and disinfecting agents are EPA-registered. If e one-step disinfectant cleaner is not used, surfaces are cleaned prior to being disinfected. [USP 797 Section 7] *Sterile LpH alternating evey other month with sterile Vesphene, Spor-Klenz (10 mins) and Sterile Peridox (3 mins)*	Yes
STERILE AGENTS USED INSIDE PECs: Cleaning, disinfecting and sporicidal agents used within PECs are sterile. Written SOPs describe the time period during which, once opened, sterile cleaning and disinfecting agents, supplies, and sterile 70% IPA may be reused sterile water is used to dilute concentrated cleaning agents used inside of PECs (if applicable). [USP 797 Section 7.1.1] *Includes Sterile sorb and Sturix lint free wipes*	Yes
CLEANING AGENT RESIDUE REMOVAL IN PECs: In a PEC, sterile 70% IPA is applied after cleaning, disinfecting, or after one-step disinfectant cleaner or sporicidal agent application to remove residue. [USP 797 Section 7].	Yes
PEC SANITIZATION WITH STERILE 70% IPA: Sterile 70% IPA is applied to the horizontal work surface, including removable trays, immediately before initiating compounding and at least every 30 minutes. If a compounding process takes more than 30 minutes, the work surface is disinfected immediately after the end of the compounding process. Sterile 70% IPA is allowed to dry. [USP 797 Section 7]	Yes
CLEANING SUPPLIES & TOOLS: All cleaning and disinfecting supplies (e.g., wipers, sponges, pads, and mop heads), except for tool handles and holders, are low linL Supplies used inside PECs are sterile. [USP 797 Section 7.1.2]	Yes
REUSABLE CLEANING TOOLS: Reusable cleaning tools (e.g., mop frames) are made of cleanable materials and are cleaned and disinfected before and after each use. Reusable tools are dedicated for use in the classified areas or SCA and are not removed. Mops used in HD compounding areas, are dedicated for use only in those areas. [USP 797 Section 7.1.2]	Yes
MATERIALS MOVEMENT INTO CLASSIFIED AREAS: Before any item is introduced into the clean side of anteroom(s), placed into pass-through chamber(s), or brought into the SCA, it is wiped with a sporicidal disinfectant, EPA-registered disinfectant, or sterile 70% IPA using low-lint wipers by personnel wearing gloves. Dwell time is followed. [USP 797 Section 8.1]	Yes

FACILITY COMPOUNDS CATEGORY 3

CATEGORY 3-WEEKLY SPORICIDAL CLEANING OF PECs: Weekly cleaning using a sporicidal agent is performed on all internal surfaces of PEC and equipment in PEC's. [USP 797 Section 7] *Not currently compounding -last represented date 10-31-24 in Simplify*	N/A
CATEGORY 3-WEEKLY SPORICIDAL CLEANING OF SECs: Weekly cleaning using a sporicidal agent includes application on work surfaces outside the PEC, pass-through chambers, and floors. [USP 797 Section 7] *As above*	Yes

CATEGORY 3 -MONTHLY SEC SPORICIDAL DISINFECTION: A sporicidal disinfectant is applied to work surfaces, pass-through chambers, storage shelving and bins, equipment outside of PEC's, sink surfaces, floors, ceilings, walls, doors, and doors frames at least once monthly. [USP 797 Section 7] *10/31/24*	Yes

P. COMPOUNDING CSPs FROM NONSTERILE COMPONENTS OR SUPPLIES – CATEGORY 2 & 3

PRESTERILIZATION ACTIVITY CONTAINMENT ENCLOSURES: Pre-sterilization procedures, such as weighing and mixing of nonsterile components, occur in ISO Class 8 or better environment (e.g., anteroom or buffer room) and are performed in single-use containment glove bags, CVEs, BSCs, or CACIs. [USP 797 Section 4.2.6] *CVE's located in ISO 7*	Yes
LOCATION OF STERILE & NONSTERILE PECs: PECs used for sterile and nonsterile compounding (e.g., pre-sterilization procedures) are placed in separate rooms unless the buffer room can maintain an ISO Class 7 classification during particulate generating activities. Co-located PECs are at least 1 meter apart and particle-generating activities are not performed during sterile compounding processes [USP 797 Section 4.2.1; USP 800 Section 5.3]	Yes
COMPONENT SOPs: Written SOPs address the selection, receipt, evaluation, handling, storage, and documentation of all CSP components including ingredients and container closures. [USP 797 Section 9.3] *AHCT-SOP-0074 'Active and Inactive Ingredient Selection' & AHCT-WI-0047 'Receiving Inventory'*	Yes
COMPONENT QUALITY & COA: APIs and components comply with the criteria in the USP-NF (if one exists for inactive components) and have a COA including specifications and test results showing the API or component meets expected quality. APIs and other components labeled "not for pharmaceutical use", "not for injectable use", "not for human use", or equivalent are not used in CSPs. [USP 7 Section 9.3.1] *Not currently compounding-will be USP NF*	Yes
API MANUFACTURERS: APIs are manufactured by an FDA-registered facility in the U.S. or comply with the laws and regulations of the applicable regulatory jurisdictions outside of the U.S. [USP 797 Section 9.3.1] *Ex Baclofen USP from Letco COA from Medilux*	Yes
STERILE, DEPYROGENATED SUPPLIES: Supplies in direct contact with CSPs are sterile and depyrogenated. A COA or similar conformance documentation is reviewed. [USP 797 Section 9.3.1] *Syringes are BD/Mckesson, Vials are purchased sterile, tubing confirmed to be sterile*	Yes
COMPONENT RECEIPT: Upon receipt, the external packaging of components is examined and components of unacceptable quality or showing deterioration are promptly labeled as rejected and segregated from active stock. [USP 797 Section 9.3.2] *No API noted at this location at this time*	N/A
COMPONENT EXPIRATION DATING: Upon receipt, APIs and components are inspected for a visible manufacturer expiration date. Components lacking expiration dates are assigned an expiration date no more than 1 year after receipt and both the data of receipt and facility assigned expiration date is clearly marked on the component packaging. [USP 797 Section 9.3.2] *No API at this location*	N/A
COMPONENT EVALUATION BEFORE USE: All components are reinspected before use to ensure correct identify, appropriate quality, within expiry date, have been stored under appropriate conditions. [USP 797 Section 9.3.3] *AHPS generates a barcode for the API used in the compound*	Yes

Q. STERILIZATION OF CSPs - CATEGORY 2 & 3

CSP Sterilization Overview	Yes
STERILIZATION METHOD(S) APPROPRIATENESS: Sterilization method(s) used do not degrade CSP physical and chemical stability (e.g., affecting its strength, purity, or quality) or packaging integrity. [USP 797 Section 10] *Sterilization by filtration*	Yes
STERILITY ASSURANCE LEVEL (SAL) FOR TERMINAL STERILIZATION METHODS: Terminal sterilization method(s) (e.g., steam, dry heat, or irradiation) achieve a SAL or PNSU (probability of a nonsterile unit) of (0.000001) [USP 797 Section 10] *Has not formally compounded by terminal sterilization*	N/A
STERILIZATION OF INJECTABLES WITHIN 6 HOURS OF COMPLETION: Injectable CSPs containing nonsterile components or that come into contact with nonsterile devices (e.g., containers, tubing) during compounding are sterilized within 6 hours of completion. [USP 797 Section 10]	N/A
STERILIZATION SOPs include: 1) A description of terminal sterilization and depyrogenation process(es) used in the preparation of CSPs and/or compounding equipment, including the temperature, pressure (if applicable), duration, permissible load conditions for each cycle, and the use of biological indicators and endotoxin challenge vials (ECVs). 2) Personnel training and competency assessment on sterilization and depyrogenation methods and equipment used by the facility. 3) Schedule and method for establishing and verifying the effectiveness of methods selected. 4) Methods for maintaining and cleaning the sterilizing and depyrogenation equipment. [USP 797 Section 10] *No BI's at location yet, but will follow AHCT-WI-0019 'Use of the Tuttnauer Autoclave'*	N/A
CSP Sterilization by Filtration	Yes
STERILIZING FILTERS: Sterilizing filters used are sterile, depyrogenated, have a nominal pore size of 0.22 µm or smaller, and are appropriate for pharmaceutical use. Sterilizing filters are certified by the manufacturer to retain at least 10,000,000 microorganisms of a strain of Brevundimonas diminuta per square centimeter of upstream filter surface araa. Filters ere chemically and physically compatible with all ingredients in the CSP (e.g., water-miscible alcohols may damage filter integrity); chemically stable at the pressure and temperature conditions that will be used; and have enough capacity to filter the required volumes. [USP 797 Section 10.2] *Saint Gobain PES filters*	Yes
BUBBLE POINT TESTING: Sterilizing filters are subjected to the manufacturers' recommended integrity testing, such as a post-use bubble point test. If multiple filters are required for the compounding process, each of the filters passes a filter-integrity test. [USP 797 Section 10.2] For failed BP testing, CSP is discarded or, after investigating, refiltered not more than one time. [USP 797 Section 10.2] *Has not compounded- reviewed media fill CR*	N/A
CSP PREFILTRATION: When CSPs are known to contain excessive particulate matter, prefiltration is performed using a filter of larger nominal pore size (e.g., 1.2 µm) or a separate filter of larger nominal pore size placed upstream of (i.e., prior to) the sterilizing filter. [USP 797 Section 10.2] *Has not compounded CS Intrathecals-awaits DEA permit*	N/A
CSP Sterilization by Steam	Yes
STEAM STERILIZATION CYCLES: Sterilization cycles allow for an exposure duration that includes sufficient time for the entire contents of the CSP to reach and remain at the sterilizing temperature during the duration of the sterilization period. Items are placed in the autoclave to allow steam to reach CSPs without entrapment of air. [USP 797 Section 10.3] *Not currently compounding but when DEA permit received, pharmacy plans on sterilizing aqueous solutions such as Hydromorphone for IT use. Pharmacy has a validation from a previous location for 3P Autoclave from June 26, 2024*	N/A
BIOLOGICAL INDICATOR USE: The effectiveness of steam sterilization is verified and documented with each sterilization run or load by using appropriate biological indicators (e.g., spores of Geobacillus stearothermophilus) and other confirmation methods. [USP 797 Section 10.3] *per policy AHCT-WI-0019 'Use of Tuttnauer Autoclave' chemical indicator 3M Comply used, has not initiated compounding*	N/A

CSP PREFILTRATION: Immediately before filling containers that will be sterilized via steam, CSP solutions are passed through a filter with a nominal pore size of not larger than 1.2 µm for removal of particulate matter. [USP 797 Section 10.3] *Sterilize twice aseptically and terminally for Intrathecals*	N/A
AUTOCLAVE WATER SOURCE: The steam supplied in the autoclave is generated using water per the manufacturer's recommendation. [USP 797 Section 10.3] *Distilled water*	Yes
CALIBRATED DATA RECORDER: A calibrated data recorder or chart is used to monitor each cycle and to examine for cycle irregularities (e.g., deviations in temperature or pressure). [USP 797 Section 10.3] *Will be in binders*	N/A
CSP Sterilization by Dry Heat	No
DRY HEAT STERILIZATION CYCLES: Dry heat sterilization cycles allow for an exposure duration that includes sufficient time for the entire contents of CSPs and other items to reach and remain at the sterilizing temperature for the duration of the sterilization period. [USP 797 Section 10.4]	N/A
CSP PREFILTRATION: Immediately before filling ampules and vials that will be sterilized by dry heat, CSP solutions are passed through a filter with a nominal pore size of not larger than 1.2 µm for removal of particulate matter. [USP 797 Section 10.4]	N/A
CALIBRATED DATA RECORDER: The calibrated oven is equipped with temperature controls and a timer. A calibrated data recorder or chart is used to monitor each cycle and the data is reviewed to identify cycle irregularities (e.g., deviations in temperature or exposure time). [USP 797 Section 10.4]	N/A
BIOLOGICAL INDICATOR USE: The effectiveness of the dry heat sterilization method is verified and documented with each sterilization run or load using appropriate biological indicators (e.g., spores of Bacillus atrophaeus) and other confirmation methods (e.g., temperature-sensing devices). [USP 797 Section 10.4]	N/A

R. DEPYROGENATION OF EQUIPMENT - CATEGORY 2 & 3

DEPYROGENATION SOPs include: 1) A description of terminal sterilization and depyrogenation process(es) used in the preparation of CSPs and/or compounding equipment, including the temperature, duration, permissible load conditions for each cycle, and the use of biological indicators and endotoxin challenge vials (ECVs). 2) Personnel training and competency assessment on sterilization and depyrogenation methods and equipment used by the facility. 3) Schedule and method for establishing and verifying the effectiveness of methods selected. 4) Methods for maintaining and cleaning the sterilizing and depyrogenation equipment. [USP 797 Section 10] *IQ/OQ/PQ binder outlines the oven validation cycles*	Yes
DEPYROGENATION CYCLE: Dry heat depyrogenation is used to render glassware, metal, and other thermostable containers and components pyrogen free. The exposure period includes sufficient time for items to reach the depyrogenation temperature; items remain at the depyrogenation temperature for the duration of the depyrogenation period. [USP 797 Section 10.1]	N/A
DEPYROGENERATION VIA RINSING: Non-thermostable items are depyrogenated by multiple rinses with sterile, nonpyrogenic water (e.g., Sterile Water for Injection or Sterile Water for Irrigation) and then thoroughly drained or dried immediately before use in compounding. [USP 797 Section10.1]	Yes
ENDOTOXIN CHALLENGE VIAL (ECV) USE: The effectiveness of the dry heat depyrogenation cycle(s) is established initially and verified annually using ECVs to demonstrate the cycle achieves a greater than or equal to 3-log endotoxin reduction. The effectiveness of the depyrogenation cycle is re-established if there are changes to the depyrogenation cycle. Cycle verifications are documented. [USP 797 Section 10.1] *Verified from ARL to demonstrate a 6.1 log reduction 6-19-24 - in Endotoxins using Charles River ECV's*	Yes

S. MASTER FORMULATION AND COMPOUNDING RECORDS – ALL CATEGORIES

MASTER FORMULATION RECORD (MFR): A MFR is created for all CSPs prepared from nonsterile ingredient(s) or CSPs prepared for more than one patient. [USP 797 Section 11.1]	Yes
MFR MODIFICATIONS: Any changes or alterations to an MFR are approved and documented per facility's SOPs. [USP 797 Section 11.1] *Designated team member-Supervising Pharmacist or designee*	Yes
MFR DOCUMENTATION: An MFR includes at least the following: 1) Name, strength or activity, and dosage form of the CSP; 2) Identities, amounts of all ingredients, and, if applicable, relevant characteristics of components; 3) Type and size of container closure system(s); 4) Complete instructions for preparing the CSP including equipment, supplies, a description of the compounding steps, and any special precautions; 5) Physical description of the of the final CSP; 6) BUD and storage requirements; 6) Stability reference; 7) Quality control procedures; 8) other information as needed to describe the compounding process and ensure repeatability. [USP 797 Section 11.1 (Box 9)] *Please indicate sterile bags*	Yes
COMPOUNDING RECORD (CR): A CR is created for all Category 1, Category 2, and Category 3 CSPs. A CR is created for immediate-use CSPs prepared for more than one patient. [USP 797 Section 11.2]	Yes
CR DOCUMENTATION: A CR includes at least the following: 1) Name, strength or activity, and dosage form of the CSP; 2) Date and time of preparation of the CSP; 3) Assigned internal identification number (e.g., prescription, order, or lot number); 4) A method to identify the individuals involved in the compounding process and individuals verifying the final CSP; 5) Name of each component; 6) Vendor, lot number, and expiration date for each component for CSPs prepared for more than one patient and for CSPs prepared from nonsterile ingredient(s); 7) Weight or volume of each component; 8) Strength or activity of each component; 9) Total quantity compounded; 10) Final yield; 11) Assigned BUD and storage requirements; 12) Results of QC procedures. And, if applicable, 13) MFR reference for the CSP; and 14) Calculations made to determine and verify quantities and/or concentrations of components. [USP 797 Section 11.2 (Box 10)]	Yes
STERILIZATION CYCLE DOCUMENTATION: The date, run, and load numbers of the steam or dry heat sterilizer used to sterilize a CSP are documented on the CR if applicable. [USP 797 Sections 10.3 & 10.4] *Run is documented on the CR-which are housed in the log books*	Yes

T. RELEASE INSPECTION AND TESTING – ALL CATEGORIES

RELEASE TESTING PROCEDURES: All release testing procedures (e.g., visual inspections and testing) are included in facility documentation such as MFRs and SOPs. [USP 797 Section 12] *AHCT-SOP-0097 'Sterile Compounding Finished Preparation Testing'*	Yes
VISUAL INSPECTION: CSPs are visually inspected before release and dispensing to determine whether the 1) physical appearance of the CSP is as expected (e.g., free of inappropriate visible particulates or other foreign matter, discoloration, or other defects), 2) container closure integrity is intact (e.g., checking for leakage, cracks in the container, or improper seals), 3) CSP and its labeling match the prescription or medication order. [USP 797 Section 12.1] *Section 6.4 of above SOP*	Yes
DELAYED DISPENSING VISUAL INSPECTION: When CSPs are not released or dispensed on the day of preparation, a visual inspection is conducted immediately before its release to ensure the CSP is free from any defects such as precipitation, cloudiness, or leakage, which could develop during storage. [USP 797 Section 12.1] *per QA 3 procedure AHCT-WI-0006 'QA3-AHPS'*	Yes

CSP REJECTION & QUARANTINE: CSPs found to be of unacceptable quality (e.g., observed defects) are promptly rejected, clearly labeled as rejected, and segregated from active stock. [USP 797 Section 12.1] *Not currently compounding to dispense*	Yes
INVESTIGATION OF OOS RESULTS: Out-of-specifications results and defects indicating sterility or stability problems are investigated to determine the root cause and a corrective action plan is implemented and documented per facility SOPs. [USP 797 Section 12 & 12.1] *New business*	Yes

U. CSP HANDLING, STORAGE, PACKAGING, SHIPPING, & TRANSPORT – ALL CATEGORIES

STORAGE AREA TEMPERATURE MONITORING: Temperature in CSP & component storage areas is monitored at least once daily and recorded on a log on days when the facility is open or by a continuous temperature recording device; temperature data is readily retrievable. Monitoring equipment is calibrated or verified for accuracy as recommended by the manufacturer or every 12 months. [USP 797 Sections 9.3 & 19.1] *Next due 7/2025*	Yes
TEMPERATURE EXCURSIONS: When CSPs have been exposed to temperature excursions above or below storage temperature limits for the CSP, a Designated Person determines whether the CSP has retained its integrity or quality. CSPs are discarded if the impact of the excursion cannot be determined. [USP 797 19.1]	Yes
CSP PACKAGING: CSP packaging and shipping materials are selected to protect CSPs from damage, leakage, contamination, degradation, adsorption and prevent inadvertent exposure to transport personnel. [USP 797 Section 19.2]	Yes
SHIPPING & TRANSPORTING: Modes of transport are selected that are expected to deliver properly packaged CSPs in an undamaged, sterile, and stable condition. Special handing instructions are provided and/or affixed to the exterior of the container when applicable. [USP 797 Section 19.2] *per AHCT-SOP-0016 'Quality Assurance Program'*	Yes

V. STERILE QUALITY PROGRAM, SOP's & DOCUMENTATION- ALL CATEGORIES

QA/QC PROGRAM & SOPs: A Quality Assurance (QA) and Quality Control (QC) program is documented in facility SOPs and formally establishes a system of 1) adherence to procedures, 2) prevention and detection of errors and other quality problems, 3) evaluation of complaints and adverse events, and 4) appropriate investigations and corrective actions. The QA/QC SOPs describe the roles, duties, and training of personnel responsible for each aspect of the QA program. [USP 797 Section 18] *AHCT-WI-0049 'Sterile Premix (Batches) Activation-Release Instructions'*	Yes
INVESTIGATIONS & CAPAs: A designated person(s) follows up to ensure investigations are conducted and corrective actions are taken if problems, deviations, failures, or errors are identified or when complaints or adverse reactions are reported. A complete record of each reported complaint and adverse reaction is created and retained. Investigations and corrective actions are documented. [USP 797 Sections 17, 18.2, & 18.3] *Documented in Master Control AHCT-SOP-0018 'CAPA'*	Yes
ADR & COMPLAINT DOCUMENTATION: A complete record of each reported complaint and adverse reaction is created and retained per USP 797. [USP 797 Section 18.1] *AHCT-SOP-0016 'Quality Assurance Program'*	Yes
RECALL PROCEDURES & SOP: If CSPs are dispensed or administered before the results of release testing are known, procedures are in place to immediately notify the prescriber of a failure of specifications with a potential to cause patients harm; determine the severity of the problem and urgency for implementation/completion of recall; identify patients (or other points of distribution) who have received affected CSP; recall any unused dispensed CSPs; quarantine remaining stock in the pharmacy; investigate if other lots are affected and recalled if needed; conduct investigation and document reason for the failure. [USP 797 Section 18] *Section 15 of above policy*	Yes
RECALL REPORTING: Recalls are reported to the appropriate regulatory body as required by the laws end regulations of the applicable regulatory jurisdiction. [USP 797 Section 18.1]	Yes
ANNUAL QA/QC REVIEW: The overall QA/QC Program is reviewed at least once every 12 months by the Designated Person(s); the review is documented, and corrective actions are taken if needed. [USP 797 Section 18] *New business-see Form 107*	Yes
ANNUAL SOP REVIEW: Facility sterile compounding SOPs are reviewed every 12 months by the Designated Person(s); the review is documented. Changes to SOP are made only by the Designated Person and documented. Acknowledgement of revisions to SOP's are communicated to all personnel. [USP 797 Section 17] *New business Ongoing-different dates-please document Designated Person -per SOP 0001 'Policy on Policies'*	Yes
STERILE SOPs: Facility maintains SOPs covering all aspects of the sterile compounding process and other support activities. [USP 797 Section 17]	Yes
STERILE COMPLIANCE DOCUMENTATION: Facility has and maintains written or electronic documentation to demonstrate compliance with requirements in this chapter. [USP 797 Section 20] *Has not formally initiated compounding yet*	Yes
DOCUMENTATION RETENTION: Documentation complies with all laws and regulations of the applicable regulatory jurisdiction. Records are legible and stored in a manner that prevents their deterioration and/or loss. All required documentation for a particular CSP is readily retrievable for at least 4 years after preparation. [USP 797 Section 20]	Yes

W. HAZARDOUS DRUG HANDLING & COMPOUNDING – ALL CATEGORIES

DESIGNATED PERSON: The entity has a Designated Person who is qualified and trained to be responsible for implementing appropriate HD procedures, overseeing compliance with USP 800 requirements, ensuring environmental control of the storage and compounding areas, monitoring HD facility operations, testing, and acting on results. [USP 800 Section 4]	
HAZARD COMMUNICATION PROGRAM (HCP): Facility has SOPs to ensure effective training regarding proper labeling, transport, storage, and disposal of HDs and use of Safety Data Sheets. The HCP and HD SOPs include a written plan describing 1) how USP 800 requirements are implemented, 2) HD chemical container labeling with the identity of the material and appropriate hazard warnings, 3) readily accessible location of HD chemical SDSs known and accessible by all personnel, 4) HD risk training and information provided to all personnel with HD exposure risk before initial HD handling work assignment and whenever hazard changes, 5) personnel of reproductive capability written acknowledgement of understanding of HD handling risks. [USP 800 Section 8]	
ASSESSMENT OF RISK: All HD drugs follow the requirements of USP 800 unless an assessment of risk (AOR) is performed. If an assessment of risk approach is taken, the entity must document what alternative containment strategies and/or work practices are being employed for specific dosage forms to minimize occupational exposure. The AOR is reviewed at least every 12 months and minimally contains the type of HD, dosage form, risk of exposure, packaging, and manipulation. [USP 800 Section 2]	
LIST OF HAZARDOUS DRUGS: Facility maintains a list of HDs that includes any items on the current NIOSH that the entity handles. The list is reviewed every 12 months and whenever a new agent or dosage form is used. [USP 800 Section 2]	
CONTAINMENT REQUIREMENTS: All antineoplastic HDs requiring manipulation and HD activa pharmaceutical ingredients (APIs) on the NIOSH list follow all the requirements of USP 800. [USP 800 Section 2, Box 1]	

HD HANDLING SOPs: SOPs are created and maintained for the safe handling of HDs used by the facility. SOPs are reviewed annually; review is documented, and any revisions are communicated to personnel handling HDs. [USP 800 Section 17]	
HD HANDLING AREAS, SIGNAGE, & ACCESS: Signage designating HD handling areas are prominently displayed and access to HD handling areas is restricted to authorized personnel. Designated areas are available for receipt, unpacking, and storage of HDs; and sterile HD compounding. [USP 800 Section 5]	
HD RECEIPT: There is a designated area for the receipt of antineoplastic HDs or API's that is neutral/normal or negative pressure relative to surrounding areas. HDs are not unpacked from external shipping containers in sterile compounding areas or in positive pressure areas. HDs are delivered immediately after unpacking to HD storage area. [USP 800 Section 5.1]	
HD RECEIVING SOPs: Facility SOPs for receiving HDs that include required PPE during HD receiving and handling, a tiered approach to assessing HD packaging and shipping containers for signs of damage or breakage (e.g., visible signs of leakage, sounds of broken glass), management of known or suspected damaged HD containers, and transport to HD storage location(s) for nondamaged containers. [USP 800 Section 10]	
HD STORAGE: HDs are stored to prevent spillage or breakage, off floors, and in areas appropriate for natural disasters. Antineoplastic HDs and HD API are stored separately from non-HDs to prevent contamination and personnel exposure. HD storage areas are externally ventilated and negative-pressure rooms with at least 12 ACPH. [USP 800 Section 5.2]	
HD REFRIGERATED STORAGE: Refrigerated antineoplastic HDs are stored in a dedicated refrigerator, in a negative pressure area with at least 12 ACPH. Pass through refrigerators are not used. [USP 800 Section 5.2]	
STERILE HDs COMPOUNDED IN A C-SCA: C-SCA mainteins a minimum of 12 ACPH of HEPA- filtered air and has negative pressure to adjacent areas of -0.01" w.c. to -0.03" w.c. [USP 800, sections 5.3.2 Table 3]	
C-SEC DESIGN AND ENGINEERING CONTROLS: The C-SEC has fixed walls physically separated from other preparation areas, is externally ventilated , and has 30 ACPH. [USP 800 Section 5.3.2 Table 3]	
C-SEC DESIGN AND PRESSURE DIFFERENTIALS: The C-SEC has negative pressure to adjacent areas of -0.01" w.c. to -0.03" w.c. [USP 800 Sections 5.3.2 Table 3]	
C-SEC ACCESS VIA ANTE ROOM: The classified area used for entry into the negative pressure buffer room has fixed walls and maintains a minimum of 30 ACPH of HEPA-filtered air, positive pressure of +0.02" w.c. to all adjacent unclassified areas, and ISO7 or better classification. [USP 800 Section 5.3.2]	
C-SEC ACCESS VIA NON-HD BUFFER: A negative-pressure HD buffer entered exclusively through a non-HD buffer room contains a line of demarcation (LOD) within the negative-pressure buffer room for donning/doffing HD PPE and a method a transport of HDs, HD CSPs, and HD waste into and out of the HD buffer (e.g., pass-through chamber). Pass through chambers are included in semi-annual facility certification. [USP 800 Section 5.3.2]	
C-SEC SINK & SAFETY EQUIPMENT: A sink is available for hand washing and an eyewash station and/or other emergency safety precautions meeting applicable laws and regulations are readily available and located where operation does not interfere with ISO classifications. Sinks are located at least 1 meter from the entrance into the buffer room (or at least 1 meter from the C-PEC in a C-SCA). [USP 800 Sections 5.3 & 5.3.2]	
C-PEC LOCATION AND VENTING: All C-PECs used for sterile HD compounding (e.g., CACIs or BSCs), are located within a C-SEC or C-SCA, externally vented, and maintain an ISO 5 or better air quality. [USP 800 Section 5.3.2]	
C-PEC OPERATION & OUTAGES: C-PECs operate continuously if supplying some or all the negative pressura in the C- SEC or if used for sterile compounding. During power outages, repairs, or relocation, C-PEC use is suspended immediately. Once C-PEC power is restored, all PEC surfaces are decontaminated, cleaned, and disinfected, and compounding is not resumed until the manufacturer's specified recovery time has elapsed. [USP 800 Section 5.3]	
REQUIRED HD PPE: When compounding HDs, gowns, head, hair, shoe covers, and two pairs of chemotherapy gloves are donned per facility SOPs. For all other HD handling activities, including HD receipt, storage, transport, cleaning activities, spill control, and waste disposal, facility SOPs define the required PPE based on the OSP and AOR. Disposable PPE is not reused; reusable PPE is decontaminated and cleaned after each use. [USP 800 Section 7]	
GLOVES: Chemotherapy gloves are tested to ASTM standard D6978 (or its successor) and are powder free. Gloves are inspected for physical defects. Gloves are changed when torn, punctured, or contaminated. Personnel wash hands with soap and water after removing gloves. [USP 800 Section 7.1]	
GOWNS: HD gowns are disposable, resistant to permeability by HDs, close in back, ara long sleeved, closed cuff, and seamless. Gowns are changed per manufacturer's permeation information; if no data is available, HD gowns are change every 2-3 hours or immediately after a spill or splash. Gowns are limited to HD handling areas and are donned over the sterile compounding frock. [USP 800 Section 7.2, USP 797 Section 3.3]	
SHOE COVERS: When compounding, a second pair of shoe covers is donned before entering the C-SEC and doffed when exiting the C-SEC. [USP 800 Section 7.3]	
EYE AND FACE PROTECTION: Appropriate eye (goggles) and face protection (face shield) are worn when there is a risk for spills or splashes or when working outside of a C-PEC. Surgical masks are not used when respiratory protection is required per SOP and/or AOR as protection from HD exposure. [USP 800 Section 7.4]	
PPE DISPOSAL: HD PPE is disposed of appropriately prior to exiting the C-SEC. Chemotherapy gloves and sleeve covers (if used during compounding) are carefully removed and discarded immediately into an appropriate waste container inside of the C-PEC or contained in a sealable bag for discarding outside of the C-PEC. [USP 800 Section 7.6]	
INITIAL HD TRAINING & COMPETENCY: Personnel who handle HDs are trained and demonstrate competency per their job function before independently handling HDs and when a new HD medication, process, SOP, or equipment is introduced. Training minimally includes an overview of the entity's HD list and their risks; review of HD SOPs; proper use of PPE, equipment, and devices; prevention of HD exposures and spills; HD exposure and spill response; use of a spill kit, PPE, and NIOSH-certified respirators; and HD disposal. Based on job duties, personnel receive additional HD training in HD acquisition and receipt, preparation, compounding, dispensing, labeling, storage, and transport. Training and competency assessments are documented. [USP 800 Sections 8, 9, 11.1, 16, & 17]	
ONGOING HD COMPETENCY ASSESSMENT: HD handling competencies are reassessed and documented at least every 12 months. [USP 800 Section 9]	
HD ATTESTATION: Personnel of reproductive capability have a written acknowledgement attesting to their understanding of HD handling risks. [USP 800 Section 8]	
BUDs OF STERILE HDs COMPOUNDED IN A C-SCA: BUDs and storage conditions are in accordance with USP 797 requirements for Category 1. HD CSPs compounded in a C-SCA are prepared from only sterile starting components. [USP 800 Section 5.3.2] CSTDs are used as a supplemental engineering control only. [USP 800 Section 5.3 and Table 3]	
BUDs OF STERILE HDs COMPOUNDED IN A C-SEC: BUDs and storage conditions in accordance with USP 797 requirements for Category 2, or Category 3 CSPs. [USP 800 Section 5.3.2]	
NONSTERILE-TO-STERILE HD COMPOUNDING: HD CSPs compounded from nonsterila starting components are compounded inside a sterile suite. [USP 800 Section 5.3.2]	
DEDICATED HD EQUIPMENT: Disposable or cleanable equipment for compounding (e.g., mortar and pestle, gradualed cylinder, spatulas) is dedicated for use with HDs. [USP 800 Section 13]	

NON-HD COMPOUNDING IN A C-PEC: Non-HDs compounded in a HD C-PEC are placed in protective outer wrapping, labeled for PPE handling precautions, and treated as an HD. [USP 800 Section 5.3.2 and Table 3]	
D/D/C/D SOPs: Written procedures for decontamination, deactivation, cleaning, and disinfection are available and followed. Cleaning of sterile compounding areas also complies with USP 797 requirements. Procedures include agents used, dilutions (if used), frequency, and documentation requirements. [USP 800 Section 15]	
DEACTIVATION, DECONTAMINATION, CLEANING & DISINFECTION (D/D/C/D): All areas where HDs are handled (receiving, compounding, transport, administering, disposal) and all reusable equipment and devices are deactivated/decontaminated, cleaned, and then disinfected. [USP 800 Section 15]	
TRAINING OF D/D/C/D: Personnel are trained in deactivation/decontamination, cleaning, and disinfection to protect themselves and the environment from contamination. [USP 800 Section 15]	
PPE DONNED DURING D/D/C/D: Personnel wear appropriate PPE resistant to cleaning agents used, including 2 pairs of ASTM-tested chemotherapy gloves and impermeable disposable gowns. Eye protection and face shields are worn if splashing may occur. Respiratory protection is used if warranted. [USP 800 Section 15]	
D/D/C/D AGENTS USED: Agents selected are appropriate for the type of HD contamination(s), location, and surface materials. Sterile 70% IPA is used to remove residue left on sterile surfaces and compounding areas by decontaminating agents. [USP 800 Section 15 & 15.4]	
DECONTAMINATION DURING COMPOUNDING: C-PEC is decontaminated at least daily (when used), after as spill, before and after certification, voluntary interruption, or if ventilation tool is removed. The C-PEC worksurface is decontaminated between compounding of different HDs. [USP 800 Section 15.2]	
MONTHLY UNDERTRAY CLEANING: Area under the work tray of a C-PEC is deactivated, decontaminated, and cleaned at least monthly. [USP 800 Section 15.2]	
DISPOSAL OF D/D/C/D CLEANING SUPPLIES: Disposable cleaning supplies are discarded per EPA regulations and facility SOPs. [USP 800 Section 15]	
LABELING, PACKAGING, TRANSPORT SOP: Facility has SOP for the labeling, handling, packaging, and transport of HDs addressing the prevention of spills/exposures, training for exposure, and spill kit use. The SOP describes appropriate shipping containers and insulating materials for transport based on product specifications (e.g., required storage conditions), transport vendors, and mode of transport. [USP 800 Section 11 & 11.2]	
HD LABELING: HD CSPs are identified as hazardous and labeled with special handling precautions. Labeling process for compounded HD products does not introduce contaminated materials into non-HD areas. [USP 800 Sections 11.1 & 13]	
PACKAGING: Packaging materials and containers that maintain the physical integrity, stability, and sterility of HDs during transport. Packaging protects HDs from damage, leakage, contamination, and degradation, while protecting healthcare workers who transport HDs. [USP 800 Section 11.2]	
TRANSPORT: HDs that are transported are labeled, stored, and handled according to regulations, facility SOPs, and in containers that minimize risk of breakage or leakage. Pneumatic tubes are not used to transport liquid or antineoplastic HDs. [USP 800 Section 11.3]	
HD SPILL SOP: Facility has an SOP to prevent spills. The SOP directs the management and cleanup of suspected or known damage to or spills of HDs upon receipt, storage, handling, compounding, packaging, and transport. SOP addresses appropriate response based on factors such as the size, scope, and who is responsible for cleanup. SOP states the location and capacity of kits and immediate steps that should be taken to evaluate and address personnel exposure, secure spill area, and minimize exposure risk to other personnel. [USP 800 Section 16]	
SPILL KITS, & SINGAGE: Spill kits are readily available with appropriate supplies, PPE, and signs to restrict access to affected areas. restriction posted, and documentation of spills occur when needed. [USP 800 Section 16]	
SPILL CLEAN UP & DOCUMENTATION: Spills are contained and cleaned immediately only by qualified personnel with appropriate PPE. After cleanup is complete, spill circumstances and management are documented. Qualified personnel are available at all times while HDs are being handled. [USP 800 Section 16]	
DISPOSAL REGULATION COMPLIANCE: Disposal of HD waste, including unused HDs and trace-contaminated PPE and materials, is performed by trained and appropriately garbed personnel and complies with federal, state, and local regulations. [USP 800 Sections 11.4 & 17]	

X. LYOPHILIZATION

Sterile preparations prepared for lyophilization are maintained in ISO 5 unidirectional laminar flow air throughout sterilization, filling, and transport to the lyophilizer. [64B16-27.797(5) F.A.C.]	
A recorded smoke study is available and demonstrates that transport from the PEC to the lyophilizer is accomplished in ISO 5 laminar flow air at all times. [64B16-27.797(5) F.A.C.]	
The pharmacy has established and follows policies and procedures for the high-level disinfection of the lyophilizer chamber, piping, and all other areas of the unit which pose a potential risk for contamination of the product. [64B16-27.797(5) F.A.C.]	
The pharmacy validated the high-level disinfection procedure initially, and after changes to the cleaning process or agents. Documentation of studies is available for inspection. [64B16-27.797(5) F.A.C.]	
Validation studies for high level disinfection are performed with the 5-aerobic bacterial and fungal ATCC organisms referenced in USP<71> are conducted by an external vendor unless the firm has an internal laboratory capable of performing the studies. An internal laboratory is separate from the compounding and work areas of the pharmacy to prevent contamination in the pharmacy. [64B16-27.797(5) F.A.C.]	
Policies and procedures are established and followed for cleaning the lyophilizer prior to disinfection and include cleaning agents and schedules. Documentation of cleaning is maintained and available for inspection. [64B16-27.797(5) F.A.C.]	
Policies and procedures are established for the maintenance of the lyophilizer and at a minimum include the manufacturers recommendations. [64B16-27.797(5) F.A.C.]	
The maintenance schedule includes provisions for periodic testing of the chamber for leaks and all other recommended procedures described by the equipment manufacturer. Documentation of routine maintenance is available for inspection. [64B16-27.797(5) F.A.C.]	
SOPs and quality assurance program established to include validation of the filling process, container closure integrity, frequent monitoring of fill volumes, identification of over fills and underfills, assessment of personnel involved in compounding for lyophilization, equipment qualification, formula verification, and evaluation of finished product for conformance to specifications. [64B16-27.797(5) F.A.C.]	
The pharmacy has provisions for sterilizing, with filters, the inert gas or air used for backfilling during the vacuum release phase. These Sterilizing filters undergo the manufacturers recommended integrity test. [64B16-27.797(5) F.A.C.]	
Media fills are conducted every six months using the maximum batch size and demonstrate the filling, transport to the lyophilizer, loading and stoppering operations. Media is NOT frozen during the media fill operation. [64B16-27.797(5) F.A.C.]	
Personnel preparing sterile compounds for lyophilization wear sterile Personal Protective Equipment that covers all exposed skin. [64B16- 27.797(5) F.A.C.]	
Glove Fingertip Sampling is performed with every batch after fill and transport into the lyophilizer on all personnel compounding for lyophilization. The results are incorporated into the batch record. [64B16-27.797(5) F.A.C.]	

In-process acceptance criteria such as color, moisture limits and visual appearance are established for each lyophilized product. [64B16- 27.797(5) F.A.C.]	
A 100% visual examination of the finished product is conducted to determine that the product conforms to the established visual criteria and is incorporated into the batch record. [64B16-27.797(5) F.A.C.]	
Finished product testing is conducted on all batches. Procedures have been established for selecting test samples from the batch and are written and followed. Such procedures may include location of vials in the lyophilizer and positions in the fill line. [64B16-27.797(5) F.A.C.]	
Finished product testing includes sterility testing using a USP<71> method unless an alternative test method has been validated and shown to be equivalent or better. Diluents used to reconstitute the sample vials for testing are preservative free. [64B16-27.797(5) F.A.C.]	
Each batch of lyophilized product with a beyond use date that falls within the USP<797> guidelines and is not tested for starility, has viable air and surface sampling that is collected in critical areas of ISO 5 locations as well as sampling of the gloves and sleeves of personnel documented in the batch record. [64B16-27.797(5) F.A.C.]	
Every lyophilized product has established endotoxin levels Each batch of lyophilized product is tested for endotoxin in accordance with USP<85> and confirmed to fall within the set limits and documented in the batch record. [64B16-27.797(5) F.A.C.]	
Potency, radiochemical purity, or applicable test to assure label claim is conducted on every batch and documented in the batch record. In lieu of potency testing, weight-based verification may occur based on formula verification. Potency testing shall be based on the USP monograph if one is available. [64B16-27.797(5) F.A.C.]	

Y. SPECIAL PARENTERAL ENTERAL & EXTENDED SCOPE

Technicians properly identified. [64B16-27.100 (2) F.A.C.]; [64B16-27.4001 F.A.C.]; [64B16-27.410 F.A.C.]; [64B16- 27.420 F.A.C.].	Yes
Medication is properly labeled for dispensing to patient. [64B16-28.108(2) F.A.C.] *Has not dispensed CSP's yet*	N/A
Outdated medications removed from active stock. [64B16-28.110 F.A.C.]; [64B16-28.1191 F.A.C.] *No API at this location yet*	N/A
Continuous Quality Improvement Program described in the Pharmacy policy and procedure manual and quarterly summarization of Quality Related Events are available for inspection. [64B 16 27.300 F.A.C.]; [766.101 (1) (a)(I) F.S.]	Yes
Pharmacy maintains patient profile with allergy information and medications dispensed. [64B16-27.800, F.A.C.] *in AHPS*	Yes
All controlled substance prescriptions (electronic, faxed, verbal and written) contain required information. [893.04(a)(b)(c) F.S.]; [21CFR1306.05] *Awaiting DEA permit*	N/A
Prescriptions for controlled substances are on counterfeit-proof prescription pads or blanks purchased from a department-approved vendor and the quantity and date meet the requirements of [456.42(2), F.S.].	N/A
Controlled substance inventory taken on a biennial basis and available for inspection. [893.07(1)(a), F.S.] [21CFR1304.11] [21CFR1304.04] *Awaiting DEA permit*	N/A
DEA 222 forms properly completed or records of CSOS orders electronically completed, linked to the original order, archived and retrievable. [893.07(2) F.S.]; 21CFR 1305.13(e)]; [21CFR1305.22(g)] *Awaiting DEA permit*	N/A
Controlled substance records and prescription information in computer system are retrievable and maintained for 4 years. [21CFR1304.04]; [465.022(12) (a) F.S.]; [21CFR1306.22]; [64B16-28.140 F.A.C.] *New business*	N/A
Certified daily log or signed printout maintained. [21CFR1306.22(f)(3)]; [64B16-28.140(3)(d) F.A.C]	Yes
Pharmacy is reporting to the PDMP within 24 hours of dispensing controlled substance. [893.055(4) (3)(a), F.S.] *Awaiting DEA permit*	N/A
Invoices for medications purchased from a Florida licensed wholesaler/distributor are retrievable for inspection. [499.005 (14) F.S.] *No API at this time* *Contracted wholesalers will be : Letco, Fagron, Medisca, PCCA*	N/A
A special sterile products and parenteral/enteral compounding pharmacy provides telephone accessibility to its pharmacist(s) for its patients at all hours. [64B16-28.820(3)(b)] *Pharmacist on call 24/7*	Yes
A special sterile products and parenteral/enteral compounding pharmacy provides special handling and packaging of compounded parenteral and enteral preparations when delivering from the pharmacy to the patient or institution as required to maintain stability of the preparations. [64B16-28.820(3)(b)] *Nothing provided yet but policies available*	N/A

Remarks:

I have read and have had this inspection report and the laws and regulations concerned herein explained, and do affirm that the information given herein is true and correct to the best of my knowledge.

AnazaoHealth Corporation ("Anazao") is the 100% owner of Southeast Quality Pharmacy, LLC (the applicant for this new pharmacy license). Anazao operates a 503B Outsourcing Facility located in Las Vegas, Nevada.

In July 2021, Anazao entered into a settlement agreement with the Ohio Board of Pharmacy regarding an Ohio-specific licensing issue. Anazao disputed OHBOP's assertions but consented to paying $2500 fine to settle the matter. A copy of the settlement agreement is attached. This matter has been closed by OHBOP.

Anazao reported the OHBOP settlement to all states in which it is licensed, including Hawaii. The Hawaii Board of Pharmacy initiated reciprocal discipline based on the Ohio settlement. This reciprocal discipline was not initiated due to an independent or separate act by Anazao. Instead, the reciprocal discipline was based solely on the Ohio settlement. Though Anazao disagreed with HIBOP's position, Anazao consented to paying a $500 fine to settle the matter. A copy of the Settlement Agreement and Payment Receipt received from HIBOP on June 21, 2022 is attached. This matter has been closed by HIBOP.

On June 29, 2022, Anazao entered into a settlement agreement with the Maine Board of Pharmacy. Anazao changed its Maine Pharmacist in Charge effective November 2, 2020. Anazao reported that change to MEBOP on November 13, 2020, which was 10 business days following the change. The applicable Maine rule in 2020 required PIC change reporting to be completed within 7 days, whereas Anazao mistakenly understood that reporting was required within 10 days. MEBOP sought discipline based on the late PIC change report. Anazao entered into a settlement with MEBOP and remitted the attached Settlement Agreement and $250 fine. This matter was subsequently closed by MEBOP. Anazao updated its policies and retrained personnel on appropriate report timing, which is currently 10 days in Maine.

Re: Complaint No. 2022-PHA-18213

Dear Mr. Weaver:

Enclosed please find the fully executed consent agreement between you, the Maine Board of Pharmacy, and the Office of the Attorney General in the above referenced matter.

This letter also acknowledges receipt of your fine payment in the amount of $250.00. Your fine is paid in full. As all conditions of the consent agreement have been fulfilled, this complaint file is now closed.

Please feel free to contact our office at (207) 624-8651 with any questions.

Sincerely,

Jessica Gowell

BOARD OF PHARMACY

IN RE:	)	
	)	
ANAZAOHEALTH CORPORATION	)	
	)	CONSENT AGREEMENT
Case No. 2022-PHA-18213	)	

PARTIES

This document is a Consent Agreement regarding disciplinary action against the mail order prescription pharmacy license of AnazaoHealth Corporation ("AnazaoHealth") in the State of Maine. The parties to this Consent Agreement are: AnazaoHealth , the Maine Board of Pharmacy ("the Board"), and the Maine Office of the Attorney General ("the Attorney General"). This Consent Agreement is entered into pursuant to 10 M.R.S. § 8003(5-A).

FACTS

1. At all times relevant to this matter, AnazaoHealth was licensed by the Board as a mail order prescription pharmacy, license no. MO40001876, located at 7465 W Sunset Road, Suite 1200, Las Vegas, Nevada.

2. On November 1, 2020, Eric L. Sparks replaced Douglas F. Canmann as the pharmacist in charge ("PIC") of AnazaoHealth , thereby requiring AnazaoHealth to submit a Change of PIC application to the Board within 7 days after the PIC change.

3. AnazaoHealth , however, did not file a change of PIC application with the Board until November 13, 2020.

4. On April 5, 2022, Board Administrator, Geraldine Betts, filed an administrative complaint with the Board alleging that AnazaoHealth had failed to file a timely change of PIC application.

5. This administrative complaint was docketed as Case No. 2022-PHA-18213.

6. Under Board Rules Chapter 11, § 3, upon a change of PIC, a mail order prescription pharmacy must file a new application with the Board by registered mail no later than seven (7) days after the change.

7. Pursuant to the Board's delegation of authority dated November 9, 2020, which authorizes Board Staff to offer prescribed consent agreements to resolve first-time violations of PIC change notification requirements, this Consent Agreement is being offered to finally resolve Case No. 2022-PHA-18213.

8. Absent acceptance of this Consent Agreement by signing and dating it and returning it to Maine Board of Pharmacy, Complaints Division, Office of Professional and Occupational Regulation, 35 State House Station, Augusta, Maine 04333-0035 by **May 13, 2022,** the Board will resolve this matter by holding an adjudicatory hearing.

COVENANTS

9. AnazaoHealth admits to the facts as stated above and admits that such conduct constitutes grounds for discipline pursuant to 10 M.R.S. § 8003(5-A)(A)(5) for violating a rule of the Board, specifically Board Rules Chapter 11, § 3, by failing to file a new application with the Board by registered mail no later than 7 days after a change of PIC.

10. As DISCIPLINE for the violation admitted to in paragraph 9 above, AnazaoHealth agrees to accept the imposition of:

a. A WARNING; and

b. A CIVIL PENALTY in the amount of two hundred fifty dollars ($250.00). Payment of the civil penalty shall be made by check or money order payable to the "Treasurer, State of Maine" and delivered to Maine Board of Pharmacy, Compliance Division, Office of Professional and Occupational Regulation, 35

State House Station, Augusta, Maine 04333, and must be submitted with the signed Consent Agreement.

11. This Consent Agreement is not appealable and is effective until modified or terminated by the parties hereto.

12. Violation of any of the terms or conditions of this Consent Agreement by AnazaoHealth shall constitute grounds for discipline, including but not limited to modification, suspension, or revocation of licensure or the denial of licensure or re-licensure.

13. The Board and the Office of the Attorney General may communicate and cooperate regarding any matter related to this Consent Agreement.

14. This Consent Agreement is a public record within the meaning of 1 M.R.S. § 402 and will be available for inspection and copying by the public pursuant to 1 M.R.S. § 408-A.

15. Nothing in this Consent Agreement shall be construed to affect any right or interest of any person not a party hereto.

16. The Board and AnazaoHealth agree that no further agency action will be initiated against AnazaoHealth 's license by the Board based upon the specific violations admitted to herein, except or unless AnazaoHealth fails to comply with the terms and conditions of this Consent Agreement. The Board may however consider the conduct described above as evidence of a pattern of misconduct in the event that other allegations are brought against AnazaoHealth , and this Consent Agreement will be introduced as evidence in any future adjudicatory hearing involving AnazaoHealth . The Board may also consider the fact that discipline was imposed by this Consent Agreement in determining discipline in any further complaints against AnazaoHealth.

17. This Consent Agreement may be signed in counterparts, with all counterparts together constituting one original instrument. Signatures below may be applied and/or saved

electronically, and such electronic signatures will be given the same effect as a paper document signed in ink.

18. AnazaoHealth acknowledges by its duly authorized representative's signature hereto that it has had an opportunity to consult with an attorney before executing this Consent Agreement, that it executes this Consent Agreement voluntarily, and that it agrees to abide by all terms and conditions set forth herein.

RE: Notice of Hearing /Settlement Agreement

Dear Mr. Sparks,

Enclosed are two documents; review them carefully. The first document is a Notice of Opportunity for Hearing, the second is a Settlement Agreement. Your rights to an administrative hearing are set forth in the first. You may avail yourself of these rights by following the instructions therein. If you choose, you may execute the second document and resolve the issues according to the terms set forth therein. Whichever you choose, you should do so after careful consideration.

Please Note: If you choose to execute the Settlement Agreement, the document should either be scanned and emailed as a PDF to legal@pharmacy.ohio.gov or mailed to **State of Ohio Board of Pharmacy 77 South High Street, 17th Floor Columbus, Ohio 43215-6108.** The Board cannot accept photographs taken of the settlement that are then emailed; sending your document as a JPG will only delay acceptance and processing of the Settlement Agreement. The Settlement Agreement becomes effective upon the date of the Board President's signature, at which time the terms of the Settlement Agreement will also become effective, and the Board-imposed fine (if applicable) will be attached to your license.

If you have questions about your options, you may call the Board office. The office will not give you legal advice. However, we will answer questions you have about the documents.

If you have any questions or concerns, please do not hesitate to contact me.

Sincerely,

Joseph A. Koltak /pac

NOTICE OF OPPORTUNITY FOR HEARING
PROPOSAL TO TAKE DISCIPLINARY ACTION AGAINST LICENSEE

IN THE MATTER OF:

CASE No. A-2019-0262
I-2019-0500

AnazaoHealth Corporation
c/o Eric Sparks
7465 W. Sunset Rd, Suite 1200
Las Vegas, NV 89113

License No. 012481000

February 25, 2021

Dear AnazaoHealth Corporation and Eric Sparks:

You are hereby notified, in accordance with the provisions of Section 119.07 of the Ohio Revised Code the State of Ohio Board of Pharmacy (Board) proposes to take action against your license as a Wholesale Distributor of Dangerous Drugs under authority of Section 4729.56 of the Revised Code.

JURISDICTION

1. Pursuant to Section 4729.56 of the Ohio Revised Code (ORC) and the rules adopted thereunder, the Board has the authority to suspend, revoke, or refuse to renew any registration certificate issued to a wholesale distributor of dangerous drugs (WDDD) pursuant to section 4729.52 of the Revised Code or may impose a monetary penalty of forfeiture not to exceed in the severity any fine designated under the Revised Code for a similar offense or $2,500 if the acts committed have not been classified as an offense by the Revised Code.

2. AnazaoHealth Corporation has a current WDDD license with the Board under license number 01-2481000, which lists Eric Sparks as the Responsible Person.

ALLEGATIONS

1. From on or about December 20, 2015 to on or about December 20, 2018, AnazaoHealth Corporation, located at 7465 W. Sunset Rd., Suite 1200, Las Vegas, Nevada, sold dangerous drugs, including controlled substances, to entities without a TDDD license with the Board and/or to entities without the proper Category TDDD license with the Board as set forth in Attachment A, attached hereto and incorporated as though fully set forth herein. AnazaoHealth Corporation sold to the following locations:

   a. Horizons Women's Healthcare, only a Category II TDDD license, located at 627 S. Edwin C Moses Blvd, 5th Floor Suite M, Dayton, Ohio.

b. Advanced Pain and Spine Institute, no TDDD license, located at 9600 Montgomery Road, Cincinnati, Ohio.

c. Body Shapes Medical-Cincinnati, only a Category II TDDD license, located at 11147 Montgomery Road, Suite 200, Cincinnati, Ohio.

d. Women's Comprehensive Health Center, no TDDD license, located at 135 N. Ewing Street, Suite 205, Lancaster, Ohio.

POTENTIAL VIOLATIONS OF LAW

1. Such conduct as set forth in the Allegations Section, if proven, each constitutes a violation of Section 4729.51(B)(1) of the ORC, as effective September 29, 2017, no wholesale distributor shall possess for sale, sell, or distribute, at wholesale, dangerous drugs or investigational drugs or products to any person other than the following: Subject to division (D) of this section, a licensed terminal distributor of dangerous drugs, each sale being a first-degree misdemeanor, each punishable by a maximum fine of $5,000 if committed by an organization.

2. Such conduct as set forth in the Allegations Section, if proven, each constitutes a violation of Section 4729.60(A)(1) of the ORC, as effective April 6, 2017, September 29, 2017, Before a licensee identified in division (B)(1)(a) of section 4729.52 of the Revised Code may sell or distribute dangerous drugs at wholesale to any person, except as provided in division (A)(2) of this section, the licensee shall query the roster established pursuant to section 4729.59 of the Revised Code to determine whether the purchaser is a licensed terminal distributor of dangerous drugs, each punishable by a maximum fine of $2,500 if committed by an organization.

3. Such conduct as set forth in the Allegations Section, if proven, each constitutes a violation of Section 4729.60(A) of the ORC, as effective April 21, 2014 and February 1, 2016, Before a registered wholesale distributor of dangerous drugs may sell dangerous drugs at wholesale to any person, other than the persons specified in divisions (B)(1)(a) to (d), (f) to (h), and (l) to (p) of section 4729.51 of the Revised Code, such wholesale distributor shall obtain from the purchaser and the purchaser shall furnish to the wholesale distributor a certificate indicating that the purchaser is a licensed terminal distributor of dangerous drugs, each punishable by a maximum fine of $2,500 if committed by an organization.

4. Such conduct as set forth in the Allegations Section, if proven, each constitutes a violation of Rule 4729-9-12(A)(1) of the OAC, as effective October 5, 2015, Before a wholesale distributor of dangerous drugs may make a sale of a dangerous drug to a terminal distributor of dangerous drugs, the wholesale distributor must obtain a copy of the current certificate of license as a terminal distributor from the purchaser pursuant to division (A) of section 4729.60 of the Revised Code or may utilize the Board's online registry to confirm licensure, each punishable by a maximum fine of $2,500 if committed by an organization.

5. Such conduct as set forth in the Allegations Section, if proven, constitutes the following violations of Section 4729.56 of the ORC, effective September 29, 2017, each violation punishable by a maximum fine of $2,500 if committed by an organization:

a. Violating any federal, state, or local drug law; any provision of chapter 4729. or Chapter 2925., 3715., or 3719. of the Revised Code; or any rule of the Board, ORC Section 4729.56(A)(2)(b); and/or

b. Failing to satisfy the qualifications for registration under section 4729.53 of the Revised Code or the rules of the Board or ceasing to satisfy the qualifications after the registration is granted or renewed, ORC Section 4729.56(A)(2)(d); and/or

c. Any other cause for which the board may impose sanctions as set forth in rules adopted under section 4729.26 of the Revised Code, ORC Section 4729.56(A)(2)(g).

6. Such conduct as set forth in the Allegations Section, if proven, constitutes the following violations of Section 4729.56 of the ORC, effective September 29, 2015, each violation punishable by a maximum fine of $2,500 if committed by an organization:

   a. Violating any federal, state, or local drug law; any provision of this chapter or Chapter 2925., 3715., or 3719. of the Revised Code; or any rule of the Board, ORC Section 4729.56(A)(2); and/or

   b. Failing to satisfy the qualifications for registration under section 4729.53 of the Revised Code or the rules of the Board or ceasing to satisfy the qualifications after the registration is granted or renewed, ORC Section 4729.56(A)(4).

7. Such conduct as set forth in the Allegations Section, if proven, constitutes a violation of Rule 4729-9-19(A)(4) of the OAC, as effective October 5, 2015, each violation punishable by a maximum penalty of $2,500: Is not of good moral character and habits.

YOU ARE FURTHER NOTIFIED, in accordance with the provisions of Chapters 119. and 4729. of the Ohio Revised Code, that you are entitled to a hearing before the State of Ohio Board of Pharmacy, if you request such a hearing within thirty 30 days of the date of the mailing of this notice.

IF YOU DESIRE A HEARING, such request shall either be mailed to the State of Ohio Board of Pharmacy, Attn: Legal, 77 South High Street, 17th Floor, Columbus, Ohio 43215-6126 or an e-mail request may be sent to legal@pharmacy.ohio.gov (**please note faxes will not be accepted**). **YOUR REQUEST MUST BE RECEIVED ON OR PRIOR TO THE 30TH DAY FOLLOWING THE MAILING DATE OF THIS NOTICE.** Please note that if you submit a request via email, your request will be acknowledged within one business day of receipt. If you do not receive an acknowledgment, please contact the Board offices at 614-466-4143 and request the legal department. You may appear at such hearing in person, by your attorney, or by such other representative as is permitted to practice before the agency, or you may present your position, arguments or contentions in writing; and, at this hearing, you may also present evidence and examine any witnesses appearing for and against you. **If you are a corporation, you must be represented at the hearing by an attorney licensed to practice in the state of Ohio.**

YOU ARE FURTHER ADVISED that if there is no request for such a hearing received by the Board on or prior to the 30th day following the mailing of this notice, the State of Board of Pharmacy, upon consideration of the aforementioned allegations against you, may take action without such a hearing.

If you have questions regarding the Chapter 119. Administrative Hearing process, please e-mail your questions to legal@pharmacy.ohio.gov or call the Board office at 614-466-4143 and ask for the legal department.

Enclosure: Attachment A

STATE OF OHIO
BOARD OF PHARMACY

IN THE MATTER OF:

CASE NO. A-2019-0262
I-2019-0500

AnazaoHealth Corporation
c/o Eric Sparks
7465 E. Sunset Rd, Suite 1200
Las Vegas, NV 89113

License No. 01-2481000

SETTLEMENT AGREEMENT WITH THE STATE OF OHIO BOARD OF PHARMACY

This Settlement Agreement (Agreement) is entered into by the State of Ohio Board of Pharmacy (Board) and AnazaoHealth Corporation, for the purpose of resolving all issues between the parties relating to the Board investigation of illegal sales of controlled substances to unlicensed entities and entities without the proper license. Together, the Board and AnazaoHealth Corporation are referred to hereinafter as "the parties."

JURISDICTION

1. Pursuant to Section 4729.56 of the Ohio Revised Code and the rules adopted thereunder, the Board has the authority to suspend, revoke, restrict, limit, or refuse to grant or renew any license issued pursuant to Section 4729.52 of the Ohio Revised Code.

2. AnazaoHealth Corporation is a licensed Wholesaler Distributor of Dangerous Drug, License No. 01-2481000, which lists Eric Sparks, as the Responsible Person.

FACTS

1. The Board initiated an investigation of AnazaoHealth Corporation, Wholesaler Distributor of Dangerous Drugs License No. 01-2481000, related to AnazaoHealth Corporation illegal sales of dangerous drugs to unlicensed entities and entities without the proper license.

2. On or about February 25, 2021, the Board sent a Notice of Opportunity for Hearing to AnazaoHealth Corporation, which outlined the allegations and provided notice of its right to a hearing, its rights in such hearing, and its right to submit contentions in writing.

WHEREFORE, the parties desire to resolve the issues relating to the above-referenced findings without resorting to further administrative or judicial proceedings.

TERMS

NOW THEREFORE, in consideration of the mutual promises herein expressed, the parties knowingly and voluntarily agree as follows:

1. The recitals set forth above are incorporated in this Settlement Agreement as though fully set forth herein.

2. AnazaoHealth Corporation neither admits nor denies the allegations stated in the Notice of Opportunity for Hearing letter dated February 25, 2021; however, the Board has evidence sufficient to sustain the allegations, finds them to violate Ohio's pharmacy law as set forth in the Notice, and hereby adjudicates the same.

3. AnazaoHealth Corporation agrees to pay to the Board a monetary penalty in the amount of $2,500.00. This fine will be attached to your license record and must be paid no later than 30 days from the effective date of this Order. To pay this fine you must login to www.elicense.ohio.gov and process the items in your cart.

4. AnazaoHealth Corporation agrees and acknowledges that this Board disciplinary action must be disclosed to the proper licensing authority of any state or jurisdiction, as required by any such state or jurisdiction, in which it currently holds a professional license, including the Board on renewal applications or applications for a new license.

5. AnazaoHealth Corporation agrees to comply with all federal and state requirements related to Wholesale Distributors of Dangerous Drugs, including but not limited to, Ohio Revised Code Chapter 4729. and the Rules adopted thereunder, Chapter 3719. and the Rules adopted thereunder, Chapter 3715. and the Rules adopted thereunder as well as the "Federal Food, Drug, and Cosmetic Act," 52 Stat. 1040 (1938), 21 U.S.C.A. 301 and Chapter 21, Section 360 of the United States Code, and Section 207.20 of the Code of Federal Regulations. Any violation by AnazaoHealth Corporation of the terms of one or more federal or state requirements may constitute sufficient grounds for further enforcement action related to any licenses granted to AnazaoHealth Corporation by the Board and will NOT discharge AnazaoHealth Corporation from any obligation under the terms of this Agreement.

6. AnazaoHealth Corporation agrees to pay all reasonable costs associated with the collection of any payment, and of the prosecution of any violation of this Agreement.

7. AnazaoHealth Corporation understands that it has the right to be represented by counsel for review and execution of this agreement.

8. This Agreement is binding upon any and all successors, assigns, affiliates, and subsidiaries of the parties or any other corporation through whom or with whom AnazaoHealth Corporation will operate.

9. AnazaoHealth Corporation waives its right to a hearing and an opportunity to be heard pursuant to Chapter 119. of the Ohio Revised Code and waives any right to an appeal.

10. This Agreement may be executed in counterparts or facsimiles, each of which shall be deemed an original, but all of which shall constitute one and the same instrument.

11. All parties to this Agreement understand that this document is a public record pursuant to Ohio Revised Code Section 149.43.

12. This Agreement contains the entire agreement between the parties, there being no other agreement of any kind, verbal or otherwise, which varies the terms of this Agreement.

13. This Agreement shall become effective upon the date of the Board President's signature below.

[SIGNATURE PAGE FOLLOWS]

IN WITNESS WHEREOF, the parties to this Agreement have executed it and/or cause it to be executed by their duly authorized representatives.

9. AnazaoHealth Corporation waives its right to a hearing and an opportunity to be heard pursuant to Chapter 119. of the Ohio Revised Code and waives any right to an appeal.

10. This Agreement may be executed in counterparts or facsimiles, each of which shall be deemed an original, but all of which shall constitute one and the same instrument.

11. All parties to this Agreement understand that this document is a public record pursuant to Ohio Revised Code Section 149.43.

12. This Agreement contains the entire agreement between the parties, there being no other agreement of any kind, verbal or otherwise, which varies the terms of this Agreement.

13. This Agreement shall become effective upon the date of the Board President's signature below.

[SIGNATURE PAGE FOLLOWS]

IN WITNESS WHEREOF, the parties to this Agreement have executed it and/or cause it to be executed by their duly authorized representatives.

Approved by:

TERMS

NOW THEREFORE, in consideration of the mutual promises herein expressed, the parties knowingly and voluntarily agree as follows:

1. The recitals set forth above are incorporated in this Settlement Agreement as though fully set forth herein.

2. AnazaoHealth Corporation neither admits nor denies the allegations stated in the Notice of Opportunity for Hearing letter dated February 25, 2021; however, the Board has evidence sufficient to sustain the allegations, finds them to violate Ohio's pharmacy law as set forth in the Notice, and hereby adjudicates the same.

3. AnazaoHealth Corporation agrees to pay to the Board a monetary penalty in the amount of $2,500.00. This fine will be attached to your license record and must be paid no later than 30 days from the effective date of this Order. To pay this fine you must login to www.elicense.ohio.gov and process the items in your cart.

4. AnazaoHealth Corporation agrees and acknowledges that this Board disciplinary action must be disclosed to the proper licensing authority of any state or jurisdiction, as required by any such state or jurisdiction, in which it currently holds a professional license, including the Board on renewal applications or applications for a new license.

5. AnazaoHealth Corporation agrees to comply with all federal and state requirements related to Wholesale Distributors of Dangerous Drugs, including but not limited to, Ohio Revised Code Chapter 4729. and the Rules adopted thereunder, Chapter 3719. and the Rules adopted thereunder, Chapter 3715. and the Rules adopted thereunder as well as the "Federal Food, Drug, and Cosmetic Act," 52 Stat. 1040 (1938), 21 U.S.C.A. 301 and Chapter 21, Section 360 of the United States Code, and Section 207.20 of the Code of Federal Regulations. Any violation by AnazaoHealth Corporation of the terms of one or more federal or state requirements may constitute sufficient grounds for further enforcement action related to any licenses granted to AnazaoHealth Corporation by the Board and will NOT discharge AnazaoHealth Corporation from any obligation under the terms of this Agreement.

6. AnazaoHealth Corporation agrees to pay all reasonable costs associated with the collection of any payment, and of the prosecution of any violation of this Agreement.

7. AnazaoHealth Corporation understands that it has the right to be represented by counsel for review and execution of this agreement.

8. This Agreement is binding upon any and all successors, assigns, affiliates, and subsidiaries of the parties or any other corporation through whom or with whom AnazaoHealth Corporation will operate.

7465 E. Sunset Rd, Suite 1200
Las Vegas, NV 89113

License No. 01-2481000

SETTLEMENT AGREEMENT WITH THE STATE OF OHIO BOARD OF PHARMACY

This Settlement Agreement (Agreement) is entered into by the State of Ohio Board of Pharmacy (Board) and AnazaoHealth Corporation, for the purpose of resolving all issues between the parties relating to the Board investigation of illegal sales of controlled substances to unlicensed entities and entities without the proper license. Together, the Board and AnazaoHealth Corporation are referred to hereinafter as "the parties."

JURISDICTION

1. Pursuant to Section 4729.56 of the Ohio Revised Code and the rules adopted thereunder, the Board has the authority to suspend, revoke, restrict, limit, or refuse to grant or renew any license issued pursuant to Section 4729.52 of the Ohio Revised Code.

2. AnazaoHealth Corporation is a licensed Wholesaler Distributor of Dangerous Drug, License No. 01-2481000, which lists Eric Sparks, as the Responsible Person.

FACTS

1. The Board initiated an investigation of AnazaoHealth Corporation, Wholesaler Distributor of Dangerous Drugs License No. 01-2481000, related to AnazaoHealth Corporation illegal sales of dangerous drugs to unlicensed entities and entities without the proper license.

2. On or about February 25, 2021, the Board sent a Notice of Opportunity for Hearing to AnazaoHealth Corporation, which outlined the allegations and provided notice of its right to a hearing, its rights in such hearing, and its right to submit contentions in writing.

WHEREFORE, the parties desire to resolve the issues relating to the above-referenced findings without resorting to further administrative or judicial proceedings.

IN THE MATTER OF THE MISCELLANEOUS PERMIT OF ANAZAOHEALTH CORPORATION; SETTLEMENT AGREEMENT PRIOR TO FILING OF PETITION FOR DISCIPLINARY ACTION AND BOARD'S FINAL ORDER; EXHIBIT "1"; RICO CASE NO. PHA 2021-60-L.

APPROVED AND SO ORDERED:

and Consumer Affairs

usual and customary fashion pursuant to the Administrative Procedure Act, Respondent agrees that neither Respondent, nor any attorney that Respondent may retain, will raise as an objection in any administrative proceeding or in any judicial action, to the Board's proceeding against Respondent on the basis that the Board has become disqualified to consider the case because of its review and consideration of this Settlement Agreement.

6. Any Ambiguities Shall be Construed to Protect the Consuming Public. It is agreed that any ambiguity in this Settlement Agreement is to be read in the manner that most completely protects the interests of the consuming public.

7. No Reliance on Representations by RICO. Other than the matters specifically stated in this Settlement Agreement, neither RICO nor anyone acting on its behalf has made any representation of fact, opinion, or promise to Respondent to induce entry into this Settlement Agreement, and Respondent is not relying upon any statement, representation or opinion, or promise made by RICO or any of its agents, employees, representatives, or attorneys concerning the nature, extent or duration of exposure to legal liability arising from the subject matter of this Settlement Agreement or concerning any other matter.

8. Complete Agreement. This Settlement Agreement is a complete settlement of the rights, responsibilities and liabilities of the parties hereto with respect to the subject matter hereof; contains the entire agreement of the parties; and may only be modified, changed or amended by written instrument duly executed by all parties hereto.

[Remainder of this page intentionally left blank; signature page follows]

9. Respondent agrees that this Settlement Agreement is intended to resolve the issues raised in RICO's investigation in RICO Case No. PHA 2021-60-L.

10. Respondent understands that this Settlement Agreement may be subject to reporting requirements.

11. Respondent understands this Settlement Agreement is public record pursuant to HRS Chapter 92F.

12. Respondent acknowledges that upon tis approval, this Settlement Agreement constitutes disciplinary action.

C. TERMS OF SETTLEMENT:

1. Administrative Fine. Respondent agrees to pay a fine in the amount of FIVE HUNDRED AND NO/100 DOLLARS ($500.00). Payment shall be made by **cashier's check or money order made payable to "DCCA - Compliance Resolution Fund"** and mailed to the Regulated Industries Complaints Office, Attn.: Ivy Y. E. Kim, Esq., 235 S. Beretania Street, 9th Floor, Honolulu, Hawaii 96813. Payment of the fine shall be due at the time this Settlement Agreement is returned to RICO.

2. Failure to Comply with Settlement Agreement. If Respondent fails to fully and timely comply with the terms of this Settlement Agreement as set forth in paragraph C.1. above, Respondent's permit shall be automatically revoked upon RICO's filing of an affidavit with the Board attesting to such failure. In case of such revocation, Respondent shall turn in all indicia of licensure to the Executive Officer of the Board within ten (10) days after receipt of notice of the revocation. In case of such revocation, Respondent understands Respondent cannot apply for a new permit until the expiration of at least five (5) years after the effective date of the revocation. Respondent understands that if Respondent desires to become permitted again, Respondent must apply to the Board for a new permit pursuant to and subject to HRS §§ 92-17, 436B-21, and all other applicable laws and rules in effect at the time.

3. Possible Further Sanction. The Board, at its discretion, may pursue additional disciplinary action as provided by law to include further fines and other sanctions as the Board may deem appropriate if Respondent violates any provision of the statutes or rules governing the conduct of pharmacies in the State of Hawaii, or if Respondent fails to abide by the terms of this Settlement Agreement.

4. Approval of the Board. Respondent agrees that, except for the representations, agreements and covenants contained in Paragraphs C.5., C.6., and C.7. below, this Settlement Agreement shall not be binding on any of the parties unless and until it is approved by the Board.

5. No Objection if Board Fails to Approve. If the Board does not approve this Settlement Agreement, does not issue an order pursuant thereto, or does not approve a lesser remedy, but instead an administrative hearing is conducted against Respondent in the Board's

3. On or about July 29, 2021, Respondent entered into a Settlement Agreement with the State of Ohio Board of Pharmacy in Case No. A-2019-0262, I-2019-0500 (hereinafter "Ohio Settlement Agreement"). The Ohio Settlement Agreement is attached hereto as Exhibit "1". The Ohio Settlement Agreement was based on an allegation that Respondent illegally sold dangerous drugs to unlicensed entities and entities without the proper license.

4. The foregoing allegations, if proven at an administrative hearing before the Board, would constitute violations of the following statute(s) and/or rule(s): Hawaii Revised Statutes (hereinafter "HRS") § 436B-19(13) (disciplinary action by another state or federal agency).

5. The Board has jurisdiction over the subject matter herein and over the parties hereto.

B. REPRESENTATIONS BY RESPONDENT:

1. Respondent is fully aware that Respondent has the right to be represented by an attorney and voluntarily waives that right.

2. Respondent enters into this Settlement Agreement freely, knowingly, voluntarily, and under no coercion or duress.

3. Respondent is aware of the right to have a hearing to adjudicate the issues in the case. Pursuant to HRS § 91-9(d), Respondent freely, knowingly, and voluntarily waives the right to a hearing, and agrees to dispose of this case in accordance with the terms and conditions of this Settlement Agreement.

4. Respondent, being at all times relevant herein permitted as a miscellaneous permit holder by the Board, acknowledges that Respondent is subject to penalties including but not limited to, revocation, suspension or limitation of the permit and administrative fines, if the foregoing allegations are proven at hearing. Respondent further understands that RICO enters into this Settlement Agreement and agrees to the specific terms contained in this Settlement Agreement, based upon Respondent's representations made herein.

5. Respondent represents that Exhibit "1" is a true and correct copy of the Ohio Settlement Agreement.

6. Respondent understands that any false or untrue statement or any material misrepresentation or omission of fact by Respondent in this Settlement Agreement may be grounds for further disciplinary action under HRS Chapters 436B and 461.

7. Respondent does not admit to violating any law or rule, but acknowledges that RICO has sufficient cause to file a Petition for Disciplinary Action against Respondent's permit.

8. Respondent enters into this Settlement Agreement as a compromise of the claims and to conserve on the expenses of proceeding with an administrative hearing on this matter.

FINAL ORDER

AND NOW, this 20th day of December, 2023, the State Board of Pharmacy, having duly met and reviewed the entire record and upon consideration of the foregoing findings of fact, conclusions of law, and discussion, hereby **ORDERS** that Respondent Anazaohealth Corporation, registration number NP000601, be **PUBLICLY REPRIMANDED** and **IMPOSES** a **CIVIL PENALTY** of $2,000.00.

Respondent shall pay the full amount of the civil penalty by certified check, cashier's check, attorney's check or U.S. postal money order made payable to "Commonwealth of Pennsylvania." On or before thirty (30) days after the date of mailing indicated below, the full amount of the civil penalty shall be delivered to:

Board Counsel
Bureau of Professional and Occupational Affairs
P.O. Box 69523
Harrisburg, PA 17106-9523

Failure to pay the civil penalty within thirty (30) days will result in the immediate suspension of Respondent's registration until the civil penalty is paid in full.

This Order is effective immediately. The sanction shall take effect thirty (30) days from the date of mailing of this Order, namely January 22, 2024.

RE: Notice of Hearing /Settlement Agreement

Dear Mr. Sparks,

Enclosed are two documents; review them carefully. The first document is a Notice of Opportunity for Hearing, the second is a Settlement Agreement. Your rights to an administrative hearing are set forth in the first. You may avail yourself of these rights by following the instructions therein. If you choose, you may execute the second document and resolve the issues according to the terms set forth therein. Whichever you choose, you should do so after careful consideration.

Please Note: If you choose to execute the Settlement Agreement, the document should either be scanned and emailed as a PDF to legal@pharmacy.ohio.gov or mailed to **State of Ohio Board of Pharmacy 77 South High Street, 17th Floor Columbus, Ohio 43215-6108.** The Board cannot accept photographs taken of the settlement that are then emailed; sending your document as a JPG will only delay acceptance and processing of the Settlement Agreement. The Settlement Agreement becomes effective upon the date of the Board President's signature, at which time the terms of the Settlement Agreement will also become effective, and the Board-imposed fine (if applicable) will be attached to your license.

If you have questions about your options, you may call the Board office. The office will not give you legal advice. However, we will answer questions you have about the documents.

If you have any questions or concerns, please do not hesitate to contact me.

Sincerely,

Joseph A. Koltak /pse

EDWARD J. KANE, President
Maine Board of Pharmacy

DATED: 7/8/2022

_____
ANDREW L. BLACK
Assistant Attorney General

State House Station, Augusta, Maine 04333, and must be submitted with the signed Consent Agreement.

11. This Consent Agreement is not appealable and is effective until modified or terminated by the parties hereto.

12. Violation of any of the terms or conditions of this Consent Agreement by AnazaoHealth shall constitute grounds for discipline, including but not limited to modification, suspension, or revocation of licensure or the denial of licensure or re-licensure.

13. The Board and the Office of the Attorney General may communicate and cooperate regarding any matter related to this Consent Agreement.

14. This Consent Agreement is a public record within the meaning of 1 M.R.S. § 402 and will be available for inspection and copying by the public pursuant to 1 M.R.S. § 408-A.

15. Nothing in this Consent Agreement shall be construed to affect any right or interest of any person not a party hereto.

16. The Board and AnazaoHealth agree that no further agency action will be initiated against AnazaoHealth 's license by the Board based upon the specific violations admitted to herein, except or unless AnazaoHealth fails to comply with the terms and conditions of this Consent Agreement. The Board may however consider the conduct described above as evidence of a pattern of misconduct in the event that other allegations are brought against AnazaoHealth , and this Consent Agreement will be introduced as evidence in any future adjudicatory hearing involving AnazaoHealth . The Board may also consider the fact that discipline was imposed by this Consent Agreement in determining discipline in any further complaints against AnazaoHealth.

17. This Consent Agreement may be signed in counterparts, with all counterparts together constituting one original instrument. Signatures below may be applied and/or saved

5. This administrative complaint was docketed as Case No. 2022-PHA-18213.

6. Under Board Rules Chapter 11, § 3, upon a change of PIC, a mail order prescription pharmacy must file a new application with the Board by registered mail no later than seven (7) days after the change.

7. Pursuant to the Board's delegation of authority dated November 9, 2020, which authorizes Board Staff to offer prescribed consent agreements to resolve first-time violations of PIC change notification requirements, this Consent Agreement is being offered to finally resolve Case No. 2022-PHA-18213.

8. Absent acceptance of this Consent Agreement by signing and dating it and returning it to Maine Board of Pharmacy, Complaints Division, Office of Professional and Occupational Regulation, 35 State House Station, Augusta, Maine 04333-0035 by **May 13, 2022,** the Board will resolve this matter by holding an adjudicatory hearing.

COVENANTS

9. AnazaoHealth admits to the facts as stated above and admits that such conduct constitutes grounds for discipline pursuant to 10 M.R.S. § 8003(5-A)(A)(5) for violating a rule of the Board, specifically Board Rules Chapter 11, § 3, by failing to file a new application with the Board by registered mail no later than 7 days after a change of PIC.

10. As DISCIPLINE for the violation admitted to in paragraph 9 above, AnazaoHealth agrees to accept the imposition of:

a. A WARNING; and

b. A CIVIL PENALTY in the amount of two hundred fifty dollars ($250.00). Payment of the civil penalty shall be made by check or money order payable to the "Treasurer, State of Maine" and delivered to Maine Board of Pharmacy, Compliance Division, Office of Professional and Occupational Regulation, 35

BOARD OF PHARMACY

IN RE:	)	
	)	
ANAZAOHEALTH CORPORATION	)	
	)	CONSENT AGREEMENT
Case No. 2022-PHA-18213	)	

PARTIES

This document is a Consent Agreement regarding disciplinary action against the mail order prescription pharmacy license of AnazaoHealth Corporation ("AnazaoHealth") in the State of Maine. The parties to this Consent Agreement are: AnazaoHealth , the Maine Board of Pharmacy ("the Board"), and the Maine Office of the Attorney General ("the Attorney General"). This Consent Agreement is entered into pursuant to 10 M.R.S. § 8003(5-A).

FACTS

1. At all times relevant to this matter, AnazaoHealth was licensed by the Board as a mail order prescription pharmacy, license no. MO40001876, located at 7465 W Sunset Road, Suite 1200, Las Vegas, Nevada.

2. On November 1, 2020, Eric L. Sparks replaced Douglas F. Canmann as the pharmacist in charge ("PIC") of AnazaoHealth , thereby requiring AnazaoHealth to submit a Change of PIC application to the Board within 7 days after the PIC change.

3. AnazaoHealth , however, did not file a change of PIC application with the Board until November 13, 2020.

4. On April 5, 2022, Board Administrator, Geraldine Betts, filed an administrative complaint with the Board alleging that AnazaoHealth had failed to file a timely change of PIC application.

Re: Complaint No. 2022-PHA-18213

Dear Mr. Weaver:

Enclosed please find the fully executed consent agreement between you, the Maine Board of Pharmacy, and the Office of the Attorney General in the above referenced matter.

This letter also acknowledges receipt of your fine payment in the amount of $250.00. Your fine is paid in full. As all conditions of the consent agreement have been fulfilled, this complaint file is now closed.

Please feel free to contact our office at (207) 624-8651 with any questions.

Sincerely,

Jessica Gowell

9. AnazaoHealth Corporation waives its right to a hearing and an opportunity to be heard pursuant to Chapter 119. of the Ohio Revised Code and waives any right to an appeal.

10. This Agreement may be executed in counterparts or facsimiles, each of which shall be deemed an original, but all of which shall constitute one and the same instrument.

11. All parties to this Agreement understand that this document is a public record pursuant to Ohio Revised Code Section 149.43.

12. This Agreement contains the entire agreement between the parties, there being no other agreement of any kind, verbal or otherwise, which varies the terms of this Agreement.

13. This Agreement shall become effective upon the date of the Board President's signature below.

[SIGNATURE PAGE FOLLOWS]

IN WITNESS WHEREOF, the parties to this Agreement have executed it and/or cause it to be executed by their duly authorized representatives.

Approved by:

TERMS

NOW THEREFORE, in consideration of the mutual promises herein expressed, the parties knowingly and voluntarily agree as follows:

1. The recitals set forth above are incorporated in this Settlement Agreement as though fully set forth herein.

2. AnazaoHealth Corporation neither admits nor denies the allegations stated in the Notice of Opportunity for Hearing letter dated February 25, 2021; however, the Board has evidence sufficient to sustain the allegations, finds them to violate Ohio's pharmacy law as set forth in the Notice, and hereby adjudicates the same.

3. AnazaoHealth Corporation agrees to pay to the Board a monetary penalty in the amount of $2,500.00. This fine will be attached to your license record and must be paid no later than 30 days from the effective date of this Order. To pay this fine you must login to www.elicense.ohio.gov and process the items in your cart.

4. AnazaoHealth Corporation agrees and acknowledges that this Board disciplinary action must be disclosed to the proper licensing authority of any state or jurisdiction, as required by any such state or jurisdiction, in which it currently holds a professional license, including the Board on renewal applications or applications for a new license.

5. AnazaoHealth Corporation agrees to comply with all federal and state requirements related to Wholesale Distributors of Dangerous Drugs, including but not limited to, Ohio Revised Code Chapter 4729. and the Rules adopted thereunder, Chapter 3719. and the Rules adopted thereunder, Chapter 3715. and the Rules adopted thereunder as well as the "Federal Food, Drug, and Cosmetic Act," 52 Stat. 1040 (1938), 21 U.S.C.A. 301 and Chapter 21, Section 360 of the United States Code, and Section 207.20 of the Code of Federal Regulations. Any violation by AnazaoHealth Corporation of the terms of one or more federal or state requirements may constitute sufficient grounds for further enforcement action related to any licenses granted to AnazaoHealth Corporation by the Board and will NOT discharge AnazaoHealth Corporation from any obligation under the terms of this Agreement.

6. AnazaoHealth Corporation agrees to pay all reasonable costs associated with the collection of any payment, and of the prosecution of any violation of this Agreement.

7. AnazaoHealth Corporation understands that it has the right to be represented by counsel for review and execution of this agreement.

8. This Agreement is binding upon any and all successors, assigns, affiliates, and subsidiaries of the parties or any other corporation through whom or with whom AnazaoHealth Corporation will operate.

SETTLEMENT AGREEMENT WITH THE STATE OF OHIO BOARD OF PHARMACY

This Settlement Agreement (Agreement) is entered into by the State of Ohio Board of Pharmacy (Board) and AnazaoHealth Corporation, for the purpose of resolving all issues between the parties relating to the Board investigation of illegal sales of controlled substances to unlicensed entities and entities without the proper license. Together, the Board and AnazaoHealth Corporation are referred to hereinafter as "the parties."

JURISDICTION

1. Pursuant to Section 4729.56 of the Ohio Revised Code and the rules adopted thereunder, the Board has the authority to suspend, revoke, restrict, limit, or refuse to grant or renew any license issued pursuant to Section 4729.52 of the Ohio Revised Code.

2. AnazaoHealth Corporation is a licensed Wholesaler Distributor of Dangerous Drug, License No. 01-2481000, which lists Eric Sparks, as the Responsible Person.

FACTS

1. The Board initiated an investigation of AnazaoHealth Corporation, Wholesaler Distributor of Dangerous Drugs License No. 01-2481000, related to AnazaoHealth Corporation illegal sales of dangerous drugs to unlicensed entities and entities without the proper license.

2. On or about February 25, 2021, the Board sent a Notice of Opportunity for Hearing to AnazaoHealth Corporation, which outlined the allegations and provided notice of its right to a hearing, its rights in such hearing, and its right to submit contentions in writing.

WHEREFORE, the parties desire to resolve the issues relating to the above-referenced findings without resorting to further administrative or judicial proceedings.

IN THE MATTER OF THE MISCELLANEOUS PERMIT OF ANAZAOHEALTH CORPORATION; SETTLEMENT AGREEMENT PRIOR TO FILING OF PETITION FOR DISCIPLINARY ACTION AND BOARD'S FINAL ORDER; EXHIBIT "1"; RICO CASE NO. PHA 2021-60-L.

APPROVED AND SO ORDERED:

Attorney for Department of Commerce
and Consumer Affairs

usual and customary fashion pursuant to the Administrative Procedure Act, Respondent agrees that neither Respondent, nor any attorney that Respondent may retain, will raise as an objection in any administrative proceeding or in any judicial action, to the Board's proceeding against Respondent on the basis that the Board has become disqualified to consider the case because of its review and consideration of this Settlement Agreement.

6. Any Ambiguities Shall be Construed to Protect the Consuming Public. It is agreed that any ambiguity in this Settlement Agreement is to be read in the manner that most completely protects the interests of the consuming public.

7. No Reliance on Representations by RICO. Other than the matters specifically stated in this Settlement Agreement, neither RICO nor anyone acting on its behalf has made any representation of fact, opinion, or promise to Respondent to induce entry into this Settlement Agreement, and Respondent is not relying upon any statement, representation or opinion, or promise made by RICO or any of its agents, employees, representatives, or attorneys concerning the nature, extent or duration of exposure to legal liability arising from the subject matter of this Settlement Agreement or concerning any other matter.

8. Complete Agreement. This Settlement Agreement is a complete settlement of the rights, responsibilities and liabilities of the parties hereto with respect to the subject matter hereof; contains the entire agreement of the parties; and may only be modified, changed or amended by written instrument duly executed by all parties hereto.

[Remainder of this page intentionally left blank; signature page follows]

9. Respondent agrees that this Settlement Agreement is intended to resolve the issues raised in RICO's investigation in RICO Case No. PHA 2021-60-L.

10. Respondent understands that this Settlement Agreement may be subject to reporting requirements.

11. Respondent understands this Settlement Agreement is public record pursuant to HRS Chapter 92F.

12. Respondent acknowledges that upon tis approval, this Settlement Agreement constitutes disciplinary action.

C. TERMS OF SETTLEMENT:

1. Administrative Fine. Respondent agrees to pay a fine in the amount of FIVE HUNDRED AND NO/100 DOLLARS ($500.00). Payment shall be made by **cashier's check or money order made payable to "DCCA - Compliance Resolution Fund"** and mailed to the Regulated Industries Complaints Office, Attn.: Ivy Y. E. Kim, Esq., 235 S. Beretania Street, 9th Floor, Honolulu, Hawaii 96813. Payment of the fine shall be due at the time this Settlement Agreement is returned to RICO.

2. Failure to Comply with Settlement Agreement. If Respondent fails to fully and timely comply with the terms of this Settlement Agreement as set forth in paragraph C.1. above, Respondent's permit shall be automatically revoked upon RICO's filing of an affidavit with the Board attesting to such failure. In case of such revocation, Respondent shall turn in all indicia of licensure to the Executive Officer of the Board within ten (10) days after receipt of notice of the revocation. In case of such revocation, Respondent understands Respondent cannot apply for a new permit until the expiration of at least five (5) years after the effective date of the revocation. Respondent understands that if Respondent desires to become permitted again, Respondent must apply to the Board for a new permit pursuant to and subject to HRS §§ 92-17, 436B-21, and all other applicable laws and rules in effect at the time.

3. Possible Further Sanction. The Board, at its discretion, may pursue additional disciplinary action as provided by law to include further fines and other sanctions as the Board may deem appropriate if Respondent violates any provision of the statutes or rules governing the conduct of pharmacies in the State of Hawaii, or if Respondent fails to abide by the terms of this Settlement Agreement.

4. Approval of the Board. Respondent agrees that, except for the representations, agreements and covenants contained in Paragraphs C.5., C.6., and C.7. below, this Settlement Agreement shall not be binding on any of the parties unless and until it is approved by the Board.

5. No Objection if Board Fails to Approve. If the Board does not approve this Settlement Agreement, does not issue an order pursuant thereto, or does not approve a lesser remedy, but instead an administrative hearing is conducted against Respondent in the Board's

3. On or about July 29, 2021, Respondent entered into a Settlement Agreement with the State of Ohio Board of Pharmacy in Case No. A-2019-0262, I-2019-0500 (hereinafter "Ohio Settlement Agreement"). The Ohio Settlement Agreement is attached hereto as Exhibit "1". The Ohio Settlement Agreement was based on an allegation that Respondent illegally sold dangerous drugs to unlicensed entities and entities without the proper license.

4. The foregoing allegations, if proven at an administrative hearing before the Board, would constitute violations of the following statute(s) and/or rule(s): Hawaii Revised Statutes (hereinafter "HRS") § 436B-19(13) (disciplinary action by another state or federal agency).

5. The Board has jurisdiction over the subject matter herein and over the parties hereto.

B. REPRESENTATIONS BY RESPONDENT:

1. Respondent is fully aware that Respondent has the right to be represented by an attorney and voluntarily waives that right.

2. Respondent enters into this Settlement Agreement freely, knowingly, voluntarily, and under no coercion or duress.

3. Respondent is aware of the right to have a hearing to adjudicate the issues in the case. Pursuant to HRS § 91-9(d), Respondent freely, knowingly, and voluntarily waives the right to a hearing, and agrees to dispose of this case in accordance with the terms and conditions of this Settlement Agreement.

4. Respondent, being at all times relevant herein permitted as a miscellaneous permit holder by the Board, acknowledges that Respondent is subject to penalties including but not limited to, revocation, suspension or limitation of the permit and administrative fines, if the foregoing allegations are proven at hearing. Respondent further understands that RICO enters into this Settlement Agreement and agrees to the specific terms contained in this Settlement Agreement, based upon Respondent's representations made herein.

5. Respondent represents that Exhibit "1" is a true and correct copy of the Ohio Settlement Agreement.

6. Respondent understands that any false or untrue statement or any material misrepresentation or omission of fact by Respondent in this Settlement Agreement may be grounds for further disciplinary action under HRS Chapters 436B and 461.

7. Respondent does not admit to violating any law or rule, but acknowledges that RICO has sufficient cause to file a Petition for Disciplinary Action against Respondent's permit.

8. Respondent enters into this Settlement Agreement as a compromise of the claims and to conserve on the expenses of proceeding with an administrative hearing on this matter.

COMMONWEALTH OF PENNSYLVANIA
DEPARTMENT OF STATE
BEFORE THE STATE BOARD OF PHARMACY

Commonwealth of Pennsylvania,	:	
Bureau of Professional and	:	
Occupational Affairs	:	
v.	:	**Case No. 21-54-014780**
Anazaohealth Corporation,	:	
Respondent		

FINAL ORDER

AND NOW, this 20th day of December, 2023, the State Board of Pharmacy, having duly met and reviewed the entire record and upon consideration of the foregoing findings of fact, conclusions of law, and discussion, hereby **ORDERS** that Respondent Anazaohealth Corporation, registration number NP000601, be **PUBLICLY REPRIMANDED** and **IMPOSES** a **CIVIL PENALTY** of $2,000.00.

Respondent shall pay the full amount of the civil penalty by certified check, cashier's check, attorney's check or U.S. postal money order made payable to "Commonwealth of Pennsylvania." On or before thirty (30) days after the date of mailing indicated below, the full amount of the civil penalty shall be delivered to:

Board Counsel
Bureau of Professional and Occupational Affairs
P.O. Box 69523
Harrisburg, PA 17106-9523

Failure to pay the civil penalty within thirty (30) days will result in the immediate suspension of Respondent's registration until the civil penalty is paid in full.

This Order is effective immediately. The sanction shall take effect thirty (30) days from the date of mailing of this Order, namely January 22, 2024.

Eric Sparks, on behalf of, AnazaoHealth Corporation, Respondent	Date of Signature
Attorney for Respondent (if applicable)	Date of Signature
Jennifer M. Rudell, RPh, President, State of Ohio Board of Pharmacy	Date of Signature
Henry G. Appel, Ohio Assistant Attorney General	Date of Signature

9. AnazaoHealth Corporation waives its right to a hearing and an opportunity to be heard pursuant to Chapter 119. of the Ohio Revised Code and waives any right to an appeal.

10. This Agreement may be executed in counterparts or facsimiles, each of which shall be deemed an original, but all of which shall constitute one and the same instrument.

11. All parties to this Agreement understand that this document is a public record pursuant to Ohio Revised Code Section 149.43.

12. This Agreement contains the entire agreement between the parties, there being no other agreement of any kind, verbal or otherwise, which varies the terms of this Agreement.

13. This Agreement shall become effective upon the date of the Board President's signature below.

[SIGNATURE PAGE FOLLOWS]

IN WITNESS WHEREOF, the parties to this Agreement have executed it and/or cause it to be executed by their duly authorized representatives.

Approved by:

TERMS

NOW THEREFORE, in consideration of the mutual promises herein expressed, the parties knowingly and voluntarily agree as follows:

1. The recitals set forth above are incorporated in this Settlement Agreement as though fully set forth herein.

2. AnazaoHealth Corporation neither admits nor denies the allegations stated in the Notice of Opportunity for Hearing letter dated February 25, 2021; however, the Board has evidence sufficient to sustain the allegations, finds them to violate Ohio's pharmacy law as set forth in the Notice, and hereby adjudicates the same.

3. AnazaoHealth Corporation agrees to pay to the Board a monetary penalty in the amount of $2,500.00. This fine will be attached to your license record and must be paid no later than 30 days from the effective date of this Order. To pay this fine you must login to www.elicense.ohio.gov and process the items in your cart.

4. AnazaoHealth Corporation agrees and acknowledges that this Board disciplinary action must be disclosed to the proper licensing authority of any state or jurisdiction, as required by any such state or jurisdiction, in which it currently holds a professional license, including the Board on renewal applications or applications for a new license.

5. AnazaoHealth Corporation agrees to comply with all federal and state requirements related to Wholesale Distributors of Dangerous Drugs, including but not limited to, Ohio Revised Code Chapter 4729. and the Rules adopted thereunder, Chapter 3719. and the Rules adopted thereunder, Chapter 3715. and the Rules adopted thereunder as well as the "Federal Food, Drug, and Cosmetic Act," 52 Stat. 1040 (1938), 21 U.S.C.A. 301 and Chapter 21, Section 360 of the United States Code, and Section 207.20 of the Code of Federal Regulations. Any violation by AnazaoHealth Corporation of the terms of one or more federal or state requirements may constitute sufficient grounds for further enforcement action related to any licenses granted to AnazaoHealth Corporation by the Board and will NOT discharge AnazaoHealth Corporation from any obligation under the terms of this Agreement.

6. AnazaoHealth Corporation agrees to pay all reasonable costs associated with the collection of any payment, and of the prosecution of any violation of this Agreement.

7. AnazaoHealth Corporation understands that it has the right to be represented by counsel for review and execution of this agreement.

8. This Agreement is binding upon any and all successors, assigns, affiliates, and subsidiaries of the parties or any other corporation through whom or with whom AnazaoHealth Corporation will operate.

BY ORDER OF THE STATE BOARD OF PHARMACY

Steven W. Schierholt, Esq., Executive Director

SWS/jak/pae

CMRRR: 7020 3160 0000 6109 0748

Enclosure: Attachment A

a. Violating any federal, state, or local drug law; any provision of chapter 4729. or Chapter 2925., 3715., or 3719. of the Revised Code; or any rule of the Board, ORC Section 4729.56(A)(2)(b); and/or

b. Failing to satisfy the qualifications for registration under section 4729.53 of the Revised Code or the rules of the Board or ceasing to satisfy the qualifications after the registration is granted or renewed, ORC Section 4729.56(A)(2)(d); and/or

c. Any other cause for which the board may impose sanctions as set forth in rules adopted under section 4729.26 of the Revised Code, ORC Section 4729.56(A)(2)(g).

6. Such conduct as set forth in the Allegations Section, if proven, constitutes the following violations of Section 4729.56 of the ORC, effective September 29, 2015, each violation punishable by a maximum fine of $2,500 if committed by an organization:

   a. Violating any federal, state, or local drug law; any provision of this chapter or Chapter 2925., 3715., or 3719. of the Revised Code; or any rule of the Board, ORC Section 4729.56(A)(2); and/or

   b. Failing to satisfy the qualifications for registration under section 4729.53 of the Revised Code or the rules of the Board or ceasing to satisfy the qualifications after the registration is granted or renewed, ORC Section 4729.56(A)(4).

7. Such conduct as set forth in the Allegations Section, if proven, constitutes a violation of Rule 4729-9-19(A)(4) of the OAC, as effective October 5, 2015, each violation punishable by a maximum penalty of $2,500: Is not of good moral character and habits.

YOU ARE FURTHER NOTIFIED, in accordance with the provisions of Chapters 119. and 4729. of the Ohio Revised Code, that you are entitled to a hearing before the State of Ohio Board of Pharmacy, if you request such a hearing within thirty 30 days of the date of the mailing of this notice.

IF YOU DESIRE A HEARING, such request shall either be mailed to the State of Ohio Board of Pharmacy, Attn: Legal, 77 South High Street, 17th Floor, Columbus, Ohio 43215-6126 or an e-mail request may be sent to legal@pharmacy.ohio.gov (**please note faxes will not be accepted**). **YOUR REQUEST MUST BE RECEIVED ON OR PRIOR TO THE 30TH DAY FOLLOWING THE MAILING DATE OF THIS NOTICE.** Please note that if you submit a request via email, your request will be acknowledged within one business day of receipt. If you do not receive an acknowledgment, please contact the Board offices at 614-466-4143 and request the legal department. You may appear at such hearing in person, by your attorney, or by such other representative as is permitted to practice before the agency, or you may present your position, arguments or contentions in writing; and, at this hearing, you may also present evidence and examine any witnesses appearing for and against you. **If you are a corporation, you must be represented at the hearing by an attorney licensed to practice in the state of Ohio.**

YOU ARE FURTHER ADVISED that if there is no request for such a hearing received by the Board on or prior to the 30th day following the mailing of this notice, the State of Board of Pharmacy, upon consideration of the aforementioned allegations against you, may take action without such a hearing.

If you have questions regarding the Chapter 119. Administrative Hearing process, please e-mail your questions to legal@pharmacy.ohio.gov or call the Board office at 614-466-4143 and ask for the legal department.

b. Advanced Pain and Spine Institute, no TDDD license, located at 9600 Montgomery Road, Cincinnati, Ohio.

c. Body Shapes Medical-Cincinnati, only a Category II TDDD license, located at 11147 Montgomery Road, Suite 200, Cincinnati, Ohio.

d. Women's Comprehensive Health Center, no TDDD license, located at 135 N. Ewing Street, Suite 205, Lancaster, Ohio.

POTENTIAL VIOLATIONS OF LAW

1. Such conduct as set forth in the Allegations Section, if proven, each constitutes a violation of Section 4729.51(B)(1) of the ORC, as effective September 29, 2017, no wholesale distributor shall possess for sale, sell, or distribute, at wholesale, dangerous drugs or investigational drugs or products to any person other than the following: Subject to division (D) of this section, a licensed terminal distributor of dangerous drugs, each sale being a first-degree misdemeanor, each punishable by a maximum fine of $5,000 if committed by an organization.

2. Such conduct as set forth in the Allegations Section, if proven, each constitutes a violation of Section 4729.60(A)(1) of the ORC, as effective April 6, 2017, September 29, 2017, Before a licensee identified in division (B)(1)(a) of section 4729.52 of the Revised Code may sell or distribute dangerous drugs at wholesale to any person, except as provided in division (A)(2) of this section, the licensee shall query the roster established pursuant to section 4729.59 of the Revised Code to determine whether the purchaser is a licensed terminal distributor of dangerous drugs, each punishable by a maximum fine of $2,500 if committed by an organization.

3. Such conduct as set forth in the Allegations Section, if proven, each constitutes a violation of Section 4729.60(A) of the ORC, as effective April 21, 2014 and February 1, 2016, Before a registered wholesale distributor of dangerous drugs may sell dangerous drugs at wholesale to any person, other than the persons specified in divisions (B)(1)(a) to (d), (f) to (h), and (l) to (p) of section 4729.51 of the Revised Code, such wholesale distributor shall obtain from the purchaser and the purchaser shall furnish to the wholesale distributor a certificate indicating that the purchaser is a licensed terminal distributor of dangerous drugs, each punishable by a maximum fine of $2,500 if committed by an organization.

4. Such conduct as set forth in the Allegations Section, if proven, each constitutes a violation of Rule 4729-9-12(A)(1) of the OAC, as effective October 5, 2015, Before a wholesale distributor of dangerous drugs may make a sale of a dangerous drug to a terminal distributor of dangerous drugs, the wholesale distributor must obtain a copy of the current certificate of license as a terminal distributor from the purchaser pursuant to division (A) of section 4729.60 of the Revised Code or may utilize the Board's online registry to confirm licensure, each punishable by a maximum fine of $2,500 if committed by an organization.

5. Such conduct as set forth in the Allegations Section, if proven, constitutes the following violations of Section 4729.56 of the ORC, effective September 29, 2017, each violation punishable by a maximum fine of $2,500 if committed by an organization:

Telephone: 801-825-3879 Email: rpgaleria@vitalcare.com

Section 9: Statement of Responsibility - MUST BE COMPLETED by an Authorized Person (NAC 639.945)

Statement of Responsibility

1. I am the Owner (title) for Oakstead Infusion Pharmacy LLC (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be responsible for any violations of pharmacy law that may occur in the Pharmacy owned by such owner(s), shareholder(s), member(s), or partner(s).
3. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be named in any action taken by the Nevada State Board of Pharmacy against the Pharmacy.
4. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) cannot require or permit the pharmacist(s) in said Pharmacy to violate any provision of local, state, or federal laws or regulations pertaining to the practice of pharmacy.
5. I further understand and acknowledge that Nevada law requires that each pharmacy located inside the State of Nevada employ only pharmacists, intern pharmacists, pharmaceutical technicians, and technicians in training that are licensed by the Nevada State Board of Pharmacy. (NRS 639.100).
6. I further understand and acknowledge that Nevada law requires that each pharmacy located outside the State of Nevada engaged in providing pharmacy services into Nevada employs at least one pharmacist licensed by the Nevada State Board of Pharmacy who will be responsible for any prescription dispensed to a patient located in Nevada and responsible for any acts or omissions of pharmacy personnel who are not registered with the Board. (NRS 639.2328).

Sterile Compounding Questionnaire

Rev (09/11/2024)

This application cannot be returned by fax or email.
We must have an original signature to process.

Approval of this completed questionnaire is required for an existing pharmacy, new pharmacy and/or out-sourcing facility applicant who wish to engage in preparing, compounding, dispensing, and furnishing sterile compounded products to Nevada patients or consumers.

Please provide a thorough response to the questions below and provide any necessary supporting documents.
-For a new pharmacy or out-sourcing facility applicant, submit this completed form with your application.
-For an existing pharmacy, send the completed form to the address indicated above.

Section 1: General Information

Pharmacy Name: Oakstead Infusion Vital Care

NV Pharmacy or Outsourcing facility license # (if applicable): _____

Physical Address: 1492 W Antelope Dr, Suite 208

City: Layton State: UT Zip: 84041

Mailing Address (if different from physical address): _____

City: _____ State: _____ Zip: _____

Telephone: 801-825-3879 Toll Free # (NAC 639.708, NRS 639.23286): 888-285-5879

Fax: 801-991-6924 Contact Email: tswakefield@vitalcare.com

Website: www.oaksteadinfusion.com

Nevada Business License # (if applicable) _____

Supervising/Managing Pharmacist Name (NRS 639.220): Trent Wakefield

Supervising/Managing Pharmacist NV Pharmacist Registration #: 16417

Name of Designated Person(s) as defined by revised USP-797 guidelines: Trent Wakefield

Email of Designated Person(s): tswakefield@vitalcare.com

Telephone of Designated Person(s): 801-825-3879, 702-278-1284

Section 2: Sterile Compounding Questions (Use a separate piece of paper if additional space is needed.)

1. What risk level sterile compounding will your facility be performing (check all that apply)?

☐ Category 1 ■ Category 2 ☐ Category 3

If you marked "**Category 3**", you must also complete **section 4**.

2. If compounding Category 2 products is the location performing sterility and endotoxin testing (if required) to obtain extended beyond-use dates? ☐ Yes ■ No

3. If compounding Category 2 products is the location performing aseptically processed CSPs or terminally sterilized CSPs? ■ Aseptic ☐ Terminal

4. Is the pharmacy following the new garbing requirements listed in the revised USP-797 guidelines? ■ Yes ☐ No

5. When was the most recent certification for the ISO classified areas? 09/24/2024

6. What is the frequency of the recertification for the ISO classified areas? every 6 months

7. Were there any follow-up items required from the most recent certification report? ☐ Yes ■ No

8. If preparing Category 2 or Category 3 CSPs from non-sterile starting components are the pre-sterilization procedures such as weighing and mixing completed in an ISO Class 8 or better environment? ☐ Yes ■ No

9. If compounding Category 1 CSPs and Category 2 CSPs how often is surface sampling of all classified areas and pass-through chambers conducted? once monthly

10. Will you be performing sterile hazardous drug compounding? ☐ Yes ■ No

If you marked "**Yes**", you must also complete **section 3**.

11. List the sterile compounded products that you will be compounding for Nevada patients or consumers:

IV antibiotics:
Vancomycin, Daptomycin, Cefazolin, Ceftriaxone, Cefepime, Ertapenem, Meropenem, Zosyn, Penicillins (Pen G, Nafcillin), Teflaro, Tygacil, etc.

12. What laboratory performs your sterility or endotoxin testing?

Name: N/A

Address: _____

City: _____ State: _____ Zip: _____

Telephone: _____

13. What is your procedure for visual inspection of compounded sterile products?
Visual inspection of compounded products include pharmacist review or compounding record to make sure drug, lot #'s, and compounding instructions are accurate before entry into the clean room. Compounding is observed by a pharmacy from outside of the clean room. Once compounded product is complete it is removed from the clean room and inspected by a pharmacist for measureing accuracy and particulate matter with black and white background. Once accuracy is determined it is inspected prior to packaging for shipment/delivery.

14. How often do you perform glove fingertip and medial fill testing?
Every 6 months for all pharmacists and technicians who compound or check compounded products.

15. Describe your initial and ongoing training program for all personnel performing sterile compounding:
Upon hire all pharmacists and pharmacy technician complete Vitalcare's sterile compounding didactic training. It includes: Initial 3 time fingertip testing and media fill (including surface sample), Cleaning and Disinfection of The Controlled Air Environments, Monthly Cleaning with Sporicidal agent, Surface Sampling, Proper Gloving/Gowning Procedure and Entry Into the Clean Room, Preparation of the Aseptic Work Environment, Reconstitution and Aseptic Transfer of a Solution from a Vial to Final container, Aspetic transfer of a solution from vial to a syringe, Aspetic transer of a solution from a ampule to syringe, Aseptic Processing of Compounded Sterile Preparations, Aseptic transfer of solution and medication to an elastomeric, Use of automated and assistive devices during sterile compounding procedures.

16. Describe the cleaning procedure for your primary and secondary engineering controls, including the frequency of cleaning and the names of cleaning, disinfectant, sporicidal, and/or deactivation and decontamination agents used:
Daily PEC: surfaces of inside area of the LAFW and all class 5 areas of clean bench will be disinfected daily using Sterile TB1-3300, and then sanitized with Sterile IPA 70%. Done prior to starting the compounding shift for the day. To ensure no bacteria or fungus is in the class 5 areas, Sterile TB1-3300 will be left on the surface for 1 minute before sanitizing with Sterile IPA 70%. 8. Additionally, ISO Class 5 critical work areas will be sanitized with sterile 70% IPA between prescription compounding, and every 30 minutes while the room is being used, after spills and if contamination is suspected.
Daily Cleaning of SEC/Clean room and Ante room: Mop floors and surfaces in pass through with PreEmpt Plus RTU starting at the (cleanest point) farthest point from the entrance working toward the ante-area. All mop heads and handles will be sanitized with Sterile IPA 70% or PreEmpt Plus RTU immediately prior to use. Clean the tops of all counters, carts, stools, surfaces in pass-through compartments and any other easily cleanable work surfaces with PreEmpt Plus RTU, let dwell 1 minute, then sanitize with Sterile IPA. ANTE-AREA/ROOM (CLEANED AFTER THE COMPOUNDING/BUFFER ROOM) using PreEmpt Plus RTU to disinfect the sink, tops of all counters, carts, stools, and any other easily cleanable work surfaces.
Monthly Cleaning of Controlled Environments: The class 5 areas will be treated with Sterile Peridox RTU, with a dwell time of 3 minutes to achieve maximum disinfection and sporicidal activity. Sterile Peridox RTU will be removed from metal components with sterile water, then sanitize with sterile IPA 70% after the water rinse.

17. Who performs the sterile compounding process at your facility?

Compounding technicians and pharmacists for on call needs.

18. Who is responsible and accountable for the sterile compounding process at your facility?
Trent Wakefield, PharmD (PIC/Pharmacy Manager), Nick Kemp, PharmD serves as backup responsible person in the absense of the PIC.

19. If products are shipped/mailed, what shipping conditions are used to ensure product safety/efficacy?
We use Kodiakooler shipping containers to ensure product safety, efficacy and proper temperature stability.

Section 3: Sterile Hazardous Compounding Questions (Complete this section ONLY if you be performing Sterile Hazardous Compounding.)		
1. What type of primary engineering controls will you be using in your facility?		
2. Are you complying with all USP 800 guidelines?	Yes	No
3. Have your employees who compound with hazardous drugs signed an acknowledgement that they understand the risks associated with this process?	Yes	No
4. Is your BSC or CACI vented 100% to the outside?	Yes	No
5. Do you have a negative pressure buffer room at your facility?	Yes	No
6. Will you be compounding with antineoplastic HDs or HD API?	Yes	No
7. If yes, are the drugs stored in an externally ventilated, negative pressure room?	Yes	No
8. Will you be utilizing a closed system transfer device?	Yes	No
9. If yes, list the name of the device:		

10. What information is provided to the patient or consumer on the proper handling and disposal of hazardous drugs products/containers?

11. Describe your initial process for training new employees prior to compounding sterile hazardous drugs?

Section 4: Sterile Category 3 Compounding Questions (Complete this section ONLY if you will be performing Category 3 Compounding.)

1. List the specific Category 3 sterile products that your facility compounds:

2. What is the frequency for ongoing garbing, gloved fingertip and thumb sampling, and media fill testing for compounding personnel?

3. Is the pharmacy meeting all of the additional garbing requirements for compounding Category 3 CSPs as defined by the revised USP-797 guidelines? Yes No

4. What is the frequency for completing volumetric active air sampling?

5. What is the frequency for completing surface sampling?		
6. What is the frequency for using sporicidal agents?		
7. Is an endotoxin test performed for all products compounded from one or more nonsterile component?	Yes	No
8. Is the BUD assigned supported by stability data obtained using a stability-indicating analytical method?	Yes	No

I certify under penalty of perjury that the information contained in this form is accurate, true and complete in all material respects. I understand that making any false representation in this form is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire form and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. In the event the form is approved I agree to comply with all applicable federal and state statutes and regulations governing this license or registration and understand that any violation may result in discipline.

INSPECTION

	YES	NO	
1	✓		Class B pharmacy means a pharmacy located in Utah that is authorized to provide pharmaceutical care for patients in an institutional setting; and whose primary purpose is to provide a physical environment for patients to obtain health care services; and includes closed-door, hospital, clinic, nuclear, and branch pharmacies; and pharmaceutical administration and sterile product preparation facilities. [UCA 58-17b-102 (11)(a)(i-ii)(b)(i-ii)]
2	✓		The facility shall maintain a current list of licensed employees involved in the practice of pharmacy at the facility. The list shall include individual licensee names, license classifications, license numbers, and license expiration dates. The list shall be readily retrievable. The list may be maintained in paper or electronic form. [UAC R156-17b-614a (5)]
3	✓		Notification has been provided to the Division in regards to the unique email address used in self audits or alerts for the pharmacy. The pharmacy will notify the Division of any change in the email address within seven days of the change. [UAC R156-17b-603(3)(t) (i-ii)]
4	✓		Notification has been provided to the Division in regards to the assignment of the PIC at the above stated pharmacy. The Division is notified of a change in PIC within 30 days of the change. [UAC R156-17b-603 (3) (s)]
5			If the facility has a pharmacy technician training program, the program and curriculum of education and training, meets standards established by Division rule made in collaboration with the Board. [UAC R156-17b-303a (3)] ✓ N/A
6	✓		A pharmacy technician trainee shall practice only under the direct supervision of a pharmacist, and in a ratio not to exceed one pharmacy technician trainee to one pharmacist. [UAC R156-17b-601(4)(a)]
7	✓		Pharmacy technicians shall have general supervision by a pharmacist. [UCA 58-17b-102 (56)]
8	✓		The operating standards for a Pharmacist acting as a preceptor includes meeting the following criteria by providing direct, on-site supervision to no more than two pharmacy interns during a working shift. [UAC R156-17b-606(1)(d)(i)]
9			In accordance with Subsecton 58-17b-102(71)(b) all supportive personnel shall be under the supervision of a licensed pharmacist or DMP. The licensed pharmacist or DMP shall be present in the area where the person being supervised is performing services and shall be immediately available to assist the person being supervised in the serivces being performed except for the delivery of pre-filled prescriptions as provided in Subsection (1)(g) above. [UAC R156-17b-607 (3)] N/A
10			In accordance with Subsection 58-17b-102(71)(a), supportive personnel may assist in any tasks not related to drug preparation or processing including: stock ordering and restocking; cashiering; billing; filing; receiving a written prescription and delivering it to the pharmacist, pharmacy intern, pharmacy technician, pharmacy technician trainee, DMP, or DMP designee; housekeeping; and delivering a pre-filled prescription to a patient. [UAC R156-17b-607 (1)(a-g)] N/A

11 ☑ ☐ The pharmacist-in-charge (PIC) is responsible for assuring that no pharmacy or pharmacist operates the pharmacy or allows operation of the pharmacy with a ratio of pharmacist to pharmacy personnel which, under the circumstances of the particular practice setting, results in, or reasonably would be expected to result in, an unreasonable risk of harm to public health, safety, and welfare. [UAC R156-17b-603 (3) (r)]

12 ☑ ☐ All individuals employed in a pharmacy facility having any contact with the public or patients receiving services from that pharmacy facility does wear on their person a clearly visible and readable identification showing the individual's name and position. [UCA 58-17b-603 (1)]

13 ☑ ☐ When communicating by any means, written, verbal, or electronic, pharmacy personnel do identify themselves as to licensure classification. [UCA 58-17b-603 (2)]

14 ☑ ☐ The facility or parent company does maintain a record for not less than five years of the initials or identification codes that identify each dispensing pharmacist by name. The initials or identification codes shall be unique to ensure that each pharmacist can be identified; therefore identical initials or identification codes shall not be used. [UAC R156-17b-614a (8)]

15 ☑ ☐ The facility does have current and retrievable editions of the following reference publications in print or electronic format and readily available and retrievable to facility personnel: [UAC R156-17b-614a (4) (a-k)]

- ☑ UCA 58-1 (DOPL Licensing Act)
- ☑ UAC R156-1 (General Rules of DOPL)
- ☑ UCA 58-17b (Pharmacy Practice Act)
- ☑ UAC R156-17b (Pharmacy Practice Act Rules)
- ☑ UCA 58-37 (Controlled Substance Act)
- ☑ UAC R156-37 (Controlled Substance Act Rules)
- ☑ UCA 58-37f (Controlled Substance Database Act)
- ☑ UAC R156-37f (Controlled Substance Database Act Rule)
- ☑ Code of Federal Regulations Title 21 parts 1300 to end
- ☑ FDA Approved Drug Product (Orange Book)
- ☑ General Drug References

16 ☑ ☐ The facility is well lighted, ventilated, clean and sanitary. [UAC R156-17b-614a (1) (a)]

17 ☑ ☐ If transferring a drug from a manufacturer's or distributor's original container to another container, the dispensing area, shall have a sink with hot and cold culinary water separate and apart from restroom facilities. All required equipment shall be clean and in good operating condition. [UAC R156-17b-614a (1) (b)]

18 ☑ ☐ The facility is equipped to permit the orderly storage of prescription drugs and durable medical equipment in a manner to permit clear identification, separation and easy retrieval of products and an environment necessary to maintain the integrity of the product inventory. [UAC R156-17b-614a (1) (c)]

19 ☑ ☐ The facility is equipped to permit practice within the standards and ethics of the profession as dictated by the usual and ordinary scope of practice to be conducted within that facility. [UAC R156-17b-614a (1) (d)]

20 ☑ ☐ All out of date legend drugs and controlled substances shall be removed from the inventory at regular intervals and in correlation to the beyond use date imprinted on the label. [UAC R156-17b-605 (1)]

21 ☑ ☐ The facility is stocked with the quality and quantity of product necessary for the facility to meet its scope of practice in a manner consistent with the public health, safety and welfare. [UAC R156-17b-614a (1) (e)]

22 ☑ ☐ If dispensing controlled substances, the facility is equipped with a security system to permit detection of entry at all times when the facility is closed, and provide notice of unauthorized entry to an individual, and be equipped with a lock on any entrances to the facility where drugs are stored. [UAC R156-17b-614a (1) (f)(i-ii)(g)]

23 ☑ ☐ If the pharmacy does not store drugs in a locked cabinet and has a drop/false ceiling, the pharmacy's perimeter walls shall extend to the hard deck, or other measures shall be taken to prevent unauthorized entry into the pharmacy. [UAC R156-17b-614a (15)] ☐ N/A

24 ☑ ☐ Only a licensed Utah pharmacist or authorized pharmacy personnel does have access to the pharmacy when the pharmacy is closed. [UAC R156-17b-614a (7)]

25 ☑ ☐ A pharmacy shall not dispense a prescription drug or device to a patient unless a pharmacist is physically present and immediately available in the facility. [UAC R156-17b-614a(6)]

26 ☑ ☐ The temperature of the pharmacy is maintained within a range compatible with the proper storage of the drugs. [UAC R156-17b-614a (2)]

27 ☑ ☐ The temperature of the refrigerator and freezer is maintained within a range compatible with the proper storage of drugs requiring refrigeration or freezing. The pharmacy shall keep a daily written or electronic log of the temperature of the refrigerator or freezer on days of operation. The pharmacy shall retain the log entry for three years. [UAC R156-17b-614a (2)]

28 ☑ ☐ For the purpose of promoting therapeutic appropriateness, a pharmacist shall at the time of dispensing a prescription, or a prescription drug order, review the patient's medication record. Such review shall at a minimum identify clinically significant conditions, situations or items, such as: [UAC R156-17b-611 (2) (a-g)]

- ☑ Inappropriate drug utilization
- ☑ Therapeutic duplications
- ☑ Drug-disease contraindications
- ☑ Drug-drug interactions
- ☑ Incorrect drug dosage
- ☑ Incorrect duration of drug treatment
- ☑ Drug-allergy interactions
- ☑ Clinical abuse or misuse

29 ☑ ☐ Patient counseling shall not be required for inpatients of a hospital or institution where other licensed health care professionals are authorized to administer the patient's drugs. [R156-17b-610 (7)]

30 n/a ☐ ☐ Every pharmacy shall verbally offer to counsel a patient or a patient's agent in a personal face-to-face discussion regarding each prescription drug dispensed. If the patient's agent delivers the prescription in person to the pharmacist or pharmacy intern; or receives the drug in person at the time it is dispensed at the facility. [UCA 58-17b-613 (1)]

31 ☑ ☐ A pharmacist or pharmacy intern that receives a prescription from a patient by means other than personal delivery, and that dispenses prescription drugs to the patient by means other than personal delivery shall provide patient counseling to a patient regarding each prescription drug the pharmacy dispenses and provide each patient with a toll-free telephone number by which the patient can contact the pharmacist or pharmacy intern at the pharmacy for counseling. [UCA 58-17b-613(2)]

32 ☐ ☑ If a prescription drug order is delivered to the patient or the patient's agent at the patient's or other designated location, the following is applicable: [UCA R156-17b-610(6)(a-c)

☑ the pharmacy shall provide the information specified in R156-17b-610(3) be delivered with the dispensed prescription in writing:
(a) the name and description of the prescription drug;
(b) the dosage form, dose, route of administration and duration of drug therapy;
(c) intended use of the drug, when known, and expected action;
(d) special directions and precautions for preparation, administration and use by the patient;
(e) common severe side or adverse effects or interactions and therapeutic contraindications that may be encountered,
including their avoidance, and the action required if they occur;
(f) techniques for self-monitoring drug therapy;
(g) proper storage;
(h) prescription refill information;
(i) action to be taken in the event of a missed dose;
(j) pharmacist comments relevant to the individual's drug therapy, including any other information specific to the patient or
drug; and
(k) the date after which the prescription should not be taken or used, or the beyond use date.

☐ if prescriptions are routinely delivered outside the area covered by the pharmacy's local telephone service, the pharmacist shall place on the prescription container or on a separate sheet delivered with the prescription container, the telephone number of the pharmacy and the statement "Written information about this prescription has been provided for you. Please read this information before you take this medication. If you have questions concerning this prescription, a pharmacist is available during normal business hours to answer these questions."

☑ written information provided in Subsection (b) of this section shall be in the form of patient information leaflets similar to USP-NF patient information monographs or equivalent information

33 ☐ ☐ Counseling shall be offered orally in person unless the patient or patient's agent is not at the pharmacy or a specific communication barrier prohibits oral communication [UAC R156-17b-610(1)]

34 ☐ ☐ A pharmacy facility shall orally offer to counsel but shall not be required to counsel a patient or patient's agent when the patient or patient's agent refuses counseling. [UAC R156-17b-610(2)]

35 ☑ ☐ The offer to counsel is documented and said documentation shall be available to the Division. These records must be maintained for a period of five years and be available for inspection within 7-10 business days. [UAC R156-17b-610 (4)]

36 ☑ ☐ A pharmacy may only deliver a prescription drug to a patient or a patient's agent in person at the pharmacy or via the United States Postal Service, a licensed common carrier, or supportive personnel, if the pharmacy takes reasonable precautions to ensure the prescription drug is delivered to the patient or patient's agent or return to the pharmacy. [UCA 58-17b-602 (9)(a)(b)(i-ii)]

37 ☐ ☐ A pharmacy that employs the United States Postal Service or other common carrier to deliver a filled prescription directly to a patient shall, under the direction of the PIC, or other responsible employee: [UAC R156-17b-608 (1-5)]

☑ Use adequate storage or shipping containers and shipping processes to ensure drug stability and potency. The shipping processes shall include the use of appropriate packing material and devices, according to the recommendations of the manufacturer or the United States Pharmacopeia Chapter 1079, in order to ensure that the drug is kept at appropriate storage temperatures throughout the delivery process to maintain the integrity of the medication.

☑ Use shipping containers that are sealed in a manner to detect evidence of opening or tampering.

☐ Develop and implement policies and procedures to ensure accountability, safe delivery, and compliance with temperature requirements. The policies and procedures shall address when drugs do not arrive at their destination in a timely manner or when there is evidence that the integrity of a drug was compromised during shipment. In these instances, the pharmacy shall make provisions for the replacement of the drug.

☑ Provide for an electronic, telephonic, or written communication mechanism for a pharmacy to offer counseling to the patient as defined in section 58-17b-613; and provide documentation of such counselling.

☐ Provide information to the patient indicating what the patient should do if the integrity of the package or drug was compromised during shipment.

38 ☑ ☐ Each drug dispensed from the pharmacy does have a label securely affixed to the container indicating the required minimum information, including: [UCA 58-17b-602 (5) (a) (i-viii)]

- ☑ name, address, & phone number of pharmacy
- ☑ filling date or last dispensing date
- ☑ name of the prescriber
- ☑ trade, generic or chemical name *(Unless Otherwise Indicated by Prescriber)*
- ☑ serial number of prescription
- ☑ name of the patient or animal owner/species
- ☑ directions for use & cautionary statements
- ☑ amount dispensed & strength of dosage form
- ☑ beyond use date

39 ☑ ☐ Unless otherwise requested, child-resistant containers will be used for dispensing medications to patients. [UAC 58-1-502(6)& 16 CFR 1700.14]

40 ☑ ☐ Controlled substances are not accepted back for destruction unless allowed for by state and federal law. [UAC R156-37-606 (1-2) & 21 CFR 1307.21]

41 ☑ ☐ The registered pharmacy does only processes electronically signed prescriptions for controlled substances under the following conditions: the pharmacy uses a pharmacy application that meets all the applicable requirements; the prescription is otherwise in conformity with the requirements of the Code of Federal Regulations; and Certification Authority (CA) has been obtained. The electronic prescription must be transmitted from the practitioner to the pharmacy in its electronic form and at no time may the prescription be converted to another form *(i.e. facsimile)* for transmission. [UAC R156-17b-613(1) & CFR, Title 21, Chapter 11, Section 1311]

42 ☑ ☐ Prescription files, including refill information, are maintained for a minimum of five years and should be immediately retrievable in written or electronic format. [UAC R156-17b-612 (4)]

43 ☑ ☐ Prescription records may be maintained electronically so long as the original of each prescription, including telephone prescriptions, is maintained in a physical file and contains all of the information required by federal and state law; and an automated data processing system is used for the storage and immediate retrieval of refill information for prescription orders. [UAC R156-37-602 (4) (a-b)]

44 ☑ ☐ All records relating to Schedule II controlled substances received, purchased, administered or dispensed by the practitioner shall be maintained separately from all other records of the pharmacy or practice. Records shall be maintained by the licensee for a period of five years. [UAC R156-37-602(3) (5)]

45 ☑ ☐ All records relating to Schedule III, IV, V controlled substances received, purchased, administered or dispensed by the practitioner shall be maintained separately from all other records of the pharmacy or practice. Records shall be maintained by the licensee for a period of five years. [UAC R156-37-602(3) (6)]

46 ☐ ☑ Requirement for annual controlled substances inventory shall be within 12 months following the inventory date of each year and may be taken within four days of the specified inventory date and shall include all stocks including out-of-date drugs and drugs in automated pharmacy systems. [UAC R156-17b-605 (4)]

47 ☐ ☐ Requirements for taking the initial controlled substances inventory shall include the following: all pharmacies shall take an inventory on the opening day of business. Such inventory shall include all controlled substances including any out-of-date drugs and drugs in automated pharmacy systems. In the event a pharmacy commences business with no controlled substances on hand, the pharmacy shall record this fact as the initial inventory. An inventory reporting no Schedule I and II controlled substances shall be listed separately from an inventory reporting no Schedule III, IV, and V controlled substances. The initial inventory shall serve as the pharmacy's inventory until the next completed inventory as specified in Subsection (4) of this section. [UAC R156-17b-605 (3) (a-c)] ☐ N/A

48 ☑ ☐ General Requirements for inventory of a pharmacy shall include: [UAC R156-17b-605 (2)(a)(b)(c)(e)(f)(i)(j)]

- ☑ the PIC shall be responsible for taking all required inventories, but may delegate the performance of the inventory to another person or persons;
- ☑ the inventory records shall be maintained for a period of five years and be readily available for inspection
- ☑ the inventory shall be filed separately from all records
- ☐ the inventory may be taken either as the opening of the business or the close of business on the inventory date;
- ☑ the person taking the inventory and the PIC shall indicate the time the inventory was taken and shall sign and date the inventory with the date the inventory was taken. The signature of the PIC and the date of the inventory shall be documented within 72 hours or three working days of the completed initial, annual, change of ownership and closing inventory.
- ☑ the inventory of Schedule I and II controlled substances shall be listed separately from the inventory of Schedule III, IV and V controlled substances;
- ☑ if the pharmacy maintains a perpetual inventory of any of the drugs required to be inventories, the perpetual inventory shall be reconciled on the date of the inventory.

49 ☐ ☐ n/a All pharmacies shall maintain a perpetual inventory of all Schedule II controlled substances. [UAC R156-17b-605(7)]

50 ☐ ☐ n/a The pharmacy does reconcile its controlled substance inventory to account for shortages of controlled substances. [UAC R156-17b-603 (3) (k) & R156-37-502(4)]

51 ☑ ☐ Any facility who experiences any theft, including diversion, or significant loss of controlled substances shall immediately file the appropriate forms with the Drug Enforcement Administration, with a copy to the Division directed to the attention of the Investigation Bureau Division; and report the incident to the local law enforcement agency. [UAC R156-37-602 (2)]

52 ☐ ☐ n/a Pharmacists or other responsible individuals do verify that the suppliers' invoices of controlled substances, listed on the invoices were actually received by clearly recording their initials and the actual date of receipt of the controlled substances. [UAC R156-17b-614a (11)]

53 ☐ ☐ n/a The facility does maintain a record of suppliers' credit memos for controlled substances. [UAC R156-17b-614a (12)]

54 ☐ ☐ n/a The facility does maintain a copy 3 of DEA order form (form 222) which has been properly dated, initialed, and filed and all copies of each unaccepted or defective order form and any attached statements or other documents. [UAC R156-17b-614a (9)]

55 ☑ ☐ The Division shall implement on a statewide basis, including non-resident pharmacies as defined in Section 58-17b-102, the following two options for a pharmacist to submit information: real-time submission of the information required to be submitted under this part of the controlled substance database; and 24-hour dail or next business day, whichever is later, batch submission of the information required to be submitted under this part to the controlled substance database. [UCA 58-37f-203(1)(a)(i,ii)]

56 ☑ ☐ In accordance with 58-37f-203(6), the pharmacist-in-charge and the pharmacist identified in Subsections 58-37f-203(2) and (3) shall provide the following data fields to the Division: the state that issued identification, type of identification used, and identification number used by individual picking up dispensed drug. [UCA R156-37f-203 (4) (aa-cc)]

57 ☐ ☑ The pharmacy maintains emergency kits in nursing homes, long-term care facilities, or other entities (such as hospice, EMT's, ambulances)? If the answer is "yes", note name(s) of facilities or entities.

58 ☐ ☑ The pharmacy maintains automated prescription dispensing devices outside the pharmacy such as Pyxis in a nursing home? If the answer is "yes", note type and location.

59 ☐ ☑ The pharmacy utilizes an Automated Pharmacy System? If the answer is "yes" to this question, a automation questionnaire must be completed. [UAC R156-17b-620]

60 ☐ ☑ Does the pharmacy purchase any compound products from other entities for dispensing to patients? [UAC 58-17b-102(18)(b)(i)]

61 ☐ ☑ The facility is engaged in compounding with hazardous drugs as defined by USP-NF Chapter 800. If you answer "yes" to this question, a compounding questionnaire must be completed.

62 ☐ ☑ The facility is engaged in simple, medium, or complex compounding activities as defined by USP 35 Chapter 795. If you answer "yes" to this question, a compounding questionnaire must be completed. [(UAC R156-17b-614a (3)]

63 ☑ ☐ The facility is engaged in low, medium, or high risk *sterile* compounding as defined by USP 35 Chapter 797. If you answer "yes" to this question, a compounding questionnaire must be completed. [UAC R156-17b-614a (3)]

COMMENTS

(2) Pharmacy has a current list of licenses.

(12) Staff has nametags.

(16) Pharmacy is clean and organized.

(20) 8 outdates were found in pharmacy stock.

(32) When mailing prescriptions outside telephone area code, required statement must be included.

(37) • SOPs for shipping must address that if prescription doesn't arrive in a timely manner of if it was compromised during shipment that the pharmacy will make provisions for replacement.

◦ Pharmacy is to provide info on what to do if package or drug is compromised during shipment.

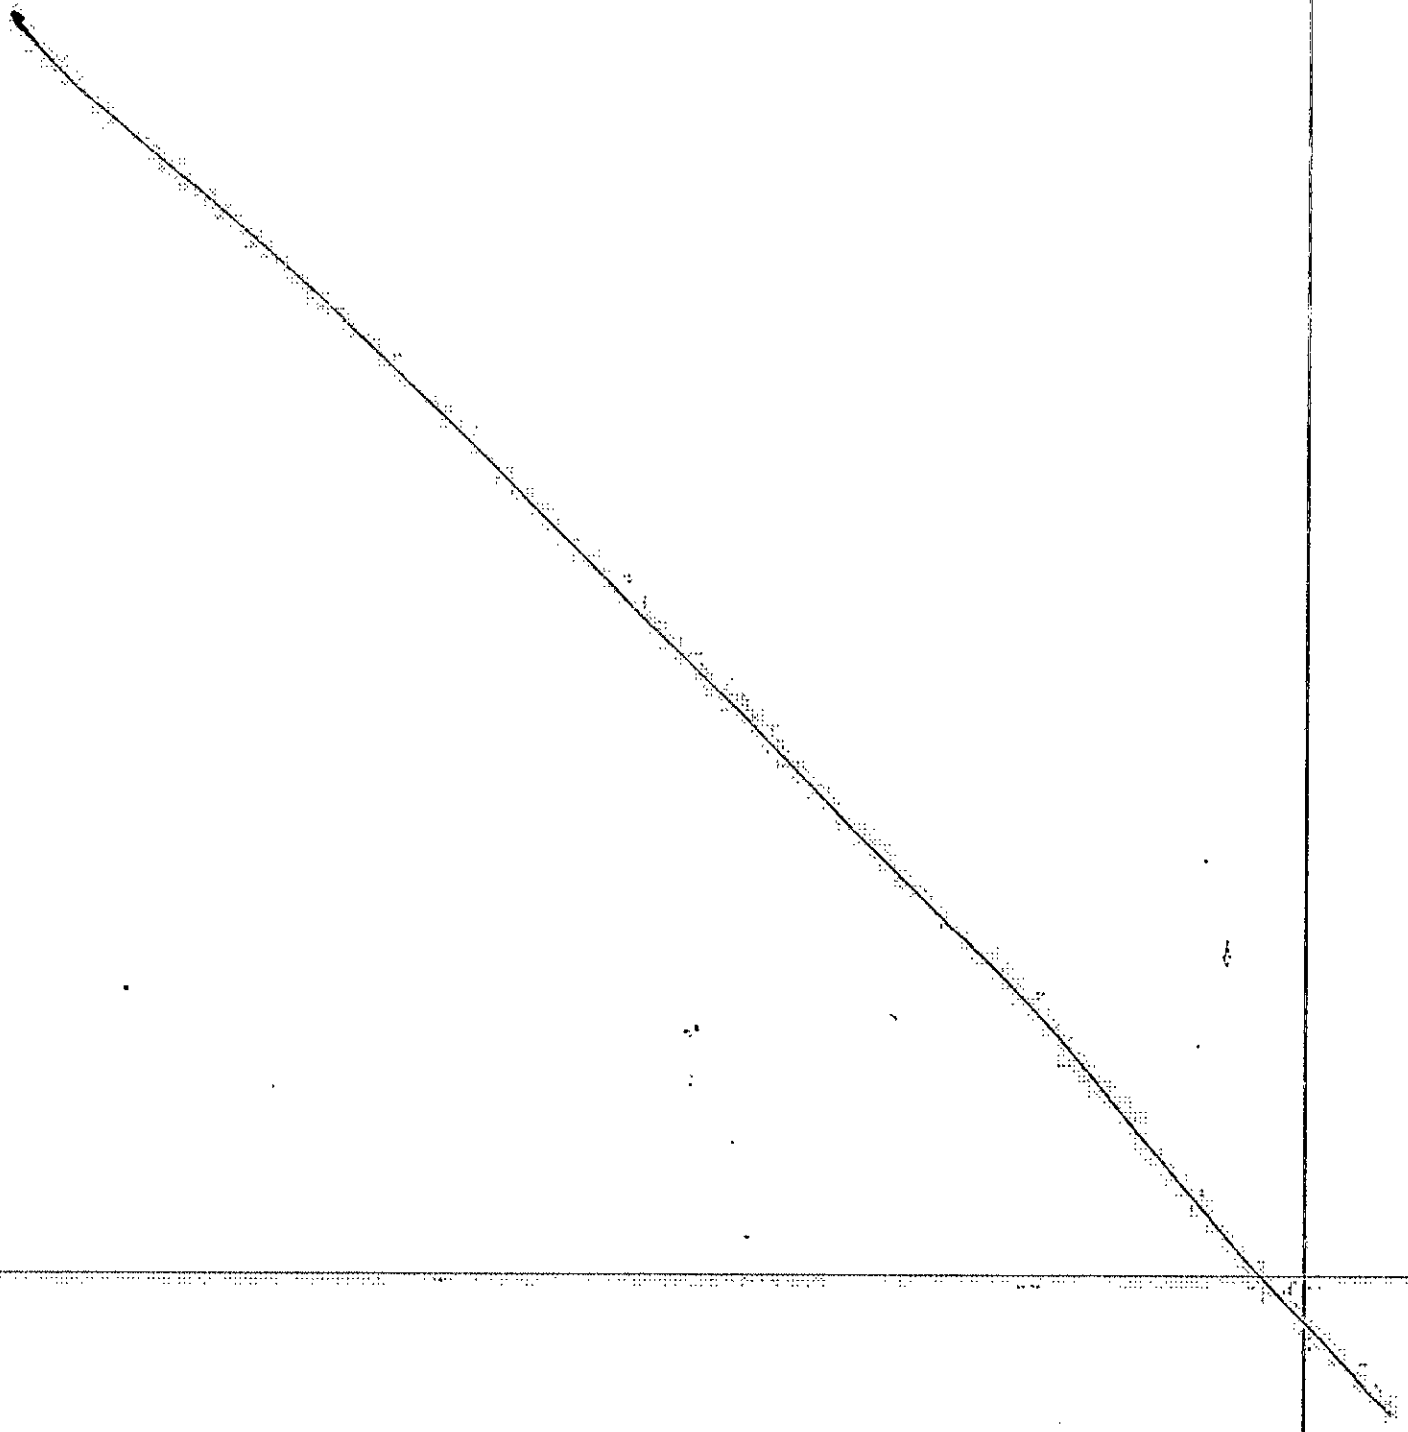
- Pharmacy does not carry controlled substances.

(46, 48) Pharmacy does not have yrly annual controlled substance inventories for the years 2019, 2020, 2021, or 2022.

◦ No automation.

◦ No nonsterile compounding.

(63) a sterile compounding inspection was conducted.



☑ By checking this box it is indicated that the undersigned Division Investigator has reviewed the above inspection report and comments made with the undersigned "Responsible Party."

INFORMATION

Pharmacy Name: Oakstead Infusion Pharmacy, LLC. DBA: Oakstead Infusion Vital Care Date: 7/6/2022

Pharmacy License Number: 9704028-1704 Expiration Date: 09/30/2023

Controlled Substance License Number: 9704028-8913 Expiration Date: 09/30/2023

DEA Registration Number: FO5904556 Expiration Date: 12/31/2024

Pharmacy FEIN #: 47-5399800

Pharmacist-In-Charge (PIC): Aleesha Richman Galeria

Pharmacist-In-Charge License Number: 6537899-1701 Expiration Date: 09/30/2023

Compounding Facilities engaged in simple, moderate or complex non-sterile or any level of sterile compounding activities shall be required to maintain proper records and procedure manuals and establish quality control measures to ensure stability, equivalency where applicable and sterility. The following requirements shall be met: (a)Shall follow USP-NF Chapter 795, compounding of non-sterile preparations, and USP-NF Chapter 797 if compounding sterile preparations. [UAC R156-17b-614a (3)]

	Yes	No	GENERAL OPERATIONS AND INFORMATION
			Which categories of compounding does the facility perform?
1.	☑	☐	The pharmacy does perform compounding identified as **low-risk** [USP-NF Chapter 797- *USP Microbial Contamination Risk Levels- Low-Risk Level CSPs]*
			☑ The CSPs are compounded with aseptic manipulations entirely within ISO Class 5 or better air quality using only sterile ingredients, products, components, and devices.
			☑ The compounding involves only transfer, measuring, and mixing manipulations using not more than three commercially manufactured packages of sterile products and not more than two entries into any one sterile container or package (e.g., bag, vial) of sterile product or administration container/ device to prepare the CSP.
			☑ Manipulations are limited to aseptically opening ampules, penetrating disinfected stoppers on vials with sterile needles and syringes, and transferring sterile liquids in sterile syringes to sterile administration devices, package containers of other sterile products, and containers for storage and dispensing.
			☑ For a low-risk level preparation, in the absence of passing a sterility teste (see Sterility Tests <71>) the storage periods cannot exceed the following time periods: before administration, the CSPs are properly stored and are exposed for not more than 48 hours at controlled room temperature (see General Notices and Requirements), and for 45 days in solid frozen state between -25°and -10°.
	☑	☐	The pharmacy does perform compounding identified as **medium-risk.** When CSPs are compounded aseptically under Low-Risk Conditions and one or more of the following conditions exist, such CSPs are at a medium risk of contamination. [USP-NF Chapter 797- *USP Microbial Contamination Risk Levels- Medium-Risk Levels CSPs]*
			☑ Multiple individual or small doses of sterile products are combined or pooled to prepare a CSP that will be administered to either multiple patients or to one patient on multiple occasions.
			☑ The compounding process includes complex aseptic manipulations other than the single-volume transfer.
			☑ The compounding process requires unusually long duration, such as that required to compete dissolution or homogenous mixing.
			☑ For a medium-risk preparation, in the absence of passing a sterility test (see Sterility Tests <71>0, the storage periods cannot exceed the following time periods: before administration, the CSPs are properly stored and are exposed for not more than 30 hours at controlled room temperature (see Generals Notices and Requirements), and for 45 days in solid frozen state between 25°and -10°.

☐ ☑ The pharmacy does perform compounding identified as **high-risk** [USP-NF Chapter 797- *USP Microbial Contamination Risk Levels- High-Risk Levels CSPs]*

☐ Non sterile ingredients, including manufactured products not intended for sterile routes of administration (e.g. oral), are incorporated or a non-sterile device is employed before terminal sterilization.

☐ Any of the following are exposed to air quality worse than ISO 5 for more than 1 hour (see *Immediate-Use CSPs*):

- ☐ Sterile contents of commercially manufactured products,
- ☐ CSPs that lack effective antimicrobial preservative, and
- ☐ Sterile surfaces of devices and containers for the preparation, transfer, sterilization, and packaging of CSPs

☐ Compounding personnel are improperly garbed and gloved (see *Personnel Cleansing and Use of Barrier Protective Equipment)*.

☐ Nonsterile water-containing preparations are stored for more than 6 hours before being sterilized.

☐ It is assumed, and not verified by examination of labeling and documentation from suppliers or by direct determination, that the chemical purity and content strength of ingredients meet their original or compendia specifications in unopened or in opened packages of bulk ingredients (see *Ingredient Selection under Pharmaceutical Compounding- Non-Sterile Preparations <795>)*.

☐ In the absence of passing a sterility test, the storage periods cannot exceed the following time periods: before administration, the CSPs are properly stored and are exposed for not more than 24 hours at controlled room temperature (see *General Notices and Requirements)*, for not more than 3 days at a cold temperature (see *General Notices and Requirements)*, and for 45 days in a solid frozen state between 25° and -10°.

☐ ☑ n/a **Immediate-use provision in intended only for those situation where there is a need for emergency or immediate patient administration of a CSP.** Such situations may include cardiopulmonary resuscitation, emergency room treatment, preparation of diagnostic agents, or critical therapy where the preparation of the CSP under conditions described for Low-Risk Level CSPs subjects the patient to additional risk due to delays in therapy. Immediate-use CSPs are not intended for storage for anticipated needs or batch compounding. Preparations that are medium-risk level and high-risk level CSPs shall not be prepared as immediate-use CSPs. [USP-NF Chapter 797- *Immediate-use CSPs*]

☐ ☑ **Immediate-use CSPs** are exempt from the requirements described for Low-Risk Label CSPs only when all of the following are met: [USP-NF Chapter 797- *Immediate-use CSPs]*

☐ The compounding process involves simple transfer of not more than three commercially manufactured packages of sterile nonhazardous products or diagnostic radiopharmaceutical products from the manufacturer's original containers and not more than two entries into any one container or package (e.g., bag, vial) of sterile infusion solution or administration container/device. For example, anti-neoplastics shall not be prepared as immediate-use CSPs because they are hazardous drugs.

☐ Unless required for the preparation, the compounding procedure is a continuous process not to exceed 1 hour.

☐ During preparation, aseptic technique is followed and, if not immediately administered, the finished CSP is under continuous supervision to minimize the potential for contact with nonsterile surfaces, introduction of particulate matter or biological fluids, mixups with other CSPs, and direct contact of outside surfaces.

☐ Administration begins not later than 1 hour following the start of the preparation of the CSP.

☐ Unless immediately and completely administered by the person who prepared it or immediate and complete administration is witnessed by the preparer, the CSP shall bear a label listing patient identification information, the names and amounts of all ingredients, the name or initials of the person who prepared the CSP, and the exact 1-hour BUD and time.

☐ If administration has not begun within 1 hour following the start of preparing the CSP, the CSP shall be promptly, properly, and safely discarded.

2. ☑ ☐ Does the facility dispense sterile compounded preparations pursuant to a prescription?

3. ☐ ☑ Does the facility make sterile compounded preparations that are delivered to a practitioner for administration to a patient in an office, clinic, or facility?

4. ☐ ☑ A pharmacy licensed under this chapter may, subject to rules established by the Division, repackage or compound a prescription drug for sale to a practitioner if: the prescription drug: does not include a compounded drug; or includes a compounded drug; and is not a controlled substance; the pharmacy labels the prescription drug "for

office use only"; the practitioner administers the drug to a patient in the practitioner's office or facility; and except in accordance with Title 58, Chapter 17b, Part 8, Dispensing Medical Practitioner and Dispensing Medical Practitioner Clinic Pharmacy, the practitioner does not dispense the drug to the patient. [UCA 58-17b-624(1)(a)(i)(ii)(A)(B)(b)(c)(d)] Pursuant to Section 58-17b-624, a pharmacy may repackage or compound a prescription drug for sale to a practitioner for office use provided that it is in compliance with all applicable federal and state laws and regulations regarding the practice of pharmacy, including, but not limited to the Food, Drug, and Cosmetic Act, 21 U.S.C A § 301 et seq. [R156-17b-624]

5. ☑ ☐ Does the facility distribute sterile compounded preparations to hospitals, clinics, or surgery centers?

6. ☐ ☑ Does the facility have a sales force that distributes samples containing active ingredients? List samples.

7. ☐ ☑ Does the facility compound sterile preparations for veterinary use?

8. ☐ ☑ Is the facility registered with the FDA as an "Outsourcing Facility"?

9. ☑ ☐ The facility does compound:

☐ allergen extracts	☐ baths and soaks for live organs and tissues
☑ parental solutions	☐ oral or nasal inhalation preparations
☐ parenteral suspensions	☐ irrigations for wounds and body cavities
☑ preservative free parenterals	☐ ophthalmic preparations

10. ☐ ☑ Does the facility compound investigational drugs? List.

11. ☑ ☐ The facility does not prepare a prescription drug in a dosage form which is regularly and commonly available from a manufacturer in quantities and strengths prescribed by a practitioner. [UAC 58-17b-102(18)(b)(ii)]

12. ☑ ☐ The facility does not prepare a prescription drug for sale to another pharmacist or pharmaceutical facility. [UAC 58-17b-102(18)(b)(i)]

13. ☑ ☐ The facility does not prepare a prescription drug, sterile product, or device which has been withdrawn from the market for safety reasons. [UAC 58-17b-102(18)(b)(iii)]

14. ☐ ☑ Does the pharmacy makes sterile compounded preparations using bulk powder Active Pharmaceutical Ingredients?

15. ☐ ☑ Bulk active ingredients must be procured from a facility registered with the federal Food and Drug Administration and must not be listed on the federal Food and Drug Administration list of drug products withdrawn or removed from the market for reasons of safety or effectiveness. [UAC R156-17b-614a(3)(c)(i)(ii)]

16. ☐ ☑ Does the facility have a lyophilizer?

17. ☑ ☐ **The compounding facility shall have written, properly approved SOPs** designed to ensure the quality of the environment in which a CSP is prepared. [USP-NF Chapter 797-*Responsibility of Compounding Personnel-Suggested Standard Operating Procedures (SOPs)]*

a. ☑ Procedures for **measuring, mixing, dilution, purification, sterilization, packaging, and labeling** conform to the correct sequence and quality established for the specified CSP. [USP-NF Chapter 797- *Responsibility of Compounding Personnel*]

b. ☑ **All cleaning and disinfecting** practices and policies for the compounding of CSPs shall be included in written SOPs and shall be followed by all compounding personnel. [USP-NF Chapter 797- *Environmental Quality and Control and Disinfecting the Compounding Area*]

- ☑ ISO Class 5 PEC (e.g. LAFW, BSC, CAI, CACI)
- ☑ Counters and easily cleanable work surfaces
- ☑ Floors
- ☑ Walls
- ☑ Ceiling
- ☑ Storage Shelving

c. ☑ It is necessary that **equipment, apparatus, and devices** used to compound a CSP be consistently capable of operating properly and within acceptable tolerance limits. [USP-NF Chapter 797- *Element of Quality Control, Equipment]*

- ☑ Equipment calibration
- ☑ Annual maintenance
- ☑ Monitoring for proper function and controlled procedures for use of the equipment and specified time frames for these activities
- ☑ Routine maintenance and frequencies

d. ☑ The principles of HEPA-filtered unidirectional airflow in the work environment shall be understood and practiced in the compounding process in order to achieve the desired environmental conditions. Policies and procedures for **maintaining and working within the PEC** area shall be written and followed. The policies and procedure will be determined by the scope and risk levels of the aseptic compounding activities utilized during the preparation of the CSPs. [USP-NF Chapter 797- *Environmental Quality and Control, Facility Design and Environmental Control]*

e. n/a ☐ When compounding activities require **the manipulation of a patient's blood-derived or other biological material (e.g., radiolabeling a patient's or donor's white blood cells), the manipulations shall be clearly separated from routine material-handling** procedures and equipment used in CSP preparation activities, and they shall be controlled by specific SOPs in order to avoid any cross contamination. [USP-NF Chapter 797- *Environmental Quality and Control- Additional Personnel Requirements*]

f. ☑ **Double-checking compounding** accuracy shall be followed for every CSP during preparation and immediately prior to release. [USP-NF Chapter 797- *Preparation Release Checks and Tests, Compounding Accuracy Checks*]

g. n/a ☐ When **high-risk level CSPs are dispensed before receiving the results of their sterility tests**, there shall be a written procedure requiring daily observations of the incubating test specimens and immediate recall of the dispensed CSPs when there is any evidence of microbial growth in the test specimens. [USP-NF Chapter 797- *Finished Preparation Release Checks and Tests, Sterility Testing*]

h. ☐ **Verifying the correct identity and quality** of CSPs before they are dispensed and administered: [USP-NF Chapter 797- *Finished Preparation Release Checks and Tests, Identity and Strength Verification of Ingredients*]

- ☐ Labels of CSPs bear correct names and amounts or concentrations of ingredients, the total volume, the BUD, the appropriate route(s) of administration, the storage conditions, and other information for safe use.
- ☐ That there are correct identities, purities, and amounts of ingredients by comparing the original written order with the written compounding record for the CSP.
- ☐ That correct fill volumes in CSPs and correct quantities of filled units of the CSPs were obtained. When the strength of finished CSPs cannot be confirmed to be accurate, based on the above three inspections, the CSPs shall be assayed by methods that are specific for the active ingredients.

i. ☑ To ensure consistent practices in determining and assigning BUDs, the compounding facility should have written policies and procedures governing the **determination of the BUDs** for all compounded products. The SOP manual of the compounding facility and each specific CSP formula record shall describe the general basis used to assign the BUD and storage conditions. [USP-NF Chapter 797- *Storage and Beyond-Use Dating*]

j. ☑ The **compounding procedures and sterilization methods** for CSPs correspond to correctly designed and verified written documentation in the compounding facility. Verification requires planned testing, monitoring, and documentation to demonstrate adherence to environmental quality requirements, personnel practices, and procedures critical to achieving and maintaining sterility, accuracy, and purity of finished CSPs. [USP-NF Chapter 797- *Verification of Compounding Accuracy and Stability*]

k. ☑ Commercially available sterile drug products, sterile ready-to-use containers, and devices are examples of sterile components. A written procedure for **unit-by-unit physical inspection preparatory to use** is followed to ensure that these components are sterile, free from defects, and otherwise suitable for their intended use. [USP-NF Chapter 797- *Elements of Quality Control- Ingredients and Devices- Sterile Ingredients and Devices*]

l. ☑ Compounding personnel shall ensure proper storage and security of CSPs prepared by or dispensed from the compounding facility until either their BUDs are reached or they are administered to patients. In fulfilling this general responsibility, the compounding facility is responsible for the proper **packaging, handling, transport, and storage of CSPs prepared by or dispensed from it, including the appropriate education, training, and supervision of compounding personnel assigned to these functions.** The compounding facility should assist in the education and training of noncompounding personnel responsible for carrying out any aspect of these functions. Establishing, maintaining, and ensuring compliance with comprehensive written policies and procedures encompassing these responsibilities is a further responsibility of the compounding facility. Where noncompounding personnel are assigned tasks involving any of these responsibilities, the policies and procedures

encompassing those tasks should be developed by compounding supervisors. [USP-NF Chapter 797- *Maintaining Sterility, Purity, and Stability of Dispensed and Distributed CSPs*]

m. ☑ Inappropriate processes or techniques involved with packaging, handling, and transport can adversely affect quality and package integrity of CSPs. Although compounding personnel routinely perform many of the tasks associated with these functions, some tasks, such as **transport, handling, and placement into storage, may be fulfilled by noncompounding personnel** who are not under the direct administrative control of the compounding facility. Under these circumstances, appropriate SOPs shall be established by the compounding facility with the involvement of other departments or services whose personnel are responsible for carrying out those CSP-related functions for which the compounding facility has a direct interest. The performance of the noncompounding personnel is monitored for compliance to established policies and procedures. [USP- NF Chapter 797- *Maintaining Sterility, Purity, and Stability of Dispensed and Distributed CSPs- Packaging, Handling, and Transport*]

n. ☑ **When CSPs are distributed to locations outside the premises** in which they are compounded, compounding personnel select packing containers and materials that are **expected to maintain physical integrity, sterility, and stability of CSPs during transit**. Packing is selected that simultaneously protects CSPs from damage, leakage, contamination, and degradation, and protects personnel who transport packed CSPs from harm. The SOP manual of the compounding facility specifically describes appropriate packing containers and insulating and stuffing materials, based on information from product specifications, vendors, and experience of compounding personnel. Written instructions that clearly explain how to safely open containers of packed CSPs are provided to patients and other recipients. [USP-NF Chapter 797- *Maintaining Sterility, Purity, and Stability of Dispensed and Distributed CSPs- Packing and Transporting CSPs- Packing CSPs for Transit*]

o. ☑ SOPs must exist to ensure that **storage conditions in the patient-care setting** are suitable for the CSP-specific storage requirements. [USP-NF Chapter 797- *Maintaining Sterility, Purity, and Stability of Dispensed and Distributed CSPs- Packing and Transporting CSPs, Use and Storage*]

☑ Procedures include daily monitoring and documentation of drug storage refrigerators to ensure temperatures between 2° and 8°

☐ and the monthly inspection of all drug storage locations by compounding personnel.

p. ☑ The SOP manuals of compounding facilities shall describe **specific instructions for receiving, acknowledging, and dating receipts, and for recording, or filing, and evaluating reports of adverse events and of the quality of preparation** claimed to be associated with CSPs. Reports of adverse events with CSPs shall be reviewed promptly and thoroughly by compounding supervisors to correct and prevent future occurrences. Compounding personnel are encouraged to participate in adverse event reporting and product defects programs of the FDA and USP. [USP-NF Chapter 797- *Patient Monitoring and Adverse Events Reporting*]

Personnel Training and Requirements

18. ☑ ☐ A written description of specific training and performance evaluation program for individuals involved in the use of aseptic techniques for the preparation of sterile products shall be developed for each site. This program equips personnel with the appropriate knowledge and trains them in the required skills necessary to perform the assigned tasks. **Each person assigned to the aseptic area in the preparation of sterile products shall successfully complete specialized training in aseptic techniques and aseptic area practices prior to preparing CSPs** (see Personnel Training and Evaluation in Aseptic Manipulation Skills and Personnel Training and Competency Evaluation of Garbing, Aseptic Work Practices and Cleaning/Disinfection Procedures). [USP-NF Chapter 797 - *Elements of Quality Control*]

19. ☑ ☐ **Personnel who prepare CSPs shall be trained** conscientiously and skillfully by **expert personnel, multi-media instructional sources, and professional publications** in the theoretical principles and practical skills of **garbing procedures, aseptic work practices, achieving and maintaining ISO Class 5 environmental conditions, and cleaning and disinfection procedures**. [USP-NF Chapter 797- *Appendix I-Personnel Training and Competency Evaluation of Garbing, Aseptic Work Practices and Cleaning/Disinfection Procedures*]

20. ☑ ☐ Compounding personnel shall complete: [USP-NF Chapter 797- *Appendices- Appendix I-Personnel Training and Competency Evaluation of Garbing, Aseptic Work Practices and Cleaning/Disinfection Procedures*]

☑ didactic training, ☐ pass written competence assessments,

☑ undergo skill assessment using observational audit tools, ☑ and media-fill testing.

21. ☑ ☐ **Compounding personnel shall be visually observed during the process of performing hand hygiene and garbing procedures** (see *Personnel Cleansing* and *Garbing* under *Personnel Training and Evaluation in Aseptic Manipulation Skills* above). **The visual observation shall be documented** on a form such as the Sample Form for

Assessing Hand Hygiene and Garbing Related Practices of Compounding Personnel [see Appendix III] and maintained to provide a permanent record and long-term assessment of personnel competency. [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Training and Competency Evaluation of Garbing, Aseptic Work Practices, and Cleaning/Disinfection Procedures- Competency Evaluation of Garbing and Aseptic Work Practice*]

22. ☑ ☐ **Sampling of compounding personnel glove fingertips shall be performed for all CSP risk level compounding** because direct touch contamination is the most likely source of introducing microorganisms into CSPs prepared by humans. Glove fingertip sampling **shall be used to evaluate the competency of personnel in performing hand hygiene and garbing procedures in addition to educating compounding personnel on proper work practices, which include frequent and repeated glove disinfection using sterile 70% IPA during actual compounding of CSPs.** All personnel shall demonstrate competency in proper hand hygiene and garbing procedures and in aseptic work practices (e.g., disinfection of component surfaces, routine disinfection of gloved hands). [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Training and Competency Evaluation of Garbing, Aseptic Work Practices, and Cleaning/Disinfection Procedures- Competency Evaluation of Garbing and Aseptic Work Practice*]

23. ☑ ☐ **Sterile contact agar plates shall be used to sample the gloved fingertips** of compounding personnel **after garbing** in order to assess garbing competency and **after completing the media-fill preparation** (without applying sterile 70% IPA) in order to assess the adequacy of aseptic work practices prior to being initially allowed to prepare CSPs for human use and for more experienced personnel to maintain their qualifications to prepare CSPs for human use. [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Training and Competency Evaluation of Garbing, Aseptic Work Practices, and Cleaning/Disinfection Procedures- Competency Evaluation of Garbing and Aseptic Work Practice*]

24. ☑ ☐ **All compounding personnel shall successfully complete an initial competency evaluation and gloved fingertip/thumb sampling procedure (zero cfu) no less than three times before initially being allowed to compound CSPs for human use.** Immediately after the compounding employee completes the hand hygiene and garbing procedure (e.g., donning of sterile gloves prior to any disinfection with sterile 70% IPA), the evaluator will collect a gloved fingertip and thumb sample from both hands of the compounding employee onto appropriate agar plates by lightly pressing each fingertip into the agar. The plates will be incubated for the appropriate incubation period and at the appropriate temperature (see Incubation Period). **After completing the initial gowning and gloving competency evaluation, re-evaluation of all compounding personnel for this competency shall occur at least annually for personnel who compound low- and medium-risk level CSPs and semi-annually for personnel who compound high-risk level CSPs** using one or more sample collections during any media-fill test procedure before they are allowed to continue compounding CSPs for human use. [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Training and Competency Evaluation of Garbing, Aseptic Work Practices, and Cleaning/Disinfection Procedures- Competency Evaluation of Garbing and Aseptic Work Practice*]

25. ☑ ☐ **After successful completion of an initial Hand Hygiene and Garbing Competency Evaluation, all compounding personnel shall have their aseptic technique and related practice competency evaluated initially during the Media-Fill Test Procedure and subsequent annual or semi-annual Media-Fill Test Procedures.** Records of these evaluations will be maintained using a form such as the Sample Form for Assessing Aseptic Technique and Related Practices of Compounding Personnel (see Appendix IV) and maintained to provide a permanent record of and long-term assessment of personnel competency. [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Training and Competency Evaluation of Garbing, Aseptic Work Practices, and Cleaning/Disinfection Procedures- Competency Evaluation of Garbing and Aseptic Work Practice*]

26. ☑ ☐ **Compounding personnel shall perform didactic review and pass written and media-fill testing of aseptic manipulative skills initially, at least annually thereafter for low- and medium-risk level compounding, and semiannually for high-risk level compounding.** Compounding personnel who fail written tests or whose media-fill test vials result in gross microbial colonization shall be immediately re-instructed and re-evaluated by expert compounding personnel to ensure correction of all aseptic practice deficiencies. [USP-NF Chapter 797- *Personnel Training and Evaluation in Aseptic Manipulation Skills*]

27. ☐ ☐ **Compounding personnel and other personnel responsible for cleaning shall be visually observed during the process of performing cleaning and disinfecting procedures, during initial personnel training on cleaning procedures, during changes in cleaning staff,** and at the **completion of any media-fill test procedure** (see

Cleaning and Disinfecting of Compounding Areas). [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Training and Competency Evaluation of Garbing, Aseptic Work Practices, and Cleaning/Disinfection Procedures, Surface Cleaning and Disinfection Sampling and Assessment*]

28. ☑ ☐ **In the event that cleaning and disinfecting procedures are also performed by other support personnel** (e.g., institutional environmental services, housekeeping), thorough training of proper hand hygiene, garbing, and cleaning and disinfection procedures shall be done by a qualified aseptic compounding expert. After completion of training, support **personnel shall routinely undergo performance evaluation of proper hand hygiene, garbing, and all applicable cleaning and disinfecting procedures conducted by a qualified aseptic compounding expert.** [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Training and Competency Evaluation of Garbing, Aseptic Work Practices, and Cleaning/Disinfection Procedures*]

29. ☐ ☐ n/a **Compounding personnel of reproductive capability shall confirm in writing that they understand the risks of handling hazardous drugs.** The **training shall include** at least the following: [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]
- ☐ safe aseptic manipulation practices;
- ☐ negative pressure techniques when utilizing a BSC or CACI;
- ☐ correct use of CSTD devices;
- ☐ containment, cleanup, and disposal procedures for breakages and spills; and
- ☐ treatment of personnel contact and inhalation exposure.

Handwashing and Garbing

30. ☑ ☐ **When individuals are experiencing rashes, sunburn, weeping sores, conjunctivitis, active respiratory infection, as well as when they wear cosmetics, they shed these particles at even higher rates.** Particles shed from compounding personnel pose an increased risk of microbial contamination of critical sites of CSPs. **Therefore, compounding personnel with such conditions as mentioned above shall be excluded from working in ISO Class 5 (see Table 1) and ISO Class 7 (see Table 1) compounding areas until their conditions are remedied.** [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Cleansing and Garbing*]

31. ☑ ☐ **Before entering the buffer area or segregated compounding area** (see Low-Risk Level CSPs with 12-Hour or Less BUD), **compounding personnel shall remove personal outer garments** (e.g., bandannas, coats, hats, jackets, scarves, sweaters, vests); **all cosmetics, because they shed flakes and particles; and all hand, wrist, and other visible jewelry or piercings** (e.g., earrings, lip or eyebrow piercings) that can interfere with the effectiveness of PPE (e.g., fit of gloves and cuffs of sleeves). **The wearing of artificial nails or extenders is prohibited** while working in the sterile compounding environment. **Natural nails shall be kept neat and trimmed.** [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Cleansing and Garbing*]

32. ☑ ☐ **Personnel shall don the following PPE in an order that proceeds from those activities considered the dirtiest to those considered the cleanest.** Garbing activities considered the dirtiest include donning of ☑ dedicated shoes or shoe covers, ☐ head and facial hair covers (e.g., beard covers in addition to face masks), and ☑ face masks/eye shields. Eye shields are optional unless working with irritants such as germicidal disinfecting agents or when preparing hazardous drugs. [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Cleansing and Garbing*]

33. ☑ ☐ **After donning dedicated shoes or shoe covers, head and facial hair covers, and face masks, a hand cleansing procedure shall be performed by removing debris from underneath fingernails using a nail cleaner under running warm water followed by vigorous hand washing. Hands and forearms shall be washed to the elbows for at least 30 seconds with soap (either nonantimicrobial or antimicrobial) and water while in the ante-area.** The use of antimicrobial scrub brushes is not recommended because they can cause skin irritation and skin damage. Hands and forearms to the elbows will be completely dried using either lintfree disposable towels or an electronic hand dryer. ☑ **After completion of hand washing, a nonshedding gown with sleeves that fit snugly around the wrists and enclosed at the neck is donned.** Gowns designated for buffer-area-use shall be worn, and **preferably they should be disposable. If reusable gowns are worn, they should be laundered appropriately for buffer area use.** [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Cleansing and Garbing*]

34. ☑ ☐ **Once inside the buffer area or segregated compounding area** (see Low-Risk Level CSPs with 12-Hour or Less BUD), **and prior to donning sterile powder-free gloves, antiseptic hand cleansing shall be performed**

using a waterless alcohol-based surgical hand scrub with persistent activity following manufacturers' recommendations. Hands are allowed to dry thoroughly before donning sterile gloves. [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Cleansing and Garbing*]

35. ☑ ☐ **Sterile gloves shall be the last item donned before compounding begins.** Gloves become contaminated when they contact nonsterile surfaces during compounding activities. Disinfection of contaminated gloved hands may be accomplished by wiping or rubbing sterile 70% IPA to all contact surface areas of the gloves and letting the gloved hands dry thoroughly. Only use gloves that have been tested for compatibility with alcohol disinfection by the manufacturer. **Routine application of sterile 70% IPA shall occur throughout the compounding process** and whenever nonsterile surfaces (e.g. vials, counter tops, chairs, carts) are touched. **Gloves on hands shall also be routinely inspected for holes, punctures, or tears and replaced immediately if such are detected.** Antiseptic hand cleansing shall be performed as indicated above. Compounding personnel. [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Cleansing and Garbing*]

36. ☑ ☐ **When compounding personnel exit the compounding area during a work shift, the exterior gown may be removed and retained in the compounding area if not visibly soiled, to be re-donned during that same work shift only. However, shoe covers, hair and facial hair covers, face masks/eye shields, and gloves shall be replaced with new ones before re-entering the compounding area, and proper hand hygiene shall be performed.** [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Cleansing and Garbing*]

37. ☐ ☐ n/a **During high-risk compounding activities that precede terminal sterilization, such as weighing and mixing of nonsterile ingredients, compounding personnel shall be garbed and gloved the same as when performing compounding in an ISO Class 5 (see Table 1) environment. Properly garbed and gloved compounding personnel who are exposed to air quality that is either known or suspected to be worse than ISO Class 7 (see Table 1) shall re-garb PPE along with washing their hands properly, performing antiseptic hand cleansing with a waterless alcohol-based surgical hand scrub, and donning sterile gloves upon reentering the ISO Class 7 (see Table 1) buffer area. When CAIs and CACIs are the source of the ISO Class 5 (see Table 1) environment, the garbing and gloving requirements for compounding personnel should be as described above, unless the isolator manufacturer can provide written documentation based on validated environmental testing that any component(s) of PPE or personnel cleansing are not required.** [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Cleansing and Garbing*]

38. ☑ ☐ **Cleaning and disinfecting shall occur before compounding is performed.** Items shall be removed from all areas to be cleaned, and surfaces shall be cleaned by removing loose material and residue from spills; for example, water soluble solid residues are removed with sterile water (for injection or irrigation) and lowshedding wipes. This shall be followed by wiping with a residue-free disinfecting agent such as sterile 70% IPA, which is allowed to dry before compounding begins. [USP-NF Chapter 797- *Environmental Quality and Control - Cleaning and Disinfecting the Compounding Area*]

Cleaning Requirements

39. ☑ ☐ Cleaning and disinfecting surfaces in the **LAFWs, BSCs, CAIs, and CACIs** are the most critical practices before the preparation of CSPs. Consequently, **such surfaces shall be cleaned and disinfected frequently, including at the beginning of each work shift, before each batch preparation is started, every 30 minutes during continuous compounding periods of individual CSPs, when there are spills, and when surface contamination is known or suspected from procedural breaches.** [USP-NF Chapter 797- *Environmental Quality and Control - Cleaning and Disinfecting the Compounding Area*]

40. ☑ ☐ **Work surfaces in the ISO Class 7 (see Table 1) buffer areas and ISO Class 8 (see Table 1) ante-areas as well as segregated compounding areas shall be cleaned and disinfected at least daily, and dust and debris** shall be removed when necessary from storage sites for compounding ingredients and supplies using a method that does not degrade the ISO Class 7 or 8 (see Table 1) air quality (see Disinfectants and Antiseptics <1072>). [USP-NF Chapter 797- *Environmental Quality and Control - Cleaning and Disinfecting the Compounding Area*]

41. ☑ ☐ **Floors in the buffer or clean area, ante-area, and segregated compounding area are cleaned by mopping with a cleaning and disinfecting agent once daily at a time when no aseptic operations are in progress.** Mopping shall be performed by trained personnel using approved agents and procedures described in the

written SOPs. It is incumbent on compounding personnel to ensure that such cleaning is performed properly. [USP-NF Chapter 797- *Environmental Quality and Control - Cleaning and Disinfecting the Compounding Area*]

42. ☑ ☐ In the buffer or clean area, ante-area, and segregated compounding area, walls, ceilings, and shelving shall be cleaned and disinfected monthly. [USP-NF Chapter 797- *Environmental Quality and Control - Cleaning and Disinfecting the Compounding Area*]

43. ☑ ☐ **Cleaning and disinfecting agents** are to be used with careful consideration of compatibilities, effectiveness, and inappropriate or toxic residues (see Appendix II). **Their schedules of use and methods of application shall be in accordance with written SOPs and followed by custodial or compounding personnel.** [USP-NF Chapter 797- *Environmental Quality and Control - Cleaning and Disinfecting the Compounding Area*]

44. ☑ ☐ **All cleaning materials, such as wipers, sponges, and mops, shall be nonshedding**, preferably composed of synthetic micro fibers, and **dedicated to use in the buffer or clean area, ante-area, and segregated compounding areas and shall not be removed from these areas except for disposal.** Floor mops may be used in both the buffer or clean area and ante-area, but only in that order. Ideally, all cleaning tools are discarded after one use by collection in suitable plastic bags and removed with minimal agitation. If cleaning materials (e.g., mops) are reused, procedures shall be developed (based on manufacturers' recommendations) that ensure that the effectiveness of the cleaning device is maintained and that repeated use does not add to the bioburden of the area being cleaned. [USP-NF Chapter 797- *Environmental Quality and Control - Cleaning and Disinfecting the Compounding Area*]

45. ☑ ☐ **Supplies and equipment removed from shipping cartons shall be wiped with a suitable disinfecting agent** (e.g., sterile 70% IPA) delivered from a spray bottle or other suitable delivery method. After the disinfectant is sprayed or wiped on a surface to be disinfected, the disinfectant **shall be allowed to dry, during which time the item shall not be used for compounding purposes.** [USP-NF Chapter 797- *Environmental Quality and Control - Cleaning and Disinfecting the Compounding Area*]

46. ☑ ☐ Facilities and Environmental Monitoring

Surface sampling is an important component of the maintenance of a suitable microbially controlled environment for compounding CSPs, especially since transfer of microbial contamination from improperly disinfected work surfaces via inadvertent touch contact by compounding personnel can be a potential source of contamination into CSPs. It is useful for evaluating facility and work surface cleaning and disinfecting procedures and employee competency in work practices such as disinfection of component/vial surface cleaning. **Surface sampling shall be performed in all ISO classified areas on a periodic basis.** Sampling can be accomplished using contact plates or swabs, and it **shall be done at the conclusion of compounding. Locations to be sampled shall be defined in a sample plan or on a form.** The size of the plate to be used for each sampled location usually ranges from 24 to 30 cm2. Contact plates are filled with general solid agar growth medium and neutralizing agents above the rim of the plate, and they are used for sampling regular or flat surfaces. Swabs may be used for sampling irregular surfaces, especially for equipment (see Microbiological Control and Monitoring of Aseptic Processing Environments <1116>). [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Training and Competency Evaluation of Garbing, Aseptic Work Practices, and Cleaning/Disinfection Procedures- Surface Cleaning and Disinfection Sampling and Assessment*]

47. ☑ ☐ The value of viable microbial monitoring of gloved fingertips and surfaces of components and the compounding environment are realized when the data are used to identify and correct an unacceptable work practice. **Sampling data shall be collected and reviewed on a routine basis as a means of evaluating the overall control of the compounding environment. If an activity consistently shows elevated levels of microbial growth, competent microbiology personnel shall be consulted.** [USP-NF Chapter 797- *Environmental Quality and Control - Action Levels, Documentation, and Data Evaluation*]

48. ☑ ☐ Food, drinks, and materials exposed in patient care and treatment areas shall not enter ante-areas, buffer areas, or segregated compounding areas where components and ingredients of CSPs are present. [USP-NF Chapter 797-Environmental Quality and Control- Additional Personnel Requirements]

49. ☑ ☐ **Compounding facilities shall have an adequate space that is specifically designated for compounding of prescriptions. This space shall provide for the orderly placement of equipment and materials to prevent mixups** among ingredients, containers, labels, in-process materials, and finished preparations and is designed,

arranged, and used to prevent adventitious cross-contamination. **Areas used for sterile preparations shall be separated and distinct from the nonsterile compounding area** (see Pharmaceutical Compounding—Sterile Preparations <797>, Environmental Quality and Control). [USP-NF Chapter 795- *Compounding Facilities*]

50. ☑ ☐ The surfaces of ceilings, walls, floors, fixtures, shelving, counters, and cabinets in the buffer area shall be smooth, impervious, free from cracks and crevices, and nonshedding, thereby promoting cleanability, and minimizing spaces in which microorganisms and other contaminants may accumulate. The surfaces shall be resistant to damage by disinfectant agents. [USP-NF Chapter 797- *Environmental Quality and Control- Facility Design and Environmental Controls*]

51. ☑ ☐ Junctures of ceilings to walls shall be coved or caulked to avoid cracks and crevices where dirt can accumulate. If ceilings consist of inlaid panels, the panels shall be impregnated with a polymer to render them impervious and hydrophobic, and they shall be caulked around each perimeter to seal them to the support frame. [USP-NF Chapter 797- *Environmental Quality and Control- Facility Design and Environmental Controls*]

52. ☑ ☐ Any other penetrations through the ceiling or walls shall be sealed. [USP-NF Chapter 797- *Environmental Quality and Control- Facility Design and Environmental Controls*]

53. ☑ ☐ The buffer area shall not contain sources of water (sinks) or floor drains. [USP-NF Chapter 797- *Environmental Quality and Control- Facility Design and Environmental Controls*]

54. ☑ ☐ Work surfaces shall be constructed of smooth, impervious materials, such as stainless steel or molded plastic, so that they are easily cleaned and disinfected. [USP-NF Chapter 797- *Environmental Quality and Control- Facility Design and Environmental Controls*]

55. ☑ ☐ Storage shelving, counters, and cabinets shall be smooth, impervious, free from cracks and crevices, nonshedding, cleanable, and disinfectable; their number, design, and manner of installation shall promote effective cleaning and disinfection. [USP-NF Chapter 797- *Environmental Quality and Control- Facility Design and Environmental Controls*]

56. ☑ ☐ There shall be some demarcation designation that separates the ante-area from the buffer area. [USP-NF Chapter 797-Environmental Quality and Control- Additional Personnel Requirements]

57. ☑ ☐ **To ensure that product potency is retained through the manufacturer's labeled expiration date, compounding personnel shall monitor the drug storage areas within the compounding facility.** Controlled temperature areas in compounding facilities include controlled room temperature, 20° to 25° with mean kinetic temperature 25°; controlled cold temperature, 2° to 8° with mean kinetic temperature 8°; cold temperature, 2° to 8°; freezing temperature, −25° and −10° (see General Notices and Requirements) if needed to achieve freezing, and the media-specific temperature range for microbial culture media. **A controlled temperature area shall be monitored at least once daily and the results documented on a temperature log. Additionally, compounding personnel shall note the storage temperature when placing the product into or removing the product from the storage unit in order to monitor any temperature aberrations.** Suitable temperature recording devices may include a calibrated continuous recording device or a National Institute of Standards and Technology (NIST) calibrated thermometer that has adequate accuracy and sensitivity for the intended purpose, and it shall be properly calibrated at suitable intervals. **If the compounding facility uses a continuous temperature recording device, compounding personnel shall verify at least once daily that the recording device itself is functioning properly.** [USP-NF Chapter 797- *Storage and Beyond Use Dating- Monitoring Controlled Storage Areas*]

58. ☑ ☐ **Certification that each ISO classified area, for example, ISO Class 5, 7, and 8 (see Table 1), is within established guidelines shall be performed no less than every 6 months and whenever the LAFW, BSC, CAI, or CACI is relocated or the physical structure of the buffer area or ante-area has been altered.** Testing shall be performed by qualified operators using current, state-of-the-art electronic equipment with results of the following: [USP-NF Chapter 797- *Environmental Quality and Control- Viable and Nonviable Environmental Sampling (ES)- Testing- Total Particle Counts*]

☑ ISO Class 5: not more than 3520 particles 0.5 mm and larger size per cubic meter of air for any LAFW, BSC, CAI, and CACI;

☐ ISO Class 7: not more than 352,000 particles of 0.5 mm size and larger per cubic meter of air for any buffer

area;
☑ ISO Class 8: not more than 3,520,000 particles or 0.5 mm size and larger per cubic meter of air for any ante-area.

59. ☑ ☐ **All certification records shall be maintained and reviewed by supervising personnel or other designated employees** to ensure that the controlled environments comply with the proper air cleanliness, room pressures, and ACPHs. [USP-NF Chapter 797- *Environmental Quality and Control- Viable and Nonviable Environmental Sampling (ES) Testing- Total Particle Counts*]

60. ☑ ☐ **A pressure gauge or velocity meter shall be installed to monitor the pressure** differential or airflow between the buffer area and the ante-area and between the ante-area and the general environment outside the compounding area. [USP-NF Chapter 797- *Environmental Quality and Control- Viable and Nonviable Environmental Sampling (ES) Testing- Pressure Differential Monitoring*]

61. ☑ ☐ **The results shall be reviewed and documented on a log at least every work shift** (minimum frequency shall be at least daily) or by a continuous recording device. [USP-NF Chapter 797- *Environmental Quality and Control- Viable and Nonviable Environmental Sampling (ES) Testing- Pressure Differential Monitoring*]

62. ☑ ☐ **The pressure between the ISO Class 7 (see Table 1) and the general pharmacy area shall not be less than 5 Pa (0.02 inch water column). In facilities where low- and medium-risk level CSPs are prepared, differential airflow shall maintain a minimum velocity of 0.2 meters per second (40 feet per minute) between buffer area and ante-area.** [USP-NF Chapter 797- *Environmental Quality and Control- Viable and Nonviable Environmental Sampling (ES) Testing- Pressure Differential Monitoring*]

63. ☑ ☐ **The buffer area shall maintain at least ISO Class 7 (see Table 1) conditions for 0.5-mm and larger particles under dynamic operating conditions.** The room shall be segregated from surrounding, unclassified spaces to reduce the risk of contaminants being blown, dragged, or otherwise introduced into the filtered unidirectional airflow environment, and this segregation shall be continuously monitored. [USP-NF Chapter 797 - *Environmental Quality and Control- Facility Design and Environmental Controls*]

64. ☑ ☐ For rooms providing a physical separation through the use of walls, doors, and pass-throughs, a minimum differential positive pressure of 0.02- to 0.05- inch water column is required. [USP-NF Chapter 797 - *Environmental Quality and Control- Facility Design and Environmental Controls*]

65. ☑ ☐ For buffer areas not physically separated from the ante-areas, the principle of displacement airflow shall be employed. This concept utilizes a low pressure differential, high airflow principle. Using displacement airflow typically requires an air velocity of 40 ft per minute or more from the buffer area across the line of demarcation into the ante-area. [USP-NF Chapter 797 - *Environmental Quality and Control- Facility Design and Environmental Controls*]

66. ☑ ☐ **An ISO Class 7 (see Table 1) buffer area and ante-area supplied with HEPA-filtered air shall receive an ACPH of not less than 30.** The PEC is a good augmentation to generating air changes in the air supply of an area, but cannot be the sole source of HEPA-filtered air. If the area has an ISO Class 5 (see Table 1) recirculating device, a minimum of 15 ACPHs through the area supply HEPA filters is adequate, providing the combined ACPH is not less than 30. [USP-NF Chapter 797- *Environmental Quality and Control- Facility Design and Environmental Controls*]

67. ☑ ☐ **HEPA-filtered supply air shall be introduced at the ceiling, and returns should be mounted low on the wall,** creating a general top-down dilution of area air with HEPA-filtered make-up air. Ceiling-mounted returns are not recommended. [USP-NF Chapter 797- *Environmental Quality and Control- Facility Design and Environmental Controls*]

68. ☑ ☐ **Activities and tasks carried out within the buffer area shall be limited to only those necessary when working within a controlled environment.** Only the **furniture, equipment, supplies, and other material required for the compounding activities to be performed shall be brought into the area, and they shall be nonpermeable, nonshedding, cleanable, and resistant to disinfectants.** Whenever such items are brought into the area, they shall first be cleaned and disinfected. Whenever possible, equipment and other items used in the buffer area shall not be taken out of the area except for calibration, servicing, or other

activities associated with the proper maintenance of the item. [USP-NF Chapter 797- *Environmental Quality and Control- Facility Design and Environmental Controls*]

69. ☑ ☐ Secondary engineering controls such as buffer areas and ante-areas generally serve as a core for the location of the PEC. **Buffer areas are designed to maintain at least ISO Class 7 (see Table 1) conditions for 0.5-mm particles under dynamic conditions and ISO Class 8 (see Table 1) conditions for 0.5-mm and larger particles under dynamic conditions for the ante-areas.** [USP-NF Chapter 797 *Environmental Quality and Control, Facility Design and Environmental Controls*]

70. ☑ ☐ **PECs (LAFWs, BSCs, CAIs, and CACIs) and secondary engineering controls (buffer and ante-areas)** are essential components of the overall contamination control strategy for aseptic compounding. As such, it is imperative that they perform as designed and that the resulting levels of contamination be within acceptable limits. **Certification procedures such as those outlined in Certification Guide for Sterile Compounding Facilities (CAG-003-2006) shall be performed by a qualified individual no less than every 6 months and whenever the device or room is relocated or altered or major service to the facility is performed.** [USP-NF Chapter 797 - *Environmental Quality and Control, Viable and Nonviable Environmental Sampling (ES) Testing, Environmental Nonviable Particle Testing Program*]

71. ☑ ☐ PECs typically include, but are not limited to, LAFWs, BSCs, CAIs, and CACIs, which provide an ISO Class 5 (see Table 1) environment for the exposure of critical sites. **PECs shall maintain ISO Class 5 (see Table 1) or better conditions for 0.5-mm particles (dynamic operating conditions) while compounding CSPs.** [USP-NF Chapter 797 -*Environmental Quality and Control, Facility Design and Environmental Controls*]

72. ☑ ☐ **The PEC shall be placed within a buffer area in such a manner as to avoid conditions that could adversely affect their operation.** For example, strong air currents from opened doors, personnel traffic, or air streams from the HVAC systems can disrupt the unidirectional airflow in open-faced workbenches. [USP-NF Chapter 797 - *Environmental Quality and Control, Facility Design and Environmental Controls*]

73. ☑ ☐ PECs (LAFWs, BSCs, CAIs, and CACIs) **shall be located within a restricted access ISO Class 7 (see Table 1) buffer area (see Figure 1),** with the following CAI/CACI exceptions below: [USP-NF Chapter 797 - *Environmental Quality and Control, Facility Design and Environmental Controls*]
☑ Only authorized personnel and materials required for compounding and cleaning shall be permitted in the buffer area.
☐ Presterilization procedures for high-risk level CSPs, such as weighing and mixing, shall be completed in no worse than an ISO Class 8 (see Table 1) environment.
☑ PECs shall be located out of traffic patterns and away from room air currents that could disrupt the intended airflow patterns.

74. ☐ ☐ n/a **CAIs and CACIs shall be placed in an ISO Class 7 (see Table 1) buffer area unless they meet all of the following conditions:** [USP-NF Chapter 797 - *Environmental Quality and Control, Facility Design and Environmental Controls*]
☐ The isolator shall provide isolation from the room and maintain ISO Class 5 (see Table 1) during dynamic operating conditions, including transferring ingredients, components, and devices into and out of the isolator and during preparation of CSPs.
☐ Particle counts sampled approximately 6 to 12 inches upstream of the critical exposure site shall maintain ISO Class 5 (see Table 1) levels during compounding operations.
☐ Not more than 3520 particles (0.5 mm and larger) per m3 shall be counted during material transfer, with the particle counter probe located as near to the transfer door as possible without obstructing the transfer.

75. ☐ ☐ n/a **If the PEC is a CAI or CACI that does not meet the requirements above or is a LAFW or BSC that cannot be located within an ISO Class 7 (see Table 1) buffer area,** then only low-risk level nonhazardous and radiopharmaceutical CSPs pursuant to a physician order for a specific patient may be prepared, and administration of the CSP shall commence within 12 hours of preparation or as recommended in the manufacturer's package insert, whichever is less. [USP-NF Chapter 797 - *Environmental Quality and Control, Facility Design and Environmental Controls*]

76. ☐ ☐ n/a When isolators are used for sterile compounding, the recovery time to achieve ISO Class 5 (see Table 1) air quality shall be documented and internal procedures developed to ensure that adequate recovery time is

allowed after material transfer before and during compounding operations. [USP-NF Chapter 797 - *Environmental Quality and Control, Facility Design and Environmental Controls*]

77. ☑ ☐ Airborne contamination control is achieved in the PEC through the use of HEPA filters. **The airflow in the PEC shall be unidirectional (laminar flow),** and because of the particle collection efficiency of the filter, the "first air" at the face of the filter is, for the purposes of aseptic compounding, free from airborne particulate **contamination. HEPA-filtered air shall be supplied in critical areas (ISO Class 5, see Table 1) at a velocity sufficient to sweep particles away from the compounding area and maintain unidirectional airflow during operations.** Proper design and control prevents turbulence and stagnant air in the critical area. [USP-NF Chapter 797- *Environmental Quality and Control, Facility Design and Environmental Controls*]

78. ☑ ☐ **In situ air pattern analysis via smoke studies shall be conducted** at the critical area to demonstrate unidirectional airflow and sweeping action over and away from the product under dynamic conditions. [USP-NF Chapter 797- *Environmental Quality and Control, Facility Design and Environmental Controls*]

79. ☑ ☐ **Environmental sampling shall occur as part a comprehensive quality management program** and shall occur minimally under any of the following conditions: [USP-NF Chapter 797 - *Environmental Quality and Control, Viable and Nonviable Environmental Sampling (ES) Testing*]
- ☑ as part of the commissioning and certification of new facilities and equipment;
- ☑ following any servicing of facilities and equipment;
- ☑ as part of the re-certification of facilities and equipment [i.e., every 6 months];
- ☐ in response to identified problems with end products or staff technique; or
- ☑ in response to issues with CSPs, observed compounding personnel work practices, or patient-related infections (where the CSP is being considered as a potential source of the infection).

80. ☑ ☐ Sampling Plan—**An appropriate environmental sampling plan shall be developed for airborne viable particles based on a risk assessment of compounding activities performed. Selected sampling sites shall include locations within each ISO Class 5 (see Table 1) environment and in the ISO Class 7 and 8 (see Table 1) areas and in the segregated compounding areas at greatest risk of contamination** (e.g., work areas near the ISO Class 5 [see Table 1] environment, counters near doors, pass-through boxes). **The plan shall include sample location, method of collection, frequency of sampling, volume of air sampled, and time of day as related to activity in the compounding area and action levels.** [USP-NF Chapter 797 - *Environmental Quality and Control, Viable and Nonviable Environmental Sampling (ES) Testing, Environmental Viable Airborne Particle Testing Program, Sampling Plan*]

81. ☑ ☐ Growth Medium—**A general microbiological growth medium such as Soybean–Casein Digest Medium shall be used to support the growth of bacteria. Malt extract agar or some other media that supports the growth of fungi shall be used in high-risk level compounding environments.** Media used for surface sampling must be supplemented with additives to neutralize the effects of disinfecting agents (e.g., TSA with lecithin and polysorbate 80). [USP-NF Chapter 797 - *Environmental Quality and Control, Viable and Nonviable Environmental Sampling (ES) Testing, Environmental Viable Airborne Particle Testing Program, Sampling Plan*]

82. ☑ ☐ Viable Air Sampling—**Evaluation of airborne microorganisms using volumetric collection methods in the controlled air environments** (LAFWs, CAIs, clean room or buffer areas, and ante-areas) **shall be performed by properly trained individuals for all compounding risk levels. Impaction shall be the preferred method of volumetric air sampling.** Use of settling plates for qualitative air sampling may not be able to determine adequately the quality of air in the controlled environment. [USP-NF Chapter 797 - *Environmental Quality and Control, Viable and Nonviable Environmental Sampling (ES) Testing, Environmental Viable Airborne Particle Testing Program*]

83. ☑ ☐ **For low-, medium-, and high-risk level compounding, air sampling shall be performed at locations that are prone to contamination during compounding activities and during other activities such as staging, labeling, gowning, and cleaning.** Locations shall include zones of air backwash turbulence within LAFW and other areas where air backwash turbulence may enter the compounding area (doorways, in and around ISO Class 5 [see Table 1] PEC and environments). [USP-NF Chapter 797 - *Environmental Quality and Control, Viable and Nonviable Environmental Sampling (ES) Testing, Environmental Viable Airborne Particle Testing Program*]

84. ☑ ☐ **For low-risk level CSPs with 12-hour or less BUD prepared in a PEC** (LAFWs, BSCs, CAIs) **that maintains an**

ISO Class 5 (see Table 1), air sampling shall be performed at locations inside the ISO Class 5 (see Table 1) environment and other areas that are in close proximity to the ISO Class 5 (see Table 1) environment during the certification of the PEC. [USP-NF Chapter 797 - *Environmental Quality and Control, Viable and Nonviable Environmental Sampling (ES) Testing, Environmental Viable Airborne Particle Testing Program*]

85. ☑ ☐ Air Sampling Devices—There are a number of manufacturers of electronic air sampling equipment. It is important that personnel refer to the manufacturer's recommended procedures when using the equipment to perform volumetric air sampling procedures. The instructions in the manufacturer's user's manual for verification and use of electric air samplers that actively collect volumes of air for evaluation must be followed. **A sufficient volume of air (400 to 1000 liters) shall be tested at each location in order to maximize sensitivity. The volumetric air sampling devices need to be serviced and calibrated as recommended by the manufacturer.** [USP-NF Chapter 797 - *Environmental Quality and Control, Viable and Nonviable Environmental Sampling (ES) Testing, Environmental Viable Airborne Particle Testing Program*]

86. ☑ ☐ Air Sampling Frequency and Process—**Air sampling shall be performed at least semiannually (i.e., every 6 months) as part of the re-certification of facilities and equipment.** If compounding occurs in multiple locations within an institution (e.g., main pharmacy, satellites), environmental sampling is required for each individual compounding area. A sufficient volume of air shall be sampled and the manufacturer's guidelines for use of the electronic air sampling equipment followed. Any facility construction or equipment servicing may require that air sampling be performed during these events. [USP-NF Chapter 797 - *Environmental Quality and Control, Viable and Nonviable Environmental Sampling (ES) Testing, Environmental Viable Airborne Particle Testing Program*]

87. ☑ ☐ Action Levels, Documentation, and Data Evaluation—The value of viable microbial sampling of the air in the compounding environment is realized when the data are used to identify and correct an unacceptable situation. **Sampling data shall be collected and reviewed on a periodic basis as a means of evaluating the overall control of the compounding environment. If an activity consistently shows elevated levels of microbial growth, competent microbiology personnel shall be consulted.** [USP-NF Chapter 797 - *Environmental Quality and Control, Viable and Nonviable Environmental Sampling (ES) Testing, Environmental Viable Airborne Particle Testing Program*]

88. ☑ ☐ **Any cfu count that exceeds its respective action level (see Table 2) should prompt a re-evaluation of the adequacy of personnel work practices, cleaning procedures, operational procedures, and air filtration efficiency within the aseptic compounding location. An investigation into the source of the contamination shall be conducted.** Sources could include HVAC systems, damaged HEPA filters, and changes in personnel garbing or work practices. **The source of the problem shall be eliminated, the affected area cleaned, and resampling performed.** [USP-NF Chapter 797 - *Environmental Quality and Control, Viable and Nonviable Environmental Sampling (ES) Testing, Environmental Viable Airborne Particle Testing Program*]

89. ☑ ☐ The intermediate precision of the ACD can be determined on the basis of the day-to-day variations in performance of the accuracy measures. Thus, **compounding personnel shall keep a daily record of the above-described accuracy assessments and review the results over time. This review shall occur at least at weekly intervals to avoid potentially clinically significant cumulative errors over time.** [USP-NF Chapter 797 - *Elements of Quality Control- Verification of Automated Compounding Devices (ACDs) for Parenteral Nutrition Compounding- Precision*]

90. ☑ ☐ **Compounding personnel shall ensure proper storage and security of CSPs prepared by or dispensed from the compounding facility until either their BUDs are reached or they are administered to patients.** In fulfilling this general responsibility, the compounding facility is responsible for the proper packaging, handling, transport, and storage of CSPs prepared by or dispensed from it, including the appropriate education, training, and supervision of compounding personnel assigned to these functions. The compounding facility should assist in the education and training of noncompounding personnel responsible for carrying out any aspect of these functions. [USP-NF Chapter 797 - *Maintaining Sterility, Purity, and Stability of Dispensed and Distributed CSPs*]

91. ☑ ☐ CSPs, as well as all other drug products, shall be stored in the patient-care area in such a way as to secure them from unauthorized personnel, visitors, and patients. [USP-NF Chapter 797- *Maintaining Sterility, Purity, and Stability of Dispensed and Distributed CSPs- Use and Storage*]

Documentation

All facilities that dispense prescriptions must comply with the record keeping requirements of their State Boards of Pharmacy. When a facility compounds a preparation according to the manufacturer's labeling instructions, then further documentation is not required. All other compounded preparations require further documentation as described in this section. [UAC R 156-17b-614a (3)(d)]

92. ☑ ☐ A master formulation record shall be approved by a pharmacist or DMP for each batch of sterile or non-sterile pharmaceuticals to be prepared. Once approved, a duplicate of the master formulation record shall be used as the compounding record from which each batch is prepared and on which all documentation for that batch occurs. The master worksheet sheet may be stored electronically and shall contain at a minimum: [UAC R156-17b-614a(3)(e)(i-xiii)]

☑ official or assigned name
☑ strength
☑ dosage form of the preparation
☑ calculations needed to determine and verify quantities of components and doses of active pharmaceutical ingredients dosage form of the preparation
☑ description of ingredients and their quantities
☑ compatibility and stability information, including references when available
☑ equipment needed to prepare the preparation
☑ container used in dispensing
☑ packaging and storage requirements
☑ description of final preparation
☑ quality control procedures and expected results;
☑ mixing instructions, which shall include: ☑ order of mixing ☑ mixing temperatures or other environmental controls ☑ duration of mixing ☑ other factors pertinent to the replication of the preparation as compounded
☑ sample labeling information, which shall contain, in addition to legally required information: ☑ generic name and quantity or concentration of each active ingredient ☑ assigned beyond use date ☑ storage conditions ☑ prescription or control number, whichever is applicable

93. ☑ ☐ A compounding record for each batch of sterile or non-sterile pharmaceuticals shall document the following: [UAC R156-17b-614a(3)(f) (i-xix)]

☑ official or assigned name;
☑ strength and dosage of the preparation;
☑ Master Formulation Record reference for the preparation;
☑ names and quantities of all components
☑ sources, lot numbers, and expiration dates of components;
☑ total quantity compounded;
☑ name of the person who prepared the preparation
☑ name of the compounder who approved the preparation
☑ name of the person who performed the quality control procedures
☑ date of preparation
☑ assigned control, if for anticipation of use or prescription number, if patient specific, whichever is applicable
☑ duplicate label as described in the Master Formulation Record means the sample labeling information that is dispensed on the final product given to the patient and shall at minimum contain: ☑ active ingredients ☑ beyond use date ☑ storage conditions and ☐ lot number;
☑ proof of the duplicate labeling information, which proof shall: ☑ be kept at the pharmacy ☑ be immediately retrievable ☑ include an audit trail for any altered form; and ☑ be reproduced in: the original format that was dispensed, an electronic format, or a scanned electronic version
☑ description of final preparation
☑ results of quality control procedures (e.g. weight range of filled capsules, pH of aqueous liquids); and
☑ documentation of any quality control issues and any adverse reactions or preparation problems reported by the patient or caregiver.

94. ☑ ☐ Compounding records including the master worksheet, preparation worksheet, and MSDS files shall be kept for a minimum of five years and should be immediately retrievable in written or electronic format. [UAC R156-17b-612 (4)]

95. ☑ ☐ The facility maintains documentation regarding an ongoing quality control program that monitors and evaluates personnel performance, equipment and facility's compliance with following the USP-NF Chapters 795 and 797 standards. [UAC R156-17b-614a(3)(h)]

96. ☑ ☐ Results from the equipment calibration, annual maintenance reports, and routine maintenance are kept on file for the lifetime of the equipment. [USP-NF Chapter 797- *Elements of Quality Control- Equipment*]

Compounding Procedures

97. ☑ ☐ **Opened or needle-punctured single-dose containers,** such as bags, bottles, syringes, and vials of sterile products and CSPs **shall be used within 1 hour if opened in worse than ISO Class 5** (see Table 1) air quality (see Immediate-Use CSPs), **and any remaining contents must be discarded.** [USP-NF Chapter 797- *Single-Dose and Multiple-Dose Containers]*

98. ☑ ☐ ☑**Single-dose vials exposed to ISO Class 5** (see Table 1) **or cleaner air may be used up to 6 hours after initial needle puncture.** ☑**Opened single-dose ampuls shall not be stored for any time period.** ☑**Multiple-dose containers** (e.g., vials) **are formulated for removal of portions on multiple occasions because they usually contain antimicrobial preservatives.** The ☑**BUD after initially entering or opening (e.g., needle-punctured) multiple-dose containers is 28 days** (see Antimicrobial Effectiveness Testing <51>) unless otherwise specified by the manufacturer. [USP-NF Chapter 797- *Single-Dose and Multiple-Dose Containers]*

99. ☑ ☐ Wiping with small sterile 70% IPA swabs that are commercially available in individual foil-sealed packages (or a comparable method) is preferred for disinfecting entry points on bags and vials, allowing the IPA to dry before piercing stoppers with sterile needles and breaking necks of ampuls. **The surface of the sterile 70% IPA swabs used for disinfecting entry points of sterile packages and devices shall not contact any other object before contacting the surface of the entry point. Sterile 70% IPA wetted gauze pads or other particle-generating material shall not be used to disinfect the sterile entry points of packages and devices.** [USP-NF Chapter 797- *Environmental Quality and Control - Cleaning and Disinfecting the Compounding Area*]

100. ☑ ☐ Pharmacy Bulk Package (see Containers for Injections under Injections <1>)—A container of a sterile preparation for parenteral use that contains many single doses. The contents are intended for use in a pharmacy admixture program and are restricted to the preparation of admixtures for infusion or, through a sterile transfer device, for the filling of empty sterile syringes. **The closure shall be penetrated only one time after constitution with a suitable sterile transfer device or dispensing set, which allows measured dispensing of the contents.** The pharmacy bulk package is to be used only in a suitable work area such as a laminar flow hood (or an equivalent clean air compounding area). **Where a container is offered as a pharmacy bulk package, the label shall (a) state prominently "Pharmacy Bulk Package—Not for Direct Infusion," (b) contain or refer to information on proper techniques to help ensure safe use of the product, and (c) bear a statement limiting the time frame in which the container may be used once it has been entered, provided it is held under the labeled storage conditions.** [USP-NF Chapter 797- *Definitions*]

101. ☑ ☐ **The licensed healthcare professionals who supervise compounding shall be responsible for determining that the selected sterilization method** (see Methods of Sterilization under Sterilization and Sterility Assurance of Compendial Articles <1211>) both sterilizes and maintains the strength, purity, quality, and packaging integrity of CSPs. [USP-NF Chapter 797 - *Verification of Compounding Accuracy and Sterility, Sterilization Methods*]

102. ☑ ☐ Critical sites are locations that include any component or fluid pathway surfaces (e.g., vial septa, injection ports, beakers) or openings (e.g., opened ampuls, needle hubs) exposed and at risk of direct contact with air (e.g., ambient room or HEPA filtered), moisture (e.g., oral and mucosal secretions), or touch contamination. Protection of critical sites by precluding physical contact and airborne contamination shall be given the highest priority in sterile compounding practice. [USP-NF Chapter 797 - Exposure of Critical Sites]

103. ☐ ☐ n/a **All high-risk level CSPs that are prepared in groups of more than 25 identical individual single-dose packages (e.g., ampuls, bags, syringes, vials) or in multiple-dose vials (MDVs) for administration to multiple patients or that are exposed longer than 12 hours at 2° to 8° and longer than 6 hours at warmer than 8° before they are sterilized shall meet the sterility test** (see Sterility Tests <71>) **before they are dispensed or administered.** [USP-NF Chapter 797- *Finished Preparation Release Checks and Tests- Sterility Testing*]

104. ☐ ☐ n/a **All high-risk level CSPs, except those for inhalation and ophthalmic administration, that are prepared in groups of more than 25 identical individual single-dose packages (e.g., ampuls, bags, syringes, vials) or in MDVs for administration to multiple patients or that are exposed longer than 12 hours at 2° to 8° and longer than 6 hours at warmer than 8° before they are sterilized shall be tested to ensure that they do not contain excessive bacterial endotoxins** (see Bacterial Endotoxins Test <85> and Pyrogen Test <151>). In the absence of a bacterial endotoxins limit in the official monograph or other CSP formula source, the CSP shall not exceed the amount of USP Endotoxin Units (per hour per kilogram of body weight or square meters of body surface area) specified in Bacterial Endotoxins Test <85> referenced above for the appropriate route of administration. [USP-NF Chapter 797- *Finished Preparation Release Checks and Tests- Bacterial Endotoxin (Pyrogen) Testing*]

105. ☐ ☑ **Does the facility participate in the following:**
☐ Hazardous Drugs ☐ Radiopharmaceuticals ☐ Allergen Extracts as CSPs

Hazardous Drugs

106. ☐ ☐ n/a **All personnel who compound hazardous drugs shall be fully trained in the storage, handling, and disposal of these drugs. This training shall occur prior to preparing or handling hazardous CSPs, and its effectiveness shall be verified by testing specific hazardous drugs preparation techniques. Such verification shall be documented for each person at least annually. This training shall include didactic overview of hazardous drugs, including mutagenic, teratogenic, and carcinogenic properties, and it shall include ongoing training for each new hazardous drug that enters the marketplace.** [USP- NF Chapter 797- *Hazardous Drugs as CSPs*]

107. ☐ ☐ **Compounding personnel of reproductive capability shall confirm in writing that they understand the risks of handling hazardous drugs.** The training **shall include** at least the following: [USP- NF Chapter 797- *Hazardous Drugs as CSPs*]
- ☐ safe aseptic manipulation practices;
- ☐ negative pressure techniques when utilizing a BSC or CACI;
- ☐ correct use of CSTD devices;
- ☐ containment, cleanup, and disposal procedures for breakages and spills; and
- ☐ treatment of personnel contact and inhalation exposure.

108. ☐ ☐ Hazardous drugs shall be prepared for administration only under conditions that protect the healthcare workers and other personnel in the preparation and storage areas. [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]

109. ☐ ☐ Hazardous drugs shall be stored separately from other inventory in a manner to prevent contamination and personnel exposure. [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]

110. ☐ ☐ Hazardous drugs shall be handled with caution at all times using appropriate chemotherapy gloves during receiving, distribution, stocking, inventorying, preparation for administration, and disposal. [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]

111. ☐ ☐ Hazardous drugs shall be prepared in an ISO Class 5 (see Table 1) environment with protective engineering controls in place and following aseptic practices specified for the appropriate contamination risk levels defined in this chapter. [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]

112. ☐ ☐ Access shall be limited to areas where drugs are stored and prepared to protect persons not involved in drug preparation. [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]

113. ☐ ☐ n/a **All hazardous drugs shall be prepared in a BSC5 or a CACI that meets or exceeds the standards for CACI in this chapter. The ISO Class 5 (see Table 1) BSC or CACI shall be placed in an ISO Class 7 (see Table 1) area that is physically separated (i.e., a different area from other preparation areas) and optimally has not less than 0.01-inch water column negative pressure to adjacent positive pressure ISO Class 7 (see Table 1) or better ante-areas, thus providing inward airflow to contain any airborne drug. A pressure indicator shall be installed that can be readily monitored for correct room pressurization.** [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]

114. ☐ ☐ If a CACI that meets the requirements of this chapter is used outside of a buffer area, the compounding area shall maintain a minimum negative pressure of 0.01-inch water column and have a minimum of 12 ACPHs. [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]

115. ☐ ☐ **When closed-system vial-transfer devices** (CSTDs) (i.e., vial-transfer systems that allow no venting or exposure of hazardous substance to the environment) **are used, they shall be used within the ISO Class 5 (see Table 1) environment of a BSC or CACI.** The use of a CSTD is preferred because of their inherent closed system process. In facilities that prepare a low volume of hazardous drugs, the use of two tiers of containment (e.g., CSTD within a BSC or CACI that is located in a non-negative pressure room) is acceptable. [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]

116. ☐ ☐ **Appropriate personnel protective equipment (PPE) shall be worn when compounding in a BSC or CACI and when using CSTD devices.** PPE should include gowns, face masks, eye protection, hair covers, shoe covers or dedicated shoes, double gloving with sterile chemo-type gloves, and compliance with manufacturers' recommendations when using a CACI. [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]

117. ☐ ☐ Compounding personnel of reproductive capability shall confirm in writing that they understand the risks of handling hazardous drugs. [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]

118. ☐ ☐ All personnel who compound hazardous drugs shall be fully trained in the storage, handling, and disposal of these drugs. This training shall occur prior to preparing or handling hazardous CSPs, and its effectiveness shall be verified by testing specific hazardous drugs preparation techniques. Such verification shall be documented for each person at least annually. This training shall include didactic overview of hazardous drugs, including mutagenic, teratogenic, and carcinogenic properties, and it shall include ongoing training for each new hazardous drug that enters the marketplace. [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]

119. ☐ ☐ **Disposal of all hazardous drug wastes shall comply with all applicable federal and state regulations. All personnel** who perform routine custodial waste removal and cleaning activities in storage and preparation areas for hazardous drugs **shall be trained** in appropriate procedures to protect themselves and prevent contamination. [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]

Radiopharmaceuticals

120. ☐ ☐ For the purposes of this chapter, **radiopharmaceuticals compounded from sterile components in closed sterile containers and with a volume of 100 mL or less for a single-dose injection or not more than 30 mL taken from a multiple-dose container (see Injections <1>) shall be designated as, and conform to, the standards for Low-Risk Level CSPs.** These radiopharmaceuticals **shall be compounded using appropriately**

121. ☐ ☐ **shielded vials and syringes in a properly functioning and certified ISO Class 5 (see Table 1) PEC located in an ISO Class 8 (see Table 1) or cleaner air environment to permit compliance with special handling, shielding, and negative air flow requirements.** [USP-NF Chapter 797- *Radiopharmaceuticals as CSPs*]

Radiopharmaceuticals prepared as Low-Risk Level CSPs with 12-Hour or Less BUD shall be prepared in a segregated compounding area. A line of demarcation defining the segregated compounding area shall be established. Materials and garb exposed in a patient care and treatment area shall not cross a line of

122. ☐ ☐ demarcation into the segregated compounding area. [USP-NF Chapter 797- *Radiopharmaceuticals as CSPs*]

Allergen Extracts as CSPs

Allergen extracts as CSPs are single-dose and multiple-dose intradermal or subcutaneous injections that are prepared by specially trained physicians and personnel under their direct supervision. **Allergen extracts as CSPs are not subject to the personnel, environmental, and storage requirements for all CSP Microbial Contamination Risk Levels in this chapter only when all of the following criteria are met:** [USP-NF Chapter

123. ☐ ☐

n/a

797- Allergen Extracts as CSPs]

☐ The compounding process involves simple transfer via sterile needles and syringes of commercial sterile allergen products and appropriate sterile added substances (e.g., glycerin, phenol in sodium chloride injection).

☐ All allergen extracts as CSPs shall contain appropriate substances in effective concentrations to prevent the growth of microorganisms. Nonpreserved allergen extracts shall comply with the appropriate CSP risk level requirements in the chapter.

☐ Before beginning compounding activities, personnel perform a thorough hand-cleansing procedure by removing debris from under fingernails using a nail cleaner under running warm water followed by vigorous hand and arm washing to the elbows for at least 30 seconds with either nonantimicrobial or antimicrobial soap and water.

☐ Compounding personnel don hair covers, facial hair covers, gowns, and face masks.

☐ Compounding personnel perform antiseptic hand cleansing with an alcohol-based surgical hand scrub with persistent activity.

☐ Compounding personnel don powder-free sterile gloves that are compatible with sterile 70% isopropyl alcohol (IPA) before beginning compounding manipulations.

☐ Compounding personnel disinfect their gloves intermittently with sterile 70% IPA when preparing multiple allergen extracts as CSPs.

☐ Ampul necks and vial stoppers on packages of manufactured sterile ingredients are disinfected by careful wiping with sterile 70% IPA swabs to ensure that the critical sites are wet for at least 10 seconds and allowed to dry before they are used to compound allergen extracts as CSPs.

☐ The aseptic compounding manipulations minimize direct contact contamination (e.g., from glove fingertips, blood, nasal and oral secretions, shed skin and cosmetics, other nonsterile materials) of critical sites (e.g., needles, opened ampuls, vial stoppers).

☐ The label of each multiple-dose vial (MDV) of allergen extracts as CSPs lists the name of one specific patient and a BUD and storage temperature range that is assigned based on manufacturers' recommendations or peer-reviewed publications.

☐ Single-dose allergen extracts as CSPs shall not be stored for subsequent additional use.

Sterilization

124. ☐ ☐ Does the facility participate in the following:

☐ Filter Sterilization in an ISO class 5 ☐ Steam Sterilization ☐ Dry Heat Sterilization

125. ☐ ☐ **(Filter Sterilization in an ISO class 5)**

Commercially available sterile filters shall be approved for human-use applications in sterilizing pharmaceutical fluids. **Sterile filters used to sterilize CSPs shall be pyrogen free and have a nominal pore size of 0.2 or 0.22 mm.** They shall be certified by the manufacturer to retain at least 107 microorganisms of a strain of Brevundimonas (Pseudomonas) diminuta on each square centimeter of upstream filter surface area under conditions similar to those in which the CSPs will be sterilized (see High-Risk Conditions in High-Risk Level CSPs). [USP-NF Chapter 797 - *Verification of Compounding Accuracy and Sterility- Sterilization Methods- Sterilization of High-Risk Level CSPs by Filtration*]

126. ☐ ☐ **The compounding supervisor shall ensure,** directly or from appropriate documentation, that **the filters** are chemically and physically stable at the pressure and temperature conditions to be used, that they have enough capacity to filter the required volumes, and that they will achieve sterility and maintain prefiltration pharmaceutical quality, including strength of ingredients of the specific CSP. [USP-NF Chapter 797 - *Verification of Compounding Accuracy and Sterility- Sterilization Methods- Sterilization of High-Risk Level CSPs by Filtration*]

127. ☐ ☐ The filter dimensions and liquid material to be sterile-filtered shall permit the sterilization process to be completed rapidly, without the replacement of the filter during the process. [USP-NF Chapter 797 - *Verification of Compounding Accuracy and Sterility- Sterilization Methods- Sterilization of High-Risk Level CSPs by Filtration*]

128. ☐ ☐ Filter units used to sterilize CSPs shall also be subjected to manufacturers' recommended integrity test, such as the bubble point test. [USP-NF Chapter 797 - *Verification of Compounding Accuracy and Sterility- Sterilization Methods- Sterilization of High-Risk Level CSPs by Filtration*]

129. ☐ ☐ Compounding personnel shall ascertain that selected filters will achieve sterilization of the particular CSPs being sterilized. [USP-NF Chapter 797 - *Verification of Compounding Accuracy and Sterility- Sterilization Methods- Sterilization of High-Risk Level CSPs by Filtration*]

130. ☐ ☐ n/a

(Steam Sterilization)
The process of thermal sterilization employing saturated steam under pressure, or autoclaving, is the preferred method to terminally sterilize aqueous preparations that have been verified to maintain their full chemical and physical stability under the conditions employed (see Steam Sterilization under Sterilization and Sterility Assurance of Compendial Articles <1211>). **To achieve sterility, all materials are to be exposed to steam at 121° under a pressure of about 1 atmosphere or 15 psi for the duration verified by testing to achieve sterility of the items, which is usually 20 to 60 minutes for CSPs.** An allowance shall be made for the time required for the material to reach 121° before the sterilization exposure duration is timed. [USP-NF Chapter 797- *Verification of Compounding Accuracy and Sterility- Sterilization Methods- Sterilization of High-Risk Level CSPs by Steam*]

131. ☐ ☐ Not directly exposing items to pressurized steam may result in survival of microbial organisms and spores. Before their sterilization, plastic, glass, and metal devices are tightly wrapped in low-particle-shedding paper or fabrics or sealed in envelopes that prevent poststerilization microbial penetration. **Immediately before filling ampuls and vials that will be steam sterilized, solutions are passed through a filter having a nominal pore size not larger than 1.2 mm for removal of particulate matter. Sealed containers shall be able to generate steam internally; thus, stoppered and crimped empty vials shall contain a small amount of moisture to generate steam.** [USP-NF Chapter 797- *Verification of Compounding Accuracy and Sterility- Sterilization Methods- Sterilization of High-Risk Level CSPs by Steam*]

132. ☐ ☐ The description of steam sterilization conditions and duration for specific CSPs shall be included in written documentation in the compounding facility. The effectiveness of steam sterilization shall be verified using appropriate BIs of Bacillus stearothermophilus (see Biological Indicators <1035>) and other confirmation methods such as temperature-sensing devices (see Sterilization and Sterility Assurance of Compendial Articles <1211> and Sterility Tests <71>). [USP-NF Chapter 797- *Verification of Compounding Accuracy and Sterility- Sterilization Methods- Sterilization of High-Risk Level CSPs by Steam*]

133. ☐ ☐ **(Dry Heat Sterilization)**
Dry heat sterilization is usually done as a batch process in an oven designed for sterilization. **Heated filtered air shall be evenly distributed throughout the chamber by a blower device.** [USP-NF Chapters 797- *Verification of Compounding Accuracy and Sterility- Sterilization Method- Sterilization of High-Risk Level CSPs by Dry Heat*]

134. ☐ ☐ **Dry heat shall be used only for those materials that cannot be sterilized by steam,** when either the moisture would damage the material or the material is impermeable. [USP-NF Chapters 797- *Verification of Compounding Accuracy and Sterility- Sterilization Method- Sterilization of High-Risk Level CSPs by Dry Heat*]

135. ☐ ☐ During sterilization, sufficient space shall be left between materials to allow for good circulation of the hot air. [USP-NF Chapters 797- *Verification of Compounding Accuracy and Sterility- Sterilization Method- Sterilization of High-Risk Level CSPs by Dry Heat*]

136. ☐ ☐ The description of dry heat sterilization conditions and duration for specific CSPs shall be included in written documentation in the compounding facility. [USP-NF Chapters 797- *Verification of Compounding Accuracy and Sterility- Sterilization Method- Sterilization of High-Risk Level CSPs by Dry Heat*]

137. ☐ ☐ The effectiveness of dry heat sterilization shall be verified using appropriate BIs of Bacillus subtilis (see Biological Indicators <1035>) and other confirmation methods such as temperature-sensing devices (see Sterilization and Sterility Assurance of Compendial Articles <1211> and Sterility Tests <71>). [USP-NF Chapters 797- *Verification of Compounding Accuracy and Sterility- Sterilization Method- Sterilization of High-Risk Level CSPs by Dry Heat*]

Finished Preparation Release Checks and Tests

138. ☑ ☐ **All CSPs that are intended to be solutions shall be visually examined for the presence of particulate matter and not administered or dispensed when such matter is observed.** The prescription orders, written compounding procedure, preparation records, and expended materials used to make CSPs at all contamination risk levels are inspected for accuracy of correct identities and amounts of ingredients, aseptic mixing and sterilization, packaging, labeling, and expected physical appearance before they are administered or dispensed.

[USP- NF Chapter 797- *Finished Preparation Release Checks and Tests- Inspection of Solution Dosage Forms and Review of Compounding Procedures*

139. ☑ ☐ **The accuracy of identities, concentrations, amounts, and purities of ingredients in CSPs shall be confirmed by reviewing labels on packages, observing and documenting correct measurements with approved and correctly standardized devices, and reviewing information in labeling and certificates of analysis provided by suppliers.** When the correct identity, purity, strength, and sterility of ingredients and components of CSPs cannot be confirmed (in cases of, for example, unlabeled syringes, opened ampuls, punctured stoppers of vials and bags, containers of ingredients with incomplete labeling), such ingredients and components shall be discarded immediately. [USP-NF Chapter 797- *Verification of Compounding Accuracy and Sterility*]

140. ☐ ☐ n/a The label of each batch prepared of sterile or non-sterile pharmaceuticals shall bear at a minimum: [UAC R156-17b-614a (3)(g)(i-vi)
- ☐ the unique lot number assigned to the batch;
- ☐ all active solution and ingredient names, amounts strengths and concentrations, where applicable
- ☐ quantity
- ☐ beyond use date and time, when applicable
- ☐ appropriate ancillary instructions, such as storage instructions or cautionary statements, including cytotoxic warning labels where appropriate; and
- ☐ device-specific instructions, where appropriate.

141. ☑ ☐ All prescription labels for compounded sterile and non-sterile medications when dispensed to the ultimate user or agent shall bear at a minimum in addition to what is required in Section 58-17b-602 the following: [R156-17b-614a (3)(h)(i)(ii)(iii)
- ☑ generic name a quantity or concentration of each active ingredient. In the instance of a sterile preparation for parenteral use, labeling shall include the name and base solution for infusion preparation;
- ☑ assigned compounding record or lot number; and
- ☐ "this is a compounded preparation" or similar language

Packaging and Storage

142. ☑ ☐ Compounding facilities that ship CSPs to locations outside their own premises shall select modes of transport that are expected to deliver properly packed CSPs in undamaged, sterile, and stable condition to recipients. [USP-NF Chapter 797- *Maintaining Sterility, Purity, and Stability of Dispensed and Distributed CSPs- Packing and Transporting CSPs- Transit of CSPs*]

143. ☑ ☐ Compounding personnel should ascertain that temperatures of CSPs during transit by the selected mode will not exceed the warmest temperature specified on the storage temperature range on CSP labels. It is recommended that compounding personnel communicate directly with the couriers to learn shipping durations and exposure conditions that CSPs may encounter. [USP-NF Chapter 797- *Maintaining Sterility, Purity, and Stability of Dispensed and Distributed CSPs- Packing and Transporting CSPs- Transit of CSPs*]

144. ☑ ☐ Compounding facilities that ship CSPs to patients and other recipients outside their own premises shall ascertain or provide, whichever is appropriate, the following assurances: [USP-NF Chapter 797- *Maintaining Sterility, Purity, and Stability of Dispensed and Distributed CSP- Storage in Locations Outside Compounding Facilities*]
- ☑ Labels and accessory labeling for CSPs include clearly readable BUDs, storage instructions, and disposal instructions for out-of-date units.
- ☑ Each patient or other recipient is able to store the CSPs properly, including the use of a properly functioning refrigerator and freezer if CSPs are labeled for such storage.

145. ☑ ☐ **Inspections shall confirm compliance with appropriate storage conditions, separation of drugs and food, proper use of MDVs, and the avoidance of using single-dose products as MDVs.** CSPs, as well as all other drug products, shall be stored in the patient-care area in such a way as to secure them from unauthorized personnel, visitors, and patients. [USP-NF Chapter 797- *Finished Preparation Release Checks and Tests- Monitoring Controlled Storage Areas*]

146. ☑ ☐ Personnel who prepare, dispense, and administer CSPs shall store them strictly in accordance with the conditions stated on the label of ingredient products and finished CSPs. [USP-NF Chapter 797- *Storage and Beyond-use Dating*]

Quality Assurance Program

147. ☑ ☐ The assurance of CSPs' quality and packaging integrity is highly dependent on the proper adherence of all personnel to the pertinent SOPs. **Compounding personnel shall design, implement, and maintain a formal education, training, and competency assessment program that encompasses all the functions and tasks addressed in the foregoing sections and all personnel to whom such functions and tasks are assigned.** This program includes the assessment and documentation of procedural breaches, administration mishaps, side effects, allergic reactions, and complications associated with dosage or administration, such as extravasation. This program should be coordinated with the institution's adverse-events and incident reporting programs. [USP-NF Chapter 797- *Maintaining Sterility, Purity, and Stability of Dispensed and Distributed CSPs- Education and Training*]

148. ☑ ☐ **A provider of CSPs shall have in place a formal QA program intended to provide a mechanism for monitoring, evaluating, correcting, and improving the activities and processes described in this chapter.** Emphasis in the QA program is placed on maintaining and improving the quality of systems and the provision of patient care. In addition, the QA program ensures that any plan aimed at correcting identified problems also includes appropriate follow-up to make certain that effective corrective actions were performed. Characteristics of a QA program include the following: [USP-NF Chapter 797- *Quality Assurance (QA) Program*]

- ☑ Formalization in writing;
- ☑ Consideration of all aspects of the preparations and dispensing of products as described in this chapter, including environmental testing and verification results;
- ☑ Description of specific monitoring and evaluation activities;
- ☑ Specification of how results are to be reported and evaluated;
- ☑ Identification of appropriate follow-up mechanisms when action limits or thresholds are exceeded; and
- ☑ Delineation of the individuals responsible for each aspect of the QA program.

149. ☑ ☐ A written quality assurance procedure includes the following in-process checks that are applied, as appropriate, to specific CSPs: [USP-NF Chapter 797- *Responsibilities of Compounding Personnel*]

- ☑ accuracy and precision of measuring and weighing;
- ☑ the requirement for sterility;
- ☑ methods of sterilization and purification;
- ☑ safe limits and ranges for strength of ingredients, bacterial endotoxins, and particulate matter;
- ☑ pH;
- ☑ labeling accuracy and completeness;
- ☑ BUD assignment;
- ☑ and packaging and storage requirements.

150. ☑ ☐ Compounding facilities shall clinically monitor patients treated with CSPs according to the regulations and guidelines of their respective state healthcare practitioner licensure boards or of accepted standards of practice. **Compounding facilities shall provide patients and other recipients of CSPs with a way to address their questions and report any concerns that they may have with CSPs and their administration devices.** [USP-NF Chapter 797- *Patient Monitoring and Adverse Events Reporting*]

COMMENTS
(Use an additional sheet if necessary.)

(1) Pharmacy is engaged in ~~[illegible]~~ low and medium risk compounding.

(7) SOPs are compliant.

- Training records are compliant.
- Pharmacy is not compounding with hazardous drugs.
- Certification records show no issues.
- Pharmacy is not sterilizing or conducting high-risk compounding.

1. The Board shall not issue a license to conduct a pharmacy:
   a) To any practitioner; or
   b) To any partnership, corporation, or association in which a practitioner has a controlling interest or owns more than 10 percent of the available stock.
2. This section does not:
   a) Apply to a hospital pharmacy or a health maintenance organization which holds a certificate of authority under chapter 695C of NRS.
   b) Prohibit ownership by a practitioner of a building in which a pharmacy is located, if space for the pharmacy is rented at the prevailing rate.

Section 5: Publicly Traded Corporation

State of Incorporation: N/A

Parent Company (if any):

Corporation Name:

Mailing Address:

City: State: Zip:

Telephone: Email:

Contact Person Name:

Date of SEC Registration:	SEC Registration Number:	Stock Exchange Symbol:

Does the number of stockholders/shareholders of the corporation exceed four? NRS 639.231 ☐ Yes ☐ No

Section 6: Non-Publicly Traded Corporation or Company

State of Incorporation/Organization: Arizona

Parent Company (if any): SCP Specialty Infusion, LLC

Corporation/Organization Name: Optum Infusion Services 308, LLC

Mailing Address: 485 N Juniper Drive, Suite 2

City: Chandler State: AZ Zip: 85226

Telephone: (832) 500-6226 Email: orxpharmlic@optum.com

Contact Person Name: Christine Feldman

Does the number of stockholders/shareholders of the corporation or members exceed four? NRS 639.231 ☐ Yes ☒ No

Section 7: Partnership

Partnership Name: N/A

Mailing Address:

City: State: Zip:

Telephone: Email:

Contact Person Name:

Please check type of partnership (NAC 639.214) ☐ General ☐ Limited

Does the number of partners or members of the partnership exceed four? NRS 639.231 ☐ Yes ☐ No

Section 8: Sole Owner

Owner's Name: N/A

Business Name:

Business Address:

City: State: Zip:

Telephone: Email:

Section 9: Statement of Responsibility - MUST BE COMPLETED by an Authorized Person (NAC 639.945)

Statement of Responsibility

1. I am the Secretary (title) for Optum Infusion Services 308, LLC (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be responsible for any violations of pharmacy law that may occur in the Pharmacy owned by such owner(s), shareholder(s), member(s), or partner(s).
3. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be named in any action taken by the Nevada State Board of Pharmacy against the Pharmacy.
4. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) cannot require or permit the pharmacist(s) in said Pharmacy to violate any provision of local, state, or federal laws or regulations pertaining to the practice of pharmacy.
5. I further understand and acknowledge that Nevada law requires that each pharmacy located inside the State of Nevada employ only pharmacists, intern pharmacists, pharmaceutical technicians, and technicians in training that are licensed by the Nevada State Board of Pharmacy. (NRS 639.100).
6. I further understand and acknowledge that Nevada law requires that each pharmacy located outside the State of Nevada engaged in providing pharmacy services into Nevada employs at least one pharmacist licensed by the Nevada State Board of Pharmacy who will be responsible for any prescription dispensed to a patient located in Nevada and responsible for any acts or omissions of pharmacy personnel who are not registered with the Board. (NRS 639.2328).

Sterile Compounding Questionnaire

Rev (09/11/2024)

This application cannot be returned by fax or email.
We must have an original signature to process.

Approval of this completed questionnaire is required for an existing pharmacy, new pharmacy and/or out-sourcing facility applicant who wish to engage in preparing, compounding, dispensing, and furnishing sterile compounded products to Nevada patients or consumers.

Please provide a thorough response to the questions below and provide any necessary supporting documents.
-For a new pharmacy or out-sourcing facility applicant, submit this completed form with your application.
-For an existing pharmacy, send the completed form to the address indicated above.

Section 1: General Information

Pharmacy Name: Optum Infusion Services 308, LLC

NV Pharmacy or Outsourcing facility license # (if applicable): N/A

Physical Address: 485 N Juniper Drive, Suite 2

Website: https://www.optum.com/en/pharmacy-services.html

Nevada Business License # (if applicable) NV20243089039

Supervising/Managing Pharmacist Name (NRS 639.220): Shelby Botello

Supervising/Managing Pharmacist NV Pharmacist Registration #: 20717

Name of Designated Person(s) as defined by revised USP-797 guidelines: Shelby Botello

Email of Designated Person(s): shelby_botello@optum.com

Telephone of Designated Person(s): (480) 705-6200

Section 2: Sterile Compounding Questions (Use a separate piece of paper if additional space is needed.)

1. What risk level sterile compounding will your facility be performing (check all that apply)?

☐ Category 1 ■ Category 2 ☐ Category 3

If you marked **"Category 3"**, you must also complete **section 4.**

2. If compounding Category 2 products is the location performing sterility and endotoxin testing (if required) to obtain extended beyond-use dates? ☐ Yes ■ No

3. If compounding Category 2 products is the location performing aseptically processed CSPs or terminally sterilized CSPs? ■ Aseptic ☐ Terminal

4. Is the pharmacy following the new garbing requirements listed in the revised USP-797 guidelines? ■ Yes ☐ No

5. When was the most recent certification for the ISO classified areas? 12/07/2024

6. What is the frequency of the recertification for the ISO classified areas? Semiannual-every 6 months

7. Were there any follow-up items required from the most recent certification report? ☐ Yes ■ No

8. If preparing Category 2 or Category 3 CSPs from non-sterile starting components are the pre-sterilization procedures such as weighing and mixing completed in an ISO Class 8 or better environment? ■ Yes ☐ No

9. If compounding Category 1 CSPs and Category 2 CSPs how often is surface sampling of all classified areas and pass-through chambers conducted? Every 2 weeks

10. Will you be performing sterile hazardous drug compounding? ■ Yes ☐ No

If you marked **"Yes"**, you must also complete **section 3.**

11. List the sterile compounded products that you will be compounding for Nevada patients or consumers:

All starting ingredients are purchased as sterile and conventionally manufactured/FDA approved with a NDC number. No bulk or API products are used. Products include but not limited to: Acyclovir, amphotericin, ampicillin, ampicillin/sulbactam, azithromycin, aztreonam, caspofungin, cefazolin, cefepime, cefotaxime, cefotetan, cefoxitin, ceftazidime, ceftriaxone, cefuroxime, ceftaroline, clindamycin, colistimethate, daptomycin, dexamethasone, diphenhydramine, ertapenem, famotidine, ganciclovir, gentamicin, hydrocortisone, imipenem/cilastatin, meropenem, methylprednisolone, micafungin, nafcillin, oxacillin, penicillin G, pantoprazole, piperacillin/tazobactam, ticarillin/clavulanate, tobramicin, vancomycin, voriconazole, deferoxamine, levofloxacin, blinatumomab, fluconazole, fluorouracil, posaconazole.
Parenteral Nutrition
Inotrope:Milrinone, Dobutamine
Hydration: Custom with electrolytes not commercially available as ordered by MD.

12. What laboratory performs your sterility or endotoxin testing?

Name: ARL Bio Pharma

Address: 840 Research Parkway, Ste 546

City: Oklahoma City State: OK Zip: 73104

Telephone: 405-271-1144

13. What is your procedure for visual inspection of compounded sterile products?

At the completion of a sterile compounding session and prior to releasing the CSP, the pharmacist will complete the following checks: a. Visually inspect each compounded dose using a contrasting (black/white) background to determine whether the physical appearance of the CSP is as expected (e.g., free of visible particulate matter, discoloration, or other defects). b. Visually confirm that the CSP and its labeling match the prescription compounding workorder. c. Compare drug vials, amount used, and syringes used to make doses, verifying the items listed on the compounding work order, including drug vials, diluent, NDC numbers, lot numbers, expiration dates, and delivery devices were correctly used to make the sterile compound.

14. How often do you perform glove fingertip and medial fill testing? Every 6 months for each compounding staff member.

15. Describe your initial and ongoing training program for all personnel performing sterile compounding:

New hires undergo a series of didactic training modules related to aseptic processing and the cleanroom suite, along with policy orientation and USP <797> and <800> review. Once didactic training is completed, the staff member receives training with an assigned trainer (AT) or designated person (DP) to complete a series of competency checks, beginning with handwashing and gowning/garbing, followed by GFT testing. Then the staff member receives further hands on training on cleaning the cleanroom suite. Hands on training of aseptic technique is performed in a classroom setting. Eventually the new hire will complete a media fill test, and upon successful completion of all competencies will then begin to perform non-hazardous sterile compounding. Hazardous compounding is later learned after non-hazardous is mastered. Ongoing training occurs with daily supervision and semi-annual media fill, GFT, and competency evaluations.

16. Describe the cleaning procedure for your primary and secondary engineering controls, including the frequency of cleaning and the names of cleaning, disinfectant, sporicidal, and/or deactivation and decontamination agents used:

Daily cleaning the non-hazardous PEC and SEC (every day compounding occurs) is completed with sterile TB1-3300 RTU. Surfaces cleaned daily include 100% of the PEC interior, carts, pass through, door handles, sink, stools, floors, and high touch surfaces. The hazardous compounding room receives a daily clean with sterile Peridox RTU each day that compounding is performed, at a minimum each Tuesday and Friday. Peridox serves as the decontamination/deactivation/sporicidal agent. Once per month sterile Peridox RTU is substituted to serve as the sporicidal agent. During this clean, all surfaces inside all ISO classified areas (non-hazardous and hazardous) are cleaned, including ceiling, walls, all surfaces of all furniture and doors ect.
70% SIPA is used to remove cleaning agent residues, and is used on the deck and high touch surfaces in the ISO 5 between each order made.

17. Who performs the sterile compounding process at your facility?

Licensed and Certified pharmacy Technicians with oversight/supervision by Pharmacists.

18. Who is responsible and accountable for the sterile compounding process at your facility?

Lawrence Moore, (Resident PIC), Ralph Nellas, PharmD, Wiliam Assibey, PharmD, Peter Calander, PharmD, BCSCP

19. If products are shipped/mailed, what shipping conditions are used to ensure product safety/efficacy?

Insulated cooler boxes with frozen and/or ambient gel packs are used to produce USP refrigerated or controlled room temperature conditions as applicable during transit. Overnight shipping is utilized, and the packout materials, process and procedure have been validated for performance in various seasons.

Section 3: Sterile Hazardous Compounding Questions (Complete this section ONLY if you be performing Sterile Hazardous Compounding.)		
1. What type of primary engineering controls will you be using in your facility? Class II type A2 Biological Safety Cabinet		
2. Are you complying with all USP 800 guidelines?	■ Yes	No
3. Have your employees who compound with hazardous drugs signed an acknowledgement that they understand the risks associated with this process?	■ Yes	No
4. Is your BSC or CACI vented 100% to the outside?	■ Yes	No
5. Do you have a negative pressure buffer room at your facility?	■ Yes	No
6. Will you be compounding with antineoplastic HDs or HD API?	■ Yes	No
7. If yes, are the drugs stored in an externally ventilated, negative pressure room?	■ Yes	No
8. Will you be utilizing a closed system transfer device?	■ Yes	No
9. If yes, list the name of the device: OnGuard 2 CSTD by BBraun		

10. What information is provided to the patient or consumer on the proper handling and disposal of hazardous drugs products/containers?

Waste Disposal in the Home

1. UHG employees are not permitted to transport any pharmaceutical or hazardous waste.

2. Pharmaceuticals delivered to the home or residence become the property of the homeowner/patient. Pharmaceutical waste generated during home treatment is "household waste" and is exempt from hazardous waste regulations.

3. Prior to disposal, personal identifiers (name, DOB, etc.) should be removed from medication containers or crossed out with a black permanent marker. Place all excess or unused medications into a black plastic bag and secure tightly with a tie. Place this bag in a second black plastic bag and secure tightly with a tie. Place the double bagged waste into the regular trash as close to garbage pickup time as possible

11. Describe your initial process for training new employees prior to compounding sterile hazardous drugs?

Once the employee is fully trained and experienced with non-hazardous compounding, the employee takes additional HD specific didactic training modules followed by a hazardous garbing/GFT test, hazardous media fill, and 1 on 1 shadowing with an assigned trainer or designated person.

Section 4: Sterile Category 3 Compounding Questions (Complete this section ONLY if you will be performing Category 3 Compounding.) N/A

1. List the specific Category 3 sterile products that your facility compounds:

N/A

2. What is the frequency for ongoing garbing, gloved fingertip and thumb sampling, and media fill testing for compounding personnel? N/A

3. Is the pharmacy meeting all of the additional garbing requirements for compounding Category 3 CSPs as defined by the revised USP-797 guidelines? N/A ☐ Yes ☐ No

4. What is the frequency for completing volumetric active air sampling?

N/A

5. What is the frequency for completing surface sampling? N/A			
6. What is the frequency for using sporicidal agents? N/A			
7. Is an endotoxin test performed for all products compounded from one or more nonsterile component?	N/A	Yes	No
8. Is the BUD assigned supported by stability data obtained using a stability-indicating analytical method?	N/A	Yes	No

I certify under penalty of perjury that the information contained in this form is accurate, true and complete in all material respects. I understand that making any false representation in this form is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire form and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. In the event the form is approved I agree to comply with all applicable federal and state statutes and regulations governing this license or registration and understand that any violation may result in discipline.

NOTICE OF INSPECTION RIGHTS-PREMISES SUBJECT TO INSPECTION

DATE: 05/25/2023	**Permittee:** Optum Infusion Services #308, LLC.
COMPLIANCE OFFICER/INSPECTOR: Steve Haiber	**Permit #:** Y005288
ACCOMPANIED BY: Chirag Patel	**Address:** 485 N Juniper Drive. Ste 2. Chandler, AZ. 85226. NABP Blueprint Inspection.

1. This inspection is conducted under the authority of Arizona Revised Statutes (A.R.S.) §§32-1904(A), 32-1927.03(D), 32-1939(A), 32-1941(C), 32-1964(A), 36-2522(E), and 36-2523(C)).

2. The purpose of the inspection is to determine compliance with A.R.S. Title 32, Chapter 18; A.R.S. Title 36, Chapter 27; and Arizona Administrative Code (A.A.C.) Chapter 23, Title 4.

3. Fees for the inspection are: ■ Not applicable ☐ Authorized by: _____ as follows: _____

4. An authorized on-site representative of this facility may accompany the inspector(s) during the inspection of the premises except during any confidential interview.

5. You have the right to have on request copies of any original documents taken by the inspector(s) during the inspection in those cases where the agency has authority to take original documents.

6. You have the right to have on request a split of any samples taken during the inspection if the split of any samples would not prohibit an analysis from being conducted or render an analysis inconclusive.

7. You have the right to have on request copies of any analysis performed on samples taken during the inspection.

8. You have the right to have on request copies of any documents to be relied on to determine compliance with licensure or regulatory requirements if the agency is otherwise allowed by law to do so.

9. You have the right to have on request a detailed billing statement that provides reasonable specificity of the inspection or audit fees imposed pursuant to paragraph 3 of this subsection and that cites the statute or rule that authorizes the fees being charged.

10. Each person whose conversation is tape-recorded during the inspection will be informed that the conversation is being recorded.

11. Each person interviewed during the inspection will be informed that statements made by the person may be included in the report. Participation in an interview is voluntary unless the person is legally compelled to participate in the interview. Each person interviewed will be allowed twenty-four hours to review and revise any written witness statement drafted by the inspector(s) and on which the inspector(s) request the person's signature. The inspector(s) may not prohibit the person from having an attorney or expert in their field present during the interview to represent or advise the regulated person.

12. An inspector shall at the end of the inspection, offer to review with an authorized representative of the regulated person, the findings of the inspection and what agency actions the regulated person can expect.

13. An inspector may not take any adverse action, treat the person less favorably or draw any inference as a result of the person's decision to be represented by an attorney or advised by other experts in their field.

14. The information and documents provided to the inspector(s) as part of an investigation are confidential pursuant to A.R.S. § 32-1940. Information and documents provided to the inspector(s) as part of an inspection are not confidential with the exception of trade secrets and propriety and confidential information.

15. A new or amended compliance action arising from the inspection may not be filed against the regulated person more than four years after the date of the inspection.

16. If you have any questions regarding this inspection, you may contact: **Steve Haiber (623) 217-3332 shaiber@azpharmacy.gov**

17. You have the right to appeal a final decision of the Board if any administrative order is issued or other enforcement action is taken based on the results of this inspection. Administrative hearing rights are found in A.R.S. § 41-1092 et seq. Rights relating to appeal of a final agency decision are found in A.R.S. § 12-901 et seq.

18. If you have any questions regarding your right to appeal an enforcement action taken by the Board based on this inspection, you may contact: Jennifer Keonavong, Deputy Director at 602-771-2735, or Arizona Ombudsman-Citizens' Aide: 7878 N. 16th St. # 235, Phoenix, AZ 85020 602-277-7292 (email: ombuds@azoca.gov).

Upon entry onto the premises for this inspection, the Board inspector(s) identified above presented photo identification indicating they are Board employees, and reviewed with me the above Notice of Inspection Rights. I have read the disclosures above and am notified of my inspection and due process rights as listed above. I understand that while I have the right to decline to sign this form, the Board inspector(s) may nevertheless proceed with the inspection.

Signature and Title of Authorized Representative: _____ **Date:** 05/25/2023

☐ **By checking this box, the inspector(s) documents the refusal of the authorized representative to sign the Notice of Inspection Rights.** [Version 02.2023.01]

X
10. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		X

Please use and make copies of this page (if necessary) to provide information regarding any questions, 1-10, you have marked "YES" to in section 8 of the application. A signed statement of explanation for each event and a copy of all documents that identify the circumstance or contain an order, agreement or other disposition for the event must be provided.

This is in response to Question # 4. Provide all the following *where applicable*:

Date of Event/Arrest	Disposition Date	State	City	County
1/26/24		AZ	Phoenix	Maricopa
Case #	**Governing, licensing, Arresting Presiding Body/Agency/Court**			
CV2024-001628	Superior Court of State of Arizona			
Reason/Charge				
Claim for Posonal Property Dmg - existing Crack in wall				
Plaintiff/Defendant/Claimant/Respondent		**Lawsuit/Arbitration/Bankruptcy**		
Defendant		Arbitration		
Name of Business/Industry/Entity				
Mattox vs. Botello et al.				

Provide explanation below:

Our neighbor initiated litigation claiming personal property (Damage) Dmg for an existing crack in a burdary wall between our properties present prior to us taking ownership in an attempt to extort $15-000 from us through arbitration. on 09/19/24 the arbitrator found in favor of us (defendents) against the plaintiff & were awarded all atorney fees as the action was found to be prosecuted in bad faith. The plaintiff attempted to appeal the Judgement award and settled agreeing to dismiss the case with prejudice.

Arbitrator

IN THE SUPERIOR COURT OF MARICOPA COUNTY
IN AND FOR THE COUNTY OF MARICOPA

SHEILA MATTOX, Plaintiff, vs. ROBERT BOTELLO, et. al., Defendants.	Case No. CV2024-001628 **ARBITRATION AWARD**

This matter came for a mandatory arbitration hearing on September 19, 2024. Pursuant to the testimony presented, the Arbitrator finds in favor of Defendants, Shelby and Robert Botello ("Defendants") and against Plaintiff, Sheila Mattox ("Plaintiff"). Defendants are awarded attorneys' fees per A.R.S §12-349, in the amount of $11,247.00 and costs in the amount of $375.76, for a total judgment amount of $11,622.76, with interest accruing at the rate of 9.5% per annum until paid. Pursuant to A.R.S. §12-350, the Arbitrator finds that Plaintiff did not take available steps to determine the validity of her claim prior to filing suit; the action was prosecuted in bad faith; the action was groundless and Plaintiff was aware that her claims were groundless as testified during the arbitration hearing. The issues of fact determinative of the validity of Plaintiff's case were not reasonably in conflict; in fact Plaintiff's testimony stressed that the cause of the water damage to the Plaintiff's wall was unknown.

The arbitrator took the relative financial positions of all parties into consideration.

DATED THIS: October 8, 2024

PLATT & WESTBY, P.C.

Peter H. Westby, Esq.

	Types of Practice Additional Questions If any part of a question is no, enter "N" and explain the observation.	Y	N	?	NA	Notes
13.00	If the pharmacy mails or delivers filled prescriptions (patient specific, labeled with patient name when it leaves the pharmacy), are any of the deliveries to a provider or facility for administration to the patient? *If so, indicate volume or percentage of deliveries going to a provider or facility in this state, and volume or percentage of deliveries going to a provider or facility in other states.*	Y				Limited shipment of a patient specific biological drug to practitioner office for administration to the patient.
14.00	Does the pharmacy provide prescription products to a provider or facility for "office use" (not pursuant to a prescription received prior to delivery, not patient specific, not labeled with the patient name)? *If so, indicate volume or percentage provided to a provider or facility within this state, and volume or percentage provided to a provider or facility in other states.*		N			
15.00	Does the pharmacy provide prescription products to providers or facilities (including other pharmacies) as a wholesale distributer (sold to the provider or facility for their use, administration, or providing/dispensing to patients)?		N			
15.01	If so, is the percentage of product distributed at wholesale to providers or facilities within this state less than 5%? *Indicate actual percentage and if the percentage is based on number of units, number of prescriptions, dollar volume of total sales or dollar volume of prescription sales.*					
15.02	If so, is the percentage of product distributed at wholesale to providers or facilities in other states less than 5%? *Indicate actual percentage and if the percentage is based on number of units, number of prescriptions, dollar volume of total sales or dollar volume of prescription sales.*					

	General Operations and Licensure If any part of a question is no, enter "N" and explain the observation.	Y	N	?	NA	Notes

16.00	Are pharmacy licenses, permits, and registrations (state, controlled substance, DEA, etc) posted in customers' view and current? *Provide details if "no", such as closed-door pharmacy.*		N			Closed door facility. Licenses & permits posted and visible for in-house VIP tours.
17.00	Is the most recent board of pharmacy inspection report available for review? *Record the date of the last inspection and how frequently the pharmacy is routinely inspected by the board.*	Y				
18.00	Were any deficiencies noted? *Indicate the deficiencies and note whether they were corrected.*		N			No violations issued.
19.00	Does the pharmacy hold ANY wholesale, distributor, or manufacturer licenses? *Document information in the license grid above.*		N			
20.00	Has this pharmacy been inspected by any other state for which it holds a license? *If so, note the state and the date of the inspection and frequency of inspections by other states.*		N			
21.00	Is the pharmacy operating under an exemption or restriction granted by the state in which the pharmacy is located or by any other state in which the pharmacy is licensed? *If so, note the exemption or restriction.*		N			
22.00	Is the pharmacy operating under a waiver or variance granted by the state in which the pharmacy is located or by any other state in which the pharmacy is licensed? *If so, note the waiver or variance.*		N			
23.00	Does the pharmacy have any additional restrictions, limitations, or waivers with regards to any federal licenses or registrations (FDA, DEA, etc)? *If so, note the agency and additional item.*		N			
24.00	Has the pharmacy been inspected by the DEA? *If so, indicate the inspection date and note any deficiencies. Also note how frequently the pharmacy is inspected by the DEA.*		N			
25.00	Has the pharmacy been inspected by the FDA? *If so, indicate the inspection date and note any deficiencies, significant correspondence, or if a "483" was issued and date, and response and date. Also note how frequently the pharmacy is inspected by the FDA.*	Y				No for the current location. Yes for the firm's former location which was inspected by the FDA on 03/08/2022.

26.00	Does the pharmacy hold any accreditations or certifications? *If so, indicate which in notes.*		Y				URAC & ACHC
27.00	Has the pharmacy held any accreditations or certifications in the past that have been rescinded or suspended? *Provide a list and the reasons for discontinuation.*			N			
28.00	Does the pharmacy perform patient lab testing such as blood glucose tests, cholesterol tests, etc? *If so, record the Clinical Laboratory Improvement Amendments (CLIA) waiver information, expiration date, and the name of lab director listed. Verify that the lab director is current (usually the PIC is the lab director named).*			N			
29.00	Does the pharmacy maintain all required records, including but not limited to prescription files and invoices on site? *How long are records kept? If not on site, where?*		Y				Maintained electronically for at least 7 years
29.01		Are written and verbal prescriptions (reduced to writing) kept on site for the entire retention period? *If not, explain including how they are accessed.*	Y				Written prescriptions received via fax or electronic process. Verbal orders are typed directly into an electronic template. All records are maintained electronically.
29.02		Are electronic prescriptions (such as fax, e-scripts) kept on site for the entire retention period? *Note if they are kept electronically or printed and kept in hard copy, and if off site: how they are accessed.*	Y				Maintained electronically for at least 7 years
29.03		Are all dispensing records (refills, verifications, DUR overrides, kept on site for the entire retention period? *Note if they are kept electronically or printed and kept in hard copy, and if off site: how they are accessed.*	Y				Records on site are from April 1st to present. Documents are also stored at Iron Mtn from 01/01/ 2018 to 03/31/2023. Further, all documents are readily retrievable from electronic record.

Personnel **If any part of a question is no, enter "N" and explain the observation.**		**Y**	**N**	**?**	**NA**	**Notes**
30.00	Are all pharmacist, pharmacy intern, and pharmacy technician (if applicable) licenses or registrations with the board current and in good standing? *How is this documented?*	Y				A copy of the license for each licensee is maintained w/in a 3 ring binder for inspection.
31.00	Is there a process for periodic verification of validity of licenses? *Describe.*	Y				Firm's HR department obtains a license and confirms license status via the AZ state board of pharmacy website. Confirmation process also takes place with every 2 year license renewal.

32.00	Are pharmacists providing patient services that require additional training or certification appropriately trained and certified? *Are the certifications current? (Immunization, CPR, MTM, etc.)*	Y				
33.00	Does the pharmacy maintain the proper technician-to-pharmacist ratio? *Indicate ratio used and the maximum number of staff who work at the same time.*				NA	AZ does not require a tech to pharmacist ratio

	Facility and Security If any part of a question is no, enter "N" and explain the observation.	Y	N	?	NA	Notes
34.00	Does the pharmacy have a working security/alarm system in place that is in compliance with the laws and regulations of the resident state?	Y				Pharmacy has a working security / alarm system
35.00	Are Schedule II controlled substances secured in a locked cabinet or safe? *If not, describe how controlled substances are secured or stored.*		N			Facility does not handle C2 drug at this time. Facility does maintain a secure cabinet with a combination keypad code to allow pharmacist access.
36.00	Are there contingency plans in the event the pharmacy cannot be secured? *How will the drug products be handled?*	Y				Firm would deploy pharmacist to remain on site until perimeter security was restablished.
37.00	Is the pharmacy clean and sanitary, and is there appropriate space for the prescription volume? *Look for clutter, or crowded counters or stacks of prescriptions to be checked.*	Y				Facility is new. Permit issued 3/31/2023. Walk thru of facility indicates clean, organized operation.
37.01	Does the pharmacy destroy prescription products on site (such as expired, damaged, recalled, etc) and appropriately document the destruction? *View destruction logs.*	Y				All wasted product is documented. On site destruction would be limited to non-hazardous non drug products such as normal saline, sterile water.
37.02	Does the pharmacy return prescription products to the manufacturer, distributor, or send to a reverse distributor for destruction? *Indicate name of reverse distributor used, if applicable.*	Y				Pharmalink, Inc.
37.03	Does the pharmacy have a hazardous waste handling and collection system? For example, empty bottles that contained chemotherapy medications or warfarin, or hazardous drug compounding waste. *Indicate how often the bin is emptied/collected and the vendor used.*	Y				Facility maintains specific containers dedicated for bulk waste and trace chemo waste. Hazardous waste is held for return to Veolia.

38.00	Does the pharmacy have a private area for patient counseling and providing patient services? *Describe.*		N			Closed door facility. If a patient were to arrive at the pharmacy to pick up an order a pharmacist would perform counseling in a private office area.
39.00	Is temperature in the drug storage area monitored? *Describe the process and if it is manual, mechanical, or electronic. Indicate range. How are excursions detected? How long are records maintained?*	Y				Electronic documentation maintained. Accessible on line. Retension maintained for at least 2 years.
39.01	Is the temperature in the drug storage area within the USP range for controlled room temperature (20°-25°C or 68°-77 °F)? *Record the temperature at the time of inspection.*	Y				Drug storage area temps: warehouse = +71.35F, pharmacy prep west = +69.65F, pharmacy prep east = + 69.5F,
40.00	Are the refrigerator and freezer restricted to drug products only (no food)?	Y				
41.00	The pharmacy has a process for how the refrigerator temperature is monitored for excursions 24/7. *Describe the process. Indicate range. How are excursions detected? How long are records maintained?*	Y				OOS events - mgmt is notified via email and text alerts. Alarm triggered when temperature ready is above or below +68 - +77F for greater than 60 minutes.
41.01	Is the temperature in the refrigerator within the USP range (2°-8°C or 36°-46 °F)? *Record the temperature of the refrigerator at the time of inspection.*	Y				Walk in refrigator south = +40.1F, Walk in refrigerator north = +41F
42.00	The pharmacy has a process for how the freezer temperature is monitored for excursions 24/7. *Describe the process. Indicate range. How are excursions detected? How long are records maintained?*	Y				OOS events - mgmt is notified via email and text alerts. Alarm triggered when temperature ready is above or below+36 to +46F for greater than 60 minutes.
42.01	Is the temperature in the freezer within the USP range (between −25° to −10°C or −13° to 14 °F)? *Record the temperature of the freezer at the time of inspection.*	Y				Freezer units only maintained for gel bricks. No drug product stored.
43.00	Are there contingency plans in the event of power outage or refrigerator/freezer failure? *Describe processes*	Y				Back up generator available to supply power to the refrigeration/freezer units. Product would be relocated to another refrigerator unit in the event of a compressor failure.

44.00	Are there contingency plans in the event of heating or air conditioning failure? *Describe processes.*	Y				Back up generator available to supply power to the facility in the event of a power failure. 40 separate HVAC units available to provide backup temperture control in the event of a compressor failure.
45.00	Is there a plan of action if there are any temperature or humidity excursions to determine if the integrity of the products has been compromised?	Y				Product exposed to excessive excursion would be destroyed.
46.00	Does the pharmacy utilize any automated apparatuses for prescription processing/counting (such as robotics, Baker cells, etc)? *List numbers and types.*	Y				Facility utilizes repeater pumps and Exactamix 2400 for TPN's.

	Product Receipt and Inventory If any part of a question is no, enter "N" and explain the observation.	Y	N	?	NA	Notes
47.00	Does the pharmacy restrict ordering to only approved wholesale distributors or manufacturers? *Indicate who approves suppliers.*	Y				New vendor approvals performed by corporate purchasing department.
47.01	If the pharmacy is not restricted to vendors approved by the corporate office, or the pharmacy can purchase from other sources, are the other sources verified? *How?*		N			
47.02	Are all products received from authorized trading partners? *List trading partners.*	Y				McKesson, Cardinal, Baxter, Takeda, Fresenius
47.03	Does the pharmacy ensure transaction data (transaction history, transaction information, transaction statement) is received at the same time or before the product is received? *Explain procedure if transaction data not received.*	Y				Invoices received with the delivery or electronically. Shipments received without an invoice, bill of lading or packing slip are set aside until the appropriate documentation is received to validate the order.
47.04	Does the pharmacy have a procedure to verify product (suspect or illegitimate) including quarantine of product and reporting?	Y				
48.00	Does the pharmacy utilize paper DEA-222 forms to procure Schedule II substances? *Who on the staff has the authority (Power of Attorney) to sign the DEA-222 forms?*		N			Facility does not handle C2 drugs at this time. Facility returned DEA 222 forms with former address to the DEA. Facility has not ordered new 222 forms for the new facility address.
49.00	Does the pharmacy utilize CSOS (electronic Schedule II ordering) to procure Schedule II substances?		N			Facility does not handle C2 drugs at this time. Facility returned DEA 222 forms with former
50.00	Is the receipt of Schedule II orders documented appropriately? *DEA-222 has the quantity and date on each line of product received, the CSOS record (electronic or paper printout) indicates verification of receipt and staff performing verification.*				N/A	
51.00	Are invoices for controlled substances (Schedules I-V) that are received filed separately and are the invoices signed/initialed and dated upon receipt and every item checked in?	Y				

52.00	Are all orders received when the pharmacy is open? *Verify the orders are brought directly to the pharmacy still sealed and not delivered before the pharmacy is open.*	Y				
53.00	Does the pharmacy purchase any compounded products from other entities for dispensing to patients? *If so, describe.*		N			
54.00	Does the pharmacy have a system in place to track prescription drug products in order to detect diversion or theft? *Describe (for example, inventory or shrink report tools used, perpetual inventory in computer, etc)*	Y				On hand count changes limited to inventory team. On hand count changes reviewed by the inventory team of 3 employees . Investigation opened to review suspicious changes. Waste log maintained.
54.01	Are incidents of diversion or resignation/termination of personnel for cause appropriately reported? *Indicate agencies/law enforcement to whom reports are made.*		N			Division event would be reported to corporate security, DEA (if CS drug), AZ board of pharmacy and local law enforcement.
55.00	Does the pharmacy keep a perpetual inventory log of all Schedule II controlled substances (including APIs, if applicable)?				N/A	
56.00	Is the Schedule II perpetual inventory log reconciled regularly? *Indicate how often the Schedule II controlled substances are counted. View the perpetual log and verify that reconciliation is taking place.*				N/A	
57.00	Is the most recent complete controlled substances inventory available for review? *Indicate the date of the last inventory and frequency taken (minimum every two years).*	Y				Most recent CSI conducted on 5/01/2023 at close.
57.01	Does the pharmacy maintain other required inventories (such as change in PIC, theft/loss, etc)?	Y				Change of PIC inventory performed 4/21/2023.
58.00	Does the pharmacy stock and sell OTC pseudoephedrine (and/or ephedrine) products? *If so, indicate if the sale is recorded electronically or manually in a logbook.*		N			
58.01	Are these products mailed, sent, or delivered into other states? *View logs.*					
59.00	Does the pharmacy stock and sell other OTC restricted products for which ID is required and a log kept of the sale? *Indicate product types.*		N			
59.01	Are these products mailed, sent, or delivered into other states? *View logs.*					

60.00	Are outdated, damaged, or recalled products segregated? *How often does the pharmacy check for out-of-date products? Does it include OTC products?*		Y				Monthly report to identify short dated product.
60.01		If the pharmacy destroys products on site, are appropriate records kept of the destruction?	Y				
60.02		Does the pharmacy use a reverse distributor? *If so, indicate name of reverse distributor used.*	Y				Pharmalink, Inc.
61.00	Does the pharmacy **repackage** bulk containers of prescription medications into smaller containers for ease of use? *What expiration date is used on the repacked container?*		Y				Repackaging performed for dextrose reduction from manufacturer bag into elastomeric containter. With the exception of a minibag plus attachment a maximum 9 day BUD used.
62.00	Does the pharmacy **prepack** bulk containers of prescription medications into unit-of-use quantities? *What expiration date is on the prepacked containers?*			N			
63.00	Does the pharmacy return to stock prescription drugs that were filled but never picked up? *Indicate if the products are returned to the bulk stock bottle or set on the shelf with the prescription label (with PHI obscured).*		Y				If labeled product returned to stock then all PHI removed prior to restocking. Original BUD is maintained.

Prescription Processing **If any part of a question is no, enter "N" and explain the observation.**			Y	N	?	NA	**Notes**
64.00	**Patient Profile:** Is patient profile data organized and readily accessible to facilitate consultation with the prescriber, patient, or caregiver? *Indicate who enters patient profile data into the computer system.*		Y				Profiling is performed by the firm's intake team.
64.01		If the pharmacy dispenses veterinary prescriptions, does the information gathered and recorded include the species, and name of the animal/owner as required by resident state law? *How is it indicated in the computer system that the patient is an animal? And how is it indicated in the system the prescription is a veterinary prescription?*		N			
65.00	**Prescription:** Are adequate processes in place to assure the integrity, legitimacy, and authenticity of prescription orders? *Staff is familiar with detecting fraud in hard copy, faxed, verbal, and electronic prescriptions.*		Y				All prescriptions received are for previously profiled patients and prescribers.

65.01		Is there a procedure to follow when a prescription is suspected of (or actually is) fraudulent? *Describe the steps and reporting process.*	Y				Should the pharmacist have a question as to the legitimacy of the prescription, such as suspected forgery, fraudulent prescription, stolen prescription, etc., the following will occur: i. Contact the prescriber or the prescriber's office or place of employment if there is a phone number on the face of the prescription or facsimile. ii. Verify the legitimacy of the prescription using online prescriber verification websites such as MediRegs. iii. Utilize online controlled substance usage tools such as PMP reporting sites. If the pharmacist questions the validity of the prescription, they have the right to refuse to fill the prescription.
65.02		Are adequate processes in place for assuring that prescription medications are not prescribed or dispensed based on online medical consultations without there being a pre-existing prescriber-patient/client relationship? *Describe. Do the processes include comparing the physical addresses of the patient and prescriber?*				N/A	Covid pandemic has resulted in a temporary relaxation of the face to face prescriber visit via the PREP act.
65.03		Does the pharmacy have electronic prescription capability? *Indicate whether it is for non-controlled substances, controlled substances, or both.*	Y				E-Rx software supports both legend and CS prescription order receipt.
66.00	**Accuracy:** Is the accuracy of the information entered into the computer system verified (patient information and prescription information)? *Indicate how and by whom.*		Y				Multi step pharmacist verification process. At a minimum 4 separate pharmacist checks - OE review, 2nd OE review, review of compounding components used, pre-packing review.
67.00	**DUR:** Does staff conduct prospective DUR prior to the dispensing of a medication or product? *At what point in the process does the DUR take place?*		Y				DUR occurs after order entry.

67.01		Does the DUR include: • drug-drug interaction (Prescription and OTC) • drug-allergy interaction, • therapeutic duplication, • under- or over-utilization (including clinical abuse/misuse) • disease state or condition contraindication, • Incorrect dosage or duration of therapy, and • gender or age related contraindications. *Indicate if there are other parameters routinely included in the DUR.*	Y				Firm sets the fulfillment software system DUR alert level.
67.02		Does the pharmacy staff obtain additional information to use in the DUR process? *Describe.*	Y				SOP maintained to guide pharmacist DUR review process.
67.03		Does the pharmacy have adequate resources/references related to the type of pharmacy practice it operates?	Y				
67.04		Does the pharmacy report appropriate data to the state PMP (in this state and the other states in which the pharmacy is licensed)?	Y				
67.05		Does the pharmacy access state PMP/PDMP data for specific patients? *Verify there is a policy regarding access and follow-up or reporting and that pharmacist can access the PMP data.*	Y				
67.06		Are DUR overrides/bypasses documented? Indicate if documented via a password/biometric override or by computer logs.	Y				
67.07		Is the DUR process performed electronically by the computer system? *Identify integrated drug database used.*	Y				Medispan
67.08		If the DUR is manual, is there a system to document: • How manual DUR is performed • Specific issues that were identified • Pharmacist that considered the identified issues and gave the okay to proceed				N/A	

67.09		If the pharmacy dispenses veterinary prescriptions, does it have a veterinary drug database integrated into the computer system for electronic DUR? *List veterinary product electronic database used. If not, list compendia used for performing manual DUR.*				N/A	
68.00	Are filled prescriptions verified for accuracy prior to dispensing? *Indicate process, by whom, and how documented.*		Y				Multi step pharmacist verification process. At a minimum 4 separate pharmacist checks - OE review, 2nd OE review, review of compounding components used, pre-packing review. / Documentation maintained w/in pharmacy system
69.00	Are filled prescriptions appropriately labeled?		Y				
70.00	**Confidentiality:** Is access to the pharmacy computer system limited to appropriate personnel? *Password protected, access limited by job type, access revoked as appropriate such as upon termination. Record name/brand of pharmacy computer system used.*		Y				CPR plus
70.01		Does the pharmacy appropriately destroy PHI including labeled prescription vials?	Y				
71.00	**Mail/Delivery:** If applicable, are packing materials designed to maintain the physical integrity, stability, and purity of prescription medications and compounded preparations in transport?		Y				Overnight shipment
72.00	**Off-Site Processes:** Are any portions of the prescription processing (in the questions below) performed at a different location? ***Note: If the facility indicates "no", please ask each question below to verify.***		Y				
72.01		Is patient information (demographics and contact information) and profile information (allergies, disease states, etc) entered into the computer at another location?	Y				Non-licensed ancillary staff enter demographic information - pt name, address, insurance information / allergies, disease state information entered by a licensed nurse from a remote location under shared services rule.
72.02		Are prescriptions received by another location (including written, telephone, fax, electronic)?		N			

72.03		Is prescription information entered into the computer system at another location?	Y				Remote workers perform their activities from their residence.
72.04		Is the accuracy of the prescription information entered into the computer verified at another location?	Y				Remotely deployed pharmacist may perform order entry review from home.
72.05		Is any part of the DUR process (including assessing and acting on DUR alerts and warnings) performed at another location?	Y				Remotely deployed pharmacist may perform DUR review from home.
72.06		Are any prescriptions dispensed or sold from this facility filled at another location? *If so, explain how the prescriptions are labeled including any identifier indicating it was filled at the other location.*		N			
72.07		If any of the above functions are performed at another location, is the other location under common ownership? *If not commonly owned, explain if there is a central fill or other agreement in place.*		N			
72.08		If any of the above functions are performed at another location, is that location in a different state than this facility? *If so, explain.*	Y				Pharmacists working remotely from another state who are licensed in the state of Arizona will process refills for patients.
72.09		If any of the above functions are performed at another location, are there policies and procedures for the function that include maintaining records of the person(s) performing the function and accountability?	Y				All records are stored electronically and are readily retrievable.
73.00	**Off-Site Inventory:** Does the pharmacy maintain any emergency kits in nursing homes, long-term care facilities, or other entities (such as hospice, EMTs, ambulances)? *Note name(s) of facilities or entities.*			N			
73.01		Do the emergency kits contain any compounded sterile products? If so, list.					
74.00	**Off-Site Inventory:** Does the pharmacy maintain any automated prescription dispensing devices outside the pharmacy such as Pyxis in a nursing home, or a secure mailbox device that patients access after hours, etc? *Note types and locations.*			N			

74.01		If so, are the automated devices appropriately licensed, registered, or approved by the board of pharmacy? *Provide details.*					
74.02		Do the automated dispensing devices contain any compounded sterile products? If so, list.					

Patient Counseling and Communication **If any part of a question is no, enter "N" and explain the observation.**			**Y**	**N**	**?**	**NA**	**Notes**
75.00		Does the pharmacist provide counseling for all new prescriptions picked up at the pharmacy (proactively, no "offer")?	**Y**				Closed door pharmacy. Pharmacist available to provide face to face counsel in the event of a walk in patient pick up.
75.01		Is an "offer" to counsel made for all new prescriptions picked up at the pharmacy? *Indicate who makes the "offer".*				**N/A**	
76.00		Does the pharmacist provide counseling for all refilled prescriptions picked up at the pharmacy (proactively, no "offer")?		**N**			Counsel on refill presriptions is not required.
76.01		Is an "offer" to counsel made for all refilled prescriptions picked up at the pharmacy? *Indicate who makes the "offer".*				**N/A**	
77.00		Does the pharmacist provide counseling for refilled prescriptions picked up at the pharmacy when there is a change in therapy or other issue determined by the pharmacist (proactively, no "offer")?	**Y**				Closed door pharmacy. Pharmacist available to provide face to face counsel in the event of a walk in patient pick up.
77.01		Is an "offer" to counsel made for all refilled prescriptions picked up at the pharmacy when there is a change in therapy or other issue determined by the pharmacist? *Indicate who makes the "offer"*				**N/A**	
78.00		Is patient counseling provided for delivered prescriptions? *How? Printed information sent to patient, 800 number for patients to call, pharmacist calls patients directly, etc?*	**Y**				Printed written drug informaition provided with each order / Proactive pharmacist call to patient prior to shipment.
79.00		Is patient counseling provided for mailed prescriptions? *How? Printed information sent to patient, 800 number for patients to call, pharmacist calls patients directly, etc?*	**Y**				Printed written drug informaition provided with each order / Proactive pharmacist call to patient prior to shipment.

80.00	Are patient package inserts (PPIs) provided with every fill and refill of medications for which they are required (such as hormone products, inhalers, etc)? *How?*					N/A	
81.00	Are MedGuides provided with every fill and refill of medications for which they are required (such as NSAIDS, antidepressants, etc)? *How?*			Y			FDA medication guide generated by CPR plus system.
82.00	Are REMS (Risk Evaluation Mitigation Strategy) implementation programs performed? Confirm that procedures are in place. *List programs (such as iPledge for isotretinoin, or Tikosyn)*			Y			Rems programs that support the following drugs Ultomiris and Soliris
83.00	Is patient counseling, the offer to counsel, or the refusal of patient counseling documented? *How? Describe.*			Y			Documentated w/in the patient's chart w/in CPR plus system.
84.00	Do patients have 24-hour access to a pharmacist? *How? Note: may not be required by the resident state.*			Y			After hours on call pharmacist available via toll free number
85.00	Are processes in place to handle a drug recall?			Y			
86.00	Does the pharmacy accept prescription drugs back for destruction as part of a drug take-back program?					N/A	
86.01		Does the take-back program include controlled substances?					
86.02		Does the pharmacy have a modified DEA registration for controlled substance take-back? *If so, list.*					

Quality Assurance/Quality Improvement Program If any part of a question is no, enter "N" and explain the observation.			Y	N	?	NA	Notes
87.00	Is there a documented continuous quality improvement (CQI) Program for the purpose of detecting, documenting, assessing, and preventing quality related events (QREs)? *Who oversees the program?*		Y				Quality related event documented within Atlas system. Process managed by
87.01		Policies and procedures for the program are maintained in the pharmacy in an immediately retrievable form. *Indicate if hard copy, electronic, or both.*	Y				SOP maintained in an electronic format. Accessible for all employees.
87.02		"Quality-Related Event" (QRE) is defined to mean any departure from the appropriate dispensing of a prescribed medication that is or is not corrected prior to the delivery and/or administration of the medication including (but not limited to): 1. a variation from the prescriber's prescription drug order such as incorrect drug, strength, form, or patient; or inadequate or incorrect packaging, labeling, or directions; 2. a failure to identify and manage over-utilization or under-utilization; therapeutic duplication; drug-disease contraindications; drug-drug interactions incorrect drug dosage or duration of drug treatment; drug-allergy interactions; or clinical abuse/misuse. 3. packaging or warnings that fail to meet recognized standards, the delivery of a medication to the wrong patient, or the failure to detect and appropriately manage a significant actual or potential problem with a patient's drug therapy.	Y				Reviewed potential QRE trigger events with management - process aligns with the events listed in 87.02.
87.03		There is documentation of intitial/ongoing (at least yearly) review and training of all pharmacy employees on the CQI program and processes.	Y				Documented w/in the Atlas pharmacy fulfillment system.
88.00	**Documentation of QREs** starts as soon as possible, but no more than three days, after determining their occurrence. *Indicate if documentation/forms are hard copy or electronic.*		Y				Documentation required w/in 24 hours of the event discovery.

88.01		Documentation includes all the pertinent data about the prescription involved including personnel involved at each step.	Y				Communicated in a weekly pharmacist and technician meetings.
88.02		Documentation includes documenting the type of QRE details and how/who discovered the QRE.	Y				
88.03		Documentation incudes possible contributing factors such as day and time the QRE occurred, number of pharmacists and technicianss on duty, prescription volume that day, equipment failure, or other factors affecting work-flow at the time.	Y				
88.04		Documentation includes steps taken to remediate including communications with the patient and the provider, and if the medication was ingested, disposition of the patient.	Y				
89.00	**QRE data** collected is analyzed to assess causes and any contributing factors (root cause). *Indicate who performs the analysis and frequency (with each event, weekly, monthly, quarterly, etc)*		Y				GM and PIC responsible. Monthly process improvement review. Quality dept puts together summary report which is reviewed by GM and PIC.
89.01		The pharmacy uses the findings of the analysis to formulate an appropriate response and develop pharmacy systems and workflow processes designed to prevent QREs and increase good outcomes for patients.	Y				Process review to identify process improvements to propose changes to upper management.
89.02		For pharmacies utilizing a drug formulary, a periodic review of such formulary is undertaken to ensure that appropriate medications are being offered/selected in the best interest of patients.		N			
90.00	**Quality meetings** are held at least annually by staff members of the Pharmacy to consider the effects on quality of the pharmacy system due to staffing levels, workflow, and technological support.		Y				Meeting held monthly.
90.01		The meeting reviews data showing evidence of the quality of care for patients and develops plans for improvements to increase good outcomes for patients.	Y				GM and PIC responsible. Monthly process improvement review. Quality dept puts together summary report which is reviewed by GM and PIC.

90.02		Improvements or changes made are evaluated for performance to measure the effectiveness of the CQI program.	Y				GM and PIC responsible. Monthly process improvement review. Quality dept puts together summary report which is reviewed by GM and PIC.
91.00	**Reporting:** Incidents of QREs are reported to a nationally recognized error reporting program, an outside peer review committee, or a patient safety organization. *Indicate which organizations are reported including if the pharmacy reports QREs to the board of pharmacy.*		Y				Reported to FDA or product manufacturer
91.01		Adverse events are reported to the appropriate entities such as the board of pharmacy, MedWatch, FDA, VAERS, etc?	Y				Reported to FDA or product manufacturer
91.02		Incidents involving malfunctioning or defective medical equipment or devices (blood glucose meters, DME, injection devices, etc) are documented and reported to the manufacturer or distributor.	Y				Cority - internal reporting process for DME product events.
92.00	**Quality Self-Audits** are performed by the pharmacy at least quarterly (and upon change in PIC) to determine whether the occurrence of QREs has decreased and whether there has been compliance with preventative procedures, and to develop a plan for improved adherence with the CQI program in the future.		Y				Internal audits performed with on-site pharmacist observation of compounding technician gowning and compounding processes.
93.00	**Consumer Surveys** are conducted at least yearly of patients who receive pharmaceutical products and services at the pharmacy. A statistically valid sampling technique may be used in lieu of surveying every patient. Each pharmacy should use the results of its consumer survey to evaluate its own performance at a particular time and over a period of time.		Y				Consumer surveys performed on an ongoing basis. Results reviewed monthly.
94.00	**Patient Complaints** are documented, tracked, and investigated as appropriate and the information is used as part of the CQI program.		Y				Complaints are documented within the firm's Atlas event system.

Sterile Compounding Manager	Ralph Nellas					
Hazardous Compounding Supervisor	Peter Calander					

	General Operations and Information	Y	N	?	NA	Notes
1.00	Does the pharmacy **dispense** nonsterile compounded preparations pursuant to a prescription?				NA	Inspected pharmacy does not perform any non-sterile compounding activity therefore nonsterile CPD inspection was not performed

1.01		Are patient profiles complete and DUR performed for each prescription? *View selected files for profile to include allergies, disease states/conditions, other medications taken not dispensed by this pharmacy.*				NA	
1.02		The compounded prescription produces a significant difference from a commercially available drug that is justified by a documented medical need of the individual patient as determined by the prescribing practitioner.				NA	
1.03		Are nonsterile compounded prescriptions picked up at the pharmacy?				NA	
1.04		Are nonsterile compounded prescriptions delivered to patients in their homes or residential facilities?				NA	
1.05		Are nonsterile compounded prescriptions delivered to the practitioner for administration to the patient in the office, clinic, or facility?				NA	
2.00	Does the pharmacy **distribute** nonsterile compounded preparations? *Not pursuant to a prescription, not labeled by the pharmacy with a patient name.*					NA	
2.01		Does the pharmacy distribute nonsterile compounded preparations to practitioners for office use?				NA	
2.02		Does the pharmacy distribute nonsterile compounded preparations to hospitals, clinics, or surgery centers?				NA	
2.03		Does the pharmacy have a sales force that distributes samples containing active ingredients? *List samples provided.*				NA	
3.00	Does the pharmacy provide nonsterile compounded preparations to other pharmacies for dispensing?					NA	
3.01		If so, does the pharmacy have central fill contracts or agreements with these pharmacies for patient specific preparations?				NA	
4.00	Does the pharmacy compound oral preparations (tablets, capsules, liquids, lozenges, etc.)? *Indicate which in notes*					NA	
5.00	Does the pharmacy compound topicals (creams, ointments, inserts, suppositories, patches, sprays including nasal sprays, etc.)? *Indicate which in notes*					NA	

6.00	Does the pharmacy compound vitamin or nutritional supplements?					NA	
7.00	Does the pharmacy compound investigational drugs? *If so, provide list.*					NA	
8.00	Does the pharmacy make a copy of an approved commercial product? *Indicate volume or percent compounded currently in note.*					NA	
8.01	Products are verified as not available via FDA list and/or the manufacturer and documented					NA	
8.02	FDA list is monitored (and manufacturer) and when item is taken off the list or becomes available, any remaining stock is quarantined for destruction and not dispensed or distributed					NA	
9.00	Does the pharmacy perform compounding identified as **simple?** *Indicate percentage of simple compounding in Notes* 1. Making a preparation that has a USP compounding monograph or that appears in a peer-reviewed journal article that contains specific quantities of all components, compounding procedure and equipment, and stability data for that formulation with appropriate beyond-use dates (BUD)s. 2. Reconstituting or manipulating commercial products that may require the addition of one or more ingredients as directed by the manufacturer.					NA	
10.00	Does the pharmacy perform compounding identified as **moderate?** *Indicate percentage of moderate compounding in Notes* 1. Making a preparation that requires special calculations or procedures (such as calibration of dosage unit mold cavities) to determine quantities of components per preparation or per individualized dosage units. 2. Making a preparation for which stability data for that specific formula is not available.					NA	
11.00	Does the pharmacy perform compounding identified as **complex**? *Indicate percentage of complex compounding in Notes* Making a preparation that requires special training, environment, facilities, equipment, and procedures to ensure appropriate therapeutic outcomes.					NA	
12.00	Does the pharmacy perform compounding with **hazardous drugs**? *Indicate percentage of hazardous nonsterile compounding in Notes* NIOSH list of hazardous drugs including chemotherapy, hormones, etc.					NA	
12.01	Is the pharmacy aware of the more stringent requirements of the proposed USP Chapter <800>?					NA	

12.02		Does the pharmacy have a hazardous waste handling and collection system? For example, empty bottles that contained chemotherapy medications or warfarin, hazardous drug compounding waste. *Indicate how often the bin is emptied/collected and the vendor used.*				NA	
12.03		Do patient/caregiver training programs or materials contain information and precautions regarding the handling and disposal of hazardous products such as chemotherapy medications?				NA	
13.00	Are Safety Data Sheets (SDS) [formerly known as Material Safety Data Sheets (MSDS)] available to personnel for drugs and chemicals used in the pharmacy (including those for compounding, if applicable)? *Verify that personnel can access them and are familiar with the format.*					NA	
14.00	Does the pharmacy compound using any **controlled substances**? *Indicate percentage of controlled substance nonsterile compounding in Notes*					NA	
15.00	**APIs:** Does the pharmacy make any sterile or nonsterile compounded preparations using bulk powder Active Pharmaceutical Ingredients (APIs)?					NA	
15.01		Does the pharmacy purchase APIs directly from the manufacturer? *If not, indicate the source of APIs.*				NA	
15.02		Does the pharmacy verify that the source of the API is an FDA-registered facility? *How?*				NA	
15.03		Does the pharmacy use active ingredients that are not from an FDA facility? *If so, indicate sources*				NA	
15.04		Does the computer track on-hand quantities of APIs used for compounding?				NA	
16.00	Does the pharmacy have its own lab to perform testing? *If so, what tests are performed in house?*					NA	
17.00	Does the pharmacy send samples to an outside lab to perform testing? *If so, provide the name of the lab performing testing for the pharmacy and what testing is performed.*					NA	

18.00		**Quality Assurance/Quality Improvement:** Does the pharmacy continuous quality improvement program include nonsterile compounding measures? • QREs related to the preparation of compounded products • Personnel testing and validation • Equipment calibration, testing and validation • End product testing (such as: potency, particulates, consistency, etc.) • Patient or prescriber reports or complaints regarding nonsterile compounded products.				NA	
18.01		Does the facility QA program identify action limits or thresholds and the appropriate follow-up mechanisms when action limits or thresholds are exceeded including a recall system?				NA	
18.02		Does the recall system include communication with both the patient and the physician/prescriber regarding the affected nonsterile compounded preparation?				NA	
18.03		Are QREs involving nonsterile compounded preparations or are recalled by the pharmacy reported to the Board of Pharmacy?				NA	

Component Selection and Use			Compliant	Non-Compliant	Unknown	N/A
19.00		**APIs**: Certificates of analysis (COAs) obtained for all bulk APIs used for compounding. *Verify by selecting products from the shelf from different suppliers and ask to see the COAs for those products.*				NA
19.01		USP- or NF-grade substances used, if available				NA
19.02		If compendial quality components are not available, chemically pure, analytical reagent grade or American Chemical Society-certified components are used and are determined to be free from impurities.				NA
19.03		APIs or other components have labeling indicating use for pharmaceutical compounding or manufacturing. Labels do not indicate "for research purposes only", "not for drug use", or are handwritten labels from other pharmacies. *Photograph and describe in notes below if found. Request copies of the invoices for products with questionable labels.*				NA

19.04		If compounding for both humans and animals, APIs or other components that are labeled for veterinary use only are segregated or marked in such a way to prevent them from being used for human compounding				NA
19.05		All substances and components have a complete label including a batch control or lot number, and an expiration date.				NA
19.06		For APIs without an expiration date assigned by the manufacturer or supplier, the pharmacy assigns a conservative expiration date. The expiration date assigned does not exceed three (3) years for ingredients used for non-sterile compounding and does not exceed one (1) year for ingredients used for sterile compounding. *Note: purity and quality testing may be performed to extend.*				NA
19.07		All APIs are labeled with the date they were received.				NA
19.08		If the pharmacy repackages APIs into smaller containers for ease of use, the expiration date assigned is conservative (typically the lesser of one year or the actual expiration from the original container). Product may be tested to extend the expiration date but may not exceed the original package expiration date.				NA
19.09		Bulk component containers are labeled with appropriate OSHA hazard communication labels and hazardous substances are segregated (including hormones).				NA
19.10		Components from foreign sources that are derived from ruminant animals (cow, sheep, goat) have documentation that the component is in compliance with federal laws governing processing, use, and importation? That the animals were free from disease, and that they were born, raised, and slaughtered in locations where bovine spongiform encephalopathy and scrapie are not known to exist.				NA
20.00	Where water is an ingredient, purified or distilled water is used.					NA
21.00	Ingredients used for dietary or nutritional supplements meet USP, Food Chemicals Codex (FCC), or NF standards, or the pharmacy has alternate means to determine if the ingredients meet food-grade quality.					NA
22.00	There are no preparations made or ingredients used that appear on the FDA list of drug products withdrawn or removed from the market for safety reasons (facility has a copy of the list or other way to determine).					NA
23.00	When manufactured products are used for compounding, all the other excipients in the product are considered relative to the use, effectiveness, and stability of the compounded preparation to be made.					NA
24.00	For **animal compounding:** The compounding meets the same standards as compounding for human patients.					NA
24.01		The pharmacist is knowledgeable or has references regarding the individual species' limitations in physiology and metabolic capacity that can result in toxicity when certain drugs or excipients are used.				NA
24.02		It is determined and documented if the animal is used for food (meat, milk, eggs, etc.) or that the animal is a pet.				NA
24.03		The pharmacist familiar with, or has a reference regarding drug residues in the food chain and withdrawal times if compounding for food-producing animals.				NA

24.04		The facility has a list of drugs and components not allowed when compounding for food-producing animals.					NA
24.05		The pharmacist is familiar with, or has a reference regarding regulations for drug use in performance animals (e.g., race or show horses, racing dogs)					NA
Notes (refer to question number above)							

Beyond Use Dating (BUD)		Compliant	Non-Compliant	Unknown	N/A
25.00	BUDs are assigned from the day of preparation.				
26.00	BUDs for nonaqueous formulations are not later than the remaining time until the earliest expiration date of any API and not later than six (6) months.				
27.00	BUDs for water-containing oral formulations are not later than 14 days when stored at controlled cold temperatures (refrigerated).				
28.00	BUDs for water-containing topical/dermal and mucosal liquid and semisolid formulations not later than 30 days.				
29.00	BUDs are assigned based on dispensing in tight, light-resistant containers/overpacks.				
30.00	Extended BUDs are supported by testing data. *View documentation used, preparation must exactly match formulation upon which data was obtained.*				
Notes (refer to question number above)					

Environment		Compliant	Non-Compliant	Unknown	N/A
31.00	The non-sterile compounding area is a controlled environment and separate from the general pharmacy.				NA
32.00	There sufficient space available for the type and amount of compounding performed and the space is orderly to prevent mix-ups between ingredients, containers, labels, in-process materials, and finished preparations.				NA

33.00	Only one preparation compounded at a time.					NA
34.00	Procedures are implemented to prevent cross-contamination, especially when compounding with drugs such as hazardous drugs and known allergens like penicillin that require special precautions.					NA
35.00	The compounding area is well lit.					NA
36.00	The pharmacy performs **hazardous** non-sterile compounding a ventilated cabinet such as a BSC, CAI, or CACI. *Note: CAI may not be used for hazardous drugs that may volatilize.(NIOSH requirement referenced in USP<795>. Note that proposed USP Chapter <800> will change hazardous drug compounding requirements.)*					NA
36.01		Ventilated cabinets (BSC, CAI, CACI) used for hazardous compounding are certified or tested periodically.				NA
36.02		Hood prefilters are checked and replaced regularly.				NA
36.03		If the hoods or isolators are not located in a closed, controlled room environment, there is documentation from the manufacturer and site testing to verify proper functioning of equipment under dynamic conditions for the safety of personnel.				NA
37.00	Appropriate protective attire (gowns, gloves, masks, etc.) is available including appropriate PPE for hazardous drug compounding, if hazardous drugs are used.					NA
38.00	There is a sink in the compounding area with hot and cold potable water, soap or detergent, and air-driers or single-use towels.					NA
39.00	There is adequate space to wash equipment and utensils including access to water for rinsing. *(Purified water is **recommended**)*					NA
40.00	The temperature of the compounding area is controlled by a thermostat and an air conditioning system is in place.					NA
41.00	**Temperature** in the compounding area is maintained to provide controlled room temperature storage of 20° to 25°C (68° to 77 °F), or more restrictive if warranted by specific drug product storage requirements.					NA
41.01		Temperature monitoring is in place to detect any excursions (24/7) by continuous monitoring or retroactive detection using min/max. Temperature records are maintained.				NA
41.02		Excursion action plan in place including evaluating excursion effects on drug product integrity.				NA
41.03		Temperature monitoring is also performed in drug storage areas (if separate from the compounding areas).				NA
42.00	**Humidity** in the compounding area is maintained to provide humidity in the ranges warranted by specific drug product storage requirements. If drug products require storage in a "dry place", humidity is not to exceed 40%. Generally **recommended** range is 35-60%.					NA
42.01		Humidity monitoring in place to detect any excursions (24/7) by continuous monitoring or retroactive detection using min/max. Humidity records are maintained.				NA

42.02		Excursion action plan in place including evaluating excursion effects on drug product integrity.				NA
42.03		Humidity monitoring is also performed in drug storage areas (if separate from the compounding areas).				NA
43.00	The bulk component storage area is adequately arranged and maintained in a clean and sanitary condition.					NA
44.00	All components, equipment, and containers are stored off the floor, and handled and stored to prevent contamination.					NA
45.00	All components and packaging containers and closures are properly rotated to use oldest first.					NA
46.00	Hazardous drugs are appropriately identified and marked, received, handled and stored by appropriately trained personnel. (OSHA regulations and NIOSH Alerts)					NA
47.00	Trash is disposed of in a safe, sanitary, and timely manner including hazardous waste.					NA
48.00	**Recommended:** Environmental testing is performed to detect contamination by drug residue in the pharmacy areas or areas served by the same ventilation system? *Drug residue may cause cross contamination to other products and expose staff. Not required but is recommended if compounding with hazardous materials, not using a hood, or the compounding room not segregated.*					
Notes (refer to question number above)						

Training		**Compliant**	**Non-Compliant**	**Unknown**	**N/A**
49.00	Have all personnel of reproductive capability who handle or compound hazardous drugs or chemicals confirmed in writing that they understand the risks of handling hazardous drugs? Teratogenicity, carcinogenicity, reproductive issues.				NA
50.00	There is documentation that all personnel that perform compounding are appropriately trained including policies and procedures, documentation, hazardous drug handling, and compounding technique and not allowed to compound or supervise compounding until training is successfully completed.				NA
51.00	There is documentation that the training process for the preparation of compounds includes demonstration of the compounding procedure first, followed by the trainee performing the procedure under supervision successfully before being allowed to perform compounding.				NA

52.00	There is documentation that training includes the operation of any equipment that may be used when preparing compounded products. *Documentation includes operation and troubleshooting*				NA
53.00	There is documentation available showing employees performing non-sterile compounding are evaluated at least annually (including hazardous drug handling).				NA
54.00	If the pharmacy uses relief personnel from outside agencies to perform non-sterile compounding there is documentation that training is verified.				NA
Notes (refer to question number above)					

Compounding Equipment		Compliant	Non-Compliant	Unknown	N/A
55.00	Appropriate equipment and utensils are available, clean, and in good working order. *Automated, mechanical, or electronic equipment (including capsule machines, autoclaves, ovens, etc.) are periodically inspected and calibrated.*				NA
56.00	Scales, balances, or other equipment used for measurement is validated and calibrated at least annually. *If scales are NOT validated and sealed by a state or local weights and measures agency, describe procedure used below in notes.*				NA
57.00	Powder hoods used for nonsterile compounding are certified or tested periodically to ensure proper function. Hood filters are checked regularly and replaced when necessary.				NA
58.00	All equipment is cleaned promptly after each use. *Equipment and utensils washed using potable water with a soap or detergent, and rinsed.* ***Recommended*** *rinsed with purified water.*				NA
59.00	The pharmacy uses separate equipment and utensils to compound allergenic, cytotoxic, or hazardous products, or has detailed procedures for meticulous cleaning of equipment and utensils immediately after use to prevent cross-contamination or exposure.				NA
Notes (refer to question number above)					

	Compliant

Documentation				Non-Compliant	Unknown	N/A
60.00	The pharmacy creates a master formulation record the first time before compounding a new preparation					NA
60.01		Every formulation is evaluated for incompatibilities and the potential for being ineffective or toxic.				NA
60.02		The master formulation record contains: 1. Official or assigned name, strength, and dosage form 2. All necessary calculations 3. Description of all ingredients and their quantities 4. Compatibility and stability information including references (when available) 5. Equipment used for the preparation 6. Mixing instructions (order of mixing, temperatures, duration of mixing, and other pertinent factors) 7. Container used and packaging requirements 8. Assigned BUD information 9. Labeling information including the name of and quantity or concentration of each active ingredient 10. Description of the finished preparation 11. Storage requirements 12. Quality control procedures and expected results (e.g. dose measurement of capsule in the dose calibrator).				NA
61.00	The pharmacy creates a compounding record for each compound prepared					NA
61.01		The compounding record includes: 1. Official or assigned name, strength and dosage of the preparation 2. Master Formulation Record reference 3. Sources, lot numbers, and expiration dates of all components 4. Total quantity or number of dosage units compounded 5. Person compounding the preparation 6. Person performing the quality control procedures 7. Person who approved the preparation 8. Date of compounding 9. Assigned internal identification number or prescription number 10. Description of the final preparation 11. Assigned BUD 12. Duplicate label 13. Results of quality control procedures (weight range of filled capsules, pH of aqueous liquids, etc.)? 14. Documentation of any quality control issues and any adverse reactions or preparation problems reported by the patient or caregiver including investigation and recall, if appropriate				NA

Notes (refer to question number above)

	Compounding Procedures	Compliant	Non-Compliant	Unknown	N/A
62.00	The Master Formulation Record and the Compounding Record has been reviewed by the compounder to ensure it is error free.				NA
63.00	Compounding personnel ascertain that ingredients for compounded preparations are of the correct identity and appropriate quality including a unit-by-unit inspection of the components.				NA
64.00	The containers and closures selected meet USP standards (from container supplier).				NA
65.00	Container selection determined by physical and chemical properties of the preparation.				NA
66.00	Compounding personnel maintain good hand hygiene and wear clean and appropriate clothing for the compounding being performed.				NA
67.00	Personnel don appropriate protective garb when performing compounding including hazardous compounding.				NA
68.00	Routine compounding procedures for batch preparation completed and verified according to written procedures. Including: *Calculations correct, weighing and measuring performed correctly, order of mixing correct, compounding techniques performed correctly*				NA
69.00	Procedures for in-process checks followed. *These checks indicate that appropriate procedures and packaging are followed for each step, including addressing pharmacist verification of steps performed by non-pharmacists that includes visual inspection of product, and documentation of the compounding accuracy is performed to ensure proper measurement, reconstitution and component usage.* ***Recommended:*** *compounding accuracy checked by a person other than the compounder.*				NA
70.00	If there are any deviations from the master formulation record, these deviations are recorded.				NA
71.00	There is a plan for cleaning. *After each preparation, daily tasks, monthly tasks, etc.*				NA
72.00	Personnel are appropriately garbed for protection when cleaning.				NA
	Notes (refer to question number above)				

Finished Preparation Release Checks and Tests			Compliant	Non-Compliant	Unknown	N/A
73.00	The finished preparation is observed to appear as expected in the master formulation record and documented.					NA
74.00	As appropriate, the final completed preparation assessed for weight, mixing, clarity, odor, color, consistency, pH, and strength and is documented.					NA
75.00	There are established written processes that describe test or examinations conducted on the compounded preparation (degree of weight variation in capsules, for example) to ensure uniformity and integrity.					NA
76.00	Preparations with extended BUDs that are not supported by testing data are sampled and tested for physical, chemical, and microbiological characteristics.					NA
76.01		If any failed tests or discrepancies are observed, there an investigation and appropriate corrective actions taken before dispensing to patient				NA
76.02		If products being tested are dispensed or distributed before the test results are obtained, there is a recall procedure if the test results indicate an issue.				NA
77.00	There are appropriate control procedures to monitor the output and to verify the performance of compounding processes and equipment that may be responsible for causing variability in the final compounded preparations. *Validation of equipment and personnel performance documentation*					NA
78.00	Labels on immediate patient-specific containers include identifiers for the persons preparing the compound and performing the final verification, BUD, an indication that this is a compounded preparation, special requirements for storage, and appropriate packaging and labeling of hazardous materials.					NA
79.00	Batch preparations (in anticipation of prescriptions) are of an appropriate volume and batch products in stock are all within their BUD (not outdated).					NA
80.00	Labels on batch preparations include the name and quantity of all contents, date and time of preparation (or internal code indicating this information), preparer and verification pharmacist identifiers, stability (BUD), and any auxiliary labels indicated including appropriate packaging and labeling of hazardous materials.					NA
81.00	Preparations are stored properly prior to dispensing based upon conditions upon which BUD was assigned.					NA
82.00	Preparations are examined immediately after preparation AND again immediately prior to dispensing for any signs of instability.					NA

Notes (refer to question number above)

Patient Counseling and Communication		Compliant	Non-Compliant	Unknown	N/A
83.00	Do patient/caregiver training programs or materials contain information and precautions regarding the handling and disposal of hazardous products such as chemotherapy medications?				NA
84.00	Compounding pharmacies: Are the above required printed drug information materials (drug information, PPI, MedGuides, etc.) provided for the compounded products? How?				NA
85.00	Compounding pharmacies: Are patients instructed on the signs of product instability or contamination (as appropriate) and to report any changes in the physical characteristics of the product to the pharmacy?				NA
86.00	Product recalls include documentation that both the patient AND the physician/prescriber of the potentially contaminated compounded product are notified of the potential risk.				NA
Notes (refer to question number above)					

The information and comments obtained in the Nonsterile Compounding and Sterile Compounding Inspections are based on USP Chapters <795> and <797>.
An inspection against current Good Manufacturing Practices (cGMPs) was not conducted.

Indicate the drug name, dosage or strength, and the size of the sample obtained for testing. (*NA if no sample)*

General Operations Information	Y	N	?	NA	Notes

1.00	Does the pharmacy **dispense** sterile compounded preparations pursuant to a prescription?		Y				
1.01		Are patient profiles complete and DUR performed for each prescription? *View selected files for profile to include allergies, disease states/conditions, other medications taken not dispensed by this pharmacy.*	Y				
1.02		Are sterile compounded prescriptions picked up at the pharmacy?	Y				Close door pharmacy - pharmacist available to dispense to any walk up patients..
1.03		Are sterile compounded prescriptions delivered/mailed to patients in their homes or residential facilities?	Y				
1.04		Are sterile compounded prescriptions delivered/mailed to the practitioner for administration to the patient in the office, clinic, or facility?	Y				Sterile compounded prescriptions can be delivered to the practitioner for administration to the patient. This is practice that occurs very seldom.
2.00	Does the pharmacy **distribute** sterile compounded preparations? *Not pursuant to a prescription, not labeled by the pharmacy with a patient name.*			N			
2.01		Does the pharmacy distribute sterile compounded preparations to practitioners for office use?					
2.02		Does the pharmacy distribute sterile compounded preparations to hospitals, clinics, or surgery centers?					
2.03		Is the pharmacy registered with the FDA as an Outsourcing Facility?					
2.04		Does the pharmacy have a sales force that distributes samples containing active ingredients? *List samples provided.*					
3.00	Does the pharmacy provide sterile compounded preparations to other pharmacies for dispensing?			N			
3.01		If so, does the pharmacy have central fill contracts or agreements with these pharmacies for patient specific preparations?					
4.00	Which of the following types of sterile compounds does the pharmacy prepare?						
4.01		Allergen extracts		N			
4.02		Parenteral solutions	Y				
4.03		Parenteral *suspensions*	Y				TPN

4.04		Preservative-free parenterals	Y				
4.05		Ophthalmic preparations		N			
4.06		Oral or nasal *inhalation* preparations (not topical sprays)		N			
4.07		Baths and soaks for live organs and tissues		N			
4.08		Irrigations for wounds and body cavities	Y				Bladder irrigations
4.09		Any other sterile preparations (implants, pellets, etc.) *List in Notes.*		N			
5.00	Does the pharmacy compound investigational drugs? *If so, provide list.*			N			
6.00	Does the pharmacy make a copy of an approved commercial product? *Indicate volume/percent compounded currently in Notes .*			N			
6.01		Products are verified as appearing on the Drug Shortage List in effect under 506E of the Federal Act at the time of compounding, distribution, and dispensing.					
6.02		The Drug Shortage List is monitored and when a drug product is no longer on the list, any remaining stock is quarantined and not available for distribution or dispensing.					
6.03		If the essential copy is not on the Drug Shortage List, the compounded preparation produces a clinical difference from a commercially available drug that is justified by a documented medical need of the individual patient as determined by the prescribing practitioner					
7.00	Does the pharmacy perform **low-risk** compounding? *Indicate percentage of low-risk sterile compounding in Notes*		Y				
7.01		Are all low-risk compounds assigned BUDs within USP guidelines (48 hours at controlled room temperature, 14 days refrigerated, 45 days frozen)? *If no, indicate maximum BUD assigned in Notes.*	Y				Company SOP limits BUD to 9 day maximum.
8.00	Does the pharmacy perform **medium-risk** compounding? *Indicate percentage of medium-risk sterile compounding in Notes*		Y				
8.01		Are all medium-risk compounds assigned BUDs within USP guidelines (30 hours at controlled room temperature, 9 days refrigerated, 45 days frozen)? *If no, indicate maximum BUD assigned in Notes.*	Y				Company SOP limits BUD to 9 day maximum.

9.00	Does the pharmacy perform **high-risk** compounding? *Indicate percentage of high-risk sterile compounding in Notes*			N			
9.01		Are all high-risk compounds assigned BUDs within USP guidelines (24 hours at controlled room temperature, 3 days refrigerated, 45 days frozen)? *If no, indicate maximum BUD assigned in Notes.*					
10.00	Does the pharmacy provide sterile compounded preparations to be administered via an implantable infusion pump?			N			
10.01		Are BUDs assigned to include the full length of time during which the CSP will be administered or present in the reservoir of the pump? *If not, indicate in "Notes" the maximum length of time of administration that may be beyond the BUD assigned*					
11.00	Does the pharmacy perform compounding for **immediate use?** *Indicate percentage of immediate use sterile compounding in Notes*			N			
12.00	Does the pharmacy perform compounding with **hazardous drugs**? *Indicate percentage of hazardous sterile compounding in Notes*			N			Facility has the capability to perform USP 800 compounding, but has not performed any hazardous compounding activity.
12.01		Is the pharmacy aware of the more stringent requirements of the proposed USP Chapter <800>?	Y				
12.02		Are hazardous drugs segregated and stored in a room that is negative pressure (at least 0.01" wc) to adjacent areas and with at least 12 ACPH?	Y				
12.03		Is hazardous drug waste quarantined in a designated area and disposed of in compliance with local, state, and federal regulations?	Y				
13.00	Are Safety Data Sheets (SDS) [formerly known as Material Safety Data Sheets (MSDS)] available to personnel for drugs and chemicals used in the pharmacy (including those for compounding, if applicable)? *Verify that personnel can access them and are familiar with the format.*		Y				Paper and electronic version maintained and accessible by employees.
14.00	Does the pharmacy perform compounding using **blood products** (or other biological materials)? Such as wound care, autologous eye drops, etc. *Describe.*			N			

15.00	Does the pharmacy compound using any Federally **controlled substances I-V**? *Indicate controlled substances used and percentage of controlled substance sterile compounding in Notes*		Y				Diazepam & lorazepam / 0.2 %
16.00	**APIs:** Does the pharmacy make any sterile or nonsterile compounded preparations using bulk powder Active Pharmaceutical Ingredients (APIs)?			N			
16.01		Does the pharmacy purchase APIs directly from the manufacturer? *If not, indicate the source of APIs.*					
16.02		Does the pharmacy verify that the source of the API is an FDA-registered facility? *How?*					
16.03		Does the pharmacy use active ingredients that are not from an FDA facility? *If so, indicate sources*					
16.04		Does the computer track on-hand quantities of APIs used for compounding?					
17.00	Does the pharmacy have a **lyophilizer**?			N			
17.01		Where is the lyophilizer located? *Indicate ISO class of room.*					
17.02		Note the products lyophilized, and the volume or percent of products per week produced using the lyophilizer					
17.03		Is the lyophilizer part of the viable air and surface sampling, media fill testing procedures, and cleaning schedules and procedures?					
18.00	Does the pharmacy have its own lab to perform testing? *If so, what tests are performed in house?*			N			
19.00	Does the pharmacy send samples to an outside lab to perform testing? *If so, provide the name of the lab performing testing for the pharmacy and what testing is performed.*		Y				ARL / annual sterility & potency test performed for each compounding technician

20.00	**Quality Assurance/Quality Improvement:** Does the pharmacy continuous quality improvement program include sterile compounding measures? • QREs related to the preparation of compounded products • Nonviable environmental monitoring and testing • Viable environmental testing • Personnel testing and validation • Equipment calibration, testing and validation • Sterilization method testing and validation • End product testing (such as: potency, particulates, sterility, endotoxin, etc.) • Patient or prescriber reports or complaints regarding CSPs		Y				
20.01		Does the facility QA program identify action limits or thresholds and the appropriate follow-up mechanisms when action limits or thresholds are exceeded including a recall system?	Y				
20.02		Does the recall system include communication with both the patient and the physician/prescriber regarding the potentially contaminated CSP administered and the potential risks?	Y				
20.03		Are QREs involving CSPs that may have been contaminated or are recalled reported to the Board of Pharmacy?				**N/A**	
20.04		Are all incidents (CFUs detected by any personnel, environmental, or product testing; or any other checks or tests includind endotoxin, purity, potency, etc.) remediated, appropriately investigated, cause determined, and processes implemented to prevent in the future?	Y				

Component Selection and Use			Compliant	Non-Compliant	Unknown	N/A
21.00		**APIs**: Certificates of analysis (COAs) obtained for all bulk APIs used for compounding. *Verify by selecting products from the shelf from different suppliers and ask to see the COAs for those products.*				X
21.01		USP- or NF-grade substances used				
21.02		Drug products without a USP monograph are componenets of an FDA-approved drug.				
21.03		Drug products without a USP monograph, that are NOT componenets of an FDA-approved drug are on a list developed by FDA				
21.04		APIs or other components have labeling indicating use for pharmaceutical compounding or manufacturing. Labels do not indicate "for research purposes only", "not for drug use", or are handwritten labels from other pharmacies. Photograph and describe in notes below if found. Request copies of the invoices for products with questionable labels.				
21.05		If compounding for both humans and animals, APIs or other components that are labeled for veterinary use only are segregated or marked in such a way to prevent them from being used for human compounding				
21.06		All substances and components have a complete label including a batch control or lot number, and an expiration date.				
21.07		For APIs without an expiration date assigned by the manufacturer or supplier, the pharmacy assigns a conservative expiration date. The expiration date assigned is not greater than three (3) years, is supported with data and/or testing.				
21.08		All APIs are labeled with the date they were received.				
21.09		If the pharmacy repackages APIs into smaller containers for ease of use, the expiration date assigned is conservative (typically the lesser of one year or the actual expiration from the original container). Product may be tested to extend the expiration date but may not exceed the original package expiration date.				
21.10		Bulk component containers are labeled with appropriate OSHA hazard communication labels and hazardous substances are segregated (including hormones).				
21.11		Components from foreign sources that are derived from ruminant animals (cow, sheep, goat) have documentation that the component is in compliance with federal laws governing processing, use, and importation? That the animals were free from disease, and that they were born, raised, and slaughtered in locations where bovine spongiform encephalopathy and scrapie are not known to exist.				

22.00	There are no preparations made or ingredients used that appear on the FDA list of drug products withdrawn or removed from the market for safety reasons (facility has a copy of the list or other way to determine).					X
23.00	There are no preparations compounded that present demonstrable difficulties for compounding as identified by the FDA.					X
24.00	When manufactured products are used for compounding, all the other excipients (in addition to the active ingredient) in the manufactured product are considered relative to the use, effectiveness, and stability of the compounded preparation to be made.		X			
25.00	For **animal compounding**, does the compounding meet the same standards as compounding for human patients?					X
25.01	The pharmacist is knowledgeable or has references regarding the individual species' limitations in physiology and metabolic capacity that can result in toxicity when certain drugs or excipients are used.					
25.02	It is determined and documented if the animal is used for food (meat, milk, eggs, etc.) or that the animal is a pet.					
25.03	The pharmacist familiar with, or has a reference regarding drug residues in the food chain and withdrawal times if compounding for food-producing animals.					
25.04	The facility has a list of drugs and components not allowed when compounding for food-producing animals.					
25.05	The pharmacist is familiar with, or has a reference regarding regulations for drug use in performance animals (e.g., race or show horses, racing dogs)					
26.00	If the pharmacy compounds **stock solutions** or components (that are then used to compound a finished product) using APIs, these stock solutions are categorized as high-risk compounding.					X
26.01	The stock solutions are assigned BUD based on the USP<797> high-risk compound BUD, OR there is documentation of stability or testing to support an extended BUD.					
26.02	Sterility testing is performed on stock solutions.					
26.03	Endotoxin testing is performed after sterilization on stock solutions to be used for parenteral preparations.					
26.04	Once punctured, the stock solution is discarded after 6 hours if kept in ISO Class 5 (or 1 hour if in less than ISO Class 5).					
26.05	Compounded preparations using the stock solution are classified as high-risk compounds with appropriate handling with regard to BUD and testing requirements.					
Notes (refer to question number above)						

	Environment	Compliant	Non-Compliant	Unknown	N/A
27.00	If the facility performs both sterile and nonsterile compounding, the areas are separated and distinct.				X
28.00	If the facility performs compounding using blood products (or other biological materials), this compounding area is separate and distinct from the general compounding areas.				X
28.01	Are components used in compounding with blood products restricted to the blood compounding area (not used in other compounding areas)?				
29.00	Entry into the sterile compounding areas is limited to task critical employees (limited to only the pharmacist(s) and other trained and authorized pharmacy personnel).	X			
30.00	The ante-room has a line of demarcation or other separation of the dirty to the clean side. *Note: the line of demarcation may NOT be the doorway between the ante room and the clean/buffer room.*	X			
30.01	Carts used to bring supplies from the storeroom are kept on the outside of the line of demarcation.	X			
30.02	Carts used in the clean room/buffer room are kept on the clean side of the line of demarcation.	X			
31.00	All surfaces of the sterile product compounding area carts, shelves, stools, chairs, and other items are resistant to disinfectants, non-permeable, non-carpeted or upholstered, and low particulate generating.	X			
32.00	Walls painted with epoxy based paint or other impermeable surface, and are seamless or have sealed seams where panels meet and corners with no cracks.	X			
33.00	The ceiling tiles are composed of a vinyl surface, with the tiles caulked and sealed and the seams where the walls meet the ceiling are caulked and sealed.	X			
34.00	The floor overlaid with wide sheet flooring and seamless or with heat welded seams, with coving to the sidewall, and a sealed seam where the coving meets the wall.	X			
35.00	The clean room or ante-room does not have dust collecting overhangs, such as ceiling utility pipes, or ledges; and sprinkler heads are flush with the ceiling.	X			
36.00	The exposed surfaces of the light fixtures are smooth, mounted flush, and sealed.	X			
37.00	A sink with hot and cold running water is located on the clean side of the line of demarcation in the ante room that enables pharmacy personnel to wash hands and enter the sterile compounding area without contaminating his/her hands, and an eyewash station.	X			
38.00	Hand drying is with non-linting paper towels, or an electronic or HEPA filtered hand dryer.	X			

38.01		If using a hand dryer, particle count and smoke testing validation is performed while dryer is in use (while someone is actively using to dry their hands) at certification, and the immediate area around the dryer is part of the viable air and surface testing program performed. (N/A if only using towels)				X
39.00	There is no sink or drain in the clean room/buffer room.		X			
40.00	All air ducts controlling air flow into the sterile compounding clean/buffer room and ante room are equipped with High Efficiency Particulate Air filtered air that maintains the cleanroom with an ISO Class 7 environment.		X			
41.00	Incoming air ducts through HEPA filters are on or near the ceiling and air return ducts are low on the walls in the ante-room and clean room.		X			
42.00	If there is particle generating equipment in the clean room or ante-room (such as computers and printers), the equipment is located by an air return so air flows over and out of the room taking particles with it, and this air flow has been confirmed by smoke testing while the equipment was in use.		X			
43.00	If there are particle generating appliances in the clean room or ante-room (such as refrigerators, dishwashers, etc.), the equipment located by an air return so air flows over and out of the room taking particles with it, and this air flow has been confirmed by smoke testing while the equipment was in use and appliances are also part of the viable surface sampling program.		X			
44.00	Beverages including drinking water, chewing gum, candy, or food items are prohibited from the clean room/buffer area or ante-room.					
45.00	If compounding occurs using nonsterile ingredients, products, components, or devices (for example compounding with non-sterile APIs or using nonsterile vials and closures), the pharmacy has appropriate equipment to sterilize the finished product.					X
45.01		RECOMMENDED: Pre-sterilization procedures for high risk level CSPs (such as weighing and mixing) are performed in no worse than an ISO Class 8 environment				X
46.00	Completely enclosed ante room and clean room (with a door) are equipped with monitors or gauges to measure differential pressure		X			
46.01		Ante room is at least 0.02" w.c. positive pressure to general pharmacy areas	X			
46.02		Clean room/buffer room is at least 0.02" w.c. positive pressure to general pharmacy areas	X			
46.03		Hazardous compounding room and drug storage area is at least 0.01" w.c. negative pressure to ISO Class 7 ante room	X			
46.04		Pressures are read and recorded each shift (minimum of once daily) or are continuously recorded. *View logs*	X			
46.05		Plan in place to detect and react to pressure differentials outside of limits	X			

47.00	The clean room and anteroom are not fully enclosed (open or with plastic strips - no door that closes), the air flow is measured across the openings.						X
47.01		The air flow is at least 40 feet per minute across the entire opening					
47.02		Airflow is read and recorded each shift (minimum of once daily) or continuously recorded. *View logs.*					
47.03		Plan in place to detect and react to air flow measurements outside of limits					
47.04		This area is used only for low- and medium-risk compounding. (High-risk not allowed)					
48.00	**Temperature:** The temperature of the compounding area is controlled by a thermostat and an air conditioning system is in place.		X				
48.01		Temperature in the **compounding area** is maintained to provide controlled room temperature of 20° to 25°C (68° to 77 °F), or more restrictive if warranted by specific drug product storage requirements. Recommended temperature range for performing sterile compounding while garbed is between 64-72°F (18-22°C).	X				
48.02		Temperature monitoring in place to detect any excursions (24/7) by continuous monitoring or retroactive detection using min/max. Temperature records are maintained.	X				
48.03		Temperature monitoring is also performed in **drug storage areas** (if separate from the compounding areas).	X				
48.04		Temperature in the **refrigerator or cooler** is maintained to provide controlled cold temperature of 2° to 8°C (36° to 46°F).	X				
48.05		Temperature monitoring in place to detect any excursions (24/7) by continuous monitoring or retroactive detection using min/max. Temperature records are maintained.	X				
48.06		Temperature in the **freezer** is maintained to provide controlled frozen temperature of -10° to -25°C (-13° to 14°F).	X				
48.07		Temperature monitoring in place to detect any excursions (24/7) by continuous monitoring or retroactive detection using min/max. Temperature records are maintained.	X				
48.08		Action plan in place for temperature excursions including evaluating excursion effects on drug product integrity.	X				
49.00	**Humidity:** Humidity in the compounding area is maintained to provide humidity in the ranges warranted by specific drug product storage requirements. If drug products require storage in a "dry place", humidity is not to exceed 40%. Generally recommended range is 35-60% for performing sterile compounding.		X				
49.01		Humidity monitoring in place to detect any excursions (24/7) by continuous monitoring or retroactive detection using min/max. Humidity records are maintained.	X				
49.02		Excursion action plan in place including evaluating excursion effects on drug product integrity.	X				

49.03		Humidity monitoring is also performed in drug storage areas (if separate from the compounding areas).	X			
50.00	Blowers on ISO 5 PECs are operated continuously during compounding activity, including during interruptions of less than eight hours.		X			
51.00	When the ISO 5 LAFW blower is turned off, and before other personnel enter to perform compounding activities, only one garbed person is allowed to enter the buffer area for the purposes of turning on the blower (for at least 30 minutes) and of sanitizing the work surfaces		X			
52.00	The doors into the ante-room from the general pharmacy area and from the anteroom into the clean room are prevented from both being open at the same time. *By interlocking, training of personnel, or signage.*		X			
53.00	The inside and outside doors of a pass-through are prevented from both being open at the same time. *By interlocking, training of personnel, or signage.*		X			
53.01		RECOMMENDED: Pass-throughs are located between outside areas and the anteroom, or between the anteroom and the buffer room (and NOT between the outside areas directly into the buffer room). Recommended				
54.00	RECOMMENDED: The immediate area around the doorway or pass-through into the ante room from the general areas is free of particle generating materials (such as currogated cardboard, etc.) and is located in an area that limits particles (not next to an outside door or window, etc.) to limit potential contamination from being brought in through the entry.					
55.00	**BSC or LAFW that is NOT located in an ISO Class 7 clean/buffer room:** BSC or LAFW has been certified to maintain ISO Class 5 during compounding activities.					X
55.01		Used only for low-risk compounded preparations with a 12-hour or less BUD assigned.				
55.02		All garbing requirements adhered to				
55.03		Located in an area that is maintained under sanitary conditions only be traveled by persons engaging in the compounding of sterile preparations				
55.04		Location does not contain any unsealed windows or doors that connect to the outdoors or areas of high traffic flow, and is not adjacent to construction sites, warehouses, or food preparation areas?				
55.05		Has the sink separated from the immediate area of the ISO Class 5 workbench (not adjacent) and an eyewash station				
56.00	**CAI/CACI that is NOT located in an ISO Class 7 clean/buffer room:** CAI/CACI has been certified to maintain ISO Class 5 under dynamic conditions including transferring of ingredients, components and devices, and during preparation of CSP.					X
56.01		The pharmacy has documentation from the manufacturer that the CAI or CACI will meet this standard when located in worse than ISO Class 7 environments.				

56.02		The CAI or CACI is located in an area that is maintained under sanitary conditions and only traveled by persons engaging in the compounding of sterile preparations.				
56.03		There is a sink in the compounding area, not directly adjacent to the CAI or CACI, that enables pharmacy personnel to wash hands and an eyewash station				
56.04		For NIOSH hazardous compounding in a CACI that is NOT located in a clean/buffer room, the CACI is located in a physically separated area that maintains a negative pressure of 0.01" water column pressure to adjacent areas and a minimum of 12 ACPH.				
Notes (refer to question number above)						

Cleaning and Disinfection		**Compliant**	**Non-Compliant**	**Unknown**	**N/A**
57.00	Are all personnel performing cleaning appropriately garbed?	X			
58.00	Is the sterile compounding area equipped with appropriate nonshedding cleaning equipment and supplies? *All cleaning tools, such as wipers, sponges, and mops, must be nonshedding, dedicated to and labeled for use in either the buffer or clean area (no wooden handles are allowed).*	X			
59.00	If cleaning tools are reused, is there a procedure to rinse and sanitize the tools and an appropriate clean storage area and are buckets inverted to prevent moisture accumulation?	X			
60.00	Are reusable tools appropriately labeled to prevent them from being used inappropriately? For example, a mop used for the floors cannot also be used for the ceilings and walls.	X			
61.00	Are there formulas and instructions for mixing or diluting the cleaning and sanitizing agents prior to use and is the preparation of cleaning supplies documented?	X			
62.00	Are cleaning and sanitizing agents appropriately labeled including expiration dates? *Verify no expired agents present*	X			
63.00	Are appropriate cleaning agents used that are effective for bacteria, viruses, fungi, and spores?	X			
64.00	Is the ISO 5 PEC cleaned at the beginning of each shift, between compounding activities, at least every 30 minutes while compounding and after spills or suspected surface contamination?	X			

65.00	Does the cleaning of the ISO 5 PEC include cleaning with sterile water **and** sanitizing with sterile 70% IPA using a nonlinting wipe?	X			
66.00	Does daily cleaning and sanitizing include counters and easily cleanable work surfaces?	X			
67.00	Does daily cleaning include the floors starting from the clean room and working outwards? *Floor cleaning is not to occur during compounding.*	X			
68.00	If fatigue mats are used, are they cleaned daily and let dry on both sides?				X
69.00	Is a tacky mat used and if so, is there a procedure in place regarding replacement?				X
70.00	Are the ceilings, walls, all shelving, bins, carts, chairs, and the tops and sides of the primary engineering controls (PECs) thoroughly cleaned monthly? (*This includes removing everything from shelves and bins before cleaning, cleaning the undersides of cart surfaces and stools, wheels, etc.)* Check inside bins and shelving for dust if you are garbed.	X			
71.00	Is enough time allocated for cleaning activities?	X			

Notes (refer to question number above)

Training			**Compliant**	**Non-Compliant**	**Unknown**	**N/A**
72.00		There is documentation that compounding personnel are appropriately trained including policies and procedures, documentation, hazardous drug handling, and aseptic technique. *Note that "compounding personnel" includes personnel performing compounding, supervising compounding, and performing verification of compounding.*	X			
72.01		All personnel performing compounding are not allowed to compound until training and initial testing is successfully completed.	X			
72.02		All personnel that SUPERVISE compounding and/or perform verifications of other's compounding are not allowed to supervise or verify compounding until training and initial testing is successfully completed.	X			
73.00		All personnel of reproductive capability who handle or compound hazardous drugs or chemicals have confirmed in writing that they understand the risks of handling hazardous drugs. *Teratogenicity, carcinogenicity, reproductive issues.*				X

74.00	There is documentation that all personnel (including housekeeping or other outside personnel) that perform cleaning activities in the compounding areas including hazardous compounding areas are appropriately trained in garbing, cleaning and disinfection.	X			
75.00	There is documentation of training on the operation of any equipment that may be used when preparing compounded sterile products. *Documentation needs to include training on operation, and troubleshooting*	X			
76.00	If the pharmacy uses relief personnel from outside agencies to perform sterile compounding, training and certifications are verified. *View documentation.*				X
77.00	There is documentation that all compounding personnel (including those supervising or performing verifications) have passed an initial written exam, and subsequent annual written exams for the appropriate compounding risk levels and NIOSH hazardous drugs. *Indicate frequency in "Notes" below if testing more than annually.*	X			
78.00	There is documentation that all compounding personnel have passed an initial and subsequent annual competency assessments of aseptic compounding skills using observational audit tools including handling NIOSH hazardous drugs. *Compounding skills evaluation to include use of equipment. Indicate frequency in "Notes" below if testing more than annually.*	X			
79.00	There is documentation that new compounding personnel have passed an initial observed gowning procedure and three gloved fingertip sampling tests? *Personnel must pass the tests upon initial validation before being allowed to compound. Action required if the tests yield any garbing deficiencies, or if the sampling results are >0 colony-forming units (CFU)/plate on the three initial validations. Indicate frequency in "Notes" below if testing more than annually.*	X			
80.00	There is documentation that compounding personnel preparing low or medium risk-level products have passed an annual observed gowning procedure and gloved fingertip sampling test. *Action required if the tests yield any garbing deficiencies, or if the fingertip sampling results are >3 CFU (total both hands, all 10 fingers). Indicate frequency in "Notes" below if testing more than annually.*	X			
81.00	There is documentation that a media fill test procedure is performed for each compounding employee at least annually for individuals that prepare low or medium risk-level products. *The test conditions must closely simulate the most challenging or stressful conditions encountered during compounding of the highest risk level product and include any automation used in compounding. Media-filled vials are incubated and failure is indicated by visible turbidity in the medium on or before 14 days. Indicate frequency in "Notes" below if testing more than annually.*	X			

82.00		The media-fill testing procedures include: • Media selection (including obtaining COAs or growth promotion certificates from suppliers) • Fill volume • Incubation time and temperature (30-35°C for a minimum of 7 days then 20-25°C for 7 days) • Inspection of filled units • Documentation • Interpretation of results (including identifying microbes down to genus level) • Action levels set with the corrective actions required	X			
83.00		**High-Risk Sterile Compounding:** There is documentation that compounding personnel have passed an observed gowning procedure and gloved fingertip sampling test every six (6) months. *Action required if the tests yield any garbing deficiencies, or if the sampling results are >3 CFU/plate upon revalidation.* *Indicate frequency in "Notes" below if testing more than every 6 months.*				X
84.00		**High-Risk Sterile Compounding:** There is documentation that a media fill test procedure is performed for each compounding employee at least every six (6) months for individuals that prepare high risk-level products. *The test conditions must closely simulate the most challenging or stressful conditions encountered during compounding of the highest risk level product and include any automation used in compounding. Media-filled vials are incubated and failure is indicated by visible turbidity in the medium on or before 14 days.* *Indicate frequency in "Notes" below if testing more than every 6 months.*				X
85.00		**Failed testing:** Employees who have failed any testing are prohibited from compounding until training is performed/reviewed and subsequent testing is performed successfully.	X			
85.01		Gloved fingertip tests or media fill tests that failed have the organisms identified down to the genus to determine the most likely source of the contamination. This data is used to develop plans to prevent contamination.	X			
85.02		There is a plan to evaluate the sterile compounds prepared by an employee with failed gloved fingertip tests or media fills to detect potential contamination of the sterile preparations compounded.	X			

Notes (refer to question number above)
79.00 - testing performed twice a year / 80.00 - testing performed twice a year. / 81.00 - testing performed twice a year.

	Compliant	Non-Compliant
Garbing		

	Garbing			Unknown	N/A
86.00	Personnel are prohibited from compounding, or entering the clean/buffer room or ante room if they have a rash, sunburn, weeping sores, conjunctivitis, or an active respiratory infection.	X			
87.00	Personnel are required to remove all personal outer garments such as hats, scarves, sweaters, vests, coats, or jackets and any makeup or cosmetics before entering compounding areas. *Include observations in the comments.*	X			
88.00	Personnel are required to remove all hand and wrist jewelry, and all visible jewelry or piercings such as earrings, lip or eyebrow piercings, etc. when entering clean/buffer room.	X			
89.00	Personnel are prohibited from wearing artificial nails or extenders, and required to keep natural nails neat and trimmed.	X			
90.00	Garbing with dedicated shoes or shoe covers that are donned as the line of demarcation is crossed (with the dedicated or covered shoe never touching the same side of the line of demarcation as the dirty shoe)	X			
91.00	Garbing includes head and facial hair covers and masks. *Note that facial hair requires both a facial hair cover AND a mask . Eye shields are optional unless using cleaning agents or preparing hazardous drugs. There is a mirror available to check that all hair is covered.*	X			
92.00	Hand cleaning is performed in the ante-room and includes removing debris from under the nails with a nail cleaner followed by a vigorous washing of the hands and forearms with soap for at least 30 seconds with hands and arms then dried with a non-linting disposable towel or a hand dryer. *Scrub brushes are NOT recommended as they cause skin irritation and damage.*	X			
93.00	The gown is nonshedding with sleeves that fit snugly around the wrists and enclosed at the neck.	X			
94.00	All bare skin is covered on the arms and the legs (no bare ankles, wrists, etc.).	X			
95.00	Prior to donning sterile gloves, a waterless alcohol based surgical hand scrub with persistent activity is used and hands allowed to dry. *Note: regular Purell Hand Sanitizer is NOT appropriate. Purell or other brand surgical hand scrub is appropriate - must have residual activity.*	X			
96.00	Upon leaving the sterile product compounding area, gowns are taken off and disposed of, or if used for nonhazardous compounding they are left in the anteroom and not reused for longer than one shift.	X			
97.00	Pharmacists or other personnel do NOT enter the ante-room and cross the line of demarcation without donning shoe covers or dedicated shoes. *Watch for personnel traversing back and forth across the line of demarcation without doffing and donning new shoe covers or dedicated shoes.*	X			
98.00	Pharmacists or other personnel do NOT enter the clean room without fully washing and garbing (wearing just a mask to check technician's work, for example)	X			
	Notes (refer to question number above)				

	Environmental Monitoring		Compliant	Non-Compliant	Unknown	N/A
99.00	The most recent PEC and room certification report is available.		X			
99.01		All ISO Class 7 and 8 SECs (cleanrooms and ante rooms) have been certified within the last 6 months. *If non-compliant, record the date of the last certification below.*	X			
99.02		All ISO Class 5 PECs (laminar airflow workbenches or areas, BSCs, CAIs, CACIs, and barrier isolators) have been certified within the last 6 months. *If non-compliant, record the date of the last certification below.*	X			
99.03		Certification is performed at least every six months (view date of previous certification) and whenever a device or room is moved or major work is done to the space. *If non-compliant, record the date of the next previous certification below.*	X			
99.04		Certification is performed to the Controlled Environment Testing Association (CETA) standard (USP: CETA CAG-003-2006-11 Certification Guide for Sterile Compounding Facilities) and is noted on the report.	X			
99.05		If the certification standard used and noted on the report is NOT CETA CAG-003-2006, the facility has performed a comparison and determined the standard used is the same or better than the CETA CAG-003-2006 standard.	X			
99.06		The PIC is familiar with what testing is required and interpretation of results, ensures all testing is performed appropriately (under dynamic conditions where appropriate), has action levels identified, evaluates results to detect issues or trends, and action levels are further customized based on trended data of performance.	X			
100.00	The certification report includes information about the equipment used for performing calibration test including: identification of the equipment used by model, serial number, last calibration date (or date when next calibration is due)		X			
100.01		The equipment used had not exceeded its calibration date at the time of certification	X			
101.00	The HEPA filtered air changes per hour (ACPH) were measured for the compounding rooms		X			
101.01		ISO Class 7 sterile compounding room is certified as having a minimum of 30 ACPH with at least 15 ACPH from outside air sources. *Recirculated air from the PECs may account for up to 15 ACPH.*	X			

101.02		ISO class 7 ante-room is certified as having a minimum of 30 ACPH. *Ante room must be ISO class 7 if connected to a NIOSH hazardous compounding clean room.*	X			
101.03		ISO class 8 ante-room is certified as having the **recommended** minimum of 20 ACPH.	X			
101.04		ISO class 7 hazardous sterile compounding room is certified as having a minimum of 30 ACPH. *Typically all of the air will be from outside.*	X			
101.05		If a CACI is used in a non-HEPA filtered room, the room is certified to maintain a minimum of 12 ACPH.				X
102.00	Air pattern analysis using smoke testing was performed under dynamic conditions (people working in the hoods and rooms). *The smoke flow is described in the report for the various tests such as turbulent, sluggish, smooth, etc.*		X			
102.01		Air pattern analysis was conducted at the critical area (direct compounding area inside the ISO Class 5 PEC) to demonstrate unidirectional airflow and sweeping action over and away from the product under dynamic conditions (personnel compounding or simulating compounding in PEC).	X			
102.02		Air pattern analysis was conducted to confirm positive pressure (and negative pressure into hazardous compounding rooms) at all points around all openings, doorways, and pass-throughs	X			
102.03		Air pattern analysis conducted around particle generating equipment *while the equipment was in operation* to confirm air flow.	X			
103.00	Differential air pressure between rooms was measured.		X			
103.01		The differential pressure measured was at least 0.02" water column positive from the cleanroom to the ante-room and between the ante-room and all adjacent spaces with the doors closed.	X			
103.02		The differential pressure measured was at least 0.01" water column negative from the hazardous clean room to the ante room with the doors closed.	X			
104.00	Displacement airflow between rooms or areas was measured. *This is for a clean room without a door that closes to the ante room - may be an open space or may have plastic strips in doorways.*					X
104.01		Displacement airflow (for low and medium-risk non-hazardous rooms only) was measured at a minimum differential velocity of 40 feet per minute from the cleanroom to the ante-room. *Note that it is very important to maintain this velocity across the entire opening and the report should indicate multiple points of measure across all openings.*				
105.00	Particle counts of particles 0.5um and larger were measured under dynamic conditions.		X			
105.01		ISO Class 5 areas and hoods are certified as having less than 3,520 particles per cubic meter of air.	X			
105.02		ISO Class 7 areas are certified as having less than 352,000 particles per cubic meter of air.	X			
105.03		ISO Class 8 areas are certified as having less than 3,520,000 particles per cubic meter of air.	X			
106.00	HEPA filter tests were performed.		X			

106.01		All room HEPA filters were leak tested and if leaks found, they were fixed	X			
106.02		All hood HEPA filters were leak tested and if leaks found, they were fixed	X			

107.00	Rooms or hoods with failed tests are not used for compounding until the conditions are corrected and verified by subsequent testing.		X			
108.00	Viable air and surface sampling tests have been conducted at least every 6 months. *If sampling is performed more often, document frequency below in "Notes".*		X			
108.01		Appropriate growth media used (containing tryptic soy agar medium with polysorbate and lecithin (TSApl) added to neutralize cleaning agents for surface sampling) with appropriate corresponding incubation time and temperature used. *Required to use media that supports both bacterial and fungal growth for high risk compounding.*	X			
108.02		Viable air sampling by active impaction using a volumetric air sampling device. *NOTE: Passive air sampling or settling plates are not compliant with USP Chapter <797>.*	X			
108.03		Air samples were taken in each ISO Class 5 PEC, and in each sterile compounding room and ante room and the samples are at least 400 liters in volume? *Note: recommendation in ISO 5 PEC is 1000 liters.*	X			
108.04		Surface samples performed on all direct compounding areas inside of each ISO 5 PEC, in each room, inside any pass-throughs, and on surfaces likely to be contaminated due to position relative to doorways, etc.	X			
108.05		Viable air and surface samples did not exceed USP action levels (or internal action levels if more restrictive). Classification Air Sample Surface Sample ISO Class 5 >1 CFU/m3 >3 CFU/plate ISO Class 7 >10 CFU/m3 >5 CFU/plate ISO Class 8 >100 CFU/m3 >100 CFU/plate *CFUs are TOTAL of bacterial plus fungal/mold plates. If air sampling volume is less than 1000 liters (one cubic meter), the number of CFUs found must be multiplied by the appropriate factor*	X			
108.06		CFUs detected by any means: (viable air or surface sampling, media fills, gloved fingertip testing, failed sterility tests, etc.) are analyzed to determine the organism down to the genus. *All CFUs detected must be identified even if the number of CFUs does not exceed an action level.*	X			
108.07		If the number of CFUs detected exceeds action levels, compounding ceases, immediate remediation and investigation into the cause conducted, and compounding not resumed until subsequent tests are performed successfully.	X			
108.08		If **any** mold, yeast, coagulase positive staphylococcus, or gram negative rods were detected (whether or not the number of CFUs exceeds action levels), compounding ceases, immediate remediation and investigation into the cause conducted, and compounding not resumed until subsequent tests are performed successfully.	X			

108.09		The testing report indicates growth promotion testing or documentation and sterility quality control testing of the media plates was performed. *Positive and negative control tests important to validate results of viable testing.*	X			
108.10		The testing results report includes media lot numbers and expiration dates and a signature of the laboratory analyst and/or reviewer.	X			
109.00	Facilities performing routine air or surface sampling with internal qualified personnel routinely validate sampling procedures. *Indicate the outside vendor used to validate procedures and frequency of validation below in "Notes".*		X			

Notes (refer to question number above)

108.00 - performed every other week / initial testing performed 01/27/2023 x 3 days of testing. Results indicated action plan required. Action plan performed. Restesting performed on 2/03/2023 - results indicated action plan required. Action plan performed. Retesting performed again on 2/27/2023 and again on 3/01/2023. Results of the 2/27/2023 and 3/01/2027 testing - passed for all areas.

Compounding Equipment		Compliant	Non-Compliant	Unknown	N/A
110.00	Appropriate equipment and utensils are available, clean, and in good working order. *Automated, mechanical, or electronic equipment (autoclaves, ovens, etc.) are periodically inspected, and calibrated yearly or in accordance with the equipment manufacturer guidelines.*	X			
111.00	All environmental monitoring equipment and guages (differential pressure guages or probes, air flow and velocity measuring equipment for rooms not fully enclosed, etc.) are periodically inspected, and calibrated yearly or in accordance with the equipment manufacturer guidelines. Calibration is documented.	X			
112.00	All temperature and humidity monitoring devices (thermometers, hygrometers, probes, etc.) are periodically inspected, and calibrated yearly or in accordance with the equipment manufacturer guidelines. Calibration is documented	X			
113.00	Scales, balances, or other equipment used for measurement are regularly calibrated, and validated at least annually. *If scales are NOT validated and sealed by a state or local weights and measures agency, describe procedure used below in notes.*	X			
114.00	RECOMMENDED: PEC (hood) <u>prefilters</u> are checked and replaced regularly. *View replacement log or documentation of filter check and replacement by certification company .*				

115.00		Automated Compounding Devices (ACDs) are used for sterile compounding (such as repeater pumps) and there is a P&P for the use and calibration.	X			
115.01		There is documentation of the ACD tubing being changed or discarded every 24 hours	X			
115.02		The ACD is used when performing media fill testing.				
Notes (refer to question number above)						

Compounding Procedures		**Compliant**	**Non-Compliant**	**Unknown**	**N/A**
116.00	Gloves and critical sites are sanitized with adequate frequency and with an approved disinfectant, such as sterile 70% isopropyl alcohol (IPA) spray and a nonlinting wipe	X			
117.00	Objects that shed particles are prohibited in the buffer or clean area, including pencils, cardboard cartons, paper towels, reading material, and cotton items (e.g., gauze pads)?	X			
118.00	Essential paper related products (syringe overwraps, work records contained in a protective plastic sleeve) are wiped down with sterile 70% IPA before bring brought into the buffer or clean area.	X			
119.00	Supplies required for the scheduled operations of the shift are prepared and decontaminated by wiping or spraying the outer surface with sterile 70% IPA (or removing the outer wrap as the item is introduced into the aseptic work area) and brought into the buffer or clean area in a bin or on a movable cart.	X			
120.00	Compounding employees are using appropriate aseptic technique. *May require inspector to garb and enter clean room. Pay attention to first air, entry and exit of materials in ISO Class 5 PEC, appropriate frequent sanitization of gloves, appropriate cleaning and cleanliness of the direct compounding area (DCA). If compounding not being performed, and personnel can adequately verbalize technique may mark compliant - note below that compliance was based on verbal explanation.*				
121.00	Compounding personnel ascertain that ingredients for CSPs are of the correct identity and appropriate quality by reading vendors' labels, and a unit-by-unit physical inspection of the product before use.	X			
122.00	All rubber stoppers of vials and bottles and the neck of ampules are sanitized every time with sterile 70% IPA (and a wait of at least 10 seconds to dry) prior to the introduction of a needle or spike for the removal of product.	X			

123.00	Single-dose vials exposed to ISO Class 5 or cleaner air are used within six (6) hours of the initial puncture and any remaining contents discarded. *If exposed to less than ISO Class 5 air, used within 1 hour and discarded.*		X			
124.00	The remaining contents of opened single-dose ampules are discarded immediately. *May not be stored for any time period.*		X			
125.00	Multiple-dose vials formulated for removal of portions on multiple occasions are used within 28 days (or the manufacturer's specific BUD if less) after the initial entry or puncture and any remaining contents discarded.		X			
126.00	The compounding record is complete. *View several completed compounds.* 1. Official or assigned name, strength and dosage of the preparation 2. Names, lot numbers and expiration dates of all components 3. Total quantity or number of units compounded 4. Person compounding the preparation 5. Person performing the quality control procedures 6. Person who approved the preparation 7. Date of compounding 8. Assigned internal identification number or prescription number 9. Assigned BUD and reference if extended beyond USP guidelines 10. Duplicate label 11. Sterilization method (if applicable) 12. Indication of the quality control procedures to perform (testing, filter integrity, etc.) and results of the testing, quality control issues, and investigation/recall if applicable					
127.00	Procedure for in-process checks is followed. *These checks indicate that appropriate procedures and packaging are followed for each step, including addressing pharmacist verification of steps performed by non-pharmacists and visual inspection of product. Documentation of the compounding accuracy is* ***recommended*** *to be performed by someone other than the compounder to ensure proper measurement, reconstitution, and component usage.*					
128.00	Labels on BATCH preparations include the name and quantity of all contents, date, and time of preparation (or internal code indicating this information), preparer and verification pharmacist identifiers, stability (BUD), and any auxiliary labels indicated including appropriate packaging and labeling of hazardous materials.					X
128.01		RECOMMENDED: Labels on batch single-use containers are clearly marked as "Single Use Only"				
129.00	Labels on PATIENT-SPECIFIC containers, in addition to standard label requirements, also include identifiers for the persons preparing and performing the final verification, stability or BUD, flow rate (if applicable), and appropriate packaging and labeling of hazardous materials.		X			
129.01		RECOMMENDED: Labels on patient-specific single-use containers are clearly marked as "Single Use Only"				
130.00	Inspect several different finished products and look for any particulates. Do any of the finished products inspected show any evidence of particulates? *If so, list the products including lot and expiration date and obtain photos (if possible).* **REQUEST THE PRODUCT BE QUARANTINED AND NOTIFY NABP IMMEDIATELY.**					

131.00	Preparations without additional stability testing or supported by data are assigned BUDs within USP<797> guidelines. **Low Risk:** 48 hours room temp, 14 days refrigerated, 45 days frozen **Medium Risk:** 30 hours room temp, 9 days refrigerated, 45 days frozen **High Risk:** 24 hours room temp, 3 days refrigerated, 45 days frozen	X			
132.00	Extended BUDs are assigned and are supported with stability documentation. *View records, preparation must exactly match the preparation cited in the documentation including concentration of all active ingredients, excipients, etc.*				X
133.00	Extended BUDs are assigned and the facility has performed its own stability testing. *View records, preparation must exactly match the preparation tested by the facility including concentration of all active ingredients, excipients, etc. If so, view records for at least three products and list the products reviewed below.*				X
134.00	Compounded multiple-dose vials with extended BUDs assigned have additional instruction provided that indicates remainder must be discarded 28 days after first puncture or use.				X
135.00	**Filter sterilization** in an ISO 5 environment and documentation includes: 1. The 0.2 micron sterile microporous membrane filter used to sterilize CSP solutions is chemically and physically compatible with the CSP; and the filter is intended for human-use applications for sterilizing CSPs (labeling does not indicate "research only", for example). 2. That filtering is completed rapidly without filter replacement 3. Confirmation of filter integrity (bubble testing) is performed for each filter used with each batch sterilized by filtration. *View documentation on compounding records of items sterilized by filtration to confirm.*				X
136.00	**Steam sterilization** documentation includes: 1. The autoclave has been validated for the exposure time and mass of the items to be sterilized 2. Ensures live steam contacts all ingredients and surfaces to be sterilized, effectiveness verified with biological indicators and temperature sensing devices 3. Solutions are passed through a 1.2 micron or smaller filter into the final containers to remove particulates before sterilization 4. Heated filtered air is evenly distributed throughout the chamber with a blower 5. That the CSP will not be adversely affected by the steam and heat 6. The description of steam sterilization includes conditions and duration for specific CSPs				X
137.00	**Dry heat sterilization** documentation includes: 1. Dry heat is only used for those items that cannot be sterilized by steam or would be damaged by moisture 2. Sufficient space is left between materials to allow for air circulation 3. The description of dry heat sterilization includes conditions and duration for specific CSPs 4. That the effectiveness of steam sterilization is verified each time using appropriate biological indicators 5. The oven is equipped with a system for controlling and recording temperature and exposure period				X

138.00	**Depyrogenation by dry heat** documentation includes: 1. Dry heat depyrogenation is used to render glassware and containers (such as vials) free from pyrogens as well as viable microbes 2. The description of the cycle and duration for specific load items 3. The effectiveness of the cycle is verified using endotoxin challenge vials (ECVs) 4. Bacterial endotoxin testing is performed on the ECVs to verify the cycle is capable of achieving a three log reduction in endotoxins				X
139.00	Other methods of sterilization are used with documented procedures and validation performed. *Indicate method in Notes below.*				X

Notes (refer to question number above)
Firm does not utilize extended BUD's.

Finished Preparation Release Checks and Tests			**Compliant**	**Non-Compliant**	**Unknown**	**N/A**
140.00		Are products checked for particulates or other foreign matter against both a light and a dark colored background?	X			
141.00		Are there checks for container and closure integrity?	X			
142.00		Is compounding accuracy documented by verification of steps?	X			
143.00		Is verification of ingredient identity and quantity verified? *Is there a reconciliation of components?*	X			
144.00		Are labels verified as being correct and is a copy of the label included in the record? *Complies to regulation, contains the correct names and amounts or concentrations of ingredients, total volumes, BUDs, storage conditions, and route of administration.*	X			
145.00		**Sterility testing (USP <71>).** *If testing is performed to a higher standard than the minimums below, describe in "Notes" below.*				X
145.01		Sterility testing includes both bacterial and fungal testing.				
145.02		Sterility testing is performed for all CSPs that have extended BUDS.				
145.03		Sterility testing is performed for CSPs prepared in batches of more than 25 identical containers				
145.04		Sterility testing is performed for CSPs exposed longer than 12 hours at 2°C-8°C or longer than six hours at warmer than 8°C before being sterilized				

145.05		The appropriate quantities of units are sterility tested. Parenterals, number of units in the batch is: 1. Less than 100, test 10% or four units, whichever is greater 2. 100 up to 500, test 10 units 3. More than 500, test 2% or 20 units, whichever is less For large volume parenterals: 2% or 10 containers, whichever is less. For non-parenterals (eye drops, inhalation, etc.): 1. Less than 200 containers, test 5% or 2 containers, whichever is greater 2. 200 or more containers, test 10 containers 3. If the product is packaged in unit doses, use the parenteral testing above.				
145.06		For products failing testing, product is quarantined, and an investigation is performed including microbial identification and action taken.				
145.07		If items are dispensed or distributed prior to sterility testing completion, there is a written procedure requiring daily observation of the incubated media. If there is any evidence of microbial growth, there is an immediate recall and both the patient and the physician/prescriber of the patient to whom a potentially contaminated CSP was administered are notified of the potential risk.				
146.00	**Endotoxin testing (USP <85>).** *If testing is performed to a higher standard than the minimums below, describe in "Notes" below.*					X
146.01		Is endotoxin testing performed for all high-risk level CSPs for administration by injection prepared in groups of more than 25 single-dose packages (such as ampules, bags, syringes, vials)				
146.02		High-risk CSPs prepared in multiple dose vials for administration to multiple patients,				
146.03		High-risk CSPs exposed longer than 12 hours at 2°C-8°C (25°F-46°F) or longer than six (6) hours at warmer than 8°C (46°F) before they are sterilized				
146.04		For products failing testing, product is quarantined, and an investigation is performed and action taken.				
147.00	RECOMMENDED: **Potency testing is performed.** *Describe for which products or circumstances potency testing is performed in "Notes: below*					X
148.00	View testing records. Products that have failed sterility, endotoxin, purity or potency testing have been quarantined and destroyed, or recalled if dispensed or distributed, and appropriate investigation performed to determine cause and correction or training performed to prevent future occurrence.					
Notes (refer to question number above)						

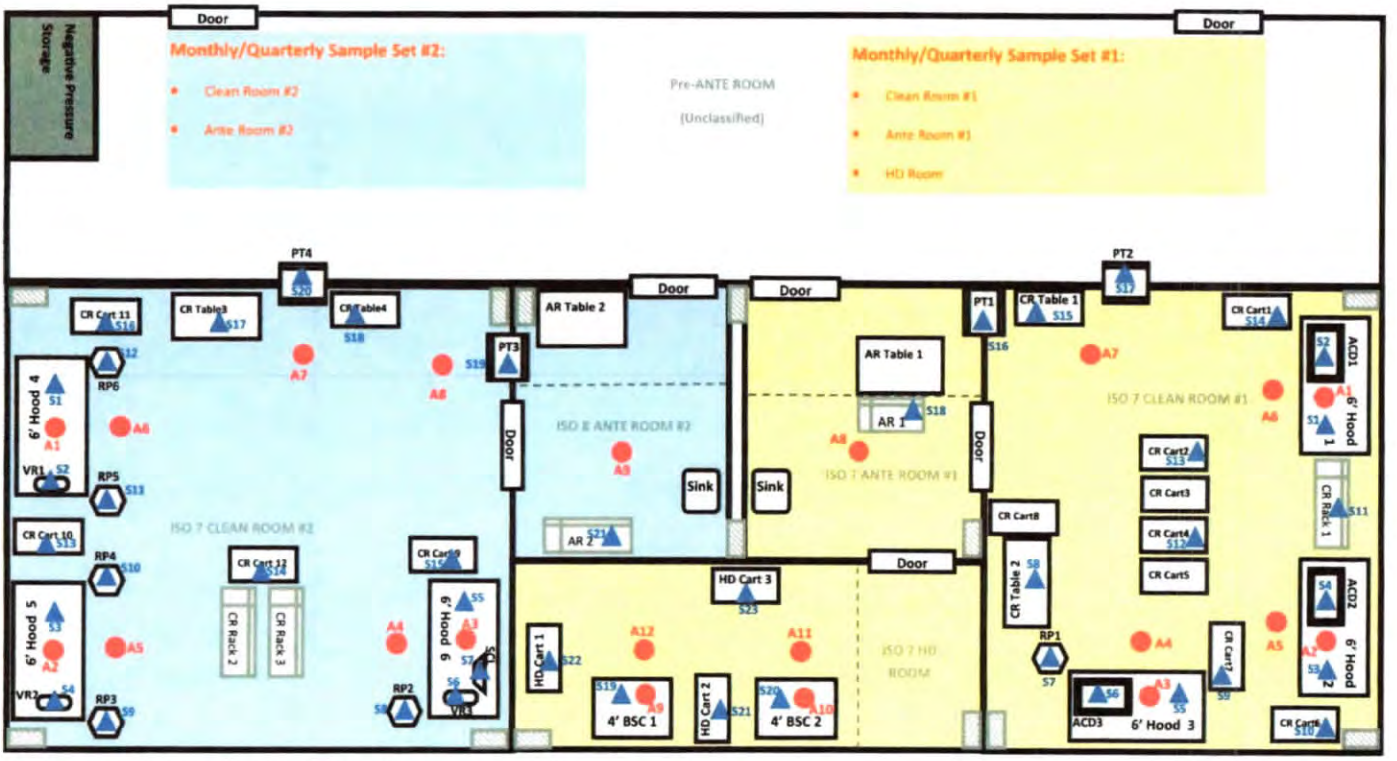
Patient Counseling and Communication		Compliant	Non-Compliant	Unknown	N/A
149.00	Do patient/caregiver training programs or materials contain information and precautions regarding the handling and disposal of hazardous products such as chemotherapy medications?				X
150.00	Compounding pharmacies: Are the above required printed drug information materials (drug information, PPI, MedGuides, etc.) provided for the compounded products? How?	X			
151.00	Compounding pharmacies: Are patients instructed on the signs of product instability or contamination (as appropriate) and to report any changes in the physical characteristics of the product to the pharmacy?	X			
152.00	Product recalls include documentation that both the patient AND the physician/prescriber of the potentially contaminated CSP was administered are notified of the potential risk.	X			
Notes (refer to question number above)					
150.00 - firm provides written monograph information for each active ingredient of the dispensed compound. 151.00 - pharmacist outreach to patient to provide additional information relative to the compounded product					

The information and comments obtained in the Nonsterile Compounding and Sterile Compounding Inspections are based on USP Chapters <795> and <797>. An inspection against current Good Manufacturing Practices (cGMPs) was not conducted.

Optum Infusion Services—CHANDLER JUNIPER—Viable Sampling SPC Map

- SURFACE samples must be taking place in areas of high traffic, high activity and where products are exposed
- ISO 5 Hoods and Work Benches must be sampled in the DIRECT COMPOUNDING area
- All SURFACE and AIR samples must be taken in order as indicated on this map

▲ MONTHLY surface sampling ● QUARTERLY air sampling



PT = Pass Through; RP = Repeater Pump; VR =Vial Roller; ACD = PN Compounder; SCL= Scale

Occupancy for Dynamic Condition: 6 personnel in each Clean Room, 4 personnel in each ante room, and 3 personnel in HD Room

Office of the
CORPORATION COMMISSION

CERTIFICATE OF GOOD STANDING

I, the undersigned Executive Director of the Arizona Corporation Commission, do hereby certify that:

Optum Infusion Services 308, LLC

ACC file number: L12415047

was incorporated under the laws of the State of Arizona on 11/09/2005, and that, according to the records of the Arizona Corporation Commission, said limited liability company is in good standing in the State of Arizona as of the date this Certificate is issued.

This Certificate relates only to the legal existence of the above named entity as of the date this Certificate is issued, and is not an endorsement, recommendation, or approval of the entity's condition, business activities, affairs, or practices.

IN WITNESS WHEREOF, I have hereunto set my hand, affixed the official seal of the Arizona Corporation Commission, and issued this Certificate on this date: **12/18/2024**

SEAL OF THE ARIZONA CORPORATION COMMISSION * 1912 * DITAT DEUS

Douglas R. Clark, Executive Director

- **Your license must be available for inspections during business hours.**
- **Permit holder(s) must display permit in the location to which it is issued.**
- **Please note it is your responsibility to keep this license/permit current.**

Important Information

LICENSE HOLDER (pharmacist, intern, technician, technician-trainee)

• Holder of this license number, printed above, is authorized in accordance with A.A.C. R4-23-201(A), A.A.C. R4-23-301(A) or A.A.C R4-23-1101(A), to perform the duties associated within their profession. By holding this license, the licensee agrees to comply with state & federal law.

• You are required by law to notify the Board of any home address and/or employment change within 10 business days

PERMIT HOLDER (pharmacy, non-prescription retailer (OTC), wholesale, manufacture, CMG, DME)

• Holder of this permit number, printed above, is authorized to conduct business according to the classification specified in A.R.S. § 32-1908(A); A.A.C. R4-23-601 and A.A.C. R4-23-607. By holding this permit, the permittee agrees to comply with state & federal law

• In-state pharmacy, wholesaler & manufacture permit holder(s) who plan to remodel or move locations, must submit a change-of-location/remodel form within 30 days prior to move/remodel. In-state non-prescription (OTC), compressed medical gas (CMG) & DME providers who plan to move locations must notify the board within 10 business days of move.

• Out-of-State permit holders must notify the Board of location changes, in writing, within 10 business days of move. A revised copy of your state permit shall be submitted to the Board, when available.

Name:	Credentials:	%:

1. The Board shall not issue a license to conduct a pharmacy:
   a) To any practitioner; or
   b) To any partnership, corporation, or association in which a practitioner has a controlling interest or owns more than 10 percent of the available stock.
2. This section does not:
   a) Apply to a hospital pharmacy or a health maintenance organization which holds a certificate of authority under chapter 695C of NRS.
   b) Prohibit ownership by a practitioner of a building in which a pharmacy is located, if space for the pharmacy is rented at the prevailing rate.

Section 5: Publicly Traded Corporation

State of Incorporation: _____

Parent Company (if any): _____

Corporation Name: _____

Mailing Address: _____

City: _____ State: _____ Zip: _____

Telephone: _____ Email: _____

Contact Person Name: _____

Date of SEC Registration:	SEC Registration Number:	Stock Exchange Symbol:

Does the number of stockholders/shareholders of the corporation exceed four? NRS 639.231 ☐ Yes ☐ No

Section 6: Non-Publicly Traded Corporation or Company

State of Incorporation/Organization: _____

Parent Company (if any): _____

Corporation/Organization Name: _____

Mailing Address: _____

City: _____ State: _____ Zip: _____

Telephone: _____ Email: _____

Contact Person Name: _____

Does the number of stockholders/shareholders of the corporation or members exceed four? NRS 639.231 ☐ Yes ☐ No

Section 7: Partnership

Partnership Name: _____

Mailing Address: _____

City: _____ State: _____ Zip: _____

Telephone: _____ Email: _____

Contact Person Name: _____

Please check type of partnership (NAC 639.214) ☐ General ☐ Limited

Does the number of partners or members of the partnership exceed four? NRS 639.231 ☐ Yes ☐ No

Section 9: Statement of Responsibility - MUST BE COMPLETED by an Authorized Person (NAC 639.945)

Statement of Responsibility

1. I am the Sole Member (title) for Polomar Specialty Pharmacy LLC (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be responsible for any violations of pharmacy law that may occur in the Pharmacy owned by such owner(s), shareholder(s), member(s), or partner(s).
3. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be named in any action taken by the Nevada State Board of Pharmacy against the Pharmacy.
4. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) cannot require or permit the pharmacist(s) in said Pharmacy to violate any provision of local, state, or federal laws or regulations pertaining to the practice of pharmacy.
5. I further understand and acknowledge that Nevada law requires that each pharmacist engaged in providing pharmacy services into Nevada is licensed by the Nevada State Board of Pharmacy (NRS 639.100).

Sterile Compounding Questionnaire

Rev (09/11/2024)

This application cannot be returned by fax or email.
We must have an original signature to process.

Approval of this completed questionnaire is required for an existing pharmacy, new pharmacy and/or out-sourcing facility applicant who wish to engage in preparing, compounding, dispensing, and furnishing sterile compounded products to Nevada patients or consumers.

Please provide a thorough response to the questions below and provide any necessary supporting documents.
-For a new pharmacy or out-sourcing facility applicant, submit this completed form with your application.
-For an existing pharmacy, send the completed form to the address indicated above.

Section 1: General Information

Pharmacy Name: Polomar Specialty Pharmacy, LLC

NV Pharmacy or Outsourcing facility license # (if applicable): _____

Physical Address: 32866 US Highway 19N

City: Palm Harbor State: FL Zip: 34684

Mailing Address (if different from physical address): _____

Telephone: 727-202-2217 Toll Free # (NAC 639.708, NRS 639.23286): 800-827-3064

Fax: 727-361-6197 Contact Email: kmattera@gldlp.com

Website: www.polomarspecialtypharmacy.com

Nevada Business License # (if applicable) _____

Supervising/Managing Pharmacist Name (NRS 639.220): Nahla Ahmed

Supervising/Managing Pharmacist NV Pharmacist Registration #: 24375

Name of Designated Person(s) as defined by revised USP-797 guidelines: Nahla Ahmed

Email of Designated Person(s): admin@polomarspecialtypharmacy.com

Telephone of Designated Person(s): 813-707-4186

Section 2: Sterile Compounding Questions (Use a separate piece of paper if additional space is needed.)

1. What risk level sterile compounding will your facility be performing (check all that apply)?

   [ ] Category 1 [■] Category 2 [ ] Category 3

If you marked "Category 3", you must also complete section 4.

2. If compounding Category 2 products is the location performing sterility and endotoxin testing (if required) to obtain extended beyond-use dates? [■] Yes [ ] No

3. If compounding Category 2 products is the location performing aseptically processed CSPs or terminally sterilized CSPs? [■] Aseptic [ ] Terminal

4. Is the pharmacy following the new garbing requirements listed in the revised USP-797 guidelines? [■] Yes [ ] No

5. When was the most recent certification for the ISO classified areas? 08/02/2024

6. What is the frequency of the recertification for the ISO classified areas? Every 6 Months

7. Were there any follow-up items required from the most recent certification report? [ ] Yes [■] No

8. If preparing Category 2 or Category 3 CSPs from non-sterile starting components are the pre-sterilization procedures such as weighing and mixing completed in an ISO Class 8 or better environment? [■] Yes [ ] No

9. If compounding Category 1 CSPs and Category 2 CSPs how often is surface sampling of all classified areas and pass-through chambers conducted? MONTHLY

10. Will you be performing sterile hazardous drug compounding? [ ] Yes [■] No

If you marked "Yes", you must also complete section 3.

11. List the sterile compounded products that you will be compounding for Nevada patients or consumers:

1- Semaglutide/Cyanocobalamine 5mg/1mg/ml vials
   Semaglutide/Cyanocobalamine 2.5mg/1mg/ml vials
   Semaglutide/Cyanocobalamine 1mg/1mg/ml vials
2- Tirzepatide/Cyanocobalamine 20mg/1mg/ml vials
   Tirzepatide/Cyanocobalmine 10mg/1mg/ml vials

12. What laboratory performs your sterility or endotoxin testing?

Name: Pharmetric Laboratory

Address: 11680 28th Street N

City: St. Petersburg State: FL Zip: 33716

Telephone: (727) 209-5778

13. What is your procedure for visual inspection of compounded sterile products?
1. Determine if the finished preparation appearance is as expected (correct final fill volume).
2. Remove any temporary labels on container prior to performing inspection.
3. Ensure preparation labels not on the preparation containers are isolated and segregated from other preparations.
4. Mix the contents of the container by inversion while ensuring no air bubbles are introduced during the process.
5. Examine preparations against a matt black background and against a non-glare white background using an incandescent light.
6. Use higher illumination intensity sufficient to detect particles for preparations where solutions are colored, opaque or in containers other than clear glass.
7. Inspect for: viable and non-viable particulates, leakage, cloudiness, improper seal, crystals, discoloration, precipitation

14. How often do you perform glove fingertip and medial fill testing?
Fingertip testing: Initially and every 6 months (CAT 2)
Medial fill testing: Initially and every 6 months (CAT 2)

15. Describe your initial and ongoing training program for all personnel performing sterile compounding:
1.Hand hygiene.
2.Garbing (i.e., gloving, donning and doffing for non-hazardous drug handling and compounding).
3.Handling, receiving, unpacking and storing procedures.
4.Proper use of primary engineering controls (PECs)
5.Principles of high-efficiency particulate air (HEPA)-filtered unidirectional airflow within the ISO Class 5 environment.
6.Sanitization Procedures (i.e., cleaning and disinfecting).
7.Aseptic techniques, which includes its assessment by:
a.Gloved fingertip and thumb sampling.
b.Media-fill testing.
8. Enviromental assessments (Air sampling and surface sampling)

16. Describe the cleaning procedure for your primary and secondary engineering controls, including the frequency of cleaning and the names of cleaning, disinfectant, sporicidal, and/or deactivation and decontamination agents used:
PEC and Equipements inside:
1. Cleaning agent: Equipment and all interior surfaces of the PEC daily on days when compounding occurs and weekly if no compounding occurs and when surface contamination is known or suspected. (DECON-QUAT)
2. Disinfectant agent: Equipment and all interior surfaces of the PEC daily and before and after compounding and when surface contamination is known or suspected. (sIPA 70%)
(Disinfectant is used monthly also to remove any residues of Sporicidal agent.).
3. Sporicidal agent: Monthly for compounding Category 2 CSPs (DECON-SPORE)
and before introducing any equipment to the cleanroom

Sequence of cleaning PEC: Ceiling->walls, back of PEC->items on the DCA->DCA
Top to bottom, Left to right
(our SOPs has detailed description of the whole procedure of cleaning PEC and SEC)

Floors of SEC and Anteroom: daily (Cleaning agent), Monthly (Sporicidal)
Walls and Ceiling of SEC and Anteroom: Monthly (Sporicidal)

17. Who performs the sterile compounding process at your facility?

Designated Person: RPH Nahla Ahmed, Pharmacy technician: RPT Marry Hanna

18. Who is responsible and accountable for the sterile compounding process at your facility?
Designated Person: RPH Nahla Ahmed

19. If products are shipped/mailed, what shipping conditions are used to ensure product safety/efficacy?
Products will be shipped along with an ice pack to maintain storage requirements of the vials which should be within 2-8 degrees Celsius to ensure safety and efficacy.

Section 3: Sterile Hazardous Compounding Questions (Complete this section ONLY if you be performing Sterile Hazardous Compounding.)		
1. What type of primary engineering controls will you be using in your facility? N/A		
2. Are you complying with all USP 800 guidelines?	☐ Yes	☐ No
3. Have your employees who compound with hazardous drugs signed an acknowledgement that they understand the risks associated with this process?	☐ Yes	☐ No
4. Is your BSC or CACI vented 100% to the outside?	☐ Yes	☐ No
5. Do you have a negative pressure buffer room at your facility?	☐ Yes	☐ No
6. Will you be compounding with antineoplastic HDs or HD API?	☐ Yes	☐ No
7. If yes, are the drugs stored in an externally ventilated, negative pressure room?	☐ Yes	☐ No
8. Will you be utilizing a closed system transfer device?	☐ Yes	☐ No
9. If yes, list the name of the device:		

10. What information is provided to the patient or consumer on the proper handling and disposal of hazardous drugs products/containers?
N/A

11. Describe your initial process for training new employees prior to compounding sterile hazardous drugs?
N/A

Section 4: Sterile Category 3 Compounding Questions (Complete this section ONLY if you will be performing Category 3 Compounding.)

1. List the specific Category 3 sterile products that your facility compounds:
N/A

2. What is the frequency for ongoing garbing, gloved fingertip and thumb sampling, and media fill testing for compounding personnel?
N/A

3. Is the pharmacy meeting all of the additional garbing requirements for compounding Category 3 CSPs as defined by the revised USP-797 guidelines? ☐Yes ☐No

4. What is the frequency for completing volumetric active air sampling?
N/A

5. What is the frequency for completing surface sampling? N/A		
6. What is the frequency for using sporicidal agents? N/A		
7. Is an endotoxin test performed for all products compounded from one or more nonsterile component?	Yes	■ No
8. Is the BUD assigned supported by stability data obtained using a stability-indicating analytical method?	Yes	■ No

I certify under penalty of perjury that the information contained in this form is accurate, true and complete in all material respects. I understand that making any false representation in this form is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire form and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. In the event the form is approved I agree to comply with all applicable federal and state statutes and regulations governing this license or registration and understand that any violation may result in discipline.

INV797 - USP Sterile Compounding

A. INTRODUCTION & SCOPE – ALL CATEGORIES

DESIGNATED PERSON: A designated person(s) is identified who is responsible and accountable for the performance and operation of the facility and personnel involved in the preparation of CSPs. [USP 797 Section 1.1.3]	Yes
IMMEDIATE USE COMPOUNDING: When preparing immediate use preparations, written SOPs are in place for all requirements and all criteria are met including 1. aseptic technique, processes, and procedures; and, 2. personnel are trained and demonstrate competency in aseptic processes as they relate to assigned tasks and SOP's, 3. the preparation is performed in accordance with evidence-based information for physical and chemical compatibility of the drugs, 4. the preparation involves not more than 3 different sterile products, 5. Any unused starting component from a single-dose container is discarded, 6. Administration begins within 4 hours following the start of preparation and, 7. Unless directly administered by the preparer or administration is witnessed by the preparer, the CSP is labeled with the names and amounts of all active ingredients, the name or initials of the preparer and the 4 hour period within which administration must begin. [USP 797 Section 1.3]	N/A

BAG & VIAL SYSTEM: Docking of vial and bag systems for future activation and administration is performed in an ISO 5 environment and BUDs are not longer than those specified in the manufacturer's labeling. [USP 797 Section 1.4]	N/A
REPACKAGING: Repackaging of sterile products or preparations from its original container into another container are prepared according to all applicable USP 797 requirements. [USP 797 Section 1.1.2]	N/A
BLOOD-DERIVED OR BIOLOGICAL MATERIAL MANIPULATIONS: Compounding activities that require the manipulation of a patient's blood-derived or other biological material (e.g., autologous serum), are clearly separated from other compounding activities and equipment used in CSP preparation activities and controlled by specific SOPs to avoid cross-contamination. [USP 797 Section 1.1.2]	N/A

B. COMPONENT BUDs (Single and Multi-dose Containers) – ALL CATEGORIES

SINGLE DOSE CONTAINERS (SDCs): SDCs are entered or punctured only in an ISO Class 5 or cleaner air and are used up to 12 hours after initial entry or puncture if the labeled storage requirements during that 12-hour period are maintained. [USP 797 Section 15.1]	N/A
AMPULES: Opened SINGLE DOSE AMPULES are used immediately and not stored for any time period. [USP 797 Section 15.1]	N/A
MULTIDOSE CONTAINERS (MDCs): Upon initially entering or puncturing a conventionally manufactured MDC, the MDC is not used for more than 28 days unless otherwise specified by the manufacturer on the labeling. [USP 797 Section 15.2]	N/A
PHARMACY BULK PACKAGES: Conventionally manufactured pharmacy bulk packages are entered or punctured only in an ISO Class 5 PEC and must be used according to the manufacturer's labeling. [USP 797 Section 15.3]	N/A
SINGLE DOSE COMPONENT CSPs & STOCK SOLUTIONS: When single-dose CSPs or CSP stock solutions are used as a component to compound additional CSPs, the original compounded single-dose component CSP or CSP stock solution is entered or punctured in ISO Class 5 or cleaner air and is stored under the conditions upon which its BUD is based (e.g., refrigerator or controlled room temperature). Once punctured, the component CSP is used for sterile compounding for up to 12 hours or its assigned BUD, whichever is shorter, and any remainder is discarded. [USP 797 Section 16.2]	N/A
MULTI-DOSE CSPs USED AS A COMPONENT: Meet the criteria for anti-microbial effectiveness testing (see <51>) if aqueous, are stored under the conditions upon which the BUD is based. Multiple-dose CSP after initially entered or punctured, are not used for longer than the assigned BUD or 28 days, whichever is shorter. [USP 797 Sections 14.5 & 16.1]	N/A

C. CSP LABELING – ALL CATEGORIES

IMMEDIATE CONTAINER LABEL REQUIREMENTS: Immediate label of CSPs prominently and legibly display 1) assigned internal identification number; 2) active ingredient(s) and their amount(s), or concentration(s); 3) storage conditions if other than controlled room temperature; 4) BUD; 5) dosage form; 6) total amount or volume; 7) statement if CSP is a single dose container or multi-dose container. [USP 797 Section 13]	Yes
ADDITIONAL REQUIREMENTS FOR A CLASS II OR III FACILITY: 1) Identification of responsible compounding personnel and/or dispensing pharmacist;2) labels for batch-prepared CSPs must also include: Control or lot number, auxiliary labeling (including precautions); and device-specific instructions. Patient specific medications must also include patient's name, location the medication is to be delivered to and directions for use. [USP 797 Section 13] [F.A.C.64B16-28.108(10)]	N/A
LABELING REQUIREMENTS: Labeling of CSP displays 1) route of administration, 2) special handling instructions, 3) warning statements, and the compounding facility name and contact information if the CSP is sent outside of the facility in which it was compounded. [USP 797 Section 13]	Yes
LABELING SOPs: Labeling procedures, as described in facility SOPs, are followed to prevent labeling errors and CSP mix-ups. [USP 797 Section 13]	Yes
LABEL VERIFICATION: CSP labels are verified to ensure that they conform with the prescription or medication order, MFR (if required), and the CR. [USP 797 Section 13]	Yes

D. PERSONNEL PREPARATION & OBSERVATION – ALL CATEGORIES

CONTROLLED ACCESS: Access to the SEC is restricted to authorized personnel and required materials. [USP 797 Section 4.2.1]	Yes
UNNECESSARY ITEMS: Items not necessary for compounding (e.g., food, drinks, mints, gum, earbuds, headphones) are not introduced into the compounding environment. Accommodations are documented. [USP 797 Section 3.1]	Yes
UNNECESSARY PERSONAL ITEMS: Personnel remove outer garments (e.g., bandanas, coats, hats, jackets, sweaters, vests); cosmetics, and all hand, wrist, and other exposed jewelry, including piercings that may interfere with effectiveness of garbing. [USP 797 Section 3.1]	Yes
NAILS: Nails are clean and trimmed. Nail products (e.g., polish, artificial nails, and extenders) are not worn. [USP 797 Section 3.1]	Yes
REQUIRED PPE & GARBING ORDER: Personnel garb (don and doff) in an order that reduces risk of contamination per SOP. Required garb, manner of storage, and order or garbing is documented in SOP's. The minimum required PPE when preparing CSPs includes a garment with sleeves that fit around wrists and enclosed neck, shoe covers, head/facial hair cover, face mask, and sterile powder-free gloves. All PPE is low lint for Category 1 & 2 compounding or sterile if Category 3. [USP 797 Section 3.3]	Yes
NAIL PICK USE: Personnel clean under nails under warm running water with a disposable nail cleaner. Hands and forearms are washed with soap and water for at least 30 seconds prior to entering a compounding area. [USP 797 Section 3.2]	Yes
INAPPROPRIATE HAND HYGIENE PRACTICES: Brushes and hand dryers are not used, and soap containers are not refilled or topped off. [USP 797 Section 3.2]	Yes
ALCOHOL-BASED HAND RUB: Hands are sanitized with alcohol-based hand rub prior to donning gloves. Handrub is used prior to donning garb when hand hygiene is done outside of a classified area. [USP 797 Section 3.3]	Yes
STERILE GLOVES USED: Sterile gloves are donned in classified room or SCA. Skin is not exposed inside ISO 5 PEC (e.g., gloves are not donned or doffed). [USP 797 Section 3.3]	Yes
GARB STORAGE: Gowns and other garb are stored in a manner that minimizes contamination (e.g., away from sinks) and within a classified area or SCA. [USP 797 Section 3.3]	Yes
SANITIZATION OF STERILE GLOVES: Sterile 70% IPA is applied to gloves prior to compounding and regularly throughout the compounding process. [USP 797 Section 3.3]	Yes
SANITIZATION OF ITEMS INTRODUCED INTO PEC: Items are wiped with sterile 70% IPA and sterile low-lint wipers just prior to being introduced into the PEC and allowed to dry before use. [USP 797 Section 8.2]	Yes
CRITICAL SITES (e.g., vial stoppers, ampule necks, and intravenous bag septum's) are wiped with sterile 70% IPA in the PEC to provide both chemical and mechanical actions to remove contaminants. The sterile 70% IPA is allowed to dry before personnel enter or puncture stoppers and septum's or break the necks of ampules. [USP 797 Section 8.3]	Yes
EQUIPMENT DISINFECTION PRIOR TO ENTRY: Equipment brought into classified areas is wiped with a sporicidal disinfectant, EPA-registered disinfectant, or sterile 70% IPA using low-lint wipers. [USP 797 Section 9.1]	Yes

E. EQUIPMENT, SUPPLIES, & COMPONENTS – ALL CATEGORIES

DAILY ACD ACCURACY ASSESSMENT: An accuracy assessment is conducted for Automated Compounding Devices (ACDs) or similar equipment before the first use and again each day the equipment is used to compound CSPs. A daily record of accuracy measurements is maintained. Corrective actions are implemented if accuracy measurements are outside of manufacturer's specifications. [USP 797 Section 9.1] *Documented in compounding record.*	Yes
EQUIPMENT SOPs: Written SOPs for the calibration, maintenance, cleaning, and use of equipment are established and are based on the manufacturer's recommendations. Procedures are followed and records are maintained. [USP 797 Section 9.1]	Yes
COMPOUNDING EQUIPMENT & SUPPLIES: Equipment and supplies used in compounding (e.g., needles, syringes, filters, tubing sets, beakers, utensils) are of suitable composition that surfaces in direct contact with components are not reactive or sorptive and surfaces in direct contact with CSPs are sterile and depyrogenated. [USP 797 Section 9.2]	Yes
COMPONENT STORAGE: Components are handled and stored in a manner that prevents contamination, mix-ups, and deterioration and under temperature, humidity, and lighting conditions consistent with those indicated in official monographs or specified by the suppliers and/or manufacturers. [USP 797 Section 9.3.4]	Yes

F. SEGREGATED COMPOUNDING AREA: Category 1

CATEGORY 1 MAXIMUM BUDs & COMPOUNDING AREA REQUIREMENTS: Only Category 1 CSPs are compounded in an ISO class 5 PEC located within a SCA and are assigned a BUD of 12 hours or less at controlled room temperature or 24 hours or less when refrigerated. [USP 797 Section 1.5, 4.2.1]	
DEDICATED AREA FOR SCA: The SCA is separated from areas not directly related to compounding, and all surfaces (walls, floors, counters, and equipment) are clean, uncluttered, and dedicated to compounding. [USP 797 Section 4.2.1]	
SCA LOCATION: The SCA is located away from unsealed windows, doors that connect to the outdoors, and traffic flow, all of which may adversely affect the air quality in the PEC. SCA is not located where environmental control challenges (e.g., restrooms, warehouses, or food preparation areas) could negatively affect the air quality of the PEC within the SCA. A sink is not located within 1 meter of PEC. [USP 797 Section 4.2.1]	
ITEMS WITHIN SCA: Only furniture, equipment, and other materials necessary for performing compounding activities are located within the SCA. [USP 797 Section 4.2.1]	

G. FACILITIES & SECONDARY ENGINEERING CONTROLS – Categories 2 and 3

STERILE SUITE CONSTRUCTION: The ISO-classified anteroom and buffer room are separated from the surrounding unclassified areas of the facility by fixed walls and doors, and controls are in place. [USP 797 Section 4.2.1] *Walls to RHS of LAFW have been sealed.*	Yes
HEPA FILTERED AIR: Air supplied to the cleanroom suite is introduced through HEPA filters located in the ceiling of the buffer room and anteroom. [USP 797 Section 4.2.1]	Yes
AIR RETURNS: Air returns in the cleanroom suite are low on the wall unless a visual smoke study demonstrates an absence of stagnant airflow. [USP 797 Section 4.2.1] *Low wall returns added in ante room, BSC running continuously. Smoke studies with Certification 7/19/24.*	Yes
LINE OF DEMARCATION: The anteroom has a line of demarcation to separate the clean side from the dirty side. [USP 797 Section 4.2.1]	Yes
SURFACES & WALLS: The surfaces of ceilings, walls, floors, doors, door frames, fixtures, shelving, work surfaces, counters, and cabinets in the classified area are smooth, impervious, free from cracks and crevices, and non-shedding. Walls are constructed of/or covered with durable material. [USP 797 Section 4.3.1]	Yes
CEILINGS & FLOORS: Inlaid panels of ceilings are caulked around each panel to seal them to the support frame. Junctures between the ceiling and the walls and between the walls and the floor are sealed to eliminate cracks and crevices where dirt can accumulate. Floors include coving to the sidewall, or the juncture between the floor and the wall are caulked. [USP 797 Section 4.3.1] *Floor in doorway has been made smooth.*	Yes
LEDGES & OVERHANGS: Overhangs and ledges are easily cleanable, and the exterior lens surface of ceiling light fixtures are smooth, mounted flush, and sealed. [USP 797 Sections 4.3.1]	Yes
FURNITURE, EQUIPMENT, & MATERIALS: Only furniture, equipment, and other materials necessary for performing compounding activities are permitted in a classified area or SCA. Tacky mats are not placed within ISO-classified areas. [USP 797 Sections 4.2.1 & 4.5]	Yes
CARTS: Carts used to transport components or equipment into classified areas are constructed from nonporous materials with cleanable casters and wheels. [USP 797 Section 4.5]	Yes
TEMPERATURE & HUMIDITY MONITORING: Temperature and humidity in the cleanroom suite are controlled through a heating, ventilation, and air conditioning (HVAC) system. The temperature and humidity are monitored in each room of the cleanroom suite each day that compounding is performed, either manually or by a continuous recording device. They are documented at least once daily or stored in the continuous recording device and are retrievable and are reviewed as described in the facility's SOP. [USP 797 Section 4.2]	Yes
PRESSURE DIFFERENTIATION MONITORING & DOCUMENTATION: Facility maintains a minimum differential positive pressure of 0.020-inch water column between the buffer room and anteroom and anteroom and unclassified area. A pressure differential monitoring device is used to continuously monitor the pressure differentials. Quantitative results from the pressure monitoring device are reviewed and documented at least daily on the days when compounding is occurring. [USP 797 Sections 4.2.5] *Documented daily.*	Yes
PEC LOCATION: PECs are located in a buffer room in a manner that minimizes conditions that could increase the risk of microbial contamination (strong air currents, personnel traffic, or air streams from HVAC system(s)) and allows for cleaning around the PEC. [USP 797 Sections 4.2.2 & 4.2.3]	Yes
INTEGRATED VERTICAL LAMINAR FLOW ZONES: IVLFZ is separated from ISO Class 7 area with a physical barrier and there is full coverage of HEPA filters above the work surface. [USP 797 Section 4.2.3]	N/A

H. CERTIFICATION AND RECERTIFICATION – ALL CATEGORIES

PEC CERTIFICATION: The PEC is certified initially and every 6 months to meet ISO Class 5 or better conditions, during dynamic operating conditions. [USP 797 Sections 4.1 & 5.0]	Yes
SEC CERTIFICATION: SECs are certified initially and every 6 months to meet ISO Class 7 or 8 or better conditions, during dynamic operating conditions (including presterilization activities if applicable). Anterooms providing access to positive-pressure buffer rooms are at least ISO 8 and at least ISO 7 for anterooms providing access to negative-pressure buffer rooms. Classified areas are recertified when changes occur that could affect airflow or air quality [USP 797 Sections 4.1, 4.2.6, & 5.0] *Last certification 7/19/24-TSS*	Yes

ISO CLASS 7 & 8 REQUIREMENTS: ISO Class 7 rooms maintain a minimum of 30 total HEPA-filtered ACPH during dynamic operating conditions, at least 15 ACPH come from the HVAC through HEPA filters located in the ceiling. ISO Class 8 rooms maintain a minimum of 20 total HEPA-filtered ACPH during dynamic operating conditions; 15 ACPH must come from the SEC. The ACPH from HVAC, ACPH contributed from the PEC, and the total ACPH are documented on the certification report. [UPS 797 Section 4.2.4]	Yes
DOCUMENTATION OF PERSONNEL PRESENT DURING CERTIFICATION: The number of personnel present in each PEC and SEC during total particle counts and dynamic airflow smoke-pattern tests is documented on the certification report. [USP 797 Section 5.0]	Yes
PEC DYNAMIC SMOKE PATTERN TEST: Smoke pattern tests are performed under dynamic conditions initially to demonstrate minimal disruption in airflow and repeated if equipment is placed in a different location. Smoke pattern tests are performed under dynamic conditions every 6 months to demonstrate unidirectional airflow and sweeping action over and away from the preparation(s). [USP 797 Section 5.0]	Yes
ROBOTICS / ROBOTIC ENCLOSURES: Robotic enclosures used as a PEC or placed within a PEC have a dynamic airflow smoke pattern test is performed initially and at least every 6 months that confirms 1) the robotic device is properly integrated into the facility, 2) there is no turbulence or refluxing at any critical site(s), 3) room air does not enter the PEC where sterile products and/or preparations may be exposed, and 4) all processes can be performed without introducing contamination to the DCA(s). [USP 797 Section 4.2.3]	N/A
HEPA FILTER INTEGRITY TESTING: HEPA filter integrity testing for both SECs & PECs is conducted initially and every 6 months as part of total particle testing. [USP 797 Section 5.0]	Yes
MONITORING DEVICE CERTIFICATION: Temperature and humidity monitoring devices are verified for accuracy at least every 12 months or as required by the manufacturer. [USP 797 Section 4.2]	Yes
CONTAINMENT DEVICES USED FOR PRESTERILIZATION PROCEDURES: CVEs, BSCs, or CACIs used for presterilization procedures are certified at least once every 6 months. [USP 797 Section 4.2.6] *BSC in ante room.*	Yes
CERTIFICATION REPORT REVIEW BY DESIGNATED PERSON: All certification and recertification records are reviewed by the designated person(s). A corrective action plan is implemented and documented in response to any out-of-range results on certification report and data reviewed to confirm that the actions taken have been effective. [UPS 797 Section 5.0] *07/19/24 -Reviewed by HG.*	Yes

I. RABS

LOCATION: If used to prepare Category 2 or Category 3 CSP's RABS are located in a cleanroom suite with an ISO Class 7 or better buffer room with an ISO Class 8 or better anteroom. [USP 797 Section 4.2.3]	
RECOVERY TIME: When a RABS is used, the recovery time after opening the transfer chamber to achieve ISO Class 5 air is documented and internal procedures are developed to ensure that adequate recovery time is allowed after opening and closing the RABS. [USP 797 Section 4.2.3]	
STERILE GLOVES: are worn over gloves attached to RABS sleeves. [USP 797 Section 3.3]	

J. CATEGORY 2 CSPs WITHOUT STERILITY TESTING

CATEGORY 2 COMPOUNDING ENVIRONMENT: Category 2 CSPs are compounded in an ISO class 5 PEC located within an ISO classified anteroom and buffer room. [USP 797 Sections 4.1 & 14.3]	
CATEGORY 2 BUDs FROM STERILE COMPONENTS WITHOUT STERILITY TESTING: Category 2 CSPs compounded aseptically from all sterile starting components and in the absence of sterility testing do not exceed the following BUDs: 4 days room temperature, 10 days refrigerated, or 45 days frozen. [USP 797 Section 14.3]	
CATEGORY 2 BUDs FROM NONSTERILE COMPONENTS WITHOUT STERILITY TESTING: Category 2 CSPs compounded aseptically from one or more nonsterile starting components and in the absence of sterility testing do not exceed the following BUDs: 1 day room temperature, 4 days refrigerated, or 45 days frozen. [USP 797 Section 14.3]	

K. CATEGORY 2 EXTENDED BUD REQUIREMENTS

CATEGORY 2 BUDs FOR ASEPTICALLY PROCESSED CSPs WITH STERILITY TESTING: Category 2 CSPs compounded aseptically, and which have passed sterility testing do not exceed the following BUDs: 30 days room temperature, 45 days refrigerated, or 60 days frozen. [USP 797 Section 14.3] *Facility will follow Category 2 testing.*	Yes
CATEGORY 2 BUDs FOR TERMINALLY STERILIZED CSPs WITHOUT STERILITY TESTING: Category 2 CSPs terminally sterilized and in the absence of sterility testing do not exceed the following BUDs: 14 days room temperature, 28 days refrigerated, or 45 days frozen. [USP 797 Section 14.3]	N/A
CATEGORY 2 BUDs FOR TERMINALLY STERILIZED CSPs WITH STERILITY TESTING: Category 2 CSPs terminally sterilized, and which have passed sterility testing do not exceed the following BUDs: 45 days room temperature, 60 days refrigerated, or 90 days frozen. [USP 797 Section 14.3]	N/A
ANTIMICROBIAL EFFECTIVENESS TESTING FOR MULTI-DOSE CSPs: Aqueous multiple-dose CSPs (e.g., injectables and ophthalmics) pass USP <51> compliant antimicrobial effectiveness testing once for each unique formulation and each container closure system in which it is packaged. Bracketing studies are allowed. [USP 797 Section 14.6 & 16.1]	N/A
CONTAINER CLOSURE TESTING: Container closure integrity testing is performed once for each unique CSP formulation and container closure system in which it is packaged. For multi-dose (i.e., preserved CSPs), container integrity testing is performed per fill volume for each unique CSP formulation and container closure system. [USP 797 Sections 14.3.3 & 14.5]	N/A
MULTI-DOSE, NON-PRESERVED AQUEOUS CSPs: Multi-dose, non-preserved aqueous CSPs (i.e., topical, or ophthalmic solutions) are assigned are prepared as a Category 2 CSP, for use by a single patient, and labeled to indicate that once opened, the CSP must be discard after 24 hours if stored at controlled room temperature or 72 hours when stored under refrigeration. [USP 797 14.5]	N/A
OUTSOURCED STERILITY TESTING: Sterility testing is performed for all Category 2 CSPs assigned a BUD requiring sterility testing according to USP <71> or a validated alternative and noninferior method. Membrane Filtration as described in USP <71> is the preferred method when the formulation allows. [USP 797 Section 12.2]	N/A
INHOUSE STERILITY TESTING: Sterility testing is according to USP <71> or a validated alternative and noninferior method. Membrane filtration is used if appropriate and filters are rinsed according to USP <71>. Direct inoculation is done only when membrane filtration cannot be carried out. Volume inoculated does not exceed 10% of the culture media volume. Growth promotion test has been done on the media with the 5 specified organisms (not more than 100 CFU) according to USP <71>. TSB or SCD is incubated at 20-25C for 14 days; FTM is incubated at 30-35C for 14 days. (2 incubators present).	N/A
METHOD SUITABILITY TEST: A Method Suitability Test (or equivalent validation for alternative testing methods) is performed to validate suitability of the sterility testing method. [USP 797 Section 12.2]	N/A
MAXIMUM BATCH SIZE: The maximum batch size for all CSPs requiring sterility testing is 250 final yield units. [USP 797 Section 12.2] *Plan to compound batch of 100.*	Yes

STERILITY TESTING QUANTITY & VOLUME DETERMINATION: The minimum quantity of each container tested for sterility is per USP <71> Table 2 and the number of containers tested in relation to the batch size is per USP <71> Table 3. For 1-39 CSPs compounded as single batch, sterility testing is performed on a number of containers or units equal to 10% of the number of CSPs prepared rounded to the next whole number. [USP 797 Section 12.2]	Yes
INVESTIGATION OF STERILITY TEST FAILURES: Sterility tests resulting in failure undergo prompt investigation into possible causes and requires identification of the microorganism(s) as well as evaluation of sterility testing procedure, compounding facility, process, and/or personnel that may have contributed to the failure. Impact to other CSPs is assessed. Investigation and resulting corrective actions are documented. [USP 797 Section 12.2]	N/A
ENDOTOXIN TESTING: Category 2 injectable CSPs compounded from one or more nonsterile component(s) and assigned a BUD that requires sterility testing are tested for bacterial endotoxins. [USP 797 Section 12.3]	N/A
ENDOTOXIN LIMITS: In the absence of a bacterial endotoxin limit in an official USP–NF monograph or other CSP formula or scientifically supported source, the CSP does not exceed the endotoxin limit calculated as described in USP <85> for the appropriate route of administration for humans or largest recommend dose per weight for nonhuman species. [USP 797 Section 12.3]	N/A

L. CATEGORY 3 CSPs, BUDs, & RELATED REQUIREMENTS

CATEGORY 3 REQUIREMENTS: All requirements associated with Category 3 compounding (e.g., garbing, cleaning, environmental monitoring) apply to all personnel entering the buffer room where Category 3 CSPs are compounded and always apply regardless of whether Category 3 CSPs are compounded on a given day. [USP 797 Section 14.4.2]	
STERILE/SINGLE USE GARB: When compounding Category 3 CSPs, skin is not exposed in buffer room (i.e., face and neck are covered) and all low lint outer garb is sterile, including sterile sleeves over RABS gauntlet sleeves. Disposable garb items are not reused. [USP 797 Section 3.3]	
STERILIZED/REUSABLE GARB: Non-disposable garb is not reused without being laundered and resterilized with a validated cycle. Disinfection procedures described in facility SOPs are followed before reusing goggles, respirators, and other equipment. [USP 797 Section 3.3]	
CATEGORY 3 BUDs FOR ASEPTICALLY PROCESSED CSPs: Category 3 CSPs aseptically processed, sterility tested, and passing all applicable tests (including stability indicating assay, endotoxin, and other dosage form appropriate tests) do not exceed the following BUDs: 60 days room temperature, 90 days refrigerated, or 120 days frozen. Shorter BUDs are assigned when physical or chemical stability of the CSP is less than the maximum allowable Category 3 BUDs for aseptically processed CSPs. [USP 797 Section 14.4.3]	
CATEGORY 3 BUDs FOR TERMINALLY STERILIZED CSPs: Category 3 CSPs aseptically processed, sterility tested, and passing all applicable tests (including stability indicating assay, endotoxin, and other dosage form appropriate tests) do not exceed the following BUDs: 90 days room temperature, 120 days refrigerated, or 180 days frozen. Shorter BUDs are assigned when physical or chemical stability of the CSP is less than the maximum allowable Category 3 BUDs for terminally sterilized CSPs. [USP 797 Section 14.4 3]	
MAXIMUM BATCH SIZE: Category 3 CSP batch sizes do not exceed 250 final yield units. [USP 797 Section 12.2]	
STABILITY INDICATING ASSAYS: All Category 3 CSP formulations are supported by data obtained using a validated stability-indicating analytical method that can distinguish active ingredients from degradants and impurities and quantify the amount of active ingredient. CSPs are prepared according to the exact formulation, components, and packaged in a container closure system of the same materials of composition. Facilities have documentation of the stability study, its results, and the method validation available for review. [USP 797 Section 14.3.3]	
STERILITY TESTING: All category 3 CSPs and batches undergo sterility testing performed according to USP <71> or a validated alternative and noninferior method. [USP 797 Sections 12.2 & 14.4.4]	
METHOD SUITABILITY TEST: A Method Suitability Test (or equivalent validation for alternative testing methods) is performed to validate suitability of the sterility testing method for each formulation. [USP 797 Section 12.2]	
STERILITY TESTING QUANTITY & VOLUME DETERMINATION: The minimum quantity of each container tested for sterility is per USP <71> Table 2 and the number of containers tested in relation to the batch size is per USP <71> Table 3. For 1-39 CSPs compounded as single batch, sterility testing is performed on a number of containers or units equal to 10% of the number of CSPs prepared rounded to the next whole number. [USP 797 Section 12.2]	
INVESTIGATION OF STERILITY TEST FAILURES: Sterility tests resulting in failure undergo prompt investigation into possible causes and requires identification of the microorganism(s) as well as evaluation of sterility testing procedure, compounding facility, process, and/or personnel that may have contributed to the failure. Impact to other CSPs is assessed. Investigation and resulting corrective actions are documented. [USP 797 Section 12.2]	
ENDOTOXIN TESTING: Category 3 injectable CSPs compounded from one or more nonsterile component(s) are tested for bacterial endotoxins. [USP 797 Section 12.3]	
ENDOTOXIN LIMITS: In the absence of a bacterial endotoxin limit in an official USP–NF monograph or other CSP formula or scientifically supported source, the CSP does not exceed the endotoxin limit calculated as described in USP <85> for the appropriate route of administration for humans or largest recommend dose per weight for nonhuman species. [USP 797 Section 12.3]	
PARTICULATE MATTER TESTING: Category 3 injectable CSPs undergo USP <788> (Particulate Matter in Injections) and ophthalmic solutions undergo USP <789> (Particulate Matter in Ophthalmic Solutions) test once per formulation with acceptable results. [USP 797 Section 14.3.3]	
ANTIMICROBIAL EFFECTIVENESS TESTING FOR MULTI-DOSE CSPs: Aqueous multiple-dose CSPs (e.g., injectables and ophthalmic) pass USP <51> compliant antimicrobial effectiveness testing once for each unique formulation and each container closure system in which it is packaged. Bracketing studies are allowed. [USP 797 Section 14.5 & 16.1]	
CONTAINER CLOSURE TESTING: Container closure integrity testing is performed once for each unique CSP formulation and container closure system in which it is packaged. For multi-dose (i.e., preserved multi-dose CSPs), container closure integrity testing is also performed per fill volume for each unique CSP formulation and container closure system. [USP 797 Sections 14.3.3 & 14.5]	
MULTI-DOSE, NON-PRESERVED AQUEOUS CSPs: Multi-dose, non-preserved aqueous CSPs (i.e., topical, or ophthalmic solutions) are prepared for use by a single patient, and labeled to indicate that once opened, the CSP must be discard after 24 hours if stored at controlled room temperature or 72 hours when stored under refrigeration. [USP 797 14.5]	
MULTI-DOSE COMPONENT CSPs: Multiple-dose CSP after initially entered or punctured, are not used for longer than the assigned BUD or 28 days, whichever is shorter. [USP 797 Section 16.1]	

M. PERSONNEL TRAINING & COMPETENCIES - ALL CATEGORIES

TRAINING PROGRAM & SOP: Facility maintains a written training program and corresponding SOP which defines required trainings, frequency of training and the process for evaluating the performance of individuals who compound, have direct oversight of compounding personnel, perform in-process checks, final verification and dispensing of CSP's. [USP 797 Section 2] *TRC*	Yes
INITIAL CORE SKILLS KNOWLEDGE & COMPETENCY ASSESSMENT: Before beginning to compound CSPs independently or have direct oversight of compounding personnel, personnel complete training and can demonstrate knowledge of principles and competency of skills for performing sterile manipulations and achieving and maintaining appropriate environmental conditions as applicable to their assigned job functions. [USP 797 Section 2.1]	Yes

INITIAL GLOVED FINGERTIP & HAND HYGIENE/GARBING COMPETENCY: Before beginning to compound independently or have direct oversight of compounding personnel, personnel successfully complete an initial gloved fingertip (GFT) competency no fewer than 3 separate times, with a documented visual audit while performing hand hygiene and garbing procedures. GFT samples are collected before applying sterile 70% IPA to gloves. [USP 797 Section 2.2] *Previously reviewed at previous inspection, only 1 assessment.*	No
GLOVED FINGERTIP INCUBATION: Documentation includes the name of the person evaluated; evaluation date and time; media and components used to include manufacturer, expiration date, and lot number; starting temperature for each interval of incubation; dates of incubation; results and identification of the observer and personnel reading and documenting the results. USP 797 Section 2.2] *Reviewd at previous inspection, incubator temperatures will be added.*	No
INITIAL MEDIA FILL & ASEPTIC TECHNIQUE ASSESSMENT: Before beginning to compound independently or have direct oversight of compounding personnel, personnel who compound or have direct oversight of compounding successfully complete an initial aseptic manipulation competency evaluation which consists of a visual observation, media-fill testing followed by a gloved fingertip and thumb sampling on both hands, and surface sampling of the direct compounding area. [USP 797 Section 2.3]	Yes
MEDIA INCUBATION: Documentation includes the name of the person evaluated, evaluation date and time, media and components used to include their manufacturer or supplier, expiration dates and lot numbers, starting temperature for each interval of incubation, dates of incubation, the results, and the names or other identification of the observer and the person who reads and documents the results. [USP 797 Section 2.3] *Will add details, reviewed during initial inspection.*	No
CATEGORY 1 AND 2-ONGOING GFT & GARBING ASSESSMENT: After initial garbing competency evaluations, compounding personnel complete garbing competency evaluation and GFT every 6 months for Category 1 and Category 2 CSP's. Direct oversight personnel who do not compound complete garbing competency and GFT every 12 months. GFTs are appropriately incubated. [USP 797 Section 2.2]	N/A
CATEGORY 1 AND 2-ONGOING MEDIA FILL & ASSESSMENT: After initial aseptic manipulations competency evaluations, compounding personnel complete aseptic technique competency, media fill, GFTs, and surface sampling of DCA every 6 months for Category 1 and Category 2 CSP's. Direct oversight personnel who do not compound complete media fill every 12 months. GFTs and surface samples are appropriately incubated. [USP 797 Section 2.3]	N/A
ONGOING KNOWLEDGE & COMPENTENCY OF CORE SKILLS: Training and knowledge assessment of sterile compounding principles or core skills is completed at least every 12 months. [USP 797 Section 2.1]	N/A
FAILED COMPETENCY INVESTIGATION: Initial and ongoing competency assessment failures are investigated, remediated, and documented in a Corrective Action Plan. [USP 797 Sections 2.2 & 2.3]	Yes
STAFF TRAINING IN VIABLE AIR AND SURFACE SAMPLING: Personnel are trained and competent in air and surface sampling procedures to ensure accurate and reproducible sampling. [USP 797 Section 6.1]	Yes

FACILITY COMPOUNDS CATEGORY 3

CATEGORY 3-ONGOING GFT & GARBING ASSESSMENT: After initial garbing competency evaluations, compounding personnel complete garbing competency and GFT every 3 months for Category 3 CSP's. Direct oversight personnel who do not compound complete garbing competency and GFT every 12 months. GFTs are appropriately incubated. [USP 797 Section 2.2]	
CATEGORY 3-ONGOING ASEPTIC PROCESSING COMPETENCY: Aseptic competency is repeated at least one time every 3 months for personnel compounding Category 3 CSPs. The simulation must capture elements that could potentially affect the sterility of the CSP. Immediately following the media-fill test, gloved fingertip and thumb sampling is performed on both hands and surface sampling of the direct compounding area. Direct oversight personnel who do not compound must complete media fill every 12 months. [USP 797 Section 2.3]	

N. MICROBIOLOGICAL AIR AND SURFACE MONITORING: ALL CATEGORIES

ENVIRONMENTAL MONITORING PROGRAM & SOPs: The microbiological air and surface monitoring program is clearly described in the facility's SOPs, which includes a diagram of the sampling locations, procedures for collecting samples, frequency of sampling, size of samples (e.g., surface area, volume of air), time of day of sampling in relation to activities in the compounding area, and action levels that trigger corrective action. [USP 797 Section 6]	Yes
VIABLE AIR SAMPLING: Volumetric active air sampling using an impaction air sampler collecting at least 1000L of air is conducted in each classified area (e.g., ISO Class 5 PEC and ISO Class 7 and 8 room(s)] during dynamic operating conditions and is completed at least every 6 months. [USP 797 Section 6.2]	Yes
AIR IMPACTION DEVICE: Device is serviced and calibrated according to the manufacturer's recommendations. [USP 797 Section 6.1]	Yes
SURFACE SAMPLING: Microbiological surface sampling is conducted in all classified areas and pass-through chambers under dynamic operating conditions and performed at least once monthly. [USP 797 Section 6.3]	Yes
GROWTH MEDIA: A general microbiological growth media that supports the growth of bacteria and fungi is used and a COA from the manufacturer is available. Growth media used for surface sampling contains neutralizing agents (e.g., lecithin and polysorbate 80). [USP 797 Sections 6.2 & 6.3]	Yes
INCUBATION: Samples are incubated at 30°C - 35°C for 48 hours and 20°C - 25°C for an additional 5 days; if dual growth media are used, incubate one media device at 30°C - 35°C for 48 hours and the second media device at 20°C - 25°C for 5 days. The incubator temperature is monitored during incubation, either manually or by a continuous recording device, and results are reviewed and documented as described in the facility's SOPs. Incubators are placed in a location outside of the sterile compounding area. [USP Sections 6.2.2 (Box 5) & 6.3.2 (Box 6)]	Yes
ENVIRONMENTAL MONITORING TREND ANALYSIS: Regular review of sampling data is performed to detect trends and review of trending data is documented. [USP 797 Section 6.1]	N/A
CORRECTIVE ACTION: When microbial growth exceeds action levels, the cause is investigated, and corrective action is taken; corrective actions taken are reviewed for effectiveness. An attempt to identify microorganisms at the genus level is made. [USP Sections 6.2.3 & USP 6.3.3]	N/A

FACILITY COMPOUNDS CATEGORY 3

CATEGORY 3-VIABLE AIR SAMPLING: Volumetric air sampling is completed within 30 days prior to the commencement of any Category 3 compounding and at least monthly thereafter regardless of the frequency of compounding Category 3 CSPs.Air sampling sites are selected in all classified areas. [USP 797 6.2.1]	
CATEGORY 3-SURFACE SAMPLING: Surface sampling for any Category 3 CSPs, is completed in all classified areas, and pass-through chambers connecting to classified areas, prior to assigning a BUD longer than BUD limits for Category 2 CSPs (defined in Table 13 of USP 797) and at least weekly on a regularly scheduled basis regardless of the frequency of compounding Category 3 CSPs. [USP 797 6.2.2]	
CATEGORY 3-BATCH SURFACE SAMPLING: Surface sampling is conducted within the PEC used to prepare Category 3 CSPs, at the end of each batch before cleaning and disinfection occurs, unless a self-enclosed robotic device is used. When a self-enclosed robotic device is used as the PEC, surface sampling is conducted at least once daily at the end of compounding operations before cleaning and disinfection occurs. [USP 797 Section 6.3.2]	

O. CLEANING AND DISINFECTING: ALL CATEGORIES

CLEANING SOPS: The frequency, method(s), documentation requirements, and location(s) of cleaning, disinfecting, and applying sporicidal disinfectants are described in written SOPs; use of agents is in accordance with manufacturer's instructions, procedures, and in adherence with minimum wet contact times. [USP 797 Section 7]	Yes
CLEANING PERSONNEL: Cleaning and disinfecting activities are performed by trained and appropriately garbed personnel using facility-approved agents and procedures. Cleaning personnel demonstrate knowledge and competency of core skills related to cleaning, disinfection, and maintenance of environmental conditions initially and at least once every 12 months. [USP 797 Sections 7 & 2.1]	Yes
REUSABLE GARB: Disinfection procedures described in facility SOPs are followed before reusing goggles, respirators, and other equipment used. [USP 797 Section 3.3]	Yes
DAILY PEC CLEANING & DISINFECTION: Equipment and all interior surfaces of the PEC are cleaned and disinfected daily on days when compounding occurs and when surface contamination is known or suspected. [USP 797 Section 7]	Yes
CATEGORY 1 AND 2-MONTHLY PEC SPORICIDAL DISINFECTION: Equipment and all interior surfaces of the PEC, including underneath of removable work trays, are cleaned with a sporicidal agent monthly. [USP 797 Section 7]	Yes
DAILY SEC & SCA CLEANING & DISINFECTION: Work surfaces, floors, sink surfaces, and pass-through chambers are cleaned and disinfected daily on days when compounding occurs. [USP 797 Section 7]	Yes
CATEGORY 1 AND 2 -MONTHLY SEC & SCA SPORICIDAL DISINFECTION: A sporicidal disinfectant is applied to work surfaces, pass-through chambers, storage shelving and bins, equipment outside of PEC's, sink surfaces, floors, ceilings*, walls, doors, and doors frames at least once monthly. *SCA ceilings are only cleaned, disinfected, and have sporicidal agents applied when visibly soiled and when surface contamination is known or suspected. [USP 797 Section 7]	Yes
CLEANING & DISINFECTING AGENTS: Cleaning and disinfecting agents are EPA-registered. If a one-step disinfectant cleaner is not used, surfaces are cleaned prior to being disinfected. [USP 797 Section 7]	Yes
STERILE AGENTS USED INSIDE PECs: Cleaning, disinfecting and sporicidal agents used within PECs are sterile. Written SOPs describe the time period during which, once opened, sterile cleaning and disinfecting agents, supplies, and sterile 70% IPA may be reused sterile water is used to dilute concentrated cleaning agents used inside of PECs (if applicable). [USP 797 Section 7.1.1]	Yes
CLEANING AGENT RESIDUE REMOVAL IN PECs: In a PEC, sterile 70% IPA is applied after cleaning, disinfecting, or after one-step disinfectant cleaner or sporicidal agent application to remove residue. [USP 797 Section 7].	Yes
PEC SANITIZATION WITH STERILE 70% IPA: Sterile 70% IPA is applied to the horizontal work surface, including removable trays, immediately before initiating compounding and at least every 30 minutes. If a compounding process takes more than 30 minutes, the work surface is disinfected immediately after the end of the compounding process. Sterile 70% IPA is allowed to dry. [USP 797 Section 7]	Yes
CLEANING SUPPLIES & TOOLS: All cleaning and disinfecting supplies (e.g., wipers, sponges, pads, and mop heads), except for tool handles and holders, are low lint. Supplies used inside PECs are sterile. [USP 797 Section 7.1.2]	Yes
REUSABLE CLEANING TOOLS: Reusable cleaning tools (e.g., mop frames) are made of cleanable materials and are cleaned and disinfected before and after each use. Reusable tools are dedicated for use in the classified areas or SCA and are not removed. Mops used in HD compounding areas, are dedicated for use only in those areas. [USP 797 Section 7.1.2]	Yes
MATERIALS MOVEMENT INTO CLASSIFIED AREAS: Before any item is introduced into the clean side of anteroom(s), placed into pass-through chamber(s), or brought into the SCA, it is wiped with a sporicidal disinfectant, EPA-registered disinfectant, or sterile 70% IPA using low-lint wipers by personnel wearing gloves. Dwell time is followed. [USP 797 Section 8.1]	Yes

FACILITY COMPOUNDS CATEGORY 3

CATEGORY 3-WEEKLY SPORICIDAL CLEANING OF PECs: Weekly cleaning using a sporicidal agent is performed on all internal surfaces of PEC and equipment in PEC's. [USP 797 Section 7]	
CATEGORY 3-WEEKLY SPORICIDAL CLEANING OF SECs: Weekly cleaning using a sporicidal agent includes application on work surfaces outside the PEC, pass-through chambers, and floors. [USP 797 Section 7]	
CATEGORY 3 -MONTHLY SEC SPORICIDAL DISINFECTION: A sporicidal disinfectant is applied to work surfaces, pass-through chambers, storage shelving and bins, equipment outside of PEC's, sink surfaces, floors, ceilings, walls, doors, and doors frames at least once monthly. [USP 797 Section 7]	

P. COMPOUNDING CSPs FROM NONSTERILE COMPONENTS OR SUPPLIES – CATEGORY 2 & 3

PRESTERILIZATION ACTIVITY CONTAINMENT ENCLOSURES: Pre-sterilization procedures, such as weighing and mixing of nonsterile components, occur in ISO Class 8 or better environment (e.g., anteroom or buffer room) and are performed in single-use containment glove bags, CVEs, BSCs, or CACIs. [USP 797 Section 4.2.6] *BSC in ISO 8 ante room, ante room may be changed to smaller area between buffer rooms with addition of CVE.*	Yes
LOCATION OF STERILE & NONSTERILE PECs: PECs used for sterile and nonsterile compounding (e.g., pre-sterilization procedures) are placed in separate rooms unless the buffer room can maintain an ISO Class 7 classification during particulate generating activities. Co-located PECs are at least 1 meter apart and particle-generating activities are not performed during sterile compounding processes [USP 797 Section 4.2.1; USP 800 Section 5.3]	N/A
COMPONENT SOPs: Written SOPs address the selection, receipt, evaluation, handling, storage, and documentation of all CSP components including ingredients and container closures. [USP 797 Section 9.3]	Yes
COMPONENT QUALITY & COA: APIs and components comply with the criteria in the USP-NF (if one exists for inactive components) and have a COA including specifications and test results showing the API or component meets expected quality. APIs and other components labeled "not for pharmaceutical use", "not for injectable use", "not for human use", or equivalent are not used in CSPs. [USP 7 Section 9.3.1]	Yes
API MANUFACTURERS: APIs are manufactured by an FDA-registered facility in the U.S. or comply with the laws and regulations of the applicable regulatory jurisdictions outside of the U.S. [USP 797 Section 9.3.1]	Yes
STERILE, DEPYROGENATED SUPPLIES: Supplies in direct contact with CSPs are sterile and depyrogenated. A COA or similar conformance documentation is reviewed. [USP 797 Section 9.3.1]	Yes
COMPONENT RECEIPT: Upon receipt, the external packaging of components is examined and components of unacceptable quality or showing deterioration are promptly labeled as rejected and segregated from active stock. [USP 797 Section 9.3.2]	Yes
COMPONENT EXPIRATION DATING: Upon receipt, APIs and components are inspected for a visible manufacturer expiration date. Components lacking expiration dates are assigned an expiration date no more than 1 year after receipt and both the date of receipt and facility assigned expiration date is clearly marked on the component packaging. [USP 797 Section 9.3.2]	Yes
COMPONENT EVALUATION BEFORE USE: All components are reinspected before use to ensure correct identity, appropriate quality, within expiry date, have been stored under appropriate conditions. [USP 797 Section 9.3.3]	Yes

Q. STERILIZATION OF CSPs - CATEGORY 2 & 3

CSP Sterilization Overview	No
STERILIZATION METHOD(S) APPROPRIATENESS: Sterilization method(s) used do not degrade CSP physical and chemical stability (e.g., affecting its strength, purity, or quality) or packaging integrity. [USP 797 Section 10]	Yes
STERILITY ASSURANCE LEVEL (SAL) FOR TERMINAL STERILIZATION METHODS: Terminal sterilization method(s) (e.g., steam, dry heat, or irradiation) achieve a SAL or PNSU (probability of a nonsterile unit) of (0.000001) [USP 797 Section 10]	N/A
STERILIZATION OF INJECTABLES WITHIN 6 HOURS OF COMPLETION: Injectable CSPs containing nonsterile components or that come into contact with nonsterile devices (e.g., containers, tubing) during compounding are sterilized within 6 hours of completion. [USP 797 Section 10]	Yes
STERILIZATION SOPs include: 1) A description of terminal sterilization and depyrogenation process(es) used in the preparation of CSPs and/or compounding equipment, including the temperature, pressure (if applicable), duration, permissible load conditions for each cycle, and the use of biological indicators and endotoxin challenge vials (ECVs). 2) Personnel training and competency assessment on sterilization and depyrogenation methods and equipment used by the facility. 3) Schedule and method for establishing and verifying the effectiveness of methods selected. 4) Methods for maintaining and cleaning the sterilizing and depyrogenation equipment. [USP 797 Section 10]	N/A
CSP Sterilization by Filtration	No
STERILIZING FILTERS: Sterilizing filters used are sterile, depyrogenated, have a nominal pore size of 0.22 µm or smaller, and are appropriate for pharmaceutical use. Sterilizing filters are certified by the manufacturer to retain at least 10,000,000 microorganisms of a strain of Brevundimonas diminuta per square centimeter of upstream filter surface area. Filters are chemically and physically compatible with all ingredients in the CSP (e.g., water-miscible alcohols may damage filter integrity); chemically stable at the pressure and temperature conditions that will be used; and have enough capacity to filter the required volumes. [USP 797 Section 10.2]	Yes
BUBBLE POINT TESTING: Sterilizing filters are subjected to the manufacturers' recommended integrity testing, such as a post-use bubble point test. If multiple filters are required for the compounding process, each of the filters passes a filter-integrity test. [USP 797 Section 10.2] For failed BP testing, CSP is discarded or, after investigating, refiltered not more than one time. [USP 797 Section 10.2]	Yes
CSP PREFILTRATION: When CSPs are known to contain excessive particulate matter, prefiltration is performed using a filter of larger nominal pore size (e.g., 1.2 µm) or a separate filter of larger nominal pore size placed upstream of (i.e., prior to) the sterilizing filter. [USP 797 Section 10.2]	N/A
CSP Sterilization by Steam	No
STEAM STERILIZATION CYCLES: Sterilization cycles allow for an exposure duration that includes sufficient time for the entire contents of the CSP to reach and remain at the sterilizing temperature during the duration of the sterilization period. Items are placed in the autoclave to allow steam to reach CSPs without entrapment of air. [USP 797 Section 10.3]	N/A
BIOLOGICAL INDICATOR USE: The effectiveness of steam sterilization is verified and documented with each sterilization run or load by using appropriate biological indicators (e.g., spores of Geobacillus stearothermophilus) and other confirmation methods. [USP 797 Section 10.3]	N/A
CSP PREFILTRATION: Immediately before filling containers that will be sterilized via steam, CSP solutions are passed through a filter with a nominal pore size of not larger than 1.2 µm for removal of particulate matter. [USP 797 Section 10.3]	N/A
AUTOCLAVE WATER SOURCE: The steam supplied in the autoclave is generated using water per the manufacturer's recommendation. [USP 797 Section 10.3]	N/A
CALIBRATED DATA RECORDER: A calibrated data recorder or chart is used to monitor each cycle and to examine for cycle irregularities (e.g., deviations in temperature or pressure). [USP 797 Section 10.3]	N/A
CSP Sterilization by Dry Heat	No
DRY HEAT STERILIZATION CYCLES: Dry heat sterilization cycles allow for an exposure duration that includes sufficient time for the entire contents of CSPs and other items to reach and remain at the sterilizing temperature for the duration of the sterilization period. [USP 797 Section 10.4]	N/A
CSP PREFILTRATION: Immediately before filling ampules and vials that will be sterilized by dry heat, CSP solutions are passed through a filter with a nominal pore size of not larger than 1.2 µm for removal of particulate matter. [USP 797 Section 10.4]	N/A
CALIBRATED DATA RECORDER: The calibrated oven is equipped with temperature controls and a timer. A calibrated data recorder or chart is used to monitor each cycle and the data is reviewed to identify cycle irregularities (e.g., deviations in temperature or exposure time). [USP 797 Section 10.4]	N/A
BIOLOGICAL INDICATOR USE: The effectiveness of the dry heat sterilization method is verified and documented with each sterilization run or load using appropriate biological indicators (e.g., spores of Bacillus atrophaeus) and other confirmation methods (e.g., temperature-sensing devices). [USP 797 Section 10.4]	N/A

R. DEPYROGENATION OF EQUIPMENT - CATEGORY 2 & 3

DEPYROGENATION SOPs include: 1) A description of terminal sterilization and depyrogenation process(es) used in the preparation of CSPs and/or compounding equipment, including the temperature, duration, permissible load conditions for each cycle, and the use of biological indicators and endotoxin challenge vials (ECVs). 2) Personnel training and competency assessment on sterilization and depyrogenation methods and equipment used by the facility. 3) Schedule and method for establishing and verifying the effectiveness of methods selected. 4) Methods for maintaining and cleaning the sterilizing and depyrogenation equipment. [USP 797 Section 10]	Yes
DEPYROGENATION CYCLE: Dry heat depyrogenation is used to render glassware, metal, and other thermostable containers and components pyrogen free. The exposure period includes sufficient time for items to reach the depyrogenation temperature; items remain at the depyrogenation temperature for the duration of the depyrogenation period. [USP 797 Section 10.1]	Yes
DEPYROGENERATION VIA RINSING: Non-thermostable items are depyrogenated by multiple rinses with sterile, nonpyrogenic water (e.g., Sterile Water for Injection or Sterile Water for Irrigation) and then thoroughly drained or dried immediately before use in compounding. [USP 797 Section10.1]	N/A
ENDOTOXIN CHALLENGE VIAL (ECV) USE: The effectiveness of the dry heat depyrogenation cycle(s) is established initially and verified annually using ECVs to demonstrate the cycle achieves a greater than or equal to 3-log endotoxin reduction. The effectiveness of the depyrogenation cycle is re-established if there are changes to the depyrogenation cycle. Cycle verifications are documented. [USP 797 Section 10.1]	Yes

S. MASTER FORMULATION AND COMPOUNDING RECORDS – ALL CATEGORIES

MASTER FORMULATION RECORD (MFR): A MFR is created for all CSPs prepared from nonsterile ingredient(s) or CSPs prepared for more than one patient. [USP 797 Section 11.1] *MFR in Pioneer.*	Yes
MFR MODIFICATIONS: Any changes or alterations to an MFR are approved and documented per facility's SOPs. [USP 797 Section 11.1]	Yes
MFR DOCUMENTATION: An MFR includes at least the following: 1) Name, strength or activity, and dosage form of the CSP; 2) Identities, amounts of all ingredients, and, if applicable, relevant characteristics of components; 3) Type and size of container closure system(s); 4) Complete instructions for preparing the CSP including equipment, supplies, a description of the compounding steps, and any special precautions; 5) Physical description of the of the final CSP; 6) BUD and storage requirements; 6) Stability reference; 7) Quality control procedures; 8) other information as needed to describe the compounding process and ensure repeatability. [USP 797 Section 11.1 (Box 9)]	Yes

COMPOUNDING RECORD (CR): A CR is created for all Category 1, Category 2, and Category 3 CSPs. A CR is created for immediate-use CSPs prepared for more than one patient. [USP 797 Section 11.2]	Yes
CR DOCUMENTATION: A CR includes at least the following: 1) Name, strength or activity, and dosage form of the CSP; 2) Date and time of preparation of the CSP; 3) Assigned internal identification number (e.g., prescription, order, or lot number); 4) A method to identify the individuals involved in the compounding process and individuals verifying the final CSP; 5) Name of each component; 6) Vendor, lot number, and expiration date for each component for CSPs prepared for more than one patient and for CSPs prepared from nonsterile ingredient(s); 7) Weight or volume of each component; 8) Strength or activity of each component; 9) Total quantity compounded; 10) Final yield; 11) Assigned BUD and storage requirements; 12) Results of QC procedures. And, if applicable, 13) MFR reference for the CSP; and 14) Calculations made to determine and verify quantities and/or concentrations of components. [USP 797 Section 11.2 (Box 10)]	Yes
STERILIZATION CYCLE DOCUMENTATION: The date, run, and load numbers of the steam or dry heat sterilizer used to sterilize a CSP are documented on the CR if applicable. [USP 797 Sections 10.3 & 10.4]	N/A

T. RELEASE INSPECTION AND TESTING – ALL CATEGORIES

RELEASE TESTING PROCEDURES: All release testing procedures (e.g., visual inspections and testing) are included in facility documentation such as MFRs and SOPs. [USP 797 Section 12] *Compounding Document and Master Formulation Record.*	Yes
VISUAL INSPECTION: CSPs are visually inspected before release and dispensing to determine whether the 1) physical appearance of the CSP is as expected (e.g., free of inappropriate visible particulates or other foreign matter, discoloration, or other defects), 2) container closure integrity is intact (e.g., checking for leakage, cracks in the container, or improper seals), 3) CSP and its labeling match the prescription or medication order. [USP 797 Section 12.1]	Yes
DELAYED DISPENSING VISUAL INSPECTION: When CSPs are not released or dispensed on the day of preparation, a visual inspection is conducted immediately before its release to ensure the CSP is free from any defects such as precipitation, cloudiness, or leakage, which could develop during storage. [USP 797 Section 12.1]	N/A
CSP REJECTION & QUARANTINE: CSPs found to be of unacceptable quality (e.g., observed defects) are promptly rejected, clearly labeled as rejected, and segregated from active stock. [USP 797 Section 12.1]	N/A
INVESTIGATION OF OOS RESULTS: Out-of-specifications results and defects indicating sterility or stability problems are investigated to determine the root cause and a corrective action plan is implemented and documented per facility SOPs. [USP 797 Section 12 & 12.1]	N/A

U. CSP HANDLING, STORAGE, PACKAGING, SHIPPING, & TRANSPORT – ALL CATEGORIES

STORAGE AREA TEMPERATURE MONITORING: Temperature in CSP & component storage areas is monitored at least once daily and recorded on a log on days when the facility is open or by a continuous temperature recording device; temperature data is readily retrievable. Monitoring equipment is calibrated or verified for accuracy as recommended by the manufacturer or every 12 months. [USP 797 Sections 9.3 & 19.1]	Yes
TEMPERATURE EXCURSIONS: When CSPs have been exposed to temperature excursions above or below storage temperature limits for the CSP, a Designated Person determines whether the CSP has retained its integrity or quality. CSPs are discarded if the impact of the excursion cannot be determined. [USP 797 19.1]	N/A
CSP PACKAGING: CSP packaging and shipping materials are selected to protect CSPs from damage, leakage, contamination, degradation, adsorption and prevent inadvertent exposure to transport personnel. [USP 797 Section 19.2]	Yes
SHIPPING & TRANSPORTING: Modes of transport are selected that are expected to deliver properly packaged CSPs in an undamaged, sterile, and stable condition. Special handing instructions are provided and/or affixed to the exterior of the container when applicable. [USP 797 Section 19.2]	Yes

V. STERILE QUALITY PROGRAM, SOP's & DOCUMENTATION- ALL CATEGORIES

QA/QC PROGRAM & SOPs: A Quality Assurance (QA) and Quality Control (QC) program is documented in facility SOPs and formally establishes a system of 1) adherence to procedures, 2) prevention and detection of errors and other quality problems, 3) evaluation of complaints and adverse events, and 4) appropriate investigations and corrective actions. The QA/QC SOPs describe the roles, duties, and training of personnel responsible for each aspect of the QA program. [USP 797 Section 18]	Yes
INVESTIGATIONS & CAPAs: A designated person(s) follows up to ensure investigations are conducted and corrective actions are taken if problems, deviations, failures, or errors are identified or when complaints or adverse reactions are reported. A complete record of each reported complaint and adverse reaction is created and retained. Investigations and corrective actions are documented. [USP 797 Sections 17, 18.2, & 18.3]	N/A
ADR & COMPLAINT DOCUMENTATION: A complete record of each reported complaint and adverse reaction is created and retained per USP 797. [USP 797 Section 18.1]	N/A
RECALL PROCEDURES & SOP: If CSPs are dispensed or administered before the results of release testing are known, procedures are in place to immediately notify the prescriber of a failure of specifications with a potential to cause patients harm; determine the severity of the problem and urgency for implementation/completion of recall; identify patients (or other points of distribution) who have received affected CSP; recall any unused dispensed CSPs; quarantine remaining stock in the pharmacy; investigate if other lots are affected and recalled if needed; conduct investigation and document reason for the failure. [USP 797 Section 18]	N/A
RECALL REPORTING: Recalls are reported to the appropriate regulatory body as required by the laws and regulations of the applicable regulatory jurisdiction. [USP 797 Section 18.1]	N/A
ANNUAL QA/QC REVIEW: The overall QA/QC Program is reviewed at least once every 12 months by the Designated Person(s); the review is documented, and corrective actions are taken if needed. [USP 797 Section 18]	N/A
ANNUAL SOP REVIEW: Facility sterile compounding SOPs are reviewed every 12 months by the Designated Person(s); the review is documented. Changes to SOP are made only by the Designated Person and documented. Acknowledgement of revisions to SOP's are communicated to all personnel. [USP 797 Section 17] *Initial inspection.*	N/A
STERILE SOPs: Facility maintains SOPs covering all aspects of the sterile compounding process and other support activities. [USP 797 Section 17]	Yes
STERILE COMPLIANCE DOCUMENTATION: Facility has and maintains written or electronic documentation to demonstrate compliance with requirements in this chapter. [USP 797 Section 20]	Yes
DOCUMENTATION RETENTION: Documentation complies with all laws and regulations of the applicable regulatory jurisdiction. Records are legible and stored in a manner that prevents their deterioration and/or loss. All required documentation for a particular CSP is readily retrievable for at least 4 years after preparation. [USP 797 Section 20]	N/A

W. HAZARDOUS DRUG HANDLING & COMPOUNDING – ALL CATEGORIES

DESIGNATED PERSON: The entity has a Designated Person who is qualified and trained to be responsible for implementing appropriate HD procedures, overseeing compliance with USP 800 requirements, ensuring environmental control of the storage and compounding areas, monitoring HD facility operations, testing, and acting on results. [USP 800 Section 4]	

HAZARD COMMUNICATION PROGRAM (HCP): Facility has SOPs to ensure effective training regarding proper labeling, transport, storage, and disposal of HDs and use of Safety Data Sheets. The HCP and HD SOPs include a written plan describing 1) how USP 800 requirements are implemented, 2) HD chemical container labeling with the identity of the material and appropriate hazard warnings, 3) readily accessible location of HD chemical SDSs known and accessible by all personnel, 4) HD risk training and information provided to all personnel with HD exposure risk before initial HD handling work assignment and whenever hazard changes, 5) personnel of reproductive capability written acknowledgement of understanding of HD handling risks. [USP 800 Section 8]	
ASSESSMENT OF RISK: All HD drugs follow the requirements of USP 800 unless an assessment of risk (AOR) is performed. If an assessment of risk approach is taken, the entity must document what alternative containment strategies and/or work practices are being employed for specific dosage forms to minimize occupational exposure. The AOR is reviewed at least every 12 months and minimally contains the type of HD, dosage form, risk of exposure, packaging, and manipulation. [USP 800 Section 2]	
LIST OF HAZARDOUS DRUGS: Facility maintains a list of HDs that includes any items on the current NIOSH that the entity handles. The list is reviewed every 12 months and whenever a new agent or dosage form is used. [USP 800 Section 2]	
CONTAINMENT REQUIREMENTS: All antineoplastic HDs requiring manipulation and HD active pharmaceutical ingredients (APIs) on the NIOSH list follow all the requirements of USP 800. [USP 800 Section 2, Box 1]	
HD HANDLING SOPs: SOPs are created and maintained for the safe handling of HDs used by the facility. SOPs are reviewed annually; review is documented, and any revisions are communicated to personnel handling HDs. [USP 800 Section 17]	
HD HANDLING AREAS, SIGNAGE, & ACCESS: Signage designating HD handling areas are prominently displayed and access to HD handling areas is restricted to authorized personnel. Designated areas are available for receipt, unpacking, and storage of HDs; and sterile HD compounding. [USP 800 Section 5]	
HD RECEIPT: There is a designated area for the receipt of antineoplastic HDs or API's that is neutral/normal or negative pressure relative to surrounding areas. HDs are not unpacked from external shipping containers in sterile compounding areas or in positive pressure areas. HDs are delivered immediately after unpacking to HD storage area. [USP 800 Section 5.1]	
HD RECEIVING SOPs: Facility SOPs for receiving HDs that include required PPE during HD receiving and handling, a tiered approach to assessing HD packaging and shipping containers for signs of damage or breakage (e.g., visible signs of leakage, sounds of broken glass), management of known or suspected damaged HD containers, and transport to HD storage location(s) for nondamaged containers. [USP 800 Section 10]	
HD STORAGE: HDs are stored to prevent spillage or breakage, off floors, and in areas appropriate for natural disasters. Antineoplastic HDs and HD API are stored separately from non-HDs to prevent contamination and personnel exposure. HD storage areas are externally ventilated and negative-pressure rooms with at least 12 ACPH. [USP 800 Section 5.2]	
HD REFRIGERATED STORAGE: Refrigerated antineoplastic HDs are stored in a dedicated refrigerator, in a negative pressure area with at least 12 ACPH. Pass through refrigerators are not used. [USP 800 Section 5.2]	
STERILE HDs COMPOUNDED IN A C-SCA: C-SCA maintains a minimum of 12 ACPH of HEPA- filtered air and has negative pressure to adjacent areas of -0.01" w.c. to -0.03" w.c. [USP 800, sections 5.3.2 Table 3]	
C-SEC DESIGN AND ENGINEERING CONTROLS: The C-SEC has fixed walls physically separated from other preparation areas, is externally ventilated , and has 30 ACPH. [USP 800 Section 5.3.2 Table 3]	
C-SEC DESIGN AND PRESSURE DIFFERENTIALS: The C-SEC has negative pressure to adjacent areas of -0.01" w.c. to -0.03" w.c. [USP 800 Sections 5.3.2 Table 3]	
C-SEC ACCESS VIA ANTE ROOM: The classified area used for entry into the negative pressure buffer room has fixed walls and maintains a minimum of 30 ACPH of HEPA-filtered air, positive pressure of +0.02" w.c. to all adjacent unclassified areas, and ISO7 or better classification. [USP 800 Section 5.3.2]	
C-SEC ACCESS VIA NON-HD BUFFER: A negative-pressure HD buffer entered exclusively through a non-HD buffer room contains a line of demarcation (LOD) within the negative-pressure buffer room for donning/doffing HD PPE and a method a transport of HDs, HD CSPs, and HD waste into and out of the HD buffer (e.g., pass-through chamber). Pass through chambers are included in semi-annual facility certification. [USP 800 Section 5.3.2]	
C-SEC SINK & SAFETY EQUIPMENT: A sink is available for hand washing and an eyewash station and/or other emergency safety precautions meeting applicable laws and regulations are readily available and located where operation does not interfere with ISO classifications. Sinks are located at least 1 meter from the entrance into the buffer room (or at least 1 meter from the C-PEC in a C-SCA). [USP 800 Sections 5.3 & 5.3.2]	
C-PEC LOCATION AND VENTING: All C-PECs used for sterile HD compounding (e.g., CACIs or BSCs), are located within a C-SEC or C-SCA, externally vented, and maintain an ISO 5 or better air quality. [USP 800 Section 5.3.2]	
C-PEC OPERATION & OUTAGES: C-PECs operate continuously if supplying some or all the negative pressure in the C- SEC or if used for sterile compounding. During power outages, repairs, or relocation, C-PEC use is suspended immediately. Once C-PEC power is restored, all PEC surfaces are decontaminated, cleaned, and disinfected, and compounding is not resumed until the manufacturer's specified recovery time has elapsed. [USP 800 Section 5.3]	
REQUIRED HD PPE: When compounding HDs, gowns, head, hair, shoe covers, and two pairs of chemotherapy gloves are donned per facility SOPs. For all other HD handling activities, including HD receipt, storage, transport, cleaning activities, spill control, and waste disposal, facility SOPs define the required PPE based on the OSP and AOR. Disposable PPE is not reused; reusable PPE is decontaminated and cleaned after each use. [USP 800 Section 7]	
GLOVES: Chemotherapy gloves are tested to ASTM standard D6978 (or its successor) and are powder free. Gloves are inspected for physical defects. Gloves are changed when torn, punctured, or contaminated. Personnel wash hands with soap and water after removing gloves. [USP 800 Section 7.1]	
GOWNS: HD gowns are disposable, resistant to permeability by HDs, close in back, are long sleeved, closed cuff, and seamless. Gowns are changed per manufacturer's permeation information; if no data is available, HD gowns are change every 2-3 hours or immediately after a spill or splash. Gowns are limited to HD handling areas and are donned over the sterile compounding frock. [USP 800 Section 7.2, USP 797 Section 3.3]	
SHOE COVERS: When compounding, a second pair of shoe covers is donned before entering the C-SEC and doffed when exiting the C-SEC. [USP 800 Section 7.3]	
EYE AND FACE PROTECTION: Appropriate eye (goggles) and face protection (face shield) are worn when there is a risk for spills or splashes or when working outside of a C-PEC. Surgical masks are not used when respiratory protection is required per SOP and/or AOR as protection from HD exposure. [USP 800 Section 7.4]	
PPE DISPOSAL: HD PPE is disposed of appropriately prior to exiting the C-SEC. Chemotherapy gloves and sleeve covers (if used during compounding) are carefully removed and discarded immediately into an appropriate waste container inside of the C-PEC or contained in a sealable bag for discarding outside of the C-PEC. [USP 800 Section 7.6]	
INITIAL HD TRAINING & COMPETENCY: Personnel who handle HDs are trained and demonstrate competency per their job function before independently handling HDs and when a new HD medication, process, SOP, or equipment is introduced. Training minimally includes an overview of the entity's HD list and their risks; review of HD SOPs; proper use of PPE, equipment, and devices; prevention of HD exposures and spills; HD exposure and spill response; use of a spill kit, PPE, and NIOSH-certified respirators; and HD disposal. Based on job duties, personnel receive additional HD training in HD acquisition and receipt, preparation, compounding, dispensing, labeling, storage, and transport. Training and competency assessments are documented. [USP 800 Sections 8, 9, 11.1, 16, & 17]	

ONGOING HD COMPETENCY ASSESSMENT: HD handling competencies are reassessed and documented at least every 12 months. [USP 800 Section 9]	
HD ATTESTATION: Personnel of reproductive capability have a written acknowledgement attesting to their understanding of HD handling risks. [USP 800 Section 8]	
BUDs OF STERILE HDs COMPOUNDED IN A C-SCA: BUDs and storage conditions are in accordance with USP 797 requirements for Category 1. HD CSPs compounded in a C-SCA are prepared from only sterile starting components. [USP 800 Section 5.3.2] CSTDs are used as a supplemental engineering control only. [USP 800 Section 5.3 and Table 3]	
BUDs OF STERILE HDs COMPOUNDED IN A C-SEC: BUDs and storage conditions in accordance with USP 797 requirements for Category 2, or Category 3 CSPs. [USP 800 Section 5.3.2]	
NONSTERILE-TO-STERILE HD COMPOUNDING: HD CSPs compounded from nonsterile starting components are compounded inside a sterile suite. [USP 800 Section 5.3.2]	
DEDICATED HD EQUIPMENT: Disposable or cleanable equipment for compounding (e.g., mortar and pestle, graduated cylinder, spatulas) is dedicated for use with HDs. [USP 800 Section 13]	
NON-HD COMPOUNDING IN A C-PEC: Non-HDs compounded in a HD C-PEC are placed in protective outer wrapping, labeled for PPE handling precautions, and treated as an HD. [USP 800 Section 5.3.2 and Table 3]	
D/D/C/D SOPs: Written procedures for decontamination, deactivation, cleaning, and disinfection are available and followed. Cleaning of sterile compounding areas also complies with USP 797 requirements. Procedures include agents used, dilutions (if used), frequency, and documentation requirements. [USP 800 Section 15]	
DEACTIVATION, DECONTAMINATION, CLEANING & DISINFECTION (D/D/C/D): All areas where HDs are handled (receiving, compounding, transport, administering, disposal) and all reusable equipment and devices are deactivated/decontaminated, cleaned, and then disinfected. [USP 800 Section 15]	
TRAINING OF D/D/C/D: Personnel are trained in deactivation/decontamination, cleaning, and disinfection to protect themselves and the environment from contamination. [USP 800 Section 15]	
PPE DONNED DURING D/D/C/D: Personnel wear appropriate PPE resistant to cleaning agents used, including 2 pairs of ASTM-tested chemotherapy gloves and impermeable disposable gowns. Eye protection and face shields are worn if splashing may occur. Respiratory protection is used if warranted. [USP 800 Section 15]	
D/D/C/D AGENTS USED: Agents selected are appropriate for the type of HD contamination(s), location, and surface materials. Sterile 70% IPA is used to remove residue left on sterile surfaces and compounding areas by decontaminating agents. [USP 800 Section 15 & 15.4]	
DECONTAMINATION DURING COMPOUNDING: C-PEC is decontaminated at least daily (when used), after as spill, before and after certification, voluntary interruption, or if ventilation tool is removed. The C-PEC worksurface is decontaminated between compounding of different HDs. [USP 800 Section 15.2]	
MONTHLY UNDERTRAY CLEANING: Area under the work tray of a C-PEC is deactivated, decontaminated, and cleaned at least monthly. [USP 800 Section 15.2]	
DISPOSAL OF D/D/C/D CLEANING SUPPLIES: Disposable cleaning supplies are discarded per EPA regulations and facility SOPs. [USP 800 Section 15]	
LABELING, PACKAGING, TRANSPORT SOP: Facility has SOP for the labeling, handling, packaging, and transport of HDs addressing the prevention of spills/exposures, training for exposure, and spill kit use. The SOP describes appropriate shipping containers and insulating materials for transport based on product specifications (e.g., required storage conditions), transport vendors, and mode of transport. [USP 800 Section 11 & 11.2]	
HD LABELING: HD CSPs are identified as hazardous and labeled with special handling precautions. Labeling process for compounded HD products does not introduce contaminated materials into non-HD areas. [USP 800 Sections 11.1 & 13]	
PACKAGING: Packaging materials and containers that maintain the physical integrity, stability, and sterility of HDs during transport. Packaging protects HDs from damage, leakage, contamination, and degradation, while protecting healthcare workers who transport HDs. [USP 800 Section 11.2]	
TRANSPORT: HDs that are transported are labeled, stored, and handled according to regulations, facility SOPs, and in containers that minimize risk of breakage or leakage. Pneumatic tubes are not used to transport liquid or antineoplastic HDs. [USP 800 Section 11.3]	
HD SPILL SOP: Facility has an SOP to prevent spills. The SOP directs the management and cleanup of suspected or known damage to or spills of HDs upon receipt, storage, handling, compounding, packaging, and transport. SOP addresses appropriate response based on factors such as the size, scope, and who is responsible for cleanup. SOP states the location and capacity of kits and immediate steps that should be taken to evaluate and address personnel exposure, secure spill area, and minimize exposure risk to other personnel. [USP 800 Section 16]	
SPILL KITS, & SINGAGE: Spill kits are readily available with appropriate supplies, PPE, and signs to restrict access to affected areas, restriction posted, and documentation of spills occur when needed. [USP 800 Section 16]	
SPILL CLEAN UP & DOCUMENTATION: Spills are contained and cleaned immediately only by qualified personnel with appropriate PPE. After cleanup is complete, spill circumstances and management are documented. Qualified personnel are available at all times while HDs are being handled. [USP 800 Section 16]	
DISPOSAL REGULATION COMPLIANCE: Disposal of HD waste, including unused HDs and trace-contaminated PPE and materials, is performed by trained and appropriately garbed personnel and complies with federal, state, and local regulations. [USP 800 Sections 11.4 & 17]	

X. LYOPHILIZATION

Sterile preparations prepared for lyophilization are maintained in ISO 5 unidirectional laminar flow air throughout sterilization, filling, and transport to the lyophilizer. [64B16-27.797(5) F.A.C.]	
A recorded smoke study is available and demonstrates that transport from the PEC to the lyophilizer is accomplished in ISO 5 laminar flow air at all times. [64B16-27.797(5) F.A.C.]	
The pharmacy has established and follows policies and procedures for the high-level disinfection of the lyophilizer chamber, piping, and all other areas of the unit which pose a potential risk for contamination of the product. [64B16-27.797(5) F.A.C.]	
The pharmacy validated the high-level disinfection procedure initially, and after changes to the cleaning process or agents. Documentation of studies is available for inspection. [64B16-27.797(5) F.A.C.]	
Validation studies for high level disinfection are performed with the 5-aerobic bacterial and fungal ATCC organisms referenced in USP<71> are conducted by an external vendor unless the firm has an internal laboratory capable of performing the studies. An internal laboratory is separate from the compounding and work areas of the pharmacy to prevent contamination in the pharmacy. [64B16-27.797(5) F.A.C.]	
Policies and procedures are established and followed for cleaning the lyophilizer prior to disinfection and include cleaning agents and schedules. Documentation of cleaning is maintained and available for inspection. [64B16-27.797(5) F.A.C.]	
Policies and procedures are established for the maintenance of the lyophilizer and at a minimum include the manufacturers recommendations. [64B16-27.797(5) F.A.C.]	

The maintenance schedule includes provisions for periodic testing of the chamber for leaks and all other recommended procedures described by the equipment manufacturer. Documentation of routine maintenance is available for inspection. [64B16-27.797(5) F.A.C.]	
SOPs and quality assurance program established to include validation of the filling process, container closure integrity, frequent monitoring of fill volumes, identification of over fills and underfills, assessment of personnel involved in compounding for lyophilization, equipment qualification, formula verification, and evaluation of finished product for conformance to specifications. [64B16-27.797(5) F.A.C.]	
The pharmacy has provisions for sterilizing, with filters, the inert gas or air used for backfilling during the vacuum release phase. These Sterilizing filters undergo the manufacturers recommended integrity test. [64B16-27.797(5) F.A.C.]	
Media fills are conducted every six months using the maximum batch size and demonstrate the filling, transport to the lyophilizer, loading and stoppering operations. Media is NOT frozen during the media fill operation. [64B16-27.797(5) F.A.C.]	
Personnel preparing sterile compounds for lyophilization wear sterile Personal Protective Equipment that covers all exposed skin. [64B16- 27.797(5) F.A.C.]	
Glove Fingertip Sampling is performed with every batch after fill and transport into the lyophilizer on all personnel compounding for lyophilization. The results are incorporated into the batch record. [64B16-27.797(5) F.A.C.]	
In-process acceptance criteria such as color, moisture limits and visual appearance are established for each lyophilized product. [64B16- 27.797(5) F.A.C.]	
A 100% visual examination of the finished product is conducted to determine that the product conforms to the established visual criteria and is incorporated into the batch record. [64B16-27.797(5) F.A.C.]	
Finished product testing is conducted on all batches. Procedures have been established for selecting test samples from the batch and are written and followed. Such procedures may include location of vials in the lyophilizer and positions in the fill line. [64B16-27.797(5) F.A.C.]	
Finished product testing includes sterility testing using a USP<71> method unless an alternative test method has been validated and shown to be equivalent or better. Diluents used to reconstitute the sample vials for testing are preservative free. [64B16-27.797(5) F.A.C.]	
Each batch of lyophilized product with a beyond use date that falls within the USP<797> guidelines and is not tested for sterility, has viable air and surface sampling that is collected in critical areas of ISO 5 locations as well as sampling of the gloves and sleeves of personnel documented in the batch record. [64B16-27.797(5) F.A.C.]	
Every lyophilized product has established endotoxin levels Each batch of lyophilized product is tested for endotoxin in accordance with USP<85> and confirmed to fall within the set limits and documented in the batch record. [64B16-27.797(5) F.A.C.]	
Potency, radiochemical purity, or applicable test to assure label claim is conducted on every batch and documented in the batch record. In lieu of potency testing, weight-based verification may occur based on formula verification. Potency testing shall be based on the USP monograph if one is available. [64B16-27.797(5) F.A.C.]	

Y. SPECIAL PARENTERAL ENTERAL & EXTENDED SCOPE

Technicians properly identified. [64B16-27.100 (2) F.A.C.]; [64B16-27.4001 F.A.C.]; [64B16-27.410 F.A.C.]; [64B16- 27.420 F.A.C.],	
Medication is properly labeled for dispensing to patient. [64B16-28.108(2) F.A.C.]	
Outdated medications removed from active stock. [64B16-28.110 F.A.C.]; [64B16-28.1191 F.A.C.]	
Continuous Quality Improvement Program described in the Pharmacy policy and procedure manual and quarterly summarization of Quality Related Events are available for inspection. [64B 16 27.300 F.A.C.]; [766.101 (1) (a)(l) F.S.]	
Pharmacy maintains patient profile with allergy information and medications dispensed. [64B16-27.800, F.A.C.]	
All controlled substance prescriptions (electronic, faxed, verbal and written) contain required information. [893.04(a)(b)(c) F.S.]; [21CFR1306.05]	
Prescriptions for controlled substances are on counterfeit-proof prescription pads or blanks purchased from a department-approved vendor and the quantity and date meet the requirements of [456.42(2), F.S.].	
Controlled substance inventory taken on a biennial basis and available for inspection. [893.07(1)(a), F.S.] [21CFR1304.11] [21CFR1304.04]	
DEA 222 forms properly completed or records of CSOS orders electronically completed, linked to the original order, archived and retrievable. [893.07(2) F.S.]; 21CFR 1305.13(e)]; [21CFR1305.22(g)]	
Controlled substance records and prescription information in computer system are retrievable and maintained for 4 years. [21CFR1304.04]; [465.022(12) (a) F.S.]; [21CFR1306.22]; [64B16-28.140 F.A.C.]	
Certified daily log or signed printout maintained. [21CFR1306.22(f)(3)]; [64B16-28.140(3)(d) F.A.C]	
Pharmacy is reporting to the PDMP within 24 hours of dispensing controlled substance. [893.055(4) (3)(a), F.S.]	
Invoices for medications purchased from a Florida licensed wholesaler/distributor are retrievable for inspection. [499.005 (14) F.S.]	
A special sterile products and parenteral/enteral compounding pharmacy provides telephone accessibility to its pharmacist(s) for its patients at all hours. [64B16-28.820(3)(b)]	
A special sterile products and parenteral/enteral compounding pharmacy provides special handling and packaging of compounded parenteral and enteral preparations when delivering from the pharmacy to the patient or institution as required to maintain stability of the preparations. [64B16-28.820(3)(b)]	

Remarks:

Facility will complete required testing for Category 2 BUD.
Facility has added low wall returns in ante room.

I have read and have had this inspection report and the laws and regulations concerned herein explained, and do affirm that the information given herein is true and correct to the best of my knowledge.

RE: License Certification for Polomar Specialty Pharmacy LLC

To Whom It May Concern:

This is to certify the following information, maintained in the records of the Department of Health, for the above referenced Health Care Practitioner:

PROFESSION:	Pharmacy
LICENSE NUMBER:	PH35196
ORIGINAL CERTIFICATION:	07/13/2024
EXPIRATION DATE:	02/28/2025
CURRENT STATUS OF LICENSE:	CLEAR
AGENCY ACTION:	No
LICENSE GRANTED BY:	N/A
OTHER CERTIFICATIONS:	Community Pharmacy, Schedule Ii & Iii

To expedite the verification process, the above format is the standard format for all healthcare practitioners. If you have questions regarding the status of this license, please call the Customer Contact Center at (850) 488-0595, option 5.

Sincerely,

Gwendolyn B. Freeman

Gwendolyn B. Freeman
Operations and Management Consultant Manager

Your license number is PH 35196.

Please use it in all correspondence with your board/council. Each licensee is solely responsible for notifying the Department in writing of the licensee's current mailing address and practice location address. If you have not received your renewal notice 90 days prior to the expiration date shown on this license, please visit www.FLHealthSource.gov and click "Renew A License" to renew online.

The Medical Quality Assurance Online Services Portal gives you the ability to manage your license to perform address updates, name changes and much more.

Section 8: Arrests, Detentions, Litigations, Arbitrations.	Yes	No
1. Have you ever been convicted of, or entered, a plea of guilty, guilty by mentally ill or nolo contendere to any criminal offense or civil violation, federal or state, for any reason whatsoever, regardless of the disposition of the event? (Except minor traffic citations.)		✔
2. If you answered "yes" to question 1, was the offense or violation related to drugs, including prescription drugs and/or controlled substances, the manufacturer or distribution of drugs or the practice of pharmacy?		
3. Have you ever had a civil or criminal record expunged or sealed by a court order?		✔
4. Have you, as an individual, member or a company, partner, or owner, director or officer of a corporation, ever been a party to a lawsuit as either a plaintiff or defendant (including any administrative proceedings before a licensing board) or of an arbitration as either a claimant or respondent? (Other than divorces.)		✔
5. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) been a party to a lawsuit (including any administrative proceedings before a licensing board), arbitration or bankruptcy?		✔
6. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer or director) ever appeared before any licensing agency or similar authority in or outside the State of Nevada for any reason whatsoever (including any disciplinary or board citation)?		✔
7. Have you ever been denied a personal license, permit, certificate or registration for a privileged, occupational or professional activity?		✔
8. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner member, officer or director) ever been refused a business license.		✔
9. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) ever surrendered a license, permit, certificate or registration relating to the pharmaceutical industry voluntarily or otherwise (other than upon voluntary closure of a manufacturer).		✔
10. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		✔

I, Nahla Ahmed, **certify that as the designated representative for**

Polomar Specialty Pharmacy llc,

that I (initial that you have read and meet the following requirements) (NAC 639.5005, NAC 639.5935):

1. NA I am at least 21 years of age;
3. NA I have been employed for at least 6,000 hours in a pharmacy or with a wholesaler in a capacity related to the dispensing and distribution of, and recordkeeping related to, prescription drugs.
4. NA I will be actively involved in and aware of the actual daily operations of the pharmacy or wholesaler;
5. NA I will be employed full-time in a managerial level position with the pharmacy or wholesaler;
6. NA I will be physically present at site of the pharmacy or at the facility of the wholesaler during regular business hours, except when the absence of the representative is authorized, including sick leaves, vacation leaves and other authorized absences; and
7. NA I will serve in this representative capacity for only one pharmacy or wholesaler at a time.

Section 8: Arrests, Detentions, Litigations, Arbitrations.	Yes	No
1. Have you ever been convicted of, or entered, a plea of guilty, guilty by mentally ill or nolo contendere to any criminal offense or civil violation, federal or state, for any reason whatsoever, regardless of the disposition of the event? (Except minor traffic citations.)		✔
2. If you answered "yes" to question 1, was the offense or violation related to drugs, including prescription drugs and/or controlled substances, the manufacturer or distribution of drugs or the practice of pharmacy?		
3. Have you ever had a civil or criminal record expunged or sealed by a court order?		✔
4. Have you, as an individual, member or a company, partner, or owner, director or officer of a corporation, ever been a party to a lawsuit as either a plaintiff or defendant (including any administrative proceedings before a licensing board) or of an arbitration as either a claimant or respondent? (Other than divorces.)		✔
5. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) been a party to a lawsuit (including any administrative proceedings before a licensing board), arbitration or bankruptcy?		✔
6. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer or director) ever appeared before any licensing agency or similar authority in or outside the State of Nevada for any reason whatsoever (including any disciplinary or board citation)?		✔
7. Have you ever been denied a personal license, permit, certificate or registration for a privileged, occupational or professional activity?		✔
8. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner member, officer or director) ever been refused a business license.		✔
9. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) ever surrendered a license, permit, certificate or registration relating to the pharmaceutical industry voluntarily or otherwise (other than upon voluntary closure of a manufacturer).		✔
10. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		✔

I certify under penalty of perjury that the information contained in this application is accurate, true and complete in all material respects. I understand that making any false representation in this application is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire application and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. In the event this application is approved I agree to comply with all applicable federal and state statutes and regulations governing this license or registration and understand that any violation may result in discipline.

Sterile Compounding Questionnaire

Rev (08/02/2022)

Approval of this completed questionnaire is required for an existing pharmacy, new pharmacy and/or out-sourcing facility applicant who wish to engage in preparing, compounding, dispensing, and furnishing sterile compounded products to Nevada patients or consumers.

Please provide a thorough response to the questions below and provide any necessary supporting documents.
-For a new pharmacy or out-sourcing facility applicant, submit this completed form with your application.
-For an existing pharmacy, send the completed form to the address indicated above.

Section 1: General Information

Pharmacy Name: Super Saver Pharmacy #4, LLC dba Rush Pharmacy

NV Pharmacy or Outsourcing facility license # (if applicable): new application

Physical Address: 1977 Alafaya Trail Suite 1121

City: Oviedo State: FL Zip: 32765

Mailing Address (if different from physical address): (same)

City: State: Zip:

Telephone: 407-542-0880 Toll Free # (NAC 639.708, NRS 639.23286): 407-542-0880

Fax: 866-913-8207 Contact Email: licensing@rushpharmacy.com

Website: www.rushpharmacy.com

Nevada Business License # (if applicable)

Supervising/Managing Pharmacist Name (NRS 639.220): Christian Cox

Supervising/Managing Pharmacist NV Pharmacist Registration #: 24245

Name of Person with direct knowledge of compounding procedures: Christian Cox

Email of Person with direct knowledge of compounding procedures: licensing@rushpharmacy.com

Telephone of Person with direct knowledge of compounding procedures: 407-542-0880

Section 2: Sterile Compounding Questions (Use a separate piece of paper if additional space is needed.)

1. What risk level sterile compounding will your facility be performing (check all that apply)? ☐ Low ☐ Medium ☒ High
If you marked "High", you must also complete section 4.

2. Will you be performing sterile hazardous drug compounding? ☒ Yes ☐ No
If you marked "Yes", you must also complete section 3.

3. List the sterile compounded products that you will be compounding for Nevada patients or consumers:
Semaglutide inj
Tirzepatide inj
Trimix inj

4. Will you be utilizing beyond use dates in excess of USP-797? ☒ Yes ☒ No

5. If yes, describe the additional testing performed on your products to validate the extended BUD:
Antimicrobial Effectiveness Test
Method of Suitability Test
Container Closure Integrity Test

6. What laboratory performs this additional testing?
Name: Eagle Analytical
Address: 11111 S. Wilcrest Dr., Suite 1000
City: Houston State: Tx Zip: 77099
Telephone: 800 745 8916

7. What is your procedure for visual inspection of compounded sterile products?
We use a light-Dark box to check for contaminants

8. How often do you perform glove fingertip and medial fill testing?
Every 6 mo

9. What is your policy if an employee fails a glove fingertip or media-fill test?
Must retest and can't compound until they pass.

10. Describe your initial and annual training program for all personnel performing sterile compounding:
Initial: 3rd Party Sterile Training program + Media fill and glove fingertip test
Annual: Online didactic CEs through Lyceum CE built in our software system (LifeFile)

11. Describe the cleaning procedure for your primary and secondary engineering controls, including the frequency of cleaning and the names of cleaning, disinfectant, sporicidal, and/or deactivation and decontamination agents used:
PEC: Cleaned daily when ~~used~~
- Sterile TBI followed by Sterile 70% IPA inside Hood
- Sterile Peridox followed by Sterile 70% IPA inside hood (monthly)

SEC: Cleaned daily when used (Floors, counters, carts, pass through, work surfaces)
- PreEmpt plus followed by Sterile 70% IPA if residue present

Monthly: includes daily cleans plus ceiling, door, door handle

12. Who performs the sterile compounding process at your facility?
Lead Sterile Technician: Heather C., CPhT, PTCB

13. Who is responsible and accountable for the sterile compounding process at your facility?
Christian Cox, PharmD (PIC)

14. If products are shipped/mailed, what shipping conditions are used to ensure product safety/efficacy?
All products are shipped in boxes.
Temperature sensitive products are shipped in insulated boxes w/ a 24oz ice pack wrapped in silver insulated bubble wrap.

Section 3: Sterile Hazardous Compounding Questions (Complete this section ONLY if you be performing Sterile Hazardous Compounding.) N/A

1. What type of primary engineering controls will you be using in your facility?
~~LAFW~~

2. Is your BSC or CACI vented 100% to the outside?	☐ Yes	☐ No
3. Do you have a negative pressure buffer room at your facility?	☐ Yes	☐ No
4. Will you be compounding with antineoplastic HDs or HD API?	☐ Yes	☐ No
5. If yes, are the drugs stored in an externally ventilated, negative pressure room?	☐ Yes	☐ No
6. Will you be utilizing a closed system transfer device?	☐ Yes	☐ No

7. If yes, list the name of the device:

8. What information is provided to the patient or consumer on the proper handling and disposal of hazardous drugs products/containers?

9. Describe your initial process for training new employees prior to compounding sterile hazardous drugs?

Section 4: Sterile High Risk Compounding Questions (Complete this section ONLY if you will be performing High Risk Compounding.)

1. List the specific high risk sterile products that your facility compounds:

Semaglutide inj
Tirzepatide inj
Trimix

2. What sterilization methods are utilized at your facility?

Autoclave: Stoppers and Seals, 121°C, 15 psi, x 20min
Oven: Glassware, 250°C x 30min (Beakers)
We use prestirilized vials

3. Does your facility utilize biological indicators? ☒ Yes ☐ No

4. If yes, describe how they are utilized:

Biological indicators are placed in both the autoclave and oven with each cycle. After cycle completion, the indicator is activated and incubated per manufacturer instructions. Items sterilized are not used until the incubation for the incubators are complete and shows no bacteria growth.

I certify under penalty of perjury that the information contained in this form is accurate, true and complete in all material respects. I understand that making any false representation in this form is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire form and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. In the event the form is approved I agree to comply with all applicable federal and state statutes and regulations governing this license or registration and understand that any violation may result in discipline.

Special Sterile Compounding

SUPER SAVER PHARMACY #4, LLC	License # 25118

DESIGNATED PERSON: A designated person(s) is identified who is responsible and accountable for the performance and operation of the facility and personnel involved in the preparation of CSPs. [USP 797 Section 1.1.3] *Designated Persons : Christian Cox, Patricia Cook.*	Yes
IMMEDIATE USE COMPOUNDING: When preparing immediate use preparations, written SOPs are in place for all requirements and all criteria are met including 1. aseptic technique, processes, and procedures; and, 2. personnel are trained and demonstrate competency in aseptic processes as they relate to assigned tasks and SOP's, 3. the preparation is performed in accordance with evidence-based information for physical and chemical compatibility of the drugs, 4. the preparation involves not more than 3 different sterile products, 5. Any unused starting component from a single-dose container is discarded, 6. Administration begins within 4 hours following the start of preparation and, 7. Unless directly administered by the preparer or administration is witnessed by the preparer, the CSP is labeled with the names and amounts of all active ingredients, the name or initials of the preparer and the 4 hour period within which administration must begin. [USP 797 Section 1.3]	N/A
BAG & VIAL SYSTEM: Docking of vial and bag systems for future activation and administration is performed in an ISO 5 environment and BUDs are not longer than those specified in the manufacturer's labeling. [USP 797 Section 1.4]	N/A
REPACKAGING: Repackaging of sterile products or preparations from its original container into another container are prepared according to all applicable USP 797 requirements. [USP 797 Section 1.1.2]	N/A
BLOOD-DERIVED OR BIOLOGICAL MATERIAL MANIPULATIONS: Compounding activities that require the manipulation of a patient's blood-derived or other biological material (e.g., autologous serum), are clearly separated from other compounding activities and equipment used in CSP preparation activities and controlled by specific SOPs to avoid cross-contamination. [USP 797 Section 1.1.2]	N/A

B. COMPONENT BUDs (Single and Multi-dose Containers) – ALL CATEGORIES

SINGLE DOSE CONTAINERS (SDCs): SDCs are entered or punctured only in an ISO Class 5 or cleaner air and are used up to 12 hours after initial entry or puncture if the labeled storage requirements during that 12-hour period are maintained. [USP 797 Section 15.1]	N/A
AMPULES: Opened SINGLE DOSE AMPULES are used immediately and not stored for any time period. [USP 797 Section 15.1]	N/A
MULTIDOSE CONTAINERS (MDCs): Upon initially entering or puncturing a conventionally manufactured MDC, the MDC is not used for more than 28 days unless otherwise specified by the manufacturer on the labeling. [USP 797 Section 15.2]	N/A
PHARMACY BULK PACKAGES: Conventionally manufactured pharmacy bulk packages are entered or punctured only in an ISO Class 5 PEC and must be used according to the manufacturer's labeling. [USP 797 Section 15.3] *per SOP 2.043*	Yes
SINGLE DOSE COMPONENT CSPs & STOCK SOLUTIONS: When single-dose CSPs or CSP stock solutions are used as a component to compound additional CSPs, the original compounded single-dose component CSP or CSP stock solution is entered or punctured in ISO Class 5 or cleaner air and is stored under the conditions upon which its BUD is based (e.g., refrigerator or controlled room temperature). Once punctured, the component CSP is used for sterile compounding for up to 12 hours or its assigned BUD, whichever is shorter, and any remainder is discarded. [USP 797 Section 16.2]	N/A
MULTI-DOSE CSPs USED AS A COMPONENT: Meet the criteria for anti-microbial effectiveness testing (see <51>) if aqueous, are stored under the conditions upon which the BUD is based, Multiple-dose CSP after initially entered or punctured, are not used for longer than the assigned BUD or 28 days, whichever is shorter. [USP 797 Sections 14.5 & 16.1]	N/A

C. CSP LABELING – ALL CATEGORIES

IMMEDIATE CONTAINER LABEL REQUIREMENTS: Immediate label of CSPs prominently and legibly display 1) assigned internal identification number; 2) active ingredient(s) and their amount(s), or concentration(s); 3) storage conditions if other than controlled room temperature; 4) BUD; 5) dosage form; 6) total amount or volume; 7) statement if CSP is a single dose container or multi-dose container. [USP 797 Section 13] *Sample label reviewed does not state the dosage form on Semaglutide/Pyridoxine 0.25mg/5mg/0.5ml inj vial label*	No
ADDITIONAL REQUIREMENTS FOR A CLASS II OR III FACILITY: 1) Identification of responsible compounding personnel and/or dispensing pharmacist;2) labels for batch-prepared CSPs must also include: Control or lot number, auxiliary labeling (including precautions); and device-specific instructions. Patient specific medications must also include patient's name, location the medication is to be delivered to and directions for use. [USP 797 Section 13] [F.A.C.64B16-28.108(10)] *Retail establishment*	N/A
LABELING REQUIREMENTS: Labeling of CSP displays 1) route of administration, 2) special handling instructions, 3) warning statements, and the compounding facility name and contact information if the CSP is sent outside of the facility in which it was compounded. [USP 797 Section 13] *Protect from Excess light warning statement is not specified in MFR or labels.* *Please update MFR and add auxiliary "Protect from Excess Light" labels.*	No
LABELING SOPs: Labeling procedures, as described in facility SOPs, are followed to prevent labeling errors and CSP mix-ups. [USP 797 Section 13] *Labels updated to reflect "Compounded Product" per SOP*	Yes
LABEL VERIFICATION: CSP labels are verified to ensure that they conform with the prescription or medication order, MFR (if required), and the CR. [USP 797 Section 13]	Yes

D. PERSONNEL PREPARATION & OBSERVATION – ALL CATEGORIES

CONTROLLED ACCESS: Access to the SEC is restricted to authorized personnel and required materials. [USP 797 Section 4.2.1]	Yes
UNNECESSARY ITEMS: Items not necessary for compounding (e.g., food, drinks, mints, gum, earbuds, headphones) are not introduced into the compounding environment. Accommodations are documented. [USP 797 Section 3.1]	Yes
UNNECESSARY PERSONAL ITEMS: Personnel remove outer garments (e.g., bandanas, coats, hats, jackets, sweaters, vests); cosmetics, and all hand, wrist, and other exposed jewelry, including piercings that may interfere with effectiveness of garbing. [USP 797 Section 3.1]	Yes
NAILS: Nails are clean and trimmed. Nail products (e.g., polish, artificial nails, and extenders) are not worn. [USP 797 Section 3.1]	Yes
REQUIRED PPE & GARBING ORDER: Personnel garb (don and doff) in an order that reduces risk of contamination per SOP. Required garb, manner of storage, and order or garbing is documented in SOP's. The minimum required PPE when preparing CSPs includes a garment with sleeves that fit around wrists and enclosed neck, shoe covers, head/facial hair cover, face mask, and sterile powder-free gloves. All PPE is low lint for Category 1 & 2 compounding or sterile if Category 3. [USP 797 Section 3.3] *CC had to repeat donning of gown the second time. Please reeducate on proper donning of coverall.*	Yes
NAIL PICK USE: Personnel clean under nails under warm running water with a disposable nail cleaner. Hands and forearms are washed with soap and water for at least 30 seconds prior to entering a compounding area. [USP 797 Section 3.2]	Yes
INAPPROPRIATE HAND HYGIENE PRACTICES: Brushes and hand dryers are not used, and soap containers are not refilled or topped off. [USP 797 Section 3.2]	Yes
ALCOHOL-BASED HAND RUB: Hands are sanitized with alcohol-based hand rub prior to donning gloves. Handrub is used prior to donning garb when hand hygiene is done outside of a classified area. [USP 797 Section 3.3] *Alcare Plus hand sanitizer is not hands free- noted posted on wall of ante room.*	Yes

STERILE GLOVES USED: Sterile gloves are donned in classified room or SCA. Skin is not exposed inside ISO 5 PEC (e.g., gloves are not donned or doffed). [USP 797 Section 3.3]	Yes
GARB STORAGE: Gowns and other garb are stored in a manner that minimizes contamination (e.g., away from sinks) and within a classified area or SCA. [USP 797 Section 3.3] *Garb stored in lidded tubs on bottom of cart to left of sink*	Yes
SANITIZATION OF STERILE GLOVES: Sterile 70% IPA is applied to gloves prior to compounding and regularly throughout the compounding process. [USP 797 Section 3.3]	Yes
SANITIZATION OF ITEMS INTRODUCED INTO PEC: Items are wiped with sterile 70% IPA and sterile low-lint wipers just prior to being introduced into the PEC and allowed to dry before use. [USP 797 Section 8.2]	Yes
CRITICAL SITES (e.g., vial stoppers, ampule necks, and intravenous bag septum's) are wiped with sterile 70% IPA in the PEC to provide both chemical and mechanical actions to remove contaminants. The sterile 70% IPA is allowed to dry before personnel enter or puncture stoppers and septum's or break the necks of ampules. [USP 797 Section 8.3]	Yes
EQUIPMENT DISINFECTION PRIOR TO ENTRY: Equipment brought into classified areas is wiped with a sporicidal disinfectant, EPA-registered disinfectant, or sterile 70% IPA using low-lint wipers. [USP 797 Section 9.1]	Yes

E. EQUIPMENT, SUPPLIES, & COMPONENTS – ALL CATEGORIES

DAILY ACD ACCURACY ASSESSMENT: An accuracy assessment is conducted for Automated Compounding Devices (ACDs) or similar equipment before the first use and again each day the equipment is used to compound CSPs. A daily record of accuracy measurements is maintained. Corrective actions are implemented if accuracy measurements are outside of manufacturer's specifications. [USP 797 Section 9.1] *per Compounding 360 and noted on sample batch record.*	Yes
EQUIPMENT SOPs: Written SOPs for the calibration, maintenance, cleaning, and use of equipment are established and are based on the manufacturer's recommendations. Procedures are followed and records are maintained. [USP 797 Section 9.1] *Autoclave Tuttnauer SN 23070683 calibrated 9-13-23 (almost due-was being recalibrated on day of inspection-report is pending)* *Baxter Repeater Pump SN PL0024668 inspected 5/31/24 by IMS* *Crosstex SPS Dry Block Incubator Lot# 78853 QA completed 3-12-24* *Ohaus Scale SN C404529341 and SNC232605120 calibrated 3-3-24* *Large Incubator 1 SN F-04349 calibrated 12-21-23* *Small Incubator 2 SN P-06514 calibrated 1-30-24* *Binder Dry Heat Oven calibrated 2-21-24* *Ohaus PH meter SN 2353799489 CofC 5/21/24* *Millex Integrity Tester Jan 2024* *Sonicu monitor for temp calibrated 5/24/24*	Yes
COMPOUNDING EQUIPMENT & SUPPLIES: Equipment and supplies used in compounding (e.g., needles, syringes, filters, tubing sets, beakers, utensils) are of suitable composition that surfaces in direct contact with components are not reactive or sorptive and surfaces in direct contact with CSPs are sterile and depyrogenated. [USP 797 Section 9.2]	Yes
COMPONENT STORAGE: Components are handled and stored in a manner that prevents contamination, mix-ups, and deterioration and under temperature, humidity, and lighting conditions consistent with those indicated in official monographs or specified by the suppliers and/or manufacturers. [USP 797 Section 9.3.4] *API's are stored in freezer under Sonicu temp monitoring system.*	Yes

F. SEGREGATED COMPOUNDING AREA: Category 1

CATEGORY 1 MAXIMUM BUDs & COMPOUNDING AREA REQUIREMENTS: Only Category 1 CSPs are compounded in an ISO class 5 PEC located within a SCA and are assigned a BUD of 12 hours or less at controlled room temperature or 24 hours or less when refrigerated. [USP 797 Section 1.5, 4.2.1]	
DEDICATED AREA FOR SCA: The SCA is separated from areas not directly related to compounding, and all surfaces (walls, floors, counters, and equipment) are clean, uncluttered, and dedicated to compounding. [USP 797 Section 4.2.1]	
SCA LOCATION: The SCA is located away from unsealed windows, doors that connect to the outdoors, and traffic flow, all of which may adversely affect the air quality in the PEC. SCA is not located where environmental control challenges (e.g., restrooms, warehouses, or food preparation areas) could negatively affect the air quality of the PEC within the SCA. A sink is not located within 1 meter of PEC. [USP 797 Section 4.2.1]	
ITEMS WITHIN SCA: Only furniture, equipment, and other materials necessary for performing compounding activities are located within the SCA. [USP 797 Section 4.2.1]	

G. FACILITIES & SECONDARY ENGINEERING CONTROLS – Categories 2 and 3

STERILE SUITE CONSTRUCTION: The ISO-classified anteroom and buffer room are separated from the surrounding unclassified areas of the facility by fixed walls and doors, and controls are in place. [USP 797 Section 4.2.1] *ISO 8 Ante room, with a door backed into that opens into the ISO 7 non-HD buffer room.*	Yes
HEPA FILTERED AIR: Air supplied to the cleanroom suite is introduced through HEPA filters located in the ceiling of the buffer room and anteroom. [USP 797 Section 4.2.1]	Yes
AIR RETURNS: Air returns in the cleanroom suite are low on the wall unless a visual smoke study demonstrates an absence of stagnant airflow. [USP 797 Section 4.2.1] *Low wall vent returns*	Yes
LINE OF DEMARCATION: The anteroom has a line of demarcation to separate the clean side from the dirty side. [USP 797 Section 4.2.1]	Yes
SURFACES & WALLS: The surfaces of ceilings, walls, floors, doors, door frames, fixtures, shelving, work surfaces, counters, and cabinets in the classified area are smooth, impervious, free from cracks and crevices, and non-shedding. Walls are constructed of/or covered with durable material. [USP 797 Section 4.3.1] *Rust noted on left upper leg of steel table was fixed during inspection.*	Yes
CEILINGS & FLOORS: Inlaid panels of ceilings are caulked around each panel to seal them to the support frame. Junctures between the ceiling and the walls and between the walls and the floor are sealed to eliminate cracks and crevices where dirt can accumulate. Floors include coving to the sidewall, or the juncture between the floor and the wall are caulked. [USP 797 Section 4.3.1] *Ceilings tiles are caulked*	Yes
LEDGES & OVERHANGS: Overhangs and ledges are easily cleanable, and the exterior lens surface of ceiling light fixtures are smooth, mounted flush, and sealed. [USP 797 Sections 4.3.1]	Yes
FURNITURE, EQUIPMENT, & MATERIALS: Only furniture, equipment, and other materials necessary for performing compounding activities are permitted in a classified area or SCA. Tacky mats are not placed within ISO-classified areas. [USP 797 Sections 4.2.1 & 4.5] *Underside of PEC appeared clean and was verified to be PVC Celtec Foam per letter from manufacturer. See attached.*	Yes

CARTS: Carts used to transport components or equipment into classified areas are constructed from nonporous materials with cleanable casters and wheels. [USP 797 Section 4.5] *Steel carts*	Yes
TEMPERATURE & HUMIDITY MONITORING: Temperature and humidity in the cleanroom suite are controlled through a heating, ventilation, and air conditioning (HVAC) system. The temperature and humidity are monitored in each room of the cleanroom suite each day that compounding is performed, either manually or by a continuous recording device. They are documented at least once daily or stored in the continuous recording device and are retrievable and are reviewed as described in the facility's SOP. [USP 797 Section 4.2] *Sonicu temp and humidity monitoring system transfers to Compounding 360. Monitor noted during walkthrough of ante room.*	Yes
PRESSURE DIFFERENTIATION MONITORING & DOCUMENTATION: Facility maintains a minimum differential positive pressure of 0.020-inch water column between the buffer room and anteroom and anteroom and unclassified area. A pressure differential monitoring device is used to continuously monitor the pressure differentials. Quantitative results from the pressure monitoring device are reviewed and documented at least daily on the days when compounding is occurring. [USP 797 Sections 4.2.5] *Documentation maintained in Compounding 360*	Yes
PEC LOCATION: PECs are located in a buffer room in a manner that minimizes conditions that could increase the risk of microbial contamination (strong air currents, personnel traffic, or air streams from HVAC system(s)) and allows for cleaning around the PEC. [USP 797 Sections 4.2.2 & 4.2.3]	Yes
INTEGRATED VERTICAL LAMINAR FLOW ZONES: IVLFZ is separated from ISO Class 7 area with a physical barrier and there is full coverage of HEPA filters above the work surface. [USP 797 Section 4.2.3]	N/A

H. CERTIFICATION AND RECERTIFICATION – ALL CATEGORIES

PEC CERTIFICATION: The PEC is certified initially and every 6 months to meet ISO Class 5 or better conditions, during dynamic operating conditions. [USP 797 Sections 4.1 & 5.0] *Last completed May 20, 2024 and June 25, 2024 under dynamic conditions.*	Yes
SEC CERTIFICATION: SECs are certified initially and every 6 months to meet ISO Class 7 or 8 or better conditions, during dynamic operating conditions (including presterilization activities if applicable). Anterooms providing access to positive-pressure buffer rooms are at least ISO 8 and at least ISO 7 for anterooms providing access to negative-pressure buffer rooms. Classified areas are recertified when changes occur that could affect airflow or air quality [USP 797 Sections 4.1, 4.2.6, & 5.0] *June 25, 2024 updated to report "1 person weighing in hood while unit tested"*	Yes
ISO CLASS 7 & 8 REQUIREMENTS: ISO Class 7 rooms maintain a minimum of 30 total HEPA-filtered ACPH during dynamic operating conditions, at least 15 ACPH come from the HVAC through HEPA filters located in the ceiling. ISO Class 8 rooms maintain a minimum of 20 total HEPA-filtered ACPH during dynamic operating conditions; 15 ACPH must come from the SEC. The ACPH from HVAC, ACPH contributed from the PEC, and the total ACPH are documented on the certification report. [UPS 797 Section 4.2.4] *June 25, 2024 Buffer room (ISO 7) 41.7 ACPH including 11 ACPH from the PEC, Ante room 39.8 ACPH.*	Yes
DOCUMENTATION OF PERSONNEL PRESENT DURING CERTIFICATION: The number of personnel present in each PEC and SEC during total particle counts and dynamic airflow smoke-pattern tests is documented on the certification report. [USP 797 Section 5.0] *Documented as 1 person present*	Yes
PEC DYNAMIC SMOKE PATTERN TEST: Smoke pattern tests are performed under dynamic conditions initially to demonstrate minimal disruption in airflow and repeated if equipment is placed in a different location. Smoke pattern tests are performed under dynamic conditions every 6 months to demonstrate unidirectional airflow and sweeping action over and away from the preparation(s). [USP 797 Section 5.0]	Yes
ROBOTICS / ROBOTIC ENCLOSURES: Robotic enclosures used as a PEC or placed within a PEC have a dynamic airflow smoke pattern test is performed initially and at least every 6 months that confirms 1) the robotic device is properly integrated into the facility, 2) there is no turbulence or refluxing at any critical site(s), 3) room air does not enter the PEC where sterile products and/or preparations may be exposed, and 4) all processes can be performed without introducing contamination to the DCA(s). [USP 797 Section 4.2.3]	N/A
HEPA FILTER INTEGRITY TESTING: HEPA filter integrity testing for both SECs & PECs is conducted initially and every 6 months as part of total particle testing. [USP 797 Section 5.0]	Yes
MONITORING DEVICE CERTIFICATION: Temperature and humidity monitoring devices are verified for accuracy at least every 12 months or as required by the manufacturer. [USP 797 Section 4.2]	N/A
CONTAINMENT DEVICES USED FOR PRESTERILIZATION PROCEDURES: CVEs, BSCs, or CACIs used for presterilization procedures are certified at least once every 6 months. [USP 797 Section 4.2.6] *Certifier PASC certified CVE 3/7/24 and 9/6/24 (past Friday)*	Yes
CERTIFICATION REPORT REVIEW BY DESIGNATED PERSON: All certification and recertification records are reviewed by the designated person(s). A corrective action plan is implemented and documented in response to any out-of-range results on certification report and data reviewed to confirm that the actions taken have been effective. [UPS 797 Section 5.0]	Yes

I. RABS

LOCATION: If used to prepare Category 2 or Category 3 CSP's RABS are located in e cleanroom suite with en ISO Class 7 or better buffer room with an ISO Class 8 or better anteroom. [USP 797 Section 4.2.3]	
RECOVERY TIME: When a RABS is used, the recovery time after opening the transfer chamber to achieve ISO Class 5 air is documented and internal procedures are developed to ensure that adequate recovery time is allowed after opening and closing the RABS. [USP 797 Section 4.2.3]	
STERILE GLOVES: are worn over gloves attached to RABS sleeves. [USP 797 Section 3.3]	

J. CATEGORY 2 CSPs WITHOUT STERILITY TESTING

CATEGORY 2 COMPOUNDING ENVIRONMENT: Category 2 CSPs are compounded in an ISO class 5 PEC located within an ISO classified anteroom and buffer room. [USP 797 Sections 4.1 & 14.3]	
CATEGORY 2 BUDs FROM STERILE COMPONENTS WITHOUT STERILITY TESTING: Category 2 CSPs compounded aseptically from all sterile starting components and in the absence of sterility testing do not exceed the following BUDs: 4 days room temperature, 10 days refrigerated, or 45 days frozen. [USP 797 Section 14.3]	
CATEGORY 2 BUDs FROM NONSTERILE COMPONENTS WITHOUT STERILITY TESTING: Category 2 CSPs compounded aseptically from one or more nonsterile starting components and in the absence of sterility testing do not exceed the following BUDs: 1 day room temperature, 4 days refrigerated, or 45 days frozen. [USP 797 Section 14.3]	

K. CATEGORY 2 EXTENDED BUD REQUIREMENTS

CATEGORY 2 BUDs FOR ASEPTICALLY PROCESSED CSPs WITH STERILITY TESTING: Category 2 CSPs compounded aseptically, and which have passed sterility testing do not exceed the following BUDs: 30 days room temperature, 45 days refrigerated, or 60 days frozen. [USP 797 Section 14.3]	Yes

CATEGORY 2 BUDs FOR TERMINALLY STERILIZED CSPs WITHOUT STERILITY TESTING: Category 2 CSPs terminally sterilized and in the absence of sterility testing do not exceed the following BUDs: 14 days room temperature, 28 days refrigerated, or 45 days frozen. [USP 797 Section 14.3] *Pharmacy states they will not be terminally sterilizing CSP's.*	N/A
CATEGORY 2 BUDs FOR TERMINALLY STERILIZED CSPs WITH STERILITY TESTING: Category 2 CSPs terminally sterilized, and which have passed sterility testing do not exceed the following BUDs: 45 days room temperature, 60 days refrigerated, or 90 days frozen. [USP 797 Section 14.3]	N/A
ANTIMICROBIAL EFFECTIVENESS TESTING FOR MULTI-DOSE CSPs: Aqueous multiple-dose CSPs (e.g., injectables and ophthalmics) pass USP <51> compliant antimicrobial effectiveness testing once for each unique formulation and each container closure system in which it is packaged. Bracketing studies are allowed. [USP 797 Section 14.5 & 16.1] *Available AET USP<51> testing from Eagle Analytical for Semaglutide 2.5mg/0.5ml Injection Lot LG339000163 (under conditions of refrigeration-Scan RDI Method Suitability Test), Semaglutide 2.5mg/Pyridoxine 5mg/0.5ml Lot LG339000181(refrigerated), and Tirzepatide 15mg/Pyridoxine 5mg/0.5ml (refrigerated) Lot LG339000179.*	Yes
CONTAINER CLOSURE TESTING: Container closure integrity testing is performed once for each unique CSP formulation and container closure system in which it is packaged. For multi-dose (i.e., preserved CSPs), container integrity testing is performed per fill volume for each unique CSP formulation and container closure system. [USP 797 Sections 14.3.3 & 14.5]	Yes
MULTI-DOSE, NON-PRESERVED AQUEOUS CSPs: Multi-dose, non-preserved aqueous CSPs (i.e., topical, or ophthalmic solutions) are assigned are prepared as a Category 2 CSP, for use by a single patient, and labeled to indicate that once opened, the CSP must be discard after 24 hours if stored at controlled room temperature or 72 hours when stored under refrigeration. [USP 797 14.5]	N/A
OUTSOURCED STERILITY TESTING: Sterility testing is performed for all Category 2 CSPs assigned a BUD requiring sterility testing according to USP <71> or a validated alternative and noninferior method. Membrane Filtration as described in USP <71> is the preferred method when the formulation allows. [USP 797 Section 12.2] *Lots specifically compounded for testing-sent to Eagle for AET testing, Method Suitability testing and Container closure testing-per Life File dispense records-no dispensing from these lots to patients.*	N/A
INHOUSE STERILITY TESTING: Sterility testing is according to USP <71> or a validated alternative and noninferior method. Membrane filtration is used if appropriate and filters are rinsed according to USP <71>. Direct inoculation is done only when membrane filtration cannot be carried out. Volume inoculated does not exceed 10% of the culture media volume. Growth promotion test has been done on the media with the 5 specified organisms (not more than 100 CFU) according to USP <71>. TSB or SCD is incubated at 20-25C for 14 days; FTM is incubated at 30-35C for 14 days. (2 incubators present).	N/A
METHOD SUITABILITY TEST: A Method Suitability Test (or equivalent validation for alternative testing methods) is performed to validate suitability of the sterility testing method. [USP 797 Section 12.2] *Available from Eagle Analytical for Semaglutide 2.5mg/0.5ml Injection Lot LG339000163 (under conditions of refrigeration-Scan RDI Method Suitability Test), Semaglutide 2.5mg/Pyridoxine 5mg/0.5ml Lot LG339000181(refrigerated), and Tirzepatide 15mg/Pyridoxine 5mg/0.5ml (refrigerated) Lot LG339000179.*	Yes
MAXIMUM BATCH SIZE: The maximum batch size for all CSPs requiring sterility testing is 250 final yield units. [USP 797 Section 12.2] *Batch record reviewed: Semaglutide/Pyridoxine 2.5mg/0.5ml Inj 2ml-qantity made for testing was 216 vials.*	Yes
STERILITY TESTING QUANTITY & VOLUME DETERMINATION: The minimum quantity of each container tested for sterility is per USP <71> Table 2 and the number of containers tested in relation to the batch size is per USP <71> Table 3. For 1-39 CSPs compounded as single batch, sterility testing is performed on a number of containers or units equal to 10% of the number of CSPs prepared rounded to the next whole number. [USP 797 Section 12.2] *Quantity to be sent for sterility testing is noted on Master Formula sheet. Advised to add the table to SOP 2.04 Release Inspections and Testing -it does refer to USP <71> and <85>.*	Yes
INVESTIGATION OF STERILITY TEST FAILURES: Sterility tests resulting in failure undergo prompt investigation into possible causes and requires identification of the microorganism(s) as well as evaluation of sterility testing procedure, compounding facility, process, and/or personnel that may have contributed to the failure. Impact to other CSPs is assessed. Investigation and resulting corrective actions are documented. [USP 797 Section 12.2]	N/A
ENDOTOXIN TESTING: Category 2 injectable CSPs compounded from one or more nonsterile component(s) and assigned a BUD that requires sterility testing are tested for bacterial endotoxins. [USP 797 Section 12.3] *Reviewed dispensing records from Life file, nothing dispensed, hence no endotoxin testing*	N/A
ENDOTOXIN LIMITS: In the absence of a bacterial endotoxin limit in an official USP–NF monograph or other CSP formula or scientifically supported source, the CSP does not exceed the endotoxin limit calculated as described in USP <85> for the appropriate route of administration for humans or largest recommend dose per weight for nonhuman species. [USP 797 Section 12.3]	N/A

L. CATEGORY 3 CSPs, BUDs, & RELATED REQUIREMENTS

CATEGORY 3 REQUIREMENTS: All requirements associated with Category 3 compounding (e.g., garbing, cleaning, environmental monitoring) apply to all personnel entering the buffer room where Category 3 CSPs are compounded and always apply regardless of whether Category 3 CSPs are compounded on a given day. [USP 797 Section 14.4.2]	
STERILE/SINGLE USE GARB: When compounding Category 3 CSPs, skin is not exposed in buffer room (i.e., face and neck are covered) and all low lint outer garb is sterile, including sterile sleeves over RABS gauntlet sleeves. Disposable garb items are not reused. [USP 797 Section 3.3]	
STERILIZED/REUSABLE GARB: Non-disposable garb is not reused without being laundered and resterilized with a validated cycle. Disinfection procedures described in facility SOPs are followed before reusing goggles, respirators, and other equipment. [USP 797 Section 3.3]	
CATEGORY 3 BUDs FOR ASEPTICALLY PROCESSED CSPs: Category 3 CSPs aseptically processed, sterility tested, and passing all applicable tests (including stability indicating assay, endotoxin, and other dosage form appropriate tests) do not exceed the following BUDs: 60 days room temperature, 90 days refrigerated, or 120 days frozen. Shorter BUDs are assigned when physical or chemical stability of the CSP is less than the maximum allowable Category 3 BUDs for aseptically processed CSPs. [USP 797 Section 14.4.3]	
CATEGORY 3 BUDs FOR TERMINALLY STERILIZED CSPs: Category 3 CSPs aseptically processed, sterility tested, and passing all applicable tests (including stability indicating assay, endotoxin, and other dosage form appropriate tests) do not exceed the following BUDs: 90 days room temperature, 120 days refrigerated, or 180 days frozen. Shorter BUDs are assigned when physical or chemical stability of the CSP is less than the maximum allowable Category 3 BUDs for terminally sterilized CSPs. [USP 797 Section 14.4.3]	
MAXIMUM BATCH SIZE: Category 3 CSP batch sizes do not exceed 250 final yield units. [USP 797 Section 12.2]	
STABILITY INDICATING ASSAYS: All Category 3 CSP formulations are supported by data obtained using a validated stability-indicating analytical method that can distinguish active ingredients from degradants and impurities and quantify the amount of active ingredient. CSPs are prepared according to the exact formulation, components, and packaged in a container closure system of the same materials of composition. Facilities have documentation of the stability study, its results, and the method validation available for review. [USP 797 Section 14.3.3]	
STERILITY TESTING: All category 3 CSPs and batches undergo sterility testing performed according to USP <71> or a validated alternative and noninferior method. [USP 797 Sections 12.2 & 14.4.4]	
METHOD SUITABILITY TEST: A Method Suitability Test (or equivalent validation for alternative testing methods) is performed to validate suitability of the sterility testing method for each formulation. [USP 797 Section 12.2]	

STERILITY TESTING QUANTITY & VOLUME DETERMINATION: The minimum quantity of each container tested for sterility is per USP <71> Table 2 and the number of containers tested in relation to the batch size is per USP <71> Table 3. For 1-39 CSPs compounded as single batch, sterility testing is performed on a number of containers or units equal to 10% of the number of CSPs prepared rounded to the next whole number. [USP 797 Section 12.2]	
INVESTIGATION OF STERILITY TEST FAILURES: Sterility tests resulting in failure undergo prompt investigation into possible causes and requires identification of the microorganism(s) as well as evaluation of sterility testing procedure, compounding facility, process, and/or personnel that may have contributed to the failure. Impact to other CSPs is assessed. Investigation and resulting corrective actions are documented. [USP 797 Section 12.2]	
ENDOTOXIN TESTING: Category 3 injectable CSPs compounded from one or more nonsterile component(s) are tested for bacterial endotoxins. [USP 797 Section 12.3]	
ENDOTOXIN LIMITS: In the absence of a bacterial endotoxin limit in an official USP–NF monograph or other CSP formula or scientifically supported source, the CSP does not exceed the endotoxin limit calculated as described in USP <85> for the appropriate route of administration for humans or largest recommend dose per weight for nonhuman species. [USP 797 Section 12.3]	
PARTICULATE MATTER TESTING: Category 3 injectable CSPs undergo USP <788> (Particulate Matter in Injections) and ophthalmic solutions undergo USP <789> (Particulate Matter in Ophthalmic Solutions) test once per formulation with acceptable results. [USP 797 Section 14.3.3]	
ANTIMICROBIAL EFFECTIVENESS TESTING FOR MULTI-DOSE CSPs: Aqueous multiple-dose CSPs (e.g., injectables and ophthalmic) pass USP <51> compliant antimicrobial effectiveness testing once for each unique formulation and each container closure system in which it is packaged. Bracketing studies are allowed. [USP 797 Section 14.5 & 16.1]	
CONTAINER CLOSURE TESTING: Container closure integrity testing is performed once for each unique CSP formulation and container closure system in which it is packaged. For multi-dose (i.e., preserved multi-dose CSPs), container closure integrity testing is also performed per fill volume for each unique CSP formulation and container closure system. [USP 797 Sections 14.3.3 & 14.5]	
MULTI-DOSE, NON-PRESERVED AQUEOUS CSPs: Multi-dose, non-preserved aqueous CSPs (i.e., topical, or ophthalmic solutions) are prepared for use by a single patient, and labeled to indicate that once opened, the CSP must be discard after 24 hours if stored at controlled room temperature or 72 hours when stored under refrigeration. [USP 797 14.5]	
MULTI-DOSE COMPONENT CSPs: Multiple-dose CSP after initially entered or punctured, are not used for longer than the assigned BUD or 28 days, whichever is shorter. [USP 797 Section 16.1]	

M. PERSONNEL TRAINING & COMPETENCIES - ALL CATEGORIES

TRAINING PROGRAM & SOP: Facility maintains a written training program and corresponding SOP which defines required trainings, frequency of training and the process for evaluating the performance of individuals who compound, have direct oversight of compounding personnel, perform in-process checks, final verification and dispensing of CSP's. [USP 797 Section 2]	Yes
INITIAL CORE SKILLS KNOWLEDGE & COMPETENCY ASSESSMENT: Before beginning to compound CSPs independently or have direct oversight of compounding personnel, personnel complete training and can demonstrate knowledge of principles and competency of skills for performing sterile manipulations and achieving and maintaining appropriate environmental conditions as applicable to their assigned job functions. [USP 797 Section 2.1] *Following trainings are documented: Repeater pump training, Dry Heat oven use and maintenance training, Steam sterilizer training, Use of bubble point device and Use of pH Meter, Training in surface sampling.* *Reviewed "Aseptic technique and related practices" checklist which was updated to include "Disinfect sterile gloves with sterile 70% IPA every time gloved hands leave and reenter the PEC (ie. operating the repeater pump)."*	Yes
INITIAL GLOVED FINGERTIP & HAND HYGIENE/GARBING COMPETENCY: Before beginning to compound independently or have direct oversight of compounding personnel, personnel successfully complete an initial gloved fingertip (GFT) competency no fewer than 3 separate times, with a documented visual audit while performing hand hygiene and garbing procedures. GFT samples are collected before applying sterile 70% IPA to gloves. [USP 797 Section 2.2] *Reviewed documentation of 3 separate gowning and garbing with each GFT for 3 compounders*	Yes
GLOVED FINGERTIP INCUBATION: Documentation includes the name of the person evaluated; evaluation date and time; media and components used to include manufacturer, expiration date, and lot number; starting temperature for each interval of incubation; dates of incubation; results and identification of the observer and personnel reading and documenting the results. USP 797 Section 2.2]	Yes
INITIAL MEDIA FILL & ASEPTIC TECHNIQUE ASSESSMENT: Before beginning to compound independently or have direct oversight of compounding personnel, personnel who compound or have direct oversight of compounding successfully complete an initial aseptic manipulation competency evaluation which consists of a visual observation, media-fill testing followed by a gloved fingertip and thumb sampling on both hands, and surface sampling of the direct compounding area. [USP 797 Section 2.3] *CC PC, HC completed 7/3/24*	Yes
MEDIA INCUBATION: Documentation includes the name of the person evaluated, evaluation date and time, media and components used to include their manufacturer or supplier, expiration dates and lot numbers, starting temperature for each interval of incubation, dates of incubation, the results, and the names or other identification of the observer and the person who reads and documents the results. [USP 797 Section 2.3]	Yes
CATEGORY 1 AND 2-ONGOING GFT & GARBING ASSESSMENT: After initial garbing competency evaluations, compounding personnel complete garbing competency evaluation and GFT every 6 months for Category 1 and Category 2 CSP's. Direct oversight personnel who do not compound complete garbing competency and GFT every 12 months. GFTs are appropriately incubated. [USP 797 Section 2.2]	Yes
CATEGORY 1 AND 2-ONGOING MEDIA FILL & ASSESSMENT: After initial aseptic manipulations competency evaluations, compounding personnel complete aseptic technique competency, media fill, GFTs, and surface sampling of DCA every 6 months for Category 1 and Category 2 CSP's. Direct oversight personnel who do not compound complete media fill every 12 months. GFTs and surface samples are appropriately incubated. [USP 797 Section 2.3]	Yes
ONGOING KNOWLEDGE & COMPENTENCY OF CORE SKILLS: Training and knowledge assessment of sterile compounding principles or core skills is completed at least every 12 months. [USP 797 Section 2.1]	Yes
FAILED COMPETENCY INVESTIGATION: Initial and ongoing competency assessment failures are investigated, remediated, and documented in a Corrective Action Plan. [USP 797 Sections 2.2 & 2.3]	Yes
STAFF TRAINING IN VIABLE AIR AND SURFACE SAMPLING: Personnel are trained and competent in air and surface sampling procedures to ensure accurate and reproducible sampling. [USP 797 Section 6.1]	Yes

FACILITY COMPOUNDS CATEGORY 3

CATEGORY 3-ONGOING GFT & GARBING ASSESSMENT: After initial garbing competency evaluations, compounding personnel complete garbing competency and GFT every 3 months for Category 3 CSP's. Direct oversight personnel who do not compound complete garbing competency and GFT every 12 months. GFTs are appropriately incubated. [USP 797 Section 2.2]	
CATEGORY 3-ONGOING ASEPTIC PROCESSING COMPETENCY: Aseptic competency is repeated at least one time every 3 months for personnel compounding Category 3 CSPs. The simulation must capture elements that could potentially affect the sterility of the CSP. Immediately following the media-fill test, glovad fingertip and thumb sampling is performed on both hands and surface sampling of the direct compounding area. Direct oversight personnel who do not compound must complete media fill every 12 months. [USP 797 Section 2.3]	

N. MICROBIOLOGICAL AIR AND SURFACE MONITORING: ALL CATEGORIES

ENVIRONMENTAL MONITORING PROGRAM & SOPs: The microbiological air and surface monitoring program is clearly described in the facility's SOPs, which includes a diagram of the sampling locations, procedures for collecting samples, frequency of sampling, size of samples (e.g., surface area, volume of air), time of day of sampling in relation to activities in the compounding area, and action levels that trigger corrective action. [USP 797 Section 6] *Per 'Microbiological Air and Surface Monitoring' policy*	Yes
VIABLE AIR SAMPLING: Volumetric active air sampling using an impaction air sampler collecting at least 1000L of air is conducted in each classified area [e.g., ISO Class 5 PEC and ISO Class 7 and 8 room(s)] during dynamic operating conditions and is completed at least every 6 months. [USP 797 Section 6.2] *Documented on viable sampling report completed on 3/28/24, and 5/20/24*	Yes
AIR IMPACTION DEVICE: Device is serviced and calibrated according to the manufacturer's recommendations. [USP 797 Section 6.1] *per certifier PASC, last calibrated 10/14/23, due October 2024.*	Yes
SURFACE SAMPLING: Microbiological surface sampling is conducted in all classified areas and pass-through chambers under dynamic operating conditions and performed at least once monthly. [USP 797 Section 6.3] *Provided trending data from Compounding 360.*	Yes
GROWTH MEDIA: A general microbiological growth media that supports the growth of bacteria and fungi is used and a COA from the manufacturer is available. Growth media used for surface sampling contains neutralizing agents (e.g., lecithin and polysorbate 80). [USP 797 Sections 6.2 & 6.3] *Cultivate TD100 media paddles*	Yes
INCUBATION: Samples are incubated at 30°C - 35°C for 48 hours and 20°C - 25°C for an additional 5 days; if dual growth media are used, incubate one media device at 30°C - 35°C for 48 hours and the second media device at 20°C - 25°C for 5 days. The incubator temperature is monitored during incubation, either manually or by a continuous recording device, and results are reviewed and documented as described in the facility's SOPs. Incubators are placed in a location outside of the sterile compounding area. [USP Sections 6.2.2 (Box 5) & 6.3.2 (Box 6)]	Yes
ENVIRONMENTAL MONITORING TREND ANALYSIS: Regular review of sampling data is performed to detect trends and review of trending data is documented. [USP 797 Section 6.1] *Trend analysis documented in Compounding 360 aka Pharmacy Stars*	Yes
CORRECTIVE ACTION: When microbial growth exceeds action levels, the cause is investigated, and corrective action is taken; corrective actions taken are reviewed for effectiveness. An attempt to identify microorganisms at the genus level is made. [USP Sections 6.2.3 & USP 6.3.3] *per 'Corrective and Preventative Actions' policy*	Yes

FACILITY COMPOUNDS CATEGORY 3

CATEGORY 3-VIABLE AIR SAMPLING: Volumetric air sampling is completed within 30 days prior to the commencement of any Category 3 compounding and at least monthly thereafter regardless of the frequency of compounding Category 3 CSPs.Air sampling sites are selected in all classified areas. [USP 797 6.2.1]	
CATEGORY 3-SURFACE SAMPLING: Surface sampling for any Category 3 CSPs, is completed in all classified areas, and pass-through chambers connecting to classified areas, prior to assigning a BUD longer than BUD limits for Category 2 CSPs (defined in Table 13 of USP 797) and at least weekly on a regularly scheduled basis regardless of the frequency of compounding Category 3 CSPs. [USP 797 6.2.2]	
CATEGORY 3-BATCH SURFACE SAMPLING: Surface sampling is conducted within the PEC used to prepare Category 3 CSPs, at the end of each batch before cleaning and disinfection occurs, unless a self-enclosed robotic device is used. When a self-enclosed robotic device is used as the PEC, surface sampling is conducted at least once daily at the end of compounding operations before cleaning and disinfection occurs. [USP 797 Section 6.3.2]	

O. CLEANING AND DISINFECTING: ALL CATEGORIES

CLEANING SOPS: The frequency, method(s), documentation requirements, and location(s) of cleaning, disinfecting, and applying sporicidal disinfectants are described in written SOPs; use of egents is in eccordance with manufacturer's instructions, procedures, and in adherence with minimum wet contact times. [USP 797 Section 7] *pPer SOP 2.007 (Cleaning the Sterile Compounding Equipment)*	Yes
CLEANING PERSONNEL: Cleaning and disinfecting activities are performed by trained and appropriataly garbed personnel using facility-approved agents and procedures. Cleaning personnel demonstrate knowledge and competency of core skills related to cleaning, disinfection, and maintenance of environmental conditions initially and at least once every 12 months. [USP 797 Sections 7 & 2.1]	Yes
REUSABLE GARB: Disinfaction procedures described in facility SOPs are followed before reusing goggles, respirators, and other equipment used. [USP 797 Section 3.3]	N/A
DAILY PEC CLEANING & DISINFECTION: Equipment and all interior surfaces of the PEC are cleaned and disinfected daily on days when compounding occurs and when surface contamination is known or suspected. [USP 797 Section 7] *Per SOP 2.007 (Cleaning the Sterile Compounding Equipment), and Compound 360 documentation.*	Yes
CATEGORY 1 AND 2-MONTHLY PEC SPORICIDAL DISINFECTION: Equipment and all interior surfaces of the PEC, including underneath of removable work trays, are cleaned with a sporicidal agent monthly. [USP 797 Section 7]	Yes
DAILY SEC & SCA CLEANING & DISINFECTION: Work surfaces, floors, sink surfaces, and pass-through chambers are cleaned and disinfected daily on days when compounding occurs. [USP 797 Section 7]	Yes
CATEGORY 1 AND 2 -MONTHLY SEC & SCA SPORICIDAL DISINFECTION: A sporicidal disinfectant is applied to work surfaces, pass-through chambers, storage shelving and bins, equipment outside of PEC's, sink surfaces, floors, ceilings*, walls, doors, and doors frames at least once monthly. *SCA ceilings are only cleaned, disinfected, and have sporicidal agents applied when visibly soiled and when surface contamination is known or suspected. [USP 797 Section 7]	Yes
CLEANING & DISINFECTING AGENTS: Cleaning and disinfecting agents are EPA-registered. If a one-step disinfectant cleaner is not used, surfaces are cleaned prior to being disinfected. [USP 797 Section 7] *Facility use TB1 - 3300, Sterile 70% IPA, Sterile and Non-sterile Peridox RTU, and Prompt Plus for cleaning.*	Yes
STERILE AGENTS USED INSIDE PECs: Cleaning, disinfecting and sporicidal agents used within PECs are sterile. Written SOPs describe the time period during which, once opened, sterile cleaning and disinfecting agents, supplies, and sterile 70% IPA may be reused sterile water is used to dilute concentrated cleaning agents used inside of PECs (if applicable). [USP 797 Section 7.1.1]	Yes
CLEANING AGENT RESIDUE REMOVAL IN PECs: In a PEC, sterile 70% IPA is applied after cleaning, disinfecting, or after one-step disinfectant cleaner or sporicidal agent application to remove residue. [USP 797 Section 7].	Yes
PEC SANITIZATION WITH STERILE 70% IPA: Sterile 70% IPA is applied to the horizontal work surface, including removable trays, immediately before initiating compounding and at least every 30 minutes. If a compounding process takes more than 30 minutes, the work surface is disinfected immediately after the end of the compounding process. Sterile 70% IPA is allowed to dry. [USP 797 Section 7]	Yes
CLEANING SUPPLIES & TOOLS: All cleaning and disinfecting supplies (e.g., wipers, sponges, pads, and mop heads), except for tool handles and holders, are low lint. Supplies used inside PECs are sterile. [USP 797 Section 7.1.2]	Yes
REUSABLE CLEANING TOOLS: Reusable cleaning tools (e.g., mop frames) are made of cleanable materials and are cleaned and disinfected before and after each use. Reusable tools are dedicated for use in the classified areas or SCA and are not removed. Mops used in HD compounding areas, are dedicated for use only in those areas. [USP 797 Section 7.1.2]	Yes

MATERIALS MOVEMENT INTO CLASSIFIED AREAS: Before any item is introduced into the clean side of anteroom(s), placed into pass-through chamber(s), or brought into the SCA, it is wiped with a sporicidal disinfectant, EPA-registered disinfectant, or sterile 70% IPA using low-lint wipers by personnel wearing gloves. Dwell time is followed. [USP 797 Section 8.1] *Per SOP 2.031 (Movement of Materials – Non Hazardous Drugs), and correctly simulated by Pharmacy technician HC*	Yes

FACILITY COMPOUNDS CATEGORY 3

CATEGORY 3-WEEKLY SPORICIDAL CLEANING OF PECs: Weekly cleaning using a sporicidal agent is performed on all internal surfaces of PEC and equipment in PEC's. [USP 797 Section 7]	
CATEGORY 3-WEEKLY SPORICIDAL CLEANING OF SECs: Weekly cleaning using a sporicidal agent includes application on work surfaces outside the PEC, pass-through chambers, and floors. [USP 797 Section 7]	
CATEGORY 3 -MONTHLY SEC SPORICIDAL DISINFECTION: A sporicidal disinfectant is applied to work surfaces, pass-through chambers, storage shelving and bins, equipment outside of PEC's, sink surfaces, floors, ceilings, walls, doors, and doors frames at least once monthly. [USP 797 Section 7]	

P. COMPOUNDING CSPs FROM NONSTERILE COMPONENTS OR SUPPLIES – CATEGORY 2 & 3

PRESTERILIZATION ACTIVITY CONTAINMENT ENCLOSURES: Pre-sterilization procedures, such as weighing and mixing of nonsterile components, occur in ISO Class 8 or better environment (e.g., anteroom or buffer room) and are performed in single-use containment glove bags, CVEs, BSCs, or CACIs. [USP 797 Section 4.2.6]	Yes
LOCATION OF STERILE & NONSTERILE PECs: PECs used for sterile and nonsterile compounding (e.g., pre-sterilization procedures) are placed in separate rooms unless the buffer room can maintain an ISO Class 7 classification during particulate generating activities. Co-located PECs are at least 1 meter apart and particle-generating activities are not performed during sterile compounding processes [USP 797 Section 4.2.1; USP 800 Section 5.3]	Yes
COMPONENT SOPs: Written SOPs address the selection, receipt, evaluation, handling, storage, and documentation of all CSP components including ingredients and container closures. [USP 797 Section 9.3] *SOP 2.052 reviewed, documentation of receipt maintained in Life File*	Yes
COMPONENT QUALITY & COA: APIs and components comply with the criteria in the USP-NF (if one exists for inactive components) and have a COA including specifications and test results showing the API or component meets expected quality. APIs and other components labeled "not for pharmaceutical use", "not for injectable use", "not for human use", or equivalent are not used in CSPs. [USP 7 Section 9.3.1]	Yes
API MANUFACTURERS: APIs are manufactured by an FDA-registered facility in the U.S. or comply with the laws and regulations of the applicable regulatory jurisdictions outside of the U.S. [USP 797 Section 9.3.1] *API Manufacturers Semaglutide Lot GIM9820231208, Tirzepatide from Biopeptek*	Yes
STERILE, DEPYROGENATED SUPPLIES: Supplies in direct contact with CSPs are sterile and depyrogenated. A COA or similar conformance documentation is reviewed. [USP 797 Section 9.3.1]	Yes
COMPONENT RECEIPT: Upon receipt, the external packaging of components is examined and components of unacceptable quality or showing deterioration are promptly labeled as rejected and segregated from active stock. [USP 797 Section 9.3.2] *Receipt is documented in Life File*	Yes
COMPONENT EXPIRATION DATING: Upon receipt, APIs and components are inspected for a visible manufacturer expiration date. Components lacking expiration dates are assigned an expiration date no more than 1 year after receipt and both the date of receipt and facility assigned expiration date is clearly marked on the component packaging. [USP 797 Section 9.3.2] *See bar coded stickers with BUD's*	Yes
COMPONENT EVALUATION BEFORE USE: All components are reinspected before use to ensure correct identify, appropriate quality, within expiry date, have been stored under appropriate conditions. [USP 797 Section 9.3.3] *Added to SOP 2.05 Components used for Sterile Compounded products line 8 -that components are reinspected before use. Advised to add this to the compounding record to demonstrate procedures follow SOP.*	Yes

Q. STERILIZATION OF CSPs - CATEGORY 2 & 3

CSP Sterilization Overview *CSP's are not terminally sterilized at this time. Primary method is filtration.*	Yes
STERILIZATION METHOD(S) APPROPRIATENESS: Sterilization method(s) used do not degrade CSP physical and chemical stability (e.g., affecting its strength, purity, or quality) or packaging integrity. [USP 797 Section 10] *Sterilization method used prior to submitting for testing of AET,CCT, MS is filtration.*	Yes
STERILITY ASSURANCE LEVEL (SAL) FOR TERMINAL STERILIZATION METHODS: Terminal sterilization method(s) (e.g., steam, dry heat, or irradiation) achieve a SAL or PNSU (probability of a nonsterile unit) of (0.000001) [USP 797 Section 10] *Terminal sterilization is not the present method of sterilization.*	N/A
STERILIZATION OF INJECTABLES WITHIN 6 HOURS OF COMPLETION: Injectable CSPs containing nonsterile components or that come into contact with nonsterile devices (e.g., containers, tubing) during compounding are sterilized within 6 hours of completion. [USP 797 Section 10] *Time stamps in Life File provide confirmation that this matches SOP 2.051 for batches made for method suitability testing*	Yes
STERILIZATION SOPs include: 1) A description of terminal sterilization and depyrogenation process(es) used in the preparation of CSPs and/or compounding equipment, including the temperature, pressure (if applicable), duration, permissible load conditions for each cycle, and the use of biological indicators and endotoxin challenge vials (ECVs). 2) Personnel training and competency assessment on sterilization and depyrogenation methods and equipment used by the facility. 3) Schedule and method for establishing and verifying the effectiveness of methods selected. 4) Methods for maintaining and cleaning the sterilizing and depyrogenation equipment. [USP 797 Section 10] *Trainings documented in Compounding 360*	Yes
CSP Sterilization by Filtration	Yes
STERILIZING FILTERS: Sterilizing filters used are sterile, depyrogenated, have a nominal pore size of 0.22 µm or smaller, and are appropriate for pharmaceutical use. Sterilizing filters are certified by the manufacturer to retain at least 10,000,000 microorganisms of a strain of Brevundimonas diminuta per square centimeter of upstream filter surface area. Filters are chemically and physically compatible with all ingredients in the CSP (e.g., water-miscible alcohols may damage filter integrity); chemically stable at the pressure and temperature conditions that will be used; and have enough capacity to filter the required volumes. [USP 797 Section 10.2]	Yes
BUBBLE POINT TESTING: Sterilizing filters are subjected to the manufacturers' recommended integrity testing, such as a post-use bubble point test. If multiple filters are required for the compounding process, each of the filters passes a filter-integrity test. [USP 797 Section 10.2] For failed BP testing, CSP is discarded or, after investigating, refiltered not more than one time. [USP 797 Section 10.2] *Training in Compounding 360.* *Inspector observed a bubble point done by Designated Person CC which did not demonstrate essential concepts of pulling air into syringe. Advised to retrain*	Yes
CSP PREFILTRATION: When CSPs are known to contain excessive particulate matter, prefiltration is performed using a filter of larger nominal pore size (e.g., 1.2 µm) or a separate filter of larger nominal pore size placed upstream of (i.e., prior to) the sterilizing filter. [USP 797 Section 10.2]	N/A

CSP Sterilization by Steam *CSP's are not terminally sterilized by steam*	No
STEAM STERILIZATION CYCLES: Sterilization cycles allow for an exposure duration that includes sufficient time for the entire contents of the CSP to reach and remain at the sterilizing temperature during the duration of the sterilization period. Items are placed in the autoclave to allow steam to reach CSPs without entrapment of air. [USP 797 Section 10.3]	N/A
BIOLOGICAL INDICATOR USE: The effectiveness of steam sterilization is verified and documented with each sterilization run or load by using appropriate biological indicators (e.g., spores of Geobacillus stearothermophilus) and other confirmation methods. [USP 797 Section 10.3] *No CSP will be terminally sterilized, however the firm uses BI's and incubates them at 55-60C for 24 hrs after autoclaving bromobutyl rubber stoppers per Mckesson distributor for G.S. BI's.*	N/A
CSP PREFILTRATION: Immediately before filling containers that will be sterilized via steam, CSP solutions are passed through a filter with a nominal pore size of not larger than 1.2 µm for removal of particulate matter. [USP 797 Section 10.3]	N/A
AUTOCLAVE WATER SOURCE: The steam supplied in the autoclave is generated using water per the manufacturer's recommendation. [USP 797 Section 10.3]	Yes
CALIBRATED DATA RECORDER: A calibrated data recorder or chart is used to monitor each cycle and to examine for cycle irregularities (e.g., deviations in temperature or pressure). [USP 797 Section 10.3] *While CSP's are not sterilized by steam, components that come into contact with the CSP are-Data recorder has 16 PSI documented and temps and time frame of 20 minutes per policy for items such as Bromobutyl rubber stoppers sterilized by steam.*	Yes
CSP Sterilization by Dry Heat *Not terminally sterilizing CSP's by dry heat*	No
DRY HEAT STERILIZATION CYCLES: Dry heat sterilization cycles allow for an exposure duration that includes sufficient time for the entire contents of CSPs and other items to reach and remain at the sterilizing temperature for the duration of the sterilization period. [USP 797 Section 10.4]	N/A
CSP PREFILTRATION: Immediately before filling ampules and vials that will be sterilized by dry heat, CSP solutions are passed through a filter with a nominal pore size of not larger than 1.2 µm for removal of particulate matter. [USP 797 Section 10.4]	N/A
CALIBRATED DATA RECORDER: The calibrated oven is equipped with temperature controls and a timer. A calibrated data recorder or chart is used to monitor each cycle and the data is reviewed to identify cycle irregularities (e.g., deviations in temperature or exposure time). [USP 797 Section 10.4]	N/A
BIOLOGICAL INDICATOR USE: The effectiveness of the dry heat sterilization method is verified and documented with each sterilization run or load using appropriate biological indicators (e.g., spores of Bacillus atrophaeus) and other confirmation methods (e.g., temperature-sensing devices). [USP 797 Section 10.4]	N/A

R. DEPYROGENATION OF EQUIPMENT - CATEGORY 2 & 3

DEPYROGENATION SOPs include: 1) A description of terminal sterilization and depyrogenation process(es) used in the preparation of CSPs and/or compounding equipment, including the temperature, duration, permissible load conditions for each cycle, and the use of biological indicators and endotoxin challenge vials (ECVs). 2) Personnel training and competency assessment on sterilization and depyrogenation methods and equipment used by the facility. 3) Schedule and method for establishing and verifying the effectiveness of methods selected. 4) Methods for maintaining and cleaning the sterilizing and depyrogenation equipment. [USP 797 Section 10] *Permissible load conditions, considerations for the cycle are now included-as noted in SOP 2.051 (se diagrams and pictures of loads with ECV's)*	Yes
DEPYROGENATION CYCLE: Dry heat depyrogenation is used to render glassware, metal, and other thermostable contalners and components pyrogen free. The exposure period includes sufficient time for items to reach the depyrogenation temperature; items remain at the depyrogenation temperature for the duration of the depyrogenation period. [USP 797 Section 10.1]	Yes
DEPYROGENERATION VIA RINSING: Non-thermostable items are depyrogenated by multiple rinses with sterile, nonpyrogenic water (e.g., Sterile Water for Injection or Sterile Water for Irrigation) and then thoroughly drained or dried immediately before use in compounding. [USP 797 Section10.1]	Yes
ENDOTOXIN CHALLENGE VIAL (ECV) USE: The effectiveness of the dry heat depyrogenation cycle(s) is established initially and verified annually using ECVs to demonstrate the cycle achieves a greater than or equal to 3-log endotoxin reduction. The effectiveness of the depyrogenation cycle is re-established if there are changes to the depyrogenation cycle. Cycle verifications are documented. [USP 797 Section 10.1] *Documented per Eagle Lab Oven Validation using Charles River ECV's to demonstrate a 3.6 log reduction*	Yes

S. MASTER FORMULATION AND COMPOUNDING RECORDS – ALL CATEGORIES

MASTER FORMULATION RECORD (MFR): A MFR is creatad for all CSPs prepared from nonsterile ingredient(s) or CSPs prepared for more than one patient. [USP 797 Section 11.1] *Examples of CSP Formulations that are planned for initial testing are:* *Semaglutide/Pyridoxine 2.5mg/5mg-0.5 ml Inj 2ml vials, Tirzepatide/Pyridoxine 15mg/5mg-0.5 ml Inj Lot vials*	Yes
MFR MODIFICATIONS: Any changes or alterations to an MFR are approved and documented per facility's SOPs. [USP 797 Section 11.1] *Per SOP 2.028*	Yes
MFR DOCUMENTATION: An MFR includes at least the following: 1) Name, strength or activity, and dosage form of the CSP; 2) Identities, amounts of all ingredients, and, if applicable, relevant characteristics of components; 3) Type and size of container closure system(s); 4) Complete instructions for preparing the CSP including equipment, supplies, a description of the compounding steps, and any special precautions; 5) Physical description of the of the final CSP; 6) BUD and storage requirements; 6) Stability reference; 7) Quality control procedures; 8) other information as needed to describe the compounding process and ensure repeatability. [USP 797 Section 11.1 (Box 9)]	Yes
COMPOUNDING RECORD (CR): A CR is created for all Category 1, Category 2, and Category 3 CSPs. A CR is created for immediate-use CSPs prepared for more than one patient. [USP 797 Section 11.2] *Pharmacy was able to prepare a sample CR on day of inspection.*	Yes
CR DOCUMENTATION: A CR includes at least the following: 1) Name, strength or activity, and dosage form of the CSP; 2) Date and time of preparation of the CSP; 3) Assigned internal identification number (e.g., prescription, order, or lot number); 4) A method to identify the individuals involved in the compounding process and individuals verifying the final CSP; 5) Name of each component; 6) Vendor, lot number, and expiration date for each component for CSPs prepared for more than one patient and for CSPs prepared from nonsterile ingredient(s); 7) Weight or volume of each component; 8) Strength or activity of each component; 9) Total quantity compounded; 10) Final yield; 11) Assigned BUD and storage requirements; 12) Results of QC procedures. And, if applicable, 13) MFR reference for the CSP; and 14) Calculations made to determine and verify quantities and/or concentrations of components. [USP 797 Section 11.2 (Box 10)] *Pharmacy was able to provide a sample CR from Life File for Semeglutide/Pyridoxine 2.5mg/5mg-0.5ml Inj Lot ID LG339000345 with a documented 45 day BUD.* *Final yield documented as 225 vials. Also available was a sample batch record Tirzepatide/Pyridoxine 15mg/5mg-0.5ml Inj lot LG339000179, batch yield of 91 vials.*	Yes
STERILIZATION CYCLE DOCUMENTATION: The date, run, and load numbers of the steam or dry heat sterilizer used to sterilize a CSP are documented on the CR if applicable. [USP 797 Sections 10.3 & 10.4] *Oven cycle and Autoclave cycle is listed as an ingredient in Life File CR for both formulations.*	Yes

T. RELEASE INSPECTION AND TESTING – ALL CATEGORIES

RELEASE TESTING PROCEDURES: All release testing procedures (e.g., visual inspections and testing) are included in facility documentation such as MFRs and SOPs. [USP 797 Section 12]	Yes
VISUAL INSPECTION: CSPs are visually inspected before release and dispensing to determine whether the 1) physical appearance of the CSP is as expected (e.g., free of inappropriate visible particulates or other foreign matter, discoloration, or other defects), 2) container closure integrity is intact (e.g., checking for leakage, cracks in the container, or improper seals), 3) CSP and its labeling match the prescription or medication order. [USP 797 Section 12.1] *Outcome of visual inspection is not clearly stated to include a check for leeks on sample CR for Semeglutide /Pyridoxine 2.5mg/5mg-0.5ml Inj (2ml) states "all vials are clear and non-turbid".* *Per USP<797>, 2022/2023 version, "The inspection also must include a visual inspection of container closure integrity (e.g., checking for leakage, cracks in the container, or improper seals)."*	No
DELAYED DISPENSING VISUAL INSPECTION: When CSPs are not released or dispensed on the day of preparation, a visual inspection is conducted immediately before its release to ensure the CSP is free from any defects such as precipitation, cloudiness, or leakage, which could develop during storage. [USP 797 Section 12.1] *Per SOP 2.04*	Yes
CSP REJECTION & QUARANTINE: CSPs found to be of unacceptable quality (e.g., observed defects) are promptly rejected, clearly labeled as rejected, and segregated from active stock. [USP 797 Section 12.1] *Not dispensing at this time, per SOP 2.040*	Yes
INVESTIGATION OF OOS RESULTS: Out-of-specifications results and defects indicating sterility or stability problems are investigated to determine the root cause and a corrective action plan is implemented and documented per facility SOPs. [USP 797 Section 12 & 12.1] *Has not compounded for release, just testing*	N/A

U. CSP HANDLING, STORAGE, PACKAGING, SHIPPING, & TRANSPORT – ALL CATEGORIES

STORAGE AREA TEMPERATURE MONITORING: Temperature in CSP & component storage areas is monitored at least once daily and recorded on a log on days when the facility is open or by a continuous temperature recording device; temperature data is readily retrievable. Monitoring equipment is calibrated or verified for accuracy as recommended by the manufacturer or every 12 months. [USP 797 Sections 9.3 & 19.1] *Sonicu -documentation available in Compounding 360 and by graph on paper documents-calibrated 5/24/24*	Yes
TEMPERATURE EXCURSIONS: When CSPs have been exposed to temperature excursions above or below storage temperature limits for the CSP, a Designated Person determines whether the CSP has retained its integrity or quality. CSPs are discarded if the impact of the excursion cannot be determined. [USP 797 19.1] *Per USP <797>, 2022/2023 version, "To help ensure that CSP quality is maintained during storage at the compounding facility, personnel must monitor conditions in the storage areas. A controlled temperature area (see {659}) must be established and monitored to ensure that the temperature remains within the appropriate range for the CSP."*	Yes
CSP PACKAGING: CSP packaging and shipping materials are selected to protect CSPs from damage, leakage, contamination, degradation, adsorption and prevent inadvertent exposure to transport personnel. [USP 797 Section 19.2] *Per SOP 2.053*	Yes
SHIPPING & TRANSPORTING: Modes of transport are selected that are expected to deliver properly packaged CSPs in an undamaged, sterile, and stable condition. Special handing instructions are provided and/or affixed to the exterior of the container when applicable. [USP 797 Section 19.2] *Per SOP 2.053*	Yes

V. STERILE QUALITY PROGRAM, SOP's & DOCUMENTATION- ALL CATEGORIES

QA/QC PROGRAM & SOPs: A Quality Assurance (QA) and Quality Control (QC) program is documented in facility SOPs and formally establishes a system of 1) adherence to procedures, 2) prevention and detection of errors and other quality problems, 3) evaluation of complaints and adverse events, and 4) appropriate investigations and corrective actions. The QA/QC SOPs describe the roles, duties, and training of personnel responsible for each aspect of the QA program. [USP 797 Section 18] *Per SOP 2.046*	Yes
INVESTIGATIONS & CAPAs: A designated person(s) follows up to ensure investigations are conducted and corrective actions are taken if problems, deviations, failures, or errors are identified or when complaints or adverse reactions are reported. A complete record of each reported complaint and adverse reaction is created and retained. Investigations and corrective actions are documented. [USP 797 Sections 17, 18.2, & 18.3] *CAPA Form dated 5/23/24 is still under way to investigate OOS humidity -as recently as 8/27/24 corrections are being made to the HVAC.*	Yes
ADR & COMPLAINT DOCUMENTATION: A complete record of each reported complaint and adverse reaction is created and retained per USP 797. [USP 797 Section 18.1] *New Business, nothing dispensed. SOP 2.002 (Adverse Events of Compounded Preparations*	N/A
RECALL PROCEDURES & SOP: If CSPs are dispensed or administered before the results of release testing are known, procedures are in place to immediately notify the prescriber of a failure of specifications with a potential to cause patients harm; determine the severity of the problem and urgency for implementation/completion of recall; identify patients (or other points of distribution) who have received affected CSP; recall any unused dispensed CSPs; quarantine remaining stock in the pharmacy; investigate if other lots are affected and recalled if needed; conduct investigation and document reason for the failure. [USP 797 Section 18] *Has not dispensed for release ye per Life File records. SOP 2.037 (Recall of Compounded Preparations)*	N/A
RECALL REPORTING: Recalls are reported to the appropriate regulatory body as required by the laws and regulations of the applicable regulatory jurisdiction. [USP 797 Section 18.1]	N/A
ANNUAL QA/QC REVIEW: The overall QA/QC Program is reviewed at least once every 12 months by the Designated Person(s); the review is documented, and corrective actions are taken if needed. [USP 797 Section 18] *New Business*	N/A
ANNUAL SOP REVIEW: Facility sterile compounding SOPs are reviewed every 12 months by the Designated Person(s); the review is documented. Changes to SOP are made only by the Designated Person and documented. Acknowledgement of revisions to SOP's are communicated to all personnel. [USP 797 Section 17] *New Business*	N/A
STERILE SOPs: Facility maintains SOPs covering all aspects of the sterile compounding process and other support activities. [USP 797 Section 17]	Yes
STERILE COMPLIANCE DOCUMENTATION: Facility has and maintains written or electronic documentation to demonstrate compliance with requirements in this chapter. [USP 797 Section 20] *Sterility and Endotoxin testing will be done subsequent to compounding for release*	N/A
DOCUMENTATION RETENTION: Documentation complies with all laws and regulations of the applicable regulatory jurisdiction. Records are legible and stored in a manner that prevents their deterioration and/or loss. All required documentation for a particular CSP is readily retrievable for at least 4 years after preparation. [USP 797 Section 20] *New Pharmacy*	N/A

W. HAZARDOUS DRUG HANDLING & COMPOUNDING – ALL CATEGORIES

DESIGNATED PERSON: The entity has a Designated Person who is qualified and trained to be responsible for implementing appropriate HD procedures, overseeing compliance with USP 800 requirements, ensuring environmental control of the storage and compounding areas, monitoring HD facility operations, testing, and acting on results. [USP 800 Section 4]	
HAZARD COMMUNICATION PROGRAM (HCP): Facility has SOPs to ensure effective training regarding proper labeling, transport, storage, and disposal of HDs and use of Safety Data Sheets. The HCP and HD SOPs include a written plan describing 1) how USP 800 requirements are implemented, 2) HD chemical container labeling with the identity of the material and appropriate hazard warnings, 3) readily accessible location of HD chemical SDSs known and accessible by all personnel, 4) HD risk training and information provided to all personnel with HD exposure risk before initial HD handling work assignment and whenever hazard changes, 5) personnel of reproductive capability written acknowledgement of understanding of HD handling risks. [USP 800 Section 8]	
ASSESSMENT OF RISK: All HD drugs follow the requirements of USP 800 unless an assessment of risk (AOR) is performed. If an assessment of risk approach is taken, the entity must document what alternative containment strategies and/or work practices are being employed for specific dosage forms to minimize occupational exposure. The AOR is reviewed at least every 12 months and minimally contains the type of HD, dosage form, risk of exposure, packaging, and manipulation. [USP 800 Section 2]	
LIST OF HAZARDOUS DRUGS: Facility maintains a list of HDs that includes any items on the current NIOSH that the entity handles. The list is reviewed every 12 months and whenever a new agent or dosage form is used. [USP 800 Section 2]	
CONTAINMENT REQUIREMENTS: All antineoplastic HDs requiring manipulation and HD active pharmaceutical ingredients (APIs) on the NIOSH list follow all the requirements of USP 800. [USP 800 Section 2, Box 1]	
HD HANDLING SOPs: SOPs are created and maintained for the safe handling of HDs used by the facility. SOPs are reviewed annually; review is documented, and any revisions are communicated to personnel handling HDs. [USP 800 Section 17]	
HD HANDLING AREAS, SIGNAGE, & ACCESS: Signage designating HD handling areas are prominently displayed and access to HD handling areas is restricted to authorized personnel. Designated areas are available for receipt, unpacking, and storage of HDs; and sterile HD compounding. [USP 800 Section 5]	
HD RECEIPT: There is a designated area for the receipt of antineoplastic HDs or API's that is neutral/normal or negative pressure relative to surrounding areas. HDs are not unpacked from external shipping containers in sterile compounding areas or in positive pressure areas. HDs are delivered immediately after unpacking to HD storage area. [USP 800 Section 5.1]	
HD RECEIVING SOPs: Facility SOPs for receiving HDs that include required PPE during HD receiving and handling, a tiered approach to assessing HD packaging and shipping containers for signs of damage or breakage (e.g., visible signs of leakage, sounds of broken glass), management of known or suspected damaged HD containers, and transport to HD storage location(s) for nondamaged containers. [USP 800 Section 10]	
HD STORAGE: HDs are stored to prevent spillage or breakage, off floors, and in areas appropriate for natural disasters. Antineoplastic HDs and HD API are stored separately from non-HDs to prevent contamination and personnel exposure. HD storage areas are externally ventilated and negative-pressure rooms with at least 12 ACPH. [USP 800 Section 5.2]	
HD REFRIGERATED STORAGE: Refrigerated antineoplastic HDs are stored in a dedicated refrigerator, in a negative pressure area with at least 12 ACPH. Pass through refrigerators are not used. [USP 800 Section 5.2]	
STERILE HDs COMPOUNDED IN A C-SCA: C-SCA maintains a minimum of 12 ACPH of HEPA- filtered air and has negative pressure to adjacent areas of -0.01" w.c. to -0.03" w.c. [USP 800, sections 5.3.2 Table 3]	
C-SEC DESIGN AND ENGINEERING CONTROLS: The C-SEC has fixed walls physically separated from other preparation areas, is externally ventilated , and has 30 ACPH. [USP 800 Section 5.3.2 Table 3]	
C-SEC DESIGN AND PRESSURE DIFFERENTIALS: The C-SEC has negative pressure to adjacent areas of -0.01" w.c. to -0.03" w.c. [USP 800 Sections 5.3.2 Table 3]	
C-SEC ACCESS VIA ANTE ROOM: The classified area used for entry into the negative pressure buffer room has fixed walls and maintains a minimum of 30 ACPH of HEPA-filtered air, positive pressure of +0.02" w.c. to all adjacent unclassified areas, and ISO7 or better classification. [USP 800 Section 5.3.2]	
C-SEC ACCESS VIA NON-HD BUFFER: A negative-pressure HD buffer entered exclusively through a non-HD buffer room contains a line of demarcation (LOD) within the negative-pressure buffer room for donning/doffing HD PPE and a method a transport of HDs, HD CSPs, and HD waste into and out of the HD buffer (e.g., pass-through chamber). Pass through chambers are included in semi-annual facility certification. [USP 800 Section 5.3.2]	
C-SEC SINK & SAFETY EQUIPMENT: A sink is available for hand washing and an eyewash station and/or other emergency safety precautions meeting applicable laws and regulations are readily available and located where operation does not interfere with ISO classifications. Sinks are located at least 1 meter from the entrance into the buffer room (or at least 1 meter from the C-PEC in a C-SCA). [USP 800 Sections 5.3 & 5.3.2]	
C-PEC LOCATION AND VENTING: All C-PECs used for sterile HD compounding (e.g., CACIs or BSCs), are located within a C-SEC or C-SCA, externally vented, and maintain an ISO 5 or better air quality. [USP 800 Section 5.3.2]	
C-PEC OPERATION & OUTAGES: C-PECs operate continuously if supplying some or all the negative pressure in the C- SEC or if used for sterile compounding. During power outages, repairs, or relocation, C-PEC use is suspended immediately. Once C-PEC power is restored, all PEC surfaces are decontaminated, cleaned, and disinfected, and compounding is not resumed until the manufacturer's specified recovery time has elapsed. [USP 800 Section 5.3]	
REQUIRED HD PPE: When compounding HDs, gowns, head, hair, shoe covers, and two pairs of chemotherapy gloves are donned per facility SOPs. For all other HD handling activities, including HD receipt, storage, transport, cleaning activities, spill control, and waste disposal, facility SOPs define the required PPE based on the OSP and AOR. Disposable PPE is not reused; reusable PPE is decontaminated and cleaned after each use. [USP 800 Section 7]	
GLOVES: Chemotherapy gloves are tested to ASTM standard D6978 (or its successor) and are powder free. Gloves are inspected for physical defects. Gloves are changed when torn, punctured, or contaminated. Personnel wash hands with soap and water after removing gloves. [USP 800 Section 7.1]	
GOWNS: HD gowns are disposable, resistant to permeability by HDs, close in back, are long sleeved, closed cuff, and seamless. Gowns are changed per manufacturer's permeation information; if no data is available, HD gowns are change every 2-3 hours or immediately after a spill or splash. Gowns are limited to HD handling areas and are donned over the sterile compounding frock. [USP 800 Section 7.2, USP 797 Section 3.3]	
SHOE COVERS: When compounding, a second pair of shoe covers is donned before entering the C-SEC and doffed when exiting the C-SEC. [USP 800 Section 7.3]	
EYE AND FACE PROTECTION: Appropriate eye (goggles) and face protection (face shield) are worn when there is a risk for spills or splashes or when working outside of a C-PEC. Surgical masks are not usad when respiratory protection is required per SOP and/or AOR as protection from HD exposure. [USP 800 Section 7.4]	
PPE DISPOSAL: HD PPE is disposed of appropriately prior to exiting the C-SEC. Chemotherapy gloves and sleeve covers (if used during compounding) are carefully removed and discarded immediately into an appropriate waste container inside of the C-PEC or contained in a sealable bag for discarding outside of the C-PEC. [USP 800 Section 7.6]	

INITIAL HD TRAINING & COMPETENCY: Personnel who handle HDs are trained and demonstrate competency per their job function before independently handling HDs and when a new HD medication, process, SOP, or equipment is introduced. Training minimally includes an overview of the entity's HD list and their risks; review of HD SOPs; proper use of PPE, equipment, and devices; prevention of HD exposures and spills; HD exposure and spill response; use of a spill kit, PPE, and NIOSH-certified respirators; and HD disposal. Based on job duties, personnel receive additional HD training in HD acquisition and receipt, preparation, compounding, dispensing, labeling, storage, and transport. Training and competency assessments are documented. [USP 800 Sections 8, 9, 11.1, 16, & 17]	
ONGOING HD COMPETENCY ASSESSMENT: HD handling competencies are reassessed and documented at least every 12 months. [USP 800 Section 9]	
HD ATTESTATION: Personnel of reproductive capability have a written acknowledgement attesting to their understanding of HD handling risks. [USP 800 Section 8]	
BUDs OF STERILE HDs COMPOUNDED IN A C-SCA: BUDs and storage conditions are in accordance with USP 797 requirements for Category 1. HD CSPs compounded in a C-SCA are prepared from only sterile starting components. [USP 800 Section 5.3.2] CSTDs are used as a supplemental engineering control only. [USP 800 Section 5.3 and Table 3]	
BUDs OF STERILE HDs COMPOUNDED IN A C-SEC: BUDs and storage conditions in accordance with USP 797 requirements for Category 2, or Category 3 CSPs. [USP 800 Section 5.3.2]	
NONSTERILE-TO-STERILE HD COMPOUNDING: HD CSPs compounded from nonsterile sterting components are compounded inside a sterile suite. [USP 800 Section 5.3.2]	
DEDICATED HD EQUIPMENT: Disposable or cleanable equipment for compounding (e.g., mortar and pestle, graduated cylinder, spatulas) is dedicated for use with HDs. [USP 800 Section 13]	
NON-HD COMPOUNDING IN A C-PEC: Non-HDs compounded in a HD C-PEC are placed in protective outer wrapping, labeled for PPE handling precautions, and treated as an HD. [USP 800 Section 5.3.2 and Table 3]	
D/D/C/D SOPs: Written procedures for decontamination, deactivation, cleaning, and disinfection are available and followed. Cleaning of sterile compounding areas also complies with USP 797 requirements. Procedures include agents used, dilutions (if used), frequency, and documentation requirements. [USP 800 Section 15]	
DEACTIVATION, DECONTAMINATION, CLEANING & DISINFECTION (D/D/C/D): All areas where HDs are handled (receiving, compounding, transport, administering, disposal) and all reusable equipment and devices are deactivated/decontaminated, cleaned, and then disinfected. [USP 800 Section 15]	
TRAINING OF D/D/C/D: Personnel are trained in deactivation/decontamination, cleaning, and disinfection to protect themselves and the environment from contamination. [USP 800 Section 15]	
PPE DONNED DURING D/D/C/D: Personnel wear appropriate PPE resistant to cleaning agents used, including 2 pairs of ASTM-tested chemotherapy gloves and impermeable disposable gowns. Eye protection and face shields are worn if splashing may occur. Respiratory protection is used if warranted. [USP 800 Section 15]	
D/D/C/D AGENTS USED: Agents selected are appropriate for the type of HD contamination(s), location, and surface materials. Sterile 70% IPA is used to remove residue left on sterile surfaces and compounding areas by decontaminating agents. [USP 800 Section 15 & 15.4]	
DECONTAMINATION DURING COMPOUNDING: C-PEC is decontemineted et least daily (when used), after as spill, before and after certification, voluntary interruption, or if ventilation tool is removed. The C-PEC worksurface is decontaminated between compounding of different HDs. [USP 800 Section 15.2]	
MONTHLY UNDERTRAY CLEANING: Area under the work tray of a C-PEC is deactivated, decontaminated, and cleaned at least monthly. [USP 800 Section 15.2]	
DISPOSAL OF D/D/C/D CLEANING SUPPLIES: Disposable cleaning supplies are discarded per EPA regulations and facility SOPs. [USP 800 Section 15]	
LABELING, PACKAGING, TRANSPORT SOP: Facility has SOP for the labeling, handling, packaging, and transport of HDs addressing the prevention of spills/exposures, training for exposure, and spill kit use. The SOP describes appropriate shipping containers and insulating materials for transport based on product specifications (e.g., required storage conditions), transport vendors, and mode of transport. [USP 800 Section 11 & 11.2]	
HD LABELING: HD CSPs are identified as hazardous and labeled with special handling precautions. Labeling process for compounded HD products does not introduce contaminated meterials into non-HD areas. [USP 800 Sections 11.1 & 13]	
PACKAGING: Packaging materials and containers that maintain the physical integrity, stability, and sterility of HDs during transport. Packaging protects HDs from damage, leakage, contamination, and degradation, while protecting healthcare workers who transport HDs. [USP 800 Section 11.2]	
TRANSPORT: HDs that are transported are labeled, stored, and handled according to regulations, facility SOPs, and in containers that minimize risk of breakage or leakage. Pneumatic tubes are not used to transport liquid or antineoplastic HDs. [USP 800 Section 11.3]	
HD SPILL SOP: Facility has an SOP to prevent spills. The SOP directs the management and cleanup of suspected or known damage to or spills of HDs upon receipt, storage, handling, compounding, packaging, and transport. SOP addresses appropriate response based on factors such as the size, scope, and who is responsible for cleanup. SOP states the location and capacity of kits and immediate steps that should be taken to evaluate and address personnel exposure, secure spill area, and minimize exposure risk to other personnel. [USP 800 Section 16]	
SPILL KITS, & SINGAGE: Spill kits are readily available with appropriate supplies, PPE, and signs to restrict access to affected areas. restriction posted, and documentation of spills occur when needed. [USP 800 Section 16]	
SPILL CLEAN UP & DOCUMENTATION: Spills are contained and cleaned immediately only by qualified personnel with appropriate PPE. After cleanup is complete, spill circumstances and management are documented. Qualified personnel are available at all times while HDs are being handled. [USP 800 Section 16]	
DISPOSAL REGULATION COMPLIANCE: Disposal of HD waste, including unused HDs and trace-contaminated PPE and materials, is performed by trained and appropriately garbed personnel and complies with federal, state, and local regulations. [USP 800 Sections 11.4 & 17]	

X. LYOPHILIZATION

Sterile preparations prepared for lyophilization are maintained in ISO 5 unidirectional laminar flow air throughout sterilization, filling, and transport to the lyophilizer. [64B16-27.797(5) F.A.C.]	
A recorded smoke study is available and demonstrates that transport from the PEC to the lyophilizer is accomplished in ISO 5 laminar flow air at all times. [64B16-27.797(5) F.A.C.]	
The pharmacy has established and follows policies and procedures for the high-level disinfection of the lyophilizer chamber, piping, and all other areas of the unit which pose a potential risk for contamination of the product. [64B16-27.797(5) F.A.C.]	
The pharmacy validated the high-level disinfection procedure initially, and after changes to the cleaning process or agents. Documentation of studies is available for inspection. [64B16-27.797(5) F.A.C.]	

Validation studies for high level disinfection are performed with the 5-aerobic bacterial and fungal ATCC organisms referenced in USP<71> are conducted by an external vendor unless the firm has an internal laboratory capable of performing the studies. An internal laboratory is separate from the compounding and work areas of the pharmacy to prevent contamination in the pharmacy. [64B16-27.797(5) F.A.C.]	
Policies and procedures are established and followed for cleaning the lyophilizer prior to disinfection and include cleaning agents and schedules. Documentation of cleaning is maintained and available for inspection. [64B16-27.797(5) F.A.C.]	
Policies and procedures are established for the maintenance of the lyophilizer and at a minimum include the manufacturers recommendations. [64B16-27.797(5) F.A.C.]	
The maintenance schedule includes provisions for periodic testing of the chamber for leaks and all other recommended procedures described by the equipment manufacturer. Documentation of routine maintenance is available for inspection. [64B16-27.797(5) F.A.C.]	
SOPs and quality assurance program established to include validation of the filling process, container closure integrity, frequent monitoring of fill volumes, identification of over fills and underfills, assessment of personnel involved in compounding for lyophilization, equipment qualification, formula verification, and evaluation of finished product for conformance to specifications. [64B16-27.797(5) F.A.C.]	
The pharmacy has provisions for sterilizing, with filters, the inert gas or air used for backfilling during the vacuum release phase. These Sterilizing filters undergo the manufacturers recommended integrity test. [64B16-27.797(5) F.A.C.]	
Media fills are conducted every six months using the maximum batch size and demonstrate the filling, transport to the lyophilizer, loading and stoppering operations. Media is NOT frozen during the media fill operation. [64B16-27.797(5) F.A.C.]	
Personnel preparing sterile compounds for lyophilization wear sterile Personal Protective Equipment that covers all exposed skin. [64B16- 27.797(5) F.A.C.]	
Glove Fingertip Sampling is performed with every batch after fill and transport into the lyophilizer on all personnel compounding for lyophilization. The results are incorporated into the batch record. [64B16-27.797(5) F.A.C.]	
In-process acceptance criteria such as color, moisture limits and visual appearance are established for each lyophilized product. [64B16- 27.797(5) F.A.C.]	
A 100% visual examination of the finished product is conducted to determine that the product conforms to the established visual criteria and is incorporated into the batch record. [64B16-27.797(5) F.A.C.]	
Finished product testing is conducted on all batches. Procedures have been established for selecting test samples from the batch and are written and followed. Such procedures may include location of vials in the lyophilizer and positions in the fill line. [64B16-27.797(5) F.A.C.]	
Finished product testing includes sterility testing using a USP<71> method unless an alternative test method has been validated and shown to be equivalent or better. Diluents used to reconstitute the sample vials for testing are preservative free. [64B16-27.797(5) F.A.C.]	
Each batch of lyophilized product with a beyond use date that falls within the USP<797> guidelines and is not tested for sterility, has viable air and surface sampling that is collected in critical areas of ISO 5 locations as well as sampling of the gloves and sleeves of personnel documented in the batch record. [64B16-27.797(5) F.A.C.]	
Every lyophilized product has established endotoxin levels Each batch of lyophilized product is tested for endotoxin in accordance with USP<85> and confirmed to fall within the set limits and documented in the batch record. [64B16-27.797(5) F.A.C.]	
Potency, radiochemical purity, or applicable test to assure label claim is conducted on every batch and documented in the batch record. In lieu of potency testing, weight-based verification may occur based on formula verification. Potency testing shall be based on the USP monograph if one is available. [64B16-27.797(5) F.A.C.]	

Y. SPECIAL PARENTERAL ENTERAL & EXTENDED SCOPE

Technicians properly identified. [64B16-27.100 (2) F.A.C.]; [64B16-27.4001 F.A.C.]; [64B16-27.410 F.A.C.]; [64B16- 27.420 F.A.C.].	
Medication is properly labeled for dispensing to patient. [64B16-28.108(2) F.A.C.]	
Outdated medications removed from active stock. [64B16-28.110 F.A.C.]; [64B16-28.1191 F.A.C.]	
Continuous Quality Improvement Program described in the Pharmacy policy and procedure manual and quarterly summarization of Quality Related Events are available for inspection. [64B 16 27.300 F.A.C.]; [766.101 (1) (a)(l) F.S.]	
Pharmacy maintains patient profile with allergy information and medications dispensed. [64B16-27.800, F.A.C.]	
All controlled substance prescriptions (electronic, faxed, verbal and written) contain required information. [893.04(a)(b)(c) F.S.]; [21CFR1306.05]	
Prescriptions for controlled substances are on counterfeit-proof prescription pads or blanks purchased from a department-approved vendor and the quantity and date meet the requirements of [456.42(2), F.S.].	
Controlled substance inventory taken on a biennial basis and available for inspection. [893.07(1)(a), F.S.] [21CFR1304.11] [21CFR1304.04]	
DEA 222 forms properly completed or records of CSOS orders electronically completed, linked to the original order, archived and retrievable. [893.07(2) F.S.]; 21CFR 1305.13(e)]; [21CFR1305.22(g)]	
Controlled substance records and prescription information in computer system are retrievable and maintained for 4 years. [21CFR1304.04]; [465.022(12) (a) F.S.]; [21CFR1306.22]; [64B16-28.140 F.A.C.]	
Certified daily log or signed printout maintained. [21CFR1306.22(f)(3)]; [64B16-28.140(3)(d) F.A.C]	
Pharmacy is reporting to the PDMP within 24 hours of dispensing controlled substance. [893.055(4) (3)(a), F.S.]	
Invoices for medications purchased from a Florida licensed wholesaler/distributor are retrievable for inspection. [499.005 (14) F.S.]	
A special sterile products and parenteral/enteral compounding pharmacy provides telephone accessibility to its pharmacist(s) for its patients at all hours. [64B16-28.820(3)(b)]	
A special sterile products and parenteral/enteral compounding pharmacy provides special handling and packaging of compounded parenteral and enteral preparations when delivering from the pharmacy to the patient or institution as required to maintain stability of the preparations. [64B16-28.820(3)(b)]	

Remarks:

Per Designated Person and PDM, the pharmacy plans on compounding non-hazardous Category 2 drugs per Table 13 of USP <2022>/2023 version.
Inspectors: Mala Cullipher, Charlene Murray

I have read and have had this inspection report and the laws and regulations concerned herein explained, and do affirm that the information given herein is true and correct to the best of my knowledge.

Section 9: Statement of Responsibility - MUST BE COMPLETED by an Authorized Person (NAC 639.945)

Statement of Responsibility

1. I am the Director (title) for North Coast Medical Supply, LLC (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be responsible for any violations of pharmacy law that may occur in the Pharmacy owned by such owner(s), shareholder(s), member(s), or partner(s).
3. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be named in any action taken by the Nevada State Board of Pharmacy against the Pharmacy.
4. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) cannot require or permit the pharmacist(s) in said Pharmacy to violate any provision of local, state, or federal laws or regulations pertaining to the practice of pharmacy.
5. I further understand and acknowledge that Nevada law requires that each pharmacy located inside the State of Nevada employ only pharmacists, intern pharmacists, pharmaceutical technicians, and technicians in training that are licensed by the Nevada State Board of Pharmacy. (NRS 639.100).
6. I further understand and acknowledge that Nevada law requires that each pharmacy located outside the State of Nevada engaged in providing pharmacy services into Nevada employs at least one pharmacist licensed by the Nevada State Board of Pharmacy who will be responsible for any prescription dispensed to a patient located in Nevada and responsible for any acts or omissions of pharmacy personnel who are not registered with the Board. (NRS 639.2328).

Section 10: Affidavit for Pharmacies- MUST BE COMPLETED by pharmacies NOT CURRENTLY PERFORMING Sterile Compounding

Affidavit for Pharmacy License

I, Keegan David Chamberlain hereby certify that the assertions in this Affidavit are true and correct to the best of my knowledge and belief, and state as follows:

1. I am the Director (title) for North Coast Medical Supply, LLC (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I certify that upon licensure, the Pharmacy will not perform sterile compounding or ship sterile compounds into Nevada.
3. I understand and acknowledge that the Pharmacy and any of its staff members may be subject to discipline by the Board if the Pharmacy performs sterile compounding or ships any sterile compounds into Nevada without first obtaining written authorization from the Board to do so.
4. I certify that if the Pharmacy makes the decision to perform sterile compounding or to ship any sterile compounds into Nevada, the Pharmacy, through an authorized representative, will first notify the Board via a written request, and obtain written approval to perform sterile compounding or to ship any sterile compounds into Nevada.
5. I understand that if the Pharmacy seeks approval to perform sterile compounding or to ship any sterile compounds into Nevada, an authorized representative of the Pharmacy may be required to appear before the Board to answer questions before such approval is granted.

FURTHER YOUR AFFIANT SAYETH NAUGHT.

Section 9: Statement of Responsibility - MUST BE COMPLETED by an Authorized Person (NAC 639.945)

Statement of Responsibility

1. I am the Chief Pharmacy Officer (title) for AHF Pharmacy (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be responsible for any violations of pharmacy law that may occur in the Pharmacy owned by such owner(s), shareholder(s), member(s), or partner(s).
3. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be named in any action taken by the Nevada State Board of Pharmacy against the Pharmacy.
4. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) cannot require or permit the pharmacist(s) in said Pharmacy to violate any provision of local, state, or federal laws or regulations pertaining to the practice of pharmacy.
5. I further understand and acknowledge that Nevada law requires that each pharmacist engaged in providing pharmacy services into Nevada is licensed by the Nevada State Board of Pharmacy (NRS 639.100).

Section 10: Affidavit for Pharmacies- MUST BE COMPLETED by pharmacies NOT CURRENTLY PERFORMING Sterile Compounding

Affidavit for Pharmacy License

I, Kenneth Scott Carruthers hereby certify that the assertions in this Affidavit are true and correct to the best of my knowledge and belief, and state as follows:

1. I am the Chief Pharmacy Officer (title) for AHF Pharmacy (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I certify that upon licensure, the Pharmacy will not perform sterile compounding or ship sterile compounds into Nevada.
3. I understand and acknowledge that the Pharmacy and any of its staff members may be subject to discipline by the Board if the Pharmacy performs sterile compounding or ships any sterile compounds into Nevada without first obtaining written authorization from the Board to do so.
4. I certify that if the Pharmacy makes the decision to perform sterile compounding or to ship any sterile compounds into Nevada, the Pharmacy, through an authorized representative, will first notify the Board via a written request, and obtain written approval to perform sterile compounding or to ship any sterile compounds into Nevada.
5. I understand that if the Pharmacy seeks approval to perform sterile compounding or to ship any sterile compounds into Nevada, an authorized representative of the Pharmacy may be required to appear before the Board to answer questions before such approval is granted.

FURTHER YOUR AFFIANT SAYETH NAUGHT.

Inspector Remarks:

Inspection conducted with Inspector Huy Do.
Closed door outpatient pharmacy, run by a non-profit foundation, dispensing only refills of medications to ambulatory patients via mail/delivery and also for pick up at home pharmacy locations. Inspection conducted with PIC Hannah Suh, RPHs John Stapf and Karen Ly. This new location expands operational capacity- pharmacy is currently filling about 5000Rxs/day and is licensed in 19 states, including CA, the pharmacy currently fulfils at 32 locations. Operations and inventory moved here is November 2024; DOB for PHY 59417 at 19300 S Hamilton Ave #170/180,has been filed with the Board. Suite150 for Pharmacy Performance and customer care center is still located at 19300 S Hamilton Ave, Gardena,
Current operations: Fills all medications, except CIIs; specializes in adherence packaging and HIV meds.
Location: The building at 18421 S Main Street is a single storey building with two walled areas- the front is occupied by AHF Pharmacy; the back is occupied by Gentle Giant Moving. PIC Suh educated on only licensing the pharmacy areas and change of permit requested within 72 hours.

AUTOMATION:
Reviewed and toured the pharmacy.
Pharmacy contains three different dispensing areas (compliance/adherence packs, manual fill, and automated vial dispensing), packaging area, and sorting/delivery area.
The pharmacy uses Coreflex by Parata- a production line/logistics software program which interfaces with McKesson Enterprise Pharmacy Operating System and is connected to multiple home pharmacies across the nation. Each fulfilment is placed into an automated filling system w/RFID tagged tote scanned with barcodes to route and ensure for accuracy. This location has access to patient profile via common electronic file; receives labels for fulfilment from home pharmacies- new ones are filled by home pharmacy; refills filled by this location and mailed/delivered to patient or FedExed/delivered to home pharmacy for patient pick up. Rx orders are received by home pharmacy and processed there. Filling, product verification, packing and shipping performed at this location.
Parata ATP ADDS devices is used for adherence packaging in Calendar blister packs- multi med packs. Reviewed process for replenishing and verification from the pharmacist. Discussed packaging protection from light. 45 day expiration date, reviewed patient centered labeling. Originating pharmacy is displayed on the label. Automated InspectRx for pouch scanning and identification of broken/missing pills reviewed. RPH still visually checks each pouch.
Synmed Ultra ADDS devices used for adherence packaging in Go Packs (bubble). Discussed packaging protection from light. 45 day expiration date, reviewed patient centered labeling. Originating pharmacy is displayed on the label.
Pharmacist reviewed packaging manually based on descriptions printed on label and/or stock images taken from the package.
Parata Max2Plus ADDS devices is a cabinet style ADDS used to dispense medication into vials. The devices counts, labels, and caps the prescription.
Reviewed process for replenishing and verification from the cannisters. Currently, TCH scans the stock bottle, cannisters, and updates the lot/expiration dates. RPH is not involved with reviewing the replenishing process. Recommended and suggested updating practices with verification process. Reviewed labels and found "generic for" wording ~~did not contained~~ the name of the brand used. No photographs taken, RPH visually verifies vials.
Hazardous drugs were placed in the ADDS devices. Educated to reviewed USP 800 on handling and placing drugs into the device and to have assessment of risk available.
Policy and procedures related to the ADDS are in process. Educated to have p/p readily available to address replenishment, maintenance, accuracy, and quality assurance.

Workflow: Reviewed process from originating pharmacy orders to fulfilment center. New prescriptions are filled at the originating pharmacy. Refills are filled at the central fill fulfilment location. Packages are sorted based on location. Prescriptions are sorted and placed into individual mailer packages. Once received at the home pharmacy, the packages

INSPECTION REPORT

may remain intact with a barcode scanned at the point of sale. The originating pharmacy does not verify the product again.

Shipping: cold chain for refrigerated or temp controlled/shipping across states/Overnight were discussed.

The pharmacy also services 340b medications. Software is used to sort and manage inventory from the covered entity and contracted pharmacies. Discussed practice for drugs not picked up and process for handling medications not used once received at the originating pharmacy. Per PIC, drugs placed in compliance packs are destroyed and managed by the originating pharmacy. For prescriptions filled in vials, the drugs are returned to the home pharmacy and added to their own inventory. All records and chain of custody are documented electronically.

Consultation: Reviewed written notice for consultation. Home Pharmacy phone number available and call center number is available and is routed to the central fill pharmacy which is available 24 hours.

Cleaning, Maintenance: Completed daily, weekly, and routinely. The ADDS devices are maintained routinely by the manufacturer. Daily and weekly cleaning are performed by the pharmacy staff.

Medication error reporting: Reviewed. All incidents/complaints are first addressed by the home pharmacy. Once reviewed and investigated, based on the type of error, the responsible pharmacy will complete the QA report. All QA reports are linked between the originating pharmacy and the central fill pharmacy for access between the two locations, The originating pharmacy will reach out to the customer and/or prescriber to complete the incident report. Reviewed recent reports, 2 incidents occurred from opening in November 2024.

Routine Inspection Retail Pharmacy
REVIEWED:
Notice to Consumer, Original License and Renewal, and DEA: available. Location discussed w/PIC Suh.
Sink Hot/Cold Water and eyewash available. Pharmacy is organized and clutter free.
Temperatures - Refrigerator Temperature-paper and electronic. Continuous monitoring w/notification via Dickson.
Scanning for outdated drugs performed 6 months out on a rotating schedule.
CURES: transmitted daily automatically, w. notification from Bamboo received as needed.
Email Alerts: all RPHs and TCHs signed up, per PIC.
Security: keys, card access (assigned per level and schedule), alarm discussed w/PIC.
Policy / Procedure - Technician Job Description, Theft/Impairment/Diversion, Quality Assurance- P&Ps available. Inventory reconciliation P&Ps discussed for actual procedures used during inventory reconciliation and accounting of inaccurate counts within Parata.
Labels: physical description of pills available; compliance with CCR 1707..5 reviewed. PIC to ascertain availability of 'generic for' for on label.
Prescription Orders: none at this location; Order entry, DUR, allergy review, consultation performed by home pharmacy- offer of consult provided on each order sent out from this location, on invoice.
Invoices -scheduled and dangerous drug invoices stored separately; RPH signs and receives drugs from wholesaler.
Offsite Waiver: none.
DEA Inventory –available from November move. Inventory reconciliation performed by automated Coreflex software system- PIC educated on manual portions inherent within the automated reconciliation.
Name Tags: worn- part of access badge. Typical staffing is 9 RPHs: 13-19 TCHs.
WLS: mainly Cardinal; some ABC; Anda; some ordering from manufacturers.
RD: Pharmalink and Allied.
Computer: McKesson Enterprise Pharmacy Operating System. Coreflex is fulfillment system.
Compounding: no compounding

EDUCATION: Topics guidance discussed.

1. Consultation requirements for RX mail/delivery- RPH within 10min or schedule call within 1 hour- minimum 6 days and 40 hrs. per week- Effective 10/1/20
2. BPC 4113 – PIC authority to make staffing decisions

Section 10: Affidavit for Pharmacies- MUST BE COMPLETED by pharmacies NOT CURRENTLY PERFORMING Sterile Compounding

Affidavit for Pharmacy License

I, Thomy Singh hereby certify that the assertions in this Affidavit are true and correct to the best of my knowledge and belief, and state as follows:

1. I am the Pharmacist in Charge (title) for Aurora Specialty Pharmacy (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I certify that upon licensure, the Pharmacy will not perform sterile compounding or ship sterile compounds into Nevada.
3. I understand and acknowledge that the Pharmacy and any of its staff members may be subject to discipline by the Board if the Pharmacy performs sterile compounding or ships any sterile compounds into Nevada without first obtaining written authorization from the Board to do so.
4. I certify that if the Pharmacy makes the decision to perform sterile compounding or to ship any sterile compounds into Nevada, the Pharmacy, through an authorized representative, will first notify the Board via a written request, and obtain written approval to perform sterile compounding or to ship any sterile compounds into Nevada.
5. I understand that if the Pharmacy seeks approval to perform sterile compounding or to ship any sterile compounds into Nevada, an authorized representative of the Pharmacy may be required to appear before the Board to answer questions before such approval is granted.

FURTHER YOUR AFFIANT SAYETH NAUGHT.

Section 8: Arrests, Detentions, Litigations, Arbitrations.	Yes	No
1. Have you ever been convicted of, or entered, a plea of guilty, guilty by mentally ill or nolo contendere to any criminal offense or civil violation, federal or state, for any reason whatsoever, regardless of the disposition of the event? (Except minor traffic citations.)		✓
2. If you answered "yes" to question 1, was the offense or violation related to drugs, including prescription drugs and/or controlled substances, the manufacturer or distribution of drugs or the practice of pharmacy?		
3. Have you ever had a civil or criminal record expunged or sealed by a court order?		✓
4. Have you, as an individual, member or a company, partner, or owner, director or officer of a corporation, ever been a party to a lawsuit as either a plaintiff or defendant (including any administrative proceedings before a licensing board) or of an arbitration as either a claimant or respondent? (Other than divorces.)		✓
5. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) been a party to a lawsuit (including any administrative proceedings before a licensing board), arbitration or bankruptcy?		✓
6. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer or director) ever appeared before any licensing agency or similar authority in or outside the State of Nevada for any reason whatsoever (including any disciplinary or board citation)?		✓
7. Have you ever been denied a personal license, permit, certificate or registration for a privileged, occupational or professional activity?		✓
8. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner member, officer or director) ever been refused a business license.		✓
9. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) ever surrendered a license, permit, certificate or registration relating to the pharmaceutical industry voluntarily or otherwise (other than upon voluntary closure of a manufacturer).		✓
10. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		✓

I, Thomy Singh, **certify that as the designated representative for**

Aurora Specialty Pharmacy,

that I (initial that you have read and meet the following requirements) (NAC 639.5005, NAC 639.5935):

1. TS I am at least 21 years of age;
3. TS I have been employed for at least 6,000 hours in a pharmacy or with a wholesaler in a capacity related to the dispensing and distribution of, and recordkeeping related to, prescription drugs.
4. TS I will be actively involved in and aware of the actual daily operations of the pharmacy or wholesaler;
5. TS I will be employed full-time in a managerial level position with the pharmacy or wholesaler;
6. TS I will be physically present at site of the pharmacy or at the facility of the wholesaler during regular business hours, except when the absence of the representative is authorized, including sick leaves, vacation leaves and other authorized absences; and
7. TS I will serve in this representative capacity for only one pharmacy or wholesaler at a time.

Verified Pharmacy Program® Inspection Form

General Pharmacy Inspection

The information and comments obtained in the Nonsterile Compounding, Sterile Compounding Inspections, and Hazardous Drug Compounding are based on USP Chapters <795>, <797>, and <800>.

An inspection against current Good Manufacturing Practices (cGMPs) was not conducted. There may be some overlap in concepts.

Facility Name: Aurora Pharmacy, Inc. dba Aurora Specialty Pharmacy
e-Profile ID: 1420370
Inspection Date: 11/18/2024 - 11/19/2024

		Observation	Notes
General Operations and Licensure	**If any part of a question is no, enter "No" and explain the observation.**		
15.00	Are pharmacy licenses, permits, and registrations (state, controlled substance, DEA, etc) posted in customers' view and current? *If no, provide details such as closed-door pharmacy, expired licenses, etc.*	Yes	
16.00	Is the most recent board of pharmacy inspection report available for review? *Record the date of the last inspection and how frequently the pharmacy is routinely inspected by the board.*	Yes	WI BOP Inspection on 4/20/2017
17.00	Were any deficiencies noted? *Indicate the deficiencies and note whether they were corrected.*	No	
18.00	Does the pharmacy hold ANY wholesale, distributor, or manufacturer licenses? *Document information in the license grid above for Resident State and in the Notes for Non-Resident States.*	No	
19.00	Has this pharmacy been inspected by any other state for which it holds a license? *If yes, note the state and the date of the inspection and frequency of inspections by other states.*	No	
20.00	Is the pharmacy operating under an exemption or restriction granted by the state in which the pharmacy is located or by any other state in which the pharmacy is licensed? *If yes, note the exemption or restriction.*	No	
21.00	Is the pharmacy operating under a waiver or variance granted by the state in which the pharmacy is located or by any other state in which the pharmacy is licensed? *If yes, note the waiver or variance.*	No	
22.00	Does the pharmacy have any additional restrictions, limitations, or waivers with regards to any federal licenses or registrations (FDA, DEA, etc)? *If yes, note the agency and additional item.*	No

General Pharmacy Inspection

The information and comments obtained in the Nonsterile Compounding, Sterile Compounding Inspections, and Hazardous Drug Compounding are based on USP Chapters <795>, <797>, and <800>.

An Inspection against current Good Manufacturing Practices (cGMPs) was not conducted. There may be some overlap in concepts.

Facility Name: Aurora Pharmacy, Inc. dba Aurora Specialty Pharmacy
e-Profile ID: 1420370
Inspection Date: 11/18/2024 - 11/19/2024

		Observation	Notes
23.00	Has the pharmacy been inspected or visited by the DEA? *If yes, indicate the inspection/visit date and note any deficiencies. Also note how frequently the pharmacy is inspected/visited by the DEA.*	No	
24.00	Has the pharmacy been inspected by the FDA? *If yes, indicate the inspection date and note any deficiencies, significant correspondence, or if a "483" was issued and date, and response and date. Also note how frequently the pharmacy is inspected by the FDA.*	No	
25.00	Does the pharmacy hold any accreditations or certifications? *If yes, indicate which and collect most recent date of survey.*	Yes	URAC Specialty Pharmacy, ACHC Specialty Pharmacy, URAC- Mail Order Pharmacy
26.00	Has the pharmacy held any accreditations or certifications in the past that they no longer hold? *Provide a list and the reasons for such.*	No	
27.00	Does the pharmacy perform patient lab testing such as blood glucose tests, cholesterol tests, etc? *Verify that the lab director is current (usually the PIC is the lab director named). If yes, record the Clinical Laboratory Improvement Amendments (CLIA) waiver information, expiration date, and the name of lab director listed.*	No	
28.00	Does the pharmacy maintain all required records, including but not limited to prescription files and invoices on site? *Record how long records are kept. If not on site, where?*	Yes	The pharmacy maintains records onsite for 3 years and sends records to Iron Mountain for offsite storage for 7 years.
28.01	Are written and verbal prescriptions (reduced to writing) kept on site for the entire retention period? *If not, explain including how long they are stored on site?*	Yes	Both verbal and written prescriptions are kept onsite for three years.
28.02	Are electronic prescriptions (such as fax, e-scripts) kept on site for the entire retention period? *Describe how they are kept (electronically or printed and kept in hard copy).*	Yes	Electronic, faxed, and e-scripts are maintained onsite for three years. Hard copy prescriptions are scanned into pharmacy system (EPIC).
28.03	Are all dispensing records (such as refills, verifications, DUR overrides) kept on site for the entire retention period? *Describe how they are kept (electronically or printed and kept in hard copy).*	Yes	Dispensing records are maintained the entire retention period.
28.04	Are there systems in place to prevent a pharmacy record from being deleted after the prescription has been dispensed? *Describe how they are kept (electronically or printed and kept in hard copy).*	Yes	The pharmacy has a system to prevent pharmacy records from being deleted. The pharmacy has backup servers.

General Pharmacy Inspection

The information and comments obtained in the Nonsterile Compounding, Sterile Compounding Inspections, and Hazardous Drug Compounding are based on USP Chapters <795>, <797>, and <800>.

An inspection against current Good Manufacturing Practices (cGMPs) was not conducted. There may be some overlap in concepts.

Facility Name: Aurora Pharmacy, Inc. dba Aurora Specialty Pharmacy
e-Profile ID: 1420370
Inspection Date: 11/18/2024 - 11/19/2024

		Observation	Notes
28.05	If record are stored off site are they secure in a HIPAA compliant manner and readily retrievable?	Yes	
29.00	Is there a statement in the P&P, or are other means used to ensure that the most stringent laws/regulations are followed? *Describe system details.*	Yes	Handled by corporate and the PIC/Clinical Pharmacy Manager. The manager reviews state board newsletters and reports weekly to ensure compliance.
	Personnel **If any part of a question is no, enter "No" and explain the observation.**		
30.00	Are all pharmacist, pharmacy intern, and pharmacy technician (if applicable) licenses or registrations with the board current and in good standing? *Describe how this is documented.*	Yes	The PIC verifies licensures through the licensing verification portal provided by the state board.
31.00	Is there a process for periodic verification of validity of licenses? *Describe the process.*	Yes	
32.00	If pharmacists are providing patient services that require additional training or certification, are they appropriately trained and certified? *(Immunization, CPR, MTM, etc.). Mark NA if no patient services that require additional training/certification. If yes, list certifications and if current?*	N/A	
33.00	Does the pharmacy maintain the proper technician-to-pharmacist ratio? *Mark N/A if not required by resident state. Indicate ratio used and the maximum number of staff who work at the same time.*	N/A	
	Facility and Security **If any part of a question is no, enter "No" and explain the observation.**		
34.00	Does the pharmacy have a working security/alarm system in place? *If yes, describe.*	Yes	Separate from the other pharmacy, it is centrally monitored by the healthcare system's public safety team.
35.00	Are Schedule II controlled substances secured in a locked cabinet or safe? *If not, describe how controlled substances are secured or stored.*	Yes	
36.00	Are there contingency plans in the event the pharmacy cannot be secured? *Describe how the drug products will be secured and handled.*	Yes	Handled by corporate. Pharmacy will close and transfer to services to nearest Aurora Pharmacy location.

An inspection against current Good Manufacturing Practices (cGMPs) was not conducted. There may be some overlap in concepts.

Facility Name: Aurora Pharmacy, Inc. dba Aurora Specialty Pharmacy
e-Profile ID: 1420370
Inspection Date: 11/18/2024 - 11/19/2024

		Observation	Notes
37.00	Is the pharmacy clean and sanitary, and is there appropriate space for the prescription volume? *Look for clutter, or crowded counters or stacks of prescriptions to be checked. If no, document with photo.*	Yes	
37.01	Is the working area well lit and free of tripping hazards? *If no, document with photo.*	Yes	
37.02	Is there a sink with hot and cold running water?	Yes	
37.03	If the pharmacy destroys prescription products on site (such as expired, damaged, recalled, etc), do they appropriately document the destruction? *View destruction logs. Mark NA if no destruction on site.*	N/A	
37.04	Does the pharmacy return prescription products to the manufacturer, distributor, or send to a reverse distributor for destruction? *If yes, indicate name of reverse distributor used.*	Yes	
37.05	Does the pharmacy have a hazardous waste handling and collection system? For example, empty bottles that contained chemotherapy medications or warfarin, or hazardous drug compounding waste. *If yes, indicate how often the bin is emptied/collected and the vendor used.*	Yes	
38.00	Does the pharmacy have a private area for patient counseling and providing patient services? *Describe.*	Yes	The patient area is located at the front entrance of the pharmacy, between the secured pharmacy entrance and the patient entrance. The area is locked to prevent patients from entering while counseling is being conducted
39.00	Is temperature in the drug storage area maintained to provide controlled room temperature of 20° to 25°C (68° to 77 °F), or more restrictive if warranted by specific drug product storage requirements? *Describe. Record the temperature at the time of inspection.*	Yes	SensorScientific. See Doc01-GP39_Aurora Specialty Pharmacy_Menomonee Falls_WI
39.01	Is temperature monitoring in place to detect any excursions (24/7) by continuous monitoring or retroactive detection using min/max? Temperature records are maintained. *If yes, describe the process*	Yes	The pharmacy has three monitoring systems used to monitor ambient temperature 24/7.
39.02	Are excursion action plans in place including evaluating excursion effects on drug product integrity?	Yes

Inspection Date: 11/18/2024 - 11/19/2024

		Observation	Notes
40.00	Are the refrigerator and freezer restricted to drug products only (no food)?	Yes	
41.00	Does the pharmacy have a process for how the refrigerator temperature is monitored for excursions 24/7? *If yes, describe the process. Indicate range. How are excursions detected? How long are records maintained?*	Yes	Alerts are sent every 15 minutes, when temperatures are out of range. The pharmacy will move the drugs to a different facility or refrigerator within a 3-hour window during excursions. Notifications are sent to PIC and managers.
41.01	Is the temperature in the refrigerator within the USP range (2°-8°C or 36°-46 °F) or as specified by FDA approved labeling for drug product storage? *Record the temperature of the refrigerator at the time of inspection.*	Yes	See Doc01-GP39_Aurora Specialty Pharmacy_Menomonee Falls_WI
42.00	Does the pharmacy have a process for how the freezer temperature is monitored for excursions 24/7? *If yes, describe the process. Indicate range. How are excursions detected? How long are records maintained?*	Yes	
42.01	Is the temperature in the freezer within the USP range (between −25° to −10°C or −13° to 14 °F) or as specified by FDA approved labeling for drug product storage? *Record the temperature of the freezer at the time of inspection.*	Yes	
43.00	Are there contingency plans in the event of power outage or refrigerator/freezer failure? *Describe process.*	Yes	
44.00	Are there contingency plans in the event of heating or air conditioning failure? *Describe processes.*	Yes	
45.00	Is there a plan of action if there are any temperature or humidity excursions to determine if the integrity of the products has been compromised?	Yes	
46.00	Does the pharmacy utilize any automated apparatuses for prescription processing/counting (such as robotics, Baker cells, etc)? *List numbers and types.*	Yes	Corflex automation
46.01	If yes, do they have and follow policies and procedures addressing cross-contamination and identification of drug products?	Yes

		Observation	Notes
	Product Receipt and Inventory **If any part of a question is no, enter "No" and explain the observation.**		
47.00	Does the pharmacy have a documented process for establishing sources (vendors) of prescription drugs? *Describe.*	Yes	Handled by corporate.
47.01	Does the pharmacy purchase all prescription drugs directly from the manufacturer?	No	
47.02	Does the pharmacy purchase (obtain) prescription drugs from other pharmacies? *If yes, list pharmacy source information, and circumstances leading to the purchase.*	Yes	Pharmacy may transfer inventory from other Aurora Pharmacy locations.
47.03	Does the pharmacy purchase (obtain) prescription drugs from wholesale distributors (non-manufacturer sources)? *List non-manufacturer sources.*	No	
47.04	Does the pharmacy require wholesale distributor sources to purchase prescription drugs directly from the manufacturer? *If yes, how is this verified?*	Yes	
47.05	Does the pharmacy purchase drugs from wholesale distributors that purchased the drug from other wholesale distributors? *If yes. Describe the due diligence steps to determine the source's legitimacy and legitimacy of the drugs sold by the vendor (For instance. does the pharmacy examine transaction histories and limit the number of movements of drugs between wholesale distributors, and look for pharmacies in the supply chain?)*	Yes	
47.06	Does the pharmacy determine that all sources listed on transaction histories have requisite state licensing? *If yes, describe the process.*	Yes	Handled by corporate.
47.07	Does the pharmacy determine that all sources listed on transaction histories have reported to FDA's Wholesale Distributor database? *If yes, describe the process.*	Yes	
47.08	Does the pharmacy have a process to handle suspect and illegitimate product investigations? *If yes, describe the process.*	Yes	Handled by corporate.

		Observation	Notes
	Prescription Processing If any part of a question is no, enter "No" and explain the observation.		
64.00	**Patient Profile:** Is patient profile data organized and readily accessible to facilitate consultation with the prescriber, patient, or caregiver? *Indicate who enters patient profile data into the computer system and how often it is updated?*	Yes	The pharmacist enters the patient information via Epic system.
64.01	If the pharmacy dispenses veterinary prescriptions, does the information gathered and recorded include the species, and name of the animal/owner as required by resident state law? *Describe how it is indicated in the computer system that the patient is an animal? And how is it indicated in the system the prescription is a veterinary prescription?*	Yes	Less than 0.01% dispensed.
65.00	**Prescription:** Are adequate processes in place to assure the integrity, legitimacy, and authenticity of prescription orders? *Staff is familiar with detecting fraud in hard copy, faxed, verbal, and electronic prescriptions.*	Yes	Electronic prescriptions, verbal orders, and rarely mail-in DURs are processed.
65.01	Is there a procedure to follow when a prescription is suspected of (or actually is) fraudulent? *Describe the steps and reporting process.*	Yes	The pharmacists verify the prescription via the EPIC system and by calling the physician.
65.02	Are adequate processes in place for assuring that prescription medications are not prescribed or dispensed based on online medical consultations without there being a pre-existing prescriber-patient/client relationship? *Describe. Do the processes include comparing the physical addresses of the patient and prescriber?*	Yes	The verification is completed via Epic system.
65.03	Does the pharmacy have electronic prescription capability? *Indicate whether it is for non-controlled substances, controlled substances, or both.*	Yes	The system identifies both.
65.04	If the pharmacy accepts electronic prescriptions for controlled substances, are they in compliance with federal regulations?	Yes	
66.00	**Accuracy:** Is the accuracy of the information entered into the computer system verified (patient information and prescription information)? *Indicate how and by whom.*	Yes

Inspection Date: 11/18/2024 - 11/19/2024

		Observation	Notes
88.01	Documentation includes all the pertinent data about the prescription involved including personnel involved at each step.	Yes	
88.02	Documentation includes documenting the type of QRE details and how/who discovered the QRE.	Yes	
88.03	Documentation incudes possible contributing factors such as day and time the QRE occurred, number of pharmacists and technicians on duty, prescription volume that day, equipment failure, or other factors affecting work-flow at the time.	Yes	
88.04	Documentation includes steps taken to remediate including communications with the patient and the provider, and if the medication was ingested, disposition of the patient.	Yes	
89.00	**QRE data** collected is analyzed to assess causes and any contributing factors (root cause). *Indicate who performs the analysis and frequency (with each event, weekly, monthly, quarterly, etc).*	Yes	Handled by Corporate
89.01	The pharmacy uses the findings of the analysis to formulate an appropriate response and develop pharmacy systems and workflow processes designed to prevent QREs and increase good outcomes for patients.	Yes	
89.02	For pharmacies utilizing a drug formulary, a periodic review of such formulary is undertaken to ensure that appropriate medications are being offered/selected in the best interest of patients.	Yes	
90.00	**Quality meetings** are held at least annually by staff members of the pharmacy to consider the effects on quality of the pharmacy system due to staffing levels, workflow, and technological support.	Yes	
90.01	The meeting reviews data showing evidence of the quality of care for patients and develops plans for improvements to increase good outcomes for patients.	Yes

1. I am the Owner/Operator (title) for Get Relief RX, LLC (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be responsible for any violations of pharmacy law that may occur in the Pharmacy owned by such owner(s), shareholder(s), member(s), or partner(s).
3. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be named in any action taken by the Nevada State Board of Pharmacy against the Pharmacy.
4. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) cannot require or permit the pharmacist(s) in said Pharmacy to violate any provision of local, state, or federal laws or regulations pertaining to the practice of pharmacy.
5. I further understand and acknowledge that Nevada law requires that each pharmacist engaged in providing pharmacy services into Nevada is licensed by the Nevada State Board of Pharmacy (NRS 639.100).

Section 10: Affidavit for Pharmacies- MUST BE COMPLETED by pharmacies NOT CURRENTLY PERFORMING Sterile Compounding

Affidavit for Pharmacy License

I, Crull Chambless hereby certify that the assertions in this Affidavit are true and correct to the best of my knowledge and belief, and state as follows:

1. I am the Owner/Operator (title) for Get Relief RX, LLC (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I certify that upon licensure, the Pharmacy will not perform sterile compounding or ship sterile compounds into Nevada.
3. I understand and acknowledge that the Pharmacy and any of its staff members may be subject to discipline by the Board if the Pharmacy performs sterile compounding or ships any sterile compounds into Nevada without first obtaining written authorization from the Board to do so.
4. I certify that if the Pharmacy makes the decision to perform sterile compounding or to ship any sterile compounds into Nevada, the Pharmacy, through an authorized representative, will first notify the Board via a written request, and obtain written approval to perform sterile compounding or to ship any sterile compounds into Nevada.
5. I understand that if the Pharmacy seeks approval to perform sterile compounding or to ship any sterile compounds into Nevada, an authorized representative of the Pharmacy may be required to appear before the Board to answer questions before such approval is granted.

FURTHER YOUR AFFIANT SAYETH NAUGHT.

Section 8: Arrests, Detentions, Litigations, Arbitrations.	Yes	No
1. Have you ever been convicted of, or entered, a plea of guilty, guilty by mentally ill or nolo contendere to any criminal offense or civil violation, federal or state, for any reason whatsoever, regardless of the disposition of the event? (Except minor traffic citations.)		X
2. If you answered "yes" to question 1, was the offense or violation related to drugs, including prescription drugs and/or controlled substances, the manufacturer or distribution of drugs or the practice of pharmacy?		
3. Have you ever had a civil or criminal record expunged or sealed by a court order?		X
4. Have you, as an individual, member or a company, partner, or owner, director or officer of a corporation, ever been a party to a lawsuit as either a plaintiff or defendant (including any administrative proceedings before a licensing board) or of an arbitration as either a claimant or respondent? (Other than divorces.)		X
5. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) been a party to a lawsuit (including any administrative proceedings before a licensing board), arbitration or bankruptcy?		X
6. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer or director) ever appeared before any licensing agency or similar authority in or outside the State of Nevada for any reason whatsoever (including any disciplinary or board citation)?		X
7. Have you ever been denied a personal license, permit, certificate or registration for a privileged, occupational or professional activity?		X
8. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner member, officer or director) ever been refused a business license.		X
9. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) ever surrendered a license, permit, certificate or registration relating to the pharmaceutical industry voluntarily or otherwise (other than upon voluntary closure of a manufacturer).		X
10. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		X

I certify under penalty of perjury that the information contained in this application is accurate, true and complete in all material respects. I understand that making any false representation in this application is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire application and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. In the event this application is approved I agree to comply with all applicable federal and state statutes and regulations governing this license or registration and understand that any violation may result in discipline.

Business Licensure Information for State of Residence and Federal

(board of pharmacy, state controlled substance, DEA, FDA, etc)

License/Registration Agency	Business Name on License/Registration	Registration/License Type	Registration/License Number & Expiration Date
Montana Board of Pharmacy	Get Relief Rx LLC	Pharmacy	PHA-PHR-LIC-103965 Exp: 11/30/2024

Inspector Notes: List states in which Non-Resident licenses are held: AZ, WY. Also shipping into MA - no non-resident license is required. Get Relief RX, LLC, is a new mail-order pharmacy opened in the last 2 months. They dispense only one drug, a CNSP to contain both cetirizine 8 mg and famotidine 22 mg. The pharmacy has three owners who are also affiliated with a Gastro-enterology physician of Jackson MS, and a digital marketing company, Shepherd Holdings, at 149 Shiloh, Suite 9, Billings MT. Shepherd Holdings performs data mining from digital sources seeking people with GI-related issues. They reach out to the person via email or text regarding the GI-related issue, offering to contact them to evaluate their condition via an online questionnaire that is forwarded to the doctor who then prescribes the CNSP capsule with cetirizine 8 mg and famotidine 22 mg, which the pharmacy compounds from commercial tablets, and mails to the patient. The CNSP is dispensed in bottles of 30 capsules to take one capsule at bedtime. Per the PIC, the questionnaire, physician evaluation, prescription information, patient address, and dispensing information, is maintained in a proprietary database, QuickBase. Per the PIC, the physician cannot access all the information on the pharmacy side of the database, and the pharmacy staff cannot access all the information on the physician side of the database. Per the PIC, the physician will only contact and speak to the patient if he has concerns based on the questionnaire answers. It does not appear the pharmacy is involved in any patient billing. There is also a physician in MA who prescribes the CNSP via QuickBase. Refills are processed through the physicians' offices. The pharmacy is seeking an inspection to apply for additional nonresident state licenses, but is not seeking NABP accreditation. The pharmacy is utilizing a consultant, Lindsay Wall, to assist with the set-up of the pharmacy, who was present during the first 3+ hours of the inspection but did not participate in the inspection.

Documents collected as part of the inspection.
To obtain a copy of these documents please contact the facility directly. They are not included in the final report.

Document Name	Description
Photo01_GP37.00; Photo02_NS8.3; Photo03_NS18.3; Photo04_NS31.1.	Photos of a trash can with white powder, powder residue in blender, dust on a V1 mixer, and unlabeled inventory stock.
Doc01_GP88.00; Doc02_NS28.0; Doc03_NS29.0.	Documents of an ARL COA for a CNSP, a MFR example (2 pages), and the observed CNSP CR.

Verified Pharmacy Program® Inspection Form

General Pharmacy Inspection

The information and comments obtained in the Nonsterile Compounding, Sterile Compounding Inspections, and Hazardous Drug Compounding are based on USP Chapters <795>, <797>, and <800>.
An inspection against current Good Manufacturing Practices (cGMPs) was not conducted. There may be some overlap in concepts.

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Notes
	General Pharmacy		
1.00	Is the PIC (or pharmacy manager/director) present for the inspection? *If no, list the pharmacist on duty.*	Yes	
2.00	Is the PIC employed full-time at the pharmacy? *List the number of hours worked per week onsite.*	Yes	34 hours/week. The pharmacy is open Monday-Thursday.
3.00	Are there any other businesses located at this address? *If yes, note type of business and name.*	No	
4.00	Does the pharmacy have any other websites? *Provide list of other names/URLs.*	No	
4.01	Does the pharmacy hold .pharmacy verification?	No	
5.00	Do any other websites link to the pharmacy website (such as a provider, or other affiliate)? *If yes, list.*	No	The www.GetReliefRx.com website links to Dr. Reed Hogan III for a review of the health questionnaire to determine if he will prescribe the CNSP to the patient.
6.00	Does the pharmacy allow patients to securely enter/update profile and medical information through the website (such as through a secure patient portal)?	No	
7.00	Are patients able to order or refill prescriptions through the website? *If yes, describe.*	Yes	The patient can request a refill through the website which notifies Dr Reed Hogan III or Dr Chinyere Ezeh (based on the original prescription), where the MD office will approve the refill which generates the refill to the pharmacy's QuickBase queue dispensing list.
8.00	Are photographs allowed during the inspection (**no PHI**)?	Yes	
9.00	List of additional personnel **interviewed as part of the inspection, including name and title:**		Mayzie Manning CPhT.

		Observation	Notes
	Types of Practice Additional Questions **If any part of a question is no, enter "No" and explain the observation.**		
10.00	If the pharmacy mails or delivers filled prescriptions (patient specific, labeled with patient name when it leaves the pharmacy), are any of the deliveries to a provider or facility for administration to the patient? *If yes, indicate volume or percentage of deliveries going to a provider or facility in this state, and volume or percentage of deliveries going to a provider or facility in other states.*	No	
11.00	Does the pharmacy provide prescription products to a provider or facility for "office use" (not pursuant to a prescription received prior to delivery, not patient specific, not labeled with the patient name)? *If yes, indicate volume or percentage provided to a provider or facility within this state, and volume or percentage provided to a provider or facility in other states.*	No	
12.00	Does the pharmacy provide prescription products to providers or facilities (including other pharmacies) as a wholesale distributer (sold to the provider or facility for their use, administration, or providing/dispensing to patients)?	No	
13.00	If yes, is the percentage of product distributed at wholesale to providers or facilities within this state less than 5%? *Indicate actual percentage and if the percentage is based on number of units, number of prescriptions, dollar volume of total sales or dollar volume of prescription sales.*	N/A	
14.00	If yes, is the percentage of product distributed at wholesale to providers or facilities in other states less than 5%? *Indicate actual percentage and if the percentage is based on number of units, number of prescriptions, dollar volume of total sales or dollar volume of prescription sales.*	N/A

Inspection Date: 8/8/2024

		Observation	Notes
	General Operations and Licensure **If any part of a question is no, enter "No" and explain the observation.**		
15.00	Are pharmacy licenses, permits, and registrations (state, controlled substance, DEA, etc) posted in customers' view and current? *If no, provide details such as closed-door pharmacy, expired licenses, etc.*	No	Closed door pharmacy. Licenses are maintained in a binder in the pharmacy.
16.00	Is the most recent board of pharmacy inspection report available for review? *Record the date of the last inspection and how frequently the pharmacy is routinely inspected by the board.*	N/A	The pharmacy has not been inspected by the MT BOP or FDA.
17.00	Were any deficiencies noted? *Indicate the deficiencies and note whether they were corrected.*	N/A	
18.00	Does the pharmacy hold ANY wholesale, distributor, or manufacturer licenses? *Document information in the license grid above for Resident State and in the Notes for Non-Resident States.*	No	
19.00	Has this pharmacy been inspected by any other state for which it holds a license? *If yes, note the state and the date of the inspection and frequency of inspections by other states.*	No	
20.00	Is the pharmacy operating under an exemption or restriction granted by the state in which the pharmacy is located or by any other state in which the pharmacy is licensed? *If yes, note the exemption or restriction.*	No	
21.00	Is the pharmacy operating under a waiver or variance granted by the state in which the pharmacy is located or by any other state in which the pharmacy is licensed? *If yes, note the waiver or variance.*	No	
22.00	Does the pharmacy have any additional restrictions, limitations, or waivers with regards to any federal licenses or registrations (FDA, DEA, etc)? *If yes, note the agency and additional item.*	No

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Notes
23.00	Has the pharmacy been inspected or visited by the DEA? *If yes, indicate the inspection/visit date and note any deficiencies. Also note how frequently the pharmacy is inspected/visited by the DEA.*	No	The pharmacy does not have a federal DEA license.
24.00	Has the pharmacy been inspected by the FDA? *If yes, indicate the inspection date and note any deficiencies, significant correspondence, or if a "483" was issued and date, and response and date. Also note how frequently the pharmacy is inspected by the FDA.*	No	
25.00	Does the pharmacy hold any accreditations or certifications? *If yes, indicate which and collect most recent date of survey.*	No	
26.00	Has the pharmacy held any accreditations or certifications in the past that they no longer hold? *Provide a list and the reasons for such.*	No	
27.00	Does the pharmacy perform patient lab testing such as blood glucose tests, cholesterol tests, etc? *Verify that the lab director is current (usually the PIC is the lab director named). If yes, record the Clinical Laboratory Improvement Amendments (CLIA) waiver information, expiration date, and the name of lab director listed.*	No	
28.00	Does the pharmacy maintain all required records, including but not limited to prescription files and invoices on site? *Record how long records are kept. If not on site, where?*	No	Records are maintained electronically and backed up to an offsite server for at least 10 years. The location of the offsite server is not known by the PIC.
28.01	Are written and verbal prescriptions (reduced to writing) kept on site for the entire retention period? *If not, explain including how long they are stored on site?*	N/A	The pharmacy is not receiving any written or verbal prescriptions.
28.02	Are electronic prescriptions (such as fax, e-scripts) kept on site for the entire retention period? *Describe how they are kept (electronically or printed and kept in hard copy).*	Unknown	The pharmacy is not receiving electronic prescriptions but receives prescription-related data from the prescriber through the QuickBase patient database. QuickBase is part of the backed-up information.
28.03	Are all dispensing records (such as refills, verifications, DUR overrides) kept on site for the entire retention period? *Describe how they are kept (electronically or printed and kept in hard copy).*	No	Records are maintained electronically in QuickBase and backed up to an offsite server for at least 10 years. The pharmacy does not receives copies of the original prescription but receives limited prescription-related data via the QuickBase queue.
28.04	Are there systems in place to prevent a pharmacy record from being deleted after the prescription has been dispensed? *Describe how they are kept (electronically or printed and kept in hard copy).*	Yes	Per the PIC, QuickBase does not allow record deletion.

An inspection against current Good Manufacturing Practices (cGMPs) was not conducted. There may be some overlap in concepts.

Facility Name: Get Relief RX, LLC

e-Profile ID: 1808699

Inspection Date: 8/8/2024

		Observation	Notes
28.05	If record are stored off site are they secure in a HIPAA compliant manner and readily retrievable?	Yes	Records maintained on the electronic database are restricted by password protected firewalls.
29.00	Is there a statement in the P&P, or are other means used to ensure that the most stringent laws/regulations are followed? *Describe system details.*	Unknown	This is not clearly stated in the P&P. It is the PIC's responsibility to keep up with laws and regulations in MT. They have a consultant who will be keeping up with new laws and regulations for other states, and will notify the PIC and owners.
	Personnel **If any part of a question is no, enter "No" and explain the observation.**		
30.00	Are all pharmacist, pharmacy intern, and pharmacy technician (if applicable) licenses or registrations with the board current and in good standing? *Describe how this is documented.*	Yes	Licenses are current, documented with active licenses. The PIC is developing a calendar on Google to give a month advanced notice of upcoming expiring dates for all employees.
31.00	Is there a process for periodic verification of validity of licenses? *Describe the process.*	Yes	Licenses in MT are renewed annually and will be reviewed with each renewal by having the employee bring in the renewed license for placement in the binder.
32.00	If pharmacists are providing patient services that require additional training or certification, are they appropriately trained and certified? *(Immunization, CPR, MTM, etc.). Mark NA if no patient services that require additional training/certification. If yes, list certifications and if current?*	N/A	
33.00	Does the pharmacy maintain the proper technician-to-pharmacist ratio? *Mark N/A if not required by resident state. Indicate ratio used and the maximum number of staff who work at the same time.*	Yes	Currently using 1:1 ratio. MT allows a 4:1 ratio. Currently the maximum staff is 2.
	Facility and Security **If any part of a question is no, enter "No" and explain the observation.**		
34.00	Does the pharmacy have a working security/alarm system in place? *If yes, describe.*	Yes	The pharmacy has an in-house system with contact alarms on the 2 outside doors and 1 internal door to the general building hallway. There is no audible alarm. If the contact is triggered by opening of the door, it sends a text to the PIC's cell phone. The PIC can look at the 3 internal cameras at any time. There is no activation/deactivation of the security system.
35.00	Are Schedule II controlled substances secured in a locked cabinet or safe? *If not, describe how controlled substances are secured or stored.*	N/A	No controlled substances in the pharmacy.

General Pharmacy Inspection

The information and comments obtained in the Nonsterile Compounding, Sterile Compounding Inspections, and Hazardous Drug Compounding are based on USP Chapters <795>, <797>, and <800>.

An inspection against current Good Manufacturing Practices (cGMPs) was not conducted. There may be some overlap in concepts.

Facility Name: Get Relief RX, LLC

e-Profile ID: 1808699

Inspection Date: 8/8/2024

		Observation	Notes
36.00	Are there contingency plans in the event the pharmacy cannot be secured? *Describe how the drug products will be secured and handled.*	Yes	The medications would be moved to the lockable owner's suite next door (Shepherd's Holding in Suite 9). The PIC would be present until the building could be secured/boarded up. The landlord would be notified for repairs.
37.00	Is the pharmacy clean and sanitary, and is there appropriate space for the prescription volume? *Look for clutter, or crowded counters or stacks of prescriptions to be checked. If no, document with photo.*	Unknown	The pharmacy has adequate space for the prescription volume and is neat and orderly. There is a white dust clinging to the sides of the trash can in the sink room that appears to be possible CNSP waste, and there is white dust inside the lid of the tablet blender. Per the PIC he may have disposed of a batch of CNSP waste in the trash can. Other parts of the pharmacy are clean. Photo01_GP37.00.
37.01	Is the working area well lit and free of tripping hazards? *If no, document with photo.*	Yes	
37.02	Is there a sink with hot and cold running water?	Yes	
37.03	If the pharmacy destroys prescription products on site (such as expired, damaged, recalled, etc), do they appropriately document the destruction? *View destruction logs. Mark NA if no destruction on site.*	Unknown	They report they do not destroy any drugs on site, however there is an unknown white powder in the trash can in the room where compounded drugs containers are washed. Per the PIC he may have disposed of a batch of CNSP waste in the trash can.
37.04	Does the pharmacy return prescription products to the manufacturer, distributor, or send to a reverse distributor for destruction? *If yes, indicate name of reverse distributor used.*	N/A	This is yet to be determined.
37.05	Does the pharmacy have a hazardous waste handling and collection system? For example, empty bottles that contained chemotherapy medications or warfarin, or hazardous drug compounding waste. *If yes, indicate how often the bin is emptied/collected and the vendor used.*	N/A	
38.00	Does the pharmacy have a private area for patient counseling and providing patient services? *Describe.*	N/A	This is a closed door pharmacy. Patients can call the pharmacy from the toll-free 888 number on the Rx bottle which call goes to the receptionist at the Shepherd's Holding office, who would let the pharmacy know the patient wants a call back.

Facility Name: Get Relief RX, LLC

e-Profile ID: 1808699

Inspection Date: 8/8/2024

		Observation	Notes
39.00	Is temperature in the drug storage area maintained to provide controlled room temperature of 20° to 25°C (68° to 77 °F), or more restrictive if warranted by specific drug product storage requirements? *Describe. Record the temperature at the time of inspection.*	Yes	The pharmacy has HVAC systems to maintain temperature with a thermostat inside the general pharmacy area. The temperature and RH are recorded morning and afternoon for each day the pharmacy is open, from a reading of a small ThermPro digital thermometer. There is no tracking of the temperature/RH over the weekends or days the pharmacy is closed. 72°F.
39.01	Is temperature monitoring in place to detect any excursions (24/7) by continuous monitoring or retroactive detection using min/max? Temperature records are maintained. *If yes, describe the process.*	No	There appears to be a min/max setting on the ThermPro thermometer that is not utilized or recorded.
39.02	Are excursion action plans in place including evaluating excursion effects on drug product integrity?	Yes	The PIC would contact the manufacturer for guidance to determine if the involved temperatures impact drug integrity.
40.00	Are the refrigerator and freezer restricted to drug products only (no food)?	N/A	There are no refrigerated or frozen drugs.
41.00	Does the pharmacy have a process for how the refrigerator temperature is monitored for excursions 24/7? *If yes, describe the process. Indicate range. How are excursions detected? How long are records maintained?*	N/A	
41.01	Is the temperature in the refrigerator within the USP range (2°-8°C or 36°-46 °F) or as specified by FDA approved labeling for drug product storage? *Record the temperature of the refrigerator at the time of inspection.*	N/A	
42.00	Does the pharmacy have a process for how the freezer temperature is monitored for excursions 24/7? *If yes, describe the process. Indicate range. How are excursions detected? How long are records maintained?*	N/A	
42.01	Is the temperature in the freezer within the USP range (between −25° to −10°C or −13° to 14 °F) or as specified by FDA approved labeling for drug product storage? *Record the temperature of the freezer at the time of inspection.*	N/A	
43.00	Are there contingency plans in the event of power outage or refrigerator/freezer failure? *Describe process.*	No

e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Notes
44.00	Are there contingency plans in the event of heating or air conditioning failure? *Describe processes.*	Yes	Pharmacy staff would call the landlord for urgent repairs. The PIC also has contact information for the HVAC installer who could be contacted for repairs.
45.00	Is there a plan of action if there are any temperature or humidity excursions to determine if the integrity of the products has been compromised?	Yes	The PIC would contact the manufacturer for guidance to determine if the involved temperatures impact drug integrity.
46.00	Does the pharmacy utilize any automated apparatuses for prescription processing/counting (such as robotics, Baker cells, etc)? *List numbers and types.*	No	
46.01	If yes, do they have and follow policies and procedures addressing cross-contamination and identification of drug products?	N/A	
	Product Receipt and Inventory **If any part of a question is no, enter "No" and explain the observation.**		
47.00	Does the pharmacy have a documented process for establishing sources (vendors) of prescription drugs? *Describe.*	Yes	The pharmacy requires the source to be licensed in their location state, in MT, and to have a NABP Drug Distributor Accreditation.
47.01	Does the pharmacy purchase all prescription drugs directly from the manufacturer?	No	They are purchasing from a wholesale distributor.
47.02	Does the pharmacy purchase (obtain) prescription drugs from other pharmacies? *If yes, list pharmacy source information, and circumstances leading to the purchase.*	No	
47.03	Does the pharmacy purchase (obtain) prescription drugs from wholesale distributors (non-manufacturer sources)? *List non-manufacturer sources.*	Yes	Anda
47.04	Does the pharmacy require wholesale distributor sources to purchase prescription drugs directly from the manufacturer? *If yes, how is this verified?*	Unknown	It is unknown if it is a requirement to purchase from a wholesale distributor who purchases directly from a manufacturer, but that is what they have done thus far with their purchases from Anda.

Inspection Date: 8/8/2024

		Observation	Notes
47.05	Does the pharmacy purchase drugs from wholesale distributors that purchased the drug from other wholesale distributors? *If yes, Describe the due diligence steps to determine the source's legitimacy and legitimacy of the drugs sold by the vendor. (For instance, does the pharmacy examine transaction histories and limit the number of movements of drugs between wholesale distributors, and look for pharmacies in the supply chain?)*	No	
47.06	Does the pharmacy determine that all sources listed on transaction histories have requisite state licensing? *If yes, describe the process.*	No	They rely on Anda to track licensing of the Anda sources. The pharmacy keeps the packing slip and invoice for their orders.
47.07	Does the pharmacy determine that all sources listed on transaction histories have reported to FDA's Wholesale Distributor database? *If yes, describe the process.*	No	They rely on Anda to track licensing of the Anda sources. The pharmacy keeps the packing slip and invoice for their orders.
47.08	Does the pharmacy have a process to handle suspect and illegitimate product investigations? *If yes, describe the process.*	Yes	They have a process in their P&P they describe as contacting the wholesale distributor for further information and to explain their concerns.
47.09	Has the pharmacy conducted any suspect or illegitimate product investigations? *If yes, describe the details, including the drug, circumstances, outcome, and identification of agencies to whom reported.*	No	None to date.
47.10	Does the pharmacy ensure transaction data (transaction history, transaction information, transaction statement, also known as 3T data) is received at the same time or before the product is received? *Examine recent purchases to determine if the pharmacy is receiving and maintaining 3T data for a minimum of 6 years.*	No	To date they kept the shipment invoice which contains the transaction data and a direct purchase statement. They will be contacting the source, Anda, to provide the detailed DSCSA transaction data.
47.11	Does the pharmacy have a procedure to verify product (suspect or illegitimate) including quarantine of product and reporting?	No	
48.00	Does the pharmacy utilize paper DEA-222 forms to procure Schedule II substances? *If yes, how are they secured? Who has the authority (Power of Attorney) to sign the DEA-222 forms?*	N/A

Verified Pharmacy Program® Inspection Form

General Pharmacy Inspection

The information and comments obtained in the Nonsterile Compounding, Sterile Compounding Inspections, and Hazardous Drug Compounding are based on USP Chapters <795>, <797>, and <800>.
An inspection against current Good Manufacturing Practices (cGMPs) was not conducted. There may be some overlap in concepts.

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Notes
49.00	Does the pharmacy utilize CSOS (electronic Schedule II ordering) to procure Schedule II substances? *If yes, who can place orders in CSOS?*	N/A	
50.00	Is the receipt of Schedule II orders documented appropriately? *DEA-222 has the quantity and date on each line of product received, the CSOS record (electronic or paper printout) indicates verification of receipt and staff performing verification.*	N/A	
51.00	Are invoices for controlled substances (Schedules I-V) that are received filed separately and are the invoices signed/initialed and dated upon receipt and every item checked in?	N/A	
52.00	Are all orders received when the pharmacy is open? *Verify the orders are brought directly to the pharmacy still sealed and not delivered before the pharmacy is open.*	N/A	
53.00	Does the pharmacy purchase any compounded products from other entities for dispensing to patients? *If so, describe which products and from where they are purchase (collect name and license of other entity).*	No	
54.00	Does the pharmacy have a system in place to track prescription drug products in order to detect diversion or theft? *Describe (for example, inventory or shrink report tools used, perpetual inventory in computer, etc)*	Yes	The PIC performs a monthly inventory for quantity and expiration date.
54.01	Are incidents of diversion or resignation/termination of personnel for cause reported? *Indicate agencies/law enforcement to whom reports are made.*	Yes	They would notify the BOP. No instances to date.
55.00	Does the pharmacy keep a perpetual inventory log of all Schedule II controlled substances (including APIs, if applicable)?	N/A	
56.00	Is the Schedule II perpetual inventory log reconciled regularly? *Indicate how often the Schedule II controlled substances are counted. View the perpetual log and verify that reconciliation is taking place.*	N/A

An inspection against current Good Manufacturing Practices (cGMPs) was not conducted. There may be some overlap in concepts.

Facility Name: Get Relief RX, LLC

e-Profile ID: 1808699

Inspection Date: 8/8/2024

		Observation	Notes
57.00	Is the most recent complete controlled substances inventory available for review? *Indicate the date of the last inventory and frequency taken (minimum every two years).*	N/A	
57.01	Does the pharmacy maintain other required inventories (such as change in PIC, theft/loss, etc)?	N/A	
58.00	Does the pharmacy stock and sell OTC pseudoephedrine (and/or ephedrine) products? If yes, indicate if the sale is recorded electronically or manually in a logbook.	No	
58.01	Are these products mailed, sent, or delivered into other states? *View logs. If yes, list the other states.*	N/A	
59.00	Does the pharmacy stock and sell other OTC restricted products for which ID is required and a log kept of the sale? *If yes, indicate product types.*	No	
59.01	Are these products mailed, sent, or delivered into other states? *View logs. If yes, list the other states.*	N/A	
60.00	Are outdated, damaged, or recalled products segregated? *If yes, how often does the pharmacy check for out-of-date products? Does it include OTC products?*	Yes	These would be placed in the marked quarantine bin. Outdates checked monthly and pulled 6 months prior to expiration.
60.01	Are all drugs within active-stock within expiration date? *Examine shelves, refrigerator and freezer.*	Yes	For those items observed during the inspection.
60.02	How often is active-stock examined for drugs past the expiration date?		Monthly.
61.00	Does the pharmacy **prepackage** bulk containers of prescription medications into smaller containers for ease of use? *What BUD is used on the prepackaged container?*	No

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Notes
62.00	Does the pharmacy **prepack** multiple drugs into a single container for compliance packaging? *What BUD is used on the prepacked containers?*	N/A	
63.00	Does the pharmacy return to stock prescription drugs that were filled but never picked up?	No	Closed door pharmacy. All their drugs are shipped via USPS to patients.
63.01	If yes, are they maintained in the appropriate container, with PHI removed and BUD adjusted?	N/A	
	Prescription Processing **If any part of a question is no, enter "No" and explain the observation.**		
64.00	**Patient Profile:** Is patient profile data organized and readily accessible to facilitate consultation with the prescriber, patient, or caregiver? *Indicate who enters patient profile data into the computer system and how often it is updated?*	No	The pharmacy does not maintain a patient profile for their dispensing. Patient information in QuickBase is limited to the patient name and address.
64.01	If the pharmacy dispenses veterinary prescriptions, does the information gathered and recorded include the species, and name of the animal/owner as required by resident state law? *Describe how it is indicated in the computer system that the patient is an animal? And how is it indicated in the system the prescription is a veterinary prescription?*	N/A	
65.00	**Prescription:** Are adequate processes in place to assure the integrity, legitimacy, and authenticity of prescription orders? *Staff is familiar with detecting fraud in hard copy, faxed, verbal, and electronic prescriptions.*	Unknown	Prescriptions are only from two physicians, that are entered into QuickBase. Per the PIC prescriptions are written for patients based on an online questionnaire and may not reflect direct physician-patient discussion.
65.01	Is there a procedure to follow when a prescription is suspected of (or actually is) fraudulent? *Describe the steps and reporting process.*	No

An inspection against current Good Manufacturing Practices (cGMPs) was not conducted. There may be some overlap in concepts.

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Notes
65.02	Are adequate processes in place for assuring that prescription medications are not prescribed or dispensed based on online medical consultations without there being a pre-existing prescriber-patient/client relationship? *Describe. Do the processes include comparing the physical addresses of the patient and prescriber?*	No	The pharmacy relies on the prescribing physician to ensure the patient is appropriate to receive the drug. It appears the patients may receive the drugs based on an online questionnaire and without a prescriber-patient discussion or interaction.
65.03	Does the pharmacy have electronic prescription capability? *Indicate whether it is for non-controlled substances, controlled substances, or both.*	No	They do not receive complete prescriptions but receive prescription-related details in the dispensing queue per the closed system QuickBase with information linked to the prescriber.
65.04	If the pharmacy accepts electronic prescriptions for controlled substances, are they in compliance with federal regulations?	N/A	
66.00	**Accuracy:** Is the accuracy of the information entered into the computer system verified (patient information and prescription information)? *Indicate how and by whom.*	No	They rely on the prescriber to perform this service.
67.00	**DUR:** Does staff conduct prospective DUR prior to the dispensing of a medication or product? *Describe at what point in the process does the DUR take place?*	No	They rely on the prescriber to perform this service. They report they are adding a system to QuickBase where they will be able to see other drugs the patient may take and patient allergies.
67.01	Does the DUR include: • drug-drug interaction (Prescription and OTC), • drug-allergy interaction, • therapeutic duplication, • under- or over-utilization (including clinical abuse/misuse), • disease state or condition contraindication, • Incorrect dosage or duration of therapy, and • gender or age related contraindications. *Indicate if there are other parameters routinely included in the DUR.*	N/A	
67.02	In addition to the pharmacy DUR software, does the pharmacy staff obtain other information to use in the DUR process? *Describe.*	N/A

An inspection against current Good Manufacturing Practices (cGMPs) was not conducted. There may be some overlap in concepts.

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Notes
67.03	Does the pharmacy have adequate resources/references related to the type of pharmacy practice it operates?	Yes	The PIC has an electronic subscription to Epocrates available on his cellphone.
67.04	Does the pharmacy report required data to the state PMP (in this state and the other states in which the pharmacy is licensed)? *Describe.*	N/A	
67.05	Does the pharmacy access state PMP/PDMP data for specific patients? *Verify there is a policy regarding access and follow-up or reporting and that pharmacist can access the PMP data.*	N/A	
67.06	Are DUR overrides/bypasses documented? *Indicate how the override is documented and who has override capability.*	N/A	
67.07	Is the DUR process performed electronically by the computer system? ***Identify integrated drug database used.***	N/A	
67.08	If the DUR is manual, is there a system to document: • How manual DUR is performed • Specific issues that were identified • Pharmacist that considered the identified issues and gave the okay to proceed	N/A	
67.09	If the pharmacy dispenses veterinary prescriptions, does it have a veterinary drug database integrated into the computer system for electronic DUR? *List veterinary product electronic database used. If not, list compendia used for performing manual DUR.*	N/A	
68.00	Are filled prescriptions verified for accuracy prior to dispensing? *Indicate process, by whom, and how documented.*	Yes	The PIC looks at the QuickBase computer screen for the patient name and address to compare to the label, if that's accurate, he then looks at the capsules in the bottle to confirm they are intact, then the PIC prints the shipping label and ensures it matches the Rx label. The RPh initials are entered into QuickBase at the time of printing the shipping label, which indicates the RPh has verified the prescription.
69.00	Are filled prescriptions appropriately labeled? *Describe.*	Yes	They appear to contain expected information.

		Observation	Notes
70.00	**Confidentiality**: Does the system have adequate safeguards to prevent a user from performing functions under a different user account or beyond what they are authorized to perform? *Password protected, access limited by job type, access revoked as appropriate such as upon termination. Record name/brand of pharmacy computer system used.*	Yes	QuickBase. The system has a separate sign-on and passwords for the individual user.
70.01	Does the pharmacy destroy PHI including labeled prescription vials?	Yes	Inhouse shredder.
71.00	**Mail/Delivery:** If applicable, are packing materials designed to maintain the physical integrity, stability, and purity of prescription medications and compounded preparations in transport?	Yes	Using bubble pack envelopes with first class USPS mail.
72.00	**Off-Site Processes:** Are any portions of the prescription processing (in the questions below) performed at a different location? ***Note: Please ask each question below to verify.***	Yes	Patient information is entered by the prescribers, who are not pharmacy employees.
72.01	If yes, is the other location under common ownership? *If not commonly owned, explain if there is a central fill/shared services or other agreement in place. Record the name and license number for the other location.*	No	Patient information is entered by the prescribers, who are not pharmacy employees.
72.02	If yes, is that location in a different state than this facility? *If so, explain.*	Yes	The prescribers are in MS and MA.
72.03	If yes, are there policies and procedures for identifying who is responsible for each step of prescription processing?	No	
73.00	**Off-Site Inventory:** Does the pharmacy maintain any emergency kits in nursing homes, long-term care facilities, or other entities (such as hospice, EMTs, ambulances)? *Note name(s) of facilities or entities.*	No	
73.01	Do the emergency kits contain any compounded products? *If so, indicate whether sterile and/or nonsterile and are these stored, non-patient specific?*	N/A

		Observation	Notes
74.00	**Off-Site Inventory:** Does the pharmacy maintain any automated prescription dispensing devices outside the pharmacy such as Pyxis in a nursing home, or a secure mailbox device that patients access after hours, etc? *Note types and locations.*	No	
74.01	If yes, are the automated devices appropriately licensed, registered, or approved by the board of pharmacy? *Provide details.*	N/A	
74.02	Do the automated dispensing devices contain any compounded products? *If so, indicate whether sterile and/or nonsterile and are these stored, non-patient specific?*	N/A	
	Patient Counseling and Communication **If any part of a question is no, enter "No" and explain the observation.**		
75.00	Does the pharmacist provide counseling for all new prescriptions picked up at the pharmacy (proactively, no "offer")?	N/A	This is a closed-door pharmacy.
75.01	Is an "offer" to counsel made for all new prescriptions picked up at the pharmacy? *Indicate who makes the "offer".*	N/A	
76.00	Does the pharmacist provide counseling for all refilled prescriptions picked up at the pharmacy (proactively, no "offer")?	N/A	
76.01	Is an "offer" to counsel made for all refilled prescriptions picked up at the pharmacy? *Indicate who makes the "offer".*	N/A	
77.00	Does the pharmacist provide counseling for refilled prescriptions picked up at the pharmacy when there is a change in therapy or other issue determined by the pharmacist (proactively, no "offer")?	N/A	
77.01	Is an "offer" to counsel made for all refilled prescriptions picked up at the pharmacy when there is a change in therapy or other issue determined by the pharmacist? *Indicate who makes the "offer".*	N/A

Facility Name: Get Relief RX, LLC

e-Profile ID: 1808699

Inspection Date: 8/8/2024

		Observation	Notes
78.00	Is patient counseling provided for delivered prescriptions? *Printed information sent to patient, toll-free number for patients to call, pharmacist calls patients directly, etc? Describe how.*	N/A	
79.00	Is patient counseling provided for mailed prescriptions? *Printed information sent to patient, toll-free number for patients to call, pharmacist calls patients directly, etc? Describe how.*	Yes	The prescription vial and the pharmacy/general compounded drug information sheet that accompanies shipments, includes the pharmacy's toll-free phone number. Patients can call the 888 number and reach the Shepherd's Holding receptionist next door, who will forward the call to the PICs personal cell phone number or send him a text message to return the call. After hours, the caller can leave a message to be returned the next day the pharmacy is open. There is no pro-active phone calls for patient counseling.
80.00	Are patient package inserts (PPIs) provided with every fill and refill of medications for which they are required (such as hormone products, inhalers, etc)? *Describe how.*	N/A	None of this type of dispensing.
81.00	Are MedGuides provided with every fill and refill of medications for which they are required (such as NSAIDS, antidepressants, etc)? *Describe how.*	N/A	None of this type of dispensing.
82.00	Are REMS (Risk Evaluation Mitigation Strategy) implementation programs performed? Confirm that procedures are in place. *List programs (such as iPledge for isotretinoin, or Tikosyn).*	N/A	
83.00	Is patient counseling, the offer to counsel, or the refusal of patient counseling documented? *Describe how.*	No	The pharmacy asked the company owners to add a 'notes' section in QuickBase where the pharmacist can enter patient-specific information.
84.00	Do patients have 24-hour access to a pharmacist? *Note: may not be required by the resident state. Describe how (such as posted contact information and hours of operation).*	No	A patient can leave a message and have the call returned during normal pharmacy business hours.
85.00	Are processes in place to handle a drug recall?	Yes	They would be notified by their wholesale distributor.
86.00	Does the pharmacy accept prescription drugs back for destruction as part of a drug take-back program?	No

Inspection Date: 8/8/2024

		Observation	Notes
86.01	Does the take-back program include controlled substances?	N/A	
86.02	Does the pharmacy have a modified DEA registration for controlled substance take-back? *If yes, list.*	N/A	
	Quality Assurance/Quality Improvement Program **If any part of a question is no, enter "No" and explain the observation.**		
87.00	Is there a documented continuous quality improvement (CQI) Program for the purpose of detecting, documenting, assessing, and preventing quality related events (QREs)? *If yes, list who oversees the program.*	Yes	The PIC.
87.01	Policies and procedures for the program are maintained in the pharmacy in an immediately retrievable form. *Indicate if hard copy, electronic, or both.*	Yes	Hard copy.
87.02	"Quality-Related Event" (QRE) is defined to mean any departure from the appropriate dispensing of a prescribed medication that is or is not corrected prior to the delivery and/or administration of the medication including (but not limited to): 1. a variation from the prescriber's prescription drug order such as incorrect drug, strength, form, or patient; or inadequate or incorrect packaging, labeling, or directions; 2. a failure to identify and manage over-utilization or under-utilization; therapeutic duplication; drug-disease contraindications; drug-drug interactions incorrect drug dosage or duration of drug treatment; drug-allergy interactions; or clinical abuse/misuse. 3. packaging or warnings that fail to meet recognized standards, the delivery of a medication to the wrong patient, or the failure to detect and appropriately manage a significant actual or potential problem with a patient's drug therapy.	Yes	The information is included on the QRE Report Form and the Rx Incident Report Form, which are in a binder separate from the P&Ps. It is unclear which form is used for a detected issue.

Inspection Date: 8/8/2024

		Observation	Notes
87.03	There is documentation of initial/ongoing (at least yearly) review and training of all pharmacy employees on the CQI program and processes. *For example, may be formal training or reviewed at a yearly meeting.*	No	
88.00	**Documentation of QREs** starts as soon as possible, but no more than three days, after determining their occurrence. *Indicate if documentation/forms are hard copy or electronic.*	No	Per the PIC, they would initiate documentation and an investigation as soon as possible and use the Rx incident report form. No forms to review with information below based on the blank forms. The pharmacy had potency testing performed by ARL on a CNSP batch which was below the intended range of 90%-110%, however there was no QRE form filled out to reflect follow-up actions or an investigation. Doc01_GP88.00.
88.01	Documentation includes all the pertinent data about the prescription involved including personnel involved at each step.	Yes	There are spaces to describe the incident.
88.02	Documentation includes documenting the type of QRE details and how/who discovered the QRE.	Yes	There are spaces to describe the incident.
88.03	Documentation incudes possible contributing factors such as day and time the QRE occurred, number of pharmacists and technicians on duty, prescription volume that day, equipment failure, or other factors affecting work-flow at the time.	No	There is a space to describe anything special or unusual about the day the QRE occurred.
88.04	Documentation includes steps taken to remediate including communications with the patient and the provider, and if the medication was ingested, disposition of the patient.	Yes

		Observation	Notes
89.00	**QRE data** collected is analyzed to assess causes and any contributing factors (root cause). *Indicate who performs the analysis and frequency (with each event, weekly, monthly, quarterly, etc).*	No	Per the PIC, he would perform root cause analysis with each incident. They have an Annual Quality Program Review form they anticipate using quarterly. The pharmacy had potency testing performed on a CNSP batch which was below the intended range of 90%-110%, however there was no QRE form filled out to reflect actions or an investigation.
89.01	The pharmacy uses the findings of the analysis to formulate an appropriate response and develop pharmacy systems and workflow processes designed to prevent QREs and increase good outcomes for patients.	Yes	Per process.
89.02	For pharmacies utilizing a drug formulary, a periodic review of such formulary is undertaken to ensure that appropriate medications are being offered/selected in the best interest of patients.	N/A	
90.00	**Quality meetings** are held at least annually by staff members of the pharmacy to consider the effects on quality of the pharmacy system due to staffing levels, workflow, and technological support.	Yes	They plan to have quarterly quality staff meetings. None held to date due to recent pharmacy opening.
90.01	The meeting reviews data showing evidence of the quality of care for patients and develops plans for improvements to increase good outcomes for patients.	N/A	
90.02	Improvements or changes made are evaluated for performance to measure the effectiveness of the CQI program.	N/A

Verified Pharmacy Program® Inspection Form

General Pharmacy Inspection

The information and comments obtained in the Nonsterile Compounding, Sterile Compounding Inspections, and Hazardous Drug Compounding are based on USP Chapters <795>, <797>, and <800>.

An inspection against current Good Manufacturing Practices (cGMPs) was not conducted. There may be some overlap in concepts.

Facility Name: Get Relief RX, LLC

e-Profile ID: 1808699

Inspection Date: 8/8/2024

		Observation	Notes
91.00	**Reporting:** Incidents of QREs are reported to a nationally recognized error reporting program, an outside peer review committee, or a patient safety organization. *Indicate which organizations are reported including if the pharmacy reports QREs to the board of pharmacy.*	Yes	If the QRE resulted in a recall, it would be reported to the BOP. None to date.
91.01	Adverse events are reported to the appropriate entities such as the board of pharmacy, MedWatch, FDA, VAERS, etc?	No	
91.02	Incidents involving malfunctioning or defective medical equipment or devices (blood glucose meters, DME, injection devices, etc) are documented and reported to the manufacturer or distributor.	N/A	
92.00	**Quality Self-Audits** are performed by the pharmacy at least quarterly (and upon change in PIC) to determine whether the occurrence of QREs has decreased and whether there has been compliance with preventative procedures, and to develop a plan for improved adherence with the CQI program in the future.	Yes	They plan a quarterly review of quality issues, or with any specific issues. No audits to date.
93.00	**Consumer Surveys** are conducted at least yearly of patients who receive pharmaceutical products and services at the pharmacy. A statistically valid sampling technique may be used in lieu of surveying every patient. Each pharmacy should use the results of its consumer survey to evaluate its own performance at a particular time and over a period of time.	No	
94.00	**Patient Complaints** are documented, tracked, and investigated as appropriate and the information is used as part of the CQI program.	Yes	They report they have had no patient complaints.

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
	Standard Operating Procedures for Compounded Nonsterile Preparations (CNSPs)		**Please note NABP did not review each SOP for alignment on USP <795>. The SOP(s) described below is/are a reflection of any self-assessment completed by the pharmacy and/or shared with the inspector during the onsite inspection.**	
1.0	Does the pharmacy have standard operating procedures (SOPs) on all aspects of the compounding operation that cover the minimum topic requirements in USP <795> standards? ***If no, document "missing" in Inspector Notes*** ***If yes, document the name, number, and version of each SOP in the Inspector Notes.***	Yes	Per the provided self-assessment.	11
1.1	**Buildings and Facilities:** The pharmacy has an SOP for the compounding facility. ***Inspector note: Per USP <795>, there is a written SOP for "the method of designation" for the area designated specifically for nonsterile compounding and processes for maintaining, cleaning, and sanitizing the compounding area and equipment.***		Designation: SOP 3.00 Cleaning: SOP 3.02	4.1, 5, 11
1.2	**Personnel Training and Evaluation:** The pharmacy has an SOP describing the training program, the frequency of training, and the process for evaluating the competency of personnel. ***Inspector note: Per USP <795>, "Facility SOPs must describe procedures for monitoring and observing of compounding activities and personnel."***		SOP 2.00 F 2.00.01	2, 11

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
1.3	**Personal Hygiene and Garbing:** The pharmacy has an SOP regarding personal hygiene, glove, and garbing requirements consistent with compounding activities. ***Inspector note: Per USP <795>, "Garbing requirements and frequency of changing garb must be determined by the facility and documented in the facility's SOPs."***		SOP 2.02	3.3, 11
1.4	**Components:** The pharmacy has an SOP describing selection, handling, storage, and inventory control of all components used in compounding. ***Inspector note: Per USP <795>, "The compounding facility must have written SOPs for the selection and inventory control of all components from receipt to use in a CNSP."***		SOP 7.00 Selection SOP 7.01 Evaluation	6.2, 11
1.5	**Temperature Monitoring:** The pharmacy has an SOP regarding temperature monitoring and handling of excursions. ***Inspector note: Per USP <795>, "The compounding facility must adhere to SOPs to detect and reduce the risk of temperature excursions within the storage area(s)."***		SOP 3.01	4.2, 11
1.6	**Equipment**: The pharmacy has an SOP for assessment of need for closed system processing devices (based on the types of CNSPs prepared). ***Inspector note: Per USP <795>, "Weighing, measuring, or otherwise manipulating components that could generate airborne chemical particles (e.g., active pharmaceutical ingredients [APIs], added substances, and conventionally manufactured products) must be evaluated to determine if these activities must be performed in a closed-system processing device to reduce the potential exposure to personnel or contamination of the facility or CNSPs. Examples of closed-system processing devices include containment ventilated enclosures (CVEs), biological safety cabinets (BSCs), and single-use containment glove bags. The process evaluation must be carried out in accordance with the facility's SOPs, and the assessment must be documented."***		SOP 4.00 "The Assessment is F 4.00.01 Equipment Need is Assessment."	6.1, 11

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
1.7	**Safety Data Sheet (SDS)/Spill Management:** The pharmacy has an SOP describing spill management and disposal. ***Inspector note: Per USP <795>, "The management and documentation of nonhazardous component spills and disposal must be described in the facility's SOPs."***		SOP 3.03	6.2.5, 11
1.8	**Master Formulation Records (MFR):** The pharmacy has an SOP on the process for MFR creation and content. ***Inspector note: Per USP <795>, "Any changes or alterations to a Master Formulation Record are approved and documented in accordance with the facility's written SOP."***		SOP 1.01	7.1, 11
1.9	**Labeling:** The pharmacy has an SOP on the processes for labeling, label verification (confirming against the prescription or medication order, the MFR, and the compounding record (CR)) in order to prevent errors and CNSP mix-ups and required displayed information. ***Inspector note: Per USP <795>, "Labeling procedures must be followed as described in the facility's SOPs to prevent labeling errors and CNSP mix-ups."***		SOP 6.07 Release Inspections	9, 11
1.10	**Quality Assurance (QA)/Quality Control (QC) Program:** The pharmacy has an SOP regarding its QA and QC program, including roles of the designated person(s), trainers, compounding personnel; adherence to procedures; and prevention and detection of errors and quality issues. ***Inspector note: Per USP <795>, "QA and QC programs must be formally established and documented in SOPs that ensure that all aspects of the preparation of CNSPs are conducted in accordance with this chapter, and laws and regulations of the applicable regulatory jurisdiction."***		SOP 1.04 Personnel SOP 1.05 DP SOP 6.04 QA Program	11, 12 USP <1163>

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
1.11	**QA/QC Program Complaint Handling and Adverse Event Reporting:** The pharmacy has an SOP for evaluation of complaints and adverse events, including investigations and corrective actions. ***Inspector note: Per USP <795>, the pharmacy, "must develop and implement SOPs for complaint handling." SOPs are to include any state or federal requirements for reporting to government agencies (example adverse event reporting). Further, "Consider whether to initiate a recall of potentially affected CNSPs and whether to cease compounding until problems have been identified and corrected."***		SOP 6.02 Complaint Handling	1.1.3, 11, 12.1, 12.2, 12.3
1.12	**Packaging:** The pharmacy has an SOP describing packaging CNSPs. ***Inspector note: Per USP <795>, "SOPs must describe packaging of CNSPs."***		SOP 7.00	11, 13.1
1.13	**Transporting:** The pharmacy has an SOP describing transporting CNSPs. ***Inspector note: Per USP <795>, there must be "written SOPs to describe the mode of transportation, any special handling instructions, and whether temperature monitoring devices are needed."*** ***If the pharmacy does not transport CNSPs, inspector should answer statement as N/A.***		SOP 5.02	11, 13.2

National Association of Boards of Pharmacy®
Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
2.1	The designated person(s) (for the QA program) has the training, experience, responsibility, and authority to perform the duties required of them.	Unknown	It is unclear if the PIC has the training and experience as there were no training records to review.	1.1.4, 12
2.2	The designated person(s) reviews facility SOPs at least every 12 months to ensure that they reflect current practice and such review is documented. ***Inspector note: Per USP, "The facility's SOPs must describe the roles, duties, and training of the personnel responsible for each aspect of the QA program... The overall QA and QC program must be reviewed at least once every 12 months by the designated person(s). The results of the review must be documented, and appropriate action must be taken if needed."***	Yes	This is a new pharmacy that opened in May/June of 2024 and began compounding and dispensing in June 2024. The SOPs are newly developed with input of a consultant.	1.1.4, 12
2.3	The designated person(s) is responsible for overseeing a training program to ensure competency of personnel involved in compounding, handling, and preparing CNSPs.	Yes		1.1.4, 2
2.4	The designated person(s) is responsible for selecting components used by the pharmacy.	Yes		1.1.4, 6.2.1
2.5	The designated person(s) is responsible for monitoring and observing compounding activities and taking immediate corrective action if deficient practices are observed.	Unknown	It appears there was no potency testing or other evaluation performed on the CNSP to assess their MFR prior to initial dispensing to patients.	1.1.4
2.6	The designated person(s) is responsible for ensuring SOPs are fully implemented and following up if problems, deviations, or errors are identified.	Unknown	The pharmacy had copies of the prior USP 795 and did not update to the new USP 795 until made aware by the inspector.	1.1.4, 11
2.7	The designated person(s) is responsible for establishing, monitoring, and documenting procedures for the handling and storage of CNSPs and/or components of CNSPs.	Yes		1.1.4

National Association of Boards of Pharmacy®
Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
3.0	Has the pharmacy created and implemented a training program that is in compliance with USP <795> standards? ***Inspector note: Per USP, "Training and competency of personnel must be documented."*** ***Inspector is to review a minimum of five personnel records and document their observations (see <795> Records Review module).*** ***If no, go to compliance statements.***	Unknown	This is a new pharmacy and the training program is newly initiated without clear documentation of requirements. There are only two staff and training records are only present for PT Mayzie Manning.	2, 14
3.1	All personnel who compound CNSPs have been initially trained and qualified before being allowed to independently compound (eg, perform their job functions). ***Inspector note: Per USP, compounding personnel are defined as "Personnel trained to compound or oversee compounding of preparations."*** ***If questions 1.0-1.12 in the records review tab for compounding personnel are answered "no" or "missing," this statement should be answered as no. For details, see Records Review module.***	No	The PIC has limited compounding experience in the past. Per the PIC, he reached out to Richie's pharmacy in Houston and a pharmacy owned by Reed Hogan Sr, for some guidance. PT Mayzie Manning has approximately one year's experience with compounding from another pharmacy and repeated some USP CEs for nonsterile and sterile compounding. The consultant Lindsay Wall comes as needed and is available daily by telephone.	2, 14
3.2	All personnel who have direct oversight, perform in-process checks, final verification of a CNSP, and/or dispense a CNSP have been initially trained and qualified (according to SOPs) being allowed to independently perform their job functions. ***If questions 1.0-1.12 in the records review tab for compounding personnel are answered "no" or "missing," this statement should be answered as no. For details, see Records Review module.***	No	The PIC performs the in-process checks, however he does not have documented training available to review during the inspection.	2, 14

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
3.3	All compounding personnel, including those who have direct oversight of compounding personnel, have completed an initial training and at least every 12 months thereafter. ***Inspector note: Per USP, "Other personnel, who do not compound and only perform functions such as in-process checks, final verification, or dispensing of CNSPs must undergo training as required by the facility's SOPs."*** ***If questions 2.0-2.12 in the records review tab for compounding personnel or personnel who have direct oversight over compounding personnel are answered "no" or "missing," this statement should be answered no. For details, see the Records Review module.***	No	The PIC does not have documented training available to review during the inspection.	2, 14
4.0	Does the designated person(s) have a documented (periodic) evaluation of their direct observations for compounding activities and documentation of any deficiencies in the record? ***Inspector note: Per USP, this is a recommendation, "the designated person(s) should monitor and observe compounding activities and must take immediate corrective action if deficient practices are observed. Facility SOPs must describe procedures for monitoring and observing compounding activities and personnel."*** ***Inspector should complete the <795> Records Review module question 3.0.***	No		2, 14
	Compounding Personal Hygiene and Garbing			
5.0	Does the pharmacy have a process to ensure all personnel entering the compounding area adhere to restrictions intended to minimize the risk of contamination in compliance with USP <795> standards? ***If no, go to compliance statements.***	Yes		3
5.1	Compounding personnel are required to report to the designated person(s)conditions that may contaminate the compounding preparation area. ***Inspector note: Per USP <795>, examples of conditions that have a higher risk of contaminating the CNSP include: rashes, recent tattoos, open sores, conjunctivitis, and active respiratory infection.***	Yes

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
5.2	The designated person(s) is responsible for evaluating whether compounding personnel should be excluded from working in the compounding areas before their conditions have resolved.	Yes		3
5.3	Personnel removes any unnecessary items (outer garments, jewelry that could interfere with garbing, and earbuds/headphones) before entering the compounding area. ***Inspector note: Inspector should also observe compounding area to identify any items stored that do not belong (ie, dirty garments, jackets, or electronics).***	Yes		3.1
5.4	If personnel do not remove an item, the designated person has determined that the quality of the environment and CNSPs are not adversely affected by the accommodation.	Yes		3.1
6.0	Do personnel perform hand hygiene, wear required garb and gloves, and follow requirements in compliance with USP <795> standards? ***If no, go to compliance statements.***	Yes		3.3
6.1	All personnel entering the compounding area complete hand hygiene procedures.	Yes		3.2 Box 1
6.2	Garb is used for all compounding activities. ***Inspector note: Per USP <795>, gloves are mandatory garb for all compounding activities.***	Yes		3.2, 3.3 Box 1
6.3	Pharmacy uses SDS to determine other garb requirements for the components and compounding activity.	Yes	Hard copies in a binder.	3.3
6.4	Additional garb (shoe covers, hair and facial hair covers, face masks, gowns) is worn as needed for protection of the personnel/CNSPs. ***If no, please list the garb worn for the type of component and compounding activity.***	Yes	Washable lab coat, disposable shoe covers, N95 masks, gloves, bouffants.	3.3
6.5	The garb purchased by the pharmacy is appropriate for the type of compounding being performed.	Yes		3.3

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
6.6	Garb is stored in manner that minimizes risk of contamination (away from sinks to avoid splashing, etc).	Yes		3.3
6.7	Gowns that are reused do not leave the compounding area.	Yes	Lab coats are washed when visibly soiled or at least once monthly in a washer/dryer in an adjacent space. They anticipate ordering disposable gowns to use for compounding.	3.3
6.8	Visibly soiled garb or garb with tears or punctures are changed immediately (are not reused).	Yes		3.3
6.9	Soiled garb is disposed of or sent for laundering.	Yes		3.3
6.10	Shoe covers, hair and facial hair covers, face masks, and head covers are not reused once personnel have left the compounding area.	Yes		3.3
7.0	Are non-disposable garb such as goggles cleaned then sanitized with 70% isopropyl alcohol before re-use?	N/A		3.3
	Buildings and Facilities			
8.0	Does the compounding area meet the facility requirements in compliance with USP <795> standards? ***If no, go to compliance statements.***	No		4.1
8.1	The pharmacy has a designated compounding space for nonsterile compounding.	Yes	A segregated compounding space with a loose sliding door that can be closed to limit noise. The automatic capsule machine is along one wall in the general pharmacy space outside the segregated compounding room.	4.1
8.2	The compounding area is well lit.	Yes		4.1

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
10.1	The pharmacy records the temperature of the compounding storage area on days when the pharmacy is open. ***Inspector note: Per USP, "Compounding personnel must monitor temperatures in the storage area(s) either manually at least once daily on days that the facility is open, or continuously with a temperature recording device to ensure the temperature remains within the appropriate range for the CNSPs and components."*** ***If pharmacy does not use a continuous recording system, describe the frequency of temperature recording in the notes.***	Yes		4.2
10.2	The pharmacy's temperature monitoring records are readily retrievable. ***Inspector note: Per USP, "The results of the temperature readings must be documented on a temperature log or stored in the continuous temperature recording device and must be retrievable."***	Yes	Temperatures are on written logs recorded morning and afternoon on days the pharmacy is open. The log for August is not dated but per the PIC, the month and year will be written on the paper at the end of the month.	4.2
10.3	Temperature monitoring devices are verified for accuracy at least every 12 months or as required by the manufacturer. ***Inspector note: Per USP, "All temperature monitoring equipment must be calibrated or verified for accuracy as recommended by the manufacturer or every 12 months if not specified by the manufacturer." USP reports that these devices may be verified against a calibrated device.*** ***Monitoring devices are typically calibrated or replaced.***	No	Temperature readings taken from a ThermPro digital thermometer located in one corner of the general pharmacy space. This thermometer is not calibrated.	4.2
10.4	Pharmacy has a process to evaluate temperature excursions. ***Inspector note: Per USP, "When it is known that a CNSP or component has been exposed to temperatures either below or above the storage temperature limits for the CNSP or component, personnel must determine whether the CNSP or component integrity or quality has been compromised and if so, the CNSP or component must be discarded."***	Yes		4.2

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
10.5	CNSPs, components, equipment, and containers are stored off the floor.	Yes		4.2
10.6	CNSPs, components, equipment, and containers are stored in a manner that permits inspection and cleaning of the storage area(s).	Yes		4.2
10.7	CNSPs, components, equipment, and containers are stored in a clean environment (free of dirt, dust, and debris, and rodent/pest/insect free) to prevent contamination.	Yes		4.2
11.0	What is the current temperature of the nonsterile compounding storage area? ***Record in the Inspector Notes.***		72°F	4.2
12.0	Are plumbing fixtures, water sources, and cleanliness of sink in compliance with USP <795> standards? ***If no, go to compliance statements.***	Yes		4.3
12.1	The pharmacy staff can easily access a sink within or nearby the nonsterile compounding area.	Yes		4.3
12.2	There is hot and cold running water available at the sink within or nearby the nonsterile compounding area.	Yes		4.3
12.3	The sink is emptied of all items unrelated to compounding and before being used to clean any equipment used in nonsterile compounding.	Yes		4.3
12.4	The sink is cleaned when visibly soiled (before being used to clean equipment used in nonsterile compounding).	Yes		4.3
12.5	The plumbing system is free of any defects that may contribute to contamination of CNSPs.	Yes		4.3

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
13.0	Is purified water, distilled water, or reverse osmosis water used for rinsing equipment and utensils used in nonsterile compounding? ***Inspector note: This is a USP recommendation.***	No	Rinsed with tap water.	4.3 USP <1231>
	Cleaning and Sanitizing			
14.0	What agent(s) are used for cleaning and sanitizing the nonsterile compounding area? ***Inspector note: Per USP <795>, "agents must be selected and used with consideration of compatibilities, effectiveness, and minimal potential to leave residues."*** ***List the agents in the Inspector Notes.***		They clean shelves and equipment with 70% IPA as listed on the cleaning log. Floors are cleaned with Zep, not listed on the cleaning log.	5
15.0	Does the pharmacy perform cleaning and sanitizing activities on all surfaces at the minimum frequency per Table 1 and documented in a log or other record in compliance with USP <795> standards? ***Review compounding cleaning logs.*** ***If no, go to compliance statements.***	No	The cleaning log indicates countertops are cleaned every day of the month, however they are actually cleaned only days the pharmacy is open (M-Th).	5 Table 1
15.1	All work surfaces are cleaned and sanitized at the **beginning of each shift** on days when compounding occurs.	Yes		5 Table 1
15.2	All work surfaces are cleaned and sanitized at the **end of each shift** on days when compounding occurs.	Yes		5 Table 1
15.3	All work surfaces are cleaned and sanitized **between compounding CNSPs with different components**.	N/A	Their compounding is limited to the same CNSP.	5 Table 1
15.4	Floors are cleaned and sanitized daily on days when compounding occurs.	No	Floors cleaned once a week using Zep (as labeled) but the Zep is not listed on the cleaning log.	5 Table 1

National Association of Boards of Pharmacy®
Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
15.5	Walls and ceilings are cleaned and sanitized when visibly soiled. ***Inspector note: No specific frequency is specified by USP. View compounding area walls and ceilings. If inspector observes soiled walls or ceilings, inspector should answer statement as no.***	No	Walls and ceilings were cleaned when the pharmacy opened approximately 2 months ago, but no plan for recleaning.	5 Table 1
15.6	All work surfaces, floors, walls, ceilings and storage shelving are cleaned and sanitized when surface contamination (eg, splashes) or spills are known or suspected.	Yes		5 Table 1
15.7	Storage shelving is cleaned and sanitized at least every three months.	Yes	Cleaned once a week with 70% IPA.	5 Table 1
16.0	Are floors in the compounding area easily cleanable, non-porous, and non-particle generating? ***Inspector note: This is a USP recommendation. Per USP, "Surfaces should be resistant to damage by cleaning and sanitizing agents."***	Yes		5
	Equipment and Components FDA defines manufacturer... as used in section 510 of the Federal Food, Drug, and Cosmetic Act, includes the activities of relabelers, repackers, and salvagers. When not modified by "domestic" or "foreign," the term includes both domestic manufacturers and foreign manufacturers.			
17.0	Does the pharmacy use a closed-system processing device (eg, CVE, BSC, and single-use containment glove bags)? ***Inspector note: Per USP, examples of closed-system processing devices include: containment ventilated enclosures (CVEs), biological safety cabinets (BSCs), and single-use containment glove bags.*** ***If yes, list the type(s) in the Inspector Notes.***	No	No PEC in use.	6.1

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
18.0	Does the pharmacy select, store, clean, and maintain equipment in compliance with USP <795> standards? ***Inspector note: Per USP <795>, "Equipment surfaces that contact components are not reactive, additive, or sorptive, and must not alter the quality of CNSPs."*** ***Review certification reports, calibration records, and cleaning logs.*** ***If no, go to compliance statements.***	No		6.1
18.1	Equipment and supplies are readily available at the pharmacy for the types of CNSPs prepared. ***Inspector note: For example, if the pharmacy compounds with API as a component, which must be weighed, a scale or balance would be expected.***	Yes		6.1
18.2	Pharmacy has evaluated and documented the nonsterile compounding pharmacy activities for weighing, measuring, and otherwise manipulating for an assessment of risk. ***Inspector note: Per USP, "components that could generate airborne chemical particles (eg, active pharmaceutical ingredients [APIs], added substances, and conventionally manufactured products) must be evaluated to determine if these activities must be performed in a closed-system processing device to reduce the potential exposure to personnel or contamination of the facility or CNSPs."*** ***If no, inspector should describe observations.***	No	Per the PIC this was not performed nor documented. They crush commercially manufactured tablets in a room with a ceiling exhaust fan that vents outdoors. The crushed powder is also handled in the capsule machine area in the general pharmacy area.	6.1

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
18.3	The equipment and devices used for compounding CNSPs are clean and stored in a manner and frequency that minimizes the risk of contamination. ***Inspector note: Per USP <795>, "After compounding, the equipment must be cleaned to prevent cross contamination of the next preparation." Additionally, per Table 2:*** ***- CVE/BSC are cleaned and sanitized at the beginning and end of each shift when compounding occurs, after spills, and when surface contamination (e.g., from splashes) is known or suspected;*** ***- CVE/BSC horizontal surfaces are cleaned and sanitized between compounding of different components;*** ***- Under the work surface of a BSC is cleaned and sanitized at least monthly; and*** ***- Other devices and equipment used in compounding are cleaned before initial use, in between compounding CNSPs with different components, and following manufacturer recommendations.*** ***If no, inspector should describe observations.***	No	There was visible powder inside the lid of the blender used to crush tablets used in compounding. The V1 mixer had dust on the surface which they said they do not clean between compounding batches. Photo02_NS8.3, Photo03_NS18.3.	6.1 Table 2
18.4	Equipment and devices used in compounding or testing of CNSPs are inspected prior to use (to ensure they are in good working order). ***Inspector note: For example, the pharmacy may need to tare a scale and/or balance prior to use.***	Yes		6.1
18.5	Equipment and devices are verified for accuracy as recommended by the manufacturer (at the frequency recommended by the manufacturer or at least every 12 months, whichever is more frequent). ***If the pharmacy does not compound CNSPs that require equipment or devices that must be calibrated for accuracy (such as ones needed for weighing or measuring), the inspector should answer this statement as N/A.***	Unknown	Their scale is calibrated with a weight, weekly, and prior to compounding. The scale is located on a rolling table (wheels locked) that vibrates a lot when the RO-tap sieve is shaking. It is unknown if the vibrations impact the scale.	6.1

National Association of Boards of Pharmacy®
Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
18.6	If a CVE or BSC is used by the pharmacy, it is certified at least every 12 months, according to the manufacturer specifications or regulations of the applicable regulatory jurisdiction. ***If the pharmacy does not have the record or documentation of the certification and maintenance of the CVE/BSC, the inspector should answer this statement as no. If the pharmacy does not have a CVE or BSC, the inspector should answer this statement as N/A.***	N/A		6.1
19.0	Does the pharmacy compounding CNSPs use APIs?	No	Compounding is with commercial OTC and Rx tablets.	6.2
20.0	Does the pharmacy select APIs that comply with the requirements in USP <795> standards? ***Verify by selecting products from the shelf from different suppliers and ask to see the COAs for those products.*** ***If no, go to compliance statements.***	N/A		6.2.1
20.1	APIs comply with criteria in the USP-NF monograph, if one exists. ***If the pharmacy does not compound any CSPs that have an available USP monograph, the inspector should answer this statement as N/A.***	N/A		6.2.1
20.2	All APIs used have a COA that includes the specifications (eg, compendial requirements for quality) and that the test results for the component show the API meets expected quality. ***Inspector note: Per USP, the API should be checked to ensure it is pharmaceutical grade and meets the requirements in the chemical monograph. COA will report an assay has been performed and will include water content (so any corrections/calculations can be performed).***	N/A		6.2.1

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
20.3	All APIs used are manufactured by an FDA-registered facility. ***Inspector note: This is a Federal Food, Drug, and Cosmetic Act, Section 503A, requirement as well. Inspector should verify the pharmacy looks up the name of the manufacturer listed on the COA to determine if they are registered as an FDA drug establishment https://dps.fda.gov/decrs.***	N/A		6.2.1
21.0	When formulations indicate the inclusion of water, is purified water or better quality (eg, sterile water for irrigation) used in compliance with USP <795> standards?	N/A		6.2.1
22.0	What type(s) of water is used for compounding CNSP? ***List the type(s) in the Inspector Notes.***		They are not utilizing water in compounding.	6.2.1
23.0	Do the pharmacy's component receipt processes comply with the requirements in USP <795> standards? ***If no, go to compliance statements.***	Yes		6.2.2
23.1	For non-conventionally manufactured components, the COA is reviewed upon receipt. ***Inspector note: Per USP, "the COA must be reviewed to ensure that the component has met the acceptance criteria in an appropriate USP–NF monograph, if one exists." Pharmacy's review should be documented. Alternatively, the pharmacy can demonstrate how it's been reviewed (for example, there are notes to show a water content calculation back to 100% based on the specific COA). Inspector can verify the COA is retrievable.***	N/A	They are utilizing Loxasperse from PCCA for which they state they do not receive a COA.	6.2.2

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
23.2	The pharmacy documents specific information according to the facility's SOP, including: receipt date, quantity received, supplier name, lot number, expiration date, and the results of any testing performed (whether performed in-house or through a third-party).	Yes		6.2.2, 14
23.3	For all components that lack a vendor expiration date, the pharmacy clearly and indelibly marks on each packaging system received the date the component must no longer be used by the pharmacy. ***Inspector note: Per USP, "Packaging systems of components (i.e., API and added substances) that lack a vendor's expiration date must not be used by the compounding facility after 3 years from the date of receipt. A shorter expiration date must be assigned according to Pharmaceutical Compounding—Sterile Preparations 797 , 9.3.2 Component receipt if the same component container is also used in sterile compounding or if the ingredient is known to be susceptible to degradation."***	N/A	They are not handling components without a vendor expiration date.	6.2.2
23.4	Any component found to be of unacceptable quality upon receipt or reinspection prior to use is promptly rejected, clearly labeled as rejected, and segregated from active stock to prevent use before appropriate disposal.	Yes		6.2.2
23.5	Any other lots of that (rejected) component from that vendor are examined to determine whether other lots have the same defect.	Yes		6.2.2
24.0	Does the pharmacy re-inspect all components before use and handle them in compliance with USP <795> standards? ***If no, go to compliance statements.***	Yes		6.2.3, 6.2.4

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
24.1	Compounding personnel visually re-inspect each component, including packaging system (any evidence of container breakage, looseness of cap or closure) and deviation from the expected appearance or texture of the contents (that might have changed during storage).	Yes		6.2.3
24.2	Compounding personnel ascertain before use that components are the correct identity based on labeling, that they have been stored under required conditions, and there is no evidence of deterioration or other aspects of unacceptable quality before use of component.	Yes		6.2.3
24.3	Components where correct identity, strength, purity, and quality cannot be confirmed (eg, containers with damaged or incomplete labeling), are immediately rejected and if not immediately discarded, labeled as rejected and segregated from active stock.	Yes		6.2.3
24.4	Compounding personnel handle all components following facility SOPs, manufacturer's instructions/labeling, and laws/regulations of the applicable regulatory jurisdiction.	Yes		1.1.3, 6.2.4
24.5	All components are handled in a manner that minimizes the risk of contamination, mix-ups, and deterioration.	Yes		6.2.4
25.0	When components are removed from the original container and not used in compounding (eg, excess after weighing), are they discarded and not returned to the original container (to minimize risk of contamination of the original component container)? ***Inspector note: This is a USP recommendation.***	No		6.2.4
26.0	Does the pharmacy maintain a chemical hazard, spill management, and disposal information program in compliance with USP <795> standards? ***If no, go to compliance statements.***	No		6.2.5
26.1	Pharmacy staff have access to safety data sheets (SDS).	Yes		6.2.5

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
26.2	Pharmacy staff have documented, annual training for those who might have to clean up a spill.	No		6.2.5, 14
26.3	The pharmacy has a readily accessible spill kit in the compounding area.	No	Per the PIC these are ordered and awaiting delivery.	6.2.5
26.4	The pharmacy has a process to manage and document any nonhazardous spills and disposal.	Yes	There is a process.	6.2.5
26.5	Waste of any component is disposed of in accordance with laws and regulations of the applicable regulatory jurisdiction.	Unknown	It appears there is white powdery waste on the sides of the regular trash can in the washing room. Photo01_GP37.00.	1.1.3, 6.2.5
	Master Formulation Records (MFR) and Compounding Records (CR) **Inspector should review a minimum of five (5) MFRs and five (5) CRs.**			
27.0	Is an MFR created for each unique formulation of a CNSP in compliance with USP <795> standards? ***Inspector note: Per USP, an MFR is a detailed record of procedures that describes how the CNSP is to be prepared.*** ***If no, go to compliance statements.***	Unknown		7.1
27.1	An MFR is created for each unique formulation.	Yes		7.1 Box2
27.2	Any changes or alterations to the MFR are approved and documented.	Unknown	The MFR does not reflect the date of a change in formulation as verbally described by the PIC during the inspection, to reflect updated active drug amount after potency testing identified contents at 81%-84% of expected.	7.1

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
28.4	MFR has complete instructions for preparing the CNSP, including equipment, supplies, and a description of the compounding steps. ***Inspector note: Per USP, the MFR will also include, "Other information needed to describe the compounding process and ensure repeatability (e.g., adjusting pH, temperature)." MFRs will include the detailed instructions necessary for an experienced compounder. Some examples of other details to ensure repeatability include, but are not limited to: speed duration, settings on equipment, and specific order of mixing (if applicable).*** ***Inspector should review several MFRs for completeness of instructions.***	No	Use of the blender to crush tablets was verbally described for preparation of 300 capsules but not described on the MFR. The amount of time for use of the RO-Tap sieve is not listed on the MFR. Use of the automatic BlateCo capsuling machine is not described on the MFR. The current machine is not being used and a new machine is on order.	7.1
28.5	MFR has a physical description of the final CNSP.	No	#1 orange capsules are listed but the MFR does not include a description of the capsule contents or the lot or expiration date of capsules.	7.1
28.6	MFR includes the assigned beyond-use date (BUD) and storage requirements.	Yes		7.1
28.7	MFR contains the reference source to support the assigned BUD.	Yes	Stated: Per USP 795.	7.1
28.8	Labeling requirements (eg, shake well) are described on the MFR.	Yes		7.1
28.9	If applicable, the MFR contains the calculations to determine and verify quantities and/or concentrations of components and strength or activity of APIs.	Yes	Listed on the formulation sheet.	7.1
28.10	An MFR has QC procedures (eg, pH testing, visual inspection) and expected results.	Unknown	QC results are not clearly documented.	7.1

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
29.0	Does the pharmacy complete a Compounding Record (CR) for all CNSPs in compliance with USP <795> standards? ***If no, go to compliance statements. Additionally, collect a copy of the MFR and the CR (no PHI or PII is to be collected).***	No	Doc03_NS29.0.	7.2, 14
29.1	A CR is completed for each CNSP prepared.	Yes		7.2, 14
29.2	The CR includes the name, strength or activity, and dosage form of the CNSP.	Yes		7.2, 14
29.3	The CR includes the date (or date and time) the CNSP was prepared.	Yes		7.2, 14
29.4	The CR includes the assigned internal identification number (eg, prescription, order, or lot number).	Yes		7.2, 14
29.5	The CR has a method to identify the individuals involved in the compounding process of the CNSP.	Yes		7.2, 14
29.6	The CR has a method to identify the individual who completed the review and verified the final CNSP.	Yes	The pharmacist listed at the top of the CR is the responsible person to verify the final CNSP.	7.2, 14
29.7	The CR includes: name, vendor or manufacturer, lot number, and expiration date of each component.	No	The name, vendor, lot number, and expiration date of the capsules is not listed.	7.2, 14
29.8	The CR includes the weight or measurement of each component.	Yes	The weight of components is included.	7.2, 14
29.9	The CR identifies the total quantity compounded.	No		7.2, 14
29.10	The CR lists the assigned BUD and storage requirements.	Yes		7.2, 14

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
29.11	If applicable, the CR contains the calculations to determine and verify quantities and/or concentrations of components and strength or activity of API.	Unknown	It appears there are CR for prior batches which have unclear total quantity compounded.	7.2, 14
29.12	The CR has a physical description of the final CNSP.	No	#1 orange capsules are listed but the MFR does not include a description of the capsule contents.	7.2, 14
29.13	The CR includes the results of quality control procedures (eg, pH testing, visual inspection).	No	Per their process, they weigh 1-2 single capsules of a batch of 30-300 capsules as part of their quality control. However the CR may not include the weight of the 1-2 capsules.	7.2, 14
29.14	The CR contains a MFR reference for the CNSP.	Yes		7.2, 14
29.15	Each CR is reviewed for completeness before the CNSP is released.	No	Due to missing information as described in the above cells of this section.	7.2, 8
29.16	The CR shows traceability of all components in the case of a recall or known quality issue.	Yes	Capsules information is not listed.	7.2, 12.1, 14
30.0	Are there procedures for in-process checks performed by a pharmacist? ***Inspector note: In-process checks are safety steps for complex, multi-step compounding processes. These checks indicate that appropriate procedures for measuring/mixing are followed for each step, including pharmacist verification of steps performed by non-pharmacists and visual inspection of preparation.*** ***Inspector should describe their observations in the Inspector Notes.***	Yes	The pharmacist double checks each weight on the scale.	2, 7.2, 8

	Labeling			
31.0	Are the pharmacy's labels for CNSPs in compliance with USP <795> standards? ***If no, go to compliance statements.***	No		9
31.1	Information on the label is prominently and legibly displayed. ***Inspector note: Per USP, labeling includes other accompanying materials along with the CSP, which is defined as "All labels and other written, printed, or graphic matter on the immediate container or on or inside any packaging system or wrapper in which the article is enclosed, except for any outer shipping container."***	No	Bottles of CNSP capsules, prepared in batches for anticipation of prescriptions, are not labeled. Photo04_NS31.1.	9
31.2	The labeling meets any state or federal regulatory requirements.	Yes		1.1.3, 9
31.3	The label on the immediate container includes an assigned internal identification number (eg, barcode, prescription, order, or lot number).	Yes		9
31.4	The label on the immediate container includes the active ingredients and their amount(s), activity(ies), or concentration(s).	Yes		9
31.5	The label on the immediate container includes the storage conditions, if other than controlled room temperature.	Yes		9
31.6	The label on the immediate container includes the BUD. ***If no, please describe whether the pharmacy instead used the term "expiration date" or similar language or if this information was not included on the label.***	Yes	A BUD is listed, and also the label includes a 'manufacturing' date.	9
31.7	The label on the immediate container includes the dosage form.	Yes		9

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
31.8	The label on the immediate container includes the total amount or volume, if it is not obvious from the container.	Yes		9
32.0	Does the labeling on the dispensed CNSP include the route of administration? ***Inspector note: This is a USP recommendation.***	Yes		9
33.0	Does the labeling contain information identifying the CNSP as a compounded preparation? ***Inspector note: Per USP, this is a recommendation.***	Yes	This is also included on the compound information sheet sent with the shipments.	9 USP <7>
34.0	Does the labeling on the dispensed CNSP display any applicable special handling instructions or warning statements? ***Inspector note: This is a USP recommendation.***	Yes		9
35.0	Does the labeling on the dispensed CNSP display the name of the compounding facility and contact information if the CNSP was to be sent outside of the facility or health care system? ***Inspector note: This is a USP recommendation.*** ***If the pharmacy only compounds CNSPs for patient use onsite (eg, a health care facility), inspector should answer this question as N/A .***	N/A		9
	Establishing Beyond Use Dating (BUDs)			
36.0	Is each CNSP assigned and labeled with a BUD in compliance with USP <795> standards? ***Inspector note: Per USP, the BUD is defined as, "The date, or hour and date, after which a CNSP must not be used, stored, or transported. The date is determined from the date or time the preparation is compounded." This is not the same term as "expiration date."*** ***If no, go to compliance statements.***	Yes		10 USP <7>

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
36.1	CNSP label has a BUD that specifies the date, or the hour and date, beyond which the preparation cannot be used and must be discarded.	Yes		10.1
36.2	CNSP labels do not list an "expiration date" or equivalent language.	Yes		10.1
36.3	BUDs are assigned from the date (and time) of preparation.	Yes		10.1
36.4	BUDs are assigned based on dispensing in tight, light resistant containers/overpacks. ***Inspector note: Per USP, the Table 4 maximum limits for BUD are, "based on the ability of the CNSP to maintain chemical and physical stability and to suppress microbial growth. These BUDs represent the limit for CNSPs that are packaged in tight, light-resistant containers unless conditions in 10.4 CNSPs Requiring Shorter BUDs or 10.5 Extending BUDs for CNSPs apply."***	Yes		10.3
36.5	The BUD assigned to the CNSP does not exceed the shortest remaining expiration date of any of the commercially available starting components.	Yes		10.4

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
37.0	Does the pharmacy ensure the assigned BUD does not exceed the shortest BUD of any individual compounded components? ***Inspector note: Per USP, "For CNSPs prepared from one or more compounded components, the BUD should generally not exceed the shortest BUD of any of the individual compounded components. However, there may be acceptable instances when the BUD of the final CNSP exceeds the BUD assigned to compounded components (e.g., pH-altering solutions). If the assigned BUD of the final CNSP exceeds the BUD of the compounded components, the physical, chemical, and microbiological quality of the final CNSP must not be negatively impacted." Another example of these "acceptable instances" (similar to pH-altering components mentioned above) inspectors may see are stock solutions (and other formulas within a formula) such as methocel 1%.*** ***If no, inspector should describe the observations, including the name of the component whose BUD was shorter than the assigned BUD of the final CSP.***	Yes		10.4
38.0	Does the designated person(s) evaluate a CNSP formulation to establish the maximum BUD? ***If no, who establishes the maximum BUD for a MFR?***	Yes		7.1, 10.2, 10.3
39.0	Does the pharmacy compound CNSPs with a USP monograph?	No		10.5
40.0	Does the pharmacy compound CNSPs following the USP monograph precisely? ***If no, go to compliance statements.***	N/A		10.5
40.1	Pharmacy staff have access to the USP monograph for reference.	N/A		10.5
40.2	CNSPs are prepared in accordance with the USP monographs. ***If no, inspector to collect a copy of the compounding record, label; and describe what specific steps of the monograph were not followed.***	N/A		10.5

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
43.0	Does the pharmacy label any CNSPs with BUDs that extend beyond the maximum limits in Table 4 USP <795>?	No		10.5 Table 4
44.0	Does the pharmacy follow the requirements for labeling a CNSP with a BUD that exceeds Table 4 in compliance with USP <795> standards? ***If no, go to compliance statements.***	N/A	The pharmacy does not establish BUDs that exceed Table 4.	10.5
44.1	The labeled BUD for an aqueous dosage form does not exceed 180 days. ***If no, collect a copy of the MFR, the CR, and a copy of a label without PHI.***	N/A		10.5
44.2	The labeled BUD for a nonaqueous dosage form does not exceed 180 days. ***If no, collect a copy of the MFR, the CR, and a copy of a label without PHI.***	N/A		10.5
44.3	Pharmacy is following the results of their own stability study. ***If the pharmacy only follows cited stability studies (does not conduct their own stability studies) for extending BUDs, answer this question as N/A. If pharmacy is following a bracketed study, inspector may mark this statement as yes if concentrations of CNSPs are at or within the concentrations specified within the study. If pharmacy is following a bracketed study and is using a concentration outside the study, answer this question as a no and describe observations.***	N/A		10.5

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
44.7	Aqueous CNSPs whose labeled BUDs are extended beyond Table 4, have: - been tested for antimicrobial effectiveness at least once for each formulation in the type of (with the same material composition of the) container closure system that will be used; - received study results from an FDA-registered facility (for the same CNSP formulation using the same material composition of the container closure system); or - a study published from peer-reviewed literature (for the same CNSP formulation using the same material composition of the container closure system). ***Inspector note: Pharmacy may rely on a bracketed study from the above options as long as the bracketed study information includes the low and high concentration of each active ingredient in the formulation. Per USP, this is "to establish preservative effectiveness across various strengths of the same formulation (e.g., bracketing). The concentration of all other ingredients (including preservatives) must fall within the bracketed range.***	N/A		10.5
	Quality Assurance (QA), Quality Control (QC), and Quality Management (QM) Inspector to review at least one complaint, one adverse event, and one recall (if applicable).			
45.0	Does the pharmacy have a QA/QC program to ensure that CNSPs are prepared per the requirements in USP <795> standards and any applicable regulatory requirements? ***If no, go to compliance statements.***	No		1.1.3, 12
45.1	The pharmacy has a formal QA/QC program with documented activities. ***Inspector note: Per USP, "A facility's QA and QC programs must be formally established and documented in the facility's SOPs that ensure that all aspects of the preparation of CNSPs are conducted in accordance with the requirements in this chapter (<795>) and the laws and regulations of the applicable regulatory jurisdiction."***	No	The pharmacy dispensed CNSPs from a batch found to be below intended potency of 90%-110% but no action or QA process was documented. Per the PIC he recalculated the amount of commercial tablets to use in the compounding MFR. Per the PIC there were capsules from a batch prepared with the updated MFR sent to ARL for potency testing, however the results are not yet returned to the pharmacy. Doc01_GP88.00.	12

53.3	Personnel removed all hand, wrist, and other exposed jewelry, including piercings, that could interfere with the effectiveness of garbing and hand hygiene (eg, watches, rings that may tear gloves).	Yes		3.1
53.4	Personnel removed earbuds or headphones.	Yes		3.1
53.5	Any accommodations permitted by the designated person(s) should be documented. ***Inspector note: Per USP <795>, accommodations may be permitted as long as the quality of the CSP and environment will not be affected.***	Yes	Per process.	3.1
54.0	**Hand Hygiene Observation:** Were personnel who enter the compounding area to compound observed performing the appropriate hand washing procedures in compliance with USP <795> standards? ***If no, go to compliance statements.***	Yes		3.2, Box 1
54.1	All personnel who enter the compounding area to compound performed hand hygiene.	Yes		3.2 Box 1
54.2	Personnel wash hands with soap and water for at least 30 seconds.	Yes		3.2
54.3	Personnel dry their hands completely with disposable towels or wipers.	Yes		3.2
54.4	Personnel do not solely rely on the use of alcohol hand sanitizers.	Yes		3.2
55.0	***Garbing Observation:*** Were compounding personnel observed following the appropriate garbing procedures in compliance with USP <795> standards? ***If no, go to compliance statements.***	Yes		3.3 Box 1
55.1	All personnel entering the compounding area are fully garbed (with the required garb as determined by the facility SOPs).	Yes		3.3 Box 1

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
55.2	All personnel who perform compounding activities don gloves. ***Inspector note: Per USP, "Gloves must be worn for all compounding activities."***	Yes		3.2, 3.3 Box 1
55.3	Gloves are inspected periodically for holes, punctures, or tears and replaced immediately if a defect is detected.	Yes		3.3 Box 1
56.0	Are gloves wiped or replaced before beginning compounding a CNSP with a different component or when other objects were touched (eg, pens, keyboards) to minimize risk of cross contamination with other CNSPs? ***Inspector note: This is a USP recommendation.***	No		3.3
57.0	List the name(s) of the CNSPs observed by the inspector as part of live compounding demonstration.		Cetirizine 8 mg/famotidine 22 mg CNSP capsule. Batch of 30 capsules. This was a demonstration compounding and was not intended for dispensing to patients. Doc03.NS29.0.	
58.0	**Compounding Observation:** Are compounding personnel using appropriate nonsterile compounding techniques for CNSPs in compliance with USP <795> standards? ***If no, go to compliance statements.***	Yes		2 Box 3
58.1	The compounding personnel enter the nonsterile compounding area in accordance with the SOPs.	Yes		3.1, 4.1
58.2	The compounding personnel started with a clean compounding area for CNSPs.	Yes		4.1, 4.3, 5 Table 1
58.3	The compounding personnel selected the correct MFR for the CNSP to be prepared.	Yes		7, 7.1 Box 2

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
58.4	The compounding personnel performed hand hygiene. ***Inspector note: Per USP <795>, Box 1, personnel are to: wash hands with soap and water for at least 30 seconds, dry hands completely with disposable towels or wipers, and then don gloves.***	Yes		3.2 Box 1
58.5	The compounding personnel are appropriately garbed for the type of CNSP prepared.	Yes		3.3
58.6	The compounding personnel obtained the proper ingredients (APIs and/or components). ***Inspector note: All ingredients must be within date and match what is listed in the MFR. If the ingredient is an API, the COA must have already been reviewed and approved for use.***	Yes		6.2 (6.2.1 - 6.2.5)
58.7	The compounding personnel gathered all necessary materials, equipment, and supplies necessary and/or specified in the MFR and is in good working order prior to use for the CNSP. ***Inspector note: All items must be clean prior to use. If equipment requires calibration and/or certification, compounder must ensure the equipment or device is within proper specifications (eg, tare scales and/or balances).***	Yes		6.1 Table 2
58.8	The compounding personnel have knowledge of and access to any SDS.	Yes		6.2
58.9	The compounding personnel only compound one CNSP at a time (to proactively prevent mix-ups, errors, and cross contamination).	Yes		1.1.3
58.10	The compounding personnel compound the CNSP according to the MFR. ***If no, inspector needs to describe in detail their observations in the Inspector Notes and collect a copy of the MFR and CR (no PHI or PII to be collected).***	Yes		7.1, 7.2 Box 2
58.11	The compounding personnel document any required steps listed in the MFR on the CR. ***Inspector note: This would include any weights, volume, and any in-process checks needed.***	Yes		7.2, 14 Box 3

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
58.12	Documentation in the CR is legible. ***If no, collect copy of record that is illegible. Redact any PHI on record.***	Yes		14
58.13	The compounding personnel verify the correct BUD in accordance with the MFR requirements in USP <795>.	Yes		10 Table 3, Table 4
58.14	The compounding personnel performed any quality control steps specified in the MFR. ***Inspector note: Examples of this include, but are not limited to: testing of pH for a suspension, weighing of capsules, and visual inspection against product description specifications.*** ***If no, describe observations in Inspector Notes.***	Yes	The PIC weighed one capsule from batch of 30 capsules to compare to expected weight.	7.2, 8, 8.1, 12 Box 3
58.15	The compounding personnel placed the CNSP into the proper container closure system.	Yes		8.1 Box 2
58.16	The compounding personnel labeled the CNSP. ***Inspector note: Storage requirements must be included on the label if refrigerated or frozen (so patient can identify the storage temperature requirements).***	Yes		9
58.17	The compounding personnel completed any documentation on the CR. ***If no, describe observations of what was missing or omitted in Inspector Notes.***	Yes		7.2, 8, 14 Box 3
58.18	The compounding personnel cleaned and sanitized the compounding area before the next CNSP (with differing ingredients) is prepared.	Yes		5
59.0	**Final CNSP check observation**: Does the visual inspection of the CNSP by the pharmacist confirm all USP <795> requirements? ***Observe a pharmacist check several CNSP prescriptions. List the name of CNSPs release inspection observed in the Inspector Notes.*** ***If no, go to compliance statements.***	No	There was just the observed CNSP available in the pharmacy to observe visual inspection by the pharmacist.	8, 8.1, 9

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
59.1	CNSP was visually inspected to determine the physical appearance of the CNSP is as expected (eg, color, texture, physical uniformity), including any special characteristics listed in the MFR (eg, emulsions must be checked for phase separation).	Yes		8, 8.1
59.2	Visual inspection included checking for container closure integrity (eg, leakage, cracks, improper seals).	Yes		8, 8.1
59.3	CNSP label was verified against the prescription or medication order.	No	The pharmacy does not get a copy of the prescription for comparison purposes.	8, 8.1, 9
59.4	CNSP label was verified against the MFR.	No	Batched CNSP are not labeled when placed in inventory. They are labeled during dispensing.	8, 8.1, 9
59.5	CNSP label was verified against the CR.	No	Batched CNSP are not labeled when placed in inventory. They are labeled during dispensing.	8, 8.1, 9
59.6	If a CNSP will not be released or dispensed on the day the preparation was made, a visual inspection was conducted immediately before it is released or dispensed to make sure the CNSP did not develop any defects during storage.	Yes		8, 8.1

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
59.7	All checks and inspection that are performed are properly documented.	No	Pharmacist checks are not specifically documented on the CR other than the pharmacist's initials at the top of the CR.	8.1, 14
59.8	CNSP that do not meet requirements, are promptly rejected, clearly labeled as rejected, and segregated from active stock to prevent use before disposal	Yes		8.1
60.0	Inspect several different finished compounded nonsterile preparations. Are all the finished compounded preparations free from any evidence of signs of contamination? ***Inspector note: If found, request the compounded preparation to be quarantined and notify NABP immediately.*** ***Additionally, list the name(s) of the compounded preparation(s) observed; description of type of contamination suspected (eg, particulates, dirt/debris/(suspected) mold within container closure); number of preparations affected (eg, two of the five containers on the shelf); lot or batch information; BUD assigned; and collect photographs, copy of MFR, and CR.***	Yes	The capsules prepared in advance were not labeled but placed on a post-it note with an apparent batch number. Photo04_NS31.1.	12
61.0	**Cleaning and Disinfection Observation:** Does the pharmacy perform cleaning and sanitizing activities in the compounding area in compliance with USP <795> standards? ***Document observations while pharmacy staff are performing live compounding activities in Inspector Notes.*** ***If no, go to compliance statements.***	No	The pharmacy does not clean their floors each day of compounding. The top of the V1 mixer was cleaned prior to compounding.	5

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Get Relief RX, LLC
e-Profile ID: 1808699
Inspection Date: 8/8/2024

		Observation	Inspector Notes	USP Reference(s)
61.1	Pharmacy staff starts with a clean and sanitized work surface prior to compounding a CNSP.	Yes		5 Table 1
61.2	Pharmacy staff perform cleaning and sanitizing between compounding CNSPs with different components. ***Inspector note: Per USP, "If cleaning and sanitizing are performed as separate steps, cleaning must be performed first."***	N/A	The pharmacy is currently compounding only one CNSP type with the same components.	5 Table 1
61.3	Pharmacy staff ensure equipment and devices used in compounding activities are clean and sanitized after use (to prevent cross contamination of the next preparation).	Yes	The inside lid of the blender used during some compounding had residual powder. This blender was not used during the observed compounding during the inspection.	6.1 Table 2
61.4	Pharmacy staff perform cleaning and sanitizing on work surfaces when visibly soiled, after spills, and/or when surface contamination is known or suspected.	Yes		5 Table 1

Nonsterile <795> Employee File Records Review

Select the PIC, designated person, a staff pharmacist that checks compounded preparations, and two to three compounding pharmacy technicians. *Do not record the employee name, list only their title or position.
From the drop-down List:
*Mark as "Yes" if the document is present in the records and the competency evaluation was conducted in compliance with USP <795> requirements.
*Mark as "No" if the document is present in the records but is not in compliance with USP <795> requirements.
*Mark as "Missing" if any part of the record is missing and explain in Notes column.
*Mark as "N/A" if the training does not apply (eg, long-term employee may not have initial training available). Document further in the Notes column.

		Employee Records #1	Employee Records #2	Employee Records #3	Employee Records #4	Employee Records #5	
	Employee Title	**PT**	**RPh**	**N/A**	**N/A**	**N/A**	**Notes**
1.0	The training program provides initial training, evaluation, and documentation on the core competencies listed below:						
1.1	Compounding personnel are trained on facility SOPs.	Missing	Yes				Being formalized
1.2	Compounding personnel are trained on USP <795> standards.	Yes	Missing				
1.3	The training record for hand hygiene is complete.	Yes	Yes				
1.4	The training record for garbing is complete.	Yes	Missing				
1.5	The training record for cleaning and sanitizing is complete.	Yes	Missing				
1.6	The training record for handling and transporting components and CNSPs is complete.	Yes	Missing

Glossary & References	USP <795>
Active Pharmaceutical Ingredient (API)	Any substance or mixture of substances intended to be used in the compounding of a preparation, thereby becoming the active ingredient in that preparation and furnishing pharmacological activity or other direct effect in the diagnosis, cure, mitigation, treatment, or prevention of disease in humans or animals or affecting the structure and function of the body. Also referred to as a bulk drug substance. A conventionally manufactured drug product is not an API but is typically manufactured from an API(s).
Added Substance	An ingredient that is necessary to compound a preparation but is not intended or expected to cause a pharmacologic response if administered alone in the amount or concentration contained in a single dose of the compounded preparation. The term is used synonymously with inactive ingredient, excipient, and pharmaceutical ingredient.
Administration	The preparation of a nonsterile pharmacologic or other therapeutic agent for ingesting, inserting, applying, or otherwise providing a nonsterile medication in its final form to a single patient. This includes crushing a tablet(s) or opening a capsule(s) to mix with food or liquids to facilitate patient dosing.
Alcohol-based hand rub	An alcohol-containing preparation (liquid, gel, or foam) designed for application to the hands of health care personnel to inactivate microorganisms and/or temporarily suppress their growth. Such preparations may contain one or more types of alcohol, other active ingredients, excipients, and humectants.
Assigned trainer	One or more individuals assigned by the designated person(s) to be responsible and accountable for directly providing the training, observation, and/or evaluation of personnel for the preparation of CNSPs.
Beyond-use date (BUD)	The date, or hour and date, after which a CNSP must not be used, stored, or transported. The date is determined from the date or time the preparation is compounded.
Biological Safety Cabinet (BSC)	A ventilated cabinet that may be used for compounding. These cabinets are divided into three general classes (Class I, Class II, and Class III). Class II BSCs are further divided into types (Type A1, Type A2, Type B1, Type B2, and Type C1).
Bulk drug substance	See the entry for Active Pharmaceutical Ingredient.
Certificate of analysis (COA)	A report from the supplier of a component, container, or closure that accompanies the supplier's material and contains the specifications and results of all analyses and a description of the material.
Cleaning	The process of removing substances (eg, organic and inorganic material) from objects and surfaces, normally accomplished by manually or mechanically using water with detergents or enzymatic products.
Cleaning agent	An agent, usually containing a surfactant, used for the removal of substances (eg, dirt, debris, microbes, and residual drugs or chemicals) from surfaces.
Closed-system processing device	A device designed to reduce the potential exposure to personnel or contamination of the facility or CNSPs. Examples include CVEs, BSCs, or single-use containment glove bags.

NABP developed this inspection form for sole use by NABP, boards of pharmacy, government agencies that regulate drug distributors, and for internal use by the named facility participating in the VPP. Disclosure of this form to a third party or use of the form by a third party is strictly prohibited without NABP's prior written authorization.

Glossary & References	USP <795>
Component	Any ingredient used in the compounding of a preparation, including any API, added substance, or conventionally manufactured product.
Compounded nonsterile preparation (CNSP)	A preparation not intended to be sterile that is created by combining, admixing, diluting, pooling, reconstituting other than as provided in the manufacturer's labeling, or otherwise altering a drug product or bulk drug substance.
Compounding	The process of combining, admixing, diluting, pooling, reconstituting other than as provided in the manufacturer's labeling, or otherwise altering a drug product or bulk drug substance to create a nonsterile preparation.
Compounding area	An area that is specifically designated for nonsterile compounding.
Compounding personnel	Personnel trained to compound or oversee compounding of preparations.
Compounding record (CR)	Documents the compounding of each CNSP.
Container closure system	Packaging system components that together contain and protect the dosage form. This includes primary packaging system components and secondary packaging system components if the latter are intended to provide additional protection.
Containment glove bag	A single-use disposable glove bag that is capable of containing airborne chemical particles.
Containment ventilated enclosure (CVE)	A full or partial enclosure that uses ventilation principles to capture, contain, and remove airborne contaminants through high-efficiency particulate air (HEPA) filtration and to prevent their release into the work environment.
Conventionally manufactured product	A pharmaceutical dosage form, usually the subject of an application approved by the applicable national regulatory agency, that is manufactured under current good manufacturing practice conditions.
Designated person(s)	One or more individuals assigned to be responsible and accountable for the performance and operation of the facility and personnel as related to the preparation of CNSPs.
FDA	US Food and Drug Administration
Formulation	The specific qualitative and quantitative composition of the final CNSP.
Hazardous Drug (HD)	Any drug identified by at least one of the following criteria: carcinogenicity, teratogenicity or developmental toxicity; reproductive toxicity in humans; organ toxicity at low dose in humans or animals; genotoxicity or new drugs that mimic existing HDs in structure or toxicity. See <800>.
Label	The part of the labeling on the immediate container.
Labeling	All labels and other written, printed, or graphic matter on the immediate container or on or inside any packaging system or wrapper in which the article is enclosed, except for any outer shipping container.

NABP developed this inspection form for sole use by NABP, boards of pharmacy, government agencies that regulate drug distributors, and for internal use by the named facility participating in the VPP. Disclosure of this form to a third party or use of the form by a third party is strictly prohibited without NABP's prior written authorization.

Glossary & References	USP <795>
Master formulation record (MFR)	A detailed record of procedures that describes how the CNSP is to be prepared.
Monograph	A quality documentary standard within USP–NF that articulates the quality expectations for a medicine including for its identity, strength, purity, and performance. It also describes the tests to validate that a medicine and its ingredients meet these criteria.
Oversight	The review, monitoring, and supervision of actions taken by personnel; bearing responsibility for those actions; and being available if and when needed for consultation, even if not physically present.
Preservative	A substance added to inhibit microbial growth.
Purified water	The minimal quality of source water for the production of Purified Water is drinking water whose attributes are prescribed by the US Environmental Protection Agency (EPA), the European Union, Japan, or the World Health Organization (WHO). This source water may be purified using unit operations that include deionization, distillation, ion exchange, reverse osmosis, filtration, or other suitable purification procedures. (See <1231>, 3.1.1 Purified Water.)
Quality Assurance (QA)	A system of procedures, activities, and oversight that ensures that the compounding process consistently meets quality standards.
Quality Control (QC)	The sampling, testing, and documentation of results that, taken together, ensure that specifications have been met for the CNSP.
Reconstitution	The process of adding a diluent to a conventionally manufactured product to prepare a solution or suspension.
Release inspection and testing	Visual inspection and testing performed to ensure that a preparation meets appropriate quality characteristics.
Sanitizing agent	An agent for reducing, on inanimate surfaces, the number of microorganisms (eg, 70% isopropyl alcohol).
SDS	Safety data sheet.
SOP	Standard operating procedure.
Specification	The tests, analytical methods, and acceptance criteria to which any components, CNSP, container closure system, equipment, or other material used in the compounding of CNSPs must conform to be considered acceptable for its intended use.
Stability	The extent to which a product or preparation retains physical and chemical properties and characteristics within specified limits throughout its expiration or BUD.
Verify	To confirm that a method, process, system, or equipment will perform as expected under the conditions of actual use.
Water activity (a_w)	A measure of the fraction of total water that is unbound and freely available to participate in chemical, biochemical, or physicochemical reactions or provide an environment that can support microbial growth. Note that a_w is not water content.

Clarification or Further Explanation	30	89.00	prescription volume that day, equipment failure, or other factors affecting QRE data collected is analyzed to assess causes and any contributing factors (root cause). Indicate who performs the analysis and frequency	A QRE form has been completed regarding the potency testing. Moving forward, all quality-related events will be documented on this QRE form.	08/28/24	Y	(Page 29) Completed QRE Form
Updates/New SOPs or P&Ps	31	91.01	(with each event, weekly, monthly, quarterly, etc). Per the PIC, he would Adverse events are reported to the appropriate entities such as the board of pharmacy, MedWatch, FDA, VAERS, etc? No	Adverse events are reviewed on a case-by-case basis and reported to the appropriate entities according to the pharmacy's policy.	08/28/24	Y	(Page 31) SOP 6.02 Complaint Handling V1.1

Clarification or Further Explanation	31	93.00	Consumer Surveys are conducted at least yearly of patients who receive pharmaceutical products and services at the pharmacy. A statistically valid sampling technique may be used in lieu of surveying every patient. Each	Consumer surveys are being implemented and will be distributed to patients between the second and third refills.	09/03/24	N	
Clarification or Further Explanation	36	2.0	Does the pharmacy have a designated person(s) who meets the requirements in USP <795> standards? Inspector note: Per USP, "The compounding facility must designate one or more individuals to be	The pharmacist-in-charge now has a copy of the new USP Chapter 795. He has reviewed the changes and is aware.	8/28/24	N	
Clarification or Further Explanation	37	2.1	The designated person(s) (for the QA program) has the training, experience, responsibility, and authority to perform the duties required of them. It is unclear if the PIC has the training and experience as there	The pharmacist in charge has completed continuing education hours that are relevant to nonsterile compounding.	08/28/24	Y	(Page 35) Dennis Training
Clarification or Further Explanation	37	2.5	The designated person(s) is responsible for monitoring and observing compounding activities and taking immediate corrective action if deficient practices are observed. It appears there was no potency testing or other	[illegible] for its one and only MFR. Moving forward, the pharmacy will have potency testing performed prior to any new MFR being dispensed.	08/28/24	N	
Clarification or Further Explanation	37	2.6	The designated person(s) is responsible for ensuring SOPs are fully implemented and following up if problems, deviations, or errors are identified. The pharmacy had copies of the prior USP 795 and did not	The pharmacist-in-charge now has a copy of the new USP Chapter 795. He has reviewed the changes and is aware.	8/28/24	N	
Clarification or Further Explanation	38	3.0	Has the pharmacy created and implemented a training program that is in compliance with USP <795> standards? Inspector note: Per USP, "Training and competency of personnel must be documented." Inspector is to	The pharmacist in charge has completed continuing education hours that are relevant to nonsterile compounding.	08/28/24	Y	(Page 35) Dennis Training
Clarification or Further Explanation	39	3.3	All compounding personnel, including those who have direct oversight of compounding personnel, have completed an initial training and at least every 12 months thereafter. Inspector note: Per USP, "Other personnel,	The pharmacist in charge has completed continuing education hours that are relevant to nonsterile compounding.	08/28/24	Y	(Page 35) Dennis Training
Photos	41	8.0	Does the compounding area meet the facility requirements in compliance with USP <795> standards? If no, go to compliance statements.	The pharmacy's waste disposal procedures have been changed and implemented.	09/03/24	Y	(Page 7) Pic- Waste Tote
Updates/New SOPs or P&Ps	42	8.3	The compounding area is clean and sanitary. There is some residual powder in the lid of the tablet crushing blender and in a trash can in the sink/washing room.	The pharmacy has implemented new cleaning instructions and equipment will be cleaned after EACH use.	08/28/24	Y	[illegible] (Page 40) SOP 3.02 Cleaning and Maintenance of the Nonsterile Compounding Area v1.1
Other	42	10.0	Does the pharmacy's storage area (for CNSPs, components, equipment, and containers) meet requirements in compliance with USP <795> standards? If no, go to compliance statements.	See below	08/28/24	N	
Clarification or Further Explanation	43	10.3	Temperature monitoring devices are verified for accuracy at least every 12 months or as required by the manufacturer. Inspector note: Per USP, "All temperature monitoring equipment must be calibrated or verified for	The ThermPro thermometer will be replaced annually.	08/28/24	N	
Updates/New SOPs or P&Ps	45	15.0	Does the pharmacy perform cleaning and sanitizing activities on all surfaces at the minimum frequency per Table 1 and documented in a log or other record in compliance with USP <795> standards? Review	The SOP and the cleaning log have been changed to reflect that the pharmacy cleans daily on days that the pharmacy is open.	08/28/24	Y	[illegible] (Page 40) SOP 3.02 Cleaning and Maintenance of the Nonsterile Compounding Area v1.1
Updates/New SOPs or P&Ps	45	15.4	Floors are cleaned and sanitized daily on days when compounding occurs. Floors cleaned once a week using Zep (as labeled) but the Zep is not listed on the cleaning log.	The cleaning log has been changed to reflect the cleaning products used.	08/28/24	Y	[illegible] (Page 40) SOP 3.02 Cleaning and Maintenance of the Nonsterile Compounding Area v1.1
Updates/New SOPs or P&Ps	46	15.5	Walls and ceilings are cleaned and sanitized when visibly soiled. Inspector note: No specific frequency is specified by USP. View compounding area walls and ceilings. If inspector observes soiled walls or ceilings, inspector	The pharmacy staff has been trained to clean areas if they are visibly soiled even if the area is in between cleaning schedules.	08/28/24	Y	[illegible] (Page 40) SOP 3.02 Cleaning and Maintenance of the Nonsterile Compounding Area v1.1
Other	47	18.0	Does the pharmacy select, store, clean, and maintain equipment in compliance with USP <795> standards? Inspector note: Per USP <795>, "Equipment surfaces that contact components are not reactive, additive,	See below	09/16/24	N	
Updates/New SOPs or P&Ps	47	18.2	Pharmacy has evaluated and documented the nonsterile compounding pharmacy activities for weighing, measuring, and otherwise manipulating for an assessment of risk. Inspector note: Per USP, "components that	The pharmacist in charge will perform a risk assessment to determine any additional pharmacy needs.	09/16/24	Y	(Page 45) SOPF 4.00.01 Equipment Need Assessment
Updates/New SOPs or P&Ps	48	18.3	The equipment and devices used for compounding CNSPs are clean and stored in a manner and frequency that minimizes the risk of contamination. Inspector note: Per USP <795>, "After compounding, the	[illegible] pharmacy cleans between each batch on days that the pharmacy compounds.	08/28/24	Y	[illegible] (Page 40) SOP 3.02 Cleaning and Maintenance of the Nonsterile Compounding Area v1.1
Photos	48	18.5	Equipment and devices are verified for accuracy as recommended by the manufacturer (at the frequency recommended by the manufacturer or at least every 12 months, whichever is more frequent). If the pharmacy does	The scale has been moved to a different location so as not to be affected by any vibrations or heat source.	08/28/24	Y	(Page 47) CMP Room 2
Updates/New SOPs or P&Ps	52	26.0	Does the pharmacy maintain a chemical hazard, spill management, and disposal information program in compliance with USP <795> standards? If no, go to compliance statements. No	[illegible] management, and disposal information program in compliance with USP <795> standards.	08/28/24	Y	(Page 48) SOP 3.03 Spill Management
Updates/New SOPs or P&Ps	53	26.2	Pharmacy staff have documented, annual training for those who might have to clean up a spill. No	Forms have been updated to include spill management competency.	08/28/24	Y	(Page 54) SOPF 3.03.03 Spill Management Competency
Photos	53	26.3	The pharmacy has a readily accessible spill kit in the compounding area. Per the PIC these are ordered and awaiting delivery.	The spill kit is now readily accesible in the compounding area.	08/29/24	Y	(Page 56) Spill Kit Amazon Order
Updates/New SOPs or P&Ps	53	26.5	Waste of any component is disposed of in accordance with laws and regulations of the applicable regulatory jurisdiction. It appears there is white powdery waste on the sides of the regular trash can in the washing	The pharmacy's waste disposal procedures have been changed and implemented.	08/28/24	Y	(Page 8) SOP 7.03 Waste Disposal
Photos	53	27.0	Is an MFR created for each unique formulation of a CNSP in compliance with USP <795> standards? Inspector note: Per USP, an MFR is a detailed record of procedures that describes how the CNSP is to be prepared. If	Yes, an MFR has been created for each unique formulation in compliance with USP <795> standards.	09/09/24	Y	(Page 57) GRRX MFR_CR 090924
Photos	53	27.2	Any changes or alterations to the MFR are approved and documented. The MFR does not reflect the date of a change in formulation as verbally described by the PIC during the inspection, to	This has been updated.	09/09/24	Y	(Page 57) GRRX MFR_CR 090924
Photos	54	28.0	Does the pharmacy's MFRs contain all requirements in compliance with USP <795> standards? If no, go to compliance statements. Additionally, collect a copy of the MFR and include as an attachment. No	This has been updated.	09/09/24	Y	(Page 57) GRRX MFR_CR 090924
Photos	55	28.4	MFR has complete instructions for preparing the CNSP, including equipment, supplies, and a description of the compounding steps. Inspector note: Per USP, the MFR will also include, "Other information	This has been updated.	09/09/24	Y	(Page 57) GRRX MFR_CR 090924
Photos	55	28.5	MFR has a physical description of the final CNSP. #1 orange capsules are listed but the MFR does not include a description of the capsule contents or the lot or expiration date of capsules.	This has been updated.	09/09/24	Y	(Page 57) GRRX MFR_CR 090924
Photos	55	28.10	An MFR has QC procedures (eg, pH testing, visual inspection) and expected results. QC results are not clearly documented.	This has been updated.	09/09/24	Y	(Page 57) GRRX MFR_CR 090924
Photos	56	29.0	Does the pharmacy complete a Compounding Record (CR) for all CNSPs in compliance with USP <795> standards? If no, go to compliance statements. Additionally, collect a copy of the MFR and the CR (no PHI or	The CR components are on the MFR.	09/09/24	Y	(Page 57) GRRX MFR_CR 090924
Photos	56	29.7	The CR includes: name, vendor or manufacturer, lot number, and expiration date of each component. The name, vendor, lot number, and expiration date of the capsules is not listed.	This has been updated.	09/09/24	Y	(Page 57) GRRX MFR_CR 090924

Section 10: Affidavit for Pharmacies- MUST BE COMPLETED by pharmacies NOT CURRENTLY PERFORMING Sterile Compounding

Affidavit for Pharmacy License

I, Hector A. Herrera hereby certify that the assertions in this Affidavit are true and correct to the best of my knowledge and belief, and state as follows:

1. I am the Chief Operating Officer (title) for Rare Specialty Pharmacy (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I certify that upon licensure, the Pharmacy will not perform sterile compounding or ship sterile compounds into Nevada.
3. I understand and acknowledge that the Pharmacy and any of its staff members may be subject to discipline by the Board if the Pharmacy performs sterile compounding or ships any sterile compounds into Nevada without first obtaining written authorization from the Board to do so.
4. I certify that if the Pharmacy makes the decision to perform sterile compounding or to ship any sterile compounds into Nevada, the Pharmacy, through an authorized representative, will first notify the Board via a written request, and obtain written approval to perform sterile compounding or to ship any sterile compounds into Nevada.
5. I understand that if the Pharmacy seeks approval to perform sterile compounding or to ship any sterile compounds into Nevada, an authorized representative of the Pharmacy may be required to appear before the Board to answer questions before such approval is granted.

FURTHER YOUR AFFIANT SAYETH NAUGHT.

Section 8: Arrests, Detentions, Litigations, Arbitrations.	Yes	No
1. Have you ever been convicted of, or entered, a plea of guilty, guilty by mentally ill or nolo contendere to any criminal offense or civil violation, federal or state, for any reason whatsoever, regardless of the disposition of the event? (Except minor traffic citations.)		✓
2. If you answered "yes" to question 1, was the offense or violation related to drugs, including prescription drugs and/or controlled substances, the manufacturer or distribution of drugs or the practice of pharmacy?		
3. Have you ever had a civil or criminal record expunged or sealed by a court order?		✓
4. Have you, as an individual, member or a company, partner, or owner, director or officer of a corporation, ever been a party to a lawsuit as either a plaintiff or defendant (including any administrative proceedings before a licensing board) or of an arbitration as either a claimant or respondent? (Other than divorces.)		✓
5. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) been a party to a lawsuit (including any administrative proceedings before a licensing board), arbitration or bankruptcy?		✓
6. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer or director) ever appeared before any licensing agency or similar authority in or outside the State of Nevada for any reason whatsoever (including any disciplinary or board citation)?		✓
7. Have you ever been denied a personal license, permit, certificate or registration for a privileged, occupational or professional activity?		✓
8. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner member, officer or director) ever been refused a business license.		✓
9. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) ever surrendered a license, permit, certificate or registration relating to the pharmaceutical industry voluntarily or otherwise (other than upon voluntary closure of a manufacturer).		✓
10. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		✓

I, SHAMA J PATEL, certify that as the designated representative for

RARE SPECIALTY PHARMACY,

that I (initial that you have read and meet the following requirements) (NAC 639.5005, NAC 639.5935):

1. SP I am at least 21 years of age;
3. SP I have been employed for at least 6,000 hours in a pharmacy or with a wholesaler in a capacity related to the dispensing and distribution of, and recordkeeping related to, prescription drugs.
4. SP I will be actively involved in and aware of the actual daily operations of the pharmacy or wholesaler;
5. SP I will be employed full-time in a managerial level position with the pharmacy or wholesaler;
6. SP I will be physically present at site of the pharmacy or at the facility of the wholesaler during regular business hours, except when the absence of the representative is authorized, including sick leaves, vacation leaves and other authorized absences; and
7. SP I will serve in this representative capacity for only one pharmacy or wholesaler at a time.

To Whom It May Concern:

The New Jersey Board of Pharmacy has been requested by RARE SPECIALTY PHARMACY to forward a letter of good standing regarding the Pharmacy's registration to practice in the State of New Jersey.

A review of the Board's files indicates that RARE SPECIALTY PHARMACY was issued a New Jersey registration 28RS00802200 on or about 09/10/2024 and is currently Active and in good standing with an expiration date of 06/30/2025. A review of the Board's files further indicates that no public disciplinary action has been taken against this Pharmacy.

Very truly yours,

Anthony Rubinaccio, RPh
Executive Director

NEVADA STATE BOARD OF PHARMACY

985 Damonte Ranch Pkwy Suite 206 – Reno, NV 89521 – (775) 850-1440

Send to State Board of Pharmacy for completion: A separate letter is acceptable. Do not return with application unless it has been completed by the licensing agency.

REPORT OF INSPECTION

TO: Board of Pharmacy	FILE # #8-1283-24-679	DATE 6/20/2024
SUBJECT: Rare Specialty Pharmacy 398 W Grand Ave Rahway NJ 07065 Masum Amin RPIC 28RI03560800		BY: Kapetanakis R.P./Field Representative

REFERENCE:

New pharmacy inspection conducted pursuant to N.J.A.C. 13:39-4.1.

ASPECTS OF THIS INSPECTION MERITING CONSIDERATION:

☐	I	Ownership
☐	II	Location/Proposed Operations
☐	III	Spatial Requirements/Physical Facilities
☐	IV	Storage Facilities
☐	V	Required Signs and Placards
☐	VI	Library
☐	VII	Metrological Equipment
☐	VIII	Dispensing Complements
☐	IX	Record-keeping & Patient Counseling

☐	Enclosed as Attachment #1 is a copy of the filed "Application For Permit to Conduct a Pharmacy" which predicated this inspection.

DETAILS:

A. N.J.S.A. 45:14-75 - Requires that all businesses or enterprises that operate a pharmacy, drug store or render such professional services be registered with and be issued a permit by the Board of Pharmacy. The terms "pharmacy" and "drug store" are defined as establishments or places of business that are required to be operated or managed at all times by registered pharmacists. To satisfactorily conduct a practice of pharmacy, the Board has enacted appropriate rules and regulations that establish minimum standards in regard to: equipment, supplies, physical space, hours of operation and other requisites that may be essential to compound and dispense prescription items for the purpose of offering adequate pharmaceutical services to the public.

B. N.J.S.A. 45:14-70 - Directs, in part, that only upon application on a form prescribed and furnished to the Board, will the Board consider and issue a permit to conduct a new pharmacy.

C. N.J.A.C. 13:39-4.1 - Details: the progression, eligibility and requisites involved in the new pharmacy permit application process, namely:

(a) A permit application shall be submitted to the Board by every person or corporation desiring to operate a new pharmacy. Such application shall be made on a form furnished by the Board.

(b) The permit application shall indicate the exact intended location and plan or physical arrangement of the proposed pharmacy area and shall indicate any premises contiguous to, but not necessarily a part of the pharmacy.

(c) The permit application shall bear the exact trade name, if any; the corporate names, if any; the names and addresses of the owners and operators, if a sole proprietorship or partnership; the names and addresses of all officers and stockholders, and the names and addresses of all principals duly licensed to write prescriptions if the pharmacy is a non-publicly held corporation; and the names and addresses of the officers, if a publicly held corporation.

(d) The permit application shall include the name of the pharmacist-in-charge, who shall be a registered pharmacist in good standing in the State of New Jersey.

(e) No person or other business entity shall be eligible for a new permit or a renewal thereof who is not of high moral character or against whom there is pending any indictment or any alleged violation of local, state or federal law pertaining to the practice of pharmacy or the dispensing or controlled dangerous substances or any drug under N.J.S.A. 24:21-2.

(f) A person submitting an application may be interviewed by the Board to review his or her qualifications and eligibility.

(g) Upon approval of the permit application, the Board shall issue a permit number that will allow the applicant to place prescription legend drugs in stock.

D. Consistent with the dictates of N.J.S.A. 45:14-75, N.J.S.A. 45:14-70 and N.J.A.C. 13:39-4.1, this inspection booklet is designed to place at the Board's disposal, a uniform, systematic, comprehensive presentation of all of the data that is essential for the Board to equitably evaluate and consider the applicant's potential compliance with the regulatory requisites as well as to satisfactorily conduct a practice of pharmacy. As required by N.J.A.C. 13:39-4.1, it is the applicant's responsibility and obligation to have available for transfer to the Inspector, all the necessary ownership organizational charts, site location specifics and floor plan specifications with accurate dimensions. For those pharmacies that have unusually complex ownership structures, or are to be located in sensitive areas that may adversely impact upon the pharmacy operations, (the Board, in advance of the inspection) will notify the applicant of the additional information that will be required. The applicable sections of the booklet allow for the notification of the presence of any specially requested information, that will be annexed hereto. An index of this report exhibit's attachments appears is enclosed.

E. To assist in the verification that all of the required information has been acquired, the booklet is divided into sequential categories that are designated as follows: Category I - Ownership, Category II - Location/Proposed Operations, Category III - Spatial Allocations and Physical Facilities, Category IV - Storage Facilities, Category V - Required Signs and Placards, Category VI - Library, Category VII - Metrological Equipment, Category VIII - Dispensing Complements, Category IX- Record-keeping and Patient Counseling Requisites. (For those pharmacies that are licensed as a "Pharmacy Department," inspection activity will include a pharmacy department compliance checking procedure form which will be included as an exhibit attachment to this report).

F. When documenting the informational requests contained on the following pages, the inspector places either an "X" or "✓" to indicate non-compliance with that particular statutory requirement. To denote that an inspection activity has been undertaken regarding each of the categories which encompass this inspection procedure, the initials of the inspector and/or inspection party will be placed adjacent to each category of inspection procedure denoted by roman numeral.

G. Prior to departing from the pharmacy, the inspector explains and discusses with the applicant, any deficiencies that may be noted. To avoid any possible future misunderstandings, the applicant is requested to acknowledge through the recording of initials, the deficiencies that were noted in connection with the inspection. The applicant is also invited to add written comments in areas that are provided in the "Comments" section at the bottom of each segment of the inspection "Acknowledgment" portion of this report. Upon the inspector's departure from the pharmacy, a copy of the inspection report's findings is left with the inspected party.

H. New pharmacy inspection procedures are outlined below:

(a) The applicant or their authorized representative or representatives who are present for the inspection, complete pharmacy employee/representative Personnel ID Sheets.

(b) The applicant or authorized representative verifies the accuracy of the information reported on the "Application For Permit To Conduct A Pharmacy" and records, dates and initials any changes made to the copy of the submitted application which is included with this report as an exhibit. If no changes are to made to the Permit Application, the applicant will either "X" or "✓" and initial the statement: "My review of the responses that had been previously recorded in reply to the informational requests of the "Application For Permit To Conduct A Pharmacy" forms are correct, and all declarations remain as reported".

FILED "NEW PHARMACY" APPLICATION REVIEW

☐ My review of the responses that had been previously recorded in reply to the informational requests of the "Application For Permit to Conduct A Pharmacy" forms are correct, and all declarations appear accurately reported.

☐ Changes and/or modifications were required to be made to the filed "Application For Permit To Conduct A Pharmacy." See Attachment #1 for specifics.

[redacted]

Inspection revealed deficiencies regarding the pharmacy's ownership. (13:39-4.1) Yes ☐ No ☐ (If answered affirmatively, see "Comments" which follow for specific information)	☐ "Y"

A. An ownership organizational chart is attached. ☐*

B. Documentation reflecting a complex ownership structure that requires special consideration is attached. ☐*

C. A supplemental report explaining the ownership structure intricacies is attached. ☐*

Item	Comments
A.	A list of the ownership chart is attached as Exhibit #1

*If an "X" or "√" denotation appears in the box adjacent to any asterisk which appears on this page, a relevant exhibit attachment is enclosed.

LOCATION/PROPOSED OPERATIONS

Inspection revealed deficiencies regarding the subject pharmacy's location and/or proposed operations (13:39-4.1(b)) ☐*	☐ "V"

A. A site location, that displays the exact intended location of the pharmacy and all contiguous premises (but not necessarily a Part of the pharmacy) is attached. ☐*

B. The pharmacy is located in a sensitive area that may adversely impact upon the access, egress and the operations of the pharmacy (13:39-5.2). ☐*

C. A supplemental report explaining the proposed operations is attached. ☐*

Item	Comments
A.	A site location map is attached as Exhibit #2

*If an "X" or "√" denotation appears in the box adjacent to any asterisk which appears on this page, a relevant exhibit attachment is enclosed.

LIST OF ATTACHMENTS/EXHIBITS

A. The pharmacy's floor plan specification with accurate dimensions is attached. ☐*		
B. AREA (13:39-5.4(b)) - Occupies a minimum of 150 square feet.	OK	☐ "V"
C. PRESCRIPTION COUNTER(S) (13:39-5.5) - Not less than 12 total feet in length and 18 inches in width.	OK	☐ "V"
D. SINK (13:39-5.6) - Is easily accessible to the prescription counter, and is equipped with both hot and cold running water.	OK	☐ "V"
E. SHELF, DRAWER or CABINET SPACE (13:39-5.7) - Is sufficient for the storage of prescription drugs, chemicals and required equipment.		☐ "V"
F. CERTIFICATE OF OCCUPANCY - A "Certificate of Occupancy" has been issued by the local building authorities. ☐*	OK	☐ "V"

Item	Comments
A.	A copy of the pharmacys floor plan specifications is attached as Exhibit #3
B.	A copy of the Certificate of Occupancy is attached as Exhibit #6 Continued City of Rahway

*If an "X" or "√" denotation appears in the box adjacent to any asterisk which appears on this page, a relevant exhibit attachment is enclosed.

A. A satisfactorily operational refrigerator is present (13:39-5.8(a)12). OK	☐ "√"
B. Controlled substances are to be satisfactorily stored; i.e.: if not dispersed throughout the pharmacy's drug stock inventory, there is an adequately secured and safeguarded storage area for controlled dangerous substances (13:39-5.8(a)4). OK	☐ "√"

14. Floor dimensions of the prescription department including space occupied by fixtures. Length: 28' Width: 16'

15. Width of prescription counter, free of overhanging shelves: 3' Total length of counters: 27'

16. We now possess or have ordered the equipment as outlined in the Board of Pharmacy Regulations. ☒ Yes ☐ No

(Note to purchasers of existing pharmacies: you are to note below the equipment as outlined in the Board of Pharmacy Regulations which is not now available in your pharmacy. At the time of your inspection, you must show a purchase order for the missing equipment.)

17. The outline on page four of this application is a true representation of the dimensions of the pharmacy setting forth, in detail, the prescription department fixtures.

Affidavit

18. Affidavit A, below, must be completed by the owner, or a partner, as listed in item three on page one or by a principal officer as listed in item three or four on page one if the pharmacy or drug store is owned by a corporation. If the person executing Affidavit A is not also the Registered Pharmacist-in-Charge of the pharmacy or drug store, then the Registered Pharmacist-in-Charge must complete Affidavit B.

Each Affidavit must be sworn to before a Notary Public or other authorized officer.

I do solemnly swear and affirm that the answers and statements made in this form are true and correct to the best of my knowledge and belief, and that the prescription area of this pharmacy has all of the equipment and facilities with the exceptions noted on this application, which will be obtained immediately, and meets all of the specifications enumerated in the "Prescription Area Regulations" a copy of which I have seen. In the event of loss or breakage of any item on the equipment list, it will be replaced promptly. I also agree to display the permit and understand that the permit is not transferable and agree to return it to the Board upon request. If I should move, sell or discontinue this pharmacy or if it is damaged by fire or by any other occurrence at any time, I agree to notify the Board of Pharmacy immediately. **Affidavit "A" must be executed on every application.**

To Notary Public: Please make sure that the person taking the oath has read all of item 18.

Draw an outline of the floor plan of the pharmacy, including the prescription area and stockrooms, on this page. If the length of the room is less than 72 feet, consider each square as measuring two feet on each side. If the length of the store exceeds 72 feet, consider each square equivalent to four feet on each side. Indicate the space allotted to each department according to scale. Use ink when making the sketch, if possible. Please use a ruler in making the drawing.

Outline prescription area fixtures in detail with dimensions.

Affidavit Regarding Internet and/or Mail Order Pharmacy Activity

This matter was opened to the New Jersey State Board of Pharmacy by application of RARE SPECIALTY PHARMACY to operate a pharmacy in the State of New Jersey. The applicant, who may engage in Internet and/or mail order pharmacy activity under a retail permit granted pursuant to the signature on this Affidavit, has agreed to the following conditions prior to commencing either or both of the above-listed services:

1. RARE SPECIALTY PHARMACY is hereby granted a retail permit to operate a pharmacy in the State of New Jersey, subject to the following ongoing conditions set forth in paragraphs 2 through 4 below.

2. RARE SPECIALTY PHARMACY ("applicant") shall obtain the National Association of State Boards of Pharmacy Verified Internet Pharmacy Practice Site Certification prior to engaging in Internet or online dispensing.

3. The applicant shall make all reasonable efforts to ensure that all prescriptions received via the Internet, or by mail, are valid, to wit, there exists a prescriber-patient relationship and that a reasonable and prudent pharmacist would believe that the patient has been physically examined by the prescriber or the collaborating physician. The applicant shall not accept any prescription for dispensing where he knows or should have known that the prescription has been written pursuant to an online diagnosis or survey by a prescriber.

4. The applicant shall not act as a facilitator of prescriptions being transferred by the Internet or by mail to any pharmacy in or outside of the United States that he knows or should have known dispenses in violation of the conditions set forth in Paragraph 3 of this Affidavit. This paragraph shall not preclude the routine transfer of the prescription as requested by the patient as authorized by State and federal law.

Affidavit of Applicant

I, HECTOR A. HERRERA, agree being duly sworn, depose and say under penalty of false statement, I am the party described as above; that the information given in this Affidavit and submitted materials contain no willful misrepresentations and that the information is true and complete. I understand that should an investigation at any time disclose otherwise, I may face legal sanctions. I understand that in signing this Affidavit, I am consenting to any reasonable inquiry that may be necessary to verify the information I have provided in this document.

Atorvastatin
PRONUNCIATION (a TORE va sta tin)

BRAND NAME(S): Atorvaliq, and Lipitor

WHAT IS THIS DRUG USED FOR? It is used to lower bad cholesterol, lower triglycerides, and raise good cholesterol (HDL).; It is used in some people to lower the chance of heart attack, stroke, and certain heart procedures.; It is used to slow the progress of heart disease.; It may be given to you for other reasons. Talk with the doctor.

WHAT DO I NEED TO TELL MY DOCTOR BEFORE I TAKE THIS DRUG? If you are allergic to this drug; any part of this drug; or any other drugs, foods, or substances. Tell your doctor about the allergy and what signs you had.; If you have liver disease or raised liver enzymes.; If you are taking any of these drugs: Cyclosporine, gemfibrozil, gleaprevir plus pibrentasvir, letermovir, or tipranavir plus ritonavir.; If you are pregnant or may be pregnant. Do not take this drug if you are pregnant.; If you are breast-feeding. Do not breast-feed while you take this drug.This is not a list of all drugs or health problems that interact with this drug.Tell your doctor and pharmacist about all of your drugs (prescription or OTC, natural products, vitamins) and health problems. You must check to make sure that it is safe for you to take this drug with all of your drugs and health problems. Do not start, stop, or change the dose of any drug without checking with your doctor.

WHAT ARE SOME THINGS I NEED TO KNOW OR DO WHILE I TAKE THIS DRUG? Tell all of your health care providers that you take this drug. This includes your doctors, nurses, pharmacists, and dentists.; If you have high blood sugar (diabetes), you will need to watch your blood sugar closely.; Have blood work checked as you have been told by the doctor. Talk with the doctor.; Follow the diet and workout plan that your doctor told you about.; If you drink grapefruit juice or eat grapefruit often, talk with your doctor.; Avoid or limit drinking alcohol to 2 drinks a day. Drinking too much alcohol may raise your chance of liver disease.; This drug may cause muscle pain, tenderness, or weakness. Sometimes, this may be severe and lead to kidney problems. Rarely, deaths have happened. The risk may be raised if you have thyroid problems, kidney problems, infection, or seizures. It may also be raised if you take certain other drugs or are dehydrated. People who are 65 or older may have a raised risk. Talk with your doctor if you have questions.; If you are 65 or older, use this drug with care. You could have more side effects.; This drug may cause harm to an unborn baby. If you may become pregnant, you must use birth control while taking this drug. If you get pregnant, call your doctor right away.

WHAT ARE SOME SIDE EFFECTS THAT I NEED TO CALL MY DOCTOR ABOUT RIGHT AWAY? WARNING/CAUTION: Even though it may be rare, some people may have very bad and sometimes deadly side effects when taking a drug. Tell your doctor or get medical help right away if you have any of the following signs or symptoms that may be related to a very bad side effect: Signs of an allergic reaction, like rash; hives; itching; red, swollen, blistered, or peeling skin with or without fever; wheezing; tightness in the chest or throat; trouble breathing, swallowing, or talking; unusual hoarseness; or swelling of the mouth, face, lips, tongue, or throat.; Signs of a urinary tract infection (UTI) like blood in the urine, burning or pain when passing urine, feeling the need to pass urine often or right away, fever, lower stomach pain, or pelvic pain.; Signs of a very bad skin reaction (Stevens-Johnson syndrome/toxic epidermal necrolysis) like red, swollen, blistered, or peeling skin (with or without fever); red or irritated eyes; or sores in the mouth, throat, nose, or eyes.; Weakness on 1 side of the body, trouble speaking or thinking, change in balance, drooping on one side of the face, or blurred eyesight.; Not able to pass urine or change in how much urine is passed.; Feeling very tired or weak.; Feeling confused.; Memory problems or loss.; Call your doctor if you have muscle problems like abnormal muscle pain, tenderness, or weakness (with or without fever). If your doctor tells you to stop this drug but your muscle problems do not go away, call your doctor.; Severe and sometimes deadly liver problems have happened with this drug. Call your doctor right away if you have signs of liver problems like dark urine, tiredness, decreased appetite, upset stomach or stomach pain, light-colored stools, throwing up, or yellow skin or eyes.

WHAT ARE SOME OTHER SIDE EFFECTS OF THIS DRUG? All drugs may cause side effects. However, many people have no side effects or only have minor side effects. Call your doctor or get medical help if any of these side effects or any other side effects bother you or do not go away: Diarrhea.; Joint pain.; Pain in arms or legs.; Upset stomach.; Nose or throat irritation.; Signs of a common cold.; Trouble sleeping.These are not all of the side effects that may occur. If you have questions about side effects, call your doctor. Call your doctor for medical advice about side effects.You may report side effects to the FDA at 1-800-332-1088. You may also report side effects at https://www.fda.gov/medwatch.

HOW IS THIS DRUG BEST TAKEN? Use this drug as ordered by your doctor. Read all information given to you. Follow all instructions closely.All products: Take this drug at the same time of day.; Keep taking this drug as you have been told by your doctor or other health care provider, even if you feel well.Tablets: Take with or without food.Suspension: Take on an empty stomach. Take 1 hour before or 2 hours after meals.; Shake well before use.; Measure liquid doses carefully. Use the measuring device that comes with this drug. If there is none, ask the pharmacist for a device to measure this drug.

WHAT DO I DO IF I MISS A DOSE? Take a missed dose as soon as you think about it and go back to your normal time.; If it has been 12 hours or more since the missed dose, skip the missed dose and go back to your normal time.; Do not take 2 doses at the same time or extra doses.

HOW DO I STORE AND/OR THROW OUT THIS DRUG? Tablets: Store at room temperature in a dry place. Do not store in a bathroom.Suspension: Store in the original container at room temperature.; After opening, throw away any part not used after 60 days.All products: Keep all drugs in a safe place. Keep all drugs out of the reach of children and pets.; Throw away unused or expired drugs. Do not flush down a toilet or pour down a drain unless you are told to do so. Check with your pharmacist if you have questions about the best way to throw out drugs. There may be drug take-back programs in your area.

GENERAL DRUG FACTS If your symptoms or health problems do not get better or if they become worse, call your doctor.; Do not share your drugs with others and do not take anyone else's drugs.; Some drugs may have another patient information leaflet. Check with your pharmacist. If you have any questions about this drug, please talk with your doctor, nurse, pharmacist, or other health care provider.; If you think there has been an overdose, call your poison control center or get medical care right away. Be ready to tell or show what was taken, how much, and when it happened.

RARE SPECIALTY PHARMACY

Policy Title: Inventory Management Policy

POLICY

Inventory shall be stored in accordance with all state and federal regulations as well as manufacturer recommendations in a secure facility that is clean, well-lighted and appropriate for the products that are being held for distribution by the pharmacy. Inventory shall be physically organized and separated by clear boundaries.

PROCEDURE

1. Purchasing and monitoring of inventory
    A. The pharmacy ensures stability of inventory by only purchasing from licensed wholesalers, licensed distribution channels or drug manufacturers in accordance with state and federal regulations, including the Drug Chain Security Act (DCSA, Title II of the Drug Quality and Security Act of 2013).
    B. Upon receipt of medications the pharmacy monitors for unacceptable medications, including counterfeit drugs. Each product is inspected for color, shape, consistency, and evidence of modification to packaging. In the event of a suspicious drug product, the distributor will be contacted directly by pharmacy leadership to initiate the investigation, and the product placed in the pharmacy quarantine area until deemed to be acceptable for incorporation into pharmacy stock.
    C. Continuously, the pharmacy addresses out of stock and backorder products to ensure supply to patients is not interrupted. Patients will be notified if such a delay is expected. The organization addresses the issue by the following:
        i. Alternative suppliers
        ii. Transfer to alternative pharmacy
        iii. Contact prescriber to find alternate product
    D. Inventory is managed by the pharmacy daily using:
        i. Stock rotation
        ii. Cycle counts
        iii. Expiration date checks
    E. Continuous, 24-hour electronic monitoring is in place for all drug storage areas to maintain the following appropriate temperature ranges as defined by the recommendation of USP <659>:
        i. Refrigerators storing medications (food refrigerators must be labeled appropriately and designated for food only): 36 to 46°F
        ii. Freezers (all freezers regardless of drug storage, including freezers for ice packs): -13 to 14°F
        iii. Ambient room air temperature: 68 to 77°F
        iv. Humidity: Average relative humidity is less than 40%
    F. In the event of a temperature excursion, the pharmacist will identify a list of affected medications and review the appropriate manufacturer guidelines or other published literature to determine if the excursion was acceptable. Until the pharmacist review is complete, these medications will be quarantined. If the breakdown exceeds manufacturer recommendations, then the medication will remain quarantined until returned to the distributer for appropriate destruction. In the event of a temperature excursion from the manufacturer's specifications lasting 24 hours or more, the pharmacist in charge will notify the Board of Pharmacy immediately. Notification shall be made in that the notice is received by the Board of Pharmacy within 48 hours of becoming aware of the temperature excursion.
    G. Currently, the pharmacy does not participate in inventory storage thermal mapping.

H. A list of drugs and routes not approved for administration by nursing personnel are maintained in the pharmacy and reviewed/approved annually by the Quality Management Committee.

2. Medication Returns
   A. Generally, after a medication leaves the pharmacy for delivery to a patient it may not be returned to pharmacy stock due to the absence of continuous temperature monitoring and concern for patient safety. However, if a package is delivered by courier or contains specific continuous temperature surveillance (documentation of a high and low temperature) for the entire time the package is away from the pharmacy and is never signed out to a patient, pharmacy leadership may review records and determine if the return is safe and acceptable.
   B. If the medication has been given to the patient it may not be returned to pharmacy stock in accordance with state and federal regulations.
   C. All patient medication disposal must be conducted through appropriate legal channels such as drug take back days or designated drug disposal stations in accordance with state and federal law. The pharmacy may not accept medications from a patient for the purpose of disposal.

3. Quarantine and Disposal
   A. Unacceptable medications include recalled, discontinued, expired, damaged, adulterated, misbranded or counterfeit.
   B. When a notification is received regarding an unacceptable medication, information will be recorded, and education will be provided to staff, patients, and prescribers as necessary and based on direction from manufacturers and regulators. Receipt of notifications may come from patients, manufacturers, FDA, etc.
      i. Current inventory will be reviewed, and unacceptable medication removed.
      ii. Inventory in the shipping process will be reviewed to identify medication that requires removal.
   C. Unacceptable medication will be quarantined and disposed of according to state and federal law via the original distributor or a reverse distributor. If necessary, patients will be counselled by a pharmacist on the correct method of drug disposal.

4. Manufacturer and FDA Requirements
   A. When a new medication is added to the pharmacy formulary, pharmacy leadership and clinical staff will review and implement FDA guidance and all self-imposed manufacturer requirements, including REMS requirements. All team members will be educated regarding the specifics of each requirement, and where to find more information regarding the requirement (e.g. the FDA website). All new medications and new requirements to current medications will be reviewed and approved by the Quality Management Committee for implementation to promote ongoing compliance.
   B. Annually, the list of medications with FDA or manufacturer requirements will be reviewed and approved by the Quality Management Committee.
   C. In the event of a new FDA guidance or self-imposed manufacturer restriction that may cause a potential safety event (new black box warning, new REMS program, additional adverse drug events), the pharmacy will print a list of active patients receiving the applicable medication and notify the patient/caregiver and prescriber, as is most appropriate for the situation.

5. Equipment and supplies
    A. Equipment, supplies and devices will be purchased from legitimate sources, stored appropriately, and removed from active stock if adulterated.
    B. Procedures will be written, stored on file and employees educated for any equipment or supplies available for dispense in the pharmacy. Procedures will include:
        i. Storage and transportation of equipment used to provide care/services
        ii. Electrical safety of the equipment
        iii. Use of cleaning and disinfecting agents
        iv. Cleaning of equipment after each use
        v. Maintenance and repair of equipment used by the organization's personnel
        vi. Calibration per manufacturer's guidelines, if applicable
        vii. Requirements for dispensing of any disposable supply used in the provision of care/service
        viii. Manufacturer's recalls

6. Wholesale Distribution
    A. Drugs purchased under the pharmacy licensed are never transferred to a wholesale distribution license.

Enforecement Bureau
P.O. Box 45022
Newark, NJ 07101

Dear Donna,

As a follow-up from the on-site inspection on 06.20.24, Rare Specialty Pharmacy is an open door pharmacy, focusing on rare and advanced disease states. Rare will obtain the NJ home state permit and has plans to expand nationally in all 50 states plus Washington D.C., while getting accredited as a specialty pharmacy through URAC and ACHC. The Pharmacy will not have a central fill agreement and will hand deliver all prescriptions in NJ. Rare Specialty Pharmacy will not engage in any specific physician office or telehealth platform agreement nor have any shared services with any other pharmacies in any states.

Thank you,

Hector A. Herrera
Chief Executive Officer

Section 9: Statement of Responsibility - MUST BE COMPLETED by an Authorized Person (NAC 639.945)

Statement of Responsibility

1. I am the President/CEO (title) ~~for~~ Stellar Pharmacy Services Inc. (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be responsible for any violations of pharmacy law that may occur in the Pharmacy owned by such owner(s), shareholder(s), member(s), or partner(s).
3. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be named in any action taken by the Nevada State Board of Pharmacy against the Pharmacy.
4. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) cannot require or permit the pharmacist(s) in said Pharmacy to violate any provision of local, state, or federal laws or regulations pertaining to the practice of pharmacy.
5. I further understand and acknowledge that Nevada law requires that each pharmacy located inside the State of Nevada employ only pharmacists, intern pharmacists, pharmaceutical technicians, and technicians in training that are licensed by the Nevada State Board of Pharmacy. (NRS 639.100).
6. I further understand and acknowledge that Nevada law requires that each pharmacy located outside the State of Nevada engaged in providing pharmacy services into Nevada employs at least one pharmacist licensed by the Nevada State Board of Pharmacy who will be responsible for any prescription dispensed to a patient located in Nevada and responsible for any acts or omissions of pharmacy personnel who are not registered with the Board. (NRS 639.2328).

Section 10: Affidavit for Pharmacies- MUST BE COMPLETED by pharmacies NOT CURRENTLY PERFORMING Sterile Compounding

Affidavit for Pharmacy License

I, Anthony P Cappello hereby certify that the assertions in this Affidavit are true and correct to the best of my knowledge and belief, and state as follows:

1. I am the Pharmacy Manager (title) for Stellar Pharmacy Services, Inc. (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I certify that upon licensure, the Pharmacy will not perform sterile compounding or ship sterile compounds into Nevada.
3. I understand and acknowledge that the Pharmacy and any of its staff members may be subject to discipline by the Board if the Pharmacy performs sterile compounding or ships any sterile compounds into Nevada without first obtaining written authorization from the Board to do so.
4. I certify that if the Pharmacy makes the decision to perform sterile compounding or to ship any sterile compounds into Nevada, the Pharmacy, through an authorized representative, will first notify the Board via a written request, and obtain written approval to perform sterile compounding or to ship any sterile compounds into Nevada.
5. I understand that if the Pharmacy seeks approval to perform sterile compounding or to ship any sterile compounds into Nevada, an authorized representative of the Pharmacy may be required to appear before the Board to answer questions before such approval is granted.

FURTHER YOUR AFFIANT SAYETH NAUGHT.

Section 8: Arrests, Detentions, Litigations, Arbitrations.	Yes	No
1. Have you ever been convicted of, or entered, a plea of guilty, guilty by mentally ill or nolo contendere to any criminal offense or civil violation, federal or state, for any reason whatsoever, regardless of the disposition of the event? (Except minor traffic citations.)		✓
2. If you answered "yes" to question 1, was the offense or violation related to drugs, including prescription drugs and/or controlled substances, the manufacturer or distribution of drugs or the practice of pharmacy?		✓
3. Have you ever had a civil or criminal record expunged or sealed by a court order?		✓
4. Have you, as an individual, member or a company, partner, or owner, director or officer of a corporation, ever been a party to a lawsuit as either a plaintiff or defendant (including any administrative proceedings before a licensing board) or of an arbitration as either a claimant or respondent? (Other than divorces.)		✓
5. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) been a party to a lawsuit (including any administrative proceedings before a licensing board), arbitration or bankruptcy?		✓
6. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer or director) ever appeared before any licensing agency or similar authority in or outside the State of Nevada for any reason whatsoever (including any disciplinary or board citation)?		✓
7. Have you ever been denied a personal license, permit, certificate or registration for a privileged, occupational or professional activity?		✓
8. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner member, officer or director) ever been refused a business license.		✓
9. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) ever surrendered a license, permit, certificate or registration relating to the pharmaceutical industry voluntarily or otherwise (other than upon voluntary closure of a manufacturer).		✓
10. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		✓

I certify under penalty of perjury that the information contained in this application is accurate, true and complete in all material respects. I understand that making any false representation in this application is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire application and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. In the event this application is approved I agree to comply with all applicable federal and state statutes and regulations governing this license or registration and understand that any violation may result in discipline.

Section 9: Statement of Responsibility - MUST BE COMPLETED by an Authorized Person (NAC 639.945)

Statement of Responsibility

1. I am the Secretary (title) for SelectRx KS, LLC (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be responsible for any violations of pharmacy law that may occur in the Pharmacy owned by such owner(s), shareholder(s), member(s), or partner(s).
3. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be named in any action taken by the Nevada State Board of Pharmacy against the Pharmacy.
4. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) cannot require or permit the pharmacist(s) in said Pharmacy to violate any provision of local, state, or federal laws or regulations pertaining to the practice of pharmacy.
5. I further understand and acknowledge that Nevada law requires that each pharmacy located inside the State of Nevada employ only pharmacists, intern pharmacists, pharmaceutical technicians, and technicians in training that are licensed by the Nevada State Board of Pharmacy. (NRS 639.100).
6. I further understand and acknowledge that Nevada law requires that each pharmacy located outside the State of Nevada engaged in providing pharmacy services into Nevada employs at least one pharmacist licensed by the Nevada State Board of Pharmacy who will be responsible for any prescription dispensed to a patient located in Nevada and responsible for any acts or omissions of pharmacy personnel who are not registered with the Board. (NRS 639.2328).

Section 10: Affidavit for Pharmacies- MUST BE COMPLETED by pharmacies NOT CURRENTLY PERFORMING Sterile Compounding

Affidavit for Pharmacy License

I, Daniel A. Boulware hereby certify that the assertions in this Affidavit are true and correct to the best of my knowledge and belief, and state as follows:

1. I am the Secretary (title) for SelectRx KS, LLC (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I certify that upon licensure, the Pharmacy will not perform sterile compounding or ship sterile compounds into Nevada.
3. I understand and acknowledge that the Pharmacy and any of its staff members may be subject to discipline by the Board if the Pharmacy performs sterile compounding or ships any sterile compounds into Nevada without first obtaining written authorization from the Board to do so.
4. I certify that if the Pharmacy makes the decision to perform sterile compounding or to ship any sterile compounds into Nevada, the Pharmacy, through an authorized representative, will first notify the Board via a written request, and obtain written approval to perform sterile compounding or to ship any sterile compounds into Nevada.
5. I understand that if the Pharmacy seeks approval to perform sterile compounding or to ship any sterile compounds into Nevada, an authorized representative of the Pharmacy may be required to appear before the Board to answer questions before such approval is granted.

FURTHER YOUR AFFIANT SAYETH NAUGHT.

Expiration Date: 07/31/2025

In accordance with Title 7 of Nevada Revised Statutes, pursuant to proper application duly filed and payment of appropriate prescribed fees, the above named is hereby granted a Nevada State Business License for business activities conducted within the State of Nevada.
Valid until the expiration date listed unless suspended, revoked or cancelled in accordance with the provisions in Nevada Revised Statutes. License is not transferable and is not in lieu of any local business license, permit or registration.
License must be cancelled on or before its expiration date if business activity ceases. Failure to do so will result in late fees or penalties which, by law, cannot be waived.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the Great Seal of State, at my office on 07/25/2024.

Certificate Number: B202407254829874
You may verify this certificate online at https://www.nvsilverflume.gov/home

Section 8: Arrests, Detentions, Litigations, Arbitrations.	Yes	No
1. Have you ever been convicted of, or entered, a plea of guilty, guilty by mentally ill or nolo contendere to any criminal offense or civil violation, federal or state, for any reason whatsoever, regardless of the disposition of the event? (Except minor traffic citations.)		✓
2. If you answered "yes" to question 1, was the offense or violation related to drugs, including prescription drugs and/or controlled substances, the manufacturer or distribution of drugs or the practice of pharmacy?		
3. Have you ever had a civil or criminal record expunged or sealed by a court order?		✓
4. Have you, as an individual, member or a company, partner, or owner, director or officer of a corporation, ever been a party to a lawsuit as either a plaintiff or defendant (including any administrative proceedings before a licensing board) or of an arbitration as either a claimant or respondent? (Other than divorces.)		✓
5. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) been a party to a lawsuit (including any administrative proceedings before a licensing board), arbitration or bankruptcy?		✓
6. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer or director) ever appeared before any licensing agency or similar authority in or outside the State of Nevada for any reason whatsoever (including any disciplinary or board citation)?		✓
7. Have you ever been denied a personal license, permit, certificate or registration for a privileged, occupational or professional activity?		✓
8. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner member, officer or director) ever been refused a business license.		✓
9. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) ever surrendered a license, permit, certificate or registration relating to the pharmaceutical industry voluntarily or otherwise (other than upon voluntary closure of a manufacturer).		✓
10. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		✓

I, Whittney D. Steele, **certify that as the designated representative for**

SelectRx KS, LLC,

that I am qualified as follows and will comply with the following:

1. I am at least 21 years of age;
3. I have been employed for at least 6,000 hours in a pharmacy or with a wholesaler in a capacity related to the dispensing and distribution of, and recordkeeping related to, prescription drugs.
4. I will be actively involved in and aware of the actual daily operations of the pharmacy or wholesaler;
5. I will be employed full-time in a managerial level position with the pharmacy or wholesaler;
6. I will be physically present at site of the pharmacy or at the facility of the wholesaler during regular business hours, except when the absence of the representative is authorized, including sick leaves, vacation leaves and other authorized absences; and
7. I will serve in this representative capacity for only one pharmacy or wholesaler at a time

Facility/Provider Information

The Kansas Board of Pharmacy certifies that it maintains the information for the credential verification function of this website, as well as performing hourly updates to the information represented. Therefore, the website is a secure and primary source of credential verification information, as authentic as a direct inquiry to the Board. Note Pharmacy Technicians issued after January 1, 2019 will now have a 24- prefix for their registration number until they provide proof of passage of the PTCB or ExCPT certification examination.

Section 9: Statement of Responsibility - MUST BE COMPLETED by an Authorized Person (NAC 639.945)

Statement of Responsibility

1. I am the President (title) for The Art of Medicine (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be responsible for any violations of pharmacy law that may occur in the Pharmacy owned by such owner(s), shareholder(s), member(s), or partner(s).
3. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be named in any action taken by the Nevada State Board of Pharmacy against the Pharmacy.
4. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) cannot require or permit the pharmacist(s) in said Pharmacy to violate any provision of local, state, or federal laws or regulations pertaining to the practice of pharmacy.
5. I further understand and acknowledge that Nevada law requires that each pharmacy located inside the State of Nevada employ only pharmacists, intern pharmacists, pharmaceutical technicians, and technicians in training that are licensed by the Nevada State Board of Pharmacy. (NRS 639.100).
6. I further understand and acknowledge that Nevada law requires that each pharmacy located outside the State of Nevada engaged in providing pharmacy services into Nevada employs at least one pharmacist licensed by the Nevada State Board of Pharmacy who will be responsible for any prescription dispensed to a patient located in Nevada and responsible for any acts or omissions of pharmacy personnel who are not registered with the Board. (NRS 639.2328).

Section 10: Affidavit for Pharmacies- MUST BE COMPLETED by pharmacies NOT CURRENTLY PERFORMING Sterile Compounding

Affidavit for Pharmacy License

I, Jack Korbutov hereby certify that the assertions in this Affidavit are true and correct to the best of my knowledge and belief, and state as follows:

1. I am the President (title) for The Art of Medicine (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I certify that upon licensure, the Pharmacy will not perform sterile compounding or ship sterile compounds into Nevada.
3. I understand and acknowledge that the Pharmacy and any of its staff members may be subject to discipline by the Board if the Pharmacy performs sterile compounding or ships any sterile compounds into Nevada without first obtaining written authorization from the Board to do so.
4. I certify that if the Pharmacy makes the decision to perform sterile compounding or to ship any sterile compounds into Nevada, the Pharmacy, through an authorized representative, will first notify the Board via a written request, and obtain written approval to perform sterile compounding or to ship any sterile compounds into Nevada.
5. I understand that if the Pharmacy seeks approval to perform sterile compounding or to ship any sterile compounds into Nevada, an authorized representative of the Pharmacy may be required to appear before the Board to answer questions before such approval is granted.

FURTHER YOUR AFFIANT SAYETH NAUGHT.

Statement of Responsibility

1. I am the CEO (title) for Luxor Pharmacy Cop. (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be responsible for any violations of pharmacy law that may occur in the Pharmacy owned by such owner(s), shareholder(s), member(s), or partner(s).
3. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be named in any action taken by the Nevada State Board of Pharmacy against the Pharmacy.
4. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) cannot require or permit the pharmacist(s) in said Pharmacy to violate any provision of local, state, or federal laws or regulations pertaining to the practice of pharmacy.
5. I further understand and acknowledge that Nevada law requires that each pharmacy located inside the State of Nevada employ only pharmacists, intern pharmacists, pharmaceutical technicians, and technicians in training that are licensed by the Nevada State Board of Pharmacy. (NRS 639.100).
6. I further understand and acknowledge that Nevada law requires that each pharmacy located outside the State of Nevada engaged in providing pharmacy services into Nevada employs at least one pharmacist licensed by the Nevada State Board of Pharmacy who will be responsible for any prescription dispensed to a patient located in Nevada and responsible for any acts or omissions of pharmacy personnel who are not registered with the Board. (NRS 639.2328).

Section 10: Affidavit for Pharmacies- MUST BE COMPLETED by pharmacies NOT CURRENTLY PERFORMING Sterile Compounding

Affidavit for Pharmacy License

I, Samer Beskhayroun hereby certify that the assertions in this Affidavit are true and correct to the best of my knowledge and belief, and state as follows:

1. I am the CEO (title) for Luxor Pharmacy CorpDBAThe Medicine Shoppe (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I certify that upon licensure, the Pharmacy will not perform sterile compounding or ship sterile compounds into Nevada.
3. I understand and acknowledge that the Pharmacy and any of its staff members may be subject to discipline by the Board if the Pharmacy performs sterile compounding or ships any sterile compounds into Nevada without first obtaining written authorization from the Board to do so.
4. I certify that if the Pharmacy makes the decision to perform sterile compounding or to ship any sterile compounds into Nevada, the Pharmacy, through an authorized representative, will first notify the Board via a written request, and obtain written approval to perform sterile compounding or to ship any sterile compounds into Nevada.
5. I understand that if the Pharmacy seeks approval to perform sterile compounding or to ship any sterile compounds into Nevada, an authorized representative of the Pharmacy may be required to appear before the Board to answer questions before such approval is granted.

Inspector Remarks:

Retail pharmacy, dispensed about 70-80Rxs daily, staffed with 1RPH/2TCH/1 clerk. Pharmacy offers delivery and pharmacist initiated immunization services. Pharmacy does not dispense compounded drug preparations, and does not participate in drug take back program.

Reviewed:

Notice to Consumer, Point to Your Language poster visible/posted. Interpretive services provided by Language Scientific.

Pharmacy Permit - Original board issued pharmacy license & current renewal must be posted where they maybe clearly read by the purchasing public, per BPC 4058.

CURES - transmitting

DEA Inventory - Discussed requirements per CFR 1307.11. PIC to provide most recently completed DEA inventory.

Rx script - 99% prescriptions dispensed are received electronically

Rx Label - Patient centered. Pharmacy occasionally dispensed prescriptions with translated direction for use. Reminder regarding BPC 4076.6: if translated directions for use appear on a prescription container or label, the English language version of the direction for use shall also appear on the container or label or with supplemental document. Dispensed opioid prescriptions contain caution statement required per BPC 4076.7

Consultation - no patients to observe. Reviewed sample prescriptions made ready for delivery. Discussed requirements per CCR 1707.2(b)(1)(A-C). PIC to provide proof of compliance.

Sink - Gold running water available but no hot running water available during inspection. See order of correction

Refrigerator - Temp=5.8C; reviewed log. Discussed proper/accurate, consistent documentation of freezer and refrigerator temp.

Immunization - pharmacy offers pharmacist initiated immunization. Recommend BUD documented directly on package, based on recommendation from manufacturer. Training certificate and CPR, issued 12/20/21 available for RPH Tran

Section 8: Arrests, Detentions, Litigations, Arbitrations	Yes	No
1. Have you ever been convicted of, or entered, a plea of guilty, guilty by mentally ill or nolo contendere to any criminal offense or civil violation, federal or state, for any reason whatsoever, regardless of the disposition of the event? (Except minor traffic citations.)		✓
2. If you answered "yes" to question 1, was the offense or violation related to drugs, including prescription drugs and/or controlled substances, the manufacturer or distribution of drugs or the practice of pharmacy?		✓
3. Have you ever had a civil or criminal record expunged or sealed by a court order?		✓
4. Have you, as an individual, member or a company, partner, or owner, director or officer of a corporation, ever been a party to a lawsuit as either a plaintiff or defendant (including any administrative proceedings before a licensing board) or of an arbitration as either a claimant or respondent? (Other than divorces.)		✓
5. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) been a party to a lawsuit (including any administrative proceedings before a licensing board), arbitration or bankruptcy?		✓
6. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer or director) ever appeared before any licensing agency or similar authority in or outside the State of Nevada for any reason whatsoever (including any disciplinary or board citation)?		✓
7. Have you ever been denied a personal license, permit, certificate or registration for a privileged, occupational or professional activity?		✓
8. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner member, officer or director) ever been refused a business license.		✓
9. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) ever surrendered a license, permit, certificate or registration relating to the pharmaceutical industry voluntarily or otherwise (other than upon voluntary closure of a manufacturer).		✓
10. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		✓

I certify under penalty of perjury that the information contained in this application is accurate, true and complete in all material respects. I understand that making any false representation in this application is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire application and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. In the event this application is approved I agree to comply with all applicable federal and state statutes and regulations governing this license or registration and understand that any violation may result in discipline.

Section 8: Arrests, Detentions, Litigations, Arbitrations	Yes	No
1. Have you ever been convicted of, or entered, a plea of guilty, guilty by mentally ill or nolo contendere to any criminal offense or civil violation, federal or state, for any reason whatsoever, regardless of the disposition of the event? (Except minor traffic citations.)		✓
2. If you answered "yes" to question 1, was the offense or violation related to drugs, including prescription drugs and/or controlled substances, the manufacturer or distribution of drugs or the practice of pharmacy?		
3. Have you ever had a civil or criminal record expunged or sealed by a court order?		✓
4. Have you, as an individual, member or a company, partner, or owner, director or officer of a corporation, ever been a party to a lawsuit as either a plaintiff or defendant (including any administrative proceedings before a licensing board) or of an arbitration as either a claimant or respondent? (Other than divorces.)		✓
5. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) been a party to a lawsuit (including any administrative proceedings before a licensing board), arbitration or bankruptcy?		✓
6. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer or director) ever appeared before any licensing agency or similar authority in or outside the State of Nevada for any reason whatsoever (including any disciplinary or board citation)?		✓
7. Have you ever been denied a personal license, permit, certificate or registration for a privileged, occupational or professional activity?		✓
8. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner member, officer or director) ever been refused a business license.		✓
9. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) ever surrendered a license, permit, certificate or registration relating to the pharmaceutical industry voluntarily or otherwise (other than upon voluntary closure of a manufacturer).		✓
10. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		✓

I certify under penalty of perjury that the information contained in this application is accurate, true and complete in all material respects. I understand that making any false representation in this application is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire application and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. In the event this application is approved I agree to comply with all applicable federal and state statutes and regulations governing this license or registration and understand that any violation may result in discipline.

Section 9: Statement of Responsibility - MUST BE COMPLETED by an Authorized Person (NAC 639.945)

Statement of Responsibility

1. I am the Director (title) for US MED, LLC (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be responsible for any violations of pharmacy law that may occur in the Pharmacy owned by such owner(s), shareholder(s), member(s), or partner(s).
3. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be named in any action taken by the Nevada State Board of Pharmacy against the Pharmacy.
4. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) cannot require or permit the pharmacist(s) in said Pharmacy to violate any provision of local, state, or federal laws or regulations pertaining to the practice of pharmacy.
5. I further understand and acknowledge that Nevada law requires that each pharmacy located inside the State of Nevada employ only pharmacists, intern pharmacists, pharmaceutical technicians, and technicians in training that are licensed by the Nevada State Board of Pharmacy. (NRS 639.100).
6. I further understand and acknowledge that Nevada law requires that each pharmacy located outside the State of Nevada engaged in providing pharmacy services into Nevada employs at least one pharmacist licensed by the Nevada State Board of Pharmacy who will be responsible for any prescription dispensed to a patient located in Nevada and responsible for any acts or omissions of pharmacy personnel who are not registered with the Board. (NRS 639.2328).

Section 10: Affidavit for Pharmacies- MUST BE COMPLETED by pharmacies NOT CURRENTLY PERFORMING Sterile Compounding

Affidavit for Pharmacy License

I, Keegan David Chamberlain hereby certify that the assertions in this Affidavit are true and correct to the best of my knowledge and belief, and state as follows:

1. I am the Director (title) for US MED, LLC (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I certify that upon licensure, the Pharmacy will not perform sterile compounding or ship sterile compounds into Nevada.
3. I understand and acknowledge that the Pharmacy and any of its staff members may be subject to discipline by the Board if the Pharmacy performs sterile compounding or ships any sterile compounds into Nevada without first obtaining written authorization from the Board to do so.
4. I certify that if the Pharmacy makes the decision to perform sterile compounding or to ship any sterile compounds into Nevada, the Pharmacy, through an authorized representative, will first notify the Board via a written request, and obtain written approval to perform sterile compounding or to ship any sterile compounds into Nevada.
5. I understand that if the Pharmacy seeks approval to perform sterile compounding or to ship any sterile compounds into Nevada, an authorized representative of the Pharmacy may be required to appear before the Board to answer questions before such approval is granted.

FURTHER YOUR AFFIANT SAYETH NAUGHT.

Controlled substance records and prescription information in computer system are retrievable and maintained for 4 years. [465.022(12)(a), F.S.] [64B16-28.140, F.A.C.] [21CFR1306.22] [21CFR1304.04]	N/A
Pharmacy is reporting to law enforcement any instance of fraudulent prescriptions within 24 hours or close of business on next business day of learning of instance. Reports include all required information. [465.015(3), F.S.]	N/A
Record of theft or significant loss of all controlled substances is being maintained and reported to the sheriff and board within 24 hours of discovery. [893.07(5)(b), F.S.] [465.022(11)(b), F.A.C.]	N/A

Pharmacy is reporting to the PDMP within 24 hours of dispensing controlled substance. [893.055(4)(3)(a), F.S.]	N/A

Pharmacy Ships Medicinal Drugs to Patients [64B16-28.10801, F.A.C]

Pharmacy has policies and procedures in place to provide instructions to the patient on reporting concerns with delivery and storage of medicinal drugs.	
Pharmacy has policies and procedures in place to ensure that medicinal drugs are not adulterated at the time of receipt by the patient or their agent.	

Automated Pharmacy System [465.0235, F.S.]

Pharmacy maintains a record of the medicinal drugs dispensed, including the identity of the pharmacist responsible for verifying the accuracy of the dosage and directions and providing patient counseling.	
Pharmacy maintains written policies and procedures to ensure the proper, safe, and secure functioning of the automated pharmacy system for a minimum of 4 years.	

Pharmacy engages in Centralized Prescription Filling [64B16-28.450, F.A.C.]

Pharmacies have the same owner or have a written contract specifying the services to be provided by each pharmacy.	
Current P&P Manual available for inspection designating at minimum: types of medications that may be filled, procedures for communicating orders, procedures for securely transporting the filled prescriptions.	
The central fill pharmacy is identified by name and address or a by a code available at the originating pharmacy.	
If a controlled substance, the word "central fill" appears on the face of the original prescription.	
The originating pharmacy keeps a record of receipt of the filled prescription, including the date of receipt, method of delivery and the name of the originating pharmacy's employee accepting delivery.	

Internet Pharmacy

A toll-free telephone number is provided to facilitate communication between patients in this state and a pharmacist at the pharmacy who has access to the patient's records. [465.0197 (3)(e), F.S.]	
Toll free number is disclosed on the label affixed to each container of dispensed medicinal drugs. [465.0197(3)(e), F.S.]	
Documentation of a valid, unexpired pharmacy license, permit or registration in the state in which the dispensing facility is located and from which the medicinal drugs shall be dispensed. [465.0197(3)(a) F.S]	

HIV Infection Prevention Drugs

Pharmacists are screening, ordering or dispensing HIV postexposure prophylaxis drugs under a written Collaborative Practice Agreement. [465.1861, F.S.]	
An access-to-care plan has been submitted to the board office and is in place to assist patients in gaining access to appropriate care settings when they present to a pharmacist for HIV screening and indicate that they lack regular access to primary care. [465.1861, F.S.]	

Remarks:

Last CQI meeting conducted on: 09/27/2024. Wholesaler: Symple. Diagnostic. Pharmacy does not carry controlled substances. Diabetes supply ships thru UPS.

I have read and have had this inspection report and the laws and regulations concerned herein explained, and do affirm that the information given herein is true and correct to the best of my knowledge.

NEVADA STATE BOARD OF PHARMACY, **Petitioner,** **v.** **URI ASSA KRUTILIN, RPH,** **Certificate of Registration No. 18266,** **Respondent.**	**CASE NO. 18-052-RPH-S** **ORDER TO SHOW CAUSE**

J. David Wuest, in his official capacity as Executive Secretary of the Nevada State Board of Pharmacy (Board), makes the following that will serve both a notice of intended action under NRS 233B.127(3) and as an order to show cause under NAC 639.965:

1. Uri Assa Krutilin , forfeited Certificate of Registration No. 18266, is hereby directed to appear before the Board for a hearing to show cause scheduled **for Wednesday, Match 5, 2025, at 9:00 AM PST, or soon thereafter at the following location:**

Hilton Garden Inn Las Vegas Strip South
7830 S. Las Vegas Blvd
Las Vegas, NV 89123

2. On December 1, 2021, the Board entered default against Respondent pursuant to NRS 622A.320(1), NRS 639.244 and NRS 622A.350, and entered its Findings of Fact, Conclusions of (Default Order).

3. Respondent has failed to make payment of a fine of One Thousand Three Hundred Dollars ($1,300.00) pursuant to the Default Order.

4. Respondent has failed to make payment of Seven Hundred Forty-Nine Dollars ($749.00) for attorney's fees and investigative costs pursuant to the Default Order.

5. Respondent is therefore directed to show cause why he should not be subject to further discipline pursuant to NRS Chapter 639, or otherwise demonstrate that his conduct, as alleged above, complies with all lawful requirements. NRS 233B.127(3).

IT IS SO ORDERED.

Entered this 11th day of January 2025.

J. David Wiest, R.Ph., Executive Secretary
Nevada State Board of Pharmacy

Pursuant to NRS 241.033 and 241.034, please be advised that the hearing is a public meeting, and the Board may, without further notice, take administrative action against you if the Board determines that such administrative action is warranted after considering your character, alleged misconduct, professional competence, or physical or mental health. The Board at its discretion may go into closed session to consider your character, alleged misconduct, professional competence, or physical or mental health. You may attend any closed session, have an attorney or other representative of your choosing present during any closed session, present written evidence, provide testimony, and present witnesses relating to your character, alleged misconduct, professional competence, or physical or mental health during any closed session.

NEVADA STATE BOARD OF PHARMACY

NEVADA STATE BOARD OF PHARMACY, **Petitioner,** **v.** **OMNICARE OF LAS VEGAS, Pharmacy License No. PHC01949,** **URI ASSA KRUTILIN, RPH, Certificate of Registration No. 18266,** **Respondents.**	**CASE NO. 18-052-PH-S** **18-052-RPH--S** **FINDINGS OF FACTS, CONCLUSIONS OF LAW, AND ORDER AS TO RESPONDENT URI ASSA KRUTILIN ONLY**

This matter came before the Nevada State Board of Pharmacy ("Board") at its regularly scheduled meeting on Wednesday, December 1, 2021, in Las Vegas, Nevada. Courtney K. Lee, Esq., appeared and prosecuted the case before the Board. Respondent Omnicare of Las Vegas ("Omnicare"), Pharmacy License No. PHC01949 appeared by Omnicare representative Brian Convery and a Stipulation and Order as to Respondent Omnicare only was approved by the Board.

Respondent Uri Assa Krutilin, RPH ("Assa Krutilin"), Certificate of Registration No. 18266, did not appear. Assa Krutilin did not file an answer or notice of defense, which constitutes a waiver of right to a hearing pursuant to NRS 639.244. Assa Krutilin failed to appear, therefore an offer of proof of sufficient legal notice was submitted by Board coordinators', Shirley Hunting and Kris Mangosing, through their testimonies and proof of service documents submitted as Exhibit "1". The Board proceeded to consider and dispose of the case without Respondent Assa Krutilin pursuant to NRS 622A.350. Upon hearing the case, the Board determines the following Findings of Fact, Conclusions of Law, and Order.

FINDINGS OF FACT

The allegations against Respondent Assa Krutilin, as stated in the Notice of Intended Action and Accusation ("Accusation") on file herein, and upon which the Board determines findings of fact, are as follows:

1. The Nevada State Board of Pharmacy ("Board") has jurisdiction over this matter because at the time of the events alleged herein, Respondent Uri Assa Krutilin, RPh ("Assa Krutilin") held a Nevada Pharmacist Certificate of Registration No. 18266, issued by the Board.

2. Respondent Omnicare is a compounding pharmacy located on 1525 E. Sunset, #16, Las Vegas, Nevada.

3. Respondent Assa Krutilin is/was the managing pharmacist of Omnicare during the relevant timeframes.

4. On or about June 29, 2018, Board staff visited Omnicare at 8:00 a.m. Pharmacist L.T. was the only pharmacist present with eight (8) technicians.

5. Upon review of the work schedules, timeclock records, security door scan records, and sign in logs, the following violations were discovered:

a. On or about June 18, 2018, from 8:00 a.m. to 9:30 a.m., Pharmacist J.P. and L.T. were present with technicians J.F., F.B., W.M., D.R., M.R., J.B., and D.W., a ratio of 2:7.

b. On or about June 22, 2018, from 8:00 a.m. to 8:30 a.m., Pharmacists H.B. and L.T. were present with technicians J.F., F.B., K.F., M.E., A.D., C.F., and V.W., a ratio of 2:7.

c. On or about June 22, 2018, from 1:30 p.m. to 4:00 p.m., Pharmacists H.B. and Respondent Assa Krutilin were present with technicians F.B., K.F., L.K., A.D., N.K., N.P., J.B., and V.W., a ratio of 2:8.

d. On or about June 22, 2018, from 5:30 p.m. to 6:00 p.m., Pharmacists H.B. was present with technicians A.M., L.K., A.D., N.K., N.P., and V.W., a ratio of 1:6.

e. On or about June 22, 2018, from 6:30 p.m. to 8:00 p.m., Pharmacist J.P. was present with technicians A.M., L.K., N.K., N.P., and V.W., a ratio of 1:5.

f. On or about June 22, 2018, from 8:00 p.m. to 8:30 p.m., Pharmacist J.P. was present with technicians L.K., N.K., N.P., and V.W., a ratio of 1:4.

g. On or about June 25, 2018, from 8:00 a.m. to 8:30 a.m., Pharmacist L.T. was present with technicians J.F., A.M., K.F., A.D., M.R., and V.W., a ratio of 1:6.

h. On or about June 25, 2018, from 2:30 p.m. to 4:00 p.m., Respondent Assa Krutilin and Pharmacist J.P. were present with technicians F.B., K.F., M.R., N.P., V.W., R.B., J.B., and D.W., a ratio of 2:8.

i. On or about June 25, 2018, from 4:00 p.m. to 4:30 p.m., Respondent Assa Krutilin, Pharmacists B.K. and J.P. were present with technicians A.D., F.B., K.F., M.R., N.K., N.P., V.W., R.S., R.B., and D.W., a ratio of 3:10.

j. On or about June 25, 2018, from 4:30 p.m. to 5:00 p.m., Pharmacists B.K. and J.P. were present with technicians A.D., F.B., N.K., V.W., R.S., J.B., and R.B., a ratio of 2:7.

k. On or about June 29, 2018 at 8:00 a.m., Pharmacist L.T. was present with F.B., W.M., A.D., C.F., N.P., M.E., V.W., and J.B., a ratio of 1:8.

l. On or about June 29, 2018, from 4:00 p.m. to 4:30 p.m., Pharmacists H.B., and B.K. were present with technicians A.M., F.B., K.F., L.K., W.M., N.K., R.S., R.B., J.B., and V.W., a ratio of 2:10.

6. Outside of the written work schedule, there are no records to document the hours that managing pharmacist Assa Krutilin was present in the pharmacy.

CONCLUSIONS OF LAW

Based upon the foregoing findings of fact, the Board concludes as a matter of law:

7. As the managing pharmacist of Omnicare, Assa Krutilin allowed ratios of supervising pharmacists to technicians to be exceeded in violation of NRS 639.220, NAC 639.250(1), and (2), performed his duties in an incompetent, unskillful or negligent manner, and engaged in unprofessional conduct as defined in NAC 639.945(1)(i), and is therefore subject to discipline pursuant to NRS 639.210(4), (12), (15), and/or NRS 639.255.

8. Respondent Assa Krutilin failed to keep records to document his own hours worked in the pharmacy in violation of NAC 639.245(1), engaged in unprofessional conduct as

defined in NAC 639.945(1)(i), and is therefore subject to discipline pursuant to NRS 639.210(4), (12), (15), and/or NRS 639.255.

ORDER

THEREFORE, BASED UPON THE FINDINGS OF FACTS, AND CONCLUSIONS OF LAW, THE BOARD HEREBY ORDERS AS FOLLOWS:

1. This Order shall serve as a public reprimand regarding Respondent Assa Krutilin's duties and responsibilities as a registered pharmacist.

2. Respondent Assa Krutilin shall pay fines of One Thousand Three Hundred Dollars ($1,300) for violations of his duties as a registered/supervising pharmacist by *cashier's check* or *certified check* or *money order* made payable to "State of Nevada, Office of the Treasurer," to be received by the Board's Reno office located at 985 Damonte Ranch Parkway – Suite 206, Reno, Nevada 89521, within thirty (30) days of entry of this Order.

3. Respondent Assa Krutilin shall pay for his portion of attorney's fees and investigative costs of Seven Hundred Forty-Nine Dollars ($749) by *cashier's check* or *certified check* or *money order* made payable to "Nevada State Board of Pharmacy," to be received by the Board's Reno office located at 985 Damonte Ranch Parkway – Suite 206, Reno, Nevada 89521, within thirty (30) days of entry of this Order.

4. The expired and non-renewed certificate of registration of Respondent Assa Krutilin, RPH, Certificate of Registration No. 18266, is considered forfeited pursuant to NRS 639.180(6).

5. In the event that Respondent applies for registration, or for any other registration or certificate with the Board, he shall appear before the Board to answer questions and provide testimony regarding his application, his compliance with this Order, and the facts and circumstances underlying this matter.

6. This Order is a public record pursuant to NRS 622.330 and shall be reported to the National Practitioner Data Bank pursuant to 42 USC § 1396r-2 and 45 CFR Part 60.

///

//

7. This Order is effective immediately.

IT IS SO ORDERED.

Entered this 17 day of December, 2021.

Helen Park, President
Nevada State Board of Pharmacy

NEVADA STATE BOARD OF PHARMACY, Petitioner, v. OMNICARE OF LAS VEGAS, Pharmacy License No. PHC01949, URI ASSA KRUTILIN, RPH, Certificate of Registration No. 18266, Respondents.	CASE NO. 18-052-PH-S 18-052-RPH-S NOTICE OF INTENDED ACTION AND ACCUSATION

J. David Wuest, R.Ph., in his official capacity as Executive Secretary of the Nevada State Board of Pharmacy, makes the following that will serve as both a notice of intended action under Nevada Revised Statutes ("NRS") 233B.127(3) and as an accusation under NRS 622A.300(1) and NRS 639.241.

JURISDICTION

1. The Nevada State Board of Pharmacy ("Board") has jurisdiction over this matter because at the time of the events alleged herein, Respondent Omnicare of Las Vegas ("Omnicare") held a Nevada Pharmacy License No. PHC01949; and Respondent Uri Assa Krutilin, RPh ("Assa Krutilin") held a Nevada Pharmacist Certificate of Registration No. 18266, all issued by the Board.

FACTUAL ALLEGATIONS

2. Respondent Omnicare is a compounding pharmacy located on 1525 E. Sunset, #16, Las Vegas, Nevada.

3. Respondent Assa Krutilin is/was the managing pharmacist of Omnicare during the relevant timeframes.

4. On or about June 29, 2018, Board staff visited Omnicare at 8:00 a.m. Pharmacist L.T. was the only pharmacist present with eight (8) technicians.

5. Upon review of the work schedules, timeclock records, security door scan records, and sign in logs, the following violations were discovered:

a. On or about June 18, 2018, from 8:00 a.m. to 9:30 a.m., Pharmacist J.P. and L.T. were present with technicians J.F., F.B., W.M., D.R., M.R., J.B., and D.W., a ratio of 2:7.

b. On or about June 22, 2018, from 8:00 a.m. to 8:30 a.m., Pharmacists H.B. and L.T. were present with technicians J.F., F.B., K.F., M.E., A.D., C.F., and V.W., a ratio of 2:7.

c. On or about June 22, 2018, from 1:30 p.m. to 4:00 p.m., Pharmacists H.B. and Respondent Assa Krutilin were present with technicians F.B., K.F., L.K., A.D., N.K., N.P., J.B., and V.W., a ratio of 2:8.

d. On or about June 22, 2018, from 5:30 p.m. to 6:00 p.m., Pharmacists H.B. was present with technicians A.M., L.K., A.D., N.K., N.P., and V.W., a ratio of 1:6.

e. On or about June 22, 2018, from 6:30 p.m. to 8:00 p.m., Pharmacist J.P. was present with technicians A.M., L.K., N.K., N.P., and V.W., a ratio of 1:5.

f. On or about June 22, 2018, from 8:00 p.m. to 8:30 p.m., Pharmacist J.P. was present with technicians L.K., N.K., N.P., and V.W., a ratio of 1:4.

g. On or about June 25, 2018, from 8:00 a.m. to 8:30 a.m., Pharmacist L.T. was present with technicians J.F., A.M., K.F., A.D., M.R., and V.W., a ratio of 1:6.

h. On or about June 25, 2018, from 2:30 p.m. to 4:00 p.m., Respondent Assa Krutilin and Pharmacist J.P. were present with technicians F.B., K.F., M.R., N.P., V.W., R.B., J.B., and D.W., a ratio of 2:8.

i. On or about June 25, 2018, from 4:00 p.m. to 4:30 p.m., Respondent Assa Krutilin, Pharmacists B.K. and J.P. were present with technicians A.D., F.B., K.F., M.R., N.K., N.P., V.W., R.S., R.B., and D.W., a ratio of 3:10.

j. On or about June 25, 2018, from 4:30 p.m. to 5:00 p.m., Pharmacists B.K. and J.P. were present with technicians A.D., F.B., N.K., V.W., R.S., J.B., and R.B., a ratio of 2:7.

k. On or about June 29, 2018 at 8:00 a.m., Pharmacist L.T. was present with F.B., W.M., A.D., C.F., N.P., M.E., V.W., and J.B., a ratio of 1:8.

l. On or about June 29, 2018, from 4:00 p.m. to 4:30 p.m., Pharmacists H.B., and B.K. were present with technicians A.M., F.B., K.F., L.K., W.M., N.K., R.S., R.B., J.B., and V.W., a ratio of 2:10.

6. Outside of the written work schedule, there are no records to document the hours that managing pharmacist Assa Krutilin was present in the pharmacy.

APPLICABLE LAW

7. Each pharmacy must be managed by a registered pharmacist responsible for the compliance of the pharmacy and its personnel with all federal and state laws and regulations relating to the operation of the pharmacy. NRS 639.220.

8. A written record must be kept available for inspection showing the pharmacists, pharmaceutical technicians, and pharmaceutical technicians on duty during the hours of business. NAC 639.245(1).

9. A managing pharmacist is responsible for violations committed by the pharmacy's employees. NRS 639.220(1); NAC 639.702.

10. The Board may suspend or revoke a registration pursuant to NRS 639.210(15) when a person has "as a managing pharmacist, violated any provision of law or regulation concerning recordkeeping or inventory in a store over which he or she presides, or has knowingly allowed a violation of any provision of this chapter or other state or federal laws or

regulations relating to the practice of pharmacy by personnel of the pharmacy under his or her supervision."

11. A pharmacy that requires or allows a pharmacist to use pharmaceutical technicians in violation of law or regulation is subject to discipline. NAC 639.260.

12. A pharmacy owner is responsible for violations committed by the pharmacy's employees. NAC 639.702; NAC 639.945(2).

FIRST CAUSE OF ACTION
Violations of Law and Unprofessional Conduct
(Respondent Assa Krutilin)

13. As the managing pharmacist of Omnicare, Assa Krutilin allowed ratios of supervising pharmacists to technicians to be exceeded in violation of NRS 639.220, NAC 639.250(1), and (2), performed his duties in an incompetent, unskillful or negligent manner, and engaged in unprofessional conduct as defined in NAC 639.945(1)(i), and is therefore subject to discipline pursuant to NRS 639.210(4), (12), (15), and/or NRS 639.255.

14. Respondent Assa Krutilin failed to keep records to document his own hours worked in the pharmacy in violation of NAC 639.245(1), engaged in unprofessional conduct as defined in NAC 639.945(1)(i), and is therefore subject to discipline pursuant to NRS 639.210(4), (12), (15), and/or NRS 639.255.

SECOND CAUSE OF ACTION
Pharmacy/Owner Responsibilities
(Respondent Omnicare)

15. As the owners/operators of Omnicare at the time of each of the violations alleged herein, Omnicare is responsible for the violations, including those of its employees, pursuant to NRS 639.230(5), NAC 639.702, and NAC 639.945(2), and is subject to discipline pursuant to NRS 639.210(12) and/or NRS 639.255.

16. Omnicare allowed pharmacists to use pharmaceutical technicians in violation of ratios pursuant to NAC 639.260, and is therefore subject to discipline pursuant to NRS 639.210 and/or NRS 639.255.

WHEREFORE it is requested that the Nevada State Board of Pharmacy take appropriate disciplinary action with respect to the certificates of license/registration of these Respondents.

Signed this 11th day of October 2021.

J. David Wuest, R.Ph., Executive Secretary
Nevada State Board of Pharmacy

NOTICE TO RESPONDENTS

You have the right to show the Nevada State Board of Pharmacy that your conduct, as alleged above, complies with all lawful requirements. NRS 233B.127(3). You have the right to a hearing before the Board, and to submit an answer the Notice of Intended Action and Accusation and present evidence and argument on all issues involved, either personally or through counsel. NRS 233B.121; NRS 233B.127(3); NRS 622A.300(1) and (3); NRS 639.241. To do so, you must complete and file two (2) copies of the Answer and Notice of Defense served herewith, to be received by the Board's Reno office located at 985 Damonte Ranch Parkway – Suite 206, Reno, Nevada 89521, within twenty (20) days of your receipt of this Notice of Intended Action and Accusation. NRS 622A.320; NRS 639.243. Your failure to timely file an Answer and Notice of Defense constitutes an admission of the charges and waiver of the right to a hearing. NRS 639.244. If you fail to appear at the hearing and the Board finds that you were given sufficient legal notice of the hearing, then the Board may accept the allegations as true and may proceed to consider the case and render a decision. NRS 622A.350.

BEFORE THE NEVADA STATE BOARD OF PHARMACY

NEVADA STATE BOARD OF PHARMACY, Petitioner, v. ERIC MARTIN MATH, MD, Certificate of Registration No. CS04598, Respondent.	CASE NO. 19-083-CS-N FINDINGS OF FACT, CONCLUSIONS OF LAW AND ORDER

This matter came before the Nevada State Board of Pharmacy (Board) at its regularly scheduled meeting on Wednesday, April 14, 2021. Brett Kandt, Esq., prosecuted the case before the Board. Respondent Eric Martin Math, MD, Certificate of Registration No. CS04598, appeared through counsel, Hal Taylor, Esq. The Board heard the case and, based on the evidence presented, the Board makes the following Findings of Fact, Conclusions of Law and Order.

FINDINGS OF FACT

The allegations against Respondent, as stated in the Notice of Intended Action and Accusation (Accusation) on file herein, and upon which the Board makes findings of fact, are as follows:

1. At the time of the events herein, Respondent Eric Martin Math, MD, held a Nevada controlled substance registration, Certificate No. CS04598, issued by the Board.

2. On June 3, 2019, Respondent surrendered his DEA Certificate of Registration No. BM4705616 to the U.S. Drug Enforcement Administration by executing a DEA Form 104, entitled "Surrender for Cause" (DEA Surrender for Cause).

3. By executing the DEA Surrender for Cause, Respondent acknowledged in pertinent part the following:

> In view of my alleged failure to comply with the Federal requirements pertaining to controlled substances or list 1 chemicals, and as an indication of my good faith in desiring to remedy any incorrect or unlawful practices on my part, I hereby surrender for cause my Drug Enforcement Administration (DEA) Certification of Registration.

4. On or about June 4, 2019, Board staff notified Respondent that his surrender of DEA Certificate of Registration No. BM4705616 for cause operated as an immediate suspension of his Certificate of Registration No. CS04598 with the Board pursuant to NRS 639.2107.

5. On or about June 27, 2019, Respondent requested that his License No. 8878 issued by the Nevada State Board of Medical Examiners (NSBME) be placed on inactive status pursuant to NRS 630.255 rather than renewed on the basis that he was not engaged in the practice of medicine in Nevada.

6. On or about July 12, 2019, Board Staff properly served Respondent with the Notice of Intended Action and Accusation on file in this matter together with the Statement to Respondent and Notice of Hearing.

7. On or about September 3, 2019, Respondent filed an Answer and Notice of Defense to the original Accusation and requested a stay of administrative proceedings until final disposition of *United States vs. Myron Motley, Eric Math, MD, et al*, Case No. 3:19-cr-00026. Pursuant to NAC 639.120(1) this matter was continued.

8. On or about March 2, 2020, Respondent entered into a plea agreement in *United States vs. Myron Motley, Eric Math, MD, et al*, Case No. 3:19-cr-00026, wherein he pled guilty to one count of conspiracy to distribute a controlled substance – hydrocodone and oxycodone, in violation of 21 USC § 841(a)(1) and (b)(1)(c) and 21 USC § 846.

9. Board staff incurred at least $812.50 in attorney's fees prosecuting this administrative action. The attorney's fees are reasonable based upon legal counsel's professional qualities, the nature of this administrative enforcement action, the work performed, and the result as evidenced by this Order.

CONCLUSIONS OF LAW

Based on the forgoing findings of fact, the Board concludes as a matter of law:

1. The Board has jurisdiction over this matter and this respondent, because at the time of the events herein, Respondent was a practitioner registered with the Board.

2. The applicable law in this matter is as follows:

a. A practitioner must hold an active license to practice his or her profession in this State and be registered with both the DEA and the Board to possess, administer, prescribe and/or dispense any controlled substance. NRS 453.226(1); 21 U.S.C. § 822(a)(2); 21 U.S.C. § 823(f); 21 CFR § 1306.03.

b. The Board may suspend or revoke a registration issued pursuant to NRS 453.231 to prescribe or otherwise dispense a controlled substance upon a finding that the registrant has been convicted of a felony under a state or federal law relating to a controlled substance. NRS 453.236(1)(b) and NRS 453.241(1).

c. The Board may suspend or revoke a registration issued pursuant to NRS 453.231 to prescribe or otherwise dispense a controlled substance upon a finding that the registrant has committed an act that would render registration inconsistent with the public interest. NRS 453.236(1)(d) and NRS 453.241(1).

d. Performing any duties as the holder of a registration in an incompetent, unskillful or negligent manner constitutes unprofessional conduct or conduct contrary to the public interest pursuant to NAC 639.945(1)(i) and is grounds for suspension or revocation of any license or registration issued by the Board. NRS 639.210(4).

e. Violating any provision of the Federal Food, Drug and Cosmetic Act or any other federal law or regulation relating to prescription drugs is grounds for suspension or revocation of any license or registration issued by the Board. NRS 639.210(11).

f. Violating, attempting to violate, assisting or abetting in the violation of or conspiring to violate any law or regulation relating to drugs, the manufacture or distribution of drugs or the practice of pharmacy is grounds for suspension or revocation of any license or registration issued by the Board. NRS 639.210(12).

g. The surrender of a registration to the Drug Enforcement Administration by a practitioner operates as an immediate suspension of a registration issued by the Board pursuant to NRS Chapter 453 to possess, administer, prescribe or dispense controlled substances. NRS 639.2107.

h. Conviction of a felony for a violation of federal law concerning drugs operates as an immediate suspension of a registration issued by the Board pursuant to NRS Chapter 453 to possess, administer, prescribe or dispense controlled substances. NRS 639.2121.

3. By violating the Controlled Substances Act, 21 U.S.C. Chap. 13, as detailed in the plea agreement in *United States vs. Myron Motley, Eric Math, MD, et al*, Case No. 3:19-cr-00026, Respondent is subject to discipline and his Certificate of Registration No. CS04598 subject to revocation pursuant to NRS 453.236(1)(b) and NRS 639.210(11) and (12).

4. By violating the federal Controlled Substances Act, 21 U.S.C. Chap. 13, as detailed in the plea agreement in *United States vs. Myron Motley, Eric Math, MD, et al*, Case No. 3:19-cr-00026, Respondent has committed acts that render his registration to dispense controlled substances inconsistent with the public interest pursuant to NRS 453.231, no longer qualifies for registration to dispense controlled substances under federal or state law, and is subject to discipline pursuant to NRS 453.236(1) and NRS 453.241(1).

5. By violating the Controlled Substances Act, 21 U.S.C. Chap. 13, as detailed in the plea agreement in *United States vs. Myron Motley, Eric Math, MD, et al*, Case No. 3:19-cr-00026, Respondent has performed his duties as the holder of a controlled substance registration in an incompetent, unskillful or negligent manner and engaged in unprofessional conduct and conduct

contrary to the public interest in violation of NAC 639.945(1)(i), and is subject to discipline pursuant to NRS 453.236(1) and NRS 639.210(4).

6. By placing his NSBME License No. 8878 to practice medicine on inactive status, Respondent no longer qualifies for registration to dispense controlled substances under federal or state law, and is subject to suspension pursuant to NRS 453.236(1) and NRS 453.241(1).

7. By surrendering his DEA Certificate of Registration No. BM4705616 for cause and by his felony conviction, Respondent has admitted to violating federal law, is no longer authorized by federal law to dispense controlled substances, and is subject to discipline pursuant to NRS 453.236(1) and NRS 453.241(1).

8. The suspension of Respondent's Nevada Controlled Substance Registration, Certificate No. CS04598, pursuant to NRS 639.2107 and NRS 639.2121 is subject to review by the Board pursuant to NRS 453.236(1) and NRS 639.255(1)(c).

ORDER

THEREFORE, THE BOARD HEREBY ORDERS AS FOLLOWS:

1. The certificate of registration of Eric Martin Math, MD, Certificate of Registration No. CS04598, is hereby revoked pursuant to NRS 453.241(l)(b).

2. Respondent may not possess (except pursuant to the lawful order of a practitioner), administer, prescribe or dispense a controlled substance until he has petitioned the Board for reinstatement pursuant to NRS 639.257 and the Board reinstates his certificate of registration.

3. Pursuant to NRS 622A.410(1) and 639.257(1), Respondent may not petition for reinstatement of his certificate of registration for a period of five (5) years from the effective date of this Order.

4. In the event Respondent applies for reinstatement of his certificate of registration, or applies for any other certificate, license or permit with the Board, he shall appear before the Board to

answer questions and give testimony regarding his application, his compliance with this Order, and the facts and circumstances underlying this matter.

5. Pursuant to NRS 639.255(1)(f) and NAC 639.955(5), Respondent shall pay a fine of Five-Thousand Dollars ($5,000.00) for the violations, by *cashier's check* or *certified check* or *money order* made payable to "State of Nevada, Office of the Treasurer," to be received by the Board's Reno office located at 985 Damonte Ranch Parkway – Suite 206, Reno, Nevada 89521, within thirty (30) days of the effective date of this Order.

6. Pursuant to NRS 622.400, Respondent shall pay $812.50 to partially reimburse the Board for reasonable and necessary attorney's fees actually incurred in prosecuting this matter. Payment shall be made by *cashier's check, certified check* or *money order* made payable to the "Nevada State Board of Pharmacy" to be received by the Board's Reno office located at 985 Damonte Ranch Parkway – Suite 206, Reno, Nevada 89521, within thirty (30) days of entry of this Order.

7. Any failure by Respondent to comply with the terms of this Order may result in issuance by the Executive Secretary of an order to show cause pursuant to NAC 639.965 directing Respondent to appear before the Board at the next regularly-scheduled meeting for a show cause hearing. If such a hearing results in a finding of a violation of this Order by Respondent, the Board may impose additional discipline upon Respondent not inconsistent with the provisions of NRS Chapter 453 and/or NRS Chapter 639.

8. This Order is effective immediately.

IT IS SO ORDERED.

Entered this 21st day of April, 2021.

BEFORE THE NEVADA STATE BOARD OF PHARMACY

NEVADA STATE BOARD OF PHARMACY, **Petitioner,** **v.** **ERIC MARTIN MATH, MD,** **Certificate of Registration No.** CS04598, **Respondent.**	**CASE NO. 19-083-CS-N** **FIRST AMENDED NOTICE OF INTENDED ACTION AND ACCUSATION**

J. David Wuest, in his official capacity as Executive Secretary of the Nevada State Board of Pharmacy, makes the following that will serve as both a notice of intended action under Nevada Revised Statutes (NRS) 233B.127(3) and as an accusation under NRS 622A.300(1) and NRS 639.241.

JURISDICTION

1. The Nevada State Board of Pharmacy (Board) has jurisdiction over this matter and this respondent because at the time of the alleged events, Respondent Eric Martin Math, MD (Math), held a Nevada Controlled Substance Registration, Certificate No. CS04598, issued by the Pharmacy Board.

FACTUAL ALLEGATIONS

2. On June 3, 2019, Math surrendered his DEA Certificate of Registration No. BM4705616 to the U.S. Drug Enforcement Administration by executing a DEA Form 104, entitled "Surrender for Cause" (DEA Surrender for Cause).

3. By executing the DEA Surrender for Cause, Math acknowledged in pertinent part the following:

> In view of my alleged failure to comply with the Federal requirements pertaining to controlled substances or list 1 chemicals, and as an indication of my good faith in desiring to remedy any incorrect or unlawful practices on my part, I hereby surrender for cause my Drug Enforcement Administration (DEA) Certification of Registration.

NEVADA STATE BOARD OF PHARMACY
JAN 26 2021
FILED

4. On or about June 4, 2019, Board staff notified Math that his surrender of DEA Certificate of Registration No. BM4705616 for cause operated as an immediate suspension of his Certificate of Registration No. CS04598 with the Board pursuant to NRS 639.2107.

5. On or about June 27, 2019, Math requested that his License No. 8878 issued by the Nevada State Board of Medical Examiners (NSBME) be placed on inactive status pursuant to NRS 630.255 rather than renewed on the basis that he was not engaged in the practice of medicine in Nevada.

6. On or about July 12, 2019, Board Staff properly served Math with the Notice of Intended Action and Accusation on file in this matter together with the Statement to Respondent and Notice of Hearing.

7. On or about September 3, 2019, Math filed an Answer and Notice of Defense to the original Accusation and requested a stay of administrative proceedings until final disposition of *United States vs. Myron Motley, Eric Math, MD, et al*, Case No. 3:19-cr-00026. Pursuant to NAC 639.120(1) this matter was continued.

8. On or about March 2, 2020, Math entered into a plea agreement in *United States vs. Myron Motley, Eric Math, MD, et al*, Case No. 3:19-cr-00026, wherein he pled guilty to one count of conspiracy to distribute a controlled substance – hydrocodone and oxycodone, in violation of 21 USC § 841(a)(1) and (b)(1)(c) and 21 USC § 846.

FIRST CAUSE OF ACTION
Violation of Federal Law

9. The Board may suspend or revoke a registration issued pursuant to NRS 453.231 to prescribe or otherwise dispense a controlled substance upon a finding that the registrant has been convicted of a felony under a state or federal law relating to a controlled substance. NRS 453.236(1)(b) and NRS 453.241(1).

10. Violating any provision of the Federal Food, Drug and Cosmetic Act or any other federal law or regulation relating to prescription drugs is grounds for suspension or revocation of any license or registration issued by the Board. NRS 639.210(11).

11. Violating, attempting to violate, assisting or abetting in the violation of or conspiring to violate any law or regulation relating to drugs, the manufacture or distribution of drugs or the practice of pharmacy is grounds for suspension or revocation of any license or registration issued by the Board. NRS 639.210(12).

12. By violating the Controlled Substances Act, 21 U.S.C. Chap. 13, as detailed in the plea agreement in *United States vs. Myron Motley, Eric Math, MD, et al*, Case No. 3:19-cr-00026, Math is subject to discipline and his Certificate of Registration No. CS04598 subject to revocation pursuant to NRS 453.236(1)(b) and NRS 639.210(11) and (12).

SECOND CAUSE OF ACTION

Commission of Acts that Render Registration Inconsistent with the Public Interest

13. The Board may suspend or revoke a registration issued pursuant to NRS 453.231 to prescribe or otherwise dispense a controlled substance upon a finding that the registrant has committed an act that would render registration inconsistent with the public interest. NRS 453.236(1)(d) and NRS 453.241(1).

14. By violating the federal Controlled Substances Act, 21 U.S.C. Chap. 13, as detailed in the plea agreement in *United States vs. Myron Motley, Eric Math, MD, et al*, Case No. 3:19-cr-00026, Math has committed acts that render his registration to dispense controlled substances inconsistent with the public interest pursuant to NRS 453.231, no longer qualifies for registration to dispense controlled substances under federal or state law, and is subject to discipline pursuant to NRS 453.236(1) and NRS 453.241(1).

THIRD CAUSE OF ACTION

Unprofessional Conduct – Incompetent, Unskillful or Negligent Performance of Duties

15. Performing any duties as the holder of a registration in an incompetent, unskillful or negligent manner constitutes unprofessional conduct or conduct contrary to the public interest pursuant to NAC 639.945(1)(i) and is grounds for suspension or revocation of any license or registration issued by the Board. NRS 639.210(4).

16. By violating the Controlled Substances Act, 21 U.S.C. Chap. 13, as detailed in the plea agreement in *United States vs. Myron Motley, Eric Math, MD, et al*, Case No. 3:19-cr-00026, Math has performed his duties as the holder of a controlled substance registration in an incompetent, unskillful or negligent manner and engaged in unprofessional conduct and conduct contrary to the public interest in violation of NAC 639.945(1)(i), and is subject to discipline pursuant to NRS 453.236(1) and NRS 639.210(4).

FOURTH CAUSE OF ACTION

Inactive License to Practice Medicine

17. A practitioner must hold an active license to practice his or her profession in this State and be registered with both the DEA and the Board to possess, administer, prescribe and/or dispense any controlled substance. NRS 453.226(1); 21 U.S.C. § 822(a)(2); 21 U.S.C. § 823(f); 21 CFR § 1306.03.

18. By placing his NSBME License No. 8878 to practice medicine on inactive status, Math no longer qualifies for registration to dispense controlled substances under federal or state law, and is subject to discipline pursuant to NRS 453.236(1) and NRS 453.241(1).

FIFTH CAUSE OF ACTION

Surrender of DEA Registration for Cause and Federal Conviction

19. The surrender of a registration to the Drug Enforcement Administration by a practitioner operates as an immediate suspension of a registration issued by the Board pursuant to NRS Chapter 453 to possess, administer, prescribe or dispense controlled substances. NRS 639.2107.

Conviction of a felony for a violation of federal law concerning drugs operates as an immediate suspension of a registration issued by the Board pursuant to NRS Chapter 453 to possess, administer, prescribe or dispense controlled substances. NRS 639.2121.

20. By surrendering his DEA Certificate of Registration No. BM4705616 for cause and his felony conviction, Math has admitted to violating federal law, is no longer authorized by federal law to dispense controlled substances, and is subject to discipline pursuant to NRS 453.236(1) and NRS 453.241(1).

21. The suspension of Math's Nevada Controlled Substance Registration, Certificate No. CS04598 pursuant to NRS 639.2107 and NRS 639.2121 is subject to review by the Board pursuant to NRS 453.236(1) and NRS 639.255(1)(c).

WHEREFORE it is requested that the Nevada State Board of Pharmacy take appropriate disciplinary action with respect to the certificate of registration of this respondent.

Signed this 16 day of January, 2021.

J. David Wuest, R.Ph., Executive Secretary
Nevada State Board of Pharmacy

NOTICE TO RESPONDENT

You have the right to show the Nevada State Board of Pharmacy that your conduct, as alleged above, complies with all lawful requirements. NRS 233B.127(3). You have the right to a hearing before the Board to answer the Notice of Intended Action and Accusation and present evidence and argument on all issues involved, either personally or through counsel. NRS 233B.121; NRS 233B.127(3); NRS 622A.300(1) and (3); NRS 639.241. To do so, you must complete and file two (2) copies of the Answer and Notice of Defense served herewith, to be received by the Board's Reno office located at 985 Damonte Ranch Parkway – Suite 206, Reno, Nevada 89521, within twenty (20) days of your receipt of this Notice of Intended Action and Accusation. NRS 622A.320; NRS 639.243. Your failure to timely file an Answer and Notice of Defense constitutes an admission of the charges and waiver of the right to a hearing. NRS 639.244. If you fail to appear at the hearing and the Board finds that you were given sufficient legal notice of the hearing, the Board may accept the allegations as true and may proceed to consider the case and render a decision. NRS 622A.350.

BEFORE THE NEVADA STATE BOARD OF PHARMACY

NEVADA STATE BOARD OF PHARMACY, **Petitioner,** **v.** **ERIC MARTIN MATH, MD,** **Certificate of Registration No. CS04598,** **Respondent.**	**CASE NO. 19-083-CS-N** **STATEMENT TO THE RESPONDENT AND NOTICE OF HEARING**

TO THE RESPONDENT ABOVE-NAMED: PLEASE TAKE NOTICE THAT:

I.

Pursuant to the authority and jurisdiction conferred upon the Nevada State Board of Pharmacy (Board) by NRS 639.241 to NRS 639.2576, inclusive, and NRS chapter 233B and 622A, a First Amended Notice of Intended Action and Accusation has been filed with the Board by the Petitioner, J. David Wuest, Executive Secretary for the Board, alleging grounds for imposition of disciplinary action by the Board against you, as is more fully explained and set forth in the Notice of Intended Action and Accusation served herewith and hereby incorporated reference herein.

II.

You have the right to show the Nevada State Board of Pharmacy that your conduct, as alleged above, complies with all lawful requirements. NRS 233B.127(3). You have the right to a hearing before the Board to answer the Notice of Intended Action and Accusation and present evidence and argument on all issues involved, either personally or through counsel. NRS 233B.121; NRS 233B.127(3); NRS 622A.300(1) and (3); NRS 639.241. To do so, you must complete and file two (2) copies of the Answer and Notice of Defense served herewith, to be received by the Board's Reno office located at 985 Damonte Ranch Parkway – Suite 206, Reno, Nevada 89521, within twenty (20) days of your receipt of this Statement and Notice, and of the Notice of Intended Action and Accusation served within. NRS 639.320; NRS 639.243.

III.

The Board has scheduled your hearing on this matter for Wednesday, March 3, 2021, at 9:00 a.m. or soon thereafter. Pursuant to Governor Steve Sisolak's Emergency Directive 006, there will be no physical location for this meeting. The meeting can be listened to or viewed live over Zoom.

Via Videoconference at Zoom: https://zoom.us/j/5886256671
or
Via Teleconference at 1 (669) 900-6833
Meeting ID: 588 625 6671

IV.

Pursuant to NRS 241.033 and 241.034, please be advised that the hearing is a public meeting, and the Board may, without further notice, take administrative action against you if the Board determines that such administrative action is warranted after considering your character, alleged misconduct, professional competence, or physical or mental health. The Board at its discretion may go into closed session to consider your character, alleged misconduct, professional competence, or physical or mental health. You may attend any closed session, have an attorney or other representative of your choosing present during any closed session, and present written evidence, provide testimony, and present witnesses relating to your character, alleged misconduct, professional competence, or physical or mental health during any closed session.

V.

Your failure to timely file an Answer and Notice of Defense constitutes an admission of the charges and waiver of the right to a hearing. NRS 639.244. If you fail to appear at the hearing and the Board finds that you were given sufficient legal notice of the hearing, the Board may accept the allegations as true and may proceed to consider the case and render a decision. NRS 622A.350.

DATED this 20th day of January, 2021.

J. David Wuest, in his official capacity as Executive Secretary of the Nevada State Board of Pharmacy, makes the following that will serve as both a notice of intended action under Nevada Revised Statutes (NRS) 233B.127(3) and as an accusation under NRS 622A.300(1) and NRS 639.241.

JURISDICTION

I.

The Nevada State Board of Pharmacy (Board) has jurisdiction over this matter and this respondent because at the time of the alleged events, Respondent Eric Martin Math, MD (Math), held a Nevada Controlled Substance Registration, Certificate No. CS04598, issued by the Pharmacy Board.

FACTUAL ALLEGATIONS

II.

On June 3, 2019, Math surrendered his DEA Certificate of Registration No. BM4705616 to the U.S. Drug Enforcement Administration by executing a DEA Form 104, entitled "Surrender for Cause" (DEA Surrender for Cause).

III.

By executing the DEA Surrender for Cause, Math acknowledged in pertinent part the following:

> In view of my alleged failure to comply with the Federal requirements pertaining to controlled substances or list 1 chemicals, and as an indication of my good faith in desiring to remedy any incorrect or unlawful practices on my part, I hereby surrender for cause my Drug Enforcement Administration (DEA) Certification of Registration.

IV.

On or about June 4, 2019, Board staff notified Math that his surrender of DEA Certificate of Registration No. BM4705616 for cause operated as an immediate suspension of his Certificate of Registration No. CS04598 with the Board pursuant to NRS 639.2107.

APPLICABLE LAW

V.

The Board may suspend or revoke a registration issued pursuant to NRS 453.231 to prescribe or otherwise dispense a controlled substance upon a finding that the registrant has committed an act that would render registration inconsistent with the public interest. NRS 453.236(1)(d) and NRS 453.241(1).

VI.

The surrender of a registration to the Drug Enforcement Administration by a practitioner operates as an immediate suspension of a registration issued by the Board pursuant to NRS Chapter 453 to possess, administer, prescribe or dispense controlled substances. NRS 639.2107.

VII.

Violating any provision of the Federal Food, Drug and Cosmetic Act or any other federal law or regulation relating to prescription drugs is grounds for suspension or revocation of any license or registration issued by the Board. NRS 639.210(11).

VIII.

Violating, attempting to violate, assisting or abetting in the violation of or conspiring to violate any law or regulation relating to drugs, the manufacture or distribution of drugs or the practice of pharmacy is grounds for suspension or revocation of any license or registration issued by the Board. NRS 639.210(12).

FIRST CAUSE OF ACTION

IX.

By failing to comply with the Federal requirements pertaining to controlled substances, Math committed an act that would render his Nevada Controlled Substance Registration inconsistent with the public interest, and is subject to discipline pursuant to NRS 453.236(1)(d) and NRS 453.241(1).

SECOND CAUSE OF ACTION

X.

By surrendering his DEA Certificate of Registration No. FM2307468 for cause, the suspension of Math's Nevada Controlled Substance Registration, Certificate No. CS04598 pursuant to NRS 639.2107 is subject to review by the Board pursuant to NRS 453.236(1) and NRS 639.255(1)(c).

THIRD CAUSE OF ACTION

XI.

By failing to comply with the Federal requirements pertaining to controlled substances, Math is subject to discipline pursuant to NRS 639.210(11) and/or (12), and NRS 639.255.

XII.

WHEREFORE it is requested that the Nevada State Board of Pharmacy take appropriate disciplinary action with respect to the certificate of registration of this respondent.

Signed this 12th day of July, 2019.

J. David Wuest, R.Ph., Executive Secretary
Nevada State Board of Pharmacy

Pursuant to the authority and jurisdiction conferred upon the Nevada State Board of Pharmacy (Board) by NRS 639.241 to NRS 639.2576, inclusive, and NRS chapter 233B and 622A, a Notice of Intended Action and Accusation has been filed with the Board by the Petitioner, J. David Wuest, Executive Secretary for the Board, alleging grounds for imposition of disciplinary action by the Board against you, as is more fully explained and set forth in the Notice of Intended Action and Accusation served herewith and hereby incorporated reference herein.

II.

You have the right to show the Nevada State Board of Pharmacy that your conduct, as alleged above, complies with all lawful requirements. NRS 233B.127(3). You have the right to a hearing before the Board to answer the Notice of Intended Action and Accusation and present evidence and argument on all issues involved, either personally or through counsel. NRS 233B.121; NRS 233B.127(3); NRS 622A.300(1) and (3); NRS 639.241. To do so, you must complete and file two (2) copies of the Answer and Notice of Defense served herewith, to be received by the Board's Reno office located at 985 Damonte Ranch Parkway – Suite 206, Reno, Nevada 89521, within twenty (20) days of your receipt of this Statement and Notice, and of the Notice of Intended Action and Accusation served within. NRS 639.320; NRS 639.243.

III.

The Board has scheduled your hearing on this matter for Wednesday, September 4, 2019, at 9:00 a.m. or soon thereafter. The hearing will occur at the Hyatt Place, 1790 East Plumb Lane, Reno, Nevada.

IV.

Pursuant to NRS 241.033 and 241.034, please be advised that the hearing is a public meeting, and the Board may, without further notice, take administrative action against you if the Board determines that such administrative action is warranted after considering your character, alleged misconduct, professional competence, or physical or mental health. The Board at its discretion may go into closed session to consider your character, alleged misconduct, professional competence, or physical or mental health. You may attend any closed session, have an attorney or other representative of your choosing present during any closed session, and present written evidence, provide testimony, and present witnesses relating to your character, alleged misconduct, professional competence, or physical or mental health during any closed session.

V.

Your failure to timely file an Answer and Notice of Defense constitutes an admission of the charges and waiver of the right to a hearing. NRS 639.244. If you fail to appear at the hearing and the Board finds that you were given sufficient legal notice of the hearing, the Board may accept the allegations as true and may proceed to consider the case and render a decision. NEVADA STATE BOARD OF PHARMACY Petitioner, v. ERIC MARTIN MATH, MD Certificate of Registration No. CS04598, Respondent, /	Case No.: 19-083-CS-N

Amended Answer

Respondent Eric Martin Math, MD, through his counsel, Hal Taylor, Esq., responds to the Notice of Intended Action and Accusation ("Accusation") filed by the Nevada State Board of Pharmacy ("Board") as follows:

JURISDICTION

I.

Admitted.

INCORPORATION OF PREVIOUS ANSWER AND NOTICE OF DEFENSE

Respondent Math, though his criminal counsel, David R. Houston, Esq., previously filed an Answer and Notice of Defense ("Original Answer"). By this reference, the relevant portions of the Original Answer are incorporated into this Amended Answer as if fully set forth herein. It is anticipated that if a trial goes forward of the Co-Defendants in the Federal case against Respondent Math, that he may be subpoenaed to testify the United States Attorney's Office.

RENO, NV 89519
TEL. (775) 825-2225 - HalTaylorLawyer@gbis.com

FACTUAL ALLEGATIONS

II.

Since the filing of the Original Answer, Respondent Math entered into a Plea Agreement with the United States Attorney's Office in which he agreed to plead guilty to Count I of the indictment (Conspiracy to distribute a controlled substance - hydrocodone and oxycodone.) in *United States of America v Eric Math*, Case No.: 3:19-cr-0026 pending in the Untied States District Court for the District of Nevada "District Court"). That plea has been accepted by the District Court, and Respondent Math is waiting for sentencing, currently scheduled for June 15, 2021.

The relevant factual admissions are contained in Factual Basis portion of the Plea Agreement, incorporated by this reference into this Amended Answer.

Admitted that Respondent Math surrendered his DEA Certificate of Registration as alleged.

III.

Admitted as to statements made in the DEA Surrender for Cause.

IV.

Admitted.

APPLICABLE LAW

V.

Admitted.

VI.

Admitted.

TEL. (775) 825-2225 - HalTaylorLawyer@gbis.com

FIRST CAUSE OF ACTION

IX.

Admitted that were the Board to find that Respondent Math failed to comply with the Federal requirements pertaining to controlled substances that Respondent Math may be subject to discipline pursuant to NRS 453.236(1)(d) and NRS 453.24(1).

SECOND CAUSE OF ACTION

X.

Admitted.

THIRD CAUSE OF ACTION

XI.

Admitted that were the Board to find that Respondent Math failed to comply with the Federal requirements pertaining to controlled substances that Respondent Math may be subject to discipline pursuant to NRS 639.210(11) and/or (12), and NRS 639.255.

XII.

Wherefore, Respondent Eric Math, M.D. prays that the Board will enter an order appropriate to this case which will allow Respondent Math to seek active licensure in the future under appropriate circumstances and conditions.

Attorney for Defendant

BEFORE THE NEVADA STATE BOARD OF PHARMACY

NEVADA STATE BOARD OF PHARMACY, Petitioner, vs. ERIC MATH, M.D. Certificate of Registration No. CS04598. Respondent, /	**CASE NO. 19-083-CS-N** **ANSWER AND NOTICE OF DEFENSE** **Date of Hearing: Sept. 4, 2019** **Time of Hearing: 9:00 a.m.**

Respondent, ERIC MATH, MD (hereinafter "Dr. Math"), by and through his attorney, DAVID R. HOUSTON, ESQ., of THE LAW OFFICE OF DAVID R. HOUSTON, in answer to the Notice of Intended Action and Accusation filed in the above-entitled matter before the Nevada State Board of Pharmacy declares:

1. That he is currently under indictment in the United States District Court for the District of Nevada in the case of United States of America vs. Myron Motley, Eric Math, M.D., Michael Kwoka, Michael Slater, Joseph Jeannette, Ivy Elliott, and Alesia Sampson, Case No.: 3:19-CR-00026-LRH-CBC (hereinafter "the federal case").
2. That the facts and circumstances alleged in the Nevada State Board of Pharmacy Notice of Intended Action and Accusation are the same or are substantially similar to the facts and circumstances alleged by the United States Attorney's Office in the federal case.
3. That providing any specific factual response to the Notice of Intended Action and Accusation would require Dr. Math to make statements that could be used against him in proceedings in the federal case.

4. The privilege against self-incrimination embodied in the Fifth Amendment to the United States Constitution, applicable to the states through the Fourteenth Amendment to the United States Constitution, can be "claimed in any proceeding, be it criminal or civil, administrative or judicial, investigatory or adjudicatory... it protects any disclosures which the witness may reasonably apprehend could be used in a criminal prosecution or which could lead to other evidence that might be so used". In re Gault, 387 U.S. 1,47-48 (1967), quoting Murphy v. Waterfront Comm'n, 378 U.S. 52, 94 (1964) (emphasis added in original).

5. "[T]he availability of privilege does not turn upon the type of proceeding in which its protection is invoked, but upon the nature of the statement or admission and the exposure which it invites. The privilege may, for example, be claimed in a civil or administrative proceeding, if the statement is or may be inculpatory". In re Gault, 387 U.S. 1, 48 (1967) (emphasis added).

6. Dr. Math cannot be compelled to answer the specific allegations set forth in the Notice of Intended Action and Accusation.

7. Dr. Math's refusal to answer the allegations is in no way an admission of any of the allegations.

REQUEST FOR STAY OF PROCEEDINGS

Based upon the foregoing, Dr. Math hereby requests that the proceedings in the Nevada State Board of Pharmacy be stayed until such time as the federal case is resolved. Dr. Math understands that his Certificate of Registration No. CS04598 with the Nevada State Board of Pharmacy is suspended until the allegations set forth in the Accusation are fully addressed and adjudicated by the Board.

DATED this 3rd day of September 2019.

David R. Houston, Esq.

CERTIFICATE OF SERVICE

The undersigned does hereby affirm that I am an Employee of the Law Office of David R. Houston and that on this date, I caused to be delivered via hand delivery a true and correct copy of the within document, to the below-named:

Nevada State Board of Pharmacy
985 Damonte Ranch Parkway, Suite 206
Reno, NV 89521

DATED this 3rd day of September 2019.

Crystal Guardino

U. S. Department of Justice - Drug Enforcement Administration

SURRENDER FOR CAUSE OF DEA CERTIFICATE OF REGISTRATION

DEA USE ONLY

File No. [redacted]

In view of my alleged failure to comply with the Federal requirements pertaining to controlled substances or list 1 chemicals, and as an indication of my good faith in desiring to remedy any incorrect or unlawful practices on my part, I hereby surrender for cause my Drug Enforcement Administration (DEA) Certificate of Registration.

I understand that submission of this document to DEA, including any employee of DEA, shall result in the immediate termination of my registration.

I understand that I am not entitled to a refund of any payments made by me in connection with my registration.

I understand that, beginning on the date that I sign below, I am not authorized to order, manufacture, distribute, possess, dispense, administer, prescribe, or engage in any other activities with controlled substances or list I chemicals.

With the understanding that I am not required to surrender my DEA Certificate of Registration, I freely and under no duress, implied or expressed, execute this document and choose to take the action described herein.

Counsel for Plaintiff United States

UNITED STATES DISTRICT COURT
FOR THE DISTRICT OF NEVADA

UNITED STATES OF AMERICA, Plaintiff, v. ERIC MATH, Defendant.	No. 3:19-cr-0026-LRH-WGC **Plea Agreement Pursuant to Fed. R. Crim. P. 11(c)(1)(A) and (B)**

This plea agreement between Eric Math ("defendant") and the United States Attorney's Office for the District of Nevada (the "USAO") sets forth the parties' agreement regarding the criminal charges referenced herein and the applicable sentences, in the above-captioned case. This agreement binds only defendant and the USAO and does not bind the district court, the U.S. Probation Office, or any other federal, state, local, or foreign prosecuting, enforcement, administrative, or regulatory authorities. This agreement does not prohibit the USAO or any agency or third party from seeking any other civil or administrative remedies, including civil forfeiture *in rem,* directly or indirectly against defendant or defendant's property.

This agreement becomes effective upon signature by defendant, defendant's counsel, and an Assistant United States Attorney

I. DEFENDANT'S OBLIGATIONS

1. Defendant agrees to:

a. At the earliest opportunity requested by the USAO and provided by the district court, appear and plead guilty to Count 1 of the indictment in this case, which charges defendant with conspiracy to distribute a controlled substance – hydrocodone, and oxycodone in violation of 21 U.S.C. §§ 841(a)(1), 841(b)(1)(C), and 846 (Count Two);

b. Stipulate to the facts agreed to in this agreement;

c. Abide by all agreements regarding sentencing contained in this agreement;

d. Not seek to withdraw defendant's guilty plea once it is entered;

e. Appear for all court appearances, surrender as ordered for service of sentence, obey all conditions of any bond, and obey any other ongoing court order in this matter;

f. Not commit any federal, state, or local crime;

g. Be truthful at all times with the U.S. Probation and Pretrial Services Offices and the Court;

II. THE USAO'S OBLIGATIONS

2. The USAO agrees to:

a. Stipulate to facts agreed to in this agreement;

b. Abide by all agreements regarding sentencing contained in this agreement;

c. At sentencing, provided that defendant demonstrates an acceptance of responsibility for the offense up to and including the time of sentencing, recommend a two-level reduction in the applicable sentencing guidelines offense level, pursuant to USSG § 3E1.1, and move for an additional one-level reduction if available under that section;

d. At sentencing, move to dismiss the remaining counts of the indictment as against defendant. Defendant agrees, however, that the district court may consider any dismissed

charges in determining the applicable sentencing guidelines range, the propriety and extent of any departure from that range, and the sentence to be imposed.

III. ELEMENTS OF THE OFFENSE

3. Count One: The elements of conspiracy to distribute a controlled substance – hydrocodone, and oxycodone in violation of 21 U.S.C. §§ 841(a)(1), 841(b)(1)(C), and 846 are as follows:

First: Beginning at a time unknown, but not later than on or about October 21, 2018, and continuing to on or about May 23, 2019, there was an agreement between two or more persons to unlawfully possess with intent to distribute oxycodone, a schedule II controlled substance; and

Second: The defendant joined in the agreement knowing of its purpose and intending to help accomplish that purpose.

Ninth Circuit Model Criminal Jury Instr. 9.19.

IV. CONSEQUENCES OF CONVICTION

4. Maximum Statutory Penalties:

Defendant understands that the statutory maximum sentence the district court can impose for a violation of 21 U.S.C. §§ 841(a)(1), 841(b)(1)(C), and 846 as charged in Count 1, is: 20 years imprisonment; a minimum of five years and up to lifetime supervised release a fine of $250,000 or twice the gross gain or gross loss resulting from the offense, whichever is greatest; and a mandatory special assessment of #$100.

5. Defendant understands that under 21 U.S.C. § 862a, defendant will not be eligible for assistance under state programs funded under the Social Security Act or Federal Food Stamp Act or for federal food stamp program benefits, and that any such benefits or assistance received by defendant's family members will be reduced to reflect defendant's ineligibility.

6. Parole Abolished: Defendant acknowledges that defendant's prison sentence cannot be shortened by early release on parole because parole has been abolished.

7. Supervised Release: Defendant understands that supervised release is a period of time following imprisonment during which defendant will be subject to various restrictions and requirements. Defendant understands that if defendant violates one or more of the conditions of any supervised release imposed, defendant may be returned to prison for all or part of the term of supervised release authorized by statute for the offense that resulted in the term of supervised release.

8. Factors under 18 U.S.C. § 3553: Defendant understands that the district court must consider the factors set forth in 18 U.S.C. § 3553(a) in determining defendant's sentence. However, the statutory maximum sentence limits the district court's discretion in determining defendant's sentence.

9. Potential Collateral Consequences of Conviction: Defendant understands that, by pleading guilty, defendant may be giving up valuable government benefits and valuable civic rights, such as the right to vote, the right to possess a firearm, the right to hold office, and the right to serve on a jury. Defendant understands that once the district court accepts defendant's guilty plea, it will be a federal felony for defendant to possess a firearm or ammunition. Defendant understands that the conviction in this case may also subject defendant to various other collateral consequences, including but not limited to revocation of probation, parole, or supervised release in another case and suspension or revocation of a professional license. Defendant understands that unanticipated collateral consequences will not serve as grounds to withdraw defendant's guilty plea.

10. Potential Removal/Deportation Consequences of Conviction: Defendant understands that, if defendant is not a United States citizen, the felony conviction in this case

may subject defendant to removal, also known as deportation, which may, under some circumstances, be mandatory; denial of citizenship; and denial of admission to the United States in the future. The district court cannot, and defendant's attorney also may not be able to, advise defendant fully regarding the immigration consequences of the felony conviction in this case. Defendant understands that unexpected immigration consequences will not serve as grounds to withdraw defendant's guilty plea.

V. FACTUAL BASIS

11. Defendant admits that defendant is, in fact, guilty of the offense to which defendant is agreeing to plead guilty. Defendant acknowledges that if defendant elected to go to trial instead of pleading guilty, the USAO could prove defendant's guilt beyond a reasonable doubt. Defendant further acknowledges that defendant's admissions and declarations of fact set forth below satisfy every element of the charged offense. Defendant waives any potential future claim that the facts defendant admitted below are insufficient to satisfy the elements of the charged offense. Defendant admits and declares under penalty of perjury that the facts set forth below are true and correct:

Between about October 21, 2018, and continuing to on or about May 23, 2019, I entered into an agreement with Myron Motley, Joe Jeannette, and others. We agreed to distribute controlled substances, specifically oxycodone and hydrocodone. I would write prescriptions to my co-conspirators not for a legitimate medical purpose and not in the usual course of professional practice. They would fill the prescriptions and give some of this pills to Motley for further sales. Sometimes I would be paid in cash for writing the prescriptions and sometimes I would write prescriptions for myself and have the co-conspirator fill the prescription and I would recive the pills.

I joined in the agreement knowing its purpose was unlawful and with the intent to help accomplish that purpose. This actiovity ocurred in the State and Federal District of Nevada.

VI. SENTENCING FACTORS

12. Discretionary Nature of Sentencing Guidelines: Defendant understands that in determining defendant's sentence, the district court is required to calculate the applicable sentencing guidelines range and to consider that range, possible departures under the sentencing guidelines, and the other sentencing factors set forth in 18 U.S.C. § 3553(a). Defendant understands that the sentencing guidelines are advisory only, that defendant cannot have any expectation of receiving a sentence within the calculated sentencing guidelines range, and that after considering the sentencing guidelines and the other § 3553(a) factors, the district court will be free to exercise its discretion to impose any sentence it finds appropriate.

13. Offense Level Calculations: The parties jointly agree and stipulate that, in calculating Defendant's advisory guidelines sentencing range, the Court should use the following base offense level and adjustments; acknowledge that these stipulations do not bind the district court:

Base Offense Level - USSG § 2D1.1(c)(5):	30
Abuse of Trust - USSG § 3B1.3:	+2
Adjusted Offense Level:	32

14. Agreement with Respect to Some Safety Valve Requirements: Defendant and the USAO agree that:

a. Defendant did not use violence or credible threats of violence or possess a firearm or other dangerous weapon (or induce another participant to do so) in connection with the offense charged in count 1;

b. The offense charged in count 1 did not result in death or serious bodily injury to any person; and

c. Defendant was not an organizer, leader, manager, or supervisor of others in the offense charged in count 1 and was not engaged in a continuing criminal enterprise.

d. Defendant and the USAO have made no agreement whether defendant qualifies for safety-valve relief from the statutory minimum sentence, and Defendant agrees that, if the district court determines he does not qualify, that determination will not serve as grounds to withdraw defendant's guilty plea.

15. Reduction for Acceptance of Responsibility: Under USSG § 3E1.1(a), the USAO will recommend that defendant receive a two-level downward adjustment for acceptance of responsibility unless defendant (a) fails to truthfully admit facts establishing a factual basis for the guilty plea when defendant enters the plea; (b) fails to truthfully admit facts establishing the amount of restitution owed when defendant enters the guilty plea; (c) fails to truthfully admit facts establishing the forfeiture allegations when defendant enters the guilty plea; (d) provides false or misleading information to the USAO, the Court, Pretrial Services, or the Probation Office; (e) denies involvement in the offense or provides conflicting statements regarding defendant's involvement or falsely denies or frivolously contests conduct relevant to the offense; (f) attempts to withdraw defendant's guilty plea; (g) commits or attempts to commit any crime; (h) fails to appear in court; or (i) violates the conditions of pretrial release.

Under USSG § 3E1.1(b), if the district court determines that defendant's total offense level before operation of § 3E1.1(a) is 16 or higher, and if the USAO recommends a two-level downward adjustment pursuant to the preceding paragraph, the USAO will move for an additional one-level downward adjustment for acceptance of responsibility before sentencing

because defendant communicated defendant's decision to plead guilty in a timely manner that enabled the USAO to avoid preparing for trial and to efficiently allocate its resources.

16. Criminal History Category. Defendant acknowledges that the district court may base defendant's sentence in part on defendant's criminal record or criminal history. The district court will determine defendant's criminal history category under the sentencing guidelines.

17. Additional Sentencing Information: The stipulated sentencing guidelines calculations are based on information now known to the parties. Defendant understands that both defendant and the USAO are free to (a) supplement the facts in this agreement by supplying relevant information to the U.S. Probation and Pretrial Services Offices and the district court regarding the nature, scope, and extent of defendant's criminal conduct and any aggravating or mitigating facts or circumstances; and (b) correct any and all factual misstatements relating to the district court's sentencing guidelines calculations and determination of sentence. While this paragraph permits both the USAO and defendant to submit full and complete factual information to the U.S. Probation and Pretrial Services Offices and the district court, even if that factual information may be viewed as inconsistent with the facts agreed to in this agreement, this paragraph does not affect defendant's and the USAO's obligations not to contest the facts agreed to in this agreement. Good faith efforts to provide truthful information or to correct factual misstatements shall not be grounds for defendant to withdraw defendant's guilty plea.

Defendant acknowledges that the U.S. Probation Office may calculate the sentencing guidelines differently and may rely on additional information it obtains through its investigation. Defendant also acknowledges that the district court may rely on this and other additional information as it calculates the sentencing guidelines range and makes other sentencing determinations, and the district court's reliance on such information shall not be grounds for defendant to withdraw defendant's guilty plea.

VII. POSITIONS REGARDING SENTENCING

18. The USAO will recommend that the district court sentence defendant at the low end of the advisory guideline range as determined by the district court. Defendant may argue for a downward variance pursuant to 18 U.S.C. § 3553. Defendant acknowledges that the district court does not have to follow the recommendation of either party.

19. Notwithstanding its agreement to recommend a sentence as described above, the USAO reserves its right to defend any lawfully imposed sentence on appeal or in any post-conviction litigation.

20. If defendant commits any act that results in the Court finding that defendant is not entitled to a downward adjustment for acceptance of responsibility, the USAO is entitled to argue for any sentence it deems appropriate under 18 U.S.C. § 3553(a). In any such event, Defendant remains bound by the provisions of this agreement and shall not have the right to withdraw defendant's guilty plea.

VIII. WAIVER OF CONSTITUTIONAL RIGHTS

21. Defendant understands that by pleading guilty, defendant gives up the following rights:

a. The right to persist in a plea of not guilty;

b. The right to a speedy and public trial by jury;

c. The right to be represented by counsel—and if necessary have the court appoint counsel—at trial. Defendant understands, however, that, defendant retains the right to be represented by counsel—and if necessary have the court appoint counsel—at every other stage of the proceeding;

d. The right to be presumed innocent and to have the burden of proof placed on the USAO to prove defendant guilty beyond a reasonable doubt;

e. The right to confront and cross-examine witnesses against defendant;

f. The right to testify and to present evidence in opposition to the charges, including the right to compel the attendance of witnesses to testify;

g. The right not to be compelled to testify, and, if defendant chose not to testify or present evidence, to have that choice not be used against defendant; and

h. The right to pursue any affirmative defenses, Fourth Amendment or Fifth Amendment claims, and any other pretrial motions that have been filed or could be filed.

IX. WAIVER OF APPELLATE RIGHTS

22. Waiver of Appellate Rights. Defendant knowingly and expressly waives: (a) the right to appeal any sentence imposed within or below the applicable Sentencing Guideline range as determined by the district court; (b) the right to appeal the manner in which the district court determined that sentence on the grounds set forth in 18 U.S.C. § 3742.

23. Defendant reserves only the right to appeal any portion of the sentence that is an upward departure or variance from the applicable Sentencing Guideline range as determined by the district court.

24. Waiver of Post-Conviction Rights. Defendant also knowingly and expressly waives all collateral challenges, including any claims under 28 U.S.C. § 2255, to defendant's conviction, sentence, and the procedure by which the district court adjudicated guilt and imposed sentence, except non-waivable claims of ineffective assistance of counsel.

25. Preservation of Evidence: Defendant acknowledges that the USAO and the agencies investigating this case are not obligated or required to preserve any evidence obtained in the investigation of this case.

X. RESULT OF WITHDRAWAL OF GUILTY PLEA OR VACATUR/REVERSAL/SET-ASIDE OF CONVICTIONS

26. Consequence of withdrawal of guilty plea: Defendant agrees that if, after entering a guilty plea pursuant to this agreement, defendant seeks to withdraw and succeeds in withdrawing defendant's guilty plea on any basis other than a claim and finding that entry into this agreement was involuntary, then the USAO will be relieved of all of its obligations under this agreement.

27. Consequence of vacatur, reversal, or set-aside: Defendant agrees that if defendant's conviction is vacated, reversed, or set aside, both the USAO and defendant will be released from all their obligations under this agreement, except that, should the USAO choose to pursue any charge that was either dismissed or not filed as a result of this agreement, then (i) any applicable statute of limitations will be tolled between the date of defendant's signing of this agreement and the filing commencing any such action; and (ii) defendant waives and gives up all defenses based on the statute of limitations, any claim of pre-indictment delay, or any speedy trial claim with respect to any such action, except to the extent that such defenses existed as of the date of defendant's signing this agreement.

XII. BREACH OF AGREEMENT

28. Defendant agrees that if, at any time after this agreement becomes effective, defendant knowingly violates or fails to perform any of defendant's obligations under this agreement ("a breach"), the USAO may declare this agreement breached. All of defendant's obligations are material, a single breach of this agreement is sufficient for the USAO to declare a breach, and defendant shall not be deemed to have cured a breach without the express agreement of the USAO in writing. If the USAO declares this agreement breached, and the district court finds such a breach to have occurred, then: (a) if defendant has previously entered a guilty plea

pursuant to this agreement, defendant will remain bound by the provisions of this agreement and will not be able to withdraw the guilty plea, and (b) the USAO will be relieved of all its obligations under this agreement.

XIII. COURT AND UNITED STATES PROBATION AND PRETRIAL SERVICES OFFICE NOT PARTIES.

29. Defendant understands that the Court and the U.S. Probation and Pretrial Services Office are not parties to this agreement and need not accept any of the USAO's sentencing recommendations or the parties' agreements to facts or sentencing factors.

30. Defendant understands that both defendant and the USAO are free to argue on appeal and collateral review that the district court's sentencing guidelines calculations and the sentence it chooses to impose are not error.

31. Defendant understands that even if the district court ignores any sentencing recommendation, finds facts or reaches conclusions different from those agreed to by the parties, or imposes any sentence up to the maximum established by statute, defendant cannot, for that reason, withdraw defendant's guilty plea, and defendant will remain bound to fulfill all defendant's obligations under this agreement. Defendant understands that no one—not the prosecutor, defendant's attorney, or the Court—can make a binding prediction or promise regarding the sentence defendant will receive, except that it will be within the statutory maximum.

XIV. ADDITIONAL ACKNOWLEDGMENTS

32. The Defendant acknowledges that:

a. Defendant read this agreement and defendant understands its terms and conditions.

b. Defendant had adequate time to discuss this case, the evidence, and this agreement with defendant's attorney.

c. Defendant carefully and thoroughly discussed all terms of this agreement with defendant's attorney.

d. Defendant understands the terms of this agreement and voluntarily agrees to those terms.

e. Defendant has discussed with defendant's attorney the following: the evidence; defendant's rights; possible pretrial motions that might be filed; possible defenses that might be asserted either prior to or at trial; the sentencing factors set forth in 18 U.S.C. 3553(a); the relevant sentencing guidelines provisions; and consequences of entering into this agreement.

f. The representations contained in this agreement are true and correct, including the factual basis for defendant's offense set forth in this agreement.

g. Defendant was not under the influence of any alcohol, drug, or medicine that would impair defendant's ability to understand the agreement when defendant considered signing this agreement and when defendant signed it.

33. Defendant understands that defendant alone decides whether to plead guilty or go to trial, and acknowledges that defendant has decided to enter defendant's guilty plea knowing of the charges brought against defendant, defendant's possible defenses, and the benefits and possible detriments of proceeding to trial.

34. Defendant understands that no promises, understandings, or agreements other than those set forth in this agreement have been made or implied by defendant, defendant's attorney, or the USAO, and no additional promises, agreements, or conditions shall have any force or effect unless set forth in writing and signed by all parties or confirmed on the record before the district court.

35. Defendant acknowledges that defendant decided to plead guilty voluntarily and that no one threatened, coerced, or forced defendant to enter into this agreement.

36. Defendant is satisfied with the representation of defendant's attorney, and defendant is pleading guilty because defendant is guilty of the charges and chooses to take advantage of the promises set forth in this agreement and for no other reason.

XV. PLEA AGREEMENT PART OF THE GUILTY PLEA HEARING

37. The parties agree that this agreement will be considered part of the record of defendant's guilty plea hearing as if the entire agreement had been read into the record of the proceeding.

NEVADA STATE BOARD
OF PHARMACY

BEFORE THE NEVADA STATE BOARD OF PHARMACY

NEVADA STATE BOARD OF PHARMACY, **Petitioner,** **v.** **McGUFF COMPOUNDING PHARMACY SERVICES, INC,** **Pharmacy License No. PH01563, and** **McGUFF COMPANY, INC.,** **Wholesale License No. WH01300,** **Respondents.**	**CASE NOS. 23-070-PH-O** **23-070-WH-O** **NOTICE OF INTENDED ACTION AND ACCUSATION**

J. David Wuest, in his official capacity as Executive Secretary of the Nevada State Board of Pharmacy, makes the following that will serve as both a notice of intended action under NRS 233B.127(3) and as an accusation under NRS 622A.300 and NRS 639.241.

JURISDICTION

1. The Nevada State Board of Pharmacy (Board) has jurisdiction over this matter because at the time of the events alleged herein, Respondent McGuff Compounding Pharmacy Services, Inc, Pharmacy License No. PH01563 (McGuff Pharmacy), located in Santa Ana, California, was a pharmacy licensed by the Board, and McGuff Company, Inc, Wholesale License No. WH01300 (McGuff Company), located in Santa Ana, California, was a medical products wholesale distributor licensed by the Board.

FACTUAL ALLEGATIONS

2. McGuff Pharmacy and McGuff Company are both owned by Ronald M. McGuff.

3. On or about March 1, 2023, the California State Board of Pharmacy entered an Order in Case Nol. 7176 approving a stipulated settlement for voluntary surrender of Respondent McGuff Pharmacy's Pharmacy Permit No. PHY 43950 and Sterile Compounding License No. LSC 99004, for numerous violations of federal and California state law related to compounding drug products, including, without limitation, various provisions of 21 U.S.C. § 353a, 42 U.S.C. §

262, Cal. Business and Professions Code § 4000 *et seq.*, and Cal. Code of Regulations, Title 16, Section 1700 *et seq.* (SEE EXHBIT A HERETO).

APPLICABLE LAW

4. A pharmacy engaged in the practice of compounding drug products and dispensing compounded drug products in Nevada shall comply with the provisions of NAC 639.661 -.690, *inclusive*, and related federal law, 21 U.S.C. § 353a, establishing national standards for compounding medications. *See also* 42 U.S.C. § 262 (regulation of biological products).

5. Performing any duties as a license holder in an incompetent, unskillful or negligent manner constitutes unprofessional conduct or conduct contrary to the public interest pursuant to NAC 639.945(1)(i) and is grounds for suspension or revocation of any license issued by the Board. NRS 639.210(4).

6. The Board may suspend or revoke a license if the holder has violated any provision of the Federal Food, Drug and Cosmetic Act or any other federal law or regulation relating to prescription drugs. NRS 639.210(11).

7. The Board may suspend or revoke a license if the holder has violated any law or regulation relating to drugs, the manufacture or distribution of drugs or the practice of pharmacy. NRS 639.210(12).

8. Any violation of any of the provisions of NRS Chapter 639 or NAC Chapter 639 by personnel of the pharmacy is cause for the suspension or revocation of the license of the pharmacy by the Board. NRS 639.230(5); NAC 639.702. Further, the owner of any business or facility licensed, certified or registered by the Board is responsible for the acts of all personnel in his or her employ. NAC 639.945(3).

COUNT ONE

Violation of Federal and State Compounding Law/Unprofessional Conduct

8. Respondents, their owner, and/or their personnel engaged in unprofessional conduct as defined in NAC 639.945(1)((i) and violated various provisions of 21 U.S.C. § 353a,

42 U.S.C. § 262, Cal. Business and Professions Code § 4000 *et seq*., and Cal. Code of Regulations, Title 16, Section 1700 *et seq*. as detailed in the California State Board of Pharmacy's Order entered in Case Nol. 7176. Respondents are responsible for those violations, including all errors and omissions of pharmacy personnel, pursuant to NRS 639.230(5), NAC 639.702 and/or NAC 639.945(3) and therefore subject to discipline pursuant to NRS 639.210(4), (11) and/or (12).

WHEREFORE, it is requested that the Nevada State Board of Pharmacy take appropriate disciplinary action with respect to the licenses of these Respondents.

Signed this 28th day of February 2025.

J. David Wuest, R.Ph., Executive Secretary
Nevada State Board of Pharmacy

NOTICE TO RESPONDENT

You have the right to show the Nevada State Board of Pharmacy that your conduct, as alleged above, complies with all lawful requirements. NRS 233B.127(3). You have the right to a hearing before the Board to answer the Notice of Intended Action and Accusation and present evidence and argument on all issues involved, either personally or through counsel. NRS 233B.121; NRS 233B.127(3); NRS 622A.300(1) and (3). The hearing shall be conducted pursuant to NRS 639.241 through NRS 639.258. To be entitled to a hearing, you must complete, and file two (2) copies of the Answer and Notice of Defense served herewith, to be received by the Board's Reno office located at 985 Damonte Ranch Parkway – Suite 206, Reno, Nevada 89521, within twenty (20) days of your receipt of this Notice of Intended Action and Accusation. NRS 622A.320; NRS 639.243. Your failure to timely file an Answer and Notice of Defense constitutes an admission of the charges and waiver of the right to a hearing. NRS 639.244. If you fail to appear at the hearing and the Board finds that you were given sufficient legal notice of the hearing, the Board may accept the allegations as true and may proceed to consider the case and render a decision. NRS 622A.350. A regulatory body may recover from a person reasonable attorney's fees and costs that are incurred by the regulatory body as a part of its investigative, administrative, and disciplinary proceedings against the person if the regulatory body finds that the person has violated any provision of this title. NRS 622.400(1).

RE: Administrative Case No. 7176
McGuff Compounding Pharmacy Services Inc., PHY 43950 & LSC 99004

Dear Mr. McGuff:

Attached is the Board of Pharmacy's Stipulated Settlement and Disciplinary Order regarding the above-referenced matter. Your attention is directed to pages 4 - 8 of the document.

Effective at 5:00 p.m. on March 1, 2023, Pharmacy Permit No. PHY 43950 and Sterile Compounding License No. LSC 99004 issued to McGuff Compounding Pharmacy Services Inc., is hereby surrendered and accepted by the Board and subject to the terms and conditions in the decision.

If you wish to file a petition for reconsideration pursuant to Government Code section 11521, the petition must be received prior to the effective date of the decision. However, please be aware the Board needs approximately five days to process a petition for reconsideration. Attached is a copy of the Government Code section for your review. **Please note that reconsideration is NOT available to you if you entered into a stipulated settlement with the Board.**

If you have any questions concerning this matter, you may contact Lupe Baltazar, Administrative Case Analyst, at lupe.baltazar@dca.ca.gov or (916) 518-3009. Should you have any questions related to litigation of this matter, please contact the Deputy Attorney General handling this matter.

Sincerely,

ANNE SODERGREN
Executive Officer

BOARD OF PHARMACY
DEPARTMENT OF CONSUMER AFFAIRS
STATE OF CALIFORNIA

In the Matter of the Accusation Against: **MCGUFF COMPOUNDING PHARMACY SERVICES INC., RONALD M. MCGUFF, OWNER AND OFFICER** **2921 West MacArthur Blvd., Ste. 142 (139-143)** **Santa Ana, CA 92704** **Pharmacy Permit No. PHY 43950** **Sterile Compounding License No. LSC 99004,** **and** **SI VAN PHAM** **2921 W. MacArthur Blvd., #142** **Santa Ana, CA 92704** **Pharmacist License No. RPH 49833** Respondents.	Case No. 7176 OAH No. 2021120276 **STIPULATED SETTLEMENT AND DISCIPLINARY ORDER**

In the interest of a prompt and speedy settlement of this matter, consistent with the public interest and the responsibility of the Board of Pharmacy, Department of Consumer Affairs, the parties hereby agree to the following Stipulated Settlement and Disciplinary Order which will be submitted to the Board for approval and adoption as the final disposition of the Accusation with respect to Respondents McGuff Compounding Pharmacy Services Inc. and Si Van Pham.

PARTIES

1. Anne Sodergren (Complainant) is the Executive Officer of the Board of Pharmacy (Board). She brought this action solely in her official capacity and is represented in this matter by Rob Bonta, Attorney General of the State of California, by Desiree I. Kellogg, Deputy Attorney General, and Joshua A. Room, Supervising Deputy Attorney General.

2. Respondents are represented in this proceeding by attorney Tony J. Park, Pharm.D., J..D., whose address is: California Pharmacy Lawyers, Law Offices of Tony J. Park, Inc., 9090 Irvine Center Drive, Irvine, CA 92618, telephone (949) 336-7854.

3. On or about March 9, 1999, the Board issued Pharmacy Permit Number PHY 43950 to McGuff Compounding Pharmacy Services Inc. Ronald M. McGuff has served or been listed in Board records as the sole shareholder and President, Vice-President, and Secretary of McGuff Compounding Pharmacy Services Inc. (Respondent McGuff Compounding aka MCPS). The Pharmacy Permit was in full force and effect at all times relevant to the charges brought herein and will expire on March 1, 2023, unless renewed.

4. On or about July 1, 2003, the Board issued Sterile Compounding License Number LSC 99004 to Respondent McGuff Compounding aka MCPS. The Sterile Compounding License was in full force and effect at all times relevant to the charges brought herein and will expire on March 1, 2023, unless renewed.

5. On or about September 3, 1997, the Board issued Pharmacist License Number RPH 49833 to Si Van Pham (Respondent Pham). The Pharmacist License was in full force and effect at all times relevant to the charges brought herein and will expire on November 30, 2022, unless renewed. Respondent Pham has served and been listed in Board records as Pharmacist-in-Charge of Respondent McGuff Compounding aka MCPS since July 9, 2016.

JURISDICTION

6. Accusation No. 7176 was filed before the Board, against Respondents. Accusation No. 7176 and all other statutorily required documents were properly served on Respondents on October 28, 2021. Respondents timely filed their Notice(s) of Defense contesting the Accusation. First Amended Accusation No. 7176 was filed before the Board, and is currently pending against Respondents. The First Amended Accusation and all other statutorily required documents were properly served on Respondents on April 21, 2022. A copy of First Amended Accusation No. 7176 is attached as exhibit A and incorporated herein by reference.

ADVISEMENT AND WAIVERS

7. Respondents have carefully read, fully discussed with counsel, and understand the charges and allegations in First Amended Accusation No. 7176. Respondents have also carefully read, fully discussed with counsel, and understand the effects of this Stipulated Settlement and Disciplinary Order on their respective permits and licenses.

8. Respondents are fully aware of their legal rights in this matter, including the right to a hearing on the charges and allegations in the First Amended Accusation; the right to confront and cross-examine the witnesses against them; the right to present evidence and to testify on their own behalf; the right to the issuance of subpoenas to compel attendance of witnesses and production of documents; the right to reconsideration and court review of an adverse decision; and all other rights accorded by the California Administrative Procedure Act and other applicable laws.

9. Respondents voluntarily, knowingly, and intelligently waive and give up each and every right set forth above.

CULPABILITY

10. Respondents understand and agree that the charges and allegations in First Amended Accusation No. 7176, if proven at a hearing, constitute cause for imposing discipline upon their Pharmacy Permit, Sterile Compounding License, and Pharmacist License. For the purposes of resolving this matter without the expense and uncertainty of further proceedings, Respondents agree that, at a hearing, Complainant could establish a factual basis for charges in the First Amended Accusation, and Respondents hereby give up their right to contest those charges.

11. Respondents agree that their Pharmacy Permit, Sterile Compounding License, and Pharmacist License are each and severally subject to discipline and they agree to be bound by the Board's disciplinary terms as set forth in the Disciplinary Order below.

DESIRED LICENSE CATEGORY TRANSITION

12. Respondent MCPS has decided to seek a transition from being a licensed pharmacy engaged in compounding (a Section 503A facility under federal law) to being a registered and licensed outsourcing facility (a Section 503B facility under federal law). This will entail an application to the Food and Drug Administration (FDA) for registration under Section 503B as an outsourcing facility, and then an application to the Board to be licensed in California as an outsourcing facility. It could take some significant time for MCPS to prepare for and make these applications. In the interim, the MCPS facility will cease functioning as a pharmacy on the effective date of the Decision and Order by the Board of Pharmacy adopting this stipulation.

13. This settlement of the First Amended Accusation does not depend on whether MCPS, any successor or assign thereof, or any entity sharing ownership or management with MCPS, actually submits a subsequent application to the Board for licensure as an outsourcing facility. In the event such application is submitted, the Board will give it the same consideration it would any other application to be licensed as an outsourcing facility. This settlement does not preclude the Board from granting that license. Nor is the Board under any obligation from this settlement to grant that license. Any such application will receive ordinary and fair consideration for licensure. If such an outsourcing facility license is granted, there is one term below that will be applied by the Board to that license, and which Respondent MCPS acknowledges will apply to itself, any successor or assign, or any entity sharing ownership or management with Respondent MCPS.

IMMEDIATE CEASE AND DESIST

14. As of the last date of all signatures on this Stipulated Settlement and Disciplinary Order, both Respondents agree to voluntarily and completely cease and desist compounding, or sales or transfers of compounded preparations, using any active ingredients or drug products named or identified in First Amended Accusation No. 7176, or any other active ingredient or drug product that is not graded for pharmaceutical use.

15. Any compounding by Respondents, or sales or transfers of compounded preparations, using such active ingredients or drug products after that date shall constitute unprofessional conduct and further cause for discipline by both Respondents, and may be considered by the Board in deciding whether to grant or deny any subsequent application by Respondent MCPS, its successor or assign, or any entity sharing ownership or management with Respondent MCPS, including but not limited to a subsequent application for an outsourcing facility license.

CONTINGENCY

16. This stipulation shall be subject to approval by the Board of Pharmacy. Respondents understand and agree that counsel for Complainant and the staff of the Board may communicate directly with the Board regarding this stipulation and settlement, without notice to or participation by Respondents or their counsel. By signing the stipulation, Respondents understand and agree that they may not withdraw their agreement or seek to rescind the stipulation prior to the time the Board considers and acts upon it. If the Board fails to adopt this stipulation as its Decision and Order, the Stipulated Settlement and Disciplinary Order shall be of no force or effect, except for this paragraph, it shall be inadmissible in any legal action between the parties, and the Board shall not be disqualified from further action by having considered this matter.

17. The parties understand and agree that Portable Document Format (PDF) and facsimile copies of this Stipulated Settlement and Disciplinary Order, including PDF and facsimile signatures thereto, shall have the same force and effect as the originals.

18. This Stipulated Settlement and Disciplinary Order is intended by the parties to be an integrated writing representing the complete, final, and exclusive embodiment of their agreement. It supersedes any and all prior or contemporaneous agreements, understandings, discussions, negotiations, and commitments (written or oral). This Stipulated Settlement and Disciplinary Order may not be altered, amended, modified, supplemented, or otherwise changed except by a writing executed by an authorized representative of each of the parties.

19. In consideration of the foregoing, the parties agree that the Board may, without further notice or formal proceeding, issue and enter the following Disciplinary Order:

///

DISCIPLINARY ORDER

AS TO RESPONDENT MCGUFF COMPOUNDING AKA MCPS

IT IS HEREBY ORDERED that Pharmacy Permit No. PHY 43950, and Sterile Compounding License No. LSC 99004, both issued to Respondent McGuff Compounding aka MCPS, are each and severally surrendered and accepted by the Board.

20. **Definition: Respondent**

For the purposes of paragraphs 20-33, "Respondent" shall refer to Respondent McGuff Compounding aka MCPS. All terms and conditions stated herein shall bind and be applicable to the licensed premises and to all owners, managers, officers, administrators, members, directors, trustees, associates, or partners thereof. For purposes of compliance with any term or condition, any report, submission, filing, payment, or appearance required to be made by Respondent to or before the Board or its designee shall be made by an owner or executive officer with authority to act on behalf of and legally bind the licensed entity.

21. The surrender of Respondent's Pharmacy Permit and Sterile Compounding License and the acceptance of the surrendered licenses by the Board shall constitute the imposition of discipline against Respondent. This stipulation constitutes a record of the discipline and shall become a part of Respondent's license history with the Board.

22. Respondent shall lose all rights and privileges as a pharmacy and to perform sterile compounding in California as of the effective date of the Board's Decision and Order.

23. Respondent shall be jointly and severally liable to the Board, along with Respondent Pham, for costs of investigation and enforcement of $95,104.75. Respondent shall cause that amount to be paid, in full, on or before the effective date of the Decision and Order.

24. Within (5) business days of the date this Stipulated Settlement and Disciplinary Order is fully executed, Respondent shall submit a completed Discontinuance of Business form according to Board guidelines and shall notify the Board of the records inventory transfer within five (5) days. Respondent shall further arrange for the transfer of all records of acquisition and disposition of dangerous drugs and/or devices to premises licensed and approved by the Board. Any transfers of drug inventory shall be conducted in compliance with state and federal law.

25. If permitted by state and federal law, Respondent may transfer current inventory to its commonly-owned facilities as necessary to prepare for testing and other requirements to establish subsequent eligibility for an outsourcing facility registration and/or license.

26. Respondent shall cause to be delivered to the Board its pocket license and, if any were issued, its wall certificates, on or before the effective date of the Decision and Order.

27. Respondent shall also, by the effective date of the Decision and Order, arrange for the continuation of care for ongoing patients of the pharmacy by, at minimum, providing a written notice to ongoing patients that specifies the anticipated closing date of the pharmacy and that identifies one or more area pharmacies capable of taking up the patients' care, and by cooperating as may be necessary in the transfer of records or prescriptions for ongoing patients. Within five (5) days of its provision to the pharmacy's ongoing patients, Respondent shall provide a copy of its written notice to the Board. For purposes of this provision, "ongoing patients" means those patients for whom the pharmacy has on file a prescription with one or more refills outstanding, or for whom the pharmacy has filled a prescription within the preceding sixty (60) days.

28. Respondent shall also, by the effective date of the Decision and Order, prepare and submit to the Board, on the letterhead for Respondent MCPS, a letter jointly signed by Ronald McGuff and Respondent Pham, in substantially the form attached as exhibit B hereto. The Board may make whatever use of that letter it sees fit, including but not limited to publication in *The Script* or other publication(s), distribution or copying, or submission into evidence in other cases. There shall be no limit to the number of times the Board may publish or otherwise use this letter.

29. Neither Respondent nor its successor or assign, nor any entity sharing ownership or management with Respondent, shall apply to the Board for any permit, license, or registration issued by the Board for a period of three (3) years, except that at any time it is eligible for same:

- Respondent may submit an application for an outsourcing facility license;
- Respondent may apply for a change of location for its wholesaler license (WLS 2947), so long as there is no change in ownership or management structure, or any other substantive change aside from the change in location; and
- Should the Board change the name or category of licensure applicable to the WLS license, Respondent may apply to adopt this change, so long as there is no change in ownership or management structure, or other substantive change.

30. If Respondent, its successor or assign, or an entity sharing ownership or management with Respondent, ever applies for licensure, including as an outsourcing facility, or petitions for reinstatement, the Board shall treat it as a new application for licensure. The applicant/petitioner must comply with all the laws, regulations and procedures for licensure in effect at the time the application or petition is filed, and charges and allegations in First Amended Accusation No. 7176 shall be deemed to be supported by a factual basis and not contested by Respondent when the Board determines whether to grant or deny the application or petition.

31. If an application for an outsourcing facility license is submitted by Respondent, its successor or assign, or an entity sharing ownership or management with Respondent, the Board may in addition consider, in deciding whether to grant or deny that license: whether Respondent met its agreement for the pharmacy to cease and desist compounding, sales, or transfers of drug preparations using active ingredients or drug products named or identified in First Amended Accusation No. 7176, or that are not graded for pharmaceutical use; and whether the Board has received full payment of the costs of investigation and enforcement in this case.

32. If an outsourcing facility license is granted by the Board to Respondent, its successor or assign, or an entity sharing ownership or management with Respondent, that applicant/licensee shall retain, at its own expense, for a period of one (1) year after licensure, an independent consultant for the outsourcing facility approved in advance by the Board or its designee.

33. That independent consultant shall be a pharmacist licensed in good standing by the Board, and shall be responsible for conducting in-person inspections to review the operations of the outsourcing facility on a monthly basis for compliance with applicable state and federal laws. The independent consultant shall prepare and submit written reports directly to Board staff; such reports shall not go first to or be made available to the licensee by the independent consultant.

AS TO RESPONDENT PHAM

IT IS HEREBY ORDERED that Pharmacist License No. RPH 49833, issued to Respondent Pham, is revoked. However, the revocation is stayed and Respondent Pham is placed on probation for thirty-five (35) months on the following terms and conditions:

34. **Definition: Respondent**

For the purposes of paragraphs 34-52, "Respondent" shall refer to Respondent Pham.

35. **Obey All Laws**

Respondent shall obey all state and federal laws and regulations.

Respondent shall report any of the following occurrences to the Board, in writing, within seventy-two (72) hours of such occurrence:

- an arrest or issuance of a criminal complaint for violation of any provision of the Pharmacy Law, state and federal food and drug laws, or state and federal controlled substances laws;
- a plea of guilty, or nolo contendere, no contest, or similar, in any state or federal criminal proceeding to any criminal complaint, information or indictment;
- a conviction of any crime;
- the filing of a disciplinary pleading, issuance of a citation, or initiation of another administrative action filed by any state or federal agency which involves Respondent's license or which is related to the practice of pharmacy or the manufacturing, obtaining, handling, distributing, billing, or charging for any drug, device or controlled substance.

Failure to timely report any such occurrence shall be considered a violation of probation.

36. **Report to the Board**

Respondent shall report to the Board quarterly, on a schedule as directed by the Board or its designee. The report shall be made either in person or in writing, as directed. Among other requirements, Respondent shall state in each report under penalty of perjury whether there has been compliance with all the terms and conditions of probation.

Failure to submit timely reports in a form as directed shall be considered a violation of probation. Any period(s) of delinquency in submission of reports as directed may be added to the probation. Moreover, if the final probation report is not made as directed, probation shall be automatically extended until such time as the final report is made and accepted by the Board.

///

37. **Continuing Education**

Respondent shall provide evidence of efforts to maintain skill and knowledge as a pharmacist as directed by the Board or its designee.

38. **Interview with the Board**

Upon receipt of reasonable prior notice, Respondent shall appear in person for interviews with the Board or its designee, at such intervals and locations as are determined by the Board or its designee. Failure to appear for any scheduled interview without prior notification to Board staff, or failure to appear for two (2) or more scheduled interviews with the Board or its designee during the period of probation, shall be considered a violation of probation.

39. **Cooperate with Board Staff**

Respondent shall timely cooperate with the Board's inspection program and with the Board's monitoring and investigation of Respondent's compliance with the terms and conditions of probation, including but not limited to: timely responses to requests for information by Board staff; timely compliance with directives from Board staff regarding requirements of any term or condition of probation; and timely completion of documentation pertaining to a term or condition of probation. Failure to timely cooperate shall be considered a violation of probation.

40. **Status of License**

Respondent shall, at all times while on probation, maintain an active, current pharmacist license with the Board, including any period during which probation is tolled. Failure to maintain an active, current pharmacist license shall be considered a violation of probation.

If Respondent's pharmacist license expires or is cancelled by operation of law or otherwise at any time during the period of probation, including any extensions thereof due to tolling or otherwise, upon renewal or reapplication Respondent's license shall be subject to all terms and conditions of this probation not previously satisfied.

41. **Submission of Letter to Board**

Respondent shall, by the effective date of the Decision and Order, prepare and submit to the Board, on the letterhead for Respondent MCPS, a letter jointly signed by Ronald McGuff and Respondent Pham, in substantially the form attached as exhibit B hereto. The Board may make

whatever use of that letter it sees fit, including but not limited to publication in *The Script* or other publication(s), distribution or copying, or submission into evidence in other cases. There shall be no limit to the number of times the Board may publish or otherwise use this letter.

42. **Reimbursement of Board Costs**

Respondent shall be jointly and severally liable to the Board, along with Respondent MCPS, for costs of investigation and enforcement of $95,104.75. Respondent shall cause that amount to be paid, in full, on or before the effective date of the Decision and Order. It shall be a condition precedent to successful completion of probation that these costs were timely paid. Failure to pay costs by the deadline shall also be considered a violation of probation.

43. **Probation Monitoring Costs**

Respondent shall pay any costs associated with probation monitoring as determined by the Board each and every year of probation. Such costs shall be payable to the Board on a schedule as directed by the Board or its designee. Failure to pay such costs by the deadline(s) as directed shall be considered a violation of probation.

44. **Practice Requirement – Extension of Probation**

Except during periods of suspension, Respondent shall, at all times while on probation, be employed as a pharmacist in California for a minimum of one hundred (100) hours per calendar month. Any month during which this minimum is not met shall extend the period of probation by one month. During any such period of insufficient employment, Respondent must nonetheless comply with all terms and conditions of probation, unless Respondent receives a waiver in writing from the Board or its designee.

If Respondent does not practice as a pharmacist in California for the minimum number of hours in any calendar month, for any reason (including vacation), Respondent shall notify the board in writing within ten (10) days of the conclusion of that calendar month. This notification shall include at least: the date(s), location(s), and hours of last practice; the reason(s) for the interruption or reduction in practice; and the anticipated date(s) on which Respondent will resume practice at the required level. Respondent shall further notify the board in writing within ten (10) days following the next calendar month during which respondent practices as a pharmacist in

California for the minimum of one hundred (100) hours. Any failure to timely provide such notification(s) shall be considered a violation of probation.

It is a violation of probation for Respondent's probation to be extended pursuant to the provisions of this condition for a total period, counting consecutive and non-consecutive months, exceeding thirty-six (36) months. The Board or its designee may post a notice of the extended probation period on its website.

45. **Ethics Course**

Within sixty (60) calendar days of the effective date of this decision, Respondent shall enroll, at Respondent's expense, in a course in ethics approved in advance by the Board or its designee, that complies with California Code of Regulations, title 16, section 1773.5. Respondent shall provide proof of enrollment upon request. Within five (5) days of completion, Respondent shall submit a copy of the certificate of completion to the Board or its designee. Failure to timely enroll in an approved ethics course, to initiate the course during the first year of probation, to successfully complete it before the end of the second year of probation, or to timely submit proof of completion to the Board or its designee, shall be considered a violation of probation.

46. **No Ownership or Management of Licensed Premises**

Respondent shall not own, have any legal or beneficial interest in, nor serve as a manager, administrator, member, officer, director, trustee, associate, or partner of any business, firm, partnership, or corporation currently or hereinafter licensed by the Board. Respondent shall sell or transfer any legal or beneficial interest in any entity licensed by the Board within ninety (90) days of the effective date of this decision and provide written proof thereof to the Board.

Failure to timely divest any legal or beneficial interest(s) or to immediately provide documentation thereof to the Board shall be considered a violation of probation.

47. **Notification of Change(s) in Name, Address(es), or Phone Number(s)**

Respondent shall notify the Board in writing within ten (10) days of any change in name, residence address, mailing address, e-mail address, or phone number.

Failure to timely notify the board of any change in name, residence or mailing address, email address, or phone number, shall be considered a violation of probation.

48. **Reporting of Employment and Notice to Employers**

During the period of probation, Respondent shall notify all present and prospective employers of the decision in case number 7176 and the terms, conditions and restrictions imposed on Respondent by the decision, as follows:

Within thirty (30) days of the effective date of this decision, and within ten (10) days of undertaking any new employment, Respondent shall report to the Board in writing the name, physical address, and mailing address of each employer(s), and the name(s) and telephone number(s) of all direct supervisor(s), as well as any pharmacist(s)-in-charge, designated representative(s)-in-charge, responsible manager, or other compliance supervisor(s), and Respondent's work schedule, if known. Respondent shall also include reason(s) for leaving the prior employment. Respondent shall sign and return to the Board a written consent authorizing the Board or its designee to communicate with all of Respondent's employer(s) and supervisor(s), and authorizing those employer(s) or supervisor(s) to communicate with the Board or its designee concerning Respondent's work status, performance, and monitoring.

Within thirty (30) days of the effective date of this decision, and within fifteen (15) days of Respondent undertaking any new employment, Respondent shall cause his (a) direct supervisor, (b) pharmacist-in-charge, designated representative-in-charge, responsible manager, or other compliance supervisor, and (c) the owner or owner representative of his employer, to report to the Board in writing acknowledging that the listed individual(s) has/have read the decision in case number 7176, and terms and conditions imposed thereby. If one person serves in more than one role described in (a), (b), or (c), the acknowledgment shall so state. It shall be the Respondent's responsibility to ensure that these acknowledgment(s) are timely submitted to the Board. In the event of a change in the person(s) serving the role(s) described in (a), (b), or (c) during the term of probation, Respondent shall cause the person(s) taking over the role(s) to report to the Roard in writing within fifteen (15) days of the change acknowledging that he or she has read the decision in case number 7176, and the terms and conditions imposed thereby.

///

///

If Respondent works for or is employed by or through an employment service, Respondent must notify the person(s) described in (a), (b), and (c) above at every entity licensed by the Board of the decision in case number 7176, and the terms and conditions imposed thereby, in advance of Respondent commencing work at such licensed entity. A record of this notification must be provided to the Board upon request.

Furthermore, within thirty (30) days of the effective date of this decision, and within fifteen (15) days of Respondent undertaking any new employment by or through an employment service, Respondent shall cause the person(s) described in (a), (b), and (c) above at the employment service to report to the Board in writing acknowledging that he or she has read the decision in case number 7176, and the terms and conditions imposed thereby. It shall be Respondent's responsibility to ensure that these acknowledgment(s) are timely submitted to the Board.

Failure to timely notify present or prospective employer(s), or failure to cause the identified person(s) with that/those employer(s) to submit timely written acknowledgments to the Board, shall be considered a violation of probation. Failure to comply with the requirements or deadlines of this condition shall be considered a violation of probation.

"Employment" within the meaning of this provision includes any full-time, part-time, temporary, relief, or employment/management service position as a pharmacist, or any position for which a pharmacist license is a requirement or criterion for employment, whether Respondent is an employee, independent contractor, or volunteer.

49. **Restrictions on Supervision and Oversight of Licensed Facilities –**

During the period of probation, Respondent shall not supervise any intern pharmacist or serve as a consultant to any entity licensed by the board. Respondent may be a pharmacist-in-charge, designated representative-in-charge, responsible manager or other compliance supervisor of any single entity licensed by the Board, but only if Respondent or that entity retains, at his/its expense, an independent consultant who shall be responsible for reviewing the operations of the entity on a monthly basis for compliance by Respondent and the entity with state and federal laws and regulations governing the practice of the entity, and compliance by Respondent with the obligations of his supervisory position, for the duration of Respondent's probation period.

Respondent may serve in such a position at only one entity licensed by the Board, only upon approval by the Board or its designee. Any such approval shall be site specific. The consultant shall be a pharmacist licensed by and not on probation with the Board, who has been approved by the Board or its designee to serve in this position. Respondent shall submit the name of the proposed consultant to the Board or its designee for approval within thirty (30) days of the effective date of the decision or prior to assumption of duties allowed in this term. Assumption of any unauthorized supervision responsibilities shall be considered a violation of probation. In addition, failure to timely seek approval for, timely retain, or ensure timely reporting by the consultant shall be considered a violation of probation.

50. **License Surrender While on Probation/Suspension**

Following the effective date of this decision, should Respondent cease practice due to retirement or health, or be otherwise unable to satisfy the terms and conditions of probation, Respondent may relinquish his pharmacist license, including any indicia of licensure issued by the Board, along with a request to surrender the license. The Board or its designee shall have the discretion whether to accept the surrender or take any other action it deems appropriate and reasonable. Upon formal acceptance of the surrender of the license, Respondent will no longer be subject to the terms and conditions of probation. This surrender will constitute a record of discipline and shall become a part of the Respondent's license history with the board.

Upon acceptance of the surrender, Respondent shall relinquish his pocket and/or wall license, including any indicia of licensure not previously provided to the Board, within ten (10) days of notification by the Board that the surrender is accepted. Respondent may not reapply for any license from the Board for three (3) years from the effective date of the surrender. Respondent shall meet all requirements applicable to the license sought as of the date the application for that license is submitted to the Board, including any outstanding costs.

51. **Completion of Probation**

Upon written notice by the Board or its designee indicating successful completion of probation, Respondent's license will be fully restored.

///

52. **Violation of Probation**

If Respondent has not complied with any term or condition of probation, the Board shall have continuing jurisdiction over Respondent, and the Board shall provide notice to Respondent that probation shall automatically be extended, until all terms and conditions have been satisfied or the Board has taken other action as deemed appropriate to treat the failure to comply as a violation of probation, to terminate probation, and to impose the penalty that was stayed. The Board or its designee may post a notice of the extended probation period on its website.

If Respondent violates probation in any respect, the Board, after giving Respondent notice and an opportunity to be heard, may revoke probation and carry out the disciplinary order that was stayed. If a petition to revoke probation or accusation is filed against Respondent, or the preparation of an accusation or petition to revoke probation is requested from the Office of the Attorney General, the Board shall have continuing jurisdiction and probation shall be automatically extended until the petition to revoke probation or accusation is heard and decided.

ACCEPTANCE

I am authorized to sign for and bind Respondent McGuff Compounding aka MCPS, as well as its successor or assign, and any entity sharing ownership or management with same. I have carefully read the above Stipulated Settlement and Disciplinary Order and have fully discussed it with my attorney Tony J. Park, Pharm.D., J..D. I understand the stipulation and the effect it will have on the current Pharmacy Permit and Sterile Compounding License, as well as on any subsequent outsourcing facility license that may be issued by the Board of Pharmacy. I enter into this Stipulated Settlement and Disciplinary Order voluntarily, knowingly, and intelligently, and agree to be bound by the Decision and Order of the Board of Pharmacy.

BEFORE THE
BOARD OF PHARMACY
DEPARTMENT OF CONSUMER AFFAIRS
STATE OF CALIFORNIA

In the Matter of the Accusation Against: **MCGUFF COMPOUNDING PHARMACY SERVICES INC., RONALD M. MCGUFF, OWNER AND OFFICER** **2921 West MacArthur Blvd., Ste. 142 (139-143)** **Santa Ana, CA 92704** **Pharmacy Permit No. PHY 43950** **Sterile Compounding License No. LSC 99004,** **and** **SI VAN PHAM** **2921 W. MacArthur Blvd., #142** **Santa Ana, CA 92704** **Pharmacist License No. RPH 49833** Respondents.	Case No. 7176 **FIRST AMENDED ACCUSATION**

PARTIES

1. Anne Sodergren (Complainant) brings this First Amended Accusation solely in her official capacity as the Executive Officer of the Board of Pharmacy, Department of Consumer Affairs (Board).

2. On or about March 9, 1999, the Board issued Pharmacy Permit Number PHY 43950 to McGuff Compounding Pharmacy Services Inc., Ronald M. McGuff, sole shareholder and President, Vice-President and Secretary and Si Pham, Pharmacist-in-Charge since July 9, 2016 (McGuff Compounding). The Pharmacy Permit was in full force and effect at all times relevant to the charges brought herein and will expire on March 1, 2023, unless renewed.

3. On or about July 1, 2003, the Board issued Sterile Compounding License Number LSC 99004 to McGuff Compounding Pharmacy Services Inc. (MCPS). The Sterile Compounding License was in full force and effect at all times relevant to the charges brought herein and will expire on March 1, 2023, unless renewed.

4. On or about September 3, 1997, the Board issued Pharmacist License Number RPH 49833 to Si Van Pham (Si Pham). The Pharmacist License was in full force and effect at all times relevant to the charges brought herein and will expire on November 30, 2022, unless renewed.

JURISDICTION

5. This First Amended Accusation is brought before the Board under the authority of the following laws. All section references are to the Business and Professions Code (Code) unless otherwise indicated.

6. Code section 4011 provides that the Board shall administer and enforce both the Pharmacy Law (Bus. & Prof. Code, § 4000 *et seq.*) and the Uniform Controlled Substances Act (Health & Safety Code, § 11000 *et seq.*).

7. Code section 4300, subdivision (a) provides that every license issued by the Board may be suspended or revoked.

8. Code section 4300.1 states:

The expiration, cancellation, forfeiture, or suspension of a board-issued license

by operation of law or by order or decision of the board or a court of law, the placement of a license on a retired status, or the voluntary surrender of a license by a licensee shall not deprive the board of jurisdiction to commence or proceed with any investigation of, or action or disciplinary proceeding against, the licensee or to render a decision suspending or revoking the license.

STATUTORY PROVISIONS

9. Code section 4022 states:

"Dangerous drug" or "dangerous device" means any drug or device unsafe for self-use in humans or animals, and includes the following:

(a) Any drug that bears the legend: "Caution: federal law prohibits dispensing without prescription," "Rx only," or words of similar import.

(b) Any device that bears the statement: "Caution: federal law restricts this device to sale by or on the order of a ____" "Rx only," or words of similar import, the blank to be filled in with the designation of the practitioner licensed to use or order use of the device.

10. Code section 4023.5 states:

For the purposes of this chapter, "direct supervision and control" means that a pharmacist is on the premises at all times and is fully aware of all activities performed by either a pharmacy technician or intern pharmacist.

11. Code section 4113, subdivision (c) states:

The pharmacist-in-charge shall be responsible for a pharmacy's compliance with all state and federal laws and regulations pertaining to the practice of pharmacy.

12. Code section 4115, subdivision (a) states:

A pharmacy technician may perform packaging, manipulative, repetitive, or other nondiscretionary tasks only while assisting, and while under the direct supervision and control of, a pharmacist. The pharmacist shall be responsible for the duties performed under his or her supervision by a technician.

13. Code section 4116, subdivision (a) states:

No person other than a pharmacist, an intern pharmacist, an authorized officer of the law, or a person authorized to prescribe shall be permitted in that area, place, or premises described in the license issued by the board wherein controlled substances or dangerous drugs or dangerous devices are stored, possessed, prepared, manufactured, derived, compounded, dispensed, or re-packaged. However, a pharmacist shall be responsible for any individual who enters the pharmacy for the purposes of receiving consultation from the pharmacist or performing clerical, inventory control, housekeeping, delivery, maintenance, or similar functions relating to the pharmacy if the pharmacist remains present in the pharmacy during all times as the authorized individual is present.

///

14. Code section 4127.1, subdivisions (e)(3) and (f) state:

(e)(3) Provide to the board, within 12 hours, any recall notice issued by the pharmacy for sterile drug products it has compounded.

(f) Adverse effects reported or potentially attributable to a pharmacy's sterile drug product shall be reported to the board within 12 hours and immediately reported to the MedWatch program of the federal Food and Drug Administration.

15. Code section 4127.8, subdivision (a) states:

A pharmacy licensed pursuant to Section 4127.1 or 4127.2 that issues a recall notice regarding a sterile compounded drug shall, in addition to any other duties, contact the recipient pharmacy, prescriber, or patient of the recalled drug and the board as soon as possible within 12 hours of the recall notice if both of the following apply:

(1) Use of or exposure to the recalled drug may cause serious adverse health consequences or death.

(2) The recalled drug was dispensed, or is intended for use, in this state.

16. Section 4169 subdivision (a)(2) of the Code state:

(a) A person or entity shall not do any of the following:

...

(2) Purchase, trade, sell, or transfer dangerous drugs or dangerous devices that the person knew or reasonably should have known were adulterated, as set forth in Article 2 (commencing with Section 111250) of Chapter 6 of Part 5 of Division 104 of the Health and Safety Code.

17. Code section 4301 states in pertinent part:

The board shall take action against any holder of a license who is guilty of unprofessional conduct or whose license has been procured by fraud or misrepresentation or issued by mistake. Unprofessional conduct shall include, but is not limited to, any of the following:

...

(f) The commission of any act involving moral turpitude, dishonesty, fraud, deceit, or corruption, whether the act is committed in the course of relations as a licensee or otherwise, and whether the act is a felony or misdemeanor or not.

(g) Knowingly making or signing any certificate or other document that falsely represents the existence or nonexistence of a state of facts.

...

(j) The violation of any of the statutes of this state, or any other state, or of the United States regulating controlled substances and dangerous drugs.

...

(o) Violating or attempting to violate, directly or indirectly, or assisting in or abetting the violation of or conspiring to violate any provision or term of this chapter or of the applicable federal and state laws and regulations governing pharmacy, including regulations established by the board or any other state or federal regulatory agency.

...

18. Section 4306.5, subdivision (a) of the Code states, in pertinent part:

Unprofessional conduct for a pharmacist may include any of the following:

Acts or omissions that involve, in whole or in part, the inappropriate exercise of his or her education, training, or experience as a pharmacist, whether or not the act or omission arises in the course of the practice of pharmacy or the ownership, management, administration, or operation of a pharmacy or other entity licensed by the board.

...

19. Code section 4307, subdivision (a) states:

Any person who has been denied a license or whose license has been revoked or is under suspension, or who has failed to renew his or her license while it was under suspension, or who has been a manager, administrator, owner member, officer, director, associate, or partner of any partnership, corporation, firm, or association whose application for a license has been denied or revoked, is under suspension or has been placed on probation, and while acting as the manger, administrator, owner, member, officer, director, associate, or partner had knowledge or knowingly participated in any conduct for which the license was denied, revoked, suspended, or placed on probation, shall be prohibited from serving as a manger, administrator, owner, member, officer, director, associate, or partner of a licensee as follows:

(1) Where a probationary license is issued or where an existing license is placed on probation, this prohibition shall remain in effect for a period not to exceed five years.

(2) Where the license is denied or revoked, the prohibition shall continue until the license is issued or reinstated.

20. Health and Safety Code section 111250 states:

Any drug or device is adulterated if it consists, in whole or in part, of any filthy, putrid, or decomposed substance.

21. Health and Safety Code section 111255 states:

Any drug or device is adulterated if it has been produced, prepared, packed, or held under conditions whereby it may have been contaminated with filth, or whereby it may have been rendered injurious to health.

22. Health and Safety Code section 111295 states:

It is unlawful for any person to manufacture, sell, deliver, hold or offer for sale any drug or device that is adulterated.

23. Section 501(a)(2)(A) of the Federal Food, Drug and Cosmetic Act (21 U.S.C. 351(a)(2)(A)) states:

A drug or device shall be deemed to be adulterated if it has been prepared, packed, or held under insanitary conditions whereby it may have been contaminated with filth, or whereby it may have been rendered injurious to health.

REGULATORY PROVISIONS

24. California Code of Regulations, title 16, section 1714, subdivision (d) states:

Each pharmacist while on duty shall be responsible for the security of the prescription department, including provisions for effective control against theft or diversion of dangerous drugs and devices, and records for such drugs and devices. Possession of a key to the pharmacy where dangerous drugs and controlled substances are stored shall be restricted to a pharmacist.

25. California Code of Regulations, title 16, section 1735.1, subdivision (ae) states:

"Quality" means the absence of harmful levels of contaminants, including filth, putrid, or decomposed substances, the absence of active ingredients other than those listed on the label, and the absence of inactive ingredients other than those listed on the master formula document.

26. California Code of Regulations, title 16, section 1735.2, subdivisions (e), (g) and (h) state:

(e) A drug preparation shall not be compounded until the pharmacy has first prepared a written master formula document that includes at least the following elements:

(1) Active ingredients to be used.

(2) Equipment to be used.

(3) The maximum allowable beyond use date for the preparation, and the rationale or reference source justifying its determination.

(4) Inactive ingredients to be used.

(5) Specific and essential compounding steps used to prepare the drug.

(6) Quality reviews required at each step in preparation of the drug.

(7) Post-compounding process or procedures required, if any.

(8) Instructions for storage and handling of the compounded drug preparation.

...

(g) The pharmacist performing or supervising compounding is responsible for the integrity, potency, quality, and labeled strength of a compounded drug preparation until the beyond use date indicated on the label, so long as label instructions for storage and handling are followed after the preparation is dispensed.

(h) All chemicals, bulk drug substances, drug products, and other components used for drug compounding shall be stored and used according to compendia and other applicable requirements to maintain their integrity, potency, quality and labeled strength.

27. California Code of Regulations, title 16, section 1735.3, subdivision (a)(2)(F) states:

For each compounded drug preparation, pharmacy records shall include: A compounding log consisting of a single document containing all of the following: the manufacturer, expiration date and lot number of each component. If the manufacturer name is demonstrably unavailable, the name of the supplier may be substituted. If the manufacturer does not supply an expiration date for any component, the records shall include the date of receipt of the component in the pharmacy, and the limitations of section 1735.2, subdivision (l) shall apply.

28. California Code of Regulations, title 16, section 1735.5 states:

(a) Any pharmacy engaged in compounding shall maintain written policies and procedures for compounding that establishes procurement procedures, methodologies for the formulation and compounding of drugs, facilities and equipment cleaning, maintenance, operation, and other standard operating procedures related to compounding. Any material failure to follow the pharmacy's written policies and procedures shall constitute a basis for disciplinary action.

(b) The policies and procedures shall be reviewed and such review shall be documented on an annual basis by the pharmacist-in-charge. The policies and procedures shall be updated whenever changes in policies and procedures are implemented.

(c) The policies and procedures shall include at least the following:

(1) Procedures for notifying staff assigned to compounding duties of any changes in policies or procedures.

(2) A written plan for recall of a dispensed compounded drug preparation where subsequent information demonstrates the potential for adverse effects with continued use. The plan shall ensure that all affected doses can be accounted for during the recall and shall provide steps to identify which patients received the affected lot or compounded drug preparation(s).

(3) Procedures for maintaining, storing, calibrating, cleaning, and disinfecting equipment used in compounding, and for training on these procedures as part of the staff training and competency evaluation process.

(4) Procedures for evaluating, maintaining, certifying, cleaning, and disinfecting the facility (physical plant) used for compounding, and for training on these procedures as part of the staff training and competency evaluation process.

(5) Documentation of the methodology used to validate integrity, potency,

quality, and labeled strength of compounded drug preparations. The methodology must be appropriate to compounded drug preparations.

(6) Documentation of the methodology and rationale or reference source used to determine appropriate beyond use dates for compounded drug preparations.

(7) Dates and signatures reflecting all annual reviews of the policies and procedures by the pharmacist-in-charge.

(8) Dates and signatures accompanying any revisions to the policies and procedures approved by the pharmacist-in-charge.

(9) Policies and procedures for storage of compounded drug preparations in the pharmacy and daily documentation of all room, refrigerator, and freezer temperatures within the pharmacy.

(10) Policies and procedures regarding ensuring appropriate functioning of refrigeration devices, monitoring refrigeration device temperatures, and actions to take regarding any out of range temperature variations within the pharmacy.

(11) Policies and procedures for proper garbing when compounding with hazardous products. This shall include when to utilize double shoe covers.

29. California Code of Regulations, title 16, section 1735.8, subdivision (a) states:

Any pharmacy engaged in compounding shall maintain, as part of its written policies and procedures, a written quality assurance plan designed to monitor and ensure the integrity, potency, quality, and labeled strength of compounded drug preparations.

30. California Code of Regulations, title 16, section 1751.3, subdivision (a) states:

Any pharmacy engaged in compounding sterile drug preparations shall maintain written policies and procedures for compounding. Any material failure to follow the pharmacy's written policies and procedures shall constitute a basis for disciplinary action. In addition to the elements required by section 1735.5, there shall be written policies and procedures regarding the following:

(1) Action levels for colony-forming units (CFUs) detected during viable surface sampling, glove fingertip, and viable air sampling and actions to be taken when the levels are exceeded.

(2) Airflow considerations and pressure differential monitoring.

(3) An environmental sampling plan and procedures specific to viable air, surface and gloved fingertip sampling as well as nonviable particle sampling.

(4) Cleaning and maintenance of ISO environments and segregated compounding areas.

(5) Compounded sterile drug preparation stability and beyond use dating.

(6) Compounding, filling, and labeling of sterile drug preparations.

(7) Daily and monthly cleaning and disinfection schedule for the controlled

areas and any equipment in the controlled area as specified in section 1751.4.

(8) Depyrogenation of glassware (if applicable).

(9) Facility management including certification and maintenance of controlled environments and related equipment.

(10) For compounding aseptic isolators and compounding aseptic containment isolators, documentation of the manufacturer's recommended purge time.

(11) Hand hygiene and garbing.

(12) Labeling of the sterile compounded drug preparations based on the intended route of administration and recommended rate of administration.

(13) Methods by which the supervising pharmacist will fulfill his or her responsibility to ensure the quality of compounded drug preparations.

(14) Orientation, training, and competency evaluation of staff in all aspects of the preparation of sterile drug preparations including didactic training and knowledge/competency assessments that include at minimum: hand hygiene and garbing; decontamination (where applicable); cleaning and disinfection of controlled compounding areas; and proper aseptic technique, demonstrated through the use of a media-fill test performed by applicable personnel; and aseptic area practices.

(15) Preparing sterile compounded drug preparations from non-sterile components (if applicable). This shall include sterilization method suitability testing for each master formula document.

(16) Procedures for handling, compounding and disposal of hazardous agents. The written policies and procedures shall describe the pharmacy protocols for cleanups and spills in conformity with local health jurisdiction standards.

(17) Procedures for handling, compounding and disposal of infectious materials. The written policies and procedures shall describe the pharmacy protocols for cleanups and spills in conformity with local health jurisdiction standards.

(18) Proper use of equipment and supplies.

(19) Quality assurance program compliant with sections 1711, 1735.8 and 1751.7.

(20) Record keeping requirements.

(21) Temperature monitoring in compounding and controlled storage areas.

(22) The determination and approval by a pharmacist of ingredients and the compounding process for each preparation before compounding begins.

(23) Use of automated compounding devices (if applicable).

(24) Visual inspection and other final quality checks of sterile drug preparations.

///

31. California Code of Regulations, title 16, section 1751.4, subdivision (f) states:

Pharmacies preparing-g sterile compounded preparations require the use of a PEC that provides ISO Class 5 air or better air quality. Certification and testing of primary and secondary engineering controls shall be performed no less than every six months and whenever the device or area designated for compounding is relocated, altered or a service to the facility is performed that would impact the device or area. Certification must be completed by a qualified technician who is familiar with certification methods and procedures in accordance with CETA Certification Guide for Sterile Compounding Facilities (CAG-003-2006-13, Revised May 20, 2015), which is hereby incorporated by reference. Certification records must be retained for at least 3 years. Unidirectional compounding aseptic isolators or compounding aseptic containment isolators may be used outside of an ISO Class 7 cleanroom if the isolator is certified to meet the following criteria:

(1) Particle counts sampled approximately 6-12 inches upstream of the critical exposure site shall maintain ISO Class 5 levels during compounding operations.

(2) Not more than 3520 particles (0.5 um and larger) per cubic meter shall be counted during material transfer, with the particle counter probe located as near to the transfer door as possible without obstructing transfer.

(3) Recovery time to achieve ISO Class 5 air quality shall be documented and internal procedures developed to ensure that adequate recovery time is allowed after material transfer before and during compounding operations. Compounding aseptic isolators that do not meet the requirements as outlined in this subdivision or are not located within an ISO Class 7 cleanroom may only be used to compound preparations that meet the criteria specified in accordance with subdivision (d) of Section 1751.8 of Title 16, Division 17, of the California Code of Regulations.

COST RECOVERY

32. Section 125.3 of the Code provides, in pertinent part, that the Board may request the administrative law judge to direct a licentiate found to have committed a violation or violations of the licensing act to pay a sum not to exceed the reasonable costs of the investigation and enforcement of the case.

DEFINITIONS

33. Hydrogen peroxide infusions may be used to treat inflammation, are not Food and Drug Administration (FDA) approved for any indication, and are dangerous drugs as defined under Business and Professions Code section 4022.

34. Dimercapto-propane sulfonic acid (DMPS) infusions may be used to treat mercury and other metal poisoning, are not FDA approved for any indication, and are dangerous drugs as defined under Business and Professions Code section 4022.

///

35. Glutathione infusions are prescribed to improve "wellness and health," are not FDA approved for any indication and are dangerous drugs as defined under Business and Professions Code section 4022.

36. Lipoic acid infusions may be used to treat nerve pain, are not FDA approved for any indication and are dangerous drugs as defined under Business and Professions Code section 4022.

37. Methylcobalamin infusions may be used to treat neurological conditions and pain, are not FDA approved for any indication, and are dangerous drugs as defined by Business and Professions Code section 4022.

38. Disodium nicotinamide adenine dinucleotide (NADH) infusions may be used to treat Alzheimer's disease and dementia, are not FDA approved for any indication, and are dangerous drugs as defined by Business and Professions Code section 4022.

39. Taurine infusions are prescribed to improve "wellness and health," are not FDA approved for any indication and are dangerous drugs as defined under Business and Professions Code section 4022.

FACTUAL ALLEGATIONS

40. MCPS is a sterile compounding pharmacy located in Santa Ana, California. It compounds non-sterile to sterile compounded sterile preparations and furnishes sterile injectable drugs (i.e., infusion therapies) to physicians and clinics for administration to patients. At all times relevant herein, Si Pham was the Pharmacist-in-Charge and Ronald McGuff was the sole shareholder and an officer of the corporation that owns MCPS. Board inspections revealed the following violations of Pharmacy Law.

41. Pharmacy technicians, facility foremen, plant managers, corporate representatives, chemists, engineers and/or other non-licensed staff possessed keys and alarm codes for areas where dangerous drugs were compounded and accessed those areas when pharmacists were not present.

42. In 2017 and 2018, MCPS received reports of adverse drug effects (i.e., headaches, high fevers, diarrhea, extreme fatigue, loss of consciousness, chills and nausea) suffered by patients after being administered infusions of lipoic acid compounded and dispensed by MCPS.

43. In January 2019, the Board issued Compounding Safety Alerts about the use of inappropriate ingredients to compound sterile injectable drugs and strongly encouraged sterile compounding pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action was required. The Board noted that dietary supplements, food grade chemicals, and cosmetic grade ingredients may have as much as ten times more impurities when compared to pharmaceutical grade ingredients, increasing the risk of patient harm. On February 1, 2019, the FDA warned compounders not to use a dietary grade bulk substance distributed by a manufacturer to compound sterile injectable drugs for patients due to higher levels of endotoxins in that dietary grade bulk substance.

44. MCPS compounded and dispensed sterile injectable drugs including hydrogen peroxide 3%, lipoic acid 40mg/ml, DMPS 50mg/ml, NADH 50 mg/ml and methylcobalamin 5mg/ml 30ml using ingredients (i.e., dietary grade, topical grade and ungraded bulk substances) likely containing higher levels of contaminates or impurities, including heavy metals, bacteria and mold and higher bioburden levels (i.e., the number of bacteria living on a surface or in a substance that has not been sterilized), than pharmaceutical grade ingredients, therefore potentially placing patients at risk.

45. On November 13, 2019, the Board issued an Order of Correction to MCPS for this unsafe practice and directed Si Pham to send a plan of correction.

46. On November 22, 2019, the FDA issued a Form FDA 483 to MCPS observing among other violations, that MCPS compounded and dispensed sterile injectable drugs with non-pharmaceutical grade ingredients containing high levels of contaminants (MCPS "currently uses …dietary grade bulk substances in sterile injectable drug products") and observed that the use of non-pharmaceutical grade bulk substances in MCPS's products resulted in a recall of Lipoic Acid 40 mg/ml, 30 ml vials due to a "filmy wispy precipitate" found in on-hand vials of released product and the discontinued production of NADH disodium 50 mg/ml due to out of specification endotoxin results.

47. During the "closeout" meeting on November 22, 2019, both the FDA and Board informed Ronald McGuff and Si Pham about the safety risks associated with MCPS's practice of

compounding sterile injectable drugs with inappropriate ingredients containing higher levels of contaminants and higher bioburden levels than pharmaceutical grade ingredients.

48. On December 5, 2019, MCPS wrote the Board that it was MCPS's "continuing desire and intention to comply with all requirements of California pharmacy laws and expectations of the Board of Pharmacy" and it had stopped the dispensing and compounding of sterile preparations compounded with dietary grade and non-compendial grade raw materials "regardless of whether the bulk drug substance appears on the FDA's Category 1 list until further guidance and/or clarification from both the FDA and CA BOP." On December 16, 2019, MCPS wrote the FDA that "[i]n the near term, MCPS has suspended compounding drug preparations containing the components listed in the observation and all USP dietary grade supplements. Drug preparation lots compounded with the listed components will not be dispensed...Corrective Actions for Observation 7: Suspend compounding and dispensing drug preparations utilizing non-pharmaceutical grade components until pharmaceutical grade replacements can be procured or until alternate assurance of material quality and fitness for intended used can be established."

49. However, MCPS continued to compound and dispense a large volume of sterile injectable drugs from inappropriate ingredients, including methylcobalamin and lipoic acid after making those representations to the Board and FDA and receiving the Compounding Safety Alerts.

50. MCPS compounded sterile injectable lipoic acid 40mg/ml 30 ml MDV (Lot No. 18M0991) and DMPS 50mg/ml 5ml SDV (Lot No. 18J1081) containing particulate or precipitate but failed to provide the Board with notice of the recalls of those drugs within twelve hours as required.

51. Patients reported to MCPS that they suffered adverse drug effects (i.e., excruciating pain) from one of its sterile injectable drug products, vitamin D3 10,00IU/ML 30ML MDV (Lot No. 20F1501:0920) but it failed to report those adverse effects to the Board within twelve hours as required.

///

///

52. MCPS compounded sterile injectable chromium (Lot No. 19K411) without a master formula describing the equipment to be used, inactive ingredients to be used and the specific and essential compounding steps used to prepare that infusion.

53. MCPS did not possess all of the policies and procedures required to compound sterile injectable drugs, including procedures for quality assurance programs, cleaning and maintenance of ISO environments and for maintaining, storing, calibrating, cleaning, and disinfecting equipment used in compounding, and for training on these procedures as part of the staff training and competency evaluation process. It also did not possess a written quality assurance plan designed to monitor and ensure the integrity, potency, quality, and labeled strength of compounded drug preparations.

54. From January 17 through February 23, 2018, there was a 12.6% patch in the HEPA filter of MCPS's primary engineering control devices in Room 107 which was not completely repaired. Yet, MCPS continued to compound at least ten sterile injectable drugs with that primary engineering control device before it was re-certified and tested on February 23, 2018.

55. In November 2019, pharmacy technicians performed prefatory compounding functions, (washed and prepared empty vials) without a pharmacist being present on the premises.

56. In August and September 2020, MCPS failed to document the manufacturer of at least one component for the sterile injectable drug, methylcobalamin.

57. Despite the filing of the Accusation, the discussions with the FDA and Board about safety risks associated with using inappropriate ingredients, the receipt of the FDA Form 483, the receipt of the Board's Order of Correction and the Written Notice and Respondents' promises to cease compounding and dispensing sterile injectable drugs with dietary grade and non-compendial substances, from at least June 1, 2021 through December 1, 2021, MCPS continued to compound and dispense sterile injectable drugs, methylcobalamin 5mg/mL, glutathione 200mg/mL, taurine, lipoic acid and DMPS using inappropriate ingredients (i.e., dietary grade and ungraded bulk substances) likely containing higher levels of contaminates or impurities, including heavy metals, bacteria and mold and higher bioburden levels (i.e., the number of bacteria living

on a surface or in a substance that has not been sterilized), than pharmaceutical grade ingredients, therefore potentially placing patients at risk.

58. In 2021, MCPS received reports of at least six adverse drug effects, including headaches, fever, chills and nausea from sterile injectable drugs compounded and dispensed, but failed to timely report at least four of those adverse drug effects to the Board. It also failed to report at least four of the adverse drug effects immediately to the MedWatch Program of the FDA.

59. On January 24, 2022, the Board issued an Order of Correction to Respondents for their continued use of ingredients in sterile injectable products that lacked quality and a Written Notice for the failure to report adverse drug effects to the Board within twelve hours and immediately to the MedWatch Program of the FDA.

FIRST CAUSE FOR DISCIPLINE

(Manufactured, Held, Sold, Offered for Sale and Delivered Adulterated Drugs)

60. Respondents are subject to disciplinary action under Code section 4301, subdivision (j) and (o) for violating Health and Safety Code section 111295 and Business and Professions Code section 4169, subdivision (a)(2), in that they manufactured, held (including under insanitary conditions), sold, offered for sale and/or delivered drugs that were adulterated within the meaning of Health & Safety Code sections 111250 and/or 111255 and/or 501(a)(2)(A) of the Federal Food Drug and Cosmetic Act (21 U.SC. 351(a)(2)(A)), as set forth above in paragraphs 40 through 59.

SECOND CAUSE FOR DISCIPLINE

(Compounded Sterile Injectable Drugs Lacking in Quality)

61. Respondents are subject to disciplinary action under Code section 4301, subdivision (j) and (o) for violating California Code of Regulations, title 16, section 1735.2, subdivisions (g) and (h), in that they compounded sterile injectable drug products lacking in quality as defined by California Code of Regulations, title 16, section 1735.1, subdivision (ae) and as set forth above in paragraphs 40 through 59.

///

///

THIRD CAUSE FOR DISCIPLINE

(Dishonest Acts)

62. Respondents are subject to disciplinary action under Code section 4301, subdivision (f) in that those Respondents committed dishonest acts when they falsely claimed that they would cease compounding and dispensing sterile injectable drugs from non-pharmaceutical grade ingredients, as set forth above in paragraphs 40 through 59.

FOURTH CAUSE FOR DISCIPLINE

(Made Documents that Falsely Represent Facts)

63. Respondents subject to disciplinary action under Code section 4301, subdivision (g) in that those Respondents made documents that falsely represented the existence of a state of facts when they represented in writing that they would cease compounding and dispensing sterile injectable drugs from non-pharmaceutical grade ingredients, as set forth above in paragraphs 40 through 59.

FIFTH CAUSE FOR DISCIPLINE

(Lack of Security for Pharmacy Premises)

64. Respondents are subject to disciplinary action under Code section 4301, subdivision (j) and (o) for violating Business and Professions Code section 4116, subdivision (a) and California Code of Regulations, title 16, section 1714, subdivision (d), in that pharmacy technicians and unlicensed personnel had access to pharmacy premises where dangerous drugs were compounded without a pharmacist being present and had keys to all of the pharmacy premises, as set forth above in paragraphs 40 through 59.

SIXTH CAUSE FOR DISCIPLINE

(Lack of Supervision of Pharmacy Technicians)

65. Respondents are subject to disciplinary action under Code section 4301, subdivision (j) and (o) for violating Business and Professions Code section 4115, subdivision (a) as defined by Business and Professions Code section 4023.5, in that pharmacy technicians washed and prepared empty drug vials without a pharmacist on the premises, as set forth above in paragraphs 40 through 59.

SEVENTH CAUSE FOR DISCIPLINE

(Failure to Notify Board of Recall of Sterile Drug Products)

66. Respondents are subject to disciplinary action under Code section 4301, subdivision (j) and (o) for violating Business and Professions Code sections 4127.1, subdivision (e)(3) and 4127.8, subdivision (a) , in that they failed to provide to the Board, within 12 hours, recall notices issued by MCPS for sterile drug products it had compounded, as set forth above in paragraphs 40 through 59.

EIGHTH CAUSE FOR DISCIPLINE

(Failure to Report Adverse Drug Effects of Sterile Drug Product)

67. Respondents are subject to disciplinary action under Code section 4301, subdivision (j) and (o) for violating Business and Professions Code section 4127.1, subdivision (f), in that they failed to report to the Board within 12 hours and immediately to the MedWatch program of the FDA, adverse drug effects reported to MCPS, about its sterile injectable drug products, as set forth above in paragraphs 40 through 59.

NINTH CAUSE FOR DISCIPLINE

(Failed to Possess All Policies and Procedures and a Written Quality Assurance Plan for Compounding Sterile Drug Preparations)

68. Respondents are subject to disciplinary action under Code section 4301, subdivision (o), for violating California Code of Regulations, title 16, sections 1735.5, 1735.8, subdivision (a) and 1751.3, subdivision (a) because they failed to have all required written policies and procedures for compounding sterile drug preparations and a written quality assurance plan, as set forth in paragraphs 40 through 59 above.

TENTH CAUSE FOR DISCIPLINE

(Compounded with Incomplete Master Formulas)

69. Respondents are subject to disciplinary action under Code section 4301, subdivision (o), for violating California Code of Regulations, title 16, section 1735.2, subdivision (e), in that they compounded sterile injectable drug preparations without a complete written master formula, as set forth in paragraphs 40 through 59 above.

ELEVENTH CAUSE FOR DISCIPLINE

(Failure to Complete Compounding Logs)

70. Respondents are subject to disciplinary action under Code section 4301, subdivision (o), for violating California Code of Regulations, title 16, section 1735.3, subdivision (a)(2)(F), in that they compounded sterile injectable drug preparations without preparing complete compounding logs, as set forth in paragraphs 40 through 59 above.

TWELFTH CAUSE FOR DISCIPLINE

(Compounded Sterile Drug Products in Uncertified Primary Engineering Control)

71. Respondents are subject to disciplinary action under Code section 4301, subdivision (o), for violating California Code of Regulations, title 16, section 1751.4, subdivision (f), in that they compounded sterile injectable drug preparations using an inappropriate primary engineering control device, as set forth in paragraphs 40 through 59 above.

THIRTEENTH CAUSE FOR DISCIPLINE

(Inappropriate Exercise of Education, Training or Experience as a Pharmacist Against Respondent Si Pham)

72. Respondent Si Pham is subject to disciplinary action under Code section 4301, subdivision (o), for violating Business and Professions Code section 4306.5, subdivision (a) for his inappropriate exercise of his pharmacist education, training, or experience, as set forth in paragraphs 40 through 59.

FOURTEENTH CAUSE FOR DISCIPLINE

(Unprofessional Conduct)

73. Respondents are subject to disciplinary action under Code section 4301 for unprofessional conduct in that they engaged in the activities set forth in paragraphs 40 through 59 above.

DISCIPLINE CONSIDERATIONS

74. To determine the degree of discipline, if any, to be imposed on Respondents, Complainant alleges that on or about April 30, 2019, the Board issued Citation Number CI 2017 80272 to MCPS under Business and Professions Code section 4301, subdivision (n) because it

was disciplined by the Alabama Board of Pharmacy for selling, offering to sell, compounding and/or dispensed drugs into Alabama without a permit. That Citation is now final.

OTHER MATTERS

75. Pursuant to Code section 4307, if discipline is imposed on Pharmacy Permit No. PHY 43950 and/or Sterile Compounding License No. LSC 99004 issued to McGuff Compounding Pharmacy Services Inc., it shall be prohibited from serving as a manager, administrator, owner, member, officer, director, associate, or partner of a licensee for five years if the Pharmacy Permit and/or Sterile Compounding License are placed on probation or until the Pharmacy Permit and/or Sterile Compounding License are reinstated if they are revoked.

76. Pursuant to Code section 4307, if discipline is imposed on Pharmacy Permit No. PHY 43950 and/or Sterile Compounding License No. LSC 99004 issued to McGuff Compounding Pharmacy Services Inc. while Ronald M. McGuff has been a manager or owner and had knowledge of or knowingly participated in any conduct for which the licensees were disciplined, he shall be prohibited from serving as a manager, administrator, owner, member, officer, director, associate, or partner of a licensee for five years if the Pharmacy Permit and/or Sterile Compounding License are placed on probation or until the Pharmacy Permit and/or Sterile Compounding Licenses are reinstated, if they are revoked.

77. Pursuant to Code section 4307, if discipline is imposed on Pharmacy Permit No. PHY 43950 and/or Sterile Compounding License No. LSC 99004 issued to McGuff Compounding Pharmacy Services Inc. while Si Van Pham has been a manager and had knowledge of or knowingly participated in any conduct for which the licensees were disciplined, he shall be prohibited from serving as a manager, administrator, owner, member, officer, director, associate, or partner of a licensee for five years if the Pharmacy Permit and/or Sterile Compounding License are placed on probation or until the Pharmacy Permit and/or Sterile Compounding License are reinstated, if they are revoked.

78. Pursuant to Code section 4307, if discipline is imposed on Pharmacist License No. RPH 49833 issued to Si Van Pham, he shall be prohibited from serving as a manager, administrator, owner, member, officer, director, associate, or partner of a licensee for five years if

the Pharmacist License is placed on probation or until the Pharmacist License is reinstated, if it is revoked.

PRAYER

WHEREFORE, Complainant requests that a hearing be held on the matters herein alleged, and that following the hearing, the Board of Pharmacy issue a decision:

1. Revoking or suspending Pharmacy Permit Number PHY 43950, issued to McGuff Compounding Pharmacy Services Inc.;

2. Revoking or suspending Sterile Compounding License Number LSC 99004, issued to McGuff Compounding Pharmacy Services Inc.;

3. Revoking or suspending Pharmacist License Number RPH 49833, issued to Si Van Pham;

4. Prohibiting McGuff Compounding Pharmacy Services Inc. from serving as a manager, administrator, owner, member, officer, director, associate, or partner of a licensee for five years if Pharmacy Permit Number PHY 43950 and/or Sterile Compounding License Number 99004 are placed on probation or until the Pharmacy Permit and/or Sterile Compounding License are reinstated, if they are revoked;

5. Prohibiting Ronald M. McGuff from serving as a manager, administrator, owner, member, officer, director, associate, or partner of a licensee for five years if Pharmacy Permit Number PHY 43950 and/or Sterile Compounding License Number LSC 99004 are placed on probation or until the Pharmacy Permit and/or Sterile Compounding License are reinstated, if they are revoked;

6. Prohibiting Si Van Pham from serving as a manager, administrator, owner, member, officer, director, associate, or partner of a licensee for five years if Pharmacy Permit Number PHY 43950 and/or Sterile Compounding License Number LSC 99004 are placed on probation or until the Pharmacy Permit and/or Sterile Compounding License are reinstated, if they are revoked;

///

///

7. Prohibiting Si Van Pham from serving as a manager, administrator, owner, member, officer, director, associate, or partner of a licensee for five years if Pharmacist License Number RPH 49833 is placed on probation or until the Pharmacist License is reinstated, if it is revoked;

8. Ordering McGuff Compounding Pharmacy Services Inc. and Si Van Pham to pay the Board of Pharmacy the reasonable costs of the investigation and enforcement of this case, pursuant to Business and Professions Code section 125.3; and,

9. Taking such other and further action as deemed necessary and proper.

SD2021801578/83354838.docx

Members of the Board of Pharmacy:

We, the undersigned, write to you from the perspective of Board licensees who agreed to the imposition of discipline on our pharmacy and pharmacist licenses in the case titled *In the Matter of the Accusation Against McGuff Compounding Pharmacy Services, Inc., et al.*, Board Case No. 7176. We reached a settlement of the Accusation, of which this letter is part.

We wish to forthrightly and unequivocally state, here, that as persons with significant experience in pharmacy compounding, we agree with and support the following statements:

- All compounding pharmacies located in California or which provide services to California patients are governed both by relevant sections of federal statutes and regulations applicable to pharmacy compounding, including but not limited to section 501 [21 U.S.C. § 351] of the Federal Food, Drug, and Cosmetic Act (FDCA), which defines "adulterated" drugs to include those prepared, packed, or held under insanitary conditions, and FDCA section 503A [21 U.S.C. § 353a], which sets forth several federal requirements to engage in traditional pharmacy compounding, and by the California Pharmacy Law and its associated regulations;

- Further, best practices demand that section 503A traditional compounding pharmacies not use bulk drug substances that are not graded, nor those not designated by their manufacturers for pharmaceutical use, nor those lacking an appropriate USP/NF monograph;

- Best practices further demand that section 503A traditional compounding pharmacies only use bulk drug substances that: (1) comply with the standards of an applicable United States Pharmacopoeia or National Formulary monograph; (2) if such monograph does not exist, are drug substances that are components of FDA-approved drugs; and (3) if such monograph does not exist and the drug substance is not a component of an FDA-approved drug, then it must be on a list developed by the Secretary through regulations issued by the Secretary under subsection (c); and

- Best practices also demand that section 503A traditional compounding pharmacies: (1) only use bulk drug substances that are manufactured by an FDA-registered establishment; and (2) that are accompanied by valid certificates of analysis for each bulk drug substance.

We look forward to working with the FDA and the Board to be sure that Californians have access to prescribed medications that are held to the highest degree of quality assurance.

McGuff Compounding Pharmacy Services, Inc.

Ronald McGuff, CEO Date

Si Pham, Pharmacist-In-Charge Date

BEFORE THE NEVADA STATE BOARD OF PHARMACY

NEVADA STATE BOARD OF PHARMACY, **Petitioner,** **v.** **McGUFF COMPOUNDING PHARMACY SERVICES, INC,** **Pharmacy License No. PH01563,** **Respondent.**	**Case Nos. 23-070-PH-O** **STATEMENT TO THE RESPONDENT AND NOTICE OF HEARING**

TO THE RESPONDENT ABOVE-NAMED: PLEASE TAKE NOTICE THAT:

1. Pursuant to the authority and jurisdiction conferred upon the Nevada State Board of Pharmacy ("Board") by NRS 639.241 to NRS 639.2576, inclusive, and NRS chapter 233B and 622A, a Notice of Intended Action and Accusation ("Accusation") has been filed with the Board by the Petitioner, J. David Wuest, Executive Secretary for the Board, alleging grounds for imposition of disciplinary action by the Board against you.

2. **A hearing on the Accusation filed against you has been scheduled before the Board for Wednesday, April 16, 2025, at 9:00 AM PST, or soon thereafter at the following location:**

Hyatt Place
1790 E Plumb Ln
Reno, NV 89502

3. At the hearing, you have the right to show the Nevada State Board of Pharmacy that your conduct, as alleged above, complies with all lawful requirements. NRS 233B.127(3). At the hearing, you are entitled to present argument and evidence including witness testimony on all issues involved, either personally or through counsel. NRS 233B.121; NRS 233B.127(3); NRS 622A.300(1) and (3); NRS 639.241; NRS 639.246. To do so, you must complete, and file two (2) copies of the Answer and Notice of Defense served herewith, within twenty (20) days of your receipt of this Statement and Notice, and the Accusation. NRS 622A.320; NRS 639.243.

You may file your answer electronically by emailing a copy of your Answer and Notice of Defense to the Board's coordinating staff and its prosecuting attorney at the email addresses below:

TeamBC@Pharmacy.nv.gov and **bkandt@pharmacy.nv.gov**

Alternatively, you may file your Answer and Notice of Defense by mailing two (2) copies to Board's Reno office located at 985 Damonte Ranch Parkway – Suite 206, Reno, Nevada 89521. Upon receipt of your Answer and Notice of Defense, a file-stamped copy will be returned to you.

4. Pursuant to NRS 241.033 and 241.034, please be advised that the hearing is a public meeting, and the Board may, without further notice, take administrative action against you if the Board determines that such administrative action is warranted after considering your character, alleged misconduct, professional competence, or physical or mental health. The Board at its discretion may go into closed session to consider your character, alleged misconduct, professional competence, or physical or mental health. You may attend any closed session, have an attorney or other representative of your choosing present during any closed session, present written evidence, provide testimony, and present witnesses relating to your character, alleged misconduct, professional competence, or physical or mental health during any closed session.

5. Your failure to timely file an Answer and Notice of Defense constitutes an admission of the charges and waiver of the right to a hearing. NRS 639.244. If you fail to appear at the hearing and the Board finds that you were given sufficient legal notice of the hearing, the Board may accept the allegations as true and may proceed to consider the case and render a decision. NRS 622A.350.

DATED this 28th day of February 2025.

J. David Wuest, R.Ph., Executive Secretary
Nevada State Board of Pharmacy

BEFORE THE NEVADA STATE BOARD OF PHARMACY

NEVADA STATE BOARD OF PHARMACY, **Petitioner,** **v.** **McGUFF COMPOUNDING PHARMACY SERVICES, INC,** **Pharmacy License No. PH01563,** **Respondent.**	**Case No. 23-070-PH-O** **ANSWER AND NOTICE OF DEFENSE**

Respondent above named, in answer to the Notice of Intended Action and Accusation filed in the above-entitled matter before the Nevada State Board of Pharmacy, declares:

1. That his/her objection to the Notice of Intended Action and Accusation as being incomplete or failing to state clearly the charges against him/her, is hereby interposed on the following grounds: (State specific objections or insert "none").

2. That, in answer to the Notice of Intended Action and Accusation, he/she admits, denies and alleges as follows:

I hereby declare, under penalty of perjury, that the foregoing Answer and Notice of Defense, and all facts therein stated, are true and correct to the best of my knowledge.

DATED this _____ day of _____ 2025.

AUTHORIZED REPRESENTATIVE FOR McGUFF COMPOUNDING PHARMACY SERVICES, INC.

CERTIFICATE OF SERVICE

I certify that I am an employee of the Nevada State Board of Pharmacy, and that on this 12th day of March 2025, I served a true and correct copy of the foregoing document by Certified U.S. Mail and Standard U.S. mail to the following:

NEVADA STATE BOARD
OF PHARMACY

BEFORE THE NEVADA STATE BOARD OF PHARMACY

NEVADA STATE BOARD OF PHARMACY, **Petitioner,** **v.** **McGUFF COMPOUNDING PHARMACY SERVICES, INC,** **Pharmacy License No. PH01563, and** **McGUFF COMPANY, INC.,** **Wholesale License No. WH01300,** **Respondents.**	**CASE NOS. 23-070-PH-O** **23-070-WH-O** **NOTICE OF INTENDED ACTION AND ACCUSATION**

J. David Wuest, in his official capacity as Executive Secretary of the Nevada State Board of Pharmacy, makes the following that will serve as both a notice of intended action under NRS 233B.127(3) and as an accusation under NRS 622A.300 and NRS 639.241.

JURISDICTION

1. The Nevada State Board of Pharmacy (Board) has jurisdiction over this matter because at the time of the events alleged herein, Respondent McGuff Compounding Pharmacy Services, Inc, Pharmacy License No. PH01563 (McGuff Pharmacy), located in Santa Ana, California, was a pharmacy licensed by the Board, and McGuff Company, Inc, Wholesale License No. WH01300 (McGuff Company), located in Santa Ana, California, was a medical products wholesale distributor licensed by the Board.

FACTUAL ALLEGATIONS

2. McGuff Pharmacy and McGuff Company are both owned by Ronald M. McGuff.

3. On or about March 1, 2023, the California State Board of Pharmacy entered an Order in Case Nol. 7176 approving a stipulated settlement for voluntary surrender of Respondent McGuff Pharmacy's Pharmacy Permit No. PHY 43950 and Sterile Compounding License No. LSC 99004, for numerous violations of federal and California state law related to compounding drug products, including, without limitation, various provisions of 21 U.S.C. § 353a, 42 U.S.C. §

262, Cal. Business and Professions Code § 4000 *et seq.*, and Cal. Code of Regulations, Title 16, Section 1700 *et seq.* (SEE EXHBIT A HERETO).

APPLICABLE LAW

4. A pharmacy engaged in the practice of compounding drug products and dispensing compounded drug products in Nevada shall comply with the provisions of NAC 639.661 -.690, *inclusive*, and related federal law, 21 U.S.C. § 353a, establishing national standards for compounding medications. *See also* 42 U.S.C. § 262 (regulation of biological products).

5. Performing any duties as a license holder in an incompetent, unskillful or negligent manner constitutes unprofessional conduct or conduct contrary to the public interest pursuant to NAC 639.945(1)(i) and is grounds for suspension or revocation of any license issued by the Board. NRS 639.210(4).

6. The Board may suspend or revoke a license if the holder has violated any provision of the Federal Food, Drug and Cosmetic Act or any other federal law or regulation relating to prescription drugs. NRS 639.210(11).

7. The Board may suspend or revoke a license if the holder has violated any law or regulation relating to drugs, the manufacture or distribution of drugs or the practice of pharmacy. NRS 639.210(12).

8. Any violation of any of the provisions of NRS Chapter 639 or NAC Chapter 639 by personnel of the pharmacy is cause for the suspension or revocation of the license of the pharmacy by the Board. NRS 639.230(5); NAC 639.702. Further, the owner of any business or facility licensed, certified or registered by the Board is responsible for the acts of all personnel in his or her employ. NAC 639.945(3).

COUNT ONE

Violation of Federal and State Compounding Law/Unprofessional Conduct

8. Respondents, their owner, and/or their personnel engaged in unprofessional conduct as defined in NAC 639.945(1)((i) and violated various provisions of 21 U.S.C. § 353a,

42 U.S.C. § 262, Cal. Business and Professions Code § 4000 *et seq*., and Cal. Code of Regulations, Title 16, Section 1700 *et seq*. as detailed in the California State Board of Pharmacy's Order entered in Case Nol. 7176. Respondents are responsible for those violations, including all errors and omissions of pharmacy personnel, pursuant to NRS 639.230(5), NAC 639.702 and/or NAC 639.945(3) and therefore subject to discipline pursuant to NRS 639.210(4), (11) and/or (12).

WHEREFORE, it is requested that the Nevada State Board of Pharmacy take appropriate disciplinary action with respect to the licenses of these Respondents.

Signed this 26th day of February 2025.

J. David Wuest, R.Ph., Executive Secretary
Nevada State Board of Pharmacy

NOTICE TO RESPONDENT

You have the right to show the Nevada State Board of Pharmacy that your conduct, as alleged above, complies with all lawful requirements. NRS 233B.127(3). You have the right to a hearing before the Board to answer the Notice of Intended Action and Accusation and present evidence and argument on all issues involved, either personally or through counsel. NRS 233B.121; NRS 233B.127(3); NRS 622A.300(1) and (3). The hearing shall be conducted pursuant to NRS 639.241 through NRS 639.258. To be entitled to a hearing, you must complete, and file two (2) copies of the Answer and Notice of Defense served herewith, to be received by the Board's Reno office located at 985 Damonte Ranch Parkway – Suite 206, Reno, Nevada 89521, within twenty (20) days of your receipt of this Notice of Intended Action and Accusation. NRS 622A.320; NRS 639.243. Your failure to timely file an Answer and Notice of Defense constitutes an admission of the charges and waiver of the right to a hearing. NRS 639.244. If you fail to appear at the hearing and the Board finds that you were given sufficient legal notice of the hearing, the Board may accept the allegations as true and may proceed to consider the case and render a decision. NRS 622A.350. A regulatory body may recover from a person reasonable attorney's fees and costs that are incurred by the regulatory body as a part of its investigative, administrative, and disciplinary proceedings against the person if the regulatory body finds that the person has violated any provision of this title. NRS 622.400(1).

Santa Ana, CA 92704

RE: Administrative Case No. 7176
McGuff Compounding Pharmacy Services Inc., PHY 43950 & LSC 99004

Dear Mr. McGuff:

Attached is the Board of Pharmacy's Stipulated Settlement and Disciplinary Order regarding the above-referenced matter. Your attention is directed to pages 4 - 8 of the document.

Effective at 5:00 p.m. on March 1, 2023, Pharmacy Permit No. PHY 43950 and Sterile Compounding License No. LSC 99004 issued to McGuff Compounding Pharmacy Services Inc., is hereby surrendered and accepted by the Board and subject to the terms and conditions in the decision.

If you wish to file a petition for reconsideration pursuant to Government Code section 11521, the petition must be received prior to the effective date of the decision. However, please be aware the Board needs approximately five days to process a petition for reconsideration. Attached is a copy of the Government Code section for your review. **Please note that reconsideration is NOT available to you if you entered into a stipulated settlement with the Board.**

If you have any questions concerning this matter, you may contact Lupe Baltazar, Administrative Case Analyst, at lupe.baltazar@dca.ca.gov or (916) 518-3009. Should you have any questions related to litigation of this matter, please contact the Deputy Attorney General handling this matter.

Sincerely,

ANNE SODERGREN
Executive Officer

BOARD OF PHARMACY
DEPARTMENT OF CONSUMER AFFAIRS
STATE OF CALIFORNIA

In the Matter of the Accusation Against: **MCGUFF COMPOUNDING PHARMACY SERVICES INC., RONALD M. MCGUFF, OWNER AND OFFICER** **2921 West MacArthur Blvd., Ste. 142 (139-143)** **Santa Ana, CA 92704** **Pharmacy Permit No. PHY 43950** **Sterile Compounding License No. LSC 99004,** **and** **SI VAN PHAM** **2921 W. MacArthur Blvd., #142** **Santa Ana, CA 92704** **Pharmacist License No. RPH 49833** Respondents.	Case No. 7176 OAH No. 2021120276 **STIPULATED SETTLEMENT AND DISCIPLINARY ORDER**

In the interest of a prompt and speedy settlement of this matter, consistent with the public interest and the responsibility of the Board of Pharmacy, Department of Consumer Affairs, the parties hereby agree to the following Stipulated Settlement and Disciplinary Order which will be submitted to the Board for approval and adoption as the final disposition of the Accusation with respect to Respondents McGuff Compounding Pharmacy Services Inc. and Si Van Pham.

PARTIES

1. Anne Sodergren (Complainant) is the Executive Officer of the Board of Pharmacy (Board). She brought this action solely in her official capacity and is represented in this matter by Rob Bonta, Attorney General of the State of California, by Desiree I. Kellogg, Deputy Attorney General, and Joshua A. Room, Supervising Deputy Attorney General.

2. Respondents are represented in this proceeding by attorney Tony J. Park, Pharm.D., J.D., whose address is: California Pharmacy Lawyers, Law Offices of Tony J. Park, Inc., 9090 Irvine Center Drive, Irvine, CA 92618, telephone (949) 336-7854.

3. On or about March 9, 1999, the Board issued Pharmacy Permit Number PHY 43950 to McGuff Compounding Pharmacy Services Inc. Ronald M. McGuff has served or been listed in Board records as the sole shareholder and President, Vice-President, and Secretary of McGuff Compounding Pharmacy Services Inc. (Respondent McGuff Compounding aka MCPS). The Pharmacy Permit was in full force and effect at all times relevant to the charges brought herein and will expire on March 1, 2023, unless renewed.

4. On or about July 1, 2003, the Board issued Sterile Compounding License Number LSC 99004 to Respondent McGuff Compounding aka MCPS. The Sterile Compounding License was in full force and effect at all times relevant to the charges brought herein and will expire on March 1, 2023, unless renewed.

5. On or about September 3, 1997, the Board issued Pharmacist License Number RPH 49833 to Si Van Pham (Respondent Pham). The Pharmacist License was in full force and effect at all times relevant to the charges brought herein and will expire on November 30, 2022, unless renewed. Respondent Pham has served and been listed in Board records as Pharmacist-in-Charge of Respondent McGuff Compounding aka MCPS since July 9, 2016.

JURISDICTION

6. Accusation No. 7176 was filed before the Board, against Respondents. Accusation No. 7176 and all other statutorily required documents were properly served on Respondents on October 28, 2021. Respondents timely filed their Notice(s) of Defense contesting the Accusation. First Amended Accusation No. 7176 was filed before the Board, and is currently pending against Respondents. The First Amended Accusation and all other statutorily required documents were properly served on Respondents on April 21, 2022. A copy of First Amended Accusation No. 7176 is attached as exhibit A and incorporated herein by reference.

ADVISEMENT AND WAIVERS

7. Respondents have carefully read, fully discussed with counsel, and understand the charges and allegations in First Amended Accusation No. 7176. Respondents have also carefully read, fully discussed with counsel, and understand the effects of this Stipulated Settlement and Disciplinary Order on their respective permits and licenses.

8. Respondents are fully aware of their legal rights in this matter, including the right to a hearing on the charges and allegations in the First Amended Accusation; the right to confront and cross-examine the witnesses against them; the right to present evidence and to testify on their own behalf; the right to the issuance of subpoenas to compel attendance of witnesses and production of documents; the right to reconsideration and court review of an adverse decision; and all other rights accorded by the California Administrative Procedure Act and other applicable laws.

9. Respondents voluntarily, knowingly, and intelligently waive and give up each and every right set forth above.

CULPABILITY

10. Respondents understand and agree that the charges and allegations in First Amended Accusation No. 7176, if proven at a hearing, constitute cause for imposing discipline upon their Pharmacy Permit, Sterile Compounding License, and Pharmacist License. For the purposes of resolving this matter without the expense and uncertainty of further proceedings, Respondents agree that, at a hearing, Complainant could establish a factual basis for charges in the First Amended Accusation, and Respondents hereby give up their right to contest those charges.

11. Respondents agree that their Pharmacy Permit, Sterile Compounding License, and Pharmacist License are each and severally subject to discipline and they agree to be bound by the Board's disciplinary terms as set forth in the Disciplinary Order below.

DESIRED LICENSE CATEGORY TRANSITION

12. Respondent MCPS has decided to seek a transition from being a licensed pharmacy engaged in compounding (a Section 503A facility under federal law) to being a registered and licensed outsourcing facility (a Section 503B facility under federal law). This will entail an application to the Food and Drug Administration (FDA) for registration under Section 503B as an outsourcing facility, and then an application to the Board to be licensed in California as an outsourcing facility. It could take some significant time for MCPS to prepare for and make these applications. In the interim, the MCPS facility will cease functioning as a pharmacy on the effective date of the Decision and Order by the Board of Pharmacy adopting this stipulation.

13. This settlement of the First Amended Accusation does not depend on whether MCPS, any successor or assign thereof, or any entity sharing ownership or management with MCPS, actually submits a subsequent application to the Board for licensure as an outsourcing facility. In the event such application is submitted, the Board will give it the same consideration it would any other application to be licensed as an outsourcing facility. This settlement does not preclude the Board from granting that license. Nor is the Board under any obligation from this settlement to grant that license. Any such application will receive ordinary and fair consideration for licensure. If such an outsourcing facility license is granted, there is one term below that will be applied by the Board to that license, and which Respondent MCPS acknowledges will apply to itself, any successor or assign, or any entity sharing ownership or management with Respondent MCPS.

IMMEDIATE CEASE AND DESIST

14. As of the last date of all signatures on this Stipulated Settlement and Disciplinary Order, both Respondents agree to voluntarily and completely cease and desist compounding, or sales or transfers of compounded preparations, using any active ingredients or drug products named or identified in First Amended Accusation No. 7176, or any other active ingredient or drug product that is not graded for pharmaceutical use.

15. Any compounding by Respondents, or sales or transfers of compounded preparations, using such active ingredients or drug products after that date shall constitute unprofessional conduct and further cause for discipline by both Respondents, and may be considered by the Board in deciding whether to grant or deny any subsequent application by Respondent MCPS, its successor or assign, or any entity sharing ownership or management with Respondent MCPS, including but not limited to a subsequent application for an outsourcing facility license.

CONTINGENCY

16. This stipulation shall be subject to approval by the Board of Pharmacy. Respondents understand and agree that counsel for Complainant and the staff of the Board may communicate directly with the Board regarding this stipulation and settlement, without notice to or participation by Respondents or their counsel. By signing the stipulation, Respondents understand and agree that they may not withdraw their agreement or seek to rescind the stipulation prior to the time the Board considers and acts upon it. If the Board fails to adopt this stipulation as its Decision and Order, the Stipulated Settlement and Disciplinary Order shall be of no force or effect, except for this paragraph, it shall be inadmissible in any legal action between the parties, and the Board shall not be disqualified from further action by having considered this matter.

17. The parties understand and agree that Portable Document Format (PDF) and facsimile copies of this Stipulated Settlement and Disciplinary Order, including PDF and facsimile signatures thereto, shall have the same force and effect as the originals.

18. This Stipulated Settlement and Disciplinary Order is intended by the parties to be an integrated writing representing the complete, final, and exclusive embodiment of their agreement. It supersedes any and all prior or contemporaneous agreements, understandings, discussions, negotiations, and commitments (written or oral). This Stipulated Settlement and Disciplinary Order may not be altered, amended, modified, supplemented, or otherwise changed except by a writing executed by an authorized representative of each of the parties.

19. In consideration of the foregoing, the parties agree that the Board may, without further notice or formal proceeding, issue and enter the following Disciplinary Order:

///

DISCIPLINARY ORDER

AS TO RESPONDENT MCGUFF COMPOUNDING AKA MCPS

IT IS HEREBY ORDERED that Pharmacy Permit No. PHY 43950, and Sterile Compounding License No. LSC 99004, both issued to Respondent McGuff Compounding aka MCPS, are each and severally surrendered and accepted by the Board.

20. **Definition: Respondent**

For the purposes of paragraphs 20-33, "Respondent" shall refer to Respondent McGuff Compounding aka MCPS. All terms and conditions stated herein shall bind and be applicable to the licensed premises and to all owners, managers, officers, administrators, members, directors, trustees, associates, or partners thereof. For purposes of compliance with any term or condition, any report, submission, filing, payment, or appearance required to be made by Respondent to or before the Board or its designee shall be made by an owner or executive officer with authority to act on behalf of and legally bind the licensed entity.

21. The surrender of Respondent's Pharmacy Permit and Sterile Compounding License and the acceptance of the surrendered licenses by the Board shall constitute the imposition of discipline against Respondent. This stipulation constitutes a record of the discipline and shall become a part of Respondent's license history with the Board.

22. Respondent shall lose all rights and privileges as a pharmacy and to perform sterile compounding in California as of the effective date of the Board's Decision and Order.

23. Respondent shall be jointly and severally liable to the Board, along with Respondent Pham, for costs of investigation and enforcement of $95,104.75. Respondent shall cause that amount to be paid, in full, on or before the effective date of the Decision and Order.

24. Within (5) business days of the date this Stipulated Settlement and Disciplinary Order is fully executed, Respondent shall submit a completed Discontinuance of Business form according to Board guidelines and shall notify the Board of the records inventory transfer within five (5) days. Respondent shall further arrange for the transfer of all records of acquisition and disposition of dangerous drugs and/or devices to premises licensed and approved by the Board. Any transfers of drug inventory shall be conducted in compliance with state and federal law.

25. If permitted by state and federal law, Respondent may transfer current inventory to its commonly-owned facilities as necessary to prepare for testing and other requirements to establish subsequent eligibility for an outsourcing facility registration and/or license.

26. Respondent shall cause to be delivered to the Board its pocket license and, if any were issued, its wall certificates, on or before the effective date of the Decision and Order.

27. Respondent shall also, by the effective date of the Decision and Order, arrange for the continuation of care for ongoing patients of the pharmacy by, at minimum, providing a written notice to ongoing patients that specifies the anticipated closing date of the pharmacy and that identifies one or more area pharmacies capable of taking up the patients' care, and by cooperating as may be necessary in the transfer of records or prescriptions for ongoing patients. Within five (5) days of its provision to the pharmacy's ongoing patients, Respondent shall provide a copy of its written notice to the Board. For purposes of this provision, "ongoing patients" means those patients for whom the pharmacy has on file a prescription with one or more refills outstanding, or for whom the pharmacy has filled a prescription within the preceding sixty (60) days.

28. Respondent shall also, by the effective date of the Decision and Order, prepare and submit to the Board, on the letterhead for Respondent MCPS, a letter jointly signed by Ronald McGuff and Respondent Pham, in substantially the form attached as exhibit B hereto. The Board may make whatever use of that letter it sees fit, including but not limited to publication in *The Script* or other publication(s), distribution or copying, or submission into evidence in other cases. There shall be no limit to the number of times the Board may publish or otherwise use this letter.

29. Neither Respondent nor its successor or assign, nor any entity sharing ownership or management with Respondent, shall apply to the Board for any permit, license, or registration issued by the Board for a period of three (3) years, except that at any time it is eligible for same:

- Respondent may submit an application for an outsourcing facility license;
- Respondent may apply for a change of location for its wholesaler license (WLS 2947), so long as there is no change in ownership or management structure, or any other substantive change aside from the change in location; and
- Should the Board change the name or category of licensure applicable to the WLS license, Respondent may apply to adopt this change, so long as there is no change in ownership or management structure, or other substantive change.

30. If Respondent, its successor or assign, or an entity sharing ownership or management with Respondent, ever applies for licensure, including as an outsourcing facility, or petitions for reinstatement, the Board shall treat it as a new application for licensure. The applicant/petitioner must comply with all the laws, regulations and procedures for licensure in effect at the time the application or petition is filed, and charges and allegations in First Amended Accusation No. 7176 shall be deemed to be supported by a factual basis and not contested by Respondent when the Board determines whether to grant or deny the application or petition.

31. If an application for an outsourcing facility license is submitted by Respondent, its successor or assign, or an entity sharing ownership or management with Respondent, the Board may in addition consider, in deciding whether to grant or deny that license: whether Respondent met its agreement for the pharmacy to cease and desist compounding, sales, or transfers of drug preparations using active ingredients or drug products named or identified in First Amended Accusation No. 7176, or that are not graded for pharmaceutical use; and whether the Board has received full payment of the costs of investigation and enforcement in this case.

32. If an outsourcing facility license is granted by the Board to Respondent, its successor or assign, or an entity sharing ownership or management with Respondent, that applicant/licensee shall retain, at its own expense, for a period of one (1) year after licensure, an independent consultant for the outsourcing facility approved in advance by the Board or its designee.

33. That independent consultant shall be a pharmacist licensed in good standing by the Board, and shall be responsible for conducting in-person inspections to review the operations of the outsourcing facility on a monthly basis for compliance with applicable state and federal laws. The independent consultant shall prepare and submit written reports directly to Board staff; such reports shall not go first to or be made available to the licensee by the independent consultant.

AS TO RESPONDENT PHAM

IT IS HEREBY ORDERED that Pharmacist License No. RPH 49833, issued to Respondent Pham, is revoked. However, the revocation is stayed and Respondent Pham is placed on probation for thirty-five (35) months on the following terms and conditions:

34. **Definition: Respondent**

For the purposes of paragraphs 34-52, "Respondent" shall refer to Respondent Pham.

35. **Obey All Laws**

Respondent shall obey all state and federal laws and regulations.

Respondent shall report any of the following occurrences to the Board, in writing, within seventy-two (72) hours of such occurrence:

- an arrest or issuance of a criminal complaint for violation of any provision of the Pharmacy Law, state and federal food and drug laws, or state and federal controlled substances laws;
- a plea of guilty, or nolo contendere, no contest, or similar, in any state or federal criminal proceeding to any criminal complaint, information or indictment;
- a conviction of any crime;
- the filing of a disciplinary pleading, issuance of a citation, or initiation of another administrative action filed by any state or federal agency which involves Respondent's license or which is related to the practice of pharmacy or the manufacturing, obtaining, handling, distributing, billing, or charging for any drug, device or controlled substance.

Failure to timely report any such occurrence shall be considered a violation of probation.

36. **Report to the Board**

Respondent shall report to the Board quarterly, on a schedule as directed by the Board or its designee. The report shall be made either in person or in writing, as directed. Among other requirements, Respondent shall state in each report under penalty of perjury whether there has been compliance with all the terms and conditions of probation.

Failure to submit timely reports in a form as directed shall be considered a violation of probation. Any period(s) of delinquency in submission of reports as directed may be added to the probation. Moreover, if the final probation report is not made as directed, probation shall be automatically extended until such time as the final report is made and accepted by the Board.

///

37. **Continuing Education**

Respondent shall provide evidence of efforts to maintain skill and knowledge as a pharmacist as directed by the Board or its designee.

38. **Interview with the Board**

Upon receipt of reasonable prior notice, Respondent shall appear in person for interviews with the Board or its designee, at such intervals and locations as are determined by the Board or its designee. Failure to appear for any scheduled interview without prior notification to Board staff, or failure to appear for two (2) or more scheduled interviews with the Board or its designee during the period of probation, shall be considered a violation of probation.

39. **Cooperate with Board Staff**

Respondent shall timely cooperate with the Board's inspection program and with the Board's monitoring and investigation of Respondent's compliance with the terms and conditions of probation, including but not limited to: timely responses to requests for information by Board staff; timely compliance with directives from Board staff regarding requirements of any term or condition of probation; and timely completion of documentation pertaining to a term or condition of probation. Failure to timely cooperate shall be considered a violation of probation.

40. **Status of License**

Respondent shall, at all times while on probation, maintain an active, current pharmacist license with the Board, including any period during which probation is tolled. Failure to maintain an active, current pharmacist license shall be considered a violation of probation.

If Respondent's pharmacist license expires or is cancelled by operation of law or otherwise at any time during the period of probation, including any extensions thereof due to tolling or otherwise, upon renewal or reapplication Respondent's license shall be subject to all terms and conditions of this probation not previously satisfied.

41. **Submission of Letter to Board**

Respondent shall, by the effective date of the Decision and Order, prepare and submit to the Board, on the letterhead for Respondent MCPS, a letter jointly signed by Ronald McGuff and Respondent Pham, in substantially the form attached as exhibit B hereto. The Board may make

whatever use of that letter it sees fit, including but not limited to publication in *The Script* or other publication(s), distribution or copying, or submission into evidence in other cases. There shall be no limit to the number of times the Board may publish or otherwise use this letter.

42. **Reimbursement of Board Costs**

Respondent shall be jointly and severally liable to the Board, along with Respondent MCPS, for costs of investigation and enforcement of $95,104.75. Respondent shall cause that amount to be paid, in full, on or before the effective date of the Decision and Order. It shall be a condition precedent to successful completion of probation that these costs were timely paid. Failure to pay costs by the deadline shall also be considered a violation of probation.

43. **Probation Monitoring Costs**

Respondent shall pay any costs associated with probation monitoring as determined by the Board each and every year of probation. Such costs shall be payable to the Board on a schedule as directed by the Board or its designee. Failure to pay such costs by the deadline(s) as directed shall be considered a violation of probation.

44. **Practice Requirement – Extension of Probation**

Except during periods of suspension, Respondent shall, at all times while on probation, be employed as a pharmacist in California for a minimum of one hundred (100) hours per calendar month. Any month during which this minimum is not met shall extend the period of probation by one month. During any such period of insufficient employment, Respondent must nonetheless comply with all terms and conditions of probation, unless Respondent receives a waiver in writing from the Board or its designee.

If Respondent does not practice as a pharmacist in California for the minimum number of hours in any calendar month, for any reason (including vacation), Respondent shall notify the board in writing within ten (10) days of the conclusion of that calendar month. This notification shall include at least: the date(s), location(s), and hours of last practice; the reason(s) for the interruption or reduction in practice; and the anticipated date(s) on which Respondent will resume practice at the required level. Respondent shall further notify the board in writing within ten (10) days following the next calendar month during which respondent practices as a pharmacist in

California for the minimum of one hundred (100) hours. Any failure to timely provide such notification(s) shall be considered a violation of probation.

It is a violation of probation for Respondent's probation to be extended pursuant to the provisions of this condition for a total period, counting consecutive and non-consecutive months, exceeding thirty-six (36) months. The Board or its designee may post a notice of the extended probation period on its website.

45. **Ethics Course**

Within sixty (60) calendar days of the effective date of this decision, Respondent shall enroll, at Respondent's expense, in a course in ethics approved in advance by the Board or its designee, that complies with California Code of Regulations, title 16, section 1773.5. Respondent shall provide proof of enrollment upon request. Within five (5) days of completion, Respondent shall submit a copy of the certificate of completion to the Board or its designee. Failure to timely enroll in an approved ethics course, to initiate the course during the first year of probation, to successfully complete it before the end of the second year of probation, or to timely submit proof of completion to the Board or its designee, shall be considered a violation of probation.

46. **No Ownership or Management of Licensed Premises**

Respondent shall not own, have any legal or beneficial interest in, nor serve as a manager, administrator, member, officer, director, trustee, associate, or partner of any business, firm, partnership, or corporation currently or hereinafter licensed by the Board. Respondent shall sell or transfer any legal or beneficial interest in any entity licensed by the Board within ninety (90) days of the effective date of this decision and provide written proof thereof to the Board.

Failure to timely divest any legal or beneficial interest(s) or to immediately provide documentation thereof to the Board shall be considered a violation of probation.

47. **Notification of Change(s) in Name, Address(es), or Phone Number(s)**

Respondent shall notify the Board in writing within ten (10) days of any change in name, residence address, mailing address, e-mail address, or phone number.

Failure to timely notify the board of any change in name, residence or mailing address, email address, or phone number, shall be considered a violation of probation.

48. **Reporting of Employment and Notice to Employers**

During the period of probation, Respondent shall notify all present and prospective employers of the decision in case number 7176 and the terms, conditions and restrictions imposed on Respondent by the decision, as follows:

Within thirty (30) days of the effective date of this decision, and within ten (10) days of undertaking any new employment, Respondent shall report to the Board in writing the name, physical address, and mailing address of each employer(s), and the name(s) and telephone number(s) of all direct supervisor(s), as well as any pharmacist(s)-in-charge, designated representative(s)-in-charge, responsible manager, or other compliance supervisor(s), and Respondent's work schedule, if known. Respondent shall also include reason(s) for leaving the prior employment. Respondent shall sign and return to the Board a written consent authorizing the Board or its designee to communicate with all of Respondent's employer(s) and supervisor(s), and authorizing those employer(s) or supervisor(s) to communicate with the Board or its designee concerning Respondent's work status, performance, and monitoring.

Within thirty (30) days of the effective date of this decision, and within fifteen (15) days of Respondent undertaking any new employment, Respondent shall cause his (a) direct supervisor, (b) pharmacist-in-charge, designated representative-in-charge, responsible manager, or other compliance supervisor, and (c) the owner or owner representative of his employer, to report to the Board in writing acknowledging that the listed individual(s) has/have read the decision in case number 7176, and terms and conditions imposed thereby. If one person serves in more than one role described in (a), (b), or (c), the acknowledgment shall so state. It shall be the Respondent's responsibility to ensure that these acknowledgment(s) are timely submitted to the Board. In the event of a change in the person(s) serving the role(s) described in (a), (b), or (c) during the term of probation, Respondent shall cause the person(s) taking over the role(s) to report to the Roard in writing within fifteen (15) days of the change acknowledging that he or she has read the decision in case number 7176, and the terms and conditions imposed thereby.

///

///

If Respondent works for or is employed by or through an employment service, Respondent must notify the person(s) described in (a), (b), and (c) above at every entity licensed by the Board of the decision in case number 7176, and the terms and conditions imposed thereby, in advance of Respondent commencing work at such licensed entity. A record of this notification must be provided to the Board upon request.

Furthermore, within thirty (30) days of the effective date of this decision, and within fifteen (15) days of Respondent undertaking any new employment by or through an employment service, Respondent shall cause the person(s) described in (a), (b), and (c) above at the employment service to report to the Board in writing acknowledging that he or she has read the decision in case number 7176, and the terms and conditions imposed thereby. It shall be Respondent's responsibility to ensure that these acknowledgment(s) are timely submitted to the Board.

Failure to timely notify present or prospective employer(s), or failure to cause the identified person(s) with that/those employer(s) to submit timely written acknowledgments to the Board, shall be considered a violation of probation. Failure to comply with the requirements or deadlines of this condition shall be considered a violation of probation.

"Employment" within the meaning of this provision includes any full-time, part-time, temporary, relief, or employment/management service position as a pharmacist, or any position for which a pharmacist license is a requirement or criterion for employment, whether Respondent is an employee, independent contractor, or volunteer.

49. **Restrictions on Supervision and Oversight of Licensed Facilities –**

During the period of probation, Respondent shall not supervise any intern pharmacist or serve as a consultant to any entity licensed by the board. Respondent may be a pharmacist-in-charge, designated representative-in-charge, responsible manager or other compliance supervisor of any single entity licensed by the Board, but only if Respondent or that entity retains, at his/its expense, an independent consultant who shall be responsible for reviewing the operations of the entity on a monthly basis for compliance by Respondent and the entity with state and federal laws and regulations governing the practice of the entity, and compliance by Respondent with the obligations of his supervisory position, for the duration of Respondent's probation period.

Respondent may serve in such a position at only one entity licensed by the Board, only upon approval by the Board or its designee. Any such approval shall be site specific. The consultant shall be a pharmacist licensed by and not on probation with the Board, who has been approved by the Board or its designee to serve in this position. Respondent shall submit the name of the proposed consultant to the Board or its designee for approval within thirty (30) days of the effective date of the decision or prior to assumption of duties allowed in this term. Assumption of any unauthorized supervision responsibilities shall be considered a violation of probation. In addition, failure to timely seek approval for, timely retain, or ensure timely reporting by the consultant shall be considered a violation of probation.

50. **License Surrender While on Probation/Suspension**

Following the effective date of this decision, should Respondent cease practice due to retirement or health, or be otherwise unable to satisfy the terms and conditions of probation, Respondent may relinquish his pharmacist license, including any indicia of licensure issued by the Board, along with a request to surrender the license. The Board or its designee shall have the discretion whether to accept the surrender or take any other action it deems appropriate and reasonable. Upon formal acceptance of the surrender of the license, Respondent will no longer be subject to the terms and conditions of probation. This surrender will constitute a record of discipline and shall become a part of the Respondent's license history with the board.

Upon acceptance of the surrender, Respondent shall relinquish his pocket and/or wall license, including any indicia of licensure not previously provided to the Board, within ten (10) days of notification by the Board that the surrender is accepted. Respondent may not reapply for any license from the Board for three (3) years from the effective date of the surrender. Respondent shall meet all requirements applicable to the license sought as of the date the application for that license is submitted to the Board, including any outstanding costs.

51. **Completion of Probation**

Upon written notice by the Board or its designee indicating successful completion of probation, Respondent's license will be fully restored.

///

52. **Violation of Probation**

If Respondent has not complied with any term or condition of probation, the Board shall have continuing jurisdiction over Respondent, and the Board shall provide notice to Respondent that probation shall automatically be extended, until all terms and conditions have been satisfied or the Board has taken other action as deemed appropriate to treat the failure to comply as a violation of probation, to terminate probation, and to impose the penalty that was stayed. The Board or its designee may post a notice of the extended probation period on its website.

If Respondent violates probation in any respect, the Board, after giving Respondent notice and an opportunity to be heard, may revoke probation and carry out the disciplinary order that was stayed. If a petition to revoke probation or accusation is filed against Respondent, or the preparation of an accusation or petition to revoke probation is requested from the Office of the Attorney General, the Board shall have continuing jurisdiction and probation shall be automatically extended until the petition to revoke probation or accusation is heard and decided.

ACCEPTANCE

I am authorized to sign for and bind Respondent McGuff Compounding aka MCPS, as well as its successor or assign, and any entity sharing ownership or management with same. I have carefully read the above Stipulated Settlement and Disciplinary Order and have fully discussed it with my attorney Tony J. Park, Pharm.D., J..D. I understand the stipulation and the effect it will have on the current Pharmacy Permit and Sterile Compounding License, as well as on any subsequent outsourcing facility license that may be issued by the Board of Pharmacy. I enter into this Stipulated Settlement and Disciplinary Order voluntarily, knowingly, and intelligently, and agree to be bound by the Decision and Order of the Board of Pharmacy.

BEFORE THE
BOARD OF PHARMACY
DEPARTMENT OF CONSUMER AFFAIRS
STATE OF CALIFORNIA

In the Matter of the Accusation Against: **MCGUFF COMPOUNDING PHARMACY SERVICES INC., RONALD M. MCGUFF, OWNER AND OFFICER** **2921 West MacArthur Blvd., Ste. 142 (139-143)** **Santa Ana, CA 92704** **Pharmacy Permit No. PHY 43950** **Sterile Compounding License No. LSC 99004,** **and** **SI VAN PHAM** **2921 W. MacArthur Blvd., #142** **Santa Ana, CA 92704** **Pharmacist License No. RPH 49833** Respondents.	Case No. 7176 **FIRST AMENDED ACCUSATION**

PARTIES

1. Anne Sodergren (Complainant) brings this First Amended Accusation solely in her official capacity as the Executive Officer of the Board of Pharmacy, Department of Consumer Affairs (Board).

2. On or about March 9, 1999, the Board issued Pharmacy Permit Number PHY 43950 to McGuff Compounding Pharmacy Services Inc., Ronald M. McGuff, sole shareholder and President, Vice-President and Secretary and Si Pham, Pharmacist-in-Charge since July 9, 2016 (McGuff Compounding). The Pharmacy Permit was in full force and effect at all times relevant to the charges brought herein and will expire on March 1, 2023, unless renewed.

3. On or about July 1, 2003, the Board issued Sterile Compounding License Number LSC 99004 to McGuff Compounding Pharmacy Services Inc. (MCPS). The Sterile Compounding License was in full force and effect at all times relevant to the charges brought herein and will expire on March 1, 2023, unless renewed.

4. On or about September 3, 1997, the Board issued Pharmacist License Number RPH 49833 to Si Van Pham (Si Pham). The Pharmacist License was in full force and effect at all times relevant to the charges brought herein and will expire on November 30, 2022, unless renewed.

JURISDICTION

5. This First Amended Accusation is brought before the Board under the authority of the following laws. All section references are to the Business and Professions Code (Code) unless otherwise indicated.

6. Code section 4011 provides that the Board shall administer and enforce both the Pharmacy Law (Bus. & Prof. Code, § 4000 *et seq.*) and the Uniform Controlled Substances Act (Health & Safety Code, § 11000 *et seq.*).

7. Code section 4300, subdivision (a) provides that every license issued by the Board may be suspended or revoked.

8. Code section 4300.1 states:

The expiration, cancellation, forfeiture, or suspension of a board-issued license

by operation of law or by order or decision of the board or a court of law, the placement of a license on a retired status, or the voluntary surrender of a license by a licensee shall not deprive the board of jurisdiction to commence or proceed with any investigation of, or action or disciplinary proceeding against, the licensee or to render a decision suspending or revoking the license.

STATUTORY PROVISIONS

9. Code section 4022 states:

"Dangerous drug" or "dangerous device" means any drug or device unsafe for self-use in humans or animals, and includes the following:

(a) Any drug that bears the legend: "Caution: federal law prohibits dispensing without prescription," "Rx only," or words of similar import.

(b) Any device that bears the statement: "Caution: federal law restricts this device to sale by or on the order of a ____" "Rx only," or words of similar import, the blank to be filled in with the designation of the practitioner licensed to use or order use of the device.

10. Code section 4023.5 states:

For the purposes of this chapter, "direct supervision and control" means that a pharmacist is on the premises at all times and is fully aware of all activities performed by either a pharmacy technician or intern pharmacist.

11. Code section 4113, subdivision (c) states:

The pharmacist-in-charge shall be responsible for a pharmacy's compliance with all state and federal laws and regulations pertaining to the practice of pharmacy.

12. Code section 4115, subdivision (a) states:

A pharmacy technician may perform packaging, manipulative, repetitive, or other nondiscretionary tasks only while assisting, and while under the direct supervision and control of, a pharmacist. The pharmacist shall be responsible for the duties performed under his or her supervision by a technician.

13. Code section 4116, subdivision (a) states:

No person other than a pharmacist, an intern pharmacist, an authorized officer of the law, or a person authorized to prescribe shall be permitted in that area, place, or premises described in the license issued by the board wherein controlled substances or dangerous drugs or dangerous devices are stored, possessed, prepared, manufactured, derived, compounded, dispensed, or re-packaged. However, a pharmacist shall be responsible for any individual who enters the pharmacy for the purposes of receiving consultation from the pharmacist or performing clerical, inventory control, housekeeping, delivery, maintenance, or similar functions relating to the pharmacy if the pharmacist remains present in the pharmacy during all times as the authorized individual is present.

///

14. Code section 4127.1, subdivisions (e)(3) and (f) state:

(e)(3) Provide to the board, within 12 hours, any recall notice issued by the pharmacy for sterile drug products it has compounded.

(f) Adverse effects reported or potentially attributable to a pharmacy's sterile drug product shall be reported to the board within 12 hours and immediately reported to the MedWatch program of the federal Food and Drug Administration.

15. Code section 4127.8, subdivision (a) states:

A pharmacy licensed pursuant to Section 4127.1 or 4127.2 that issues a recall notice regarding a sterile compounded drug shall, in addition to any other duties, contact the recipient pharmacy, prescriber, or patient of the recalled drug and the board as soon as possible within 12 hours of the recall notice if both of the following apply:

(1) Use of or exposure to the recalled drug may cause serious adverse health consequences or death.

(2) The recalled drug was dispensed, or is intended for use, in this state.

16. Section 4169 subdivision (a)(2) of the Code state:

(a) A person or entity shall not do any of the following:

...

(2) Purchase, trade, sell, or transfer dangerous drugs or dangerous devices that the person knew or reasonably should have known were adulterated, as set forth in Article 2 (commencing with Section 111250) of Chapter 6 of Part 5 of Division 104 of the Health and Safety Code.

17. Code section 4301 states in pertinent part:

The board shall take action against any holder of a license who is guilty of unprofessional conduct or whose license has been procured by fraud or misrepresentation or issued by mistake. Unprofessional conduct shall include, but is not limited to, any of the following:

...

(f) The commission of any act involving moral turpitude, dishonesty, fraud, deceit, or corruption, whether the act is committed in the course of relations as a licensee or otherwise, and whether the act is a felony or misdemeanor or not.

(g) Knowingly making or signing any certificate or other document that falsely represents the existence or nonexistence of a state of facts.

...

(j) The violation of any of the statutes of this state, or any other state, or of the United States regulating controlled substances and dangerous drugs.

...

(o) Violating or attempting to violate, directly or indirectly, or assisting in or abetting the violation of or conspiring to violate any provision or term of this chapter or of the applicable federal and state laws and regulations governing pharmacy, including regulations established by the board or any other state or federal regulatory agency.

...

18. Section 4306.5, subdivision (a) of the Code states, in pertinent part:

Unprofessional conduct for a pharmacist may include any of the following:

Acts or omissions that involve, in whole or in part, the inappropriate exercise of his or her education, training, or experience as a pharmacist, whether or not the act or omission arises in the course of the practice of pharmacy or the ownership, management, administration, or operation of a pharmacy or other entity licensed by the board.

...

19. Code section 4307, subdivision (a) states:

Any person who has been denied a license or whose license has been revoked or is under suspension, or who has failed to renew his or her license while it was under suspension, or who has been a manager, administrator, owner member, officer, director, associate, or partner of any partnership, corporation, firm, or association whose application for a license has been denied or revoked, is under suspension or has been placed on probation, and while acting as the manger, administrator, owner, member, officer, director, associate, or partner had knowledge or knowingly participated in any conduct for which the license was denied, revoked, suspended, or placed on probation, shall be prohibited from serving as a manger, administrator, owner, member, officer, director, associate, or partner of a licensee as follows:

(1) Where a probationary license is issued or where an existing license is placed on probation, this prohibition shall remain in effect for a period not to exceed five years.

(2) Where the license is denied or revoked, the prohibition shall continue until the license is issued or reinstated.

20. Health and Safety Code section 111250 states:

Any drug or device is adulterated if it consists, in whole or in part, of any filthy, putrid, or decomposed substance.

21. Health and Safety Code section 111255 states:

Any drug or device is adulterated if it has been produced, prepared, packed, or held under conditions whereby it may have been contaminated with filth, or whereby it may have been rendered injurious to health.

22. Health and Safety Code section 111295 states:

It is unlawful for any person to manufacture, sell, deliver, hold or offer for sale any drug or device that is adulterated.

23. Section 501(a)(2)(A) of the Federal Food, Drug and Cosmetic Act (21 U.S.C. 351(a)(2)(A)) states:

A drug or device shall be deemed to be adulterated if it has been prepared, packed, or held under insanitary conditions whereby it may have been contaminated with filth, or whereby it may have been rendered injurious to health.

REGULATORY PROVISIONS

24. California Code of Regulations, title 16, section 1714, subdivision (d) states:

Each pharmacist while on duty shall be responsible for the security of the prescription department, including provisions for effective control against theft or diversion of dangerous drugs and devices, and records for such drugs and devices. Possession of a key to the pharmacy where dangerous drugs and controlled substances are stored shall be restricted to a pharmacist.

25. California Code of Regulations, title 16, section 1735.1, subdivision (ae) states:

"Quality" means the absence of harmful levels of contaminants, including filth, putrid, or decomposed substances, the absence of active ingredients other than those listed on the label, and the absence of inactive ingredients other than those listed on the master formula document.

26. California Code of Regulations, title 16, section 1735.2, subdivisions (e), (g) and (h) state:

(e) A drug preparation shall not be compounded until the pharmacy has first prepared a written master formula document that includes at least the following elements:

(1) Active ingredients to be used.

(2) Equipment to be used.

(3) The maximum allowable beyond use date for the preparation, and the rationale or reference source justifying its determination.

(4) Inactive ingredients to be used.

(5) Specific and essential compounding steps used to prepare the drug.

(6) Quality reviews required at each step in preparation of the drug.

(7) Post-compounding process or procedures required, if any.

(8) Instructions for storage and handling of the compounded drug preparation.

...

(g) The pharmacist performing or supervising compounding is responsible for the integrity, potency, quality, and labeled strength of a compounded drug preparation until the beyond use date indicated on the label, so long as label instructions for storage and handling are followed after the preparation is dispensed.

(h) All chemicals, bulk drug substances, drug products, and other components used for drug compounding shall be stored and used according to compendia and other applicable requirements to maintain their integrity, potency, quality and labeled strength.

27. California Code of Regulations, title 16, section 1735.3, subdivision (a)(2)(F) states:

For each compounded drug preparation, pharmacy records shall include: A compounding log consisting of a single document containing all of the following: the manufacturer, expiration date and lot number of each component. If the manufacturer name is demonstrably unavailable, the name of the supplier may be substituted. If the manufacturer does not supply an expiration date for any component, the records shall include the date of receipt of the component in the pharmacy, and the limitations of section 1735.2, subdivision (l) shall apply.

28. California Code of Regulations, title 16, section 1735.5 states:

(a) Any pharmacy engaged in compounding shall maintain written policies and procedures for compounding that establishes procurement procedures, methodologies for the formulation and compounding of drugs, facilities and equipment cleaning, maintenance, operation, and other standard operating procedures related to compounding. Any material failure to follow the pharmacy's written policies and procedures shall constitute a basis for disciplinary action.

(b) The policies and procedures shall be reviewed and such review shall be documented on an annual basis by the pharmacist-in-charge. The policies and procedures shall be updated whenever changes in policies and procedures are implemented.

(c) The policies and procedures shall include at least the following:

(1) Procedures for notifying staff assigned to compounding duties of any changes in policies or procedures.

(2) A written plan for recall of a dispensed compounded drug preparation where subsequent information demonstrates the potential for adverse effects with continued use. The plan shall ensure that all affected doses can be accounted for during the recall and shall provide steps to identify which patients received the affected lot or compounded drug preparation(s).

(3) Procedures for maintaining, storing, calibrating, cleaning, and disinfecting equipment used in compounding, and for training on these procedures as part of the staff training and competency evaluation process.

(4) Procedures for evaluating, maintaining, certifying, cleaning, and disinfecting the facility (physical plant) used for compounding, and for training on these procedures as part of the staff training and competency evaluation process.

(5) Documentation of the methodology used to validate integrity, potency,

quality, and labeled strength of compounded drug preparations. The methodology must be appropriate to compounded drug preparations.

(6) Documentation of the methodology and rationale or reference source used to determine appropriate beyond use dates for compounded drug preparations.

(7) Dates and signatures reflecting all annual reviews of the policies and procedures by the pharmacist-in-charge.

(8) Dates and signatures accompanying any revisions to the policies and procedures approved by the pharmacist-in-charge.

(9) Policies and procedures for storage of compounded drug preparations in the pharmacy and daily documentation of all room, refrigerator, and freezer temperatures within the pharmacy.

(10) Policies and procedures regarding ensuring appropriate functioning of refrigeration devices, monitoring refrigeration device temperatures, and actions to take regarding any out of range temperature variations within the pharmacy.

(11) Policies and procedures for proper garbing when compounding with hazardous products. This shall include when to utilize double shoe covers.

29. California Code of Regulations, title 16, section 1735.8, subdivision (a) states:

Any pharmacy engaged in compounding shall maintain, as part of its written policies and procedures, a written quality assurance plan designed to monitor and ensure the integrity, potency, quality, and labeled strength of compounded drug preparations.

30. California Code of Regulations, title 16, section 1751.3, subdivision (a) states:

Any pharmacy engaged in compounding sterile drug preparations shall maintain written policies and procedures for compounding. Any material failure to follow the pharmacy's written policies and procedures shall constitute a basis for disciplinary action. In addition to the elements required by section 1735.5, there shall be written policies and procedures regarding the following:

(1) Action levels for colony-forming units (CFUs) detected during viable surface sampling, glove fingertip, and viable air sampling and actions to be taken when the levels are exceeded.

(2) Airflow considerations and pressure differential monitoring.

(3) An environmental sampling plan and procedures specific to viable air, surface and gloved fingertip sampling as well as nonviable particle sampling.

(4) Cleaning and maintenance of ISO environments and segregated compounding areas.

(5) Compounded sterile drug preparation stability and beyond use dating.

(6) Compounding, filling, and labeling of sterile drug preparations.

(7) Daily and monthly cleaning and disinfection schedule for the controlled

areas and any equipment in the controlled area as specified in section 1751.4.

(8) Depyrogenation of glassware (if applicable).

(9) Facility management including certification and maintenance of controlled environments and related equipment.

(10) For compounding aseptic isolators and compounding aseptic containment isolators, documentation of the manufacturer's recommended purge time.

(11) Hand hygiene and garbing.

(12) Labeling of the sterile compounded drug preparations based on the intended route of administration and recommended rate of administration.

(13) Methods by which the supervising pharmacist will fulfill his or her responsibility to ensure the quality of compounded drug preparations.

(14) Orientation, training, and competency evaluation of staff in all aspects of the preparation of sterile drug preparations including didactic training and knowledge/competency assessments that include at minimum: hand hygiene and garbing; decontamination (where applicable); cleaning and disinfection of controlled compounding areas; and proper aseptic technique, demonstrated through the use of a media-fill test performed by applicable personnel; and aseptic area practices.

(15) Preparing sterile compounded drug preparations from non-sterile components (if applicable). This shall include sterilization method suitability testing for each master formula document.

(16) Procedures for handling, compounding and disposal of hazardous agents. The written policies and procedures shall describe the pharmacy protocols for cleanups and spills in conformity with local health jurisdiction standards.

(17) Procedures for handling, compounding and disposal of infectious materials. The written policies and procedures shall describe the pharmacy protocols for cleanups and spills in conformity with local health jurisdiction standards.

(18) Proper use of equipment and supplies.

(19) Quality assurance program compliant with sections 1711, 1735.8 and 1751.7.

(20) Record keeping requirements.

(21) Temperature monitoring in compounding and controlled storage areas.

(22) The determination and approval by a pharmacist of ingredients and the compounding process for each preparation before compounding begins.

(23) Use of automated compounding devices (if applicable).

(24) Visual inspection and other final quality checks of sterile drug preparations.

///

31. California Code of Regulations, title 16, section 1751.4, subdivision (f) states:

Pharmacies preparing-g sterile compounded preparations require the use of a PEC that provides ISO Class 5 air or better air quality. Certification and testing of primary and secondary engineering controls shall be performed no less than every six months and whenever the device or area designated for compounding is relocated, altered or a service to the facility is performed that would impact the device or area. Certification must be completed by a qualified technician who is familiar with certification methods and procedures in accordance with CETA Certification Guide for Sterile Compounding Facilities (CAG-003-2006-13, Revised May 20, 2015), which is hereby incorporated by reference. Certification records must be retained for at least 3 years. Unidirectional compounding aseptic isolators or compounding aseptic containment isolators may be used outside of an ISO Class 7 cleanroom if the isolator is certified to meet the following criteria:

(1) Particle counts sampled approximately 6-12 inches upstream of the critical exposure site shall maintain ISO Class 5 levels during compounding operations.

(2) Not more than 3520 particles (0.5 um and larger) per cubic meter shall be counted during material transfer, with the particle counter probe located as near to the transfer door as possible without obstructing transfer.

(3) Recovery time to achieve ISO Class 5 air quality shall be documented and internal procedures developed to ensure that adequate recovery time is allowed after material transfer before and during compounding operations. Compounding aseptic isolators that do not meet the requirements as outlined in this subdivision or are not located within an ISO Class 7 cleanroom may only be used to compound preparations that meet the criteria specified in accordance with subdivision (d) of Section 1751.8 of Title 16, Division 17, of the California Code of Regulations.

COST RECOVERY

32. Section 125.3 of the Code provides, in pertinent part, that the Board may request the administrative law judge to direct a licentiate found to have committed a violation or violations of the licensing act to pay a sum not to exceed the reasonable costs of the investigation and enforcement of the case.

DEFINITIONS

33. Hydrogen peroxide infusions may be used to treat inflammation, are not Food and Drug Administration (FDA) approved for any indication, and are dangerous drugs as defined under Business and Professions Code section 4022.

34. Dimercapto-propane sulfonic acid (DMPS) infusions may be used to treat mercury and other metal poisoning, are not FDA approved for any indication, and are dangerous drugs as defined under Business and Professions Code section 4022.

///

35. Glutathione infusions are prescribed to improve "wellness and health," are not FDA approved for any indication and are dangerous drugs as defined under Business and Professions Code section 4022.

36. Lipoic acid infusions may be used to treat nerve pain, are not FDA approved for any indication and are dangerous drugs as defined under Business and Professions Code section 4022.

37. Methylcobalamin infusions may be used to treat neurological conditions and pain, are not FDA approved for any indication, and are dangerous drugs as defined by Business and Professions Code section 4022.

38. Disodium nicotinamide adenine dinucleotide (NADH) infusions may be used to treat Alzheimer's disease and dementia, are not FDA approved for any indication, and are dangerous drugs as defined by Business and Professions Code section 4022.

39. Taurine infusions are prescribed to improve "wellness and health," are not FDA approved for any indication and are dangerous drugs as defined under Business and Professions Code section 4022.

FACTUAL ALLEGATIONS

40. MCPS is a sterile compounding pharmacy located in Santa Ana, California. It compounds non-sterile to sterile compounded sterile preparations and furnishes sterile injectable drugs (i.e., infusion therapies) to physicians and clinics for administration to patients. At all times relevant herein, Si Pham was the Pharmacist-in-Charge and Ronald McGuff was the sole shareholder and an officer of the corporation that owns MCPS. Board inspections revealed the following violations of Pharmacy Law.

41. Pharmacy technicians, facility foremen, plant managers, corporate representatives, chemists, engineers and/or other non-licensed staff possessed keys and alarm codes for areas where dangerous drugs were compounded and accessed those areas when pharmacists were not present.

42. In 2017 and 2018, MCPS received reports of adverse drug effects (i.e., headaches, high fevers, diarrhea, extreme fatigue, loss of consciousness, chills and nausea) suffered by patients after being administered infusions of lipoic acid compounded and dispensed by MCPS.

43. In January 2019, the Board issued Compounding Safety Alerts about the use of inappropriate ingredients to compound sterile injectable drugs and strongly encouraged sterile compounding pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action was required. The Board noted that dietary supplements, food grade chemicals, and cosmetic grade ingredients may have as much as ten times more impurities when compared to pharmaceutical grade ingredients, increasing the risk of patient harm. On February 1, 2019, the FDA warned compounders not to use a dietary grade bulk substance distributed by a manufacturer to compound sterile injectable drugs for patients due to higher levels of endotoxins in that dietary grade bulk substance.

44. MCPS compounded and dispensed sterile injectable drugs including hydrogen peroxide 3%, lipoic acid 40mg/ml, DMPS 50mg/ml, NADH 50 mg/ml and methylcobalamin 5mg/ml 30ml using ingredients (i.e., dietary grade, topical grade and ungraded bulk substances) likely containing higher levels of contaminates or impurities, including heavy metals, bacteria and mold and higher bioburden levels (i.e., the number of bacteria living on a surface or in a substance that has not been sterilized), than pharmaceutical grade ingredients, therefore potentially placing patients at risk.

45. On November 13, 2019, the Board issued an Order of Correction to MCPS for this unsafe practice and directed Si Pham to send a plan of correction.

46. On November 22, 2019, the FDA issued a Form FDA 483 to MCPS observing among other violations, that MCPS compounded and dispensed sterile injectable drugs with non-pharmaceutical grade ingredients containing high levels of contaminants (MCPS "currently uses …dietary grade bulk substances in sterile injectable drug products") and observed that the use of non-pharmaceutical grade bulk substances in MCPS's products resulted in a recall of Lipoic Acid 40 mg/ml, 30 ml vials due to a "filmy wispy precipitate" found in on-hand vials of released product and the discontinued production of NADH disodium 50 mg/ml due to out of specification endotoxin results.

47. During the "closeout" meeting on November 22, 2019, both the FDA and Board informed Ronald McGuff and Si Pham about the safety risks associated with MCPS's practice of

compounding sterile injectable drugs with inappropriate ingredients containing higher levels of contaminants and higher bioburden levels than pharmaceutical grade ingredients.

48. On December 5, 2019, MCPS wrote the Board that it was MCPS's "continuing desire and intention to comply with all requirements of California pharmacy laws and expectations of the Board of Pharmacy" and it had stopped the dispensing and compounding of sterile preparations compounded with dietary grade and non-compendial grade raw materials "regardless of whether the bulk drug substance appears on the FDA's Category 1 list until further guidance and/or clarification from both the FDA and CA BOP." On December 16, 2019, MCPS wrote the FDA that "[i]n the near term, MCPS has suspended compounding drug preparations containing the components listed in the observation and all USP dietary grade supplements. Drug preparation lots compounded with the listed components will not be dispensed...Corrective Actions for Observation 7: Suspend compounding and dispensing drug preparations utilizing non-pharmaceutical grade components until pharmaceutical grade replacements can be procured or until alternate assurance of material quality and fitness for intended used can be established."

49. However, MCPS continued to compound and dispense a large volume of sterile injectable drugs from inappropriate ingredients, including methylcobalamin and lipoic acid after making those representations to the Board and FDA and receiving the Compounding Safety Alerts.

50. MCPS compounded sterile injectable lipoic acid 40mg/ml 30 ml MDV (Lot No. 18M0991) and DMPS 50mg/ml 5ml SDV (Lot No. 18J1081) containing particulate or precipitate but failed to provide the Board with notice of the recalls of those drugs within twelve hours as required.

51. Patients reported to MCPS that they suffered adverse drug effects (i.e., excruciating pain) from one of its sterile injectable drug products, vitamin D3 10,00IU/ML 30ML MDV (Lot No. 20F1501:0920) but it failed to report those adverse effects to the Board within twelve hours as required.

///

///

52. MCPS compounded sterile injectable chromium (Lot No. 19K411) without a master formula describing the equipment to be used, inactive ingredients to be used and the specific and essential compounding steps used to prepare that infusion.

53. MCPS did not possess all of the policies and procedures required to compound sterile injectable drugs, including procedures for quality assurance programs, cleaning and maintenance of ISO environments and for maintaining, storing, calibrating, cleaning, and disinfecting equipment used in compounding, and for training on these procedures as part of the staff training and competency evaluation process. It also did not possess a written quality assurance plan designed to monitor and ensure the integrity, potency, quality, and labeled strength of compounded drug preparations.

54. From January 17 through February 23, 2018, there was a 12.6% patch in the HEPA filter of MCPS's primary engineering control devices in Room 107 which was not completely repaired. Yet, MCPS continued to compound at least ten sterile injectable drugs with that primary engineering control device before it was re-certified and tested on February 23, 2018.

55. In November 2019, pharmacy technicians performed prefatory compounding functions, (washed and prepared empty vials) without a pharmacist being present on the premises.

56. In August and September 2020, MCPS failed to document the manufacturer of at least one component for the sterile injectable drug, methylcobalamin.

57. Despite the filing of the Accusation, the discussions with the FDA and Board about safety risks associated with using inappropriate ingredients, the receipt of the FDA Form 483, the receipt of the Board's Order of Correction and the Written Notice and Respondents' promises to cease compounding and dispensing sterile injectable drugs with dietary grade and non-compendial substances, from at least June 1, 2021 through December 1, 2021, MCPS continued to compound and dispense sterile injectable drugs, methylcobalamin 5mg/mL, glutathione 200mg/mL, taurine, lipoic acid and DMPS using inappropriate ingredients (i.e., dietary grade and ungraded bulk substances) likely containing higher levels of contaminates or impurities, including heavy metals, bacteria and mold and higher bioburden levels (i.e., the number of bacteria living

on a surface or in a substance that has not been sterilized), than pharmaceutical grade ingredients, therefore potentially placing patients at risk.

58. In 2021, MCPS received reports of at least six adverse drug effects, including headaches, fever, chills and nausea from sterile injectable drugs compounded and dispensed, but failed to timely report at least four of those adverse drug effects to the Board. It also failed to report at least four of the adverse drug effects immediately to the MedWatch Program of the FDA.

59. On January 24, 2022, the Board issued an Order of Correction to Respondents for their continued use of ingredients in sterile injectable products that lacked quality and a Written Notice for the failure to report adverse drug effects to the Board within twelve hours and immediately to the MedWatch Program of the FDA.

FIRST CAUSE FOR DISCIPLINE

(Manufactured, Held, Sold, Offered for Sale and Delivered Adulterated Drugs)

60. Respondents are subject to disciplinary action under Code section 4301, subdivision (j) and (o) for violating Health and Safety Code section 111295 and Business and Professions Code section 4169, subdivision (a)(2), in that they manufactured, held (including under insanitary conditions), sold, offered for sale and/or delivered drugs that were adulterated within the meaning of Health & Safety Code sections 111250 and/or 111255 and/or 501(a)(2)(A) of the Federal Food Drug and Cosmetic Act (21 U.SC. 351(a)(2)(A)), as set forth above in paragraphs 40 through 59.

SECOND CAUSE FOR DISCIPLINE

(Compounded Sterile Injectable Drugs Lacking in Quality)

61. Respondents are subject to disciplinary action under Code section 4301, subdivision (j) and (o) for violating California Code of Regulations, title 16, section 1735.2, subdivisions (g) and (h), in that they compounded sterile injectable drug products lacking in quality as defined by California Code of Regulations, title 16, section 1735.1, subdivision (ae) and as set forth above in paragraphs 40 through 59.

///

///

THIRD CAUSE FOR DISCIPLINE

(Dishonest Acts)

62. Respondents are subject to disciplinary action under Code section 4301, subdivision (f) in that those Respondents committed dishonest acts when they falsely claimed that they would cease compounding and dispensing sterile injectable drugs from non-pharmaceutical grade ingredients, as set forth above in paragraphs 40 through 59.

FOURTH CAUSE FOR DISCIPLINE

(Made Documents that Falsely Represent Facts)

63. Respondents subject to disciplinary action under Code section 4301, subdivision (g) in that those Respondents made documents that falsely represented the existence of a state of facts when they represented in writing that they would cease compounding and dispensing sterile injectable drugs from non-pharmaceutical grade ingredients, as set forth above in paragraphs 40 through 59.

FIFTH CAUSE FOR DISCIPLINE

(Lack of Security for Pharmacy Premises)

64. Respondents are subject to disciplinary action under Code section 4301, subdivision (j) and (o) for violating Business and Professions Code section 4116, subdivision (a) and California Code of Regulations, title 16, section 1714, subdivision (d), in that pharmacy technicians and unlicensed personnel had access to pharmacy premises where dangerous drugs were compounded without a pharmacist being present and had keys to all of the pharmacy premises, as set forth above in paragraphs 40 through 59.

SIXTH CAUSE FOR DISCIPLINE

(Lack of Supervision of Pharmacy Technicians)

65. Respondents are subject to disciplinary action under Code section 4301, subdivision (j) and (o) for violating Business and Professions Code section 4115, subdivision (a) as defined by Business and Professions Code section 4023.5, in that pharmacy technicians washed and prepared empty drug vials without a pharmacist on the premises, as set forth above in paragraphs 40 through 59.

SEVENTH CAUSE FOR DISCIPLINE

(Failure to Notify Board of Recall of Sterile Drug Products)

66. Respondents are subject to disciplinary action under Code section 4301, subdivision (j) and (o) for violating Business and Professions Code sections 4127.1, subdivision (e)(3) and 4127.8, subdivision (a) , in that they failed to provide to the Board, within 12 hours, recall notices issued by MCPS for sterile drug products it had compounded, as set forth above in paragraphs 40 through 59.

EIGHTH CAUSE FOR DISCIPLINE

(Failure to Report Adverse Drug Effects of Sterile Drug Product)

67. Respondents are subject to disciplinary action under Code section 4301, subdivision (j) and (o) for violating Business and Professions Code section 4127.1, subdivision (f), in that they failed to report to the Board within 12 hours and immediately to the MedWatch program of the FDA, adverse drug effects reported to MCPS, about its sterile injectable drug products, as set forth above in paragraphs 40 through 59.

NINTH CAUSE FOR DISCIPLINE

(Failed to Possess All Policies and Procedures and a Written Quality Assurance Plan for Compounding Sterile Drug Preparations)

68. Respondents are subject to disciplinary action under Code section 4301, subdivision (o), for violating California Code of Regulations, title 16, sections 1735.5, 1735.8, subdivision (a) and 1751.3, subdivision (a) because they failed to have all required written policies and procedures for compounding sterile drug preparations and a written quality assurance plan, as set forth in paragraphs 40 through 59 above.

TENTH CAUSE FOR DISCIPLINE

(Compounded with Incomplete Master Formulas)

69. Respondents are subject to disciplinary action under Code section 4301, subdivision (o), for violating California Code of Regulations, title 16, section 1735.2, subdivision (e), in that they compounded sterile injectable drug preparations without a complete written master formula, as set forth in paragraphs 40 through 59 above.

ELEVENTH CAUSE FOR DISCIPLINE

(Failure to Complete Compounding Logs)

70. Respondents are subject to disciplinary action under Code section 4301, subdivision (o), for violating California Code of Regulations, title 16, section 1735.3, subdivision (a)(2)(F), in that they compounded sterile injectable drug preparations without preparing complete compounding logs, as set forth in paragraphs 40 through 59 above.

TWELFTH CAUSE FOR DISCIPLINE

(Compounded Sterile Drug Products in Uncertified Primary Engineering Control)

71. Respondents are subject to disciplinary action under Code section 4301, subdivision (o), for violating California Code of Regulations, title 16, section 1751.4, subdivision (f), in that they compounded sterile injectable drug preparations using an inappropriate primary engineering control device, as set forth in paragraphs 40 through 59 above.

THIRTEENTH CAUSE FOR DISCIPLINE

(Inappropriate Exercise of Education, Training or Experience as a Pharmacist Against Respondent Si Pham)

72. Respondent Si Pham is subject to disciplinary action under Code section 4301, subdivision (o), for violating Business and Professions Code section 4306.5, subdivision (a) for his inappropriate exercise of his pharmacist education, training, or experience, as set forth in paragraphs 40 through 59.

FOURTEENTH CAUSE FOR DISCIPLINE

(Unprofessional Conduct)

73. Respondents are subject to disciplinary action under Code section 4301 for unprofessional conduct in that they engaged in the activities set forth in paragraphs 40 through 59 above.

DISCIPLINE CONSIDERATIONS

74. To determine the degree of discipline, if any, to be imposed on Respondents, Complainant alleges that on or about April 30, 2019, the Board issued Citation Number CI 2017 80272 to MCPS under Business and Professions Code section 4301, subdivision (n) because it

was disciplined by the Alabama Board of Pharmacy for selling, offering to sell, compounding and/or dispensed drugs into Alabama without a permit. That Citation is now final.

OTHER MATTERS

75. Pursuant to Code section 4307, if discipline is imposed on Pharmacy Permit No. PHY 43950 and/or Sterile Compounding License No. LSC 99004 issued to McGuff Compounding Pharmacy Services Inc., it shall be prohibited from serving as a manager, administrator, owner, member, officer, director, associate, or partner of a licensee for five years if the Pharmacy Permit and/or Sterile Compounding License are placed on probation or until the Pharmacy Permit and/or Sterile Compounding License are reinstated if they are revoked.

76. Pursuant to Code section 4307, if discipline is imposed on Pharmacy Permit No. PHY 43950 and/or Sterile Compounding License No. LSC 99004 issued to McGuff Compounding Pharmacy Services Inc. while Ronald M. McGuff has been a manager or owner and had knowledge of or knowingly participated in any conduct for which the licensees were disciplined, he shall be prohibited from serving as a manager, administrator, owner, member, officer, director, associate, or partner of a licensee for five years if the Pharmacy Permit and/or Sterile Compounding License are placed on probation or until the Pharmacy Permit and/or Sterile Compounding Licenses are reinstated, if they are revoked.

77. Pursuant to Code section 4307, if discipline is imposed on Pharmacy Permit No. PHY 43950 and/or Sterile Compounding License No. LSC 99004 issued to McGuff Compounding Pharmacy Services Inc. while Si Van Pham has been a manager and had knowledge of or knowingly participated in any conduct for which the licensees were disciplined, he shall be prohibited from serving as a manager, administrator, owner, member, officer, director, associate, or partner of a licensee for five years if the Pharmacy Permit and/or Sterile Compounding License are placed on probation or until the Pharmacy Permit and/or Sterile Compounding License are reinstated, if they are revoked.

78. Pursuant to Code section 4307, if discipline is imposed on Pharmacist License No. RPH 49833 issued to Si Van Pham, he shall be prohibited from serving as a manager, administrator, owner, member, officer, director, associate, or partner of a licensee for five years if

the Pharmacist License is placed on probation or until the Pharmacist License is reinstated, if it is revoked.

PRAYER

WHEREFORE, Complainant requests that a hearing be held on the matters herein alleged, and that following the hearing, the Board of Pharmacy issue a decision:

1. Revoking or suspending Pharmacy Permit Number PHY 43950, issued to McGuff Compounding Pharmacy Services Inc.;

2. Revoking or suspending Sterile Compounding License Number LSC 99004, issued to McGuff Compounding Pharmacy Services Inc.;

3. Revoking or suspending Pharmacist License Number RPH 49833, issued to Si Van Pham;

4. Prohibiting McGuff Compounding Pharmacy Services Inc. from serving as a manager, administrator, owner, member, officer, director, associate, or partner of a licensee for five years if Pharmacy Permit Number PHY 43950 and/or Sterile Compounding License Number 99004 are placed on probation or until the Pharmacy Permit and/or Sterile Compounding License are reinstated, if they are revoked;

5. Prohibiting Ronald M. McGuff from serving as a manager, administrator, owner, member, officer, director, associate, or partner of a licensee for five years if Pharmacy Permit Number PHY 43950 and/or Sterile Compounding License Number LSC 99004 are placed on probation or until the Pharmacy Permit and/or Sterile Compounding License are reinstated, if they are revoked;

6. Prohibiting Si Van Pham from serving as a manager, administrator, owner, member, officer, director, associate, or partner of a licensee for five years if Pharmacy Permit Number PHY 43950 and/or Sterile Compounding License Number LSC 99004 are placed on probation or until the Pharmacy Permit and/or Sterile Compounding License are reinstated, if they are revoked;

///

///

7. Prohibiting Si Van Pham from serving as a manager, administrator, owner, member, officer, director, associate, or partner of a licensee for five years if Pharmacist License Number RPH 49833 is placed on probation or until the Pharmacist License is reinstated, if it is revoked;
