74. As a result of Defendant's unlawful conduct, Plaintiffs have suffered damages in excess of $15,000.

75. As a result of Defendant's unlawful conduct, Plaintiffs have been forced to retain counsel and are entitled to an award of reasonable attorney's fees and costs in their favor.

THIRD CAUSE OF ACTION
[Declaratory Relief – NRS 30.010 et seq.*]*

76. Plaintiffs repeat and reallege the allegations contained in preceding paragraphs as if fully restated herein.

77. Controversies exist between Plaintiffs and Defendant on multiple issues, including the Parties' respective rights and obligations under the Lease and Guaranty.

78. Those issues are ripe for judicial determination as expressly authorized under NRS Chapter 30 and related Nevada procedural rules.

79. Plaintiffs are entitled to judicial declarations regarding Defendant's breaches of the Lease and Guaranty, as well as Defendant's actions which impeded Plaintiff's ability to remain in the Property for the duration of the term.

80. As a result of Defendant's unlawful conduct, Plaintiffs have been forced to retain counsel and are entitled to an award of reasonable attorney's fees and costs in their favor.

FOURTH CAUSE OF ACTION
[Constructive Eviction]

81. Plaintiffs repeat and reallege the allegations contained in preceding paragraphs as if fully restated herein.

82. Defendant's affirmative breaches of the Lease and continued failure to cure impeded Relevium's use of the Property.

83. Defendant's actions and failures to act rendered the Property, either in whole or in substantial part, unfit for occupancy for the purpose for which the Lease was entered into.

84. Specifically, Defendant rendered the Property unsuitable for the "[g]eneral office use for a pain management clinic and other related lawful uses" contemplated under the Lease.

///

85. Relevium made repeated attempts to redress Defendant's actions and inaction to avoid having to vacate the Property, and provided Defendant with ample notice of, and a reasonable opportunity to cure, these defects.

86. Defendant's actions and inaction forced Relevium to locate and secure alternative premises which would be suitable for the agreed uses contemplated under the Lease.

87. Defendant's actions and inaction forced Relevium to vacate the Property in December of 2021 to relocate to a suitable property free of Defendant's unlawful conduct.

88. As a result of Defendant's unlawful conduct, Plaintiffs have been forced to retain counsel and are entitled to an award of reasonable attorney's fees and costs in their favor.

PRAYER FOR RELIEF

For the foregoing reasons, Plaintiffs pray for judgment in their favor and against Defendant as follows:

1. For an award of damages in excess of $15,000.00;
2. For preliminary and permanent injunctive relief as outlined herein;
3. For an award of reasonable attorney's fees and costs;
4. For interest on monetary damages, including awards of pre- and post-judgment interest;
5. For declaratory relief as outlined herein; and
6. For any other such relief the Court deems appropriate under the circumstances.

JURY DEMAND

Plaintiffs hereby demand to have their case heard by a jury.

///

///

///

///

///

///

///

ARBITRATION EXEMPTION

The total of Plaintiffs' damages, exclusive of interests and costs, which the judge and/or jury is likely to award, exceeds $50,000. Additionally, Plaintiffs assert claims for declaratory relief, which may not be resolved in court-annexed arbitration. Accordingly, this case should be automatically exempted from the arbitration program.

Dated this 28th day of December 2021.

Attorneys for Plaintiffs

TEMPORARY LIMITED POWER OF ATTORNEY FOR USE OF PHARMACY LICENSE, DEA AND OTHER REGISTRATION NUMBERS, AND DEA ORDER FORMS

February 28, 2025

Pursuant to that certain Equity Purchase Agreement, dated on or around March 17, 2025 (the "**Purchase Agreement**") by and among by and among Accident Care Alliance Holdco, LLC, a Delaware limited liability company ("**Buyer**"), Relevium Holdings, Inc., a Delaware corporation ("**Relevium Seller**"), Relevium ASC Holdings, Inc., a Delaware corporation ("**ASC Seller**" and together with Relevium Seller, the "**Sellers**" and each individually, a "**Seller**"), and Andrew Hall, MD, an individual ("**Beneficial Owner**"), and the other parties thereto, Sellers agreed to sell to Buyer, and Buyer agreed to purchase from Sellers, as of the Effective Time, certain Equity Interests of the Sellers as defined under the Purchase Agreement. Capitalized terms used in this Temporary Limited Power of Attorney but not otherwise defined herein shall have the meanings ascribed to such terms in the Purchase Agreement.

The registrant set forth on the signature page hereto (the "**Registrant**") operates an ambulatory surgery center located at the address set forth on Exhibit A (the "**Facility**"). In connection with the operation of the Facility prior to March 17, 2025 (the "**Effective Time**"), the Registrant obtained and has to date maintained licensure with the Nevada State Board of Pharmacy (the "**Board**") and registration with the United States Drug Enforcement Agency (the "DEA"), all as set forth in Exhibit A hereto (the "**Pharmacy Registrations**"). Registrant is authorized under the DEA controlled substance registration number set forth in Exhibit A to sign the current applications for registration and licensure as the registrant under the Controlled Substances Act (the "**Act**").

As of the Effective Time, approximately eighty-five percent (85%) of the Registrant's equity will be transferred to ACA Relevium, LLC, a Delaware limited liability company (the "**Agent**"). In connection with that transfer, Agent will file an original Ambulatory Surgical Center Application (the "**Application**") with the Board for registration under the Board's regulations, but the application will not be processed prior to the Effective Time.

In order to enable Agent to continue to make available pharmacy services, including controlled substances, to patients of Agent and to operate the Facility during the interim period between the Effective Time and approval of Agent's Application, it is necessary for Registrant to grant to Agent a Temporary Limited Power of Attorney to use the Pharmacy Registrations during the interim period.

Registrant desires to grant to Agent and Agent desires to accept from Registrant such Temporary Limited Power of Attorney upon the terms and conditions described herein.

In consideration of the mutual covenants and agreements herein set forth, Agent and Registrant do hereby covenant and agree as follows:

1. Temporary Limited Power of Attorney. In recognition of the need to continue to make available pharmacy services for treatment of Agent's patients and to continue to operate the Facility during the period from the Effective Time until approval of the Application, Registrant hereby makes, constitutes and appoints Agent as its full and lawful attorney-in-fact solely and

exclusively for the limited purpose of and with power to use the Pharmacy Registrations for purposes of ordering, storing, handling and dispensing drugs and taking all other actions reasonably necessary for operation of the Facility in the normal course of operations and in a manner consistent with operations prior to the Effective Time. Registrant further grants this limited power of attorney to Agent to act, effective as of the Effective Time, as the true and lawful agent and attorney-in-fact of Registrant, and to act in the name, place, and stead of Registrant, to execute applications for books of official order forms and to sign such order forms in requisition for Schedules I, II, III, IV and V controlled substances, but only in accordance with the applicable DEA registration and in accordance with Section 308 of the Act (21 U.S.C. § 828) and part 1305 of Title 21 of the Code of Federal Regulations, as is necessary for the treatment of Agent's patients.

2. Term. The rights, powers and authority granted to Agent hereunder as attorney-in-fact for Registrant shall become effective at the Effective Time and shall continue in effect until the earlier of the following events: (a) Agent receives all notices of the Board's approval of its Application and completes an inventory of all controlled substances then in its possession (the "**Notice**"); or (b) expiration of ninety (90) days following the Effective Time. Notwithstanding the foregoing, in the event Agent's commercially reasonable efforts to obtain a new pharmacy license is delayed, Registrant agrees to grant a reasonable extension of the term for a period of time deemed reasonable by Registrant and Agent which will cover the period until Agent, using commercially reasonable efforts to obtain such Notice, receives the Notice.

3. Liability. In accordance with the requirements of the DEA and the Board, Registrant acknowledges that Registrant remains liable for actions taken by Agent during the period this Temporary Limited Power of Attorney is in effect.

4. Covenants. Registrant grants this power of attorney based upon the following covenants and warranties of the Agent:

i. Agent shall follow and abide by all federal and state laws governing the regulation of controlled substances and pharmacy practice at all times while utilizing this Temporary Limited Power of Attorney;

ii. Agent shall defend, indemnify and hold Registrant harmless from and against any liability, loss, damage or expense (including, without limitation, reasonable counsel fees and expenses) arising out of or in connection with the Agent's use or misuse of this Temporary Limited Power of Attorney.

5. Entire Agreement; Amendment Governing Laws; Headings; Severability. This Temporary Limited Power of Attorney constitutes the entire agreement of the parties with respect to use of the Pharmacy Registrations. Any alteration or modification of the provisions of this Temporary Limited Power of Attorney shall not be effective unless reduced to writing or executed by the parties. This Temporary Limited Power of Attorney is governed by and shall be construed under the laws of the State of Delaware. Paragraph headings are for convenience of reference only and shall not be used in the interpretation of this Temporary Limited Power of Attorney. The terms and provisions of this Temporary Limited Power of Attorney are severable, and should any clause or provision hereof be unenforceable or be declared invalid for any reason whatsoever, this Temporary Limited Power of Attorney shall be construed and read as if such invalid or unenforceable clause or provision were omitted.

IN WITNESS WHEREOF, Registrant and Agent have executed this Temporary Limited Power of Attorney for use of the Pharmacy Registrations in multiple counterparts, each of which shall be considered an original, as of the date first written above.

Pharmacist Name: Lee Dukes, PharmD NV Pharmacist License #: 19088

As the employed/contracted pharmacist, for (ASC/RC Name): Fresenius Vascular Care Henderson ASC, LLC :

I understand that I am responsible for establishing policies and procedures which (NAC 639.4996):

a) Are consistent with the policies and procedures developed pursuant to NAC 639.447;
b) Require to maintain records in accordance with the provisions of NAC 639.485 and 639.485;
c) Address the purchase, storage, maintenance of records and dispensing of drugs and investigational drugs;
d) Require maintenance of a perpetual inventory of all controlled substances;
e) Prescribe the procedure for quarantining and destroying drugs and investigational drugs that are expired, adulterated, mislabeled or otherwise unsafe for human use;
f) Require the storage of drugs and investigational drugs in accordance with the specifications of the manufacturer;
g) Ensure that the ASC and RC dispenses drugs and investigational drugs pursuant to chart orders and in accordance with applicable state and federal laws; and
h) Ensure that all compounding is
    a. Performed by a registered pharmacist in accordance with the provisions of NRS and NAC 639; or
    b. If performed by an employee of the ASC or RC, other than a registered pharmacist, performed:
        i. In accordance with the provisions of NRS and NAC 639;
        ii. In a location designated for compounding that is clean and disinfected before each act of compounding; and
        iii. By a person who has completed training for the type of compounding that will be performed.

I understand that I shall (NAC 639.4998):

a) Visit the ASC or RC at least once each month to:
    a. Evaluate the effectiveness of the policies and procedures established pursuant to NAC 693.4996; and
    b. Confirm that the ASC or RC is complying with those policies and procedures, the below provisions.
b) Maintain documentation of each visit that the pharmacist makes;
c) Conduct an audit at least once each month using a sufficient number of records of the ASC or RC, including, without limitation, records of patients and records relating to the purchasing, storing and dispensing of drugs and investigational drugs, which must be randomly selected, to determine whether:
    a. The records indicate that the drugs and investigational drugs are dispensed in a safe and effective manner in accordance with accepted standards of practice and the specifications of the manufacturer;
    b. Drugs and investigational drugs are diluted in accordance with accepted standards of practice or pursuant to the specifications of the manufacturer;
    c. The records demonstrate:
        i. That a discrepancy does not exist in the number of drugs and investigational drugs that are in vials designated by the manufacturer for a single use which are dispensed and the number of patients who receive such drugs and investigational drugs; and
        ii. That drugs, not including investigational drugs, which are in vials designated by the manufacturer for a single use and any remaining medication in those vials are discarded after use;
    d. The records demonstrate that drugs, not including investigational drugs, which are in vials designated by the manufacturer for more than one use are discarded when the medication in the vials has expired or not more than 28 days after the initial breach of the vial;
    e. The employees of the ASC or RC properly maintain accurate records relating to drugs and investigational drugs; and
    f. The employees of the ASC or RC properly monitor and maintain the perpetual inventory required pursuant to paragraph (d) of subsection 1 of NAC 639.4996; and
d) Submit a written report, including, without limitation, a written explanation, to the Board not later than 5 business days after the pharmacist determines that:
    a. The ASC or RC is violating a state or federal law which affects the care and safety of a patient;
    b. There is a discrepancy of 5 percent or more between the actual quantity of a controlled substance in the possession of the ASC or RC and the amount of the controlled substance that should be in the possession of the ASC or RC according to the records of the ASC or RC, including, without limitation:
        i. Purchase orders and invoices for the controlled substance;
        ii. Records which indicate the removal of the controlled substance from the storage area;
        iii. Patient records;
        iv. Records which indicate the return of the controlled substance to the manufacturer;
        v. Records which indicate that the controlled substance was destroyed; and
        vi. Any other record for the controlled substance;
    c. The recovery center or surgical center has intentionally or recklessly failed to create or maintain a record required by the policies and procedures established pursuant to NAC 639.4996;
    d. The recovery center or surgical center is administering a drug or an investigational drug in violation of accepted standards of practice or the specifications of the manufacturer; or
    e. The recovery center or surgical center is engaged in a practice which endangers the health, safety or welfare of a patient or employee of the recovery center or surgical center.

Section 8: Personal and Professional History of the Employed/Contracted Pharmacist	Yes	No
1. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		✔
2. Have you been charged, arrested, or convicted of a felony or misdemeanor in any state?		✔
3. Have you been the subject of a board citation or an administrative action whether completed or pending in any state?		✔
4. Has your license been subjected to any discipline for violation of pharmacy or drug laws in any state?		✔

Please use and make copies of this page (if necessary) to provide information regarding any questions, 1-4, you have marked "YES" to in section 8 of the application. A signed statement of explanation for each event and a copy of all documents that identify the circumstance or contain an order, agreement or other disposition for the event must be provided.

Dear Sir/Madam:

Please find attached the Ambulatory Surgical Center (ASC) and Recovery Center Application for Fresenius Vascular Care Henderson ASC, LLC. The application and attachments are as follows:

1. Application – fully signed
2. The owners are as follows:
   a. Fresenius Vascular Care, Inc. 15.00%
   b. NKDHC (Rudnitsky), PLLC 28.33%
   c. Kidney Specialist Surgical Center SE, LLC 28.33%
   d. NNC VAC, LLC 28.33%
3. Certificate of Good Standing from the Nevada Secretary of State
4. Personal History Record Application is not required as there are no individuals with ownership in this entity.
5. Credit Card Authorization for $500 fee.

Please note that the certificate of occupancy and ASC license for the above-mentioned entity are expected to be received in April and June of this year.

Thank you for your attention to this request. If you have any questions, please contact Rhonda.palumbo@azuracare.com or by phone at 267-353-9145.

Sincerely,

Rhonda Palumbo
Director of Physician Services/Business Contracts

Enclosure

SECRETARY OF STATE

STATE OF NEVADA

CERTIFICATE OF EXISTENCE WITH STATUS IN GOOD STANDING

I, FRANCISCO V. AGUILAR, the duly qualified and elected Nevada Secretary of State, do hereby certify that I am, by the laws of said State, the custodian of the records relating to filings by corporations, non-profit corporations, corporations sole, limited-liability companies, limited partnerships, limited-liability partnerships and business trusts pursuant to Title 7 of the Nevada Revised Statutes which are either presently in a status of good standing or were in good standing for a time period subsequent of 1976 and am the proper officer to execute this certificate

I further certify that the records of the Nevada Secretary of State, at the date of this certificate, evidence **Fresenius Vascular Care Henderson ASC, LLC** as a FOREIGN LIMITED-LIABILITY COMPANY duly organized or formed and existing, or duly qualified or registered, as applicable, under and by virtue of the laws of the State of Nevada since 02/02/2023, and in good standing in this State.

I further certify that the above FOREIGN LIMITED-LIABILITY COMPANY has its formation or qualification document and no amendments on file in this office as of the date of this certificate.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the Great Seal of this State, at my office on 02/11/2025.

FRANCISCO V. AGUILAR
Secretary of State

Section 7: Employed/Contracted Pharmacist (MUST BE COMPLETED BY the Employed/Contracted Pharmacist)

Pharmacist Name: Michelle McCarthy NV Pharmacist License #: 22808

As the employed/contracted pharmacist, for (ASC/RC Name): Horizon Ridge Surgery Center, LLC :

I understand that I am responsible for establishing policies and procedures which (NAC 639.4996):

a) Are consistent with the policies and procedures developed pursuant to NAC 639.447;
b) Require to maintain records in accordance with the provisions of NAC 639.485 and 639.485;
c) Address the purchase, storage, maintenance of records and dispensing of drugs and investigational drugs;
d) Require maintenance of a perpetual inventory of all controlled substances;
e) Prescribe the procedure for quarantining and destroying drugs and investigational drugs that are expired, adulterated, mislabeled or otherwise unsafe for human use;
f) Require the storage of drugs and investigational drugs in accordance with the specifications of the manufacturer;
g) Ensure that the ASC and RC dispenses drugs and investigational drugs pursuant to chart orders and in accordance with applicable state and federal laws; and
h) Ensure that all compounding is
    a. Performed by a registered pharmacist in accordance with the provisions of NRS and NAC 639; or
    b. If performed by an employee of the ASC or RC, other than a registered pharmacist, performed:
        i. In accordance with the provisions of NRS and NAC 639;
        ii. In a location designated for compounding that is clean and disinfected before each act of compounding; and
        iii. By a person who has completed training for the type of compounding that will be performed.

I understand that I shall (NAC 639.4998):

a) Visit the ASC or RC at least once each month to:
    a. Evaluate the effectiveness of the policies and procedures established pursuant to NAC 693.4996; and
    b. Confirm that the ASC or RC is complying with those policies and procedures, the below provisions.
b) Maintain documentation of each visit that the pharmacist makes;
c) Conduct an audit at least once each month using a sufficient number of records of the ASC or RC, including, without limitation, records of patients and records relating to the purchasing, storing and dispensing of drugs and investigational drugs, which must be randomly selected, to determine whether:
    a. The records indicate that the drugs and investigational drugs are dispensed in a safe and effective manner in accordance with accepted standards of practice and the specifications of the manufacturer;
    b. Drugs and investigational drugs are diluted in accordance with accepted standards of practice or pursuant to the specifications of the manufacturer;
    c. The records demonstrate:
        i. That a discrepancy does not exist in the number of drugs and investigational drugs that are in vials designated by the manufacturer for a single use which are dispensed and the number of patients who receive such drugs and investigational drugs; and
        ii. That drugs, not including investigational drugs, which are in vials designated by the manufacturer for a single use and any remaining medication in those vials are discarded after use;
    d. The records demonstrate that drugs, not including investigational drugs, which are in vials designated by the manufacturer for more than one use are discarded when the medication in the vials has expired or not more than 28 days after the initial breach of the vial;
    e. The employees of the ASC or RC properly maintain accurate records relating to drugs and investigational drugs; and
    f. The employees of the ASC or RC properly monitor and maintain the perpetual inventory required pursuant to paragraph (d) of subsection 1 of NAC 639.4996; and
d) Submit a written report, including, without limitation, a written explanation, to the Board not later than 5 business days after the pharmacist determines that:
    a. The ASC or RC is violating a state or federal law which affects the care and safety of a patient;
    b. There is a discrepancy of 5 percent or more between the actual quantity of a controlled substance in the possession of the ASC or RC and the amount of the controlled substance that should be in the possession of the ASC or RC according to the records of the ASC or RC, including, without limitation:
        i. Purchase orders and invoices for the controlled substance;
        ii. Records which indicate the removal of the controlled substance from the storage area;
        iii. Patient records;
        iv. Records which indicate the return of the controlled substance to the manufacturer;
        v. Records which indicate that the controlled substance was destroyed; and
        vi. Any other record for the controlled substance;
    c. The recovery center or surgical center has intentionally or recklessly failed to create or maintain a record required by the policies and procedures established pursuant to NAC 639.4996;
    d. The recovery center or surgical center is administering a drug or an investigational drug in violation of accepted standards of practice or the specifications of the manufacturer; or
    e. The recovery center or surgical center is engaged in a practice which endangers the health, safety or welfare of a patient or employee of the recovery center or surgical center.

Section 8: Personal and Professional History of the Employed/Contracted Pharmacist	Yes	No
1. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		✓

Section 7: Employed/Contracted Pharmacist (MUST BE COMPLETED BY the Employed/Contracted Pharmacist)

Pharmacist Name: Michelle McCarthy NV Pharmacist License #: 22808

As the employed/contracted pharmacist, for (ASC/RC Name): Queensridge Surgery Center, LLC :

I understand that I am responsible for establishing policies and procedures which (NAC 639.4996):

a) Are consistent with the policies and procedures developed pursuant to NAC 639.447;
b) Require to maintain records in accordance with the provisions of NAC 639.485 and 639.485;
c) Address the purchase, storage, maintenance of records and dispensing of drugs and investigational drugs;
d) Require maintenance of a perpetual inventory of all controlled substances;
e) Prescribe the procedure for quarantining and destroying drugs and investigational drugs that are expired, adulterated, mislabeled or otherwise unsafe for human use;
f) Require the storage of drugs and investigational drugs in accordance with the specifications of the manufacturer;
g) Ensure that the ASC and RC dispenses drugs and investigational drugs pursuant to chart orders and in accordance with applicable state and federal laws; and
h) Ensure that all compounding is
    a. Performed by a registered pharmacist in accordance with the provisions of NRS and NAC 639; or
    b. If performed by an employee of the ASC or RC, other than a registered pharmacist, performed:
        i. In accordance with the provisions of NRS and NAC 639;
        ii. In a location designated for compounding that is clean and disinfected before each act of compounding; and
        iii. By a person who has completed training for the type of compounding that will be performed.

I understand that I shall (NAC 639.4998):

a) Visit the ASC or RC at least once each month to:
    a. Evaluate the effectiveness of the policies and procedures established pursuant to NAC 693.4996; and
    b. Confirm that the ASC or RC is complying with those policies and procedures, the below provisions.
b) Maintain documentation of each visit that the pharmacist makes;
c) Conduct an audit at least once each month using a sufficient number of records of the ASC or RC, including, without limitation, records of patients and records relating to the purchasing, storing and dispensing of drugs and investigational drugs, which must be randomly selected, to determine whether:
    a. The records indicate that the drugs and investigational drugs are dispensed in a safe and effective manner in accordance with accepted standards of practice and the specifications of the manufacturer;
    b. Drugs and investigational drugs are diluted in accordance with accepted standards of practice or pursuant to the specifications of the manufacturer;
    c. The records demonstrate:
        i. That a discrepancy does not exist in the number of drugs and investigational drugs that are in vials designated by the manufacturer for a single use which are dispensed and the number of patients who receive such drugs and investigational drugs; and
        ii. That drugs, not including investigational drugs, which are in vials designated by the manufacturer for a single use and any remaining medication in those vials are discarded after use;
    d. The records demonstrate that drugs, not including investigational drugs, which are in vials designated by the manufacturer for more than one use are discarded when the medication in the vials has expired or not more than 28 days after the initial breach of the vial;
    e. The employees of the ASC or RC properly maintain accurate records relating to drugs and investigational drugs; and
    f. The employees of the ASC or RC properly monitor and maintain the perpetual inventory required pursuant to paragraph (d) of subsection 1 of NAC 639.4996; and
d) Submit a written report, including, without limitation, a written explanation, to the Board not later than 5 business days after the pharmacist determines that:
    a. The ASC or RC is violating a state or federal law which affects the care and safety of a patient;
    b. There is a discrepancy of 5 percent or more between the actual quantity of a controlled substance in the possession of the ASC or RC and the amount of the controlled substance that should be in the possession of the ASC or RC according to the records of the ASC or RC, including, without limitation:
        i. Purchase orders and invoices for the controlled substance;
        ii. Records which indicate the removal of the controlled substance from the storage area;
        iii. Patient records;
        iv. Records which indicate the return of the controlled substance to the manufacturer;
        v. Records which indicate that the controlled substance was destroyed; and
        vi. Any other record for the controlled substance;
    c. The recovery center or surgical center has intentionally or recklessly failed to create or maintain a record required by the policies and procedures established pursuant to NAC 639.4996;
    d. The recovery center or surgical center is administering a drug or an investigational drug in violation of accepted standards of practice or the specifications of the manufacturer; or
    e. The recovery center or surgical center is engaged in a practice which endangers the health, safety or welfare of a patient or employee of the recovery center or surgical center.

Section 8: Personal and Professional History of the Employed/Contracted Pharmacist	Yes	No
1. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		✔

Pharmacist Name: Michelle McCarthy NV Pharmacist License #: 22808

As the employed/contracted pharmacist, for (ASC/RC Name): Queensridge Surgical Recovery Suites :

I understand that I am responsible for establishing policies and procedures which (NAC 639.4996):

a) Are consistent with the policies and procedures developed pursuant to NAC 639.447;
b) Require to maintain records in accordance with the provisions of NAC 639.485 and 639.485;
c) Address the purchase, storage, maintenance of records and dispensing of drugs and investigational drugs;
d) Require maintenance of a perpetual inventory of all controlled substances;
e) Prescribe the procedure for quarantining and destroying drugs and investigational drugs that are expired, adulterated, mislabeled or otherwise unsafe for human use;
f) Require the storage of drugs and investigational drugs in accordance with the specifications of the manufacturer;
g) Ensure that the ASC and RC dispenses drugs and investigational drugs pursuant to chart orders and in accordance with applicable state and federal laws; and
h) Ensure that all compounding is
    a. Performed by a registered pharmacist in accordance with the provisions of NRS and NAC 639; or
    b. If performed by an employee of the ASC or RC, other than a registered pharmacist, performed:
        i. In accordance with the provisions of NRS and NAC 639;
        ii. In a location designated for compounding that is clean and disinfected before each act of compounding; and
        iii. By a person who has completed training for the type of compounding that will be performed.

I understand that I shall (NAC 639.4998):

a) Visit the ASC or RC at least once each month to:
    a. Evaluate the effectiveness of the policies and procedures established pursuant to NAC 693.4996; and
    b. Confirm that the ASC or RC is complying with those policies and procedures, the below provisions.
b) Maintain documentation of each visit that the pharmacist makes;
c) Conduct an audit at least once each month using a sufficient number of records of the ASC or RC, including, without limitation, records of patients and records relating to the purchasing, storing and dispensing of drugs and investigational drugs, which must be randomly selected, to determine whether:
    a. The records indicate that the drugs and investigational drugs are dispensed in a safe and effective manner in accordance with accepted standards of practice and the specifications of the manufacturer;
    b. Drugs and investigational drugs are diluted in accordance with accepted standards of practice or pursuant to the specifications of the manufacturer;
    c. The records demonstrate:
        i. That a discrepancy does not exist in the number of drugs and investigational drugs that are in vials designated by the manufacturer for a single use which are dispensed and the number of patients who receive such drugs and investigational drugs; and
        ii. That drugs, not including investigational drugs, which are in vials designated by the manufacturer for a single use and any remaining medication in those vials are discarded after use;
    d. The records demonstrate that drugs, not including investigational drugs, which are in vials designated by the manufacturer for more than one use are discarded when the medication in the vials has expired or not more than 28 days after the initial breach of the vial;
    e. The employees of the ASC or RC properly maintain accurate records relating to drugs and investigational drugs; and
    f. The employees of the ASC or RC properly monitor and maintain the perpetual inventory required pursuant to paragraph (d) of subsection 1 of NAC 639.4996; and
d) Submit a written report, including, without limitation, a written explanation, to the Board not later than 5 business days after the pharmacist determines that:
    a. The ASC or RC is violating a state or federal law which affects the care and safety of a patient;
    b. There is a discrepancy of 5 percent or more between the actual quantity of a controlled substance in the possession of the ASC or RC and the amount of the controlled substance that should be in the possession of the ASC or RC according to the records of the ASC or RC, including, without limitation:
        i. Purchase orders and invoices for the controlled substance;
        ii. Records which indicate the removal of the controlled substance from the storage area;
        iii. Patient records;
        iv. Records which indicate the return of the controlled substance to the manufacturer;
        v. Records which indicate that the controlled substance was destroyed; and
        vi. Any other record for the controlled substance;
    c. The recovery center or surgical center has intentionally or recklessly failed to create or maintain a record required by the policies and procedures established pursuant to NAC 639.4996;
    d. The recovery center or surgical center is administering a drug or an investigational drug in violation of accepted standards of practice or the specifications of the manufacturer; or
    e. The recovery center or surgical center is engaged in a practice which endangers the health, safety or welfare of a patient or employee of the recovery center or surgical center.

Section 8: Arrests, Detentions, Litigations, Arbitrations.	Yes	No
1. Have you ever been convicted of, or entered, a plea of guilty, guilty by mentally ill or nolo contendere to any criminal offense or civil violation, federal or state, for any reason whatsoever, regardless of the disposition of the event? (Except minor traffic citations.)		✓
2. If you answered "yes" to question 1, was the offense or violation related to drugs, including prescription drugs and/or controlled substances, the manufacturer or distribution of drugs or the practice of pharmacy?		✓
3. Have you ever had a civil or criminal record expunged or sealed by a court order?		✓
4. Have you, as an individual, member or a company, partner, or owner, director or officer of a corporation, ever been a party to a lawsuit as either a plaintiff or defendant (including any administrative proceedings before a licensing board) or of an arbitration as either a claimant or respondent? (Other than divorces.)		✓
5. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) been a party to a lawsuit (including any administrative proceedings before a licensing board), arbitration or bankruptcy?		✓
6. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer or director) ever appeared before any licensing agency or similar authority in or outside the State of Nevada for any reason whatsoever (including any disciplinary or board citation)?		✓
7. Have you ever been denied a personal license, permit, certificate or registration for a privileged, occupational or professional activity?		✓
8. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner member, officer or director) ever been refused a business license.		✓
9. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) ever surrendered a license, permit, certificate or registration relating to the pharmaceutical industry voluntarily or otherwise (other than upon voluntary closure of a manufacturer).		✓
10. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		✓

I certify under penalty of perjury that the information contained in this application is accurate, true and complete in all material respects. I understand that making any false representation in this application is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire application and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. In the event this application is approved I agree to comply with all applicable federal and state statutes and regulations governing this license or registration and understand that any violation may result in discipline.

Pharmacist Name: Chike Okolo NV Pharmacist License #: 19267

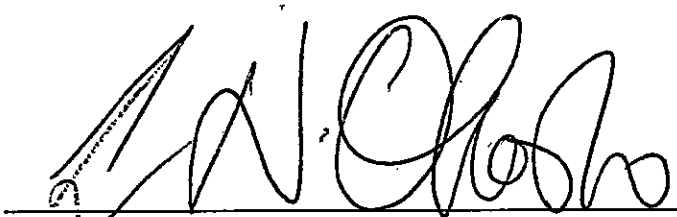
As the employed/contracted pharmacist, for (ASC/RC Name): Sahara Surgery Center ;

I understand that I am responsible for establishing policies and procedures which (NAC 639.4996):

a) Are consistent with the policies and procedures developed pursuant to NAC 639.447;
b) Require to maintain records in accordance with the provisions of NAC 639.485 and 639.485;
c) Address the purchase, storage, maintenance of records and dispensing of drugs and investigational drugs;
d) Require maintenance of a perpetual inventory of all controlled substances;
e) Prescribe the procedure for quarantining and destroying drugs and investigational drugs that are expired, adulterated, mislabeled or otherwise unsafe for human use;
f) Require the storage of drugs and investigational drugs in accordance with the specifications of the manufacturer;
g) Ensure that the ASC and RC dispenses drugs and investigational drugs pursuant to chart orders and in accordance with applicable state and federal laws; and
h) Ensure that all compounding is
    a. Performed by a registered pharmacist in accordance with the provisions of NRS and NAC 639; or
    b. If performed by an employee of the ASC or RC, other than a registered pharmacist, performed:
        i. In accordance with the provisions of NRS and NAC 639;
        ii. In a location designated for compounding that is clean and disinfected before each act of compounding; and
        iii. By a person who has completed training for the type of compounding that will be performed.

I understand that I shall (NAC 639.4998):

a) Visit the ASC or RC at least once each month to:
    a. Evaluate the effectiveness of the policies and procedures established pursuant to NAC 693.4996; and
    b. Confirm that the ASC or RC is complying with those policies and procedures, the below provisions.
b) Maintain documentation of each visit that the pharmacist makes;
c) Conduct an audit at least once each month using a sufficient number of records of the ASC or RC, including, without limitation, records of patients and records relating to the purchasing, storing and dispensing of drugs and investigational drugs, which must be randomly selected, to determine whether:
    a. The records indicate that the drugs and investigational drugs are dispensed in a safe and effective manner in accordance with accepted standards of practice and the specifications of the manufacturer;
    b. Drugs and investigational drugs are diluted in accordance with accepted standards of practice or pursuant to the specifications of the manufacturer;
    c. The records demonstrate:
        i. That a discrepancy does not exist in the number of drugs and investigational drugs that are in vials designated by the manufacturer for a single use which are dispensed and the number of patients who receive such drugs and investigational drugs; and
        ii. That drugs, not including investigational drugs, which are in vials designated by the manufacturer for a single use and any remaining medication in those vials are discarded after use;
    d. The records demonstrate that drugs, not including investigational drugs, which are in vials designated by the manufacturer for more than one use are discarded when the medication in the vials has expired or not more than 28 days after the initial breach of the vial;
    e. The employees of the ASC or RC properly maintain accurate records relating to drugs and investigational drugs; and
    f. The employees of the ASC or RC properly monitor and maintain the perpetual inventory required pursuant to paragraph (d) of subsection 1 of NAC 639.4996; and
d) Submit a written report, including, without limitation, a written explanation, to the Board not later than 5 business days after the pharmacist determines that:
    a. The ASC or RC is violating a state or federal law which affects the care and safety of a patient;
    b. There is a discrepancy of 5 percent or more between the actual quantity of a controlled substance in the possession of the ASC or RC and the amount of the controlled substance that should be in the possession of the ASC or RC according to the records of the ASC or RC, including, without limitation:
        i. Purchase orders and invoices for the controlled substance;
        ii. Records which indicate the removal of the controlled substance from the storage area;
        iii. Patient records;
        iv. Records which indicate the return of the controlled substance to the manufacturer;
        v. Records which indicate that the controlled substance was destroyed; and
        vi. Any other record for the controlled substance;
    c. The recovery center or surgical center has intentionally or recklessly failed to create or maintain a record required by the policies and procedures established pursuant to NAC 639.4996;
    d. The recovery center or surgical center is administering a drug or an investigational drug in violation of accepted standards of practice or the specifications of the manufacturer; or
    e. The recovery center or surgical center is engaged in a practice which endangers the health, safety or welfare of a patient or employee of the recovery center or surgical center.



Section 8: Personal and Professional History of the Employed/Contracted Pharmacist	Yes	No
1. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		✓
2. Have you been charged, arrested, or convicted of a felony or misdemeanor in any state?		✓
3. Have you been the subject of a board citation or an administrative action whether completed or pending in any state?		✓
4. Has your license been subjected to any discipline for violation of pharmacy or drug laws in any state?		✓

Please use and make copies of this page (if necessary) to provide information regarding any questions, 1-4, you have marked "YES" to in section 8 of the application. A signed statement of explanation for each event and a copy of all documents that identify the circumstance or contain an order, agreement or other disposition for the event must be provided.

b) Require to maintain records in accordance with the provisions of NAC 639.485 and 639.485;
c) Address the purchase, storage, maintenance of records and dispensing of drugs and investigational drugs;
d) Require maintenance of a perpetual inventory of all controlled substances;
e) Prescribe the procedure for quarantining and destroying drugs and investigational drugs that are expired, adulterated, mislabeled or otherwise unsafe for human use;
f) Require the storage of drugs and investigational drugs in accordance with the specifications of the manufacturer;
g) Ensure that the ASC and RC dispenses drugs and investigational drugs pursuant to chart orders and in accordance with applicable state and federal laws; and
h) Ensure that all compounding is
    a. Performed by a registered pharmacist in accordance with the provisions of NRS and NAC 639; or
    b. If performed by an employee of the ASC or RC, other than a registered pharmacist, performed:
        i. In accordance with the provisions of NRS and NAC 639;
        ii. In a location designated for compounding that is clean and disinfected before each act of compounding; and
        iii. By a person who has completed training for the type of compounding that will be performed.

I understand that I shall (NAC 639.4998):

a) Visit the ASC or RC at least once each month to:
    a. Evaluate the effectiveness of the policies and procedures established pursuant to NAC 693.4996; and
    b. Confirm that the ASC or RC is complying with those policies and procedures, the below provisions.
b) Maintain documentation of each visit that the pharmacist makes;
c) Conduct an audit at least once each month using a sufficient number of records of the ASC or RC, including, without limitation, records of patients and records relating to the purchasing, storing and dispensing of drugs and investigational drugs, which must be randomly selected, to determine whether:
    a. The records indicate that the drugs and investigational drugs are dispensed in a safe and effective manner in accordance with accepted standards of practice and the specifications of the manufacturer;
    b. Drugs and investigational drugs are diluted in accordance with accepted standards of practice or pursuant to the specifications of the manufacturer;
    c. The records demonstrate:
        i. That a discrepancy does not exist in the number of drugs and investigational drugs that are in vials designated by the manufacturer for a single use which are dispensed and the number of patients who receive such drugs and investigational drugs; and
        ii. That drugs, not including investigational drugs, which are in vials designated by the manufacturer for a single use and any remaining medication in those vials are discarded after use;
    d. The records demonstrate that drugs, not including investigational drugs, which are in vials designated by the manufacturer for more than one use are discarded when the medication in the vials has expired or not more than 28 days after the initial breach of the vial;
    e. The employees of the ASC or RC properly maintain accurate records relating to drugs and investigational drugs; and
    f. The employees of the ASC or RC properly monitor and maintain the perpetual inventory required pursuant to paragraph (d) of subsection 1 of NAC 639.4996; and
d) Submit a written report, including, without limitation, a written explanation, to the Board not later than 5 business days after the pharmacist determines that:
    a. The ASC or RC is violating a state or federal law which affects the care and safety of a patient;
    b. There is a discrepancy of 5 percent or more between the actual quantity of a controlled substance in the possession of the ASC or RC and the amount of the controlled substance that should be in the possession of the ASC or RC according to the records of the ASC or RC, including, without limitation:
        i. Purchase orders and invoices for the controlled substance;
        ii. Records which indicate the removal of the controlled substance from the storage area;
        iii. Patient records;
        iv. Records which indicate the return of the controlled substance to the manufacturer;
        v. Records which indicate that the controlled substance was destroyed; and
        vi. Any other record for the controlled substance;
    c. The recovery center or surgical center has intentionally or recklessly failed to create or maintain a record required by the policies and procedures established pursuant to NAC 639.4996;
    d. The recovery center or surgical center is administering a drug or an investigational drug in violation of accepted standards of practice or the specifications of the manufacturer; or
    e. The recovery center or surgical center is engaged in a practice which endangers the health, safety or welfare of a patient or employee of the recovery center or surgical center.

Section 8: Personal and Professional History of the Employed/Contracted Pharmacist	Yes	No
1. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		✓

Section 8: Arrests, Detentions, Litigations, Arbitrations.	Yes	No
1. Have you ever been convicted of, or entered, a plea of guilty, guilty by mentally ill or nolo contendere to any criminal offense or civil violation, federal or state, for any reason whatsoever, regardless of the disposition of the event? (Except minor traffic citations.)		✔
2. If you answered "yes" to question 1, was the offense or violation related to drugs, including prescription drugs and/or controlled substances, the manufacturer or distribution of drugs or the practice of pharmacy?		✔
3. Have you ever had a civil or criminal record expunged or sealed by a court order?		✔
4. Have you, as an individual, member or a company, partner, or owner, director or officer of a corporation, ever been a party to a lawsuit as either a plaintiff or defendant (including any administrative proceedings before a licensing board) or of an arbitration as either a claimant or respondent? (Other than divorces.)		✔
5. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) been a party to a lawsuit (including any administrative proceedings before a licensing board), arbitration or bankruptcy?		✔
6. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer or director) ever appeared before any licensing agency or similar authority in or outside the State of Nevada for any reason whatsoever (including any disciplinary or board citation)?		✔
7. Have you ever been denied a personal license, permit, certificate or registration for a privileged, occupational or professional activity?		✔
8. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner member, officer or director) ever been refused a business license.		✔
9. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) ever surrendered a license, permit, certificate or registration relating to the pharmaceutical industry voluntarily or otherwise (other than upon voluntary closure of a manufacturer).		✔
10. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		✔

I certify under penalty of perjury that the information contained in this application is accurate, true and complete in all material respects. I understand that making any false representation in this application is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire application and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. In the event this application is approved I agree to comply with all applicable federal and state statutes and regulations governing this license or registration and understand that any violation may result in discipline.

Section 9: Statement of Responsibility - MUST BE COMPLETED by an Authorized Person (NAC 639.945)

Statement of Responsibility

1. I am the Group Chief Operating Officer (title) for RLS (USA) Inc. (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be responsible for any violations of pharmacy law that may occur in the Pharmacy owned by such owner(s), shareholder(s), member(s), or partner(s).
3. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be named in any action taken by the Nevada State Board of Pharmacy against the Pharmacy.
4. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) cannot require or permit the pharmacist(s) in said Pharmacy to violate any provision of local, state, or federal laws or regulations pertaining to the practice of pharmacy.
5. I further understand and acknowledge that Nevada law requires that each pharmacy located inside the State of Nevada employ only pharmacists, intern pharmacists, pharmaceutical technicians, and technicians in training that are licensed by the Nevada State Board of Pharmacy. (NRS 639.100).
6. I further understand and acknowledge that Nevada law requires that each pharmacy located outside the State of Nevada engaged in providing pharmacy services into Nevada employs at least one pharmacist licensed by the Nevada State Board of Pharmacy who will be responsible for any prescription dispensed to a patient located in Nevada and responsible for any acts or omissions of pharmacy personnel who are not registered with the Board. (NRS 639.2328).

Section 11: Managing Pharmacist Acknowledgement, Professional/Personal History – REQUIRED TO BE COMPLETED BY THE MANAGING PHARMACIST FOR NEVADA LOCATED PHARMACY APPLICANTS ONLY

Managing Pharmacist Name: Christopher Southwick Pharmacist Registration #: 11480

Pharmacy Name: RLS (USA) Inc.

Initial each statement below to indicate you have read and agree with the following:

CS I understand that as the managing pharmacist I am responsible for compliance by the pharmacy and its personnel with all state and federal laws and regulations relating to the operation of the pharmacy and the practice of pharmacy. I understand my license can be revoked or that I can be subject of disciplinary action if such laws or regulations are knowingly violated in the pharmacy in which I am the managing pharmacist.

CS I understand within 48 hours after I report for duty as the managing pharmacist, I shall complete an inventory of all controlled substances of the pharmacy pursuant to 21 CFR Part 1304 and maintain a copy of the inventory in the file at the pharmacy.

CS I understand that if I cease to be managing pharmacist of the above-named pharmacy, I will jointly, with the new managing pharmacist, take an inventory of all controlled substances.

CS I understand that as the managing pharmacist I must ensure that all loss or theft of controlled substances are reported on forms provided by the Nevada State Board of Pharmacy and Department of Public Safety within 10 days after the date of discovery of theft or loss. NRS 453.568. Federal regulations require that registrants notify the Field Division Office of the Administration in his area, in writing, of the theft or significant loss of any controlled substance, disposal receptacles or listed chemicals within one business day of discovery of such loss or theft. The registrant shall also complete and submit to the Field Division Office in his area, DEA Form 106 regarding the loss or theft (21 C.F.R. §1301.76(b) and 21 U.S.C. §830(b)(1)(C)).

CS I understand that as the managing pharmacist I must notify the Nevada State Board of Pharmacy of all employment changes of pharmacy staff within 10 days of the change. NAC 639.540

Personal and Professional History	Yes	No
1. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		✔
2. Have you been charged, arrested, or convicted of a felony or misdemeanor in any state?		✔
3. Have you been the subject of a board citation or an administrative action whether completed or pending in any state?	✔	
4. Has your license been subjected to any discipline for violation of pharmacy or drug laws in any state?	✔	

If you marked YES to any questions above, include the following information and provide a signed statement of explanation. Copies of any documents that identify the circumstance or contain an order, agreement or other disposition is required.

Disciplinary Summary
RLS (USA) Inc. Pharmacies

RLS (USA) Inc., f/k/a Amersham Health Nuclear, Medical Pharmacy, 1 Naylon Place, Livingston, NJ 07039

March 8, 2004: New Jersey Board of Pharmacy issued a $225.00 penalty and requested a letter of corrective action as a result of violations of N.J.A.C 13:39-12.2(e) (Prescription label does not have the chemical form of the radioactive drug) and N.J.A.C 13:39-12.4(c) (Missing a current text in the category of "General Practice of Pharmacy") found during an inspection conducted on 12/19/2003. RLS (USA) Inc. satisfied all requirements of the corrective action, paid the fine, and remains in good standing with the New Jersey Board of Pharmacy.

RLS (USA) Inc., f/k/a/ Med-Physics, Inc., d/b/a/ GE Healthcare, 1 Naylon Place, Livingston, NJ 07039

May 19, 2017: New Jersey Board of Pharmacy issued a $5,500.00 penalty and requested a letter of corrective action as a result of violations of N.J.A.C 13:39-11.24(a)6 (Adequate efforts were not made to ensure the pharmacy's quality assurance program) and N.J.A.C 13:39-11.24(a)10 (When test results indicated that the cleanroom did not meet the standards established, the pharmacy failed to immediately cease using the cleanroom that was out of compliance until such time that the cleanroom met the requisite standards) found during an inspection conducted on 8/10/2016. The pharmacy paid the fine and met all requirements of the corrective action, and remains in good standing with the New Jersey Board of Pharmacy.

RLS (USA) Inc., 1283 Mountain View Alviso Road Ste. A - B, Sunnyvale, CA 94089

February 14, 2024: RLS (USA) Inc. failed to follow its written policies and procedures when, on dates ranging from 12/30/2022 to 6/26/2023, it failed to remove pharmacy equipment from use following microbial contamination. This resulted in a violation of California pharmacy law for which the Board issued a Citation. No fine was assessed and the pharmacy took corrective action to address the violations. The pharmacy remains in good standing with the California Board of Pharmacy.

RLS (USA) Inc., 16259 Stagg Street, Ste A, Van Nuys, CA 91406

October 11, 2024: RLS (USA) Inc. failed to timely notify the California Board of Pharmacy upon a change in the Pharmacist-in-Charge. RLS (USA) Inc. operated without an approved PIC for the pharmacy and was fined a total of $1500. RLS complied with all requirements of the citation and the pharmacy remains in good standing with the California Board of Pharmacy.

Re: Inspection Report #8-1066.6
Inspection Date: 12/19/03

Dear Mr. Marzocca:

This letter is to advise you that the New Jersey State Board of Pharmacy has had an opportunity to review information concerning the above inspection report.

Upon review of all available information, the Board has preliminarily found that you have violated:

N.J.A.C. 13:39-12.2(e)
Prescription label does not have the chemical form of the radioactive drug.
$25.00

N.J.A.C. 13:39-12.4(c)
Missing a current text in the category of "General Practice of Pharmacy".
$200.00

The Board has determined that it will offer you an opportunity to settle this matter and thereby avoid the initiation for disciplinary proceedings. Should you wish to avail yourself of this opportunity, you should sign the attached acknowledgment and agree to the following:

1. Pay a penalty in the amount of **$225.00** and provide to the Board a Letter of Corrective Action. (To be paid immediately upon your signing of the attached acknowledgment.)

Alternatively, you may waive your right to a hearing and submit a written statement or explanation to the Board. The Board will then consider your submission and render a final decision, which may include any of the terms set forth above. This disposition will be a public record.

If you do not wish to settle this matter, you may request a hearing. In that event, this letter will serve as notice of the charges against you and a hearing will be scheduled before the Board. At that hearing you may, either personally or with the assistance of an attorney, submit determination concerning the charges of unlawful activity. You should be aware that in making its final decision, the Board may, if unlawful activity has been proven, assess civil penalties in an amount greater than that herein offered in this letter. Additionally, the Board may, if the facts are found to so warrant, enter an order, requiring you to reimburse certain monies, directing you to cease and desist from engaging in unlawful acts and/or requiring you to pay costs incurred by the Board. Should you have any questions concerning this letter or the settlement offer herein, I suggest that you contact the Board at (973).504-6450.

The enclosed certification should be completed and returned to the Board **within fifteen (15) days following your receipt of this letter.** In the event that the Board receives no response from you within this time, the Board's settlement offer will be withdrawn, and the allegations contained here in shall be deemed admitted, and the Board will proceed to finally review that matter and enter an appropriate order.

5/26/04 Exhibit 10E (6)

CERTIFICATION

I, JOHN MARZOCCA, hereby acknowledge that I have read and reviewed the Board's letter dated March 8, 2004 regarding allegations of violations of the Board's enabling act and/or regulations.

Please Check One:

☐ I acknowledge the conduct which has been charged and agree to:

1. Cease and desist in engaging in the conduct alleged and pay a penalty in the amount of **$225.00** (to be paid upon signing of this certification).

2. Send a **Letter of Corrective Action**, as requested by the Board, with this certification.

I am also aware that the action taken against me by the Board herein is a matter of public record, and that the Board's letter and this certification are public documents.

☑ I hereby waive any rights I may have to a hearing in this matter and defend myself against any charges, but ask the Board to consider my explanation before the rendering its final decisions. I understand that the Board may order any of the terms specified in its letter and that the certifications are public documents.

☐ I request a formal administrative hearing to contest the charges specified by the Board. I understand that I will be advised of the time, date and place for that hearing at another time. I am aware that I may be represented by an attorney and that at the time of the hearing I may submit to the Board, testimony and documentation relevant to the charges. I understand that in making its final decision, the Board may, if unlawful activity has been proven, assess civil penalties in an amount greater than that herein offered in its letter and may order such other remedies as it may deem appropriate. I am also aware that this proceeding is a matter of public record and that the Board's letter and this certification are public documents.

Joanne Boyer
Executive Director
Division of Consumer Affairs
New Jersey Board of Pharmacy
124 Halsey Street
Newark, NJ 07101

Dear Ms. Boyer:

We are in receipt of your letter dated 8 March 2004 concerning the alleged deficiencies sited during an inspection of our Livingston, New Jersey facility conducted 19 December 2003. T he alleged deficiencies as stated in your letter are listed below for ease of reference:

N.J.A.C.13:39-12.4(c)
Missing a current edition of a text in the category of "General Practice of Pharmacy".

We at Amersham Health believe that in the spirit of, and pursuant to, New Jersey State Board of Pharmacy Regulations, current texts via computer access, pertaining to the General Practice of Pharmacy meet these requirements of N.J.A.C.13:39-12.4(c). The two texts are USP/NF via internet access, and Pass Assured, a computer text used by our pharmacy technicians to prepare for the PTCB certification test. This computer text covers the following items in the general practice of pharmacy:

Pharmacy Law
Terminology
Calculations
Metric Conversions
Dosage Forms
Aseptic Techniques
Pharmacy Operations
Third Party Reimbursements.

The above notwithstanding, Amersham Health has also purchased a current edition of Remington's "The Science and Practice of Pharmacy" on 11 March 2004.

N.J.A.C.13:39-12.2(e)
Prescription label does not have the chemical form of the radioactive drug.

Amersham Health was unable to locate the definition of chemical form within New Jersey Board of Pharmacy Regulations so we reverted to the DOT interpretation. The Chemical form of a radioactive drug is required on all DOT Bills-of-Lading for radioactive deliveries and is addressed by the U.S D.O.T. under 49 CFR 172.203, and is defined as "a generic chemical description is acceptable for chemical form". Under these conditions Amersham Health can only interpret "chemical form" in NJAC 13:39-12.2(e) to be the name of the radiopharmaceutical drug. Attachment 1 contains an actual prescription label listing the name of the radionuclide (i.e., Tc-99m, In-111, etc...) along with the actual generic chemical (radiopharmaceutical/brand) name of the drug (i.e., Myoview, MAA, MDP, etc...). Amersham Health believes that if one interpreted "chemical form", as "inorganic salt", then all radioactive prescriptions have the potential of being "mislabeled". For example, Tc99mMyoview, Tc99mMDP, Tc99mMag 3, and Tc99mDTPA are "different" radiopharmaceutical drugs used to diagnose different organs within the body. Following the current board of pharmacy labeling

guidelines, and interpreting chemical form as inorganic salt, then all five prescription labels would read "Tc99m Inorganic Salt". The actual drug(brand) name would not have to appear on the label pursuant to regulation, which would cause all five prescriptions to be identical which in turn could be described as "mislabeled". Therefore the only way to assure that a radioactive prescription is not "mislabeled" is to interpret chemical form to be the name of the radiopharmaceutical. The name of the radiopharmaceutical currently appears on all Amersham Health prescriptions.

Based on this understanding Amersham Health respectfully requests that the both "deficiencies" be rescinded, and would like to request an informal meeting to discuss the matter with the board.

If you have any questions or require any additional information, please contact me at (973) 533-9109, or Richard Hughes, Corporate Radiation Safety Officer at (609) 514-6647.

Sincerely,

John Marzocca R.Ph

RE: Inspection Report #8-1066.6

Dear Mr. Marzocca:

The Board reviewed your letter of March 31, 2004 in which you offered mitigation concerning the above referenced Inspection Report.

It was the decision of the Board at the May 26, 2004 meeting, to mitigate the following violation(s):

N.J.A.C.13:39-12.2(e) for $25.00 and deny the mitigation for N.J.A.C.13:39-12.4(c)for $200.00

Please submit the remaining balance in the amount of $200.00 along with a letter of corrective action.

Yours truly,

Joanne Boyer

Re: Inspection #8-1066-16-X
Date of Inspection: August 10, 2016

Dear Mr. Marzocca:

This letter is to advise you that the New Jersey State Board of Pharmacy has had an opportunity to review information concerning the above inspection report.

Upon review of all available information, the Board has preliminarily found that you have violated those items listed on Attachment A.

The Board has determined that it will offer you an opportunity to settle this matter and thereby avoid the initiation for disciplinary proceedings. Should you wish to avail yourself of this opportunity, you **MUST SIGN THE ATTACHED CERTIFICATION** and agree to the following:

PAY A PENALTY IN THE AMOUNT OF $5,500.00 and **PROVIDE TO THE BOARD A LETTER OF CORRECTIVE ACTION.** (To be paid immediately upon your signing of the attached acknowledgment.)

Alternatively you may waive your right to a hearing and submit a written statement or explanation to the Board. The Board will then consider your submission and render a final decision, which may include any of the terms set forth above. This disposition will be a public record. Please take notice that if the Board determines that the initial inspection findings require a reinspection to ensure that cited deficiencies have been properly addressed, you may be subject to any costs associated with the reinspection.

If you do not wish to settle this matter, you may request a hearing. In that event, this letter will serve as notice of the charges against you and a hearing will be scheduled before the Board. At that hearing you may, either personally or with the assistance of an attorney, submit

New Jersey Is An Equal Opportunity Employer • Printed on Recycled Paper and Recyclable

determination concerning the charges of unlawful activity. You should be aware that in making its final decision, the Board may, if unlawful activity has been proven, assess civil penalties in an amount greater than that herein offered in this letter. Additionally, the Board may, if the facts are found to so warrant, enter an order, requiring you to reimburse certain monies, direction you to cease and desist from engaging in unlawful acts and/or requiring you to pay costs incurred by the Board. Should you have any questions concerning this letter or the settlement offer herein, I suggest that you contact the Board at (973) 504-6450.

The enclosed Certification MUST be completed and returned to the Board within fifteen (15) days following your receipt of this letter. In the event that the Board receives no response from you within this time, the Board's settlement offer will be withdrawn, and the allegations contained herein shall be deemed admitted, and the Board will proceed to finally review that matter and enter an appropriate order.

CERTIFICATION

I, JOHN MARZOCCA, hereby acknowledge that I have read and reviewed the Board's letter dated May 19, 2017 regarding allegations of violations of the Board's enabling act and/or regulations.

Please Check One:

[✓] I acknowledge the conduct which has been charged and agree to:

1. **Cease and desist from engaging in the conduct alleged and pay a penalty in the amount of $5,500.00** (to be paid upon signing of this Certification).

2. **Send a Letter of Corrective Action,** as requested by the Board, with this Certification.

I am also aware that the action taken against me by the Board herein is a matter of public record, and that the Board's letter and this Certification are public documents.

[ ] I hereby waive any rights I may have to a hearing in this matter and defend myself against any charges, but ask the Board to consider my explanation before rendering its final decisions. I understand that the Board may order any of the terms specified in its letter and that the Certification are public documents.

[ ] I request a formal administrative hearing to contest the charges specified by the Board. I understand that I will be advised of the time, date and place for that hearing at another time. I am aware that I may be represented by an attorney and that at the time of the hearing I may submit to the Board, testimony and documentation relevant to the charges. I understand that in making its final decision, the Board may, if unlawful activity has been proven, assess civil penalties in an amount greater than that herein offered in its letter and may order such other remedies as it may deem appropriate. I am also aware that this proceeding is a matter of public record and that the Board's letter and this Certification are public documents.

ATTACHMENT A

36. **Med-Physics, Inc., d/b/a GE Healthcare** - 1 Naylon Place, Livingston, New Jersey 07039
Pharmacist-In-Charge: John Marzocca
Bureau File #8-1066-16-X, **Period:** 8/10/16
Reference: Board of Pharmacy inspection conducted per N.J.S.A.45:1-18, N.J.S.A.45:14-48(a)11&12 and a request from the Board to inspect all pharmacies that engage in compounding sterile preparations.

Details

CITE	DESCRIPTION	FINE
N.J.A.C.13:39-11.24(a)6	Adequate efforts were not made to ensure the pharmacy's quality assurance program. Specifically, on June 17, 2015, the pharmacy's internal surface sampling detected a total of twenty-two (22) Colony Forming Units (CFUs) from various locations, including support table used in sterile compounding, the prep room and the pass through. On January 11, 2016, internal surface sampling detected one (1) CFU from the ISO 5 hood, one (1) CFU from Tech Hood 2 and one (1) CFU from Biologic Safety Cabinet (BSC) 6. Sixty-nine (69) CFUs were detected at various testing sites, including support tables, support cars and the dispensing room. On June 27, 2016, according to the pharmacy's internal surface sampling, four (4) CFUs were detected at BSC support table 1, four (4) CFUs were detected at BSC support table 6, one (1) CFU at cart 2 and three (3) CFUs at a general support table. Additionally, a total of twenty-one (21) CFUs were found in the gowning room. On all of these occasions, the pharmacy failed to analyze the species to the genus level in order to exclude the possibility of the existence of highly pathogenic species. By reviewing the cleaning log for the month of June 2016, the pharmacy failed to specify the details of cleaning in the event of CFU detection.	**$3,000.00**

N.J.A.C.13:39-11.24(a)10	When test results indicated that the cleanroom did not meet the standards established, the pharmacy failed to immediately cease using the cleanroom that was out of compliance until such time that the cleanroom met the requisite standards. Specifically, on September 28, 2015, during the environmental monitoring tsts conducted by ENV Services, a laboratory equipment certification company, air sampling detected multiple CFUs in the dispensing room, the gowning room, the prep room, the White Blood Cell (WBC) anteroom and the WBC prep room. The nature of the CFUs detected in these areas was deemed non-highly pathogenic. The quantities of CFUs were below action level. Air Sample number 10 detected one (1) CFU in the center of the WBC Room and the species was identified as fungal in nature. This finding was deemed as Out-of-Compliance (OOC). On the following day, September 29, 2015, ENV Services detected one (1) CFU in the dispensing room, classified as ISO Class 7. The species was identified as fungal in nature. This finding was again deemed as OOC. John Marzocca, RPIC acknowledged that upon learning the test results on October 9, 2015, the pharmacy failed to cease using the affected equipment. The cleaning log for the month of October 2015 failed to indicate that the pharmacy performed triple cleaning in order to address these findings. On October 19, 2016, during a follow-up visit by Inv. Qi to the pharmacy, Mr. Marzocca stated that during the most recent environmental monitoring test performed by ENV Services, the maximum CFU count for two (2) ISO classified areas was exceeded. Air sampling detected one (1) CFU of genus in fungi nature from one of the BSC units, ISO Class 5, as well as thirteen (13) CFUs from one of the support tables. The CFUs detected were a highly pathogenic species. Mr. Marzocca stated that the pharmacy followed the N.J.A.C. regulation this time and ceased using the affected equipment.	**$2,500.00**

	Daily and weekly cleaning procedures were reviewed in detail. Upon review, it appeared that the pharmacy updated the cleaning frequency, cleaning methods and cleaning materials since my August 2016 visit.

Anthony Rubinaccio R.Ph
Executive Director
New Jersey Board of Pharmacy
124 Halsey Street
Newark, NJ 07101

Dear Mr. Rubinaccio

In response to NJ Board of Pharmacy letter Dated May 19, 2017 concerning inspection #8-1066-16-X, please find the enclosed signed certification letter with a check for $5500. Below are the corrective actions:

1. Contact plate surface samples are currently conducted in-house biannually. Any microbial recovery will be analyzed by an independent third party company, such as Nelson Labs 6280 South Redwood Road, Salt Lake City Utah. This is in addition to our cleanroom certification company (ENV) collecting and analyzing environmental air and surface samples biannually and identifying all recovered microbes to the genus level.
2. In 2016, we and our third-party certification vendor (ENV) enacted more stringent garbing, cleaning, and clean room entry procedures. Prior to these new protocols ENV would wheel in testing equipment from the street into our clean room without thoroughly cleaning the equipment and transportation carts. ENV now requires and supplies their technicians with clean room coveralls to wear during certification procedures. ENV technicians also thoroughly clean their testing equipment which is properly maintained for clean room entry and transfer all necessary equipment to GE clean room carts prior to certification testing.
3. In 2016 we have also changed our protocols to a more aggressive daily "cleaning and disinfection" of our primary and secondary engineering controls. We now use germicidal cleaning and disinfecting agents daily in addition to using sterile 70% isopropyl alcohol in the primary engineering controls. Prior to this change we used germicidal agents weekly and 70% isopropyl alcohol daily. We have also started a rotation of a sporicidal agent in our cleaning and disinfecting procedures.

If you have any questions, please do not hesitate to contact me at 973-533 9109

Sincerely,

John Marzocca R.Ph

Anthony Rubinaccio R.Ph
Executive Director
New Jersey Board of Pharmacy
124 Halsey Street
Newark, NJ 07101

Dear Mr. Rubinaccio

In response to NJ Board of Pharmacy letter Dated march 9, 2017 concerning the observations identified during an inspection of our Livingston New Jersey Nuclear Pharmacy conducted August 10, 2016. The observations stated in your letter are listed below for ease of reference:

[N.J.A.C.13:39-1124(a)6]- Adequate efforts were not made to ensure the pharmacy's quality assurance program.

Although this regulation does not make any reference to internal sampling to be analyzed for species to the genus to exclude the possibility of the existence of highly pathogenic species, Medi-Physics, Inc. d/b/a/ GE Healthcare Livingston NJ, has added this to our environmental monitoring protocols. Contact plate samples incubated on site which show organism growth will be analyzed by an independent certified third party laboratory for ID'ing to genus level. Additionally, our cleanroom certification company (ENV) shall continue to take environmental samples for air and surface contamination biannually during re-certification procedures. All growth recovered from third party vendor sampling shall also be ID'd to genus level.

[N.J.A.C.13:39-24(a)10]-When test results indicated that the cleanroom did not meet the standards established, the pharmacy failed to immediately cease using the primary engineering controls or cleanroom that was out of compliance until such time that the cleanroom met the requisite standards.

The Livingston Pharmacy did not take action to immediately cease using secondary engineering controls on September 28, 2015, as a result of the environmental monitoring tests, due to the fact the we were unaware of this requirement per 13:39-24(a)10 until the **January 2016** New Jersey Board of Pharmacy newsletter article titled- Regulation Regarding Out-of-Compliance Cleanrooms and Primary Engineering. Our Standard Operating Procedures, at the time required us to immediately deep clean the area of concern, perform an investigation to determine action necessary to eliminate recurrence of the contamination, and retest prior to reuse. After further review of the information in that newsletter, the Livingston Pharmacy is in the process of updated

General Electric Company

protocols to include 13:39-24(a)10. At this time, we are in compliance with this regulation as evidenced by our SOP's as well as Mr. Qi's follow up visit on October 19, 2016 stating that ENV services monitoring found a maximum CFU count exceeded in a BSC hood which was taken out of service until an EVN re-test was performed.

If you any questions or require any additional information, please contact me at (973) 533-9009.

Sincerely,

John Marzocca R.Ph

RE: Inspection Report #8-1066-16X for the period:08/10/2016

Dear Mr. Marzocca:

The New Jersey Board of Pharmacy (the "Board") has received the above mentioned inspection report, a copy of which is included with this letter, and has requested that you respond to the following items within **ten (10) days** of receipt of this letter:

1) Please provide a detailed response to the inspector's observations and any "areas of concern" noted for each citation in the "Report of Inspection" on pages #1 through #5. Your response should include an explanation for each issue noted, as well as what steps you have taken (or are planning to take) to address each item.

2) Please provide a detailed response for each citation and any "areas of concern" noted on page #1 of "Exhibit #15". You do not need to respond to items a second time, if you addressed a citation as part of your response to the "Report of Inspection" section. Again, your response should include an explanation for each issue noted, as well as what steps you have taken (or are planning to take) to address each item.

Feel free to include any additional supporting documentation you feel the Board should consider when reviewing your response. The Board will review this report and your response to this letter at the next available Board meeting.

Failure to respond and provide this information within ten (10) days from receipt of this letter will constitute a failure of a duty to cooperate pursuant to N.J.A.C. 13:45C-1.3 and may result in disciplinary action by the Board, including suspension of your permit to operate a pharmacy and/or to engage in sterile compounding.

Sincerely,

Anthony Rubinaccio, RPh
Executive Director
New Jersey Board of Pharmacy

GLOSSARY

OrganismName	Description
Bacillus infantis	
Micrococcus luteus	Can be found in many places such as the human skin, water, dust, and soil. Generally thought of as harmless bacterium, but there have been rare cases of Micrococcus infections in people with compromised immune systems.
Staphylococcus epidermidis	A coagulase-negative Staphylococcus that is part of the normal human flora, typically the skin flora, and less commonly the mucosal flora. Although S. epidermidis is not usually pathogenic, patients with compromised immune systems are at risk of developing infection. These infections are generally hospital-acquired. S. epidermidis is a particular concern for people with catheters or other surgical implants because it is known to form biofilms that grow on these devices.

USP <797>Supplemental Information

1. Growth Media
   - 1.1. A general microbiological growth medium such as Soybean-Casein Digest Medium (also known as Trypticase Soy Broth (TSB) or agar (TSA) shall be used to support the growth of bacteria.
   - 1.2. Malt Extract Agar (MEA) or suitable substitute shall be used to support the growth of fungi.
   - 1.3. Media used for surface sampling shall be supplemented with additives to neutralize the effects of disinfecting agents (e.g., TSA with Lethicin and Polysorbate 80).
   - 1.4. Incubate inverted bacterial media for 2-3 days at 33-37°C and fungal for 5-7 days at 26-30°C.

2. Viable Sampling
   - 2.1. Air:
     - 2.1.1. Shall be performed dynamically at least semiannually (i.e. every 6 months) in ALL ISO Class environments.
     - 2.1.2. Impact shall be the preferred method volumetric sampling, settling plates are not sufficient.
     - 2.1.3. 400-1000 litersof air shall be tested at each location and reported as CFU/m³ of air.
   - 2.2. Surface:
     - 2.2.1. Shall be performed dynamically in ALL ISO classified areas on a periodic basis (contact plates and/or swabs) and shall be done at the conclusion of compounding.
     - 2.2.2. Results are reported as CFU per sampled unit area.

3. Gloved Fingertip Testing
   - 3.1. Shall be performed for all CSP risk level compounding.
   - 3.2. Immediately after gowning, the evaluator shall collect a gloved fingertip and thumb sample from both hands on a general microbiological media (TSA).
   - 3.3. Initial gloved fingertip/thumb sampling procedure requires (0 CFU) no less than 3 times before initially being allowed to compound CSPs for human use.
   - 3.4. Re-evaluation of all compounding personnel shall occur at least annually for low- and medium-risk level CSPs and semiannually for high-risk.
   - 3.5. CFU action level shall be based on the total number of CFU on both gloves and not per hand.
   - 3.6. Should be reported separately as number of CFU per employee per hand (left hand, right hand).

4. Media-Fill Testing
   - 4.1. Shall be performed initially before beginning to prepare CSPs and at least annually thereafter for low- and medium-risk level; and semiannually for high-risk.
   - 4.2. Shall be evaluated using sterile fluid bacterial (TSA) culture media-fill verification.
   - 4.3. Media-filled vials shall be incubated with a range of 33-37° C for 14 days.

5. Reporting Information
   - 5.1. Highly pathogenic microorganisms (e.g., Gram-negative rods, coagulase positive staphylococcus, molds, and yeasts) must be immediately remedied, regardless of CFU count. Any CFU count that exceeds its respective action level shall have an investigation into the source of contamination, shall be eliminated, the affected area cleaned, and resampling performed.
   - 5.2. Positive controls are unopened samples submitted for growth promotion testing (inoculation) which eliminates false negatives. Negative controls are unopenedsamples submitted for incubation solely which eliminates false positives.
     - 5.2.1. There should be a positive and negative control for each lot number of every media type used.
   - 5.3. MRL is the minimum reporting limit for a sample.
   - 5.4. Results found in this report are solely tied to the project above and the samples therein.

This test report and data shall not be reproduced except in full, without the written approval of the laboratory. The results obtained apply only to the samples tested and are reflective of the conditions at the time of this test.This document is proprietary, all rights to content are reserved by M-BioLabs, Inc. The attached Citation, ("Citation") is being issued pursuant to Business and Professions Code section 125.9 and California Code of Regulations, title 16, section 1775 et. seq., for violations of the laws and regulations that govern the practice of pharmacy in California. (For exact language refer to the California Pharmacy Law and Index, located on the Board's web site, at www.pharmacy.ca.gov, under Forms and Publications).

The attached Citation references the specific statutes and regulations violated, and defines each violation charged. The attached Citation details the conduct that resulted in the issuance of the Citation.

IT IS YOUR RESPONSIBILITY TO READ THE ENTIRE CITATION AND INSTRUCTIONS, TO UNDERSTAND THE PROCESS FOR CONTESTING THE CITATION AND IF CONTESTING THE CITATION TO RESPOND WITHIN THE FOLLOWING TIME FRAMES:

- February 28, 2024: Any contest of the Citation by request for an informal Office Conference must be received by the Board.
- March 15, 2024: Any contest of the Citation by request for a formal Appeal must be received by the Board.

The issuance of a Citation by the Board of Pharmacy is considered an administrative action and substantiated resolution of a complaint and/or investigation. The acceptance of the Citation(s) shall not constitute an admission of the violation(s) charged.

No fine has been assessed with this Citation and no proof of abatement has been ordered.

If the Board does not receive a written request to contest this Citation within 30 days of the issue date, you will be deemed to have waived your right to contest this Citation. The Citation shall then become the final order of the Board. Please be advised that if not contested this Citation will become a part of the Board's records and constitute a public record for purposes of disclosure.

If you have any questions regarding this Citation please contact Joshua Monforte, Citation and Fine Analyst at (916) 518-3014.

INSTRUCTION

Read the Following Carefully and Thoroughly

You are hereby served with a Citation issued by the Executive Officer of the California State Board of Pharmacy or her designee. The following instructions are provided to assist you in your timely completion of the Citation process.

Unless contested, Citations are final 30 days from the date of service. Acceptance of a Citations is not an admission of the violation charged. A Citation becomes part of your record, and remains there for five years. It can be used as an aggravating factor for future violations. Citations are public information and as such may be released to the public in accordance with the Public Records Act and Information Practices Act.

CONTESTING THE CITATION (CCR §1775.4)

If you wish to contest all or part of your Citation you may request an informal office conference or an appeal before an administrative law judge, or both. If you wish to request both you must submit both forms. If you prevail at the office conference your request for an appeal shall be deemed withdrawn. Please note that the time frames that allow you to request an office conference and an appeal run concurrently. You must submit your request(s) according to the following instructions:

REQUEST FOR OFFICE CONFERENCE (CCR §1775.4 subd. (b))

- Complete attached "Request for Office Conference".
- Mail form to arrive at the Board office no later than February 28, 2024 to the address at the bottom of the form.
- You will be advised by the Board in writing as to the date and time of your appearance.
- You are allowed one postponement.

An office conference is not a hearing. It is an informal discussion of the events that took place, and an opportunity for you to present information and mitigating factors pertaining to the Citation that you would like considered. The Executive Officer and or her designee represent the Board of Pharmacy at this meeting. One other individual of your choice may accompany you to this meeting. Office conferences are not open to the public. There is no discovery available in this process. You will not be allowed to present or question witnesses. However, you may present any written statements or documents that you believe are relevant.

After your office conference, the Citation may be affirmed, modified or dismissed. You will be advised of the decision in writing within 14 calendar days from the date of the conference. If the Citation is affirmed you will have 30 days from the date of the decision letter to comply with the conditions of your Citation. If the Citation is modified, the Citation originally issued shall be considered withdrawn and a new Citation will be issued. The decision issued after the office conference shall be deemed to be a final order with regard to the Citation issued, including the administrative fine levied, and/or an order of abatement.

REQUEST FOR APPEAL (CCR § 1775.4 subd. (a))

- Complete attached "Request for Hearing".
- Mail form to arrive at the Board office no later than March 15, 2024 to the address at the bottom of the form.
- You will be advised in writing as to the date and time of your hearing.

An appeal is a formal adjudicative hearing before an Administrative Law Judge. A Deputy Attorney General will represent the Board of Pharmacy at this hearing. These proceedings shall be conducted in accordance with the provisions of Chapter 5, commencing with Section 11500 of Part 1 of Division 3 of Title 2 of the Government Code.

If you have any questions regarding any enclosed documents please contact Joshua Monforte, Citation and Fine Analyst at (916) 518-3014.

JURISDICTION: Bus. & Prof. Code § 4314; CCR, title 16, § 1775; Bus. & Prof. Code § 4301, subd. (o)

VIOLATION CODE SECTION	OFFENSE
CCR, Title 16, § 1751.3 subd. (a)	**Sterile Compounding Policies and Procedures; Any pharmacy engaged in compounding sterile drug preparations shall maintain written policies and procedures for compounding...**
CCR, Title 16, § 1751.4(a)	**Facility and Equipment Standards for Sterile Compounding; No sterile drug preparation shall be compounded if it is known, or reasonably should be known, that the compounding environment fails to meet criteria specified in the pharmacy's written policies and procedures for the safe compounding of sterile drug preparations**

CONDUCT:

Failure to follow policies and procedures: CCR 1751.3(a) states in pertinent part, any pharmacy engaged in compounding sterile drug preparations shall maintain written policies and procedures for compounding. Any material failure to follow the pharmacy's written policies and procedures shall constitute a basis for disciplinary action. RLS USA Inc. located at 1283 Mountain View, Alviso Rd Ste A-B, Sunnyvale, CA 94089 was not compliant. Specifically, on at least 12/30/22 and 6/26/23 RLS USA Inc. failed to immediately remove its ISO Class 5 PEC from use following air microbial contamination action level exceedance as required in RLS USA Inc.'s Standard Operating Procedure "6.3.1 Certification of ISO Classified Environments." This was a violation of pharmacy law.

Unsafe compounding of sterile drug preparations: CCR 1751.4(a) states, no sterile drug preparation shall be compounded if it is known, or reasonably should be known, that the compounding environment fails to meet criteria specified in the pharmacy's written policies and procedures for the safe compounding of sterile drug preparations. RLS USA Inc. located at 1283 Mountain View, Alviso Rd Ste A-B, Sunnyvale, CA 94089 was not compliant. Between at least 12/30/22 and 1/11/23, and between at least 6/26/23 and 7/14/23, RLS USA Inc. compounded sterile preparations in a laminar flow work bench which was identified as having microbial growth exceeding the action level defined in the pharmacy's written policies and procedures. This was a violation of pharmacy law.

The attached Citation and Fine, ("Citation") is being issued pursuant to Business and Professions Code section 125.9 and California Code of Regulations, title 16, section 1775 et. seq., for violations of the laws and regulations that govern the practice of pharmacy in California. (For exact language refer to the California Pharmacy Law and Index, located on the Board's web site, at www.pharmacy.ca.gov, under Pharmacy Law and Regulation).

The attached Citation references the specific statutes and regulations violated, defines each violation charged and specifies any fine(s) assessed. The attached Citation details the conduct that resulted in the issuance of the Citation.

IT IS YOUR RESPONSIBILITY TO READ THE ENTIRE CITATION AND INSTRUCTIONS, TO UNDERSTAND THE PROCESS FOR CONTESTING THE CITATION AND TO RESPOND TO THE CITATION WITHIN THE FOLLOWING TIME FRAMES:

- November 10, 2024: Unless the Citation is contested payment of fine(s) must be received by the Board.
- October 25, 2024: Any contest of the Citation by request for an informal Office Conference must be received by the Board.
- November 10, 2024: Any contest of the Citation by request for a formal Appeal must be received by the Board.

The issuance of a Citation by the Board of Pharmacy is considered an administrative action and substantiated resolution of a complaint and/or investigation. If a hearing is not requested to contest the Citation(s), payment of any fine(s) shall not constitute an admission of the violation(s) charged. Payment in full of the fine(s) assessed shall be represented as a satisfactory resolution of the matter in any public disclosure. (Business and Professions Code section 125.9; California Code of Regulations section 1775).

Additionally, if, at the time of license renewal, the Board has not received full payment of assessed fine(s) and a request to contest the Citation has not been received within the time frames specified, the license shall not be renewed until the assessed fine(s) and renewal fee/s are paid in full.

If you have any questions regarding this Citation please contact Suelynn Yee, Citation and Fine Analyst at (916) 518-3013.

INSTRUCTION

Read the Following Carefully and Thoroughly

You are hereby served with a Citation issued by the Executive Officer of the California State Board of Pharmacy or her designee. The following instructions are provided to assist you in your timely completion of the Citation process.

PAYMENT OF FINE

- Payment must be made by **November 10, 2024.**
- Make check or money order payable to the Board of Pharmacy. Do not submit cash.
- Attach the enclosed "copy" of your Citation

Mail payment to: State Board of Pharmacy
Attn: Cashier
2720 Gateway Oaks Drive, Suite 100
Sacramento, CA 95833

Unless contested, Citations are final 30 days from the date of service. Payment of a fine is not an admission of the violation charged. A Citation becomes part of your record, and remains there for five years. It can be used as an aggravating factor for future violations. Citations are public information and as such may be released to the public in accordance with the Public Records Act and Information Practices Act.

CONTESTING THE CITATION (CCR §1775.4)

If you wish to contest all or part of your Citation you may request an informal office conference or an appeal before an administrative law judge, or both. If you wish to request both you must submit both forms. If you prevail at the office conference your request for an appeal shall be deemed withdrawn. Please note that the time frames that allow you to request an office conference and an appeal run concurrently. You must submit your request(s) according to the following instructions:

REQUEST FOR OFFICE CONFERENCE (CCR §1775.4 subd. (b))

- Complete attached "Request for Office Conference".
- Mail form to arrive at the Board office no later than October 25, 2024 to the address at the bottom of the form.
- You will be advised by the Board in writing as to the date and time of your appearance.
- You are allowed one postponement.

An office conference is not a hearing. It is an informal discussion of the events that took place, and an opportunity for you to present information and mitigating factors pertaining to the Citation that you would like considered. The Executive Officer and or her designee represent the Board of Pharmacy at this meeting. One other individual of your choice may accompany you to this meeting. Office conferences are not open to the public. There is no discovery available in this process. You will not be allowed to present or question witnesses. However, you may present any written statements or documents that you believe are relevant.

After your office conference, the Citation may be affirmed, modified or dismissed. You will be advised of the decision in writing within 14 calendar days from the date of the conference. If the Citation is affirmed you will have 30 days from the date of the decision letter to comply with the conditions of your Citation. If the Citation is modified, the Citation originally issued shall be considered withdrawn and a new Citation will be issued. The decision issued after the office conference shall be deemed to be a final order with regard to the Citation issued, including the administrative fine levied, and/or an order of abatement.

REQUEST FOR APPEAL (CCR § 1775.4 subd. (a))

- Complete attached "Request for Hearing".
- Mail form to arrive at the Board office no later than November 10, 2024 to the address at the bottom of the form.
- You will be advised in writing as to the date and time of your hearing.

An appeal is a formal adjudicative hearing before an Administrative Law Judge. A Deputy Attorney General will represent the Board of Pharmacy at this hearing. These proceedings shall be conducted in accordance with the provisions of Chapter 5, commencing with Section 11500 of Part 1 of Division 3 of Title 2 of the Government Code.

BOARD OF PHARMACY
DEPARTMENT OF CONSUMER AFFAIRS
STATE OF CALIFORNIA

CITATION AND FINE

Citation Number	Name, License No
CI 2024 105586	RLS USA INC, PHY 57866

JURISDICTION: Bus. & Prof. Code § 4314; CCR, title 16, § 1775; Bus. & Prof. Code § 4301, subd. (o)

VIOLATION CODE SECTION	OFFENSE	AMT OF FINE
Bus. & Prof. Code § 4113(F)	Pharmacist-in-Charge: Notification to Board; if a pharmacy is unable, in the exercise of a reasonable diligence, to identify within 30 days a permanent replacement pharmacist-in-charge to propose to the board on the notification form, the pharmacy may instead provide on that form the name of any pharmacist who is an employee, officer or administrator of the pharmacy...	$500.00
Bus. & Prof. Code § 4305 subd. (b)	Operation of a pharmacy for more than 30 days without supervision or management by a pharmacist-in-charge shall constitute grounds for disciplinary action	$1,000.00

CONDUCT:

Business and Professions Code section 4113(f) requires a licensee to, when unable to identify a permanent pharmacist-in-charge within 30 days of the date when a pharmacist-in-charge (PIC) ceases to act, provide the name of a pharmacist, owner, or manager to act as an interim pharmacist-in-charge for a period not to exceed 120 days. Specifically, on March 13, 2024, the Board received an Application for Change of Pharmacist-In-Charge from RLS USA Inc, which had been signed under penalty of perjury by a corporate officer, the disassociated PIC, and the newly designated PIC. The form indicated that the prior interim PIC, Anahita Malekakhlagh (RPH 73484), had disassociated on March 11, 2024 and that Scott Hudek (RPH 49826) took over as the permanent PIC on the same date. However, Anahita Malekakhlagh's (RPH 73484) interim period, which had begun on August 25, 2023, had previously expired on December 22, 2023. Anahita Malekakhlagh (RPH 73484) acted as the interim PIC from August 25, 2023 to March 11, 2024, 199 days.

Business and Professions Code section 4305(b) authorizes the Board to take disciplinary action against a licensee for operation of a pharmacy for more than 30 days without the supervision or management of a pharmacist-in-charge (PIC). Specifically, on March 13, 2024, the Board received an Application for Change of Pharmacist-In-Charge from RLS USA Inc, which had been signed under penalty of perjury by a corporate officer, the disassociated PIC, and the newly designated PIC. The application declared that Scott Hudek (RPH 49826) had taken over as the permanent PIC on March 11, 2024. However, as RLS USA Inc failed to pay their Application for Change of Pharmacist-In-Charge's application fee until July 11, 2024, the Board was unable to approve Scott Hudek (RPH 49826) as the permanent PIC until July 11, 2024. RLS USA Inc operated without a Board approved PIC from March 11, 2024 through July 10, 2024, 121 days.

CITATION ISSUED ON: October 11, 2024	TOTAL AMOUNT OF FINE(S): $1,500.00

PAYMENT OF FINE(S) DUE BY: November 10, 2024

NEVADA STATE BOARD OF PHARMACY
985 Damonte Ranch Parkway, Suite 206 – Reno, NV 89521 – 775-850-1440

Sterile Compounding Questionnaire

Rev (09/11/2024)

This application cannot be returned by fax or email.
We must have an original signature to process.

Approval of this completed questionnaire is required for an existing pharmacy, new pharmacy and/or out-sourcing facility applicant who wish to engage in preparing, compounding, dispensing, and furnishing sterile compounded products to Nevada patients or consumers.

Please provide a thorough response to the questions below and provide any necessary supporting documents.
-For a new pharmacy or out-sourcing facility applicant, submit this completed form with your application.
-For an existing pharmacy, send the completed form to the address indicated above.

Section 1: General Information

Pharmacy Name: RLS (USA) Inc.

NV Pharmacy or Outsourcing facility license # (if applicable): _____

Physical Address: 1771 E Flamingo Rd., #A121

City: Las Vegas State: NV Zip: 89119

Mailing Address (if different from physical address): N/A

City: _____ State: _____ Zip: _____

Fax: 702-750-1367 Contact Email: licensing@rls.bio

Website: https://rls.bio

Nevada Business License # (if applicable) NV20191644357

Supervising/Managing Pharmacist Name (NRS 639.220): Christopher Southwick, RPh

Supervising/Managing Pharmacist NV Pharmacist Registration #: 11480

Name of Designated Person(s) as defined by revised USP-797 guidelines: Christopher Southwick RPh

Email of Designated Person(s): Chrshandu@cox.net

Telephone of Designated Person(s): 702-466-3997

Section 2: Sterile Compounding Questions (Use a separate piece of paper if additional space is needed.)

1. What risk level sterile compounding will your facility be performing (check all that apply)?

   [X] Category 1 [ ] Category 2 [ ] Category 3

If you marked "**Category 3**", you must also complete **section 4**.

2. If compounding Category 2 products is the location performing sterility and endotoxin testing (if required) to obtain extended beyond-use dates? [ ] Yes [ ] No

3. If compounding Category 2 products is the location performing aseptically processed CSPs or terminally sterilized CSPs? Aseptic [ ] Terminal

4. Is the pharmacy following the new garbing requirements listed in the revised USP-797 guidelines? we are a Radiopharmacy we follow USP 825 [ ] Yes [X] No

5. When was the most recent certification for the ISO classified areas? 12/5/24

6. What is the frequency of the recertification for the ISO classified areas? every 6 months

7. Were there any follow-up items required from the most recent certification report? [ ] Yes [X] No

8. If preparing Category 2 or Category 3 CSPs from non-sterile starting components are the pre-sterilization procedures such as weighing and mixing completed in an ISO Class 8 or better environment? [ ] Yes [ ] No

9. If compounding Category 1 CSPs and Category 2 CSPs how often is surface sampling of all classified areas and pass-through chambers conducted? every 6 months

10. Will you be performing sterile hazardous drug compounding? [ ] Yes [X] No

If you marked "**Yes**", you must also complete **section 3**.

11. List the sterile compounded products that you will be compounding for Nevada patients or consumers:

Tc^{99m} Radiopharmaceuticals (Sestamibi, Myoview, DTPA, Mag3, Ceretec, MAA, Choletec, PYP, HDP)

Tc^{99m} White Blood Cell Labeling

Ga^{68} Radiopharmaceuticals (PMSA, Illucix)

In^{111} Radiopharmaceuticals (Prostascint, Octreoscan)

12. What laboratory performs your sterility or endotoxin testing?

Name: N/A

Address:

City: State: Zip:

Telephone:

13. What is your procedure for visual inspection of compounded sterile products?

Look at compounded vials against a Black & White Background. compare for correct color and rule out particulate.

14. How often do you perform glove fingertip and medial fill testing?

Annual per USP 825

15. Describe your initial and ongoing training program for all personnel performing sterile compounding:

Initial: Observed Aseptic Hand cleaning, observed donning of PPE, observed/tested Disinfecting of PEC. Initial sterile glove Donning requires 3 sequential Trials ≤ Ø CFU growth on Glove Fingertip sampling- Observe/Teach Compounding calculations & negative pressure Techniques. All employees Read USP 825 guidelines & ASHP compounding sterile prep 12th ed. Media Fill Testing.

Ongoing: correct any Deviations to SOP daily/weekly. Pyramyx Glove Fingertip sampling annually w/n ≤ 3CFU growth. Annual media fill testing

16. Describe the cleaning procedure for your primary and secondary engineering controls, including the frequency of cleaning and the names of cleaning, disinfectant, sporicidal, and/or deactivation and decontamination agents used: USP 825

Daily: Clean Elution & Mixing vials ≤ one step Disinfectant/Cleaner (PreEmpt+)
clean PEC & Everything inside ≤ (PreEmpt)
clean sink ≤ PreEMPt+
SRPA floor mop ≤ PreEmpt+
SRPA work Surfaces ≤ PreEmpt+

Monthly: PEC, Bins, shelves, Floors, walls, Ceiling ≤ PreEmpt+
PEC, Bins, shelves, Floors, walls, ceiling ≤ Peridox (Sporicidal)
Elution & mixing vials shields ≤ Peridox

17. Who performs the sterile compounding process at your facility?

Chris Southwick
Jeff Jorgensen

18. Who is responsible and accountable for the sterile compounding process at your facility?

Chris Southwick

19. If products are shipped/mailed, what shipping conditions are used to ensure product safety/efficacy?

All RadioPharmaceuticals are shipped in unit dose shields, inside a DOT TYPE A shipping container (Ammocan) Ammo cans are Blocked & Braced, inside delivery vehicles. All unit dose shields are cleaned ≤ 1/10 mix ~~Bleach~~/H2O & PreEmpt+

Section 3: Sterile Hazardous Compounding Questions (Complete this section ONLY if you be performing Sterile Hazardous Compounding.)		
1. What type of primary engineering controls will you be using in your facility? N/A		
2. Are you complying with all USP 800 guidelines?	☐ Yes	☐ No
3. Have your employees who compound with hazardous drugs signed an acknowledgement that they understand the risks associated with this process?	☐ Yes	☐ No
4. Is your BSC or CACI vented 100% to the outside?	☐ Yes	☐ No
5. Do you have a negative pressure buffer room at your facility?	☐ Yes	☐ No
6. Will you be compounding with antineoplastic HDs or HD API?	☐ Yes	☐ No
7. If yes, are the drugs stored in an externally ventilated, negative pressure room?	☐ Yes	☐ No
8. Will you be utilizing a closed system transfer device?	☐ Yes	☐ No
9. If yes, list the name of the device:		

10. What information is provided to the patient or consumer on the proper handling and disposal of hazardous drugs products/containers?

N/A

11. Describe your initial process for training new employees prior to compounding sterile hazardous drugs?

N/A

Section 4: Sterile Category 3 Compounding Questions (Complete this section ONLY if you will be performing Category 3 Compounding.)

1. List the specific Category 3 sterile products that your facility compounds:

N/A

2. What is the frequency for ongoing garbing, gloved fingertip and thumb sampling, and media fill testing for compounding personnel?

N/A

3. Is the pharmacy meeting all of the additional garbing requirements for compounding Category 3 CSPs as defined by the revised USP-797 guidelines? N/A ☐ Yes ☐ No

4. What is the frequency for completing volumetric active air sampling?

N/A

5. What is the frequency for completing surface sampling? N/A		
6. What is the frequency for using sporicidal agents? N/A		
7. Is an endotoxin test performed for all products compounded from one or more nonsterile component? N/A	Yes	No
8. Is the BUD assigned supported by stability data obtained using a stability-indicating analytical method? N/A	Yes	No

I certify under penalty of perjury that the information contained in this form is accurate, true and complete in all material respects. I understand that making any false representation in this form is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire form and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. In the event the form is approved I agree to comply with all applicable federal and state statutes and regulations governing this license or registration and understand that any violation may result in discipline.

Section 9: Statement of Responsibility - MUST BE COMPLETED by an Authorized Person (NAC 639.945)

Statement of Responsibility

1. I am the President and Treasurer (title) for Meta Pharmacy Services (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be responsible for any violations of pharmacy law that may occur in the Pharmacy owned by such owner(s), shareholder(s), member(s), or partner(s).
3. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be named in any action taken by the Nevada State Board of Pharmacy against the Pharmacy.
4. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) cannot require or permit the pharmacist(s) in said Pharmacy to violate any provision of local, state, or federal laws or regulations pertaining to the practice of pharmacy.
5. I further understand and acknowledge that Nevada law requires that each pharmacy located inside the State of Nevada employ only pharmacists, intern pharmacists, pharmaceutical technicians, and technicians in training that are licensed by the Nevada State Board of Pharmacy. (NRS 639.100).
6. I further understand and acknowledge that Nevada law requires that each pharmacy located outside the State of Nevada engaged in providing pharmacy services into Nevada employs at least one pharmacist licensed by the Nevada State Board of Pharmacy who will be responsible for any prescription dispensed to a patient located in Nevada and responsible for any acts or omissions of pharmacy personnel who are not registered with the Board. (NRS 639.2328).

Section 11: Managing Pharmacist Acknowledgement, Professional/Personal History – REQUIRED TO BE COMPLETED BY THE MANAGING PHARMACIST FOR NEVADA LOCATED PHARMACY APPLICANTS ONLY

Managing Pharmacist Name: Tommy Dinh Pharmacist Registration #: 20256

Pharmacy Name: Meta Pharmacy Services

Initial each statement below to indicate you have read and agree with the following:

TD I understand that as the managing pharmacist I am responsible for compliance by the pharmacy and its personnel with all state and federal laws and regulations relating to the operation of the pharmacy and the practice of pharmacy. I understand my license can be revoked or that I can be subject of disciplinary action if such laws or regulations are knowingly violated in the pharmacy in which I am the managing pharmacist.

TD I understand within 48 hours after I report for duty as the managing pharmacist, I shall complete an inventory of all controlled substances of the pharmacy pursuant to 21 CFR Part 1304 and maintain a copy of the inventory in the file at the pharmacy.

TD I understand that if I cease to be managing pharmacist of the above-named pharmacy, I will jointly, with the new managing pharmacist, take an inventory of all controlled substances.

TD I understand that as the managing pharmacist I must ensure that all loss or theft of controlled substances are reported on forms provided by the Nevada State Board of Pharmacy and Department of Public Safety within 10 days after the date of discovery of theft or loss. NRS 453.568. Federal regulations require that registrants notify the Field Division Office of the Administration in his area, in writing, of the theft or significant loss of any controlled substance, disposal receptacles or listed chemicals within one business day of discovery of such loss or theft. The registrant shall also complete and submit to the Field Division Office in his area, DEA Form 106 regarding the loss or theft (21 C.F.R. §1301.76(b) and 21 U.S.C. §830(b)(1)(C)).

TD I understand that as the managing pharmacist I must notify the Nevada State Board of Pharmacy of all employment changes of pharmacy staff within 10 days of the change. NAC 639.540

Personal and Professional History	Yes	No
1. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		✓
2. Have you been charged, arrested, or convicted of a felony or misdemeanor in any state?		✓
3. Have you been the subject of a board citation or an administrative action whether completed or pending in any state?		✓
4. Has your license been subjected to any discipline for violation of pharmacy or drug laws in any state?		✓

If you marked YES to any questions above, include the following information and provide a signed statement of explanation. Copies of any documents that identify the circumstance or contain an order, agreement or other disposition is required.

Section 3: History of Company

Nevada State Board of Pharmacy (Case Numbers: 19-002-RPH-S and 19-002-PH-S)

On April 10, 2019 the Nevada State Board of Pharmacy ("Board of Pharmacy") finalized a Findings of Fact, Conclusions of Law and Order ("Order) between the Board of Pharmacy, Mr. Sean Barclay, current Vice President and Secretary, and Barclay Luke & Pillai Specialty Pharmacy PLLC dba M*eta Pharmacy Services*, 8352 W. Warm Springs Road, Suite 120, Las Vegas, NV 89113 (Nevada Resident Pharmacy Permit #: PH03433).

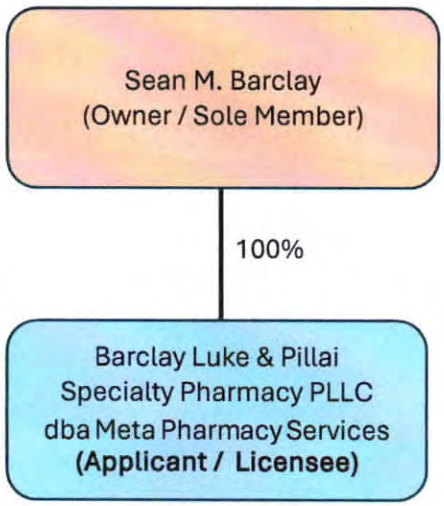
On or about November 27, 2018, the Board of Pharmacy alleged that Mr. Barclay, acting as a licensed Nevada pharmacist and as the managing pharmacist for Barclay Luke & Pillai Specialty Pharmacy PLLC dba *Meta Pharmacy Services*, had operated a pharmacy from approximately November 1, 2017 to November 29, 2018 without a current license or registration with the Board of Pharmacy.

Mr. Barclay and Barclay Luke & Pillai Specialty Pharmacy PLLC dba *Meta Pharmacy Services* did not oppose the citation. Mr. Barclay agreed to pay the $3,500 personal fine and Barclay Luke & Pillai Specialty Pharmacy PLLC dba *Meta Pharmacy Services* agreed to pay the $7,683.99 facility fine issued by the Board of Pharmacy.

Upon receipt of the fines, and signed Order, the Board of Pharmacy considered the matter closed and took no further action.

Nevada Board of Pharmacy (Case Number: 24-125-PH-S and 24-125-RPH-A-S)

On April 16, 2025, the Nevada Board of Pharmacy ("Board of Pharmacy") finalized a Stipulation and Order between the Board of Pharmacy, Mr. Sean Barclay, former Pharmacist-in-Charge, current officer and Barclay Luke & Pillai Specialty Pharmacy PLLC dba Meta Pharmacy Services, 8352 W. Warm Springs Road, Suite 120, Las Vegas, NV 89113 (Nevada Resident Pharmacy Permit #: PH03433).



The Board of Pharmacy alleges between 2021 through 2023, Mr. Barclay knowingly filled and dispensed unlawful prescriptions for controlled substances and compounded medications. Further the Board of Pharmacy alleges from October 31, 2024 to November 20, 2024, Mr. Barclay employed a pharmacy technician in training on an expired registration and falsely completed training documentation submitted to the Board of Pharmacy.

Pursuant to the finalized Conditions of the Stipulation and Order, Mr. Barclay's pharmacist license is placed on probation for a period of 10 years and a fine of $10,000 shall be paid by Mr. Barclay.

Additional conditions imposed by the Board of Pharmacy, require Mr. Barclay to complete 12 extra hours of continuing education on pharmacy law and ethics. Mr. Barclay shall divest himself of any ownership intertest in Meta Pharmacy Services, LLC dba Meta Pharmacy Services and immediately cease working as a pharmacist at Meta Pharmacy Services, LLC dba Meta Pharmacy Services.

Sterile Compounding Questionnaire

Rev (09/11/2024)

This application cannot be returned by fax or email.
We must have an original signature to process.

Approval of this completed questionnaire is required for an existing pharmacy, new pharmacy and/or out-sourcing facility applicant who wish to engage in preparing, compounding, dispensing, and furnishing sterile compounded products to Nevada patients or consumers.

Please provide a thorough response to the questions below and provide any necessary supporting documents.
-For a new pharmacy or out-sourcing facility applicant, submit this completed form with your application.
-For an existing pharmacy, send the completed form to the address indicated above.

Section 1: General Information

Pharmacy Name: Meta Pharmacy Services

NV Pharmacy or Outsourcing facility license # (if applicable): PH03433

Physical Address: 8352 W Warm Springs Road, Suite 120

City: Las Vegas State: NV Zip: 89113

Mailing Address (if different from physical address): 8352 W Warm Springs Road, Suite 120

City: Las Vegas State: NV Zip: 89113

Telephone: 844-334-1010 Toll Free # (NAC 639.708, NRS 639.23286): 844-334-1010

Fax: 702-754-6996 Contact Email: admin@metapharmacyservices.com

Website: www.metapharmacyservices.com

Nevada Business License # (if applicable) NV20243252567

Supervising/Managing Pharmacist Name (NRS 639.220): Tommy Dinh

Supervising/Managing Pharmacist NV Pharmacist Registration #: 20256

Name of Designated Person(s) as defined by revised USP-797 guidelines: Tommy Dinh

Email of Designated Person(s): admin@metapharmacyservices.com

Telephone of Designated Person(s): 844-334-1010

Section 2: Sterile Compounding Questions (Use a separate piece of paper if additional space is needed.)

1. What risk level sterile compounding will your facility be performing (check all that apply)?

   ■ Category 1 ■ Category 2 ■ Category 3

If you marked "**Category 3**", you must also complete **section 4.**

2. If compounding Category 2 products is the location performing sterility and endotoxin testing (if required) to obtain extended beyond-use dates? ☐ Yes ■ No

3. If compounding Category 2 products is the location performing aseptically processed CSPs or terminally sterilized CSPs? ■ Aseptic ■ Terminal

4. Is the pharmacy following the new garbing requirements listed in the revised USP-797 guidelines? ■ Yes ☐ No

5. When was the most recent certification for the ISO classified areas? 10/29/2024

6. What is the frequency of the recertification for the ISO classified areas? every seven months

7. Were there any follow-up items required from the most recent certification report? ■ Yes ☐ No
   Follow-up to occur at the next annual inspection in October 2025.

8. If preparing Category 2 or Category 3 CSPs from non-sterile starting components are the pre-sterilization procedures such as weighing and mixing completed in an ISO Class 8 or better environment? ■ Yes ☐ No

9. If compounding Category 1 CSPs and Category 2 CSPs how often is surface sampling of all classified areas and pass-through chambers conducted? Biannually

10. Will you be performing sterile hazardous drug compounding? ■ Yes ☐ No

If you marked "Yes", you must also complete **section 3.**

11. List the sterile compounded products that you will be compounding for Nevada patients or consumers:

please see attached

12. What laboratory performs your sterility or endotoxin testing?

Name: ARL Bio Pharma

Address: 840 Research Parkway, Ste. 546

City: Oklahoma City State: OK Zip: 73104

Telephone: (800) 393-1595

13. What is your procedure for visual inspection of compounded sterile products?

Compounded sterile products will be inspected, before dispensing, by supervising pharmacists through a double-check system. (1.) Inspection of CSPs includes: (a.) Visual inspection for particulates and/or cloudiness. The CSP will be examined against a lighted white or black background, or both.; (b.) Verification of prescription orders with the written work order / compounding record (preparation; records). (c.) Verification of ingredients used, including correct amounts and concentrations (d.) Verification of final fill amounts (e.) Verification of aseptic manipulations and sterilization (f.) Package integrity, any leakage observed (g.) Visual inspection of syringes and additive containers used (h.) Correct and complete label: i. Name of patient; ii. Patient location; iii. Correct names, amounts and concentrations of the ingredients; iv. Total volume ; v. Preparation date; vi. Beyond-use date; vii. Route of administration; viii. Storage requirements; ix. Infusion rate when applicable; x. The initials of the final Pharmacist check (i.) Labels for CSPs must be clear, consistent, legible and in compliance with state and federal regulations. (2.) CSPs with visual defects will be immediately discarded. (3.) When the identity and concentrations of ingredients cannot be verified, samples of the CSPs will be assayed. (4.) CSPs that are not immediately dispensed will be stored according to procedure. a. CSPs that are stored, will again be inspected before the CSPs are dispensed.

14. How often do you perform glove fingertip and medial fill testing?

Biannually

15. Describe your initial and ongoing training program for all personnel performing sterile compounding:

Aseptic technique training will be ongoing; personnel must pass a media-fill test every 6 months. Compounding personnel who fail media-fill test would be re-evaluated. All compounding personnel must successfully complete 3 (three) Initial Gloved Fingertip sampling prior to compounding CSPs for human use. Ongoing GFS to be performed with the preparation of media fill units which is required initially (before compounding CSPs for human use) and every 6 months for compounding staff of pharmacies performing Category 2 compounding. Personnel who have direct oversight of compounding personnel, but do not compound, must complete training initially and every 12 months. Pharmacy Department shall demonstrate, assess, maintain and improve staff competence on an ongoing basis. Personnel must have didactic and practical training. Staff will receive guided instruction in the theory and practice of compounded sterile preparations, in addition to hands-on training before assuming compounding responsibilities.

16. Describe the cleaning procedure for your primary and secondary engineering controls, including the frequency of cleaning and the names of cleaning, disinfectant, sporicidal, and/or deactivation and decontamination agents used:

Please see attached policy: 3.020 Cleaning and Maintenance of Non-Sterile Compounding Area

17. Who performs the sterile compounding process at your facility?

Licensed staff members who have documented completion of appropriate competencies.

18. Who is responsible and accountable for the sterile compounding process at your facility?

19. If products are shipped/mailed, what shipping conditions are used to ensure product safety/efficacy?

Please see attached policy: 1.090 Delivery of Compounded Preparations

Section 3: Sterile Hazardous Compounding Questions (Complete this section ONLY if you be performing Sterile Hazardous Compounding.)		
1. What type of primary engineering controls will you be using in your facility? Laminar Flow Hood, Powder Hood, Biological Safety Cabinet		
2. Are you complying with all USP 800 guidelines?	■ Yes	☐ No
3. Have your employees who compound with hazardous drugs signed an acknowledgement that they understand the risks associated with this process?	■ Yes	☐ No
4. Is your BSC or CACI vented 100% to the outside?	■ Yes	☐ No
5. Do you have a negative pressure buffer room at your facility?	■ Yes	☐ No
6. Will you be compounding with antineoplastic HDs or HD API?	☐ Yes	■ No
7. If yes, are the drugs stored in an externally ventilated, negative pressure room?	☐ Yes	☐ No
8. Will you be utilizing a closed system transfer device?	☐ Yes	■ No
9. If yes, list the name of the device: N/A		

10. What information is provided to the patient or consumer on the proper handling and disposal of hazardous drugs products/containers?

The Applicant provides education to patients upon admission and on an on-going basis while patients are actively on service.
(a.) Patients are to receive an admission packet, including information explaining how to contact the pharmacy for any concerns or questions.
(b.) Patients are to receive individual consultation as well as ongoing communication with the pharmacists.
(c.) Patients have access to the website, which allows them access to patient specific information.
(d.) Patients have access to pharmacists for any concerns or questions about their medications.
(e.) Patients review and sign a consent form explaining the therapy and medications involved (indication for IT drug(s), side effects, and when to call the pharmacy or physician).
(f.) Patients will be given patient drug information leaflets, that are available, the first time a medication is dispensed or when there is serious risk.

11. Describe your initial process for training new employees prior to compounding sterile hazardous drugs?

(1.) On-the-job experiential training from experienced compounding personnel.
(2.) Staff will receive guided instruction in the theory and practice of compounded sterile preparations, in addition to hands-on training before assuming compounding responsibilities. A PATT for the appropriate risk level of CSPs, and a 3-part initial Glove Fingertip Test must be passed before assuming compounding responsibilities.
(3.) Staff will participate in training and assessment (web-based continuing education for USP 797 compliance) upon hire and annually thereafter.
(4.) Staff will have access to the ASHP Sterile Compounding Library in order to complete a 3- course program with interactive lessons and follow-up testing. This program is completed annually and will include: a. Hand hygiene; b. Garbing procedure for ISO classified environments; c. Cleaning and disinfection of the Ante-area, Cleanroom, and PECs; d. Aseptic technique
(5.) Pharmacy Competency Skills Checklist performed annually
(6.) Bi-annual Aseptic Personnel Assessment Form
(7.) Bi-annual PATT requirement
(8.) Bi-annual Glove Fingertip Sampling
(9.) Instruction on safety procedures
(10.) Instruction on CSPs to include: a. Identification; b. Accurate measuring, weighing, dilution and mixing of ingredients; c. Purification, sterilization; d. Packaging; e. Labeling; f. Storage; g. Dispensing; h. Transport; i. Documentation of the compounding process; j. Sterilization for high-risk CSPs
(11.) Proper use and maintenance of all equipment, including an understanding of HEPA Filtered air flow in ISO classified environments
(12.) Transport of materials to and from the Cleanroom
(13.) Only those individuals who are qualified through license, experience and training to assess sterile compounding skills will conduct competency assessments.
(14.) When improvement activities (written test and media-fill tests) lead to a determination that a person with performance problems is unable or unwilling to improve, the staff member's work assignment may be revised. Further education and training will be required or other corrective action(s) may be taken.
(15.) The staff member will not return to compounding duties until performance problems are resolved.
(16.) The competence assessment program is continuous and ongoing, with reports of competency outcomes available to the Pharmacist-in-Charge.

Section 4: Sterile Category 3 Compounding Questions (Complete this section ONLY if you will be performing Category 3 Compounding.)

1. List the specific Category 3 sterile products that your facility compounds:

please see attached

2. What is the frequency for ongoing garbing, gloved fingertip and thumb sampling, and media fill testing for compounding personnel?

Biannually

3. Is the pharmacy meeting all of the additional garbing requirements for compounding Category 3 CSPs as defined by the revised USP-797 guidelines? ☒ Yes ☐ No

4. What is the frequency for completing volumetric active air sampling?

Biannually

5. What is the frequency for completing surface sampling? Monthly
6. What is the frequency for using sporicidal agents? Sporicidal agents are used daily inside PEC's and nonsterile HD room powder hood and table surfaces. All surfaces, including ceilings, walls, and bins undergo monthly terminal cleaning with sporicidal agents.
7. Is an endotoxin test performed for all products compounded from one or more nonsterile component? ☐ Yes ■ No
8. Is the BUD assigned supported by stability data obtained using a stability-indicating analytical method? ☐ Yes ■ No

I certify under penalty of perjury that the information contained in this form is accurate, true and complete in all material respects. I understand that making any false representation in this form is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire form and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. In the event the form is approved I agree to comply with all applicable federal and state statutes and regulations governing this license or registration and understand that any violation may result in discipline.

Attachment: List of Sterile Compounded Products

Drug Description
ALPHA LIPOIC ACID 25 MG/ML INJECTION
BCAA ISOLEUCINE/LEUCINE/VALINE 15/10/40 MG/ML INJ SOLUTION
BIOTIN 10MG/ML INJECTABLE SOLUTION
CARNITINE 50% INJECTABLE SOLUTION
DEXPANTHENOL 250 MG/ML INJECTABLE SOLUTION
GLUTATHIONE 20% INJECTION
HYDROXOCOBALAMIN (B12) 10 MG/ML INJ
LIPO C 15MG/50MG/50MG/25MG/15MG/5MG (Carnitine, Choline, Inositol, Methionine, Thiamine, Dexpanthenol)
LIPO INJECTION (MIC) (Methionine, Inositol, Choline)
LIPO-B (MIC-B12) STERILE SOLUTION (Methionine, Inositol, Choline, and Methylcobalamin)
METHYLCOBALAMIN 12.5MG/ML INJ
MYERS COCKTAIL IV ADMIXTURE
NAD+ 1,000MG/50ML VIAL INJECTION
NANDROLONE DECANOATE 200 MG/ML GRAPESEED OIL
PYRIDOXINE 100 MG/ML INJECTABLE SOLUTION
QUADMIX STANDARD INJECTION (Atropine, Alprostadil, Papaverine, Phentolamine)
SEMAGLUTIDE/L-CARNITINE 2.5/100MG/ML
SERMORELIN 3MG/3ML SOLUTION INJECTION
STANOZOLOL 50 MG/ML 'IM' INJECTION
SUPER TRIMIX INJ (Alprostadil, Papaverine, Phentolamine)
TAURINE 50 MG/ML INJECTABLE SOLUTION
TIRZEPATIDE/L-CARNITINE 16.7/100MG PER ML
TRIMIX #1 INJ (Alprostadil, Papaverine, Phentolamine)
TRIMIX #3 INJ (Alprostadil, Papaverine, Phentolamine)
TRIMIX #4 INJ (Alprostadil, Papaverine, Phentolamine)
TRIMIX #5 INJ (Alprostadil, Papaverine, Phentolamine)
TRIMIX #6 INJ (Alprostadil, Papaverine, Phentolamine)
TRT CYPIONATE-ZINC SULFATE 200-1 MG/ML IN GRAPESEED OIL
VITAMIN B COMPLEX INJECTION
VITAMIN C 50% FOR INJECTION (Sodium Ascorbate)
VITAMIN D3 50000 UNITS/ML 'IM' INJ
TOBRAMYCIN 1.5% (15 MG/ML) EYE DROP
VANCOMYCIN 2.5% (25 MG/ML) EYE DROPS

TITLE: CLEANING & MAINTENANCE OF NON-STERILE COMPOUNDING AREA	
SOP NUMBER: 3.020	**VERSION NUMBER: 1.0**
Authorized By: Meta Pharmacy Services	Date: 02/01/2022
Prepared By: Pharmacist-In-Charge	Date:
Reviewed By: Pharmacy Compliance Officer	Date:
Date Effective:	

1.0 PURPOSE

1.1 The purpose of this procedure is to establish requirements for the cleaning and maintenance of the non-sterile compounding area.

2.0 SCOPE

2.1 This procedure applies to the Meta Pharmacy Services non-sterile compounding area under conditions that meet or exceed state and federal guidelines.

2.2 This procedure must be followed to reduce the amount of particulate matter and airborne contamination and to prevent cross-contamination of chemicals.

3.0 RESPONSIBILITY

3.1 The Pharmacist-in-Charge, or a pharmacist designee, shall supervise this procedure and document that all non-sterile compounding personnel will comply with this procedure.

4.0 REFERENCES

4.1 USP Current Version <795> "Pharmaceutical Compounding – Non-Sterile Preparations"

4.2 SOP 1.050 "General Compounding Technique"

4.3 SOP 4.010 "Compounding Equipment"

4.4 SOP 4.020 "Use, Calibration and Maintenance of the Drug Product Refrigerator and Freezer"

4.5 SOP 8.020 "Good Documentation Practices (GDP)"

4.6 SOP 8.100 "Required Garb for Non-Sterile Compounding Area"

5.0 DEFINITIONS

5.1 N/A

6.0 FREQUENCY

6.1 Daily (when non-sterile compounding activities are planned)

6.1.1 Clean all horizontal surfaces.

6.1.2 Sweep floors.

6.1.3 Clean all in-use powder hoods.

6.1.4 Wipe down all in-use equipment.

6.1.5 Record room temperature and humidity.

6.1.6 Record temperature of drug product refrigerator/freezer.

6.1.7 Clean all utensils after use.

6.1.8 Remove and discard trash.

6.2 Weekly

6.2.1 Perform daily requirements listed in section 6.1.

6.2.2 Order supplies as necessary.

6.2.3 Mop floors with dry mop followed by a sponge mop and cleaning solution.

6.3 Monthly

6.3.1 Perform daily requirements listed in section 6.1.

6.3.2 Perform weekly requirements listed in section 6.2.

6.3.3 Clean and sanitize the drug product refrigerator/freezer.

6.3.4 Clean and sanitize shelving.

6.3.5 Clean cabinet exteriors.

7.0 EQUIPMENT & SUPPLIES

7.1 Proper gowning protocol placards

7.2 Mop with disposable cleaning pads labeled for use on floors of non-sterile compounding area

7.3 Paper towels

7.4 Bleach concentrate or appropriate cleanser (Acidified Bleach Disinfectant Solution)

7.5 70% isopropyl alcohol (IPA)

7.6 Waste container liners

7.7 Step stool

7.8 Room thermometer

7.9 Room hygrometer (If applicable)

7.10 Equipment manuals (if applicable)

TITLE: CLEANING & MAINTENANCE OF NON-STERILE COMPOUNDING AREA

8.0 GENERAL INFORMATION

8.1 Cleaning Solutions

8.1.1 Non-sterile 70% IPA – for use in areas with equipment that may be damaged by the use of bleach.

9.0 PROCEDURE

9.1 Personnel must gown appropriately for the areas to be cleaned following the appropriate gowning procedure.

9.2 Cleaning solutions shall be prepared as needed.

9.2.1 Do not combine disinfectants or use them in concentrations other than those outlined in the SOPs.

9.2.2 Disinfectants with no expiration date should be assigned an expiration date of 30 days after opening.

9.3 Except for sanitization of the workbenches, utensils or equipment, cleaning of the non-sterile compounding area is prohibited during compounding operations.

9.3.1 Ensure all compounded preparations are completed.

9.3.2 The operator must clean and sanitize the exposed work surfaces before and after each batch preparation and immediately should a spill occur.

9.4 The order of cleaning within the non-sterile compounding area is as follows:

9.4.1 Hoods (powder hood)

9.4.2 Non-sterile compounding area: counters, shelves, equipment

9.4.3 Warehouse storage room

9.5 Daily Requirements (when non-sterile compounding has occurred)

9.5.1 At the beginning of the day:

9.5.1.1 Check supplies and straighten up the non-sterile compounding area (if necessary).

9.5.1.2 Calibrate balances.

9.5.1.3 Turn on all necessary equipment and computers.

9.5.1.3.1 Power on all equipment at least 30 minutes prior to compounding.

9.5.1.4 Prepare shipping materials for the day.

9.5.2 Temperature and humidity readings shall be taken in the non-sterile compounding area at the beginning and end of each day and more frequently if needed.

9.5.2.1 The temperature and humidity in the non-sterile compounding area shall be monitored electronically.

9.5.2.2 The humidity should be maintained in the range of 30%–50%.

9.5.2.3 The temperature shall be maintained between 67°F–77°F.

9.5.2.4 Document results on the Temperature and Humidity Monitoring of the Non-Sterile Compounding Area form (Attachment 2).

9.5.3 Record drug product in refrigerator/freezer temperature on Attachment 3 of SOP 4.020, "Use, Calibration and Maintenance of the Drug Product Refrigerator and Freezer."

9.5.4 Clean and sanitize countertops/sinks.

9.5.5 Clean and sanitize equipment as needed. Document equipment cleaning on appropriate cleaning log as per SOP 4.010, "Compounding Equipment."

9.5.6 Allow all rooms and equipment to air dry before non-sterile compounding resumes.

9.5.7 At the end of the day:

9.5.7.1 Turn off all equipment and computers as required.

9.5.7.2 Sweep the floor.

9.5.7.3 Empty all waste receptacles by removing the filled plastic bag.

9.5.8 Document all activities on the Cleaning and Maintenance of the Non-Sterile Compounding Area form (Attachment 1). If the equipment is not in use, write "N/A" in the appropriate location on the form.

9.6 Weekly Requirements

9.6.1 Includes all requirements listed in section 8.5.

9.6.2 Mop floors

9.6.3 Order supplies as necessary.

9.6.4 Document all activities on the Cleaning and Maintenance of the Non-Sterile Compounding Area form (Attachment 1). If the equipment is not in use, write "N/A" in the appropriate location on the form.

9.7 Monthly Requirements

9.7.1 Includes all requirements listed in section 8.5 an 8.6.

9.7.2 Clean and sanitize the drug product refrigerator/freezer.

9.7.3 Remove all supplies from shelving in the non-sterile compounding area and clean and sanitize the shelves.

9.7.4 Clean and sanitize cabinet exteriors.

9.7.5 Document all activities on the Cleaning and Maintenance of the Non-Sterile Compounding Area form (Attachment 1). If the equipment is not in use, write "N/A" in the appropriate location on the form.

9.8 Cleaning can be performed as often as needed, but the minimum requirement will be at the end of the day after compounding.

9.9 The Pharmacist-in-Charge, or a pharmacist designee, shall ensure the completion of tasks on a daily basis and shall review and sign/date Attachment 1 at the end of each month. The form shall be retained in a cleaning/maintenance binder.

Acidified Bleach Disinfectant Solution

SUGGESTED FORMULA FOR
Acidified Bleach Disinfectant Solution
Version: 1.0
3238.3 mL

Sodium Hypochlorite 8.25% Solution	98 ml
White Vinegar	140 ml
Liquid Dish Soap	0.3 ml
Purified Water, USP	3,000 ml

SUGGESTED COMPOUNDING PROCEDURE

Note: It is recommended that you follow USP <795> recommendations for potency testing which states "... each preparation shall contain not less than 90.0% and not more than 110.0% of the theoretically calculated and labeled quantity of active ingredient ...". In order to provide some guidance in this area, please contact Eagle Analytical Services regarding the use of Skip Lot testing.

Note: Sodium Hypochlorite 8.25% Solution - Pharmacy Stock. Source: Commercial Unscented Laundry Bleach.

Note: White Vinegar - Pharmacy Stock.

Note: Liquid Dish Soap - Pharmacy Stock. Source: Grocery Store.

Note: Use syringe which delivers 20 Drops/mL.

1. In an appropriate size container, add Purified Water. Use an amount of Purified Water that is approximately one-third of the specified amount. For example, if the specified amount is 3000 mL, use 1000 mL of Purified Water.
2. Add Sodium Hypochlorite 8.25% Solution to Step 1 with mixing.
3. Add White Vinegar to Step 2 with mixing. Use an amount of White Vinegar that is approximately 90% of the specified volume. For example, if the specified volume is 140 mL, use 126 mL of White Vinegar.
4. Add Purified Water to Step 3 with mixing. Use an amount of Purified Water that is approximately one-third of the specified amount. For example, if the specified amount is 3000 mL, use 1000 mL of Purified Water.
5. Add Liquid Dish Soap to Step 3 with mixing.
6. Add Purified Water to Step 5 with mixing. Use an amount of Purified Water that is approximately one-third of the specified amount. For example, if the specified amount is 3000 mL, use 1000 mL of Purified Water.
7. Check the pH of Step 6 with a pH meter. If necessary, adjust the pH to 6 (5.8 - 6.2) by adding White Vinegar in small increments with mixing. Check pH after each addition.

Note: The final preparation should contain approximately 2375 ppm of available chlorine.

Note: NOT FOR HUMAN USE!

Note: No claims are made as to the safety or efficacy of this preparation. This formulation is provided solely at the unsolicited request of the pharmacist.

Note: Beyond Use Dates of preparations are conservative estimates by the formulator using reference books, peer reviewed literature, intended duration of therapy, formulation from commercially available products, organoleptic stability observations and current USP guidelines. Compounders may have stability tests performed by a reputable laboratory if they wish to extend the Beyond Use Date.

Note: Beyond Use Date after compounding is estimated to be 5 days.

TITLE: DELIVERY OF COMPOUNDED PREPARATIONS	
SOP NUMBER: 1.090	**VERSION NUMBER: 1.0**
Authorized By: Meta Pharmacy Services	Date: 02/01/2022
Prepared By: Pharmacist-In-Charge	Date:
Reviewed By: *Pharmacy Compliance Officer*	*Date:*
Date Effective:	

1.0 PURPOSE

1.1 The purpose of this procedure is to ensure that compounded preparations are delivered to the patient or health care facility in a manner such that the product integrity, quality, safety and efficacy are not compromised.

2.0 SCOPE

2.1 This procedure applies to all shipping personnel at Meta Pharmacy Services.

3.0 RESPONSIBILITY

3.1 The Pharmacist-In-Charge, or a pharmacist designee, shall supervise this procedure.

4.0 REFERENCES

4.1 USP Current Version <795> "Pharmaceutical Compounding – Non-Sterile Preparations

5.0 DEFINITIONS

5.1 N/A

6.0 FREQUENCY

6.1 This procedure shall be followed for each compounded preparation that is to be shipped to a patient's home or to another facility.

7.0 EQUIPMENT & SUPPLIES

7.1 Compounded preparation(s) and appropriate equipment/devices if necessary
7.2 Appropriate shipping container
7.3 Affiliated shipping company: i.e. FedEx, USPS (United States Postal Service)
7.4 Detailed shipping instructions

8.0 GENERAL INFORMATION

8.1 N/A

9.0 PROCEDURE

9.1 All pharmacy staff working in Meta Pharmacy Services, shall assure that the compounded preparation is properly shipped to the patient or health care facility without compromising the product integrity, quality, safety and efficacy, which will be verified by the Pharmacist-In-Charge and/or designee.

9.2 All compounded preparations shall be shipped in appropriate containers that will protect the preparation from wide variations in temperatures, structural damage or unapproved light sources.

9.2.1 Handling and shipping of refrigerated products shall follow USP<795 > guidelines

9.2.2 Refrigerated items are shipped in insulated containers with adequate ice packs to ensure product stability.

9.2.3 Refrigerated items are shipped through FedEx.

9.3 Items that are controlled substances or have a value greater than $1,000.00 will be shipped requiring a signature upon delivery (signature required). Once the patient receives the item the signature is documented in the shipping company's system.

9.4 In the case of a shipping error, pharmacy staff will immediately notify the patient and provide a return shipping label via FEDEX, UPS or USPS. The correct item will be resent to the patient without a fee. In addition, in such an error, the Pharmacist-In-Charge or designee will prepare a report and submit same to the Pharmacy Compliance Officer.

9.5 In the case of a lost shipment, Meta Pharmacy Services staff will attempt to track the lost shipment and file a claim with the appropriate shipping company. Pharmacy staff will verify the address with the patient and resend a new product to the patient. The Pharmacist-In-Charge and/or designee will prepare a written report and submit same to the Pharmacy Compliance Officer.

9.5.1 A Tracking Number for each shipment is stored in the system and can be given to patients upon request.

9.6 Instructions for proper inspection of the preparation will be transmitted to the patient or caregiver prior to shipment of the package.

9.7 A material safety data sheet (MSDS) for each product used in the compounded preparation shall be available in Meta Pharmacy Services in case a spill or accident occurs during transit.

9.8 Storage instructions shall be provided to the patient or caregiver to ensure that the product is stored appropriately at the patient's home or at the health care facility.

9.9 Instructions shall be provided to the patient or caregiver on how to contact the pharmacist for patient counseling.

9.10 The patient should be instructed to sign and return the Acknowledgment of Privacy Practice and Shipment Form (Attachment #1)

Name of Pharmacist present for Inspection:	Sean Barclay
Name of NVBOP Inspector:	Joe Dodge

Section 2: Inspector Review		Yes	No
1.	Self-Inspection Form complete and accurate. Comments: Completed prior to inspection. Answers validated during on-site inspection.	☒	☐
2.	Pharmacy Personnel List complete and accurate. Comments: Completed prior to inspection. Document retained for Inlumon verification.	☒	☐
3.	Controlled Substance Biennial Inventory complete and accurate. Comments: Reviewed document dated 7/25/24. Document contains date and time that inventory was completed. Document signed by pharmacist completing form. C-II products separated from remaining controlled substances.	☒	☐
4.	CSOS receiving documents complete and accurate. Comments: Reviewed documents from September 2024. Date and quantity received completed electronically. CSOS document attached to invoice from wholesaler.	☒	☐
5.	Controlled Substance invoices are complete and accurate. Comments: Pharmacist receiving product are signing and dating all invoices. Pharmacist also placing license number on document.	☒	☐
6.	Records of Pharmacy Personnel on duty complete and accurate. Comments: Manual sign-in log. Log contains date, printed name, staff signature, hours worked, temp, and illness symptoms.	☒	☐
7.	Change in Managing Pharmacist controlled substance inventory complete and accurate (if applicable). Comments: N/A	☐	☐
8.	Security of the pharmacy meets all of Nevada Statutes and Regulations.	☐	☒

	Comments: Location has dead-bolt on front door entry. Safe utilized for C-II products. Barrier between public and pharmacy has a barrier less than 5ft tall. Alarm system in place at location. Cameras located throughout pharmacy.		
9.	In-Service training records for pharmacy technicians complete and accurate. Comments: Will review with 2025 inspection.	☐	☐
10.	Immunization CE (1 hour required annually by 10/31) for immunizing pharmacy technicians complete. Comments: N/A – No immunizations at location.	☐	☐
11.	Activity logs for technicians in training complete and accurate. Comments: Reviewed log for Ronalynn Domingo. Document meets all requirements. Employee has completed 1500 hours of training.	☒	☐
12.	Pharmacy labels on medications being dispensed to patients are labeled with an accurate expiration date. Comments:	☒	☐

Section 3: Controlled Substance Audit Report			
Drug Name	Manual count at time of audit	Balance on hand from software system or manual record at time of audit	Discrepancy
Oxycodone 10mg	350	350	0
Oxy/APAP 10/325mg	504	504	0
Morphine Sulfate 15mg ER	162	162	0
Comments: Location utilizes manual perpetual log.			

Section 4: Required Follow-Up - The following items were identified as issues which require a response from the managing pharmacist.	
Description of Issue	**Response due date**
Must meet all security requirements of NAC 639.520.	Completed by October 2025.

Additional Comments:
Well prepared for inspection.
10-20% retail prescriptions vs compounded prescriptions.
Utilizing Infinite Dynamics for delivery service. 50% delivery. Patients are receiving toll-free number and product information as part of delivery service.

If you are required to provide documentation to the inspector via fax or e-mail use the contact information listed below.

Please fax required documents to 1-702-486-7903 for Las Vegas inspectors

Section 9: Statement of Responsibility - MUST BE COMPLETED by an Authorized Person (NAC 639.945)

Statement of Responsibility

1. I am the CEO (title) for POLARIS PHARMACY SERVICES (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be responsible for any violations of pharmacy law that may occur in the Pharmacy owned by such owner(s), shareholder(s), member(s), or partner(s).
3. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be named in any action taken by the Nevada State Board of Pharmacy against the Pharmacy.
4. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) cannot require or permit the pharmacist(s) in said Pharmacy to violate any provision of local, state, or federal laws or regulations pertaining to the practice of pharmacy.
5. I further understand and acknowledge that Nevada law requires that each pharmacy located inside the State of Nevada employ only pharmacists, intern pharmacists, pharmaceutical technicians, and technicians in training that are licensed by the Nevada State Board of Pharmacy. (NRS 639.100).
6. I further understand and acknowledge that Nevada law requires that each pharmacy located outside the State of Nevada engaged in providing pharmacy services into Nevada employs at least one pharmacist licensed by the Nevada State Board of Pharmacy who will be responsible for any prescription dispensed to a patient located in Nevada and responsible for any acts or omissions of pharmacy personnel who are not registered with the Board. (NRS 639.2328).

Section 10: Affidavit for Pharmacies- MUST BE COMPLETED by pharmacies NOT CURRENTLY PERFORMING Sterile Compounding

Affidavit for Pharmacy License

I, DAVID ROMBRO hereby certify that the assertions in this Affidavit are true and correct to the best of my knowledge and belief, and state as follows:

1. I am the CEO (title) for POLARIS PHARMACY SERVICES (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I certify that upon licensure, the Pharmacy will not perform sterile compounding or ship sterile compounds into Nevada.
3. I understand and acknowledge that the Pharmacy and any of its staff members may be subject to discipline by the Board if the Pharmacy performs sterile compounding or ships any sterile compounds into Nevada without first obtaining written authorization from the Board to do so.
4. I certify that if the Pharmacy makes the decision to perform sterile compounding or to ship any sterile compounds into Nevada, the Pharmacy, through an authorized representative, will first notify the Board via a written request, and obtain written approval to perform sterile compounding or to ship any sterile compounds into Nevada.
5. I understand that if the Pharmacy seeks approval to perform sterile compounding or to ship any sterile compounds into Nevada, an authorized representative of the Pharmacy may be required to appear before the Board to answer questions before such approval is granted.

FURTHER YOUR AFFIANT SAYETH NAUGHT.

Section 8: Arrests, Detentions, Litigations, Arbitrations	Yes	No
1. Have you ever been convicted of, or entered, a plea of guilty, guilty by mentally ill or nolo contendere to any criminal offense or civil violation, federal or state, for any reason whatsoever, regardless of the disposition of the event? (Except minor traffic citations.)		✔
2. If you answered "yes" to question 1, was the offense or violation related to drugs, including prescription drugs and/or controlled substances, the manufacturer or distribution of drugs or the practice of pharmacy?		
3. Have you ever had a civil or criminal record expunged or sealed by a court order?		✔
4. Have you, as an individual, member or a company, partner, or owner, director or officer of a corporation, ever been a party to a lawsuit as either a plaintiff or defendant (including any administrative proceedings before a licensing board) or of an arbitration as either a claimant or respondent? (Other than divorces.)	✔	
5. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) been a party to a lawsuit (including any administrative proceedings before a licensing board), arbitration or bankruptcy?	✔	
6. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer or director) ever appeared before any licensing agency or similar authority in or outside the State of Nevada for any reason whatsoever (including any disciplinary or board citation)?	✔	
7. Have you ever been denied a personal license, permit, certificate or registration for a privileged, occupational or professional activity?		✔
8. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner member, officer or director) ever been refused a business license.		✔
9. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) ever surrendered a license, permit, certificate or registration relating to the pharmaceutical industry voluntarily or otherwise (other than upon voluntary closure of a manufacturer).		✔
10. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		✔

Please use and make copies of this page (if necessary) to provide information regarding any questions, 1-10, you have marked "YES" to in section 8 of the application. A signed statement of explanation for each event and a copy of all documents that identify the circumstance or contain an order, agreement or other disposition for the event must be provided.

Challenges Polaris Faced in Minnesota

Polaris entered the Minnesota market in November 2018. The company operates only one pharmacy in Minnesota, which is located at 5220 Park Glen Road, St. Louis Park. Polaris' early experience in Minnesota was not without its challenges, but the company has made a good faith effort to address its challenges and is constantly looking to improve.

When Polaris entered the Minnesota market, it was surprised to find a labor market (particularly for pharmacy technicians) that was much tighter than other markets in which Polaris operates and experienced more staff turnover in Minnesota than it is accustomed to in other markets. The Covid-19 pandemic obviously put an incredible amount of stress on every stakeholder in the pharmacy industry, and Polaris was no exception. The pandemic made it even more difficult for Polaris to recruit, hire, and retain talented staff.

Polaris continues to believe it did not engage in central services by having Minnesota-licensed technicians located in Florida perform remote order entry tasks in connection with prescription orders filled in Minnesota. In letters to the Board dated July 19, 2019, Polaris explained why it began using Minnesota-licensed technicians based in Florida to assist Polaris Minnesota with order entry tasks.

In sum, during its initial months of operation, Polaris faced an unanticipated and unacceptable backlog of prescription orders that needed to be filled in Minnesota. The backlog resulted largely from Polaris' inability to recruit and retain enough capable pharmacy technicians in Minnesota during the early months of operation. To address the backlog and ensure the timely delivery of prescriptions to Minnesota patients, Polaris initially had Minnesota-licensed technicians based in Florida perform order entry services on behalf of Polaris Minnesota. These technicians were experienced technicians who were licensed in Minnesota before they performed order entry work for Polaris Minnesota. Further, while performing remote order entry work from a Polaris Florida location, these technicians were connected virtually to Polaris Minnesota's physical workspace through Polaris' FrameworkLTC software platform, which is commonly used across the long-term care pharmacy industry. At all times, the work of these technicians was overseen by a licensed pharmacist at the Florida pharmacy (where the data was entered into FrameworkLTC), as well as a Minnesota-licensed pharmacist in the Minnesota pharmacy, who ultimately controlled and was responsible for the technicians' work and any prescriptions filled in connection with data they entered into the system. Additionally, until May 2019, Polaris had IND Consulting and its "Team X" do some remote order entry work for Polaris Minnesota. Aside from the order entry function, Polaris Minnesota's prescription processing and filling functions have always taken place entirely in the Minnesota pharmacy. Polaris has at times relied on similar remote order entry processes in other states without triggering central service pharmacy requirements.

Accordingly, when Polaris started using this process to help deal with the Minnesota backlog, it did not anticipate that it might be triggering central services pharmacy requirements. For this reason, Polaris initially did not submit or seek approval from the Board for a central prescription drug processing policy or procedure. In March 2019, after Board staff expressed a

view that Polaris' use of Minnesota-licensed technicians based in Florida to perform remote entry work constituted an unauthorized central service arrangement, Polaris took immediate steps to address the issue. Polaris initially flew Minnesota-licensed technicians from Florida to Minnesota, so they could be physically present in the Polaris Minnesota pharmacy while performing the same order entry functions they had been performing in Florida.

Finally, Polaris sought Board approval of several remote order entry variances, with the goal of being authorized to resume using Minnesota-licensed technicians based in Florida to perform remote order entry for Polaris Minnesota, and particularly to deal with emergencies or backlogs. When Board staff initially raised this issue in March 2019, Polaris did not believe it could immediately shift all order entry functions to its limited staff in Minnesota without compromising patient safety and welfare. At the time, Polaris was still working through the backlog, onboarding new care facilities, and working hard to locate, hire, train, and retain technicians and other staff in Minnesota in a challenging labor market. Under the circumstances, Polaris determined it was necessary to continue using Minnesota licensed, Florida-based technicians for a period of time in order to deal with the backlog and continue filling prescriptions in a timely manner for patients who needed them, while simultaneously building up its Minnesota workforce and making the changes necessary to meet the expectations of Board staff. As soon as Polaris was staffed and equipped to perform all order entry functions in Minnesota, it stopped utilizing technicians who were not physically located in Minnesota altogether. Accordingly, from June 2019 to the present, Polaris has only used Minnesota-licensed technicians physically located in the Polaris Minnesota pharmacy to perform order entry work on prescription orders filled in Minnesota. Polaris took concerns raised by Board staff over remote order entry issues seriously, and it believes it acted reasonably under the circumstances to address those concerns, while also maintaining high levels of patient care.

Polaris remained committed to working cooperatively with the Board to better understand what it must do in order to utilize remote order entry processes in the future. Polaris would always attempt to rely on technicians physically located in its Minnesota pharmacy to perform data entry and other prescription filling functions. The Board acknowledged granting variance requests to many pharmacy chains and health-systems that authorize the use of remote order entry processes. In March 2020, the Board also issued Covid-19 related guidance acknowledging that pharmacists and technicians could perform various prescription drug filling functions while working remotely—including data entry of prescriptions and orders; verifying prescriptions; certifying data entry and the finished prescriptions (i.e., the product check); conducting profile and prospective drug utilization reviews; and stage-checking for compounding—so long as affiliated pharmacies were using adequate computer software and hardware for the tasks being performed. While the Board's Covid-19 guidance evolved after Governor Walz's Peacetime Emergency declaration was rescinded, Polaris continues to believe remote order entry processes like those implemented during the first few months of Polaris' operations in Minnesota were safe, effective, and should have a place in the delivery of modern pharmacy services.

The Board approved the central services variance #265679-010 on July 13, 2022 between Polaris Pharmacy Services of Minnesota, LLC and both the Polaris Pharmacies located in Tampa and Ft. Lauderdale Florida for urgent or emergent needs.

BEFORE THE MINNESOTA

BOARD OF PHARMACY

In the Matter of
Polaris Pharmacy Services of Minnesota, LLC
License No. 265679

STIPULATION AND CONSENT ORDER

STIPULATION

Polaris Pharmacy Services of Minnesota, LLC ("Licensee") and the Minnesota Board of Pharmacy Committee on Professional Standards ("Committee") agree the above-referenced matter may be resolved without trial of any issue or fact as follows:

I.

JURISDICTION

1. The Minnesota Board of Pharmacy ("Board") is authorized pursuant to Minnesota Statutes chapter 151 to license and regulate pharmacies and to take disciplinary action as appropriate.

2. Licensee holds a pharmacy license from the Board and is subject to the jurisdiction of the Board with respect to the matters referred to in this Stipulation and Consent Order.

II.

CONFERENCE

3. On August 18, 2021, Licensee met with the Committee to discuss the allegations described in a Notice of Conference. Board members Kendra Metz and Stuart Williams comprised the Committee. The Board's Executive Director, Cody Wiberg; Deputy Director, Jennell Bilek; and staff attorney, Brian Park, were also present. Alex Mountain, Assistant Attorney General, represented the Committee. Brian A. Dillon, of Lathrop GPM LLP, represented licensee and was

accompanied by Licensee's Pharmacist-in-Charge, Neil Uitto; Polaris' Chief Operating Officer, Steven Baker; and Polaris' Executive Vice President of Operations, Todd Zisek.

III.

FACTS

4. On or about November 1, 2018, the Board licensed Licensee as a pharmacy in Minnesota.

5. Licensee is a closed door, long-term care ("LTC") pharmacy that prepares sterile and non-sterile compounded drug products for dispensing.

6. Licensee has two affiliated pharmacy locations in Florida, both licensed by the Board as follows:

a. On or about July 8, 2016, the Board issued Polaris Rx, located in Fort Lauderdale, Florida ("Pharmacy 1"), non-resident pharmacy license #265101.

b. On or about December 5, 2018, the Board issued Polaris Pharmacy Services of Tampa, located in Tampa, Florida ("Pharmacy 2"), non-resident pharmacy license #265721.

7. On or about March 19, 2019, two Board Surveyors visited Licensee for the purpose of completing a routine inspection, met with the pharmacist-in-charge, and identified the following:

a. Seven pharmacy technicians registered by the Board and employed by Pharmacy 1 and Pharmacy 2, were living in Florida but listed their current physical address as Licensee's address in Minnesota.

b. During the inspection, the Board Surveyors cited Licensee for engaging in central services with Pharmacy 1 and Pharmacy 2, by allowing pharmacy technicians working in Florida to remotely perform data entry of prescription drug information for Minnesota patients into

Licensee's Frameworks LTC prescription processing and dispensing software system ("FW-LTC"); followed by verification of the data entry by Licensee's pharmacist staff members working in Minnesota ("Central Service").

c. Prior to beginning Central Service, Licensee failed to submit a copy of its policy and procedure manual and failed to obtain Board approval to participate in a Central Service arrangement with Pharmacy 1 and Pharmacy 2.

d. Licensee disputes that it was operating a "central services arrangement" as it understands that term to be commonly used within the industry. Licensee maintains that its use of remote order entry processes was necessary under the circumstances, due to a backlog of prescription orders that had accumulated due in large part to Licensee's inability to recruit and retain sufficient staff in Minnesota during its early months of operating in the State. Nonetheless, for purposes of this stipulation, Licensee acknowledges and understands the March 2019 citation.

e. Licensee's nonsterile compounding records failed to include an assigned beyond use date ("BUD") for the final compounded drug product, or included a BUD exceeding those recommended within United States Pharmacopeia, General Chapter 795 for Pharmaceutical Compounding - Nonsterile Preparations ("USP 795"), without documentation of a reference for literature or a stability study applicable to the specific drug product allowing for extension of the BUD. Licensee avers that it responded to these findings by providing education to its staff to ensure compounded components included lot numbers, expiration dates, and BUDs, along with noting the supporting reference sources. Licensee states that it is not aware of any other issues regarding its compliance with BUD requirements since 2019.

8. On or about March 20, 2019, the Board received a complaint alleging that Licensee was utilizing pharmacy technicians from outside of Minnesota to enter prescription data. On or about April 9, 2019, a Board Surveyor reminded Licensee, after expanding its operations to 24-

hours, that pharmacy technicians working outside of its Minnesota location could not be used to help with covering the additional hours that the pharmacy is open, due to the lack of Board approved policies for Central Services with Pharmacy 1 and Pharmacy 2. As noted above, Licensee disputes that it was operating a "central services arrangement" as it understands that term to be commonly used within the industry. Licensee maintains that its use of remote order entry processes was necessary under the circumstances, due to a backlog of prescription orders that had accumulated due in large part to Licensee's inability to recruit and retain sufficient staff in Minnesota during its early months of operating in the State. Nonetheless, for purposes of this stipulation, Licensee acknowledges and understands the Board's concern regarding the use of out-of-state technicians to enter prescription data.

9. On June 11, 2019, two Board Surveyors visited Licensee for the purpose of an investigation, met with representatives of the Licensee, and identified the following:

a. The pharmacist-in-charge stated that, as far as she was aware, Pharmacy 1 and Pharmacy 2, both located in Florida, were the only two locations providing Central Services for Licensee.

b. Licensee utilized a company named IND Consulting ("IND") for emergency kit ("E-kit") billing and entry of patient information when pharmacy services are initiated in a new LTC facility. IND's website states its staff are able to provide services including, but not limited to, billing services, medical record entry, and data entry solutions, with guaranteed staffing in fully operational data centers that are open 24 hours a day and 365 days a year, located within or outside of the United States across the globe in Mexico, India, the Philippines, and Florida. During the conference with the Committee, Licensee admitted that IND consulting had been used to enter prescription data for prescription drug orders ultimately dispensed by its

Minnesota pharmacy. Licensee cannot definitively state where individuals affiliated with IND were licensed or physically located when entering such data.

c. At the end of the visit, the Board Surveyor's provided an Investigative Report requesting additional information and reminding Licensee again that it cannot engage in Central Services without Board approval.

10. On February 12, 2020, two Board Surveyors visited Licensee for the purposes of an investigation, met with representatives of Licensee, and identified the following:

a. After arriving at 4:36 a.m., one of the Board Surveyors observed two of Licensee's pharmacy technicians were allowed badge access to the pharmacy entrance prior to the arrival of RPh 3 at around 5:55 a.m. One technician was found to be working in the sterile compounding area and another was logged into Licensee's computer. A representative of Licensee later stated that three pharmacy technicians had been given keys and passcodes to access Licensee's pharmacy. During its conference with the Committee, Licensee admitted that this allegation is true, but stated that senior management took corrective action upon learning of the situation, including immediately revoking the access code of all non-pharmacists and physically rekeying all doors within the pharmacy. Licensees avers that periodic security assessments confirm that no unauthorized persons have had access to the pharmacy since February 2020.

b. Six pharmacy technicians, including the IV pharmacy technician, were present in the "filling area" with only one pharmacist, who was the second pharmacist to arrive. Another pharmacist was in an "order entry" area, a distinctly different area separated by a wall and door. The Board Surveyors were told that additional pharmacy technicians were scheduled that morning to perform non-technician "staging or stocking" duties. However, the Board Surveyors observed that the additional pharmacy technicians that were supposedly scheduled to perform non-technician duties, were filling orders in the "filling area" to be checked by the one pharmacist.

Licensee avers that is does not have sufficient information to admit or deny the Board surveyors' observations, but that company policy requires compliance with required technician-to-pharmacist ratios.

IV.

LAWS

11. Licensee acknowledges the conduct described in section III above constitutes a violation of Minn. Stat. § 151.071, subd. 2(7), and warrants the disciplinary action described below.

V.

DISCIPLINARY ACTION

The parties agree the Board may take the following disciplinary action and require compliance with the following terms:

12. The Board **REPRIMANDS** Licensee and imposes a **CIVIL PENALTY** in the amount of $50,000 for the conduct described in section III above. The civil penalty shall be paid by cashier's check or money order made payable to the Minnesota Board of Pharmacy, c/o Cody Wiberg, Executive Director, 2829 University Avenue S.E., Suite 530, Minneapolis, Minnesota 55414, within 60 days of the date of entry of this Order.

13. The Board places the following **CONDITION** on Licensee's License: every six months, for a period of three years, Licensee's CEO must certify to the Board's Executive Director that Licensee's licensed pharmacies that provide services to Minnesota residents are in full compliance with all applicable Minnesota statutes and rules.

VI.

CONSEQUENCES FOR NONCOMPLIANCE OR ADDITIONAL VIOLATIONS

14. If Licensee fails to comply with or violates this Stipulation and Consent Order, the Committee may, in its discretion, seek additional discipline either by initiating a contested case proceeding pursuant to Minnesota Statutes chapter 14 or by bringing the matter directly to the Board pursuant to the following procedure:

a. The Committee shall schedule a hearing before the Board. At least 20 days before the hearing, the Committee must mail Licensee a notice of the violation(s) alleged by the Committee. In addition, the notice must designate the time and place of the hearing. Within ten days after the notice is mailed, Licensee shall submit a written response to the allegations. If Licensee does not submit a timely response to the Board, the allegations may be deemed admitted.

b. The Committee, in its discretion, may schedule a conference with Licensee prior to the hearing before the Board to discuss the allegations and to attempt to resolve the allegations through agreement.

c. Prior to the hearing before the Board, the Committee and Licensee may submit affidavits and written argument in support of their positions. At the hearing, the Committee and Licensee may present oral argument. Argument may not refer to matters outside the record. The evidentiary record must be limited to the affidavits submitted prior to the hearing and this Stipulation and Consent Order. The Committee will have the burden of proving by a preponderance of the evidence that a violation has occurred. If Licensee has failed to submit a timely response to the allegations, Licensee may not contest the allegations, but may present argument concerning the appropriateness of additional discipline. Pursuant to this process, Licensee waives a hearing before an administrative law judge, discovery, cross-examination of

adverse witnesses, and other procedures governing hearings pursuant to Minnesota Statutes chapter 14.

d. Licensee's correction of a violation before the conference, hearing, or meeting of the Board may be taken into account by the Board but does not limit the Board's authority to impose discipline for the violation. A decision by the Committee not to seek discipline when it first learns of a violation does not waive the Committee's right to later seek discipline for that violation, either alone or in combination with other violations, at any time while Licensee's license is in a suspended status.

e. Following the hearing, the Board will deliberate confidentially. If the allegations are not proved, the Board must dismiss the allegations. If a violation is proved, the Board may impose additional discipline, including conditions or limitations on Licensee's license, a period of suspension, conditions of reinstatement, or revocation of Licensee's license.

f. Nothing herein limits the Committee's or the Board's right to temporarily suspend Licensee's license as provided in Minnesota Statutes chapters 151 and 214, based on a violation of this Stipulation and Consent Order or based on conduct of Licensee not specifically referred to herein.

VII. ADDITIONAL INFORMATION

15. Licensee waives the contested case hearing and all other procedures before the Board to which Licensee may be entitled under the Minnesota and United States constitutions, statutes, or rules.

16. Licensee waives any claims against the Board, the Minnesota Attorney General, the State of Minnesota, and their agents, employees, and representatives related to the

investigation of the conduct herein, or the negotiation or execution of this Stipulation and Consent Order, which may otherwise be available to Licensee.

17. This Stipulation and Consent Order, the files, records, and proceedings associated with this matter shall constitute the entire record and may be reviewed by the Board in its consideration of this matter.

18. Either party may seek enforcement of this Stipulation and Consent Order in any appropriate civil court.

19. Licensee has read, understands, and agrees to this Stipulation and Consent Order and has voluntarily signed the Stipulation and Consent Order. Licensee is aware this Stipulation and Consent Order must be approved by the Board before it goes into effect. The Board may either approve the Stipulation and Consent Order as proposed, approve it subject to specified change, or reject it. If the changes are acceptable to Licensee, the Stipulation and Consent Order will take effect and the order as modified will be issued. If the changes are unacceptable to Licensee or the Board rejects the Stipulation and Consent Order, it will be of no effect except as specified in the following paragraph.

20. Licensee agrees that if the Board rejects this Stipulation and Consent Order or a lesser remedy than indicated in this settlement, and this case comes again before the Board, Licensee will assert no claim that the Board was prejudiced by its review and discussion of this Stipulation and Consent Order or of any records relating to it. If the Board rejects this Stipulation and Consent Order, the parties agree that this Stipulation and Consent Order will not be admissible in any proceedings.

21. This Stipulation and Consent Order does not limit the Board's authority to proceed against Licensee by initiating a contested case hearing or by other appropriate means on the basis

of any act, conduct, or admission of Licensee which constitutes grounds for disciplinary action, and which is not directly related to the specific facts and circumstances set forth in this document.

VIII.

DATA PRACTICES NOTICES

22. This Stipulation and Consent Order constitutes disciplinary action by the Board and is classified as public data pursuant to Minnesota Statutes section 13.41, subdivision 5. Data regarding this action will be provided to data banks as required by Federal law or consistent with Board policy. While this Stipulation and Consent Order is in effect, information obtained by the Board pursuant to this Order is considered active investigative data on a licensed health professional, and as such, is classified as confidential data pursuant to Minnesota Statutes section 13.41, subdivision 4.

23. This Stipulation contains the entire agreement between the parties, there being no other agreement of any kind, verbal or otherwise, which varies this Stipulation.

CONSENT:

Challenges Polaris Faced in Minnesota

Polaris entered the Minnesota market in November 2018. The company operates only one pharmacy in Minnesota, which is located at 5220 Park Glen Road, St. Louis Park. Polaris' early experience in Minnesota was not without its challenges, but the company has made a good faith effort to address its challenges and is constantly looking to improve.

When Polaris entered the Minnesota market, it was surprised to find a labor market (particularly for pharmacy technicians) that was much tighter than other markets in which Polaris operates and experienced more staff turnover in Minnesota than it is accustomed to in other markets. The Covid-19 pandemic obviously put an incredible amount of stress on every stakeholder in the pharmacy industry, and Polaris was no exception. The pandemic made it even more difficult for Polaris to recruit, hire, and retain talented staff.

Polaris continues to believe it did not engage in central services by having Minnesota-licensed technicians located in Florida perform remote order entry tasks in connection with prescription orders filled in Minnesota. In letters to the Board dated July 19, 2019, Polaris explained why it began using Minnesota-licensed technicians based in Florida to assist Polaris Minnesota with order entry tasks.

In sum, during its initial months of operation, Polaris faced an unanticipated and unacceptable backlog of prescription orders that needed to be filled in Minnesota. The backlog resulted largely from Polaris' inability to recruit and retain enough capable pharmacy technicians in Minnesota during the early months of operation. To address the backlog and ensure the timely delivery of prescriptions to Minnesota patients, Polaris initially had Minnesota-licensed technicians based in Florida perform order entry services on behalf of Polaris Minnesota. These technicians were experienced technicians who were licensed in Minnesota before they performed order entry work for Polaris Minnesota. Further, while performing remote order entry work from a Polaris Florida location, these technicians were connected virtually to Polaris Minnesota's physical workspace through Polaris' FrameworkLTC software platform, which is commonly used across the long-term care pharmacy industry. At all times, the work of these technicians was overseen by a licensed pharmacist at the Florida pharmacy (where the data was entered into FrameworkLTC), as well as a Minnesota-licensed pharmacist in the Minnesota pharmacy, who ultimately controlled and was responsible for the technicians' work and any prescriptions filled in connection with data they entered into the system. Additionally, until May 2019, Polaris had IND Consulting and its "Team X" do some remote order entry work for Polaris Minnesota. Aside from the order entry function, Polaris Minnesota's prescription processing and filling functions have always taken place entirely in the Minnesota pharmacy. Polaris has at times relied on similar remote order entry processes in other states without triggering central service pharmacy requirements.

Accordingly, when Polaris started using this process to help deal with the Minnesota backlog, it did not anticipate that it might be triggering central services pharmacy requirements. For this reason, Polaris initially did not submit or seek approval from the Board for a central prescription drug processing policy or procedure. In March 2019, after Board staff expressed a

view that Polaris' use of Minnesota-licensed technicians based in Florida to perform remote entry work constituted an unauthorized central service arrangement, Polaris took immediate steps to address the issue. Polaris initially flew Minnesota-licensed technicians from Florida to Minnesota, so they could be physically present in the Polaris Minnesota pharmacy while performing the same order entry functions they had been performing in Florida.

Finally, Polaris sought Board approval of several remote order entry variances, with the goal of being authorized to resume using Minnesota-licensed technicians based in Florida to perform remote order entry for Polaris Minnesota, and particularly to deal with emergencies or backlogs. When Board staff initially raised this issue in March 2019, Polaris did not believe it could immediately shift all order entry functions to its limited staff in Minnesota without compromising patient safety and welfare. At the time, Polaris was still working through the backlog, onboarding new care facilities, and working hard to locate, hire, train, and retain technicians and other staff in Minnesota in a challenging labor market. Under the circumstances, Polaris determined it was necessary to continue using Minnesota licensed, Florida-based technicians for a period of time in order to deal with the backlog and continue filling prescriptions in a timely manner for patients who needed them, while simultaneously building up its Minnesota workforce and making the changes necessary to meet the expectations of Board staff. As soon as Polaris was staffed and equipped to perform all order entry functions in Minnesota, it stopped utilizing technicians who were not physically located in Minnesota altogether. Accordingly, from June 2019 to the present, Polaris has only used Minnesota-licensed technicians physically located in the Polaris Minnesota pharmacy to perform order entry work on prescription orders filled in Minnesota. Polaris took concerns raised by Board staff over remote order entry issues seriously, and it believes it acted reasonably under the circumstances to address those concerns, while also maintaining high levels of patient care.

Polaris remained committed to working cooperatively with the Board to better understand what it must do in order to utilize remote order entry processes in the future. Polaris would always attempt to rely on technicians physically located in its Minnesota pharmacy to perform data entry and other prescription filling functions. The Board acknowledged granting variance requests to many pharmacy chains and health-systems that authorize the use of remote order entry processes. In March 2020, the Board also issued Covid-19 related guidance acknowledging that pharmacists and technicians could perform various prescription drug filling functions while working remotely—including data entry of prescriptions and orders; verifying prescriptions; certifying data entry and the finished prescriptions (i.e., the product check); conducting profile and prospective drug utilization reviews; and stage-checking for compounding—so long as affiliated pharmacies were using adequate computer software and hardware for the tasks being performed. While the Board's Covid-19 guidance evolved after Governor Walz's Peacetime Emergency declaration was rescinded, Polaris continues to believe remote order entry processes like those implemented during the first few months of Polaris' operations in Minnesota were safe, effective, and should have a place in the delivery of modern pharmacy services.

The Board approved the central services variance #265679-010 on July 13, 2022 between Polaris Pharmacy Services of Minnesota, LLC and both the Polaris Pharmacies located in Tampa and Ft. Lauderdale Florida for urgent or emergent needs.

BEFORE THE MINNESOTA

BOARD OF PHARMACY

In the Matter of
Polaris Pharmacy Services of Minnesota, LLC
License No. 265679

STIPULATION AND CONSENT ORDER

STIPULATION

Polaris Pharmacy Services of Minnesota, LLC ("Licensee") and the Minnesota Board of Pharmacy Committee on Professional Standards ("Committee") agree the above-referenced matter may be resolved without trial of any issue or fact as follows:

I.

JURISDICTION

1. The Minnesota Board of Pharmacy ("Board") is authorized pursuant to Minnesota Statutes chapter 151 to license and regulate pharmacies and to take disciplinary action as appropriate.

2. Licensee holds a pharmacy license from the Board and is subject to the jurisdiction of the Board with respect to the matters referred to in this Stipulation and Consent Order.

II.

CONFERENCE

3. On August 18, 2021, Licensee met with the Committee to discuss the allegations described in a Notice of Conference. Board members Kendra Metz and Stuart Williams comprised the Committee. The Board's Executive Director, Cody Wiberg; Deputy Director, Jennell Bilek; and staff attorney, Brian Park, were also present. Alex Mountain, Assistant Attorney General, represented the Committee. Brian A. Dillon, of Lathrop GPM LLP, represented licensee and was

accompanied by Licensee's Pharmacist-in-Charge, Neil Uitto; Polaris' Chief Operating Officer, Steven Baker; and Polaris' Executive Vice President of Operations, Todd Zisek.

III.

FACTS

4. On or about November 1, 2018, the Board licensed Licensee as a pharmacy in Minnesota.

5. Licensee is a closed door, long-term care ("LTC") pharmacy that prepares sterile and non-sterile compounded drug products for dispensing.

6. Licensee has two affiliated pharmacy locations in Florida, both licensed by the Board as follows:

a. On or about July 8, 2016, the Board issued Polaris Rx, located in Fort Lauderdale, Florida ("Pharmacy 1"), non-resident pharmacy license #265101.

b. On or about December 5, 2018, the Board issued Polaris Pharmacy Services of Tampa, located in Tampa, Florida ("Pharmacy 2"), non-resident pharmacy license #265721.

7. On or about March 19, 2019, two Board Surveyors visited Licensee for the purpose of completing a routine inspection, met with the pharmacist-in-charge, and identified the following:

a. Seven pharmacy technicians registered by the Board and employed by Pharmacy 1 and Pharmacy 2, were living in Florida but listed their current physical address as Licensee's address in Minnesota.

b. During the inspection, the Board Surveyors cited Licensee for engaging in central services with Pharmacy 1 and Pharmacy 2, by allowing pharmacy technicians working in Florida to remotely perform data entry of prescription drug information for Minnesota patients into

Licensee's Frameworks LTC prescription processing and dispensing software system ("FW-LTC"), followed by verification of the data entry by Licensee's pharmacist staff members working in Minnesota ("Central Service").

c. Prior to beginning Central Service, Licensee failed to submit a copy of its policy and procedure manual and failed to obtain Board approval to participate in a Central Service arrangement with Pharmacy 1 and Pharmacy 2.

d. Licensee disputes that it was operating a "central services arrangement" as it understands that term to be commonly used within the industry. Licensee maintains that its use of remote order entry processes was necessary under the circumstances, due to a backlog of prescription orders that had accumulated due in large part to Licensee's inability to recruit and retain sufficient staff in Minnesota during its early months of operating in the State. Nonetheless, for purposes of this stipulation, Licensee acknowledges and understands the March 2019 citation.

e. Licensee's nonsterile compounding records failed to include an assigned beyond use date ("BUD") for the final compounded drug product, or included a BUD exceeding those recommended within United States Pharmacopeia, General Chapter 795 for Pharmaceutical Compounding - Nonsterile Preparations ("USP 795"), without documentation of a reference for literature or a stability study applicable to the specific drug product allowing for extension of the BUD. Licensee avers that it responded to these findings by providing education to its staff to ensure compounded components included lot numbers, expiration dates, and BUDs, along with noting the supporting reference sources. Licensee states that it is not aware of any other issues regarding its compliance with BUD requirements since 2019.

8. On or about March 20, 2019, the Board received a complaint alleging that Licensee was utilizing pharmacy technicians from outside of Minnesota to enter prescription data. On or about April 9, 2019, a Board Surveyor reminded Licensee, after expanding its operations to 24-

hours, that pharmacy technicians working outside of its Minnesota location could not be used to help with covering the additional hours that the pharmacy is open, due to the lack of Board approved policies for Central Services with Pharmacy 1 and Pharmacy 2. As noted above, Licensee disputes that it was operating a "central services arrangement" as it understands that term to be commonly used within the industry. Licensee maintains that its use of remote order entry processes was necessary under the circumstances, due to a backlog of prescription orders that had accumulated due in large part to Licensee's inability to recruit and retain sufficient staff in Minnesota during its early months of operating in the State. Nonetheless, for purposes of this stipulation, Licensee acknowledges and understands the Board's concern regarding the use of out-of-state technicians to enter prescription data.

9. On June 11, 2019, two Board Surveyors visited Licensee for the purpose of an investigation, met with representatives of the Licensee, and identified the following:

a. The pharmacist-in-charge stated that, as far as she was aware, Pharmacy 1 and Pharmacy 2, both located in Florida, were the only two locations providing Central Services for Licensee.

b. Licensee utilized a company named IND Consulting ("IND") for emergency kit ("E-kit") billing and entry of patient information when pharmacy services are initiated in a new LTC facility. IND's website states its staff are able to provide services including, but not limited to, billing services, medical record entry, and data entry solutions, with guaranteed staffing in fully operational data centers that are open 24 hours a day and 365 days a year, located within or outside of the United States across the globe in Mexico, India, the Philippines, and Florida. During the conference with the Committee, Licensee admitted that IND consulting had been used to enter prescription data for prescription drug orders ultimately dispensed by its

Minnesota pharmacy. Licensee cannot definitively state where individuals affiliated with IND were licensed or physically located when entering such data.

c. At the end of the visit, the Board Surveyor's provided an Investigative Report requesting additional information and reminding Licensee again that it cannot engage in Central Services without Board approval.

10. On February 12, 2020, two Board Surveyors visited Licensee for the purposes of an investigation, met with representatives of Licensee, and identified the following:

a. After arriving at 4:36 a.m., one of the Board Surveyors observed two of Licensee's pharmacy technicians were allowed badge access to the pharmacy entrance prior to the arrival of RPh 3 at around 5:55 a.m. One technician was found to be working in the sterile compounding area and another was logged into Licensee's computer. A representative of Licensee later stated that three pharmacy technicians had been given keys and passcodes to access Licensee's pharmacy. During its conference with the Committee, Licensee admitted that this allegation is true, but stated that senior management took corrective action upon learning of the situation, including immediately revoking the access code of all non-pharmacists and physically rekeying all doors within the pharmacy. Licensees avers that periodic security assessments confirm that no unauthorized persons have had access to the pharmacy since February 2020.

b. Six pharmacy technicians, including the IV pharmacy technician, were present in the "filling area" with only one pharmacist, who was the second pharmacist to arrive. Another pharmacist was in an "order entry" area, a distinctly different area separated by a wall and door. The Board Surveyors were told that additional pharmacy technicians were scheduled that morning to perform non-technician "staging or stocking" duties. However, the Board Surveyors observed that the additional pharmacy technicians that were supposedly scheduled to perform non-technician duties, were filling orders in the "filling area" to be checked by the one pharmacist.

Licensee avers that is does not have sufficient information to admit or deny the Board surveyors' observations, but that company policy requires compliance with required technician-to-pharmacist ratios.

IV.

LAWS

11. Licensee acknowledges the conduct described in section III above constitutes a violation of Minn. Stat. § 151.071, subd. 2(7), and warrants the disciplinary action described below.

V.

DISCIPLINARY ACTION

The parties agree the Board may take the following disciplinary action and require compliance with the following terms:

12. The Board **REPRIMANDS** Licensee and imposes a **CIVIL PENALTY** in the amount of $50,000 for the conduct described in section III above. The civil penalty shall be paid by cashier's check or money order made payable to the Minnesota Board of Pharmacy, c/o Cody Wiberg, Executive Director, 2829 University Avenue S.E., Suite 530, Minneapolis, Minnesota 55414, within 60 days of the date of entry of this Order.

13. The Board places the following **CONDITION** on Licensee's License: every six months, for a period of three years, Licensee's CEO must certify to the Board's Executive Director that Licensee's licensed pharmacies that provide services to Minnesota residents are in full compliance with all applicable Minnesota statutes and rules.

VI.

CONSEQUENCES FOR NONCOMPLIANCE OR ADDITIONAL VIOLATIONS

14. If Licensee fails to comply with or violates this Stipulation and Consent Order, the Committee may, in its discretion, seek additional discipline either by initiating a contested case proceeding pursuant to Minnesota Statutes chapter 14 or by bringing the matter directly to the Board pursuant to the following procedure:

a. The Committee shall schedule a hearing before the Board. At least 20 days before the hearing, the Committee must mail Licensee a notice of the violation(s) alleged by the Committee. In addition, the notice must designate the time and place of the hearing. Within ten days after the notice is mailed, Licensee shall submit a written response to the allegations. If Licensee does not submit a timely response to the Board, the allegations may be deemed admitted.

b. The Committee, in its discretion, may schedule a conference with Licensee prior to the hearing before the Board to discuss the allegations and to attempt to resolve the allegations through agreement.

c. Prior to the hearing before the Board, the Committee and Licensee may submit affidavits and written argument in support of their positions. At the hearing, the Committee and Licensee may present oral argument. Argument may not refer to matters outside the record. The evidentiary record must be limited to the affidavits submitted prior to the hearing and this Stipulation and Consent Order. The Committee will have the burden of proving by a preponderance of the evidence that a violation has occurred. If Licensee has failed to submit a timely response to the allegations, Licensee may not contest the allegations, but may present argument concerning the appropriateness of additional discipline. Pursuant to this process, Licensee waives a hearing before an administrative law judge, discovery, cross-examination of

adverse witnesses, and other procedures governing hearings pursuant to Minnesota Statutes chapter 14.

d. Licensee's correction of a violation before the conference, hearing, or meeting of the Board may be taken into account by the Board but does not limit the Board's authority to impose discipline for the violation. A decision by the Committee not to seek discipline when it first learns of a violation does not waive the Committee's right to later seek discipline for that violation, either alone or in combination with other violations, at any time while Licensee's license is in a suspended status.

e. Following the hearing, the Board will deliberate confidentially. If the allegations are not proved, the Board must dismiss the allegations. If a violation is proved, the Board may impose additional discipline, including conditions or limitations on Licensee's license, a period of suspension, conditions of reinstatement, or revocation of Licensee's license.

f. Nothing herein limits the Committee's or the Board's right to temporarily suspend Licensee's license as provided in Minnesota Statutes chapters 151 and 214, based on a violation of this Stipulation and Consent Order or based on conduct of Licensee not specifically referred to herein.

VII. ADDITIONAL INFORMATION

15. Licensee waives the contested case hearing and all other procedures before the Board to which Licensee may be entitled under the Minnesota and United States constitutions, statutes, or rules.

16. Licensee waives any claims against the Board, the Minnesota Attorney General, the State of Minnesota, and their agents, employees, and representatives related to the

investigation of the conduct herein, or the negotiation or execution of this Stipulation and Consent Order, which may otherwise be available to Licensee.

17. This Stipulation and Consent Order, the files, records, and proceedings associated with this matter shall constitute the entire record and may be reviewed by the Board in its consideration of this matter.

18. Either party may seek enforcement of this Stipulation and Consent Order in any appropriate civil court.

19. Licensee has read, understands, and agrees to this Stipulation and Consent Order and has voluntarily signed the Stipulation and Consent Order. Licensee is aware this Stipulation and Consent Order must be approved by the Board before it goes into effect. The Board may either approve the Stipulation and Consent Order as proposed, approve it subject to specified change, or reject it. If the changes are acceptable to Licensee, the Stipulation and Consent Order will take effect and the order as modified will be issued. If the changes are unacceptable to Licensee or the Board rejects the Stipulation and Consent Order, it will be of no effect except as specified in the following paragraph.

20. Licensee agrees that if the Board rejects this Stipulation and Consent Order or a lesser remedy than indicated in this settlement, and this case comes again before the Board, Licensee will assert no claim that the Board was prejudiced by its review and discussion of this Stipulation and Consent Order or of any records relating to it. If the Board rejects this Stipulation and Consent Order, the parties agree that this Stipulation and Consent Order will not be admissible in any proceedings.

21. This Stipulation and Consent Order does not limit the Board's authority to proceed against Licensee by initiating a contested case hearing or by other appropriate means on the basis

of any act, conduct, or admission of Licensee which constitutes grounds for disciplinary action, and which is not directly related to the specific facts and circumstances set forth in this document.

VIII.

DATA PRACTICES NOTICES

22. This Stipulation and Consent Order constitutes disciplinary action by the Board and is classified as public data pursuant to Minnesota Statutes section 13.41, subdivision 5. Data regarding this action will be provided to data banks as required by Federal law or consistent with Board policy. While this Stipulation and Consent Order is in effect, information obtained by the Board pursuant to this Order is considered active investigative data on a licensed health professional, and as such, is classified as confidential data pursuant to Minnesota Statutes section 13.41, subdivision 4.

23. This Stipulation contains the entire agreement between the parties, there being no other agreement of any kind, verbal or otherwise, which varies this Stipulation.

CONSENT:

POLARIS PHARMACY SERVICES OF MINNESOTA, LLC (LICENSEE)

Dated: 12-3-2021

MINNESOTA BOARD OF PHARMACY
COMMITTEE ON PROFESSIONAL STANDARDS

BOARD MEMBER

Dated: 12/8/21

ORDER

Upon consideration of the Stipulation, the Board **REPRIMANDS** Licensee, imposes a **CIVIL PENALTY**, and **CONDITIONS** Licensee's license and adopts all of the terms described above on this 8TH day of December, 2021.

Challenges Polaris Faced in Minnesota

Polaris entered the Minnesota market in November 2018. The company operates only one pharmacy in Minnesota, which is located at 5220 Park Glen Road, St. Louis Park. Polaris' early experience in Minnesota was not without its challenges, but the company has made a good faith effort to address its challenges and is constantly looking to improve.

When Polaris entered the Minnesota market, it was surprised to find a labor market (particularly for pharmacy technicians) that was much tighter than other markets in which Polaris operates and experienced more staff turnover in Minnesota than it is accustomed to in other markets. The Covid-19 pandemic obviously put an incredible amount of stress on every stakeholder in the pharmacy industry, and Polaris was no exception. The pandemic made it even more difficult for Polaris to recruit, hire, and retain talented staff.

Polaris continues to believe it did not engage in central services by having Minnesota-licensed technicians located in Florida perform remote order entry tasks in connection with prescription orders filled in Minnesota. In letters to the Board dated July 19, 2019, Polaris explained why it began using Minnesota-licensed technicians based in Florida to assist Polaris Minnesota with order entry tasks.

In sum, during its initial months of operation, Polaris faced an unanticipated and unacceptable backlog of prescription orders that needed to be filled in Minnesota. The backlog resulted largely from Polaris' inability to recruit and retain enough capable pharmacy technicians in Minnesota during the early months of operation. To address the backlog and ensure the timely delivery of prescriptions to Minnesota patients, Polaris initially had Minnesota-licensed technicians based in Florida perform order entry services on behalf of Polaris Minnesota. These technicians were experienced technicians who were licensed in Minnesota before they performed order entry work for Polaris Minnesota. Further, while performing remote order entry work from a Polaris Florida location, these technicians were connected virtually to Polaris Minnesota's physical workspace through Polaris' FrameworkLTC software platform, which is commonly used across the long-term care pharmacy industry. At all times, the work of these technicians was overseen by a licensed pharmacist at the Florida pharmacy (where the data was entered into FrameworkLTC), as well as a Minnesota-licensed pharmacist in the Minnesota pharmacy, who ultimately controlled and was responsible for the technicians' work and any prescriptions filled in connection with data they entered into the system. Additionally, until May 2019, Polaris had IND Consulting and its "Team X" do some remote order entry work for Polaris Minnesota. Aside from the order entry function, Polaris Minnesota's prescription processing and filling functions have always taken place entirely in the Minnesota pharmacy. Polaris has at times relied on similar remote order entry processes in other states without triggering central service pharmacy requirements.

Accordingly, when Polaris started using this process to help deal with the Minnesota backlog, it did not anticipate that it might be triggering central services pharmacy requirements. For this reason, Polaris initially did not submit or seek approval from the Board for a central prescription drug processing policy or procedure. In March 2019, after Board staff expressed a

view that Polaris' use of Minnesota-licensed technicians based in Florida to perform remote entry work constituted an unauthorized central service arrangement, Polaris took immediate steps to address the issue. Polaris initially flew Minnesota-licensed technicians from Florida to Minnesota, so they could be physically present in the Polaris Minnesota pharmacy while performing the same order entry functions they had been performing in Florida.

Finally, Polaris sought Board approval of several remote order entry variances, with the goal of being authorized to resume using Minnesota-licensed technicians based in Florida to perform remote order entry for Polaris Minnesota, and particularly to deal with emergencies or backlogs. When Board staff initially raised this issue in March 2019, Polaris did not believe it could immediately shift all order entry functions to its limited staff in Minnesota without compromising patient safety and welfare. At the time, Polaris was still working through the backlog, onboarding new care facilities, and working hard to locate, hire, train, and retain technicians and other staff in Minnesota in a challenging labor market. Under the circumstances, Polaris determined it was necessary to continue using Minnesota licensed, Florida-based technicians for a period of time in order to deal with the backlog and continue filling prescriptions in a timely manner for patients who needed them, while simultaneously building up its Minnesota workforce and making the changes necessary to meet the expectations of Board staff. As soon as Polaris was staffed and equipped to perform all order entry functions in Minnesota, it stopped utilizing technicians who were not physically located in Minnesota altogether. Accordingly, from June 2019 to the present, Polaris has only used Minnesota-licensed technicians physically located in the Polaris Minnesota pharmacy to perform order entry work on prescription orders filled in Minnesota. Polaris took concerns raised by Board staff over remote order entry issues seriously, and it believes it acted reasonably under the circumstances to address those concerns, while also maintaining high levels of patient care.

Polaris remained committed to working cooperatively with the Board to better understand what it must do in order to utilize remote order entry processes in the future. Polaris would always attempt to rely on technicians physically located in its Minnesota pharmacy to perform data entry and other prescription filling functions. The Board acknowledged granting variance requests to many pharmacy chains and health-systems that authorize the use of remote order entry processes. In March 2020, the Board also issued Covid-19 related guidance acknowledging that pharmacists and technicians could perform various prescription drug filling functions while working remotely—including data entry of prescriptions and orders; verifying prescriptions; certifying data entry and the finished prescriptions (i.e., the product check); conducting profile and prospective drug utilization reviews; and stage-checking for compounding—so long as affiliated pharmacies were using adequate computer software and hardware for the tasks being performed. While the Board's Covid-19 guidance evolved after Governor Walz's Peacetime Emergency declaration was rescinded, Polaris continues to believe remote order entry processes like those implemented during the first few months of Polaris' operations in Minnesota were safe, effective, and should have a place in the delivery of modern pharmacy services.

The Board approved the central services variance #265679-010 on July 13, 2022 between Polaris Pharmacy Services of Minnesota, LLC and both the Polaris Pharmacies located in Tampa and Ft. Lauderdale Florida for urgent or emergent needs.

BEFORE THE MINNESOTA

BOARD OF PHARMACY

In the Matter of
Polaris Pharmacy Services of Minnesota, LLC
License No. 265679

STIPULATION AND CONSENT ORDER

STIPULATION

Polaris Pharmacy Services of Minnesota, LLC ("Licensee") and the Minnesota Board of Pharmacy Committee on Professional Standards ("Committee") agree the above-referenced matter may be resolved without trial of any issue or fact as follows:

I.

JURISDICTION

1. The Minnesota Board of Pharmacy ("Board") is authorized pursuant to Minnesota Statutes chapter 151 to license and regulate pharmacies and to take disciplinary action as appropriate.

2. Licensee holds a pharmacy license from the Board and is subject to the jurisdiction of the Board with respect to the matters referred to in this Stipulation and Consent Order.

II.

CONFERENCE

3. On August 18, 2021, Licensee met with the Committee to discuss the allegations described in a Notice of Conference. Board members Kendra Metz and Stuart Williams comprised the Committee. The Board's Executive Director, Cody Wiberg; Deputy Director, Jennell Bilek; and staff attorney, Brian Park, were also present. Alex Mountain, Assistant Attorney General, represented the Committee. Brian A. Dillon, of Lathrop GPM LLP, represented licensee and was

accompanied by Licensee's Pharmacist-in-Charge, Neil Uitto; Polaris' Chief Operating Officer, Steven Baker; and Polaris' Executive Vice President of Operations, Todd Zisek.

III.

FACTS

4. On or about November 1, 2018, the Board licensed Licensee as a pharmacy in Minnesota.

5. Licensee is a closed door, long-term care ("LTC") pharmacy that prepares sterile and non-sterile compounded drug products for dispensing.

6. Licensee has two affiliated pharmacy locations in Florida, both licensed by the Board as follows:

a. On or about July 8, 2016, the Board issued Polaris Rx, located in Fort Lauderdale, Florida ("Pharmacy 1"), non-resident pharmacy license #265101.

b. On or about December 5, 2018, the Board issued Polaris Pharmacy Services of Tampa, located in Tampa, Florida ("Pharmacy 2"), non-resident pharmacy license #265721.

7. On or about March 19, 2019, two Board Surveyors visited Licensee for the purpose of completing a routine inspection, met with the pharmacist-in-charge, and identified the following:

a. Seven pharmacy technicians registered by the Board and employed by Pharmacy 1 and Pharmacy 2, were living in Florida but listed their current physical address as Licensee's address in Minnesota.

b. During the inspection, the Board Surveyors cited Licensee for engaging in central services with Pharmacy 1 and Pharmacy 2, by allowing pharmacy technicians working in Florida to remotely perform data entry of prescription drug information for Minnesota patients into

Licensee's Frameworks LTC prescription processing and dispensing software system ("FW-LTC"), followed by verification of the data entry by Licensee's pharmacist staff members working in Minnesota ("Central Service").

c. Prior to beginning Central Service, Licensee failed to submit a copy of its policy and procedure manual and failed to obtain Board approval to participate in a Central Service arrangement with Pharmacy 1 and Pharmacy 2.

d. Licensee disputes that it was operating a "central services arrangement" as it understands that term to be commonly used within the industry. Licensee maintains that its use of remote order entry processes was necessary under the circumstances, due to a backlog of prescription orders that had accumulated due in large part to Licensee's inability to recruit and retain sufficient staff in Minnesota during its early months of operating in the State. Nonetheless, for purposes of this stipulation, Licensee acknowledges and understands the March 2019 citation.

e. Licensee's nonsterile compounding records failed to include an assigned beyond use date ("BUD") for the final compounded drug product, or included a BUD exceeding those recommended within United States Pharmacopeia, General Chapter 795 for Pharmaceutical Compounding - Nonsterile Preparations ("USP 795"), without documentation of a reference for literature or a stability study applicable to the specific drug product allowing for extension of the BUD. Licensee avers that it responded to these findings by providing education to its staff to ensure compounded components included lot numbers, expiration dates, and BUDs, along with noting the supporting reference sources. Licensee states that it is not aware of any other issues regarding its compliance with BUD requirements since 2019.

8. On or about March 20, 2019, the Board received a complaint alleging that Licensee was utilizing pharmacy technicians from outside of Minnesota to enter prescription data. On or about April 9, 2019, a Board Surveyor reminded Licensee, after expanding its operations to 24-

hours, that pharmacy technicians working outside of its Minnesota location could not be used to help with covering the additional hours that the pharmacy is open, due to the lack of Board approved policies for Central Services with Pharmacy 1 and Pharmacy 2. As noted above, Licensee disputes that it was operating a "central services arrangement" as it understands that term to be commonly used within the industry. Licensee maintains that its use of remote order entry processes was necessary under the circumstances, due to a backlog of prescription orders that had accumulated due in large part to Licensee's inability to recruit and retain sufficient staff in Minnesota during its early months of operating in the State. Nonetheless, for purposes of this stipulation, Licensee acknowledges and understands the Board's concern regarding the use of out-of-state technicians to enter prescription data.

9. On June 11, 2019, two Board Surveyors visited Licensee for the purpose of an investigation, met with representatives of the Licensee, and identified the following:

a. The pharmacist-in-charge stated that, as far as she was aware, Pharmacy 1 and Pharmacy 2, both located in Florida, were the only two locations providing Central Services for Licensee.

b. Licensee utilized a company named IND Consulting ("IND") for emergency kit ("E-kit") billing and entry of patient information when pharmacy services are initiated in a new LTC facility. IND's website states its staff are able to provide services including, but not limited to, billing services, medical record entry, and data entry solutions, with guaranteed staffing in fully operational data centers that are open 24 hours a day and 365 days a year, located within or outside of the United States across the globe in Mexico, India, the Philippines, and Florida. During the conference with the Committee, Licensee admitted that IND consulting had been used to enter prescription data for prescription drug orders ultimately dispensed by its

Minnesota pharmacy. Licensee cannot definitively state where individuals affiliated with IND were licensed or physically located when entering such data.

c. At the end of the visit, the Board Surveyor's provided an Investigative Report requesting additional information and reminding Licensee again that it cannot engage in Central Services without Board approval.

10. On February 12, 2020, two Board Surveyors visited Licensee for the purposes of an investigation, met with representatives of Licensee, and identified the following:

a. After arriving at 4:36 a.m., one of the Board Surveyors observed two of Licensee's pharmacy technicians were allowed badge access to the pharmacy entrance prior to the arrival of RPh 3 at around 5:55 a.m. One technician was found to be working in the sterile compounding area and another was logged into Licensee's computer. A representative of Licensee later stated that three pharmacy technicians had been given keys and passcodes to access Licensee's pharmacy. During its conference with the Committee, Licensee admitted that this allegation is true, but stated that senior management took corrective action upon learning of the situation, including immediately revoking the access code of all non-pharmacists and physically rekeying all doors within the pharmacy. Licensees avers that periodic security assessments confirm that no unauthorized persons have had access to the pharmacy since February 2020.

b. Six pharmacy technicians, including the IV pharmacy technician, were present in the "filling area" with only one pharmacist, who was the second pharmacist to arrive. Another pharmacist was in an "order entry" area, a distinctly different area separated by a wall and door. The Board Surveyors were told that additional pharmacy technicians were scheduled that morning to perform non-technician "staging or stocking" duties. However, the Board Surveyors observed that the additional pharmacy technicians that were supposedly scheduled to perform non-technician duties, were filling orders in the "filling area" to be checked by the one pharmacist.

Licensee avers that is does not have sufficient information to admit or deny the Board surveyors' observations, but that company policy requires compliance with required technician-to-pharmacist ratios.

IV.

LAWS

11. Licensee acknowledges the conduct described in section III above constitutes a violation of Minn. Stat. § 151.071, subd. 2(7), and warrants the disciplinary action described below.

V.

DISCIPLINARY ACTION

The parties agree the Board may take the following disciplinary action and require compliance with the following terms:

12. The Board **REPRIMANDS** Licensee and imposes a **CIVIL PENALTY** in the amount of $50,000 for the conduct described in section III above. The civil penalty shall be paid by cashier's check or money order made payable to the Minnesota Board of Pharmacy, c/o Cody Wiberg, Executive Director, 2829 University Avenue S.E., Suite 530, Minneapolis, Minnesota 55414, within 60 days of the date of entry of this Order.

13. The Board places the following **CONDITION** on Licensee's License: every six months, for a period of three years, Licensee's CEO must certify to the Board's Executive Director that Licensee's licensed pharmacies that provide services to Minnesota residents are in full compliance with all applicable Minnesota statutes and rules.

VI.

CONSEQUENCES FOR NONCOMPLIANCE OR ADDITIONAL VIOLATIONS

14. If Licensee fails to comply with or violates this Stipulation and Consent Order, the Committee may, in its discretion, seek additional discipline either by initiating a contested case proceeding pursuant to Minnesota Statutes chapter 14 or by bringing the matter directly to the Board pursuant to the following procedure:

a. The Committee shall schedule a hearing before the Board. At least 20 days before the hearing, the Committee must mail Licensee a notice of the violation(s) alleged by the Committee. In addition, the notice must designate the time and place of the hearing. Within ten days after the notice is mailed, Licensee shall submit a written response to the allegations. If Licensee does not submit a timely response to the Board, the allegations may be deemed admitted.

b. The Committee, in its discretion, may schedule a conference with Licensee prior to the hearing before the Board to discuss the allegations and to attempt to resolve the allegations through agreement.

c. Prior to the hearing before the Board, the Committee and Licensee may submit affidavits and written argument in support of their positions. At the hearing, the Committee and Licensee may present oral argument. Argument may not refer to matters outside the record. The evidentiary record must be limited to the affidavits submitted prior to the hearing and this Stipulation and Consent Order. The Committee will have the burden of proving by a preponderance of the evidence that a violation has occurred. If Licensee has failed to submit a timely response to the allegations, Licensee may not contest the allegations, but may present argument concerning the appropriateness of additional discipline. Pursuant to this process, Licensee waives a hearing before an administrative law judge, discovery, cross-examination of

adverse witnesses, and other procedures governing hearings pursuant to Minnesota Statutes chapter 14.

d. Licensee's correction of a violation before the conference, hearing, or meeting of the Board may be taken into account by the Board but does not limit the Board's authority to impose discipline for the violation. A decision by the Committee not to seek discipline when it first learns of a violation does not waive the Committee's right to later seek discipline for that violation, either alone or in combination with other violations, at any time while Licensee's license is in a suspended status.

e. Following the hearing, the Board will deliberate confidentially. If the allegations are not proved, the Board must dismiss the allegations. If a violation is proved, the Board may impose additional discipline, including conditions or limitations on Licensee's license, a period of suspension, conditions of reinstatement, or revocation of Licensee's license.

f. Nothing herein limits the Committee's or the Board's right to temporarily suspend Licensee's license as provided in Minnesota Statutes chapters 151 and 214, based on a violation of this Stipulation and Consent Order or based on conduct of Licensee not specifically referred to herein.

VII. ADDITIONAL INFORMATION

15. Licensee waives the contested case hearing and all other procedures before the Board to which Licensee may be entitled under the Minnesota and United States constitutions, statutes, or rules.

16. Licensee waives any claims against the Board, the Minnesota Attorney General, the State of Minnesota, and their agents, employees, and representatives related to the

investigation of the conduct herein, or the negotiation or execution of this Stipulation and Consent Order, which may otherwise be available to Licensee.

17. This Stipulation and Consent Order, the files, records, and proceedings associated with this matter shall constitute the entire record and may be reviewed by the Board in its consideration of this matter.

18. Either party may seek enforcement of this Stipulation and Consent Order in any appropriate civil court.

19. Licensee has read, understands, and agrees to this Stipulation and Consent Order and has voluntarily signed the Stipulation and Consent Order. Licensee is aware this Stipulation and Consent Order must be approved by the Board before it goes into effect. The Board may either approve the Stipulation and Consent Order as proposed, approve it subject to specified change, or reject it. If the changes are acceptable to Licensee, the Stipulation and Consent Order will take effect and the order as modified will be issued. If the changes are unacceptable to Licensee or the Board rejects the Stipulation and Consent Order, it will be of no effect except as specified in the following paragraph.

20. Licensee agrees that if the Board rejects this Stipulation and Consent Order or a lesser remedy than indicated in this settlement, and this case comes again before the Board, Licensee will assert no claim that the Board was prejudiced by its review and discussion of this Stipulation and Consent Order or of any records relating to it. If the Board rejects this Stipulation and Consent Order, the parties agree that this Stipulation and Consent Order will not be admissible in any proceedings.

21. This Stipulation and Consent Order does not limit the Board's authority to proceed against Licensee by initiating a contested case hearing or by other appropriate means on the basis

of any act, conduct, or admission of Licensee which constitutes grounds for disciplinary action, and which is not directly related to the specific facts and circumstances set forth in this document.

VIII.

DATA PRACTICES NOTICES

22. This Stipulation and Consent Order constitutes disciplinary action by the Board and is classified as public data pursuant to Minnesota Statutes section 13.41, subdivision 5. Data regarding this action will be provided to data banks as required by Federal law or consistent with Board policy. While this Stipulation and Consent Order is in effect, information obtained by the Board pursuant to this Order is considered active investigative data on a licensed health professional, and as such, is classified as confidential data pursuant to Minnesota Statutes section 13.41, subdivision 4.

23. This Stipulation contains the entire agreement between the parties, there being no other agreement of any kind, verbal or otherwise, which varies this Stipulation.

CONSENT:

Statement of Responsibility

1. I am the Manager, Licensing and Com (title) for RLS (USA) Inc (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be responsible for any violations of pharmacy law that may occur in the Pharmacy owned by such owner(s), shareholder(s), member(s), or partner(s).
3. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be named in any action taken by the Nevada State Board of Pharmacy against the Pharmacy.
4. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) cannot require or permit the pharmacist(s) in said Pharmacy to violate any provision of local, state, or federal laws or regulations pertaining to the practice of pharmacy.
5. I further understand and acknowledge that Nevada law requires that each pharmacy located inside the State of Nevada employ only pharmacists, intern pharmacists, pharmaceutical technicians, and technicians in training that are licensed by the Nevada State Board of Pharmacy. (NR5 639.100).
6. I further understand and acknowledge that Nevada law requires that each pharmacy located outside the State of Nevada engaged in providing pharmacy services into Nevada employs at least one pharmacist licensed by the Nevada State Board of Pharmacy who will be responsible for any prescription dispensed to a patient located in Nevada and responsible for any acts or omissions of pharmacy personnel who are not registered with the Board. (NRS 639.2328).

Section 10: Affidavit for Pharmacies- MUST BE COMPLETED by pharmacies NOT CURRENTLY PERFORMING Sterile Compounding

Affidavit for Pharmacy License

I, David Miller hereby certify that the assertions in this Affidavit are true and correct to the best of my knowledge and belief, and state as follows:

1. I am the Manager, Licensing and Complian (title) for RLS (USA) Inc (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I certify that upon licensure, the Pharmacy will not perform sterile compounding or ship sterile compounds into Nevada.
3. I understand and acknowledge that the Pharmacy and any of its staff members may be subject to discipline by the Board if the Pharmacy performs sterile compounding or ships any sterile compounds into Nevada without first obtaining written authorization from the Board to do so.
4. I certify that if the Pharmacy makes the decision to perform sterile compounding or to ship any sterile compounds into Nevada, the Pharmacy, through an authorized representative, will first notify the Board via a written request, and obtain written approval to perform sterile compounding or to ship any sterile compounds into Nevada.
5. I understand that if the Pharmacy seeks approval to perform sterile compounding or to ship any sterile compounds into Nevada, an authorized representative of the Pharmacy may be required to appear before the Board to answer questions before such approval is granted.

Date

Board Use Only	Date Received: _____	Amount: _____

To the Nevada Board of Pharmacy:

There have been two actions by our home state Board and none by any other state since 2003. I have enclosed a description of these two actions and steps taken to remediate the conditions as provided by the Pharmacist in Charge (PIC) at the time. I have also enclosed copies of the Inspection Reports and the plan of action from the PIC for the 2016 finding.

Since 2016 any excursions have been addressed per regulation. The NJ Board of Pharmacy was notified timely, the affected areas closed, triple cleanings done, and the sterile areas reopened after successful environmental testing. There have been no Disciplinary Actions since 2016.

It is important to note that RLS does only low risk, sterile to sterile, compounding.

Inspection Report #8-1066.6 dated 12/19/2003

N.J.A.C. 13:39-12.2.e – Label missing information
N.J.A.C. 13:39.12.4.c – Missing Reference textbook
Actions taken – paid fine corrected deficiencies.

Inspection Report #8-1066-16-X dated 8/10/2016

N.J.A.C. 13:39-24.a.6 – Adequate efforts were not made to ensure the pharmacy's quality assurance program.
N.J.A.C. 13:39-11.24.a.10 – When test results indicated that the cleanroom did not meet the standards established, the pharmacy failed to immediately cease using the cleanroom that was out of compliance until such time that the cleanroom met the requisite standards
Actions taken – see the plan of action submitted by the Pharmacist in Charge and accepted by the NJBOP.

Please contact me if you need any further information at david.miller@RLS.bio.

Sincerely,

David Miller, R.Ph.

Re: Inspection Report #8-1066.6
Inspection Date: 12/19/03

Dear Mr. Marzocca:

This letter is to advise you that the New Jersey State Board of Pharmacy has had an opportunity to review information concerning the above inspection report.

Upon review of all available information, the Board has preliminarily found that you have violated:

N.J.A.C. 13:39-12.2(e)
Prescription label does not have the chemical form of the radioactive drug.
$25.00

N.J.A.C. 13:39-12.4(c)
Missing a current text in the category of "General Practice of Pharmacy".
$200.00

The Board has determined that it will offer you an opportunity to settle this matter and thereby avoid the initiation for disciplinary proceedings. Should you wish to avail yourself of this opportunity, you should sign the attached acknowledgment and agree to the following:

1. Pay a penalty in the amount of $225.00 and provide to the Board a Letter of Corrective Action. (To be paid immediately upon your signing of the attached Acknowledgment.)

Alternatively, you may waive your right to a hearing and submit a written statement or explanation to the Board. The Board will then consider your submission and render a final decision, which may include any of the terms set forth above. This disposition will be a public record.

If you do not wish to settle this matter, you may request a hearing. In that event, this letter will serve as notice of the charges against you and a hearing will be scheduled before the Board. At that hearing you may, either personally or with the assistance of an attorney, submit determination concerning the charges of unlawful activity. You should be aware that in making its final decision, the Board may, if unlawful activity has been proven, assess civil penalties in an amount greater than that herein offered in this letter. Additionally, the Board may, if the facts are found to so warrant, enter an order, requiring you to reimburse certain monies, directing you to cease and desist from engaging in unlawful acts and/or requiring you to pay costs incurred by the Board. Should you have any questions concerning this letter or the settlement offer herein, I suggest that you contact the Board at (973) 504-6450.

The enclosed certification should be completed and returned to the Board **within fifteen (15) days following your receipt of this letter.** In the event that the Board receives no response from you within this time, the Board's settlement offer will be withdrawn, and the allegations contained herein shall be deemed admitted, and the Board will proceed to finally review that matter and enter an appropriate order.

RE: Inspection Report #8-1066.6

Dear Ms. Boyer

Please find enclosed check for $200.00 for the deficiency of N.J.A.C. 13:39-12.4(c), missing a current edition of a text in the category of "General Practice of Pharmacy".

As a corrective action, Amersham Health has purchased a current edition of Remington's "The Science and Practice of Pharmacy" on 11 March 2004.

If you have any questions or require any additional information, please contact me at [redacted].

Sincerely,

John Marzocca R.Ph
Pharmacist in charge

Date: 8/10/2016
Time entered: 11:15 Am
Time departed: 3:00 Pm

New Jersey Office of the Attorney General
DIVISION OF CONSUMER AFFAIRS
BOARD OF PHARMACY

Report of Inspection

Name of Pharmacy: GE Healthcare (Nuclear) Pharmacy.
Address: 1 Naylon Place, Livingston, NJ 07039.
Name and registration number of pharmacist-in-charge:
John Marzocca, 28RI0474700
(If pharmacist-in-charge not present, give name and # of R.P. on duty)

The following deficiencies have been noted:

[ ] 13:39- 11.04 (a)10]- During the environmental monitoring test on 9/28 - 9/29/2015, ISO class Dispensing room and WBC room had 0.0 C results. Reports were released in the time period of 10/9/2015 - 10/12/2015 Pharmacy did an internal retest on 10/30/2015. Results indicated no growth after 7 day incubation period. Rooms were cleaned but there was no indication that equipments were ceased using during the time period.

- Pharmacy since then updated its P&P (see attached)

[ ] 13:39- 11.04 (a) 6]- Internal semi-annual Surface sampling indicated a below actia level cfu results. They need to be analyzed to the genius level to exclude any possibilities of highly pathogenic species. Internal action plan needs to be detailed along with cleaning process.

[ ] ~~13:39- 11.10(b)12.]~~ ~~pharmacy will obtain sterile admixture references per NJ Regulations~~ Ttk

This is to acknowledge that I have been present during this inspection and concur with the findings, as so noted, with the following exceptions; if any.

REPORT OF INSPECTION

TO:	ASSIGNMENT#	DATE:	PERIOD:
BOARD OF PHARMACY	8-1066-16-X	JAN 0 9 2017	8/10/2016

SUBJECT(S): **BY: Tony H. Qi, RP**

Medi-Physics, Inc dba GE Healthcare
1 Naylon Place
Livingston, New Jersey 07039
John Marzocca, RPIC

REFERENCE:

Board of Pharmacy inspection conducted per N.J.S.A. 45:1-18 and N.J.S.A. 45:14-48(a) 11&12 and a request from the Board to inspect all pharmacies that engage in compounding sterile preparations.

DETAILS:

A. On August 10, 2016, I, Bureau Investigator Tony Qi, visited the Subject Pharmacy for the purpose of engaging in a Board of Pharmacy inspection activity.

B. Present and at practice in the pharmacy was John Marzocca (R.P. #RI01474700). For identification purposes, all pharmacy personnel who were present and involved in the prescription filling/dispensing activities, completed respective "Pharmacy Personnel Identification" forms (**Exhibit #1**).

A. On the occasion of my visit, the following Board of Pharmacy inspection activities were conducted: an active drug stock inventory review(**Exhibit#2**), an EB-02 General Requirements form (**Exhibit#3**), a pharmacy library required texts review (**Exhibit #4**) and a prescription file records review. This inspection activity included the completion of a sterile compounding compliance survey per N. J.A.C Subchapter 13:39-11, Et Seq.

Reviewed By Robert Lee R. Ph.

B. Inspection of the pharmacy's "active" drug stock inventory revealed the following:

A total of Zero (0) containers of medication was discovered to be out-of-date, misbranded, or improperly stored.

C. The pharmacy compliance inspection activity identified the following deficiencies:

[13:39-11.24(a) 6]-Adequate efforts were not made to ensure the pharmacy's quality assurance program.

Specifically, on June 17, 2015, the Subject pharmacy's internal surface sampling detected a total of twenty-two (22) Colony Forming Units (CFU) from various locations, including support tables used in sterile compounding, the prep room and the pass through (see **Exhibit #5**).

On January 11, 2016, internal surface sampling detected one (1) CFU from the ISO 5 hood, one (1) CFU from Tech Hood 2, and one (1) CFU from Biologic Safety Cabinet (BSC) 6. Sixty-nine (69) CFUs were detected at various testing sites, including support tables, support carts and the dispensing room (see **Exhibit#6**).

on June 27, 2016, according to the Subject pharmacy's internal surface sampling (see **Exhibit #7**), four(4) CFUs were detected at BSC support table 1, four(4) CFUs were detected at BSC support table 6, one(1) CFU at cart 2, and three (3) CFUs at a general support table. Additionally, a total of twenty-one (21) CFUs were found in the gowning room.

On all of these occasions, the Subject pharmacy failed to analyze the species to the genus level in order to exclude the possibility of the existence of highly pathogenic species. By reviewing the cleaning log for the month of June, 2016, the Subject pharmacy failed to specify the details of cleaning in the event of CFU detection.

[13:39-11.24(a)10]-When test results indicated that the cleanroom did not meet the standards established, the pharmacy failed to immediately cease using the cleanroom that was out of compliance until such time that the cleanroom met the requisite standards.

Specifically, on September 28, 2015, during the environmental monitoring tests conducted by ENV Services, a laboratory equipment certification company, air sampling detected multiple CFUs in the dispensing room, the gowning room, the prep room, the White Blood Cell (WBC) anteroom, and the WBC prep room. The nature of CFUs detected in these areas was deemed non-highly pathogenic. The quantities of CFUs were below action level (see **Exhibit#8**).

Air Sample number 10 (see the Biologic Sampling Location map **Exhibit #9**) detected one (1) CFU in the center of the WBC Room and the species was identified as fungal in nature (see **Exhibit #10**). This finding was deemed as Out-Of-Compliance (O.O.C).

On the following day, September 29, 2015, ENV Services detected one (1) CFU in the Dispensing Room, classified as ISO Class 7. The species was identified as fungal in nature. This finding was again deemed as O.O.C (see **Exhibit #11**).

John Marzocca, PIC, acknowledged that, upon learning the test results on October 9, 2015, the Subject pharmacy failed to cease using the affected equipment. The cleaning log for the month of October, 2015, failed to indicate that the Subject pharmacy performed a triple cleaning in order to address these findings.

On October 19, 2016, during a follow-up visit by Inv. Qi to the Subject pharmacy, Mr. Marzocca stated that, during the most recent environmental monitoring test performed by ENV Services, the maximum CFU count for two ISO Classified areas was exceeded. Air sampling detected one (1) CFU of genus in fungi nature from one of the BSC units, ISO Class 5, as well as thirteen (13) CFUs from one of the support tables. The CFUs detected were a highly pathogenic species (see **Exhibit #12**).

Mr. Marzocca stated that the Subject pharmacy followed the N.J.A.C regulation this time and ceased using this affected equipment (see **Photograph Exhibit #13**).

Daily and weekly cleaning procedures were reviewed in detail. Upon review, it appeared that the Subject pharmacy updated the cleaning frequency, cleaning methods and cleaning materials since my August 2016 visit.

D. In connection with the sterile compounding inspection, I reviewed additional documents pertaining to temperature log, humidity log, training records and sterility testing reports.

USP 797 Employee Aseptic Techique Compounding/Dispensing Assessment was last completed on April 13, 2016. The training was in compliance.

In addition, the Subject pharmacy performs a WBC dual verification training. The verification training is to ensure the hospital and patient name match on the tracking form, prescription label, and leukocyte labeling tracking stickers and delivery case. This training is conducted as a discussion and a demonstration.

A sample copy of the labeling procedure demonstration is attached as **Exhibit #14**.

The Subject pharmacy compounds a variety of radiopharmaceuticals and does not engage in any high risk level of sterile compounding involving Active Pharmaceutical Ingredients (API).

The Subject pharmacy validates its aseptic processing procedure by applying regular sterility checks on the residual material from the compounding process. The Subject pharmacy uses the most aseptically challenging products in annual sterility testing.

Myoview, an intravenous injection kit preparation of a technetium Tc99m, is the largest batch produced sterile product on site. Sulfur Colloid is the component primarily used in preparing technetium Tc99m radio imaging at the Subject pharmacy. The Subject pharmacy tests one vial of Myoview and one vial of Sulfur Colloid annually, with at least 2ml of residual product, in two separate media for incubation and visual inspection.

Complete clarity of solution is negative for microbial contamination. Turbid solution is a conditional failure and an investigation follow-up would be conducted.

The process of this sterility method and results were reviewed and they were deemed to be in compliance.

E. Prior to departing from the Subject pharmacy, I conducted an exit briefing with Registered Pharmacist John Marzocca. In connection with the exit briefing, I completed forms EB-33 (**Exhibit#15**) and explained to the pharmacist each deficiency noted. The pharmacist was given the opportunity to make any comments, corrections, or explanations, to the deficiencies noted in the reports.

   After the pharmacist was satisfied and understood the deficiencies noted, the pharmacist signed off on the previously mentioned forms. I left the pharmacist with copies of each form that was listed above, and then departed from the Subject pharmacy.

CERTIFICATION:

I, the undersigned, of full age, employed by the State of New Jersey, Division of Consumer Affairs, Enforcement Bureau, certify that all of the information which is contained in this report and which is based upon my personal knowledge is true. I am aware that if any of the information reported by me which the context discloses is not based on my personal knowledge, I certify that I have reported in good faith and to the best of my recollection, an accurate account of the information reported to me.

Investigator

March 28, 2017

Anthony Rubinaccio R.Ph
Executive Director
New Jersey Board of Pharmacy
124 Halsey Street
Newark, NJ 07101

Dear Mr. Rubinaccio

In response to NJ Board of Pharmacy letter Dated march 9, 2017 concerning the observations identified during an inspection of our Livingston New Jersey Nuclear Pharmacy conducted August 10, 2016. The observations stated in your letter are listed below for ease of reference:

[N.J.A.C.13:39-1124(a)6]- Adequate efforts were not made to ensure the pharmacy's quality assurance program.

Although this regulation does not make any reference to internal sampling to be analyzed for species to the genus to exclude the possibility of the existence of highly pathogenic species, Medi-Physics, Inc. d/b/a/ GE Healthcare Livingston NJ, has added this to our environmental monitoring protocols. Contact plate samples incubated on site which show organism growth will be analyzed by an independent certified third party laboratory for ID'ing to genus level. Additionally, our cleanroom certification company (ENV) shall continue to take environmental samples for air and surface contamination biannually during re-certification procedures. All growth recovered from third party vendor sampling shall also be ID'd to genus level.

[N.J.A.C.13:39-24(a)10]-When test results indicated that the cleanroom did not meet the standards established, the pharmacy failed to immediately cease using the primary engineering controls or cleanroom that was out of compliance until such time that the cleanroom met the requisite standards.

The Livingston Pharmacy did not take action to immediately cease using secondary engineering controls on September 28, 2015, as a result of the environmental monitoring tests, due to the fact the we were unaware of this requirement per 13:39-24(a)10 until the **January 2016** New Jersey Board of Pharmacy newsletter article titled- Regulation Regarding Out-of-Compliance Cleanrooms and Primary Engineering. Our Standard Operating Procedures, at the time required us to immediately deep clean the area of concern, perform an investigation to determine action necessary to eliminate recurrence of the contamination, and retest prior to reuse. After further review of the information in that newsletter, the Livingston Pharmacy is in the process of updated

protocols to include 13:39-24(a)10. At this time, we are in compliance with this regulation as evidenced by our SOP's as well as Mr. Qi's follow up visit on October 19, 2016 stating that ENV services monitoring found a maximum CFU count exceeded in a BSC hood which was taken out of service until an EVN re-test was performed.

If you any questions or require any additional information, please contact me at (973) 533-9009.

Sincerely

John Marzocca R.Ph

Sterile Compounding Questionnaire

Rev (08/02/2022)

This application cannot be returned by fax or email.
We must have an original signature to process.

Approval of this completed questionnaire is required for an existing pharmacy, new pharmacy and/or out-sourcing facility applicant who wish to engage in preparing, compounding, dispensing, and furnishing sterile compounded products to Nevada patients or consumers.

Please provide a thorough response to the questions below and provide any necessary supporting documents.
-For a new pharmacy or out-sourcing facility applicant, submit this completed form with your application.
-For an existing pharmacy, send the completed form to the address indicated above.

Section 1: General Information

Pharmacy Name: RLS (USA) INC

NV Pharmacy or Outsourcing facility license # (if applicable): n/a

Physical Address: 1 Naylon Place

City: Livingston State: NJ Zip: 07039

Mailing Address (if different from physical address):

City: State: Zip:

Telephone: 973-533-9109 Toll Free # (NAC 639.708, NRS 639.23286): 800-242-8004

Fax: 973-533-1116 Contact Email: newjersey@rls.bio

Website: www.rls.bio

Nevada Business License # (if applicable) n/a

Supervising/Managing Pharmacist Name (NRS 639.220): Hussam Abbassi

Supervising/Managing Pharmacist NV Pharmacist Registration #: n/a

Name of Person with direct knowledge of compounding procedures: Hussam Abbassi

Email of Person with direct knowledge of compounding procedures: hussam.Abbassi@rls.bio

Telephone of Person with direct knowledge of compounding procedures: 973-533-9109

Section 2: Sterile Compounding Questions (Use a separate piece of paper if additional space is needed.)

1. What risk level sterile compounding will your facility be performing (check all that apply)? ☒ Low ☐ Medium ☐ High
If you marked "High", you must also complete section 4.

2. Will you be performing sterile hazardous drug compounding? ☐ Yes ☒ No
If you marked "Yes", you must also complete section 3.

3. List the sterile compounded products that you will be compounding for Nevada patients or consumers:
Radiopharmaceuticals only prepared or compounded in compliance with USP<825>.

4. Will you be utilizing beyond use dates in excess of USP-797? ☐ Yes ☒ No

5. If yes, describe the additional testing performed on your products to validate the extended BUD:
NA

6. What laboratory performs this additional testing?
Name: NA
Address: _____
City: _____ State: _____ Zip: _____
Telephone: _____

7. What is your procedure for visual inspection of compounded sterile products?
Visual inspection of Radiopharmaceuticals in compliance with radiation safety ALARA principals.

8. How often do you perform glove fingertip and medial fill testing?

Every 12 months

9. What is your policy if an employee fails a glove fingertip or media-fill test?

Immediate notification of the PIC, investigation for cause, corrective action(s) identified and taken as needed to prevent re-occurrence, retraining as required, retesting performed and passing results obtained prior to initiating or resuming product preparation or dose drawing duties.

10. Describe your initial and annual training program for all personnel performing sterile compounding:

All new hire personnel performing sterile compounding must be licensed or registered in compliance with local regulations. Initial training is assigned based on job title/duties performed through an electronic platform. Personnel are trained on all policies and procedures associated with their job duties prior to performing those duties. Annual retraining is tracked, completed, and maintained using the electronic platform.

11. Describe the cleaning procedure for your primary and secondary engineering controls, including the frequency of cleaning and the names of cleaning, disinfectant, sporicidal, and/or deactivation and decontamination agents used:

See attached SOPs 6.4.1, 6.4.1.1, and 6.4.1.2.

12. Who performs the sterile compounding process at your facility?

All products are prepared by or under the direct supervision of the licensed, authorized nuclear pharmacist on duty.

13. Who is responsible and accountable for the sterile compounding process at your facility?

The PIC is responsible and accountable for the sterile compounding process.

14. If products are shipped/mailed, what shipping conditions are used to ensure product safety/efficacy?

RLS (USA) Inc. is a Nuclear Pharmacy dispensing radiopharmaceuticals in compliance with USP<825>. All transportation of prepared radiopharmaceuticals are completed by trained staff or contracted courier services in climate controlled vehicles in DOT-7A, Type A certified packaging designed and tested to maintain the quality and integrity of the product. Where temperature monitoring is required, RLS (USA) Inc. utilizes appropriate ColdMark Indicators to ensure proper temperature is maintained during shipping.

Section 3: Sterile Hazardous Compounding Questions (Complete this section ONLY if you be performing Sterile Hazardous Compounding.)		
1. What type of primary engineering controls will you be using in your facility? NA		
2. Is your BSC or CACI vented 100% to the outside?	☐ Yes	☐ No
3. Do you have a negative pressure buffer room at your facility?	☐ Yes	☐ No
4. Will you be compounding with antineoplastic HDs or HD API?	☐ Yes	☐ No
5. If yes, are the drugs stored in an externally ventilated, negative pressure room?	☐ Yes	☐ No
6. Will you be utilizing a closed system transfer device?	☐ Yes	☐ No
7. If yes, list the name of the device:		
8. What information is provided to the patient or consumer on the proper handling and disposal of hazardous drugs products/containers?		
9. Describe your initial process for training new employees prior to compounding sterile hazardous drugs?		

Section 4: Sterile High Risk Compounding Questions (Complete this section ONLY if you will be performing High Risk Compounding.)

1. List the specific high risk sterile products that your facility compounds:

NA

2. What sterilization methods are utilized at your facility?

3. Does your facility utilize biological indicators? ☐ Yes ☐ No

4. If yes, describe how they are utilized:

I certify under penalty of perjury that the information contained in this form is accurate, true and complete in all material respects. I understand that making any false representation in this form is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire form and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. In the event the form is approved I agree to comply with all applicable federal and state statutes and regulations governing this license or registration and understand that any violation may result in discipline.

Hussam Abbassi
RLS USA INC
1 Naylon Pl
Livingston, NJ 07039

Dear Hussam Abbassi:

Thank you for participating in the National Association of Boards of Pharmacy® (NABP®) Verified Pharmacy Program® (VPP®). Attached please find a copy of your pharmacy's VPP inspection report for your review.

Summary next steps in the VPP process are:

1. The facility reviews the attached inspection report. Though it is considered final, and no changes can be made, your facility may provide a written response to any of NABP's observations listed in this report on the response template described below. A response is optional. For your convenience, we have listed some salient observations, questions, and/or sections the facility may want to review in the Focused Information section of the inspection report. These are areas where additional information or clarification may be needed and can be provided by your facility in a written response if you so choose. For example, the facility may have made an improvement, changed a process, updated a form, completed staff training, found a missing document since the inspection, or have other pertinent information to share. Please see the following requirements if you wish to provide a written response to NABP:

    a. Responses must be submitted **within 30 calendar days from the date of this letter.** Responses received after that time will not be reviewed and no extensions will be granted.
    b. Responses should be submitted on the **Response Template** available on the NABP website for download in the VPP FAQs section. For your convenience, a copy of the template has also been included with this cover letter.
    c. If including attachments, each page must be clearly identified, whether it is by attachment number or by name at the top of the page. Please include a description(s) of pertinent Policies and Procedures if it is necessary to reference them.
    d. Upon receipt of the response documentation, NABP will make this information available to the boards of pharmacy.
    e. All documents should be submitted at one time rather than individually and must be provided **electronically** using **one** of the following methods:
        i. Email the documents to inspections@nabp.pharmacy; or
        ii. Mail a flash drive of the documents to NABP at the following address:
            National Association of Boards of Pharmacy
            ATTN: Verified Pharmacy Program
            1600 Feehanville Drive

Mount Prospect, IL 60056
Please include the following with your documentation: Facility Name, City, State, and e-Profile ID. **No hard copies of documentation will be accepted.**

2. As a courtesy, NABP notifies the state boards of pharmacy that an inspection has been completed. If requested by a state board of pharmacy, the VPP Inspection report is provided to them via a secure interface with the following supplemental information:
    a. License verifications
    b. Public disciplinary board orders/actions and other public information from the boards of pharmacy

    State boards of pharmacy and/or applicable state regulators may request your written response to the inspection report (if any) and/or other documents directly from you.

Other Items to Note:

- Many state boards of pharmacy may use your responses to the findings of this report when making licensure determinations.
- Although one of the primary purposes of VPP is to support uniform requirements and inspections among the states, the nonresident state may have additional requirements over and above what is required by your resident state.
- Although changes to this report cannot be made, any response your facility provides will serve as a supplement to your facility's original report.
- Any issues relating to your facility's licensure must be addressed directly with the applicable board of pharmacy.
- NABP does not provide a "seal of approval" related to this inspection, the inspection is not an accreditation and does not make the facility a member of NABP.

Do not hesitate to contact us should you have any additional questions via email at inspections@nabp.pharmacy or via phone at 847/391-4539.

Sincerely,

NATIONAL ASSOCIATION OF
BOARDS OF PHARMACY

Lemrey "Al" Carter, PharmD, MS, RPh
Executive Director/Secretary

Section 8: Arrests, Detentions, Litigations, Arbitrations.	Yes	No
1. Have you ever been convicted of, or entered, a plea of guilty, guilty by mentally ill or nolo contendere to any criminal offense or civil violation, federal or state, for any reason whatsoever, regardless of the disposition of the event? (Except minor traffic citations.)		✔
2. If you answered "yes" to question 1, was the offense or violation related to drugs, including prescription drugs and/or controlled substances, the manufacturer or distribution of drugs or the practice of pharmacy?		✔
3. Have you ever had a civil or criminal record expunged or sealed by a court order?		✔
4. Have you, as an individual, member or a company, partner, or owner, director or officer of a corporation, ever been a party to a lawsuit as either a plaintiff or defendant (including any administrative proceedings before a licensing board) or of an arbitration as either a claimant or respondent? (Other than divorces.)		✔
5. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) been a party to a lawsuit (including any administrative proceedings before a licensing board), arbitration or bankruptcy?		✔
6. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer or director) ever appeared before any licensing agency or similar authority in or outside the State of Nevada for any reason whatsoever (including any disciplinary or board citation)?		✔
7. Have you ever been denied a personal license, permit, certificate or registration for a privileged, occupational or professional activity?		✔
8. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner member, officer or director) ever been refused a business license.		✔
9. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) ever surrendered a license, permit, certificate or registration relating to the pharmaceutical industry voluntarily or otherwise (other than upon voluntary closure of a manufacturer).		✔
10. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		✔

I, David Miller, R.Ph. **, certify that as the designated representative for**

RLS (USA) Inc, 1 Naylon Place, Livngston,NJ 07039 ,

that I (initial that you have read and meet the following requirements) (NAC 639.5005, NAC 639.5935):

1. x I am at least 21 years of age;
3. x I have been employed for at least 6,000 hours in a pharmacy or with a wholesaler in a capacity related to the dispensing and distribution of, and recordkeeping related to, prescription drugs.
4. x I will be actively involved in and aware of the actual daily operations of the pharmacy or wholesaler;
5. x I will be employed full-time in a managerial level position with the pharmacy or wholesaler;
6. x I will be physically present at site of the pharmacy or at the facility of the wholesaler during regular business hours, except when the absence of the representative is authorized, including sick leaves, vacation leaves and other authorized absences; and
7. x I will serve in this representative capacity for only one pharmacy or wholesaler at a time.

RLS

Historical Disciplinary Actions

There have been two actions by our home state board and none by any other state since 2003. I have enclosed a description of these two actions and steps taken to remediate the conditions as provided by the Pharmacist-in-charge at the time. I have also enclosed copies of the inspection report and plan of action for the 2016 findings.

It is important to note that RLS does only low risk, sterile to sterile nuclear compounding.

Inspection Report #8-1066.6 dated 12/19/2003

N.J.A.C. 13:39-12.2e – Label missing information

N.J.A.C. 13:39-12.4c – Missing Reference text

Actions taken – corrected deficiencies and paid fine.

Inspection Report #8-1066.16-X dated 8/10/2016

N.J.A.C. 13:39-24.a.6 – Adequate efforts were not made to ensure the pharmacy's quality assurance program.

N.J.A.C. 13:39-11.24.a.10 – When test results indicated that the cleanroom did not meet the standards established, the pharmacy failed to immediately cease using the cleanroom that was out of compliance until such time that the cleanroom met the requisite standards.

Actions taken – see the plan submitted by the Pharmacist-in-charge and accepted by the NJBOP.

Please contact me if you need any further information at newjersey@rls.bio.

Sincerely,

David Miller, R.Ph.

Livingston, NJ 07039

Re: Inspection Report #8-1066.6
Inspection Date: 12/19/03

Dear Mr. Marzocca:

This letter is to advise you that the New Jersey State Board of Pharmacy has had an opportunity to review information concerning the above inspection report.

Upon review of all available information, the Board has preliminarily found that you have violated:

N.J.A.C. 13:39-12.2(e)
Prescription label does not have the chemical form of the radioactive drug.
$25.00

N.J.A.C. 13:39-12.4(c)
Missing a current text in the category of "General Practice of Pharmacy".
$200.00

The Board has determined that it will offer you an opportunity to settle this matter and thereby avoid the initiation for disciplinary proceedings. Should you wish to avail yourself of this opportunity, you should sign the attached acknowledgment and agree to the following:

1. Pay a penalty in the amount of $225.00 and provide to the Board a Letter of Corrective Action. (To be paid immediately upon your signing of the attached acknowledgment.)

Alternatively, you may waive your right to a hearing and submit a written statement or explanation to the Board. The Board will then consider your submission and render a final decision, which may include any of the terms set forth above. This disposition will be a public record.

If you do not wish to settle this matter, you may request a hearing. In that event, this letter will serve as notice of the charges against you and a hearing will be scheduled before the Board. At that hearing you may, either personally or with the assistance of an attorney, submit determination concerning the charges of unlawful activity. You should be aware that in making its final decision, the Board may, if unlawful activity has been proven, assess civil penalties in an amount greater than that herein offered in this letter. Additionally, the Board may, if the facts are found to so warrant, enter an order, requiring you to reimburse certain monies, directing you to cease and desist from engaging in unlawful acts and/or requiring you to pay costs incurred by the Board. Should you have any questions concerning this letter or the settlement offer herein, I suggest that you contact the Board at (973) 504-6450.

The enclosed certification should be completed and returned to the Board within fifteen (15) days following your receipt of this letter. In the event that the Board receives no response from you within this time, the Board's settlement offer will be withdrawn, and the allegations contained here in shall be deemed admitted, and the Board will proceed to finally review that matter and enter an appropriate order.

RE: Inspection Report #8-1066.6

Dear Ms. Boyer

Please find enclosed check for $200.00 for the deficiency of N.J.A.C. 13:39-12.4(c), missing a current edition of a text in the category of "General Practice of Pharmacy".

As a corrective action, Amersham Health has purchased a current edition of Remington's "The Science and Practice of Pharmacy" on 11 March 2004.

If you have any questions or require any additional information, please contact me at [redacted].

Sincerely,

John Marzocca R.Ph
Pharmacist in charge

Date: 8/10/2016
Time entered: 11:15 Am
Time departed: 3:00 Pm

New Jersey Office of the Attorney General
DIVISION OF CONSUMER AFFAIRS
BOARD OF PHARMACY

Report of Inspection

Name of Pharmacy: GE Healthcare (Nuclear) Pharmacy.
Address: 1 Naylon Place, Livingston, NJ 07039.
Name and registration number of pharmacist-in-charge:
John Marzocca, 28RI0477703
(If pharmacist-in-charge not present, give name and # of R.P. on duty)

The following deficiencies have been noted:

I [13:39-11.04(a)10]- During the environmental monitoring test on 9/28-9/29/2015, ISO class Dispensing room and WBC room had 0.0 C results. Reports were released in the time period of 10/9/2015-10/14/2015 Pharmacy did an internal retest on 10/30/2015. Results indicated no growth after 7 day incubation period. Rooms were cleaned but there was no indication that equipments were ceased using during the time period.

- Pharmacy since then updated its P&P (see attached)

I [13:39-11.04(a)6]- Internal semi-annual Surface sampling indicated a below actin level cfu results. They need to be analyzed to the genius level to exclude any possibilities of highly pathogenic species. Internal action plan needs to be detailed also with cleaning process.

I ~~[13:39-11.04(a)12]- Pharmacy will obtain sterile admixture references per NJ Regulations~~ (Title)

This is to acknowledge that I have been present during this inspection and concur with the findings, as so noted, with the following exceptions; if any.

REPORT OF INSPECTION

TO:	ASSIGNMENT#	DATE:	PERIOD:
BOARD OF PHARMACY	8-1066-16-X	JAN 0 0 2017	8/10/2016

SUBJECT(S): **BY: Tony H. Qi, RP**

Medi-Physics, Inc dba GE Healthcare
1 Naylon Place
Livingston, New Jersey 07039
John Marzocca, RPIC

REFERENCE:

Board of Pharmacy inspection conducted per N.J.S.A. 45:1-18 and N.J.S.A. 45:14-48(a) 11&12 and a request from the Board to inspect all pharmacies that engage in compounding sterile preparations.

DETAILS:

A. On August 10, 2016, I, Bureau Investigator Tony Qi, visited the Subject Pharmacy for the purpose of engaging in a Board of Pharmacy inspection activity.

B. Present and at practice in the pharmacy was John Marzocca (R.P. #RI01474700). For identification purposes, all pharmacy personnel who were present and involved in the prescription filling/dispensing activities, completed respective "Pharmacy Personnel Identification" forms (**Exhibit #1**).

A. On the occasion of my visit, the following Board of Pharmacy inspection activities were conducted: an active drug stock inventory review(**Exhibit#2**), an EB-02 General Requirements form (**Exhibit#3**), a pharmacy library required texts review (**Exhibit #4**) and a prescription file records review. This inspection activity included the completion of a sterile compounding compliance survey per N. J.A.C Subchapter 13:39-11, Et Seq.

Reviewed By Robert Lee R. Ph.

B. Inspection of the pharmacy's "active" drug stock inventory revealed the following:

A total of Zero (0) containers of medication was discovered to be out-of-date, misbranded, or improperly stored.

C. The pharmacy compliance inspection activity identified the following deficiencies:

[13:39-11.24(a) 6]-Adequate efforts were not made to ensure the pharmacy's quality assurance program.

Specifically, on June 17, 2015, the Subject pharmacy's internal surface sampling detected a total of twenty-two (22) Colony Forming Units (CFU) from various locations, including support tables used in sterile compounding, the prep room and the pass through (see **Exbibit #5**).

On January 11, 2016, internal surface sampling detected one (1) CFU from the ISO 5 hood, one (1) CFU from Tech Hood 2, and one (1) CFU from Biologic Safety Cabinet (BSC) 6. Sixty-nine (69) CFUs were detected at various testing sites, including support tables, support carts and the dispensing room (see **Exbibit#6**).

on June 27, 2016, according to the Subject pharmacy's internal surface sampling (see **Exhibit #7**), four(4) CFUs were detected at BSC support table 1, four(4) CFUs were detected at BSC support table 6, one(1) CFU at cart 2, and three (3) CFUs at a general support table. Additionally, a total of twenty-one (21) CFUs were found in the gowning room.

On all of these occasions, the Subject pharmacy failed to analyze the species to the genus level in order to exclude the possibility of the existence of highly pathogenic species. By reviewing the cleaning log for the month of June, 2016, the Subject pharmacy failed to specify the details of cleaning in the event of CFU detection.

[13:39-11.24(a)10]-When test results indicated that the cleanroom did not meet the standards established, the pharmacy failed to immediately cease using the cleanroom that was out of compliance until such time that the cleanroom met the requisite standards.

Specifically, on September 28, 2015, during the environmental monitoring tests conducted by ENV Services, a laboratory equipment certification company, air sampling detected multiple CFUs in the dispensing room, the gowning room, the prep room, the White Blood Cell (WBC) anteroom, and the WBC prep room. The nature of CFUs detected in these areas was deemed non-highly pathogenic. The quantities of CFUs were below action level (see **Exhibit#8**).

Air Sample number 10 (see the Biologic Sampling Location map **Exhibit #9**) detected one (1) CFU in the center of the WBC Room and the species was identified as fungal in nature (see **Exhibit #10**). This finding was deemed as Out-Of-Compliance (O.O.C).

On the following day, September 29, 2015, ENV Services detected one (1) CFU in the Dispensing Room, classified as ISO Class 7. The species was identified as fungal in nature. This finding was again deemed as O.O.C (see **Exhibit #11**).

John Marzocca, PIC, acknowledged that, upon learning the test results on October 9, 2015, the Subject pharmacy failed to cease using the affected equipment. The cleaning log for the month of October, 2015, failed to indicate that the Subject pharmacy performed a triple cleaning in order to address these findings.

On October 19, 2016, during a follow-up visit by Inv. Qi to the Subject pharmacy, Mr. Marzocca stated that, during the most recent environmental monitoring test performed by ENV Services, the maximum CFU count for two ISO Classified areas was exceeded. Air sampling detected one (1) CFU of genus in fungi nature from one of the BSC units, ISO Class 5, as well as thirteen (13) CFUs from one of the support tables. The CFUs detected were a highly pathogenic species (see **Exhibit #12**).

Mr. Marzocca stated that the Subject pharmacy followed the N.J.A.C regulation this time and ceased using this affected equipment (see **Photograph Exhibit #13**).

Daily and weekly cleaning procedures were reviewed in detail. Upon review, it appeared that the Subject pharmacy updated the cleaning frequency, cleaning methods and cleaning materials since my August 2016 visit.

D. In connection with the sterile compounding inspection, I reviewed additional documents pertaining to temperature log, humidity log, training records and sterility testing reports.

USP 797 Employee Aseptic Techique Compounding/Dispensing Assessment was last completed on April 13, 2016. The training was in compliance.

In addition, the Subject pharmacy performs a WBC dual verification training. The verification training is to ensure the hospital and patient name match on the tracking form, prescription label, and leukocyte labeling tracking stickers and delivery case. This training is conducted as a discussion and a demonstration.

A sample copy of the labeling procedure demonstration is attached as **Exhibit #14**.

The Subject pharmacy compounds a variety of radiopharmaceuticals and does not engage in any high risk level of sterile compounding involving Active Pharmaceutical Ingredients (API).

The Subject pharmacy validates its aseptic processing procedure by applying regular sterility checks on the residual material from the compounding process. The Subject pharmacy uses the most aseptically challenging products in annual sterility testing.

Myoview, an intravenous injection kit preparation of a technetium Tc99m, is the largest batch produced sterile product on site. Sulfur Colloid is the component primarily used in preparing technetium Tc99m radio imaging at the Subject pharmacy. The Subject pharmacy tests one vial of Myoview and one vial of Sulfur Colloid annually, with at least 2ml of residual product, in two separate media for incubation and visual inspection.

Complete clarity of solution is negative for microbial contamination. Turbid solution is a conditional failure and an investigation follow-up would be conducted.

The process of this sterility method and results were reviewed and they were deemed to be in compliance.

E. Prior to departing from the Subject pharmacy, I conducted an exit briefing with Registered Pharmacist John Marzocca. In connection with the exit briefing, I completed forms EB-33 (**Exhibit#15**) and explained to the pharmacist each deficiency noted. The pharmacist was given the opportunity to make any comments, corrections, or explanations, to the deficiencies noted in the reports.

   After the pharmacist was satisfied and understood the deficiencies noted, the pharmacist signed off on the previously mentioned forms. I left the pharmacist with copies of each form that was listed above, and then departed from the Subject pharmacy.

CERTIFICATION:

I, the undersigned, of full age, employed by the State of New Jersey, Division of Consumer Affairs, Enforcement Bureau, certify that all of the information which is contained in this report and which is based upon my personal knowledge is true. I am aware that if any of the information reported by me which the context discloses is not based on my personal knowledge, I certify that I have reported in good faith and to the best of my recollection, an accurate account of the information reported to me.

Investigator

Anthony Rubinaccio R.Ph
Executive Director
New Jersey Board of Pharmacy
124 Halsey Street
Newark, NJ 07101

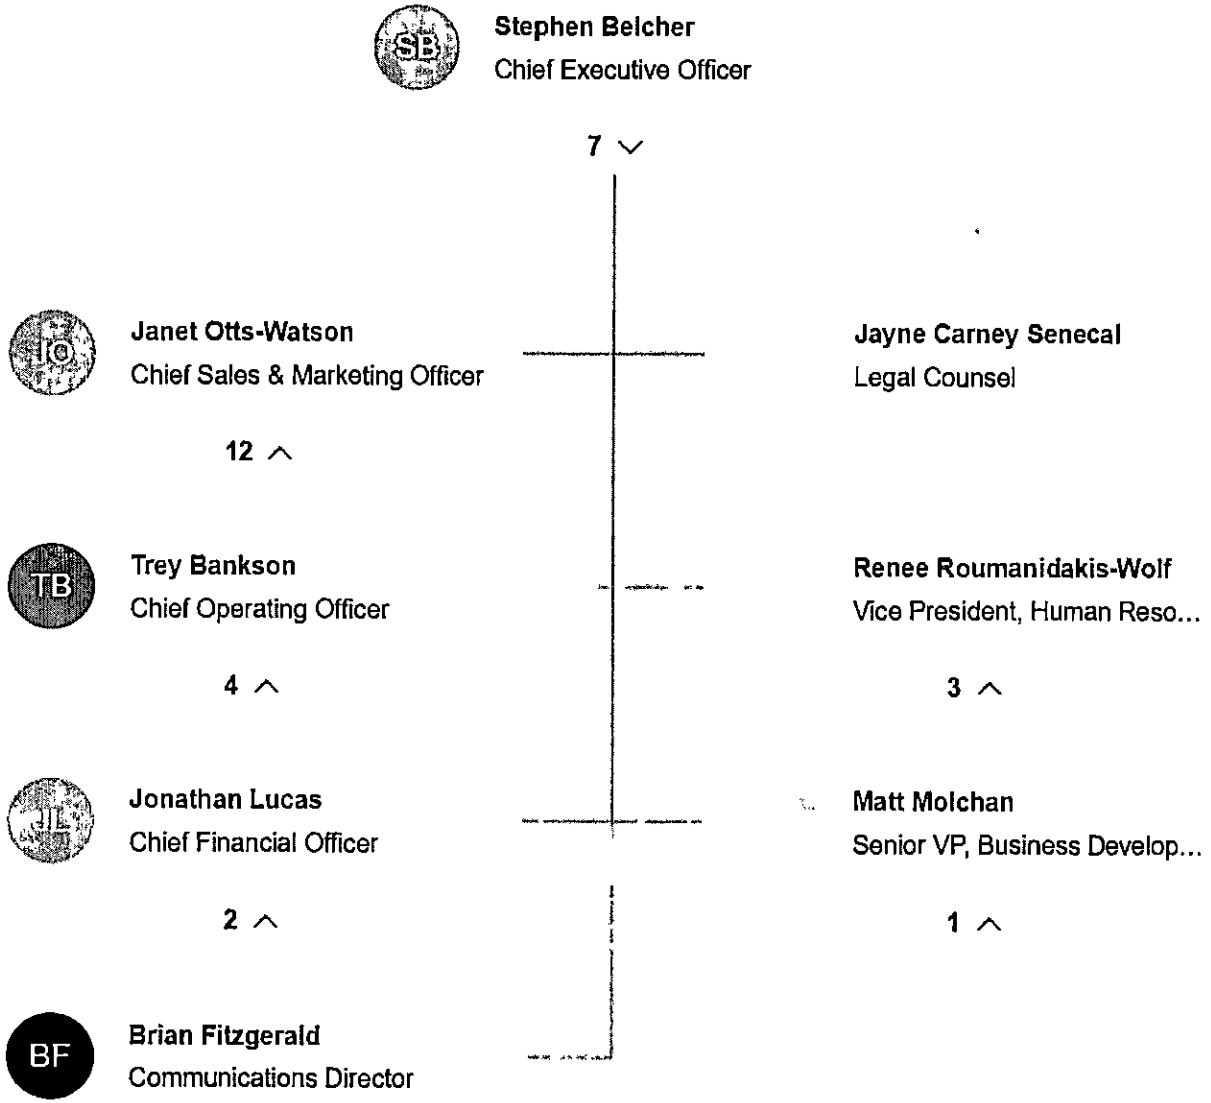
Dear Mr. Rubinaccio

In response to NJ Board of Pharmacy letter Dated march 9, 2017 concerning the observations identified during an inspection of our Livingston New Jersey Nuclear Pharmacy conducted August 10, 2016. The observations stated in your letter are listed below for ease of reference:

[N.J.A.C.13:39-1124(a)6]- Adequate efforts were not made to ensure the pharmacy's quality assurance program.

Although this regulation does not make any reference to internal sampling to be analyzed for species to the genus to exclude the possibility of the existence of highly pathogenic species, Medi-Physics, Inc. d/b/a/ GE Healthcare Livingston NJ, has added this to our environmental monitoring protocols. Contact plate samples incubated on site which show organism growth will be analyzed by an independent certified third party laboratory for ID'ing to genus level. Additionally, our cleanroom certification company (ENV) shall continue to take environmental samples for air and surface contamination biannually during re-certification procedures. All growth recovered from third party vendor sampling shall also be ID'd to genus level.

[N.J.A.C.13:39-24(a)10]-When test results indicated that the cleanroom did not meet the standards established, the pharmacy failed to immediately cease using the primary engineering controls or cleanroom that was out of compliance until such time that the cleanroom met the requisite standards.



The Livingston Pharmacy did not take action to immediately cease using secondary engineering controls on September 28, 2015, as a result of the environmental monitoring tests, due to the fact the we were unaware of this requirement per 13:39-24(a)10 until the **January 2016** New Jersey Board of Pharmacy newsletter article titled- Regulation Regarding Out-of-Compliance Cleanrooms and Primary Engineering. Our Standard Operating Procedures, at the time required us to immediately deep clean the area of concern, perform an investigation to determine action necessary to eliminate recurrence of the contamination, and retest prior to reuse. After further review of the information in that newsletter, the Livingston Pharmacy is in the process of updated

protocols to include 13:39-24(a)10. At this time, we are in compliance with this regulation as evidenced by our SOP's as well as Mr. Qi's follow up visit on October 19, 2016 stating that ENV services monitoring found a maximum CFU count exceeded in a BSC hood which was taken out of service until an EVN re-test was performed.

If you any questions or require any additional information, please contact me at (973) 533-9009.

Sincerely

John Marzocca R.Ph

Verified Pharmacy Program® Inspection Form

Nuclear Pharmacy Inspection - General

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes
	General Pharmacy		
1.00	Is the Designated Person present for the inspection?	Yes	
2.00	Is the PIC (or nuclear pharmacy manager/director) present for the inspection? *If no, list the nuclear pharmacist on duty.*	Yes	
3.00	Are photographs allowed during the inspection (no Protected Health Information (PHI))?	Yes	
	General Operations and Licensure		
4.00	Are pharmacy licenses, permits and registrations (state, controlled substance, DEA, etc.) posted?	Yes	
5.00	Is the RSO the same as is listed on the radioactive materials (RAM) license?	Yes	
6.00	Is the PIC an Authorized Nuclear Pharmacist (ANP) on the RAM license or other retrievable documentation as confirmed by the NRC or agreement state?	Yes	
7.00	Is the most recent board of pharmacy inspection report available for review? *Record the date of the last inspection and how frequently the pharmacy is routinely inspected by the board.*	Yes	The last board of pharmacy inspection occurred on June 30, 2022, and the pharmacy is routinely inspected every few years.
7.01	Were any deficiencies noted? *Indicate the deficiencies and note whether they were corrected.*	No	No deficiencies were noted.
8.00	Is the most recent NRC (and/or state radiation control agency) inspection report available for review? *If yes, note the state and the date of the inspection and frequency of inspections by other states.*	Yes	The pharmacy was inspected by New Jersey state radiation control agency on January 9, 2024. The pharmacy has never been inspected by another state.
8.01	Were any deficiencies noted? *Indicate the deficiencies and note whether they were corrected.*	No

Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes
9.00	Has this pharmacy been inspected by any other state for which it holds a license? *If yes, note the state and the date of the inspection and frequency of inspections by other states.*	No	
10.00	Is the pharmacy operating under an exemption or restriction granted by the state in which the pharmacy is located or by any other state in which the pharmacy is licensed? *If yes, note the exemption or restriction.*	No	
11.00	Is the pharmacy operating under a waiver or variance granted by the state in which the pharmacy is located or by any other state in which the pharmacy is licensed? *If yes, note the waiver or variance.*	No	
12.00	Has the pharmacy been inspected or visited by the DEA? *If yes, indicate the inspection/visit date and note any deficiencies. Also note how frequently the pharmacy is inspected/visited by the DEA.*	No	
13.00	Has the pharmacy been inspected by the FDA? *If yes, indicate the inspection date and note any deficiencies, significant correspondence, or if a "483" was issued and date, and response and date. Also note how frequently the pharmacy is inspected by the FDA.*	No	
14.00	Has the pharmacy been inspected by the Environmental Protection Agency (EPA), Department of Transportation (DOT) or any other outside agency? *If yes, indicate the inspection date and note any deficiencies related to pharmacy practice.*	No	
15.00	Does the pharmacy hold any accreditations or certifications? *If yes, indicate which and collect most recent date of survey.*	Yes	The pharmacy holds a JCAHO Home Care Accreditation and was last visited for a survey in 2019.
16.00	Has the pharmacy held any accreditations or certifications in the past that they no longer hold?	No	
17.00	Were any deficiencies detected on the last internal audit? *List date of last audit and note any deficiencies found and action plan to correct.*	No	The last internal audit occurred in October 2023 and no deficiencies were found.

Nuclear Pharmacy Inspection - General

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes
	Policy and Management		
18.00	Are policies and procedures for the program maintained in the pharmacy in an immediately retrievable form? *Indicate if hard copy, electronic, or both.*	Yes	Electronic
19.00	Are the P&Ps reviewed and updated regularly? *Indicate the review frequency and who performs the reviews.*	Yes	The corporate regulatory department provides the updates and the review is performed annually.
20.00	Are systems in place for the ongoing monitoring of state and federal laws/regulations for changes? *Give details of the system and resources, or indicate if it is a corporate process and who is responsible overall as well as at the site.*	Yes	The monitoring is handled by the corporate office and implementation of changes is the responsibility of the PIC.
21.00	Is there a statement in the P&P, or are other means used to ensure that the most stringent laws/regulations are followed? *Describe system details.*	No	
22.00	Does the pharmacy maintain all required records, including but not limited to prescription files, on site? *Record how long records are kept. If not on site, where?*	Yes	Five years
23.00	Does the pharmacy have access to appropriate law references including state and federal regulations (including state regulations for all states in which the facility is licensed and NRC)? *Indicate if they are hard copies or are accessed online (demonstrate access) or both.*	Yes	Online access
24.00	Does the pharmacy have access to other references as required by state law? (eg appropriate dosage and toxicology references). *Indicate if they are hard copies or are accessed online or both.*	Yes	Both
25.00	Does the pharmacy have access to appropriate practice specific references? Nuclear, geriatric, pediatric, etc. List and indicate if hard copy or online or both.	Yes	Fundamentals of Nuclear Pharmacy is accessible both hard copy and online.

Verified Pharmacy Program® Inspection Form

Nuclear Pharmacy Inspection - General

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes
26.00	Are Safety Data Sheets (SDS) [formerly known as Material Safety Data Sheets (MSDS)] up to date and available to personnel for drugs and chemicals used in the pharmacy (including those for compounding, if applicable)? *Verify that personnel can access them and are familiar with the format.*	Yes	
27.00	Does the pharmacy have a hazardous waste handling and collection system? *Indicate how often waste is collected and the vendor(s) used.*	Yes	Blood is disposed of as medical waste by Stericycle.
	Product Ordering, Receipt and Inventory		
28.00	Is the pharmacy restricted to buying prescription drugs from certain WDs or manufacturers?	Yes	
28.01	If restricted, does the PIC approve the vendors? *If not, who does approve (corporate)?*	No	The corporate office approves of vendors.
29.00	Are all orders received when the pharmacy is open or placed in a secure area if the pharmacy is closed?	Yes	
30.00	Does the pharmacy purchase any compounded radiopharmaceuticals from other entities for dispensing to patients? *If so, describe which compounded radiopharmaceuticals and from where they are purchase (collect name and license of other entity).*	No	
31.00	Does the pharmacy make any sterile or nonsterile compounded radiopharmaceuticals using bulk powder or liquid (APIs)? *Indicate bulk products and vendors used.*	No	
32.00	Does the pharmacy use active ingredients that are not from an FDA facility? *If so, indicate sources.*	No	
33.00	Does the computer system track on-hand quantities of products? *Who can adjust the on-hand quantities, and are adjustments tracked?*	Yes	Only pharmacists can make an adjustment to on-hand quantities. Adjustments are tracked based on log-in of the person who makes the change.

Nuclear Pharmacy Inspection - General

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes
34.00	Are orders generated and sent by the computer for prescription products, including controlled substances? *Who can alter the orders before they are sent?*	Yes	The pharmacies standing orders are generated by the computers. All the pharmacists, one pharmacy technician and one courier have been trained to alter the orders before they are sent.
35.00	Does the pharmacy maintain required inventories (such as change in PIC, theft/loss, etc)? *Indicate which.*	Yes	The pharmacy is required to perform an end-of-month inventory.
36.00	Are incidents of diversion or resignation/termination of personnel for cause reported? *Indicate agencies/law enforcement to whom reports are made.*	Yes	Incidents would be reported to the board of pharmacy.
37.00	Does the pharmacy have a complete physical inventory of products performed at least once yearly? *If cycle counting, indicate the process.*	Yes	The pharmacy is required to perform an end-of-month inventory for the corporate office.
38.00	Does the pharmacy have a system in place to track prescription drug products in order to detect diversion or theft? *Describe process (for example, inventory or shrink report tools used, perpetual inventory in computer, etc).*	Yes	Perpetual inventory in the computer
39.00	Are all products inspected upon receipt to detect any packaging issues, damage, etc.? *Describe what happens if products are damaged.*	Yes	The pharmacy calls the manufacturer if an item arrives damaged.
40.00	How are outdated, damaged, or recalled products segregated? *Indicate how often the pharmacy checks for out-of-date products.*	Yes	The pharmacy checks for out-of-dates every month.
41.00	Are non-RAM expired or damaged products destroyed on site? *View documentation. If "no", note the name of the reverse distributor.*	No	Stericycle

Verified Pharmacy Program® Inspection Form

Nuclear Pharmacy Inspection - General

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes
	Prescription/Order Processing		
42.00	Are any portions of the prescription processing performed at a different location? *If so, explain. Indicate whether there is a central fill/central processing agreement in place.*	No	
43.00	Does the pharmacy obtain a copy or verify of the RAM license (of the facility to which the radiopharmaceutical will be delivered) issued by the State Radiation Control Agency or the NRC?	Yes	
44.00	Is there a procedure to obtain a RAM license for the facility when a license cannot be obtained or verified?	Yes	If the license is expiring, the pharmacy contacts the facility and asks for either the new license or a timely renewal letter. If the location does not have either, then the pharmacy calls the state and documents the phone call, including if state authorities give permission to deliver to the facility.
45.00	Does the pharmacy have electronic prescription capability? *Indicate whether it is for non-controlled substances, controlled substances, or both.*	Yes	The pharmacy does not handle CS.
46.00	Is the pharmacy computer system provided routine maintenance and is the information backed up? *Indicate the frequency of backup and if the backup data is stored off site .*	Yes	The company has a central server that backs up data in real time.
47.00	Is there a continuity plan should the system become inoperable? *Describe how data will be retrieved.*	Yes	The pharmacy has a template that allows it to create manual records and when the system is live, the orders are re-entered.

Nuclear Pharmacy Inspection - General

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes
	Patient Profiles and Communication		
48.00	Does the patient information gathered include patient contact information, age or date of birth, and gender, as required by the State Board of Pharmacy?	Yes	
49.00	For therapy doses, does the pharmacy receive appropriate information to assess correct dosage, such as geriatric or pediatric weight-based doses, as required by the State Board of Pharmacy and/or Radioactive Materials Regulatory Agency?	N/A	The pharmacy does not dispense therapy doses.
50.00	Does the pharmacist perform an evaluation of the dose, safety, and intended use of the preparation to be compounded?	Yes	
51.00	Does the pharmacy take back prescription drugs from customers (eg clinic, prescriber, etc.)? If so, describe.	Yes	The pharmacy allows 10% of unused doses to be returned, e.g if a patient doesn't show up. And, it takes back "used" doses to store for decay.
52.00	Are providers instructed on the signs of product instability or contamination (as appropriate) and to report any changes in the physical characteristics of the product to the pharmacy?	Yes

Nuclear Pharmacy Inspection - General

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes
	Patient Confidentiality		
53.00	Is there a HIPAA policy in place for employees, vendors, and contractors?	Yes	
54.00	Do employees deemed nonessential to patient care have access to confidential patient information, such as delivery personnel, etc.?	No	
55.00	Is access to the pharmacy system limited to appropriate personnel? *Password protected, access limited by job type, access revoked as appropriate such as upon termination, access to patient information in the computer is tracked.*	Yes	
56.00	Are confidential documents shredded? *Indicate if In-house or by a service and list service in notes if applicable.*	Yes	Shred-It is used to destroy confidential documents.
57.00	Does the pharmacy destroy PHI including labeled prescription vials?	Yes	
58.00	Does the crisis plan include security of paper and electronic patient information?	No

Nuclear Pharmacy Inspection - General

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes
	Prescription Packing and Transporting		
59.00	Does the pharmacy utilize employee drivers to deliver prescriptions to patients and/or facilities?	Yes	
60.00	Does the pharmacy utilize other services/carriers to deliver prescriptions to patients and/or facilities? *Indicate carriers used.*	No	
61.00	Is there is a tracking system in place to verify delivery of prescription products? *Indicate if signatures obtained or how tracked.*	No	The pharmacy uses a DOT bill of lading with each package that discloses the isotopes and amount of activity in the package. One copy of the documents stays at the pharmacy and the other copy is with the package. The pharmacy does not have a signature process. The PIC advised that the new software will have a tracking system.
62.00	Are deliveries of RAM directly to a secure location at a health care facility?	Yes	
63.00	Is only authorized packaging used?	Yes	
64.00	Is the packaging tamper-evident?	Yes

Nuclear Pharmacy Inspection - General

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes
	Personnel Qualifications		
65.00	Is there a process for periodic verification of validity of personnel licenses (registrations)? *Describe the process.*	Yes	On an annual basis, the PIC performs a primary source verification and prints a copy of the verification for his files.
66.00	Are all personnel wearing name tags that clearly identify if they are a pharmacist or a technician? *What about other positions?*	Yes	
67.00	If the pharmacy uses relief personnel from outside agencies to perform sterile compounding, the training and certifications are verified. *View documentation.*	N/A	
68.00	Does the pharmacy have a technician policy that specifies what a technician is allowed and not allowed to do?	Yes	
69.00	Does the pharmacy maintain the proper technician-to-pharmacist ratio? *Indicate ratio used and the maximum number of staff who work at the same time.*	Yes	The pharmacy is allowed a 3:1 ratio and the maximum number of staff who work at the same time is 8 people.
70.00	Do employees undergo background checks upon hire? *Indicate if performed periodically for existing employees.*	Yes	The corporate office completes regular background checks for the courier staff.
71.00	Do employees undergo drug testing upon hire? *Indicate if performed periodically for existing employees and if it is random, for cause, or both.*	Yes	The pharmacy may perform for cause drug testing.
72.00	Is there a performance review process and is it documented? *If yes, how often?*	Yes	There is a documented annual performance review.
73.00	Is a procedure for corrective or disciplinary action in place and documented?	Yes

Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes
	Facility and Security		
74.00	Is entry to prescription product storage and processing areas limited to task-critical employees?	Yes	
75.00	Is entry into the handling areas limited to task-critical employees (limited to only the pharmacist(s) and other trained and authorized pharmacy personnel)?	Yes	
76.00	Are drugs secured to prevent unauthorized removal or access?	Yes	
77.00	Does the pharmacy have a working security/alarm system in place? *If yes, describe.*	Yes	The security system includes motion detectors, cameras, and third-party remote monitoring of the alarm.
78.00	Does the pharmacy have cameras? *If yes, record how long images are retained.*	Yes	The images are retained for at least 30 days.
79.00	Does anyone have access to the pharmacy after hours in the absence of the pharmacist? *Explain.*	No	
80.00	Do pharmacy staff remain in the pharmacy if the pharmacist is absent on a meal break?	N/A	A pharmacist stays in the licensed pharmacy space during meal breaks.
80.01	If so, is there a policy regarding what activities may or may not be allowed during the pharmacist's absence?	N/A

Verified Pharmacy Program® Inspection Form

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Nonsterile Radiopharmaceuticals			1.1
1.00	Does the pharmacy compound nonsterile radiopharmaceuticals? *If so, list which of the following do they compound (eg Oral Capsules, oral solutions, other (if other, list those products in the notes)).*	No		1.1
2.00	Does the pharmacy obtain conventionally manufactured nonsterile drug products for dispensing? *If so, list those products in the notes.*	No		1.1
3.00	Does the pharmacy obtain compounded nonsterile preparations from 503B-registered outsourcing facilities for dispensing? *If so, list those products/outsourcers in the notes.*	No	The pharmacy transfers prescriptions for nonsterile preparations, specifically iodine capsules, from a "sister" RLS location in Trevose, PA. This pharmacy sends the RAM license for the customer to the Pennsylvania location and it dispenses the dose. This pharmacy sends a courier to deliver the dose to the customer.	1.1
	Sterile Radiopharmaceuticals			1.2
4.00	Does the pharmacy compound sterile radiopharmaceuticals? *If so, list which of the following do they compound in the notes. (eg, intravenous, intrathecal, intraperitoneal, subcutaneous, intradermal, inhalations, ophthalmics, intra-organ instillations)*	Yes	Intravenous and aerosolized for lung imaging.	1.2
5.00	Does the pharmacy obtain conventionally manufactured sterile drug products for dispensing? *If so, list those products in the notes.*	No		1.2
6.00	Does the pharmacy obtain compounded sterile preparations from 503B-registered outsourcing facilities for dispensing? *If so, list those products/outsourcers in the notes.*	No		1.2
7.00	Does the pharmacy compound sterile preparations involving one or more nonsterile components?	No		1.2
8.00	If the pharmacy compounds sterile preparations requiring a sterilization procedure, is testing (eg filtration with bubble point testing) performed prior to dispensing?	N/A		1.2
9.00	If the pharmacy compounds injectable sterile preparations involving one or more components that are not certified to be pyrogen-free, is pyrogen testing performed prior to dispensing?	N/A		1.2

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Immediate Use of Sterile Radiopharmaceuticals			3
10.00	Does the pharmacy prepare and dispense sterile radiopharmaceuticals in a patient care setting as immediate use?	No		3
11.00	Does the pharmacy prepare immediate use sterile radiopharmaceuticals in an ambient environment without primary or secondary engineering controls?	N/A		3
12.00	Does handling for immediate use sterile radiopharmaceuticals in an ambient environment lacking primary and secondary engineering controls when intended for a single patient meet the following requirements? as applicable:	N/A		3
12.01	Are preparations (including minor deviations) and/or dispensing limited to use for a single patient?	N/A		3
12.02	Are preparation (including preparations with minor deviations) components sterile, conventionally manufactured drug products (eg, NDA, ANDA)?	N/A		3
12.03	Are dispensing of drug products produced under an approved IND or RDRC protocol?	N/A		3
12.04	Are manipulations for any unit doses (eg, decreasing the dosage, needle changes) or dispensing for one patient (eg, withdrawing a dose) ?	N/A		3
12.05	Are preparations labeled for administration within 1 hour of the first container puncture or exposure of any critical site involved (eg, syringe tip, needle hub or needle) to ambient air, whichever is first?	N/A		3
12.06	Are all components involved (eg, Tc-99m sodium pertechnetate syringe or vial, final prepared radiopharmaceutical kit vial, diluent vial) discarded within 1 hour of being punctured or after use for a single patient administration, whichever is first?	N/A		3

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
12.07	Does the pharmacy indicate that dose pooling (combining doses from two or more syringes to meet one patient's need) is performed as immediate use? Is any residual activity that remains is immediately discarded and not utilized for any other patient?	N/A		3
12.08	Does pharmacy staff follow proper hand hygiene and garbing?	N/A		3
12.09	Does the pharmacy follow 10.4 Preparation of Radiolabeled Red Blood Cells for Immediate Use for red blood cell labeling?	N/A		10.4
12.10	Does the pharmacy follow 12.2 Labeling for labeling?	N/A		12.2
12.11	Is area for sterile preparation and/or dispensing functionally separate from nonsterile compounding area (eg, radiolabeling food) during the time of use?	N/A		
12.12	Does the pharmacy require a segregated radiopharmaceutical processing area (SRPA), classified area, or PEC?	N/A		
12.13	Are the number of steps or punctures limited?	N/A		
12.14	Does the pharmacy require personnel to complete the aseptic qualifications as detailed in 4.1 Aseptic Qualifications (eg, aseptic technique training with documented assessment, media fill challenge, gloved fingertip testing)?	N/A		4.1
12.15	Is adding non-radioactive, sterile and commercially manufactured pharmaceutical(s) only applicable if performing immediate use. *While adding a non-radioactive, sterile and commercially manufactured pharmaceutical (eg, lidocaine) to a unit dose is otherwise considered compounding, it is allowed for immediate use purposes as long as all of the above are adhered to.*	N/A		
12.16	Is dose splitting (splitting a unit dose for administration to more than one patient) performed as immediate use?	N/A		
12.17	If performed, is dose splitting done in an ISO class 5 PEC in either an SRPA or in an ISO class 8 or better buffer area? *Note where this is performed.*	N/A

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Personnel Qualifications, Training, and Hygiene			4
13.00	Are personnel trained to work with radiopharmaceuticals per policies and standard operating procedures (SOPs) authorized by an ANP or AU (eg physician)?	Yes		4
14.00	Do personnel follow these policies or SOPs of the ANP or AU (eg physician) and work under their supervision?	Yes		4
14.01	Are personnel trained in blood-borne pathogens (as appropriate)?	Yes		4
15.00	Are individuals entering a handling area properly garbed and maintain proper personal hygiene to minimize the risk of contamination to the environment and/or radiopharmaceuticals?	Yes		4
15.01	Are individuals who have a condition that may pose a higher potential of contaminating the radiopharmaceutical and the environment with microorganisms (eg, rashes, sunburn, recent tattoos, oozing sores, conjunctivitis, or active respiratory infection) reported to their supervisor?	Yes		4
15.02	Is the designated person responsible for evaluating whether these individuals should be excluded from working in sterile processing areas before their conditions are resolved?	No	The PIC stated there is no formal process for the designated person to evaluate these individuals.	4
16.00	Have all personnel of reproductive capability who handle, or compound radiopharmaceuticals/radioactive materials confirmed in writing they understand the risks of handling radiopharmaceuticals/radioactive materials?	Yes		4
17.00	Is there documentation of training for other employees (including drivers, warehouse, receiving, administrative, clerks, etc.) who may have contact with radiopharmaceuticals/radioactive materials on handling the spills associated with these?	Yes		4
18.00	Can personnel demonstrate knowledge and can verbalize the principles of the safe use of RAM – time (working quickly/efficiently), distance (not handling RAM directly, using tongs), and shielding (using lead containers and shields in work areas)?	Yes		4
19.00	Can personnel demonstrate a knowledge of emergency procedures and are able to point out the locations of the eyewash station, emergency spill kit, and can verbalize how to handle contamination including reporting?	Yes		4

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Aseptic Qualifications		***Note to Inspector:*** *Check two (2) employee personnel files for documentation (1 RPh and 1 Tech), as appropriate*	4.1
20.00	Do personnel prove competency under the observation of a designated person, as applicable to their jobs, prior to performing radiopharmaceutical aseptic tasks (that are beyond immediate use). *Note– these can be completed at a different site if all SOPs are identical for the applicable job function.*	Yes	The inspector reviewed records for all nine employees who are trained in aseptic techniques.	4.1
21.00	Do the minimum qualifications include the following?	Yes		4.1
21.01	Aseptic technique with a documented assessment (written or electronic)	Yes		4.1
21.02	Garbing and hand hygiene, as defined by policies and SOPs	Yes		4.1
21.03	PEC cleaning and disinfecting	Yes		4.1
21.04	Gloved fingertip and thumb sampling	Yes		4.1
21.05	Media-fill testing (not required for non-compounding personnel)	Yes		4.1
	Gloved Fingertip and Thumb Sampling			4.1
22.00	Is gloved fingertip and thumb sampling required for all personnel who enter and perform tasks in an ISO Class 5 PEC (eg, aseptic manipulations, cleaning the PEC)?	Yes		4.1
23.00	Is gloved fingertip and thumb sampling performed initially on both hands, immediately following hand hygiene and garbing?	Yes		4.1
23.01	Is successful completion of initial gloved fingertip and thumb sampling defined as zero colony- forming units (cfu)?	Yes		4.1

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
24.00	Is subsequent gloved fingertip and thumb sampling after media-fill testing defined as ≤3 cfu (total for both hands)?	Yes		4.1
25.00	Is the gloved fingertip and thumb sampling performed with touch plates or other devices (eg, plates, paddles, or slides) that contain a general microbial growth agar [eg, trypticase soy agar (TSA) soybean–casein digest media] supplemented with neutralizing additives (eg, lecithin and polysorbate 80) which support both bacterial and fungal growth?	Yes		4.1
26.00	Per P&P review, gloves are not disinfected immediately before touching the sampling device.	Yes		4.1
27.00	Is a gloved fingertip and thumb sample from both hands collected by rolling finger pads and thumb pad over the agar surface, using a separate sampling device for each hand?	Yes		4.1
28.00	Are the plates incubated in an incubator at 30°–35° C for no less than 48 h, and then at 20°–25° C for no less than 5 additional days?	Yes		4.1
	Media-Fill Testing			4.1
29.00	Is media-fill testing done for all personnel who prepare, compound, dispense, and repackage sterile radiopharmaceuticals?	Yes		4.1
30.00	Is testing reflective of the actual manipulations to be carried out by the individual and simulate the most challenging and stressful conditions to be encountered in the worker's duties?	Yes		4.1
31.00	Are media-fill tests documented as defined by the facility's policies and SOPs?	Yes		4.1
32.00	*Recommendation: Are media-fill tests be performed at the end of a work session in the PEC.*	Yes		4.1

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
33.00	Are media-fill tests performed with a commercial source of soybean–casein digest medium?	Yes		4.1
34.00	Do those performing sterile-to-sterile processing activities start with sterile media?	Yes		4.1
35.00	Do those performing nonsterile-to-sterile compounding use a nonsterile soybean–casein digest powder to make a solution?	N/A		4.1
35.01	Is dissolved nonsterile commercially available soybean–casein digest medium in nonbacteriostatic water to make a 3% nonsterile solution?	N/A		4.1
35.02	Is the final media manipulated in a manner that simulates nonsterile-to-sterile compounding activities?	N/A		4.1
35.03	Is the final media prepared with at least 1 container as the positive control to demonstrate growth promotion, which is indicated by visible turbidity upon incubation?	N/A		4.1
36.00	Does the certificate of analysis (CoA) include documentation of growth promotion testing for each lot of media used?	Yes		4.1
37.00	Once the media-fill simulation is completed and the final containers are filled with the test medium, are the media filled containers incubated for 7 days at 20°–25° C followed by 7 days at 30°–35° C to detect a broad spectrum of microorganisms? Note: Failure is indicated by visible turbidity or other visual manifestations of growth in the medium in 1 or more container–closure unit(s) on or before 14 days.	Yes		4.1
38.00	In the event of failure, are results of the evaluation and corrective actions documented and the documentation maintained to provide a record and long-term assessment of personnel competency?	Yes		4.1
39.00	Do media and components used include the following?	Yes		4.1
39.01	manufacturer	Yes		4.1
39.02	expiration date	Yes		4.1

40.06	evaluation time	Yes		4.1
	Reevaluation, Retraining, and Requalification			4.2
41.00	Do personnel who fail visual observation of hand hygiene, garbing, and aseptic technique, gloved fingertip and thumb sampling, or media-fill testing successfully pass reevaluations in the deficient area(s) before they can resume processing of sterile radiopharmaceuticals?	Yes		4.2
42.00	Are all failures, retraining, and re-evaluations documented?	Yes		4.2
43.00	Do personnel successfully complete requalification in the core competencies via demonstrated through observation, written testing, and hands-on demonstration of skills?	Yes		4.2

Verified Pharmacy Program® Inspection Form

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Timing of Reevaluation and Requalification			4.2
44.00	**Visual observation**: Are personnel visually observed while performing hand hygiene, garbing SOPs, and aseptic technique procedures both initially, and then at least once every 12 months?	No	Based on the records reviewed, the pharmacy missed visual observation of some personnel in 2022 and 2023. All of the personnel have been visually observed in 2024.	4.2
45.00	**Gloved fingertip and thumb sampling:** Do personnel perform fingertip and thumb sampling 3 times initially, and then every 12 months (in conjunction with media-fill testing).	Yes		4.2
46.00	**Media-fill testing:** After initial qualification, is a media-fill test of all personnel engaged in sterile radiopharmaceutical processing performed at least every 12 months (in conjunction with gloved fingertip and thumb sampling)?	Yes		4.2
47.00	**Cleaning and disinfecting:** Does the pharmacy retrain and requalify personnel in the cleaning and disinfecting of sterile processing areas every 12 months or in conjunction with any change(s) in cleaning and disinfecting SOPs, whichever is sooner?	Yes		4.2
48.00	**After a pause in sterile radiopharmaceutical processing:** Are personnel that have not performed radiopharmaceutical processing in more than 6 months requalified in all core competencies before resuming duties?	Yes		4.2
49.00	**Sterile compounding using a nonsterile drug substance or components:** Are personnel who perform sterile compounding using a nonsterile drug substance or components requalified in all core competencies every 6 months?	N/A		4.2
	Ancillary Personnel			4.3
50.00	Are personnel who are authorized to be within the sterile processing area and do not handle sterile preparations required to complete all training and testing other than training on media-fill testing ?	N/A		4.3
51.00	Do other personnel or visitors (eg, auditors, regulators, student observers) comply with garbing and gloving SOPs without the need to prove competency?	Yes		4.3

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Hand Hygiene and Garbing for Immediate Use Preparations			4.4
52.00	**Hand hygiene:** Do personnel wash hands and arms to the wrists with soap and water or use a suitable alcohol-based hand rub with a time based on institution policies to reduce bioburden on the hands?	N/A		4.4
53.00	**Garbing:** Immediately after hand hygiene, do personnel don a clean coat/gown that has not been exposed to a patient or patient care area, and either don sterile gloves or don nonsterile disposable gloves and then disinfect the gloves with sterile 70% IPA?	N/A		4.4
54.00	Is a different lab coat worn to care for a patient than the coat/gown used for radiopharmaceutical preparation?	N/A		4.4
	Hand Hygiene and Garbing for Buffer Areas and Segregated Radiopharmaceutical Processing Area			4.5
55.00	Before entering the SRPA or buffer area, do personnel remove all the following (as applicable)? *(Radiation dosimetry devices are allowed, as required by the RAM license).*	Yes		4.5
55.01	Outer garments (eg, bandanas, coats, hats, jackets, sweaters, vests)	Yes		4.5
55.02	All cosmetics	Yes		4.5
55.03	All hand, wrist, and other exposed jewelry including piercings that could interfere with the effectiveness of the garbing	Yes		4.5
55.04	Nail products (eg, artificial nails, polish, extenders). {Natural nails kept neat and trimmed.}	Yes		4.5
55.05	Ear buds	Yes		4.5

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
55.06	Headphones	Yes		4.5
56.00	Are electronic devices that are not necessary for compounding or other required tasks banned from the SRPA?	N/A	The pharmacy does not have a SRPA.	4.5
57.00	Do personnel don shoe covers, head/hair/facial hair cover(s) and face masks? Note – these items are donned in an order that eliminates the greatest risk of contamination, as defined in facility SOPs.	Yes		4.5
58.00	Does the process before entering the buffer area or SRPA include the following?	Yes		4.5
58.01	Remove visible debris from underneath fingernails under warm running water using a disposable nail cleaner	Yes		4.5
58.02	Wash hands and arms up the elbows with soap and water for at least 30 seconds and then dry using low-lint towels	Yes		4.5
58.03	Electronic hand dryers are not permitted	Yes		4.5
58.04	Hand antisepsis cleansing is performed using a suitable alcohol-based hand rub	Yes		4.5
58.05	Don a low-lint gown with sleeves that fit snugly around the wrist and enclosed at the neck. Note: Disposable gowns are preferred.	Yes		4.5
58.06	If reusable gowns are used, a clean gown is donned daily.	Yes		4.5
58.07	Aseptically don sterile, powder-free gloves. Gloves completely and snugly cover the ends of the gown cuffs so that skin on the wrists and upper hands is completely enveloped.	Yes		4.5
59.00	Does the routine process include the following?	Yes		4.5

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
59.01	Do personnel periodically apply sterile 70% IPA to gloves while balancing the risk of radioactivity contamination; due to touching or handling potentially nonsterile materials?	Yes		4.5
59.02	Do personnel inspect the gloves they are wearing for holes, punctures, radioactivity contamination, or tears?	Yes		4.5
59.03	If a defect, radioactivity contamination, or malfunction is detected, do personnel immediately do the following?	Yes		4.5
59.04	Remove the gloves	Yes		4.5
59.05	Repeat antiseptic hand cleansing using an alcohol-based hand rub	Yes		4.5
59.06	Don new sterile gloves	Yes		4.5
59.07	Personnel avoid touch contamination of container septa, needles, syringe and needle hubs, and other critical sites	Yes		4.5
60.00	Do exiting processes for buffer area or SRPA include the following?	Yes		4.5
60.01	Shoe covers, head/hair/facial hair cover(s), face masks and gloves are properly disposed of	Yes		4.5
60.02	New PPE is used for each re-entry	Yes		4.5
60.03	Gowns may be re-used within the same shift if maintained to minimize contamination (eg away from sinks)	Yes		4.5
60.04	Gowns are in a classified area or,	Yes		4.5
60.05	Gown are kept in (or immediately outside of) the SRPA	N/A		4.5

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Facility Design and Environmental Controls			5.1
61.00	Is the facility is designed to minimize airborne contamination (for sterile radiopharmaceutical facilities)?	Yes		5.1
62.00	Is the facility is well-lighted?	Yes		5.1
63.00	Are the refrigerator and freezer restricted to drug products only (no food)?	Yes		5.1
64.00	Are the temperatures in classified areas and SRPA continuously maintained at 25 degrees C or cooler?	Yes		5.1
65.00	Are the temperatures monitored in the classified areas and SRPA each day that they are used, either manually or by a continuous recording device?	Yes		5.1
66.00	Are the temperature readings of the classified areas and SRPA documented at least once daily or stored in a continuous recording device and retrievable?	Yes		5.1
67.00	Are the temperature readings reviewed as described in the facility's SOPs?	Yes		5.1
68.00	Are free-standing air conditioners used within the classified area or SRPA?	No		5.1
69.00	Are temperature monitoring devices calibrated and verified for accuracy at least every 12 months or as required by the manufacturer?	Yes		5.1
70.00	*Recommendation: The humidity in classified areas and SRPA are continuously maintained at a relative humidity (RH) below 60%.*	Yes		5.1
71.00	Is the humidity monitored in the classified areas and SRPA each day that it is used, either manually or by a continuous recording device?	Yes		5.1

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
72.00	Are the humidity readings of the classified areas and SRPA documented at least once daily or stored in a continuous recording device and retrievable?	Yes		5.1
73.00	Are the humidity readings reviewed as described in the facility's SOPs?	Yes		5.1
74.00	Are free-standing humidifiers/dehumidifier used within the classified area or SRPA?	No		5.1
75.00	Are humidity monitoring devices calibrated and verified for accuracy at least every 12 months or as required by the manufacturer?	Yes		5.1
76.00	Is the designated person responsible to ensure the following?	Yes		5.1
76.01	Does each area related to sterile radiopharmaceutical processes meet the classified air quality standard appropriate for the activities to be conducted in that area?	Yes		5.1
76.02	Are ISO Class 5 PECs located, operated, maintained, monitored, and certified to have appropriate air quality?	Yes		5.1
	Types of Secondary Engineering Controls and Design:			5.1
77.00	Were placement of doors, door surfaces, and movement of the door, all of which can affect airflow, considered when designing doors for a sterile radiopharmaceutical processing facility?	Yes		5.1
78.00	Are tacky surfaces not used in ISO-classified areas?	Yes		5.1
79.00	Are the PEC located in a SEC?	Yes		5.1
80.00	When the PEC is located in an SEC which is an ISO-classified buffer room with an ante room, does all of the following apply?	Yes		5.1

Copyright © March 2024 National Association of Boards of Pharmacy® (NABP®). All rights reserved. Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
80.01	Is the ISO-classified ante-room and buffer area separated from the surrounding unclassified areas of the facility with fixed walls and doors?	Yes		5.1
80.02	Are facility design and controls in place to minimize the flow of lower-quality air into the more controlled areas?	Yes		5.1
80.03	Is the air supplied to the classified areas introduced through HEPA filters that are located in the ceiling?	Yes		5.1
80.04	Are returns low on the wall unless a visual smoke study demonstrates an absence of stagnant airflow where particulate will accumulate?	Yes		5.1
80.05	Is a smoke study of the PEC repeated whenever a change to the placement of the PEC within the area is made?	Yes		5.1
80.06	Is the classified areas equipped with a pressure-differential monitoring system?	Yes		5.1
80.07	Does the ante-room have a line of demarcation to separate the clean side from the less clean side?	Yes		5.1
80.08	Is the ante-room entered through the less clean side, and the clean side is the area closest to the buffer area?	Yes		5.1
80.09	Is required garb worn prior to crossing the line of demarcation?	Yes		5.1
81.00	When the PEC is located in an SEC, which is an unclassified area, without an ante room or buffer area (aka SRPA), the following apply:	N/A		5.1
81.01	Only sterile radiopharmaceutical preparation, preparation with minor deviations, dispensing, and repackaging may be performed in an SRPA	N/A		5.1
81.02	The SRPA is located away from unsealed windows, doors that connect to the outdoors, and traffic flow which may adversely affect the air quality in the PEC.	N/A		5.1

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
81.03	A visible perimeter establishes the boundaries of the SRPA.	N/A		5.1
81.04	Access to the SRPA is restricted to authorized personnel and required materials.	N/A		5.1
81.05	An SRPA is not located adjacent to environmental control challenges	N/A		5.1
81.06	If the SRPA meets ISO Class 8 total airborne particle count specifications, it can also be used for storage and elution of non-direct infusion radionuclide generators (eg, Tc-99m)	N/A		5.1
82.00	If a pass-through is used to prevent influx of contaminants, both doors are never opened at the same time.	Yes		5.1
83.00	*Recommendation: Interlocking mechanisms are used in the pass-through(s).*	Yes		5.1
	The Radiopharmaceutical Processing Environment:			5.1
84.00	Is the PEC certified to meet ISO Class 5 or better conditions (3520 particle count (with limit ≥0.5 µm) per cubic meter) under dynamic operating conditions?	Yes		5.1
85.00	Is the airflow in the PEC unidirectional (laminar flow)?	Yes		5.1
86.00	Is "first air" at the face of the filter free from airborne particulate contamination?	Yes		5.1
87.00	Is the HEPA-filtered air supplied in the direct processing area (DPA) at a velocity sufficient to sweep particles away from aseptic processing areas and maintain unidirectional airflow as much as possible during operations, given the limitations added from the radiation shielding in the DPA?	Yes		5.1
88.00	Are in situ air pattern analyses via smoke studies conducted at the critical area to demonstrate unidirectional airflow and sweeping action under dynamic conditions?	Yes		5.1

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Types of PECs and Placement:			5.1
89.00	Does the placement of the PEC allow for cleaning around the PEC?	Yes		5.1
90.00	**Laminar airflow workbench (LAFW):** Does a LAFW used for preparing radiopharmaceuticals provide vertical unidirectional HEPA-filtered airflow?	Yes		5.1
91.00	In cases where the LAFW is located within the segregated containment area of a hot-cell, it is acceptable for a horizontal unidirectional HEPA-filtered airflow pattern to be utilized.	N/A		5.1
92.00	**Placement of PEC:** Is the PEC located out of traffic patterns and away from area air currents that could disrupt the intended airflow patterns inside the PEC?	Yes		5.1
92.01	If used only to prepare, prepare with minor deviations, dispense, or repackage sterile radiopharmaceuticals the ISO Class 5 PEC may be placed in an unclassified SRPA.	N/A		5.1
92.02	If used to compound sterile radiopharmaceuticals, the PEC is located within an ISO Class 7 or better buffer area with an ISO Class 8 or better anteroom.	Yes		5.1
93.00	Is a dynamic airflow smoke pattern test performed initially and at least every 6 months to ensure that the PEC is properly placed into the facility and that workers understand how to utilize the unidirectional airflow to maintain first air as much as possible given the limitations added from the radiation shielding in the DPA?	Yes		5.1

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Air-Exchange Requirements		***Note to Inspector:*** *Airflow is measured in terms of the number of HEPA-filtered air changes per hour (ACPH). SRPA do not have an ACPH requirement.*	
94.00	For ISO-classified rooms, does the total ACPH maintain the ISO class under dynamic operating conditions?	Yes		
95.00	Are at least 15 ACPH of the total air change rate in a room come from the HVAC through HEPA filters located in the ceiling?	Yes		
96.00	Is there a minimum of 30 total HEPA-filtered ACPH supplied to ISO Class 7 areas?	Yes		
96.01	Does HEPA-filtered air from the PEC, added to the HVAC-supplied HEPA-filtered air, increase the total HEPA-filtered ACPH to at least 30 ACPH?	Yes		
96.02	If the PEC is used to meet the minimum total ACPH requirements, is the PEC not turned off except for maintenance?	N/A		
96.03	Are both the ACPH from HVAC contributed from the PEC, and the total ACPH documented on certification reports?	Yes		
97.00	Is a minimum of 20 ACPH of HEPA-filtered air supplied to ISO Class 8 areas?	Yes		
97.01	Are ante-rooms where activity levels are high, required more HEPA-filtered ACPH to maintain ISO Class 8 under dynamic operating conditions?	N/A		
97.02	Are the total ACPH documented on certification reports?	Yes

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Creating Areas to Achieve Easily Cleanable Conditions			5.2
	Classified Areas:			5.2
98.00	Are the surfaces of ceilings, walls, floors, doors, door frames, fixtures, shelving, work surfaces, counters, and cabinets in the classified area smooth, impervious, free from cracks and crevices, and non-shedding, so they can be cleaned and disinfected, and to minimize spaces in which microorganisms and other contaminants can accumulate?	Yes		5.2
99.00	*Recommendation: Surfaces are resistant to damage by cleaning agents, disinfectants, and tools used to clean.*	Yes		5.2
100.00	Are junctures between the ceiling and the walls and between the wall and the floor sealed to eliminate cracks and crevices where dirt can accumulate?	Yes		5.2
101.00	If ceilings consist of inlaid panels, are each panel caulked or otherwise sealed and secured to seal them to the support frame?	Yes		5.2
102.00	Are walls constructed of or covered with a durable material (eg, epoxy-painted walls or heavy-gauge polymer) and the integrity of the surface maintained?	Yes		5.2
103.00	Are panels joined together and sealed to each other and the support structure?	Yes		5.2
104.00	Do floors include coving to the sidewall or the juncture between the floor and wall are caulked?	Yes		5.2
105.00	*Recommendation: Classified areas minimize dust-collecting overhangs such as utility pipes, ledges, and windowsills.*	Yes		5.2
106.00	If overhangs or ledges are present, are they easily cleanable?	Yes		5.2
107.00	Is the exterior lens surface of ceiling light fixtures smooth, mounted flush, and sealed?	Yes		5.2
108.00	Are any other penetrations through the ceiling or walls sealed?	Yes		5.2

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	SRPA:			5.2
109.00	Is the SRPA and all surfaces (eg, walls, floors, counters, equipment) within the SRPA clean, uncluttered, and dedicated to sterile radiopharmaceutical processing activities?	N/A		5.2
110.00	*Recommendation: Surfaces in the SRPA are smooth, impervious, free from cracks and crevices, and non-shedding, so they can be easily cleaned and disinfected, and to minimize spaces in which microorganisms and other contaminants can accumulate.*	N/A		5.2
111.00	*Recommendation: Surfaces are be resistant to damage by cleaning agents, disinfectants, and tools used to clean.*	N/A		5.2
112.00	*Recommendation: Dust-collecting overhangs such as utility pipes, ledges, and windowsills are minimized.*	N/A		5.2
113.00	If overhangs or ledges are present, are they easily cleanable?	N/A		5.2
	Water Sources:			5.3
114.00	*Recommendation: Sinks are hands-free use with a closed system of soap (ie, non-refillable).*	Yes		5.3
115.00	In facilities with an ante room and buffer room, is the sink placed inside or outside of the ante room? *Note placement, inside or outside.*	Yes	Outside the anteroom.	5.3
115.01	If the sink is located outside of the ante-room, it is located in a clean space to minimize the risk of bringing in contaminants into the anteroom.	Yes		5.3
115.02	If the sink is located inside the ante-room, describe where it is located.	Yes	The sink is located in the hallway outside the anteroom, around a corner from the anteroom door.	5.3

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
115.03	The buffer area does not contain plumbed water sources [eg, sink(s), eyewash(es), shower(s), or floor drain(s)].	Yes		5.3
115.04	The ante room does not contain floor drain(s).	Yes		5.3
116.00	*Recommendation: If installed, sprinkler systems in classified areas are recessed & covered and are easily cleanable.*	N/A		5.3
117.00	In facilities with a SRPA design:			5.3
117.01	Is the sink accessible but located at least 1 m from the PEC and generators, if present?	N/A		5.3
117.02	Is the sink not located inside the perimeter of the SRPA?	N/A		5.3
	Placement and Movement of Materials:			5.4
118.00	Are only furniture, equipment, and other materials necessary permitted in the classified area or SRPA?	Yes		5.4
118.01	*Recommendation: Are furniture, equipment and materials low-shedding and easily cleaned & disinfected.*	Yes		5.4
118.02	Does the number, design, location, and manner of furniture, equipment and material installation not adversely impact environmental air quality and promote effective cleaning and disinfecting?	Yes		5.4
119.00	Are shipping carton(s) or other corrugated or uncoated cardboard not allowed in the classified area or SRPA?	Yes		5.4
120.00	Are carts used to transport components or equipment into classified areas constructed from nonporous materials with cleanable casters and wheels?	Yes		5.4

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
121.00	In a classified area, are carts not moved from the dirty side to the clean side of the anteroom unless the entire cart, including casters, is cleaned and disinfected?	Yes	Carts are not moved from the dirty side to the clean side.	5.4
122.00	Are all items wiped with low-lint wipers and an appropriate disinfectant by personnel wearing gloves before they are brought into the clean side of ante-room(s), pass-through(s), into an SRPA or into an ISO 5 PEC?	Yes		5.4
	Classified Areas:			5.5
123.00	Are activities and tasks carried out within the buffer area limited to only those necessary?	Yes		5.5
124.00	Are food and drinks exposed in patient care and treatment areas not in the ante-rooms or buffer areas?	Yes		5.5
125.00	When processing activities require the manipulation of blood-derived or other biological material (eg, radiolabeling patient's or donor's blood cells) do the following occur?	Yes		5.5
125.01	Are the manipulations clearly separated from routine material-handling procedures and equipment used in radiopharmaceutical preparation activities?	Yes		5.5
125.02	Are manipulations controlled by specific SOPs to avoid any cross-contamination?	Yes		5.5

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Remote Aseptic Processing Involving a Hot-Cell:		*Note to Inspector: In settings where tasks are carried out within the hot-cell enclosure not within an ISO-classified space by remote means (ie, no direct intervention by personnel into the ISO Class 5 space), it is not necessary for personnel to don the garbing described in this chapter for that environment to carry out these aseptic manipulations or to perform other routine tasks in the general area where the hot-cell is located.*	5.6
126.00	Does a hot-cell device provide an inherent physical segregation for the ISO Class 5 aseptic processing area?	N/A		5.6
127.00	If the hot-cell is located in an ISO-classified space, do personnel garb according to requirements of <825> for that environment?	N/A		5.6
128.00	If hand and arm incursions into the interior of the hot-cell occur causing personnel to stage the required materials and supplies, do personnel garb in relation to the contamination risk associated with the individual hot-cell/ISO Class 5 relationship?	N/A		5.6
129.00	For situations where a PEC device is located within a hot-cell, all the following apply:	N/A		5.6
129.01	Do dynamic airflow smoke pattern tests show that the staging of supplies and materials in the demarcated PEC area does not allow the influx of unclassified air into the PEC?	N/A		5.6
129.02	For interventions that are outside of the PEC, do personnel garb in nonsterile gloves and a low-particulate lab coat?	N/A		5.6
129.03	If the hot-cell has failed the airflow smoke pattern test, are personnel required to garb differently?	N/A		5.6

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
130.00	For situations where the hot-cell is an integrated HEPA filtration system with a clear demarcated area that is a PEC, the following apply:	N/A		5.6
130.01	Do dynamic airflow smoke pattern tests show that the staging of supplies and materials into the demarcated PEC area does not allow the influx of less than ISO Class 5 quality air into the PEC?	N/A		5.6
130.02	If a failure of the airflow smoke pattern test require personnel to garb in accordance with 4.5 Hand Hygiene and Garbing for Buffer Areas and Segregated Radiopharmaceutical Processing Area for all incursions into the PEC.	N/A		5.6
131.00	For other hot-cell/PEC configurations and technologies that may exist, the following apply:	N/A		5.6
131.01	Does verification (either by airflow smoke pattern tests or other manufacturer specified methods) ensure, upon each certification, that the staging of materials and supplies does not allow for the intrusion of less than ISO Class 5 air into the designated ISO Class 5 space?	N/A		5.6
131.02	Does failure of the airflow smoke pattern test require personnel to garb in accordance with 4.5 Hand Hygiene and Garbing for Buffer Areas and Segregated Radiopharmaceutical Processing Area for all incursions into the hot-cell?	N/A		5.6
	Environmental Controls:			5.7
132.00	Do all RAM users comply with the conditions specified in their approved RAM license application and regulations, and RAM license conditions may supersede the following requirements for environmental controls? Refer to the RAM license for pressure requirements, as applicable.	Yes		5.7
133.00	Do positive pressure environments have a minimum differential positive pressure of 0.02-inch water column between each ISO-classified area (eg, between the buffer area and ante-room)?	Yes		5.7

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
134.00	Is the pressure differential between the ante-room and the unclassified area no less than a positive 0.02-inch water column?	Yes		5.7
134.01	Is the buffer area, if present, positive pressure compared to the ante-room?	Yes		5.7
134.02	Is the ante-room, if present, positive pressure compared to unclassified portions of the restricted area?	Yes		5.7
135.00	Is the restricted area, in the presence of volatile or airborne radiopharmaceuticals, negative pressure compared to the unrestricted area?	N/A		5.7
136.00	Is the SRPA negative pressure compared to unrestricted areas in the presence of volatile or airborne radiopharmaceuticals (eg, I-131 sodium iodide and Xe-133 gas)?	N/A		5.7
	Establishing and Maintaining Pressure Differentials:			5.7
137.00	Any time a pressure differential is required, is there a pressure monitoring device?	Yes		5.7
138.00	In a classified area, is a pressure differential monitoring system used to continuously monitor the pressure differential between the ante-room(s) and buffer area(s) and between the ante-room and the general environment outside the classified area(s) or area(s)?	Yes		5.7
139.00	Are the results from the pressure monitoring system reviewed and documented at least daily on days the area is used?	Yes		5.7
140.00	All pressure monitoring devices are tested for accuracy and required performance at least every 6 months.	Yes		5.7

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Ambient Atmosphere for Immediate Use Preparations:			5.7
141.00	All of the following requirements met in ambient atmosphere environments:	N/A		5.7
141.01	Is non-patient care space, functionally separate (not necessarily a different area) from the patient care area, such as a radiopharmaceutical handling space, or hot lab, in a hospital, clinic, or mobile coach?	N/A		5.7
141.02	Is there a designated area for medication preparation that is clean and free from clutter?	N/A		5.7
141.03	Is it a low traffic area (ie, limited number of people going in and out or moving around the area during times that radiopharmaceutical processing is being carried out)?	N/A		5.7
	SRPA with Vertical Flow ISO Class 5 PEC(s) for Radiopharmaceutical Preparations:			5.7
142.00	Does the SRPA with Vertical Flow ISO Class 5 PEC(s) for Radiopharmaceutical Preparations meet the following requirements?	N/A		5.7
142.01	Area surrounding the PEC may be ambient (unclassified) atmosphere.	N/A		5.7
142.02	Area is clean, uncluttered, and dedicated to the processing of radiopharmaceuticals.	N/A		5.7
142.03	Appropriate for preparation, preparation with minor deviations, repackaging, and dispensing of radiopharmaceuticals.	N/A		5.7
142.04	An area that is used to store and elute non-direct infusion radionuclide generators (eg, Tc-99m) must meet ISO Class 8 total airborne particle-count specifications.	N/A		5.7

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	An ISO Class 8 Buffer Area with Vertical Flow ISO Class 5 PEC(s) with an Adjacent ISO Class 8 Ante-Room:		***Note to Inspector**: Activities - preparation, preparation with minor deviations, repacking, and dispensing of radiopharmaceuticals; storage & elution of non-direct infusion radionuclide generators.*	5.7
143.00	ISO Class 8 Buffer Area with Vertical Flow ISO Class 5 PEC(s) with an Adjacent ISO Class 8 Ante-Room environment is appropriate for all activities listed in SRPA with Vertical Flow ISO Class 5 PEC(s) for Radiopharmaceutical Preparations.	N/A		5.7
	An ISO Class 7 Buffer Area with Vertical Flow ISO Class 5 PEC(s) with an Adjacent ISO Class 8 Ante-Room:		***Note to Inspector**: Activities - preparation, preparation with minor deviations, repacking, and dispensing of radiopharmaceuticals; storage & elution of non-direct infusion radionuclide generators.*	5.7
144.00	ISO Class 7 Buffer Area with Vertical Flow ISO Class 5 PEC(s) with an Adjacent ISO Class 8 Ante-Room environment is appropriate for all activities listed in An ISO Class 8 Buffer Area with Vertical Flow ISO Class 5 PEC(s) with an Adjacent ISO Class 8 Ante-Room and sterile compounding.	Yes		5.7
	Hot-Cell:		***Note to Inspector**: Activities - preparation, preparation with minor deviations, repacking, and dispensing of radiopharmaceuticals; storage & elution of non-direct infusion radionuclide generators.*	5.7
145.00	Hot-Cell environment is appropriate for all activities listed in SRPA with Vertical Flow ISO Class 5 PEC(s) for Radiopharmaceutical Preparations.	N/A		5.7
	Certification of PEC and Environment in which the PEC is located:			5.7
146.00	Certification of the classified areas, including the PEC, is performed initially.	Yes		5.7
147.00	Recertification is performed at least every 6 months.	Yes		5.7

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
148.00	Procedures outlined in the current CETA certification guide for Sterile Compounding Facilities, or an equivalent guideline, are followed.	Yes		5.7
149.00	Airflow testing is performed to determine acceptability of the air velocity, the air exchange rate, and area pressure cascade to ensure that air consistently flows from most to least clean areas, and that the appropriate quality of air is maintained under dynamic operating conditions.	Yes		5.7
150.00	HEPA filter integrity testing is performed (HEPA filters are leak tested after installation and as part of recertification).	Yes		5.7
151.00	Total Particle Counts testing is performed and conducted under dynamic operating conditions using calibrated electronic equipment.	Yes		5.7
152.00	Smoke Visualization Studies are performed under either simulated or dynamic operating conditions to demonstrate unidirectional airflow and sweeping action over and away from the preparation(s).	Yes		5.7
153.00	Are other equivalents for certifying the PEC performed and documented per facility SOPs, in cases where technologies exist for hot-cell and PEC configurations that are not consistent for certification by the current CETA standards?	N/A		5.7
154.00	In this case, the PEC maintains the environmental equivalent for total particle counts and the protection of the ISO Class 5 area from intrusions of lesser controlled air.	N/A		5.7

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Daily Monitoring of Environment:			5.7
155.00	The temperature and humidity is monitored in the SRPA or area containing a hot-cell, and if in a classified area the pressure is monitored, each day that radiopharmaceutical handling occurs, either manually or by a continuous recording device.	Yes		5.7
156.00	Does Monitoring include the following?	Yes		5.7
156.01	*Recommendation: Relative humidity is kept at 60% or lower*	Yes		5.7
156.02	Are temperature continuous readings confirmed daily to have remained within the acceptable range?	Yes		5.7
156.03	Are relative humidity continuous readings confirmed daily to have remained within the acceptable range?	Yes		5.7
156.04	Are excursion documented and, if applicable, appropriate corrective actions taken?	Yes		5.7
156.05	Are temperature monitoring devices verified for accuracy every 12 months or as required by the manufacturer?	Yes		5.7
156.06	Are monitoring of pressure differentials performed?	Yes		5.7

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Microbial Air and Surface Monitoring:			6
157.00	Has the pharmacy developed and implemented written air and surface monitoring procedures for all sterile radiopharmaceutical classified areas?	Yes		6
158.00	Are air and surface monitoring results and the corrective actions documented, and records readily retrievable as required by jurisdictional laws and regulations?	Yes		6
	General Monitoring Requirements:			6.1
159.00	Is the air and surface monitoring program clearly described in the established SOPs of the facility and include a diagram of the sampling locations, SOPs for collecting samples, frequency of sampling, size of samples (eg, surface area, volume of air), time of day of sampling in relation to activities in the classified areas, and action levels that will trigger corrective action?	No	The SOP does not include a diagram, but it has a description of locations where personnel should collect a surface sample.	6.1
159.01	Are samples obtained from locations that pose the highest possible contamination risk to the sterile radiopharmaceuticals involved with the operation's processes and are likely to be representative of the conditions throughout the area?	Yes		6.1
160.00	Are personnel who operate the equipment trained in the proper operation of the air and surface sampling equipment to ensure accurate and reproducible sampling?	No	The PIC has been trained in air sampling. The equipment is only used if the pharmacy has a failure when air sampling is conducted by the third-party vendor every 6 months. The internal personnel have not been trained in surface sampling.	6.1

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
161.00	Are all air sampling devices serviced and calibrated as recommended by the manufacturer?	Yes	The pharmacy does not conduct its own air sampling. The third party vendor provides documentation of calibration with its report.	6.1
162.00	Does the microbiological air and surface monitoring program include viable impact volumetric airborne particulate sampling and surface sampling?	Yes		6.1
163.00	Are air and surface sampling performed initially for PECs & classified areas in a facility to establish a baseline level of environmental quality?	Yes		6.1
164.00	After initial sampling, are the PECs & classified area(s) monitored according to the minimum frequencies?	Yes		6.1
165.00	Are air and surface sampling conducted during actual or simulated dynamic operating conditions to confirm that the required environmental quality in classified areas is maintained?	No	Monthly surface sampling is conducted after production and not under simulated dynamic conditions. When the third-party vendors provides sampling, it occurs during dynamic conditions.	6.1
166.00	Is sampling carried out at the conclusion of sterile radiopharmaceutical processing but prior to cleaning and disinfecting the surface area?	Yes		6.1
167.00	Is sampling performed in all of the following circumstances?	Yes		6.1
167.01	In conjunction with the certification of new facilities and equipment?	Yes		6.1
167.02	After any modification of facilities or equipment	Yes		6.1
167.03	In response to identified problems (eg, positive growth in sterility tests of compounded radiopharmaceuticals)?	Yes		6.1

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
167.04	In response to identified trends (eg, repeated positive gloved fingertip sampling results or failed media-fill testing involving more than one operator where a review of the operator technique shows no reasonable flaws in process; repeated observations of air or surface contamination)?	Yes		6.1
167.05	In response to changes that could impact the controlled area environments (eg, significant change in cleaning process or the agents involved)?	Yes		6.1
168.00	Is regular review of the sampling data performed to detect trends such as elevated levels of microbial bioburden, elevated levels of nonviable particulates, or other adverse changes within the environment?	Yes		6.1
169.00	Are results reviewed in conjunction with personnel data (ie, training records, visual observations, competency assessments) to assess the state of control and to identify potential risks of contamination?	Yes		6.1
170.00	Is Prompt corrective action in response to any adverse findings taken to maintain the necessary environmental quality for handling sterile radiopharmaceutical?	Yes		6.1
171.00	Is data also reviewed following corrective actions to confirm that the actions taken have been effective in achieving the required air and surface quality levels?	Yes		6.1
	Monitoring Air Quality for Viable Airborne Particles:			6.2
	Viable Air Sampling: Timing and Locations			6.2
172.00	Volumetric active air sampling of all classified areas (eg, ISO Class 5 PEC and ISO Class 7 and 8 areas) using an impaction device are conducted during dynamic operating or simulated operating conditions at least every 6 months.	Yes		6.2
173.00	Does viable air sampling include the following?	Unknown		6.2

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
173.01	Following the manufacturer's instructions for operation of the air sampling device, including placement of media?	Unknown	The pharmacy contracts with a third-party for viable air sampling every six months during the recertification. It is unknown if the personnel from the third-party vendor follow the manufacturer's instructions.	6.2
173.02	Using the sampling device, test at least 1 cubic meter or 1000 liters of air from each location sampled?	Yes		6.2
173.03	At the end of the sampling, retrieve the media plates/devices and cover?	Unknown	It is unknown if the third-party vendor covers the media plates/devices.	6.2
173.04	Inverting the media and incubate at 30°–35° C for no less than 48 hours. Examine for growth. Record the total number of discrete colonies of microorganisms on each plate as cfu/m3 of air on an environmental sampling form based on sample type (ie, viable air). Include sample location and date?	Unknown	The pharmacy contracts with a third-party for viable air sampling every six months during the recertification. It is unknown if the personnel from the third-party vendor incubate as described.	6.2
173.05	Incubates the inverted media at 20°–25° C for no less than 5 additional days? Examines the media plates for growth? Records the total number of discrete colonies of microorganisms on each plate as cfu/m3 of air on an environmental sampling form based on sample type (ie, viable air)? Includes sample location and date?	Unknown	The pharmacy contracts with a third-party for viable air sampling every six months during the recertification. It is unknown if the personnel from the third-party vendor incubate as described.	6.2
174.00	To shorten the overall incubation period, can two samples be collected for each sample location and incubated concurrently?	Unknown		6.2
175.00	Both samples could be TSA, or one sample could be TSA and the other fungal media [eg, malt extract agar (MEA) or sabouraud dextrose agar (SDA)]. Describe samples in notes.	Unknown		6.2

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
176.00	Each sample is incubated in a separate incubator.	Unknown		6.2
177.00	One sample is incubated at 30°–35°C for no less than 48 hours and the other sample is incubated at 20°–25° C for no less than 5 days.	Unknown		6.2
178.00	Fungal media samples are incubated at 20°–25° C for no less than 5 days.	Unknown		6.2
179.00	The count of the total number of discrete colonies of microorganisms are done on each sample and these results are recorded as cfu per sample.	Unknown		6.2
180.00	Are the results of the sampling recorded on an environmental sampling form based on sample type (ie, viable air) and include the sample location, and sample date?	Unknown		6.2
181.00	Are general microbiological growth medium that supports the growth of bacteria and fungi used (eg, TSA medium)?	Unknown		6.2
182.00	Do CoA(s) from the manufacturer verify that the medium meets the expected growth promotion, pH, and sterilization requirements?	Unknown		6.2
183.00	Are samples incubated in a temperature monitored incubator with a calibrated measuring device?	Unknown		6.2
184.00	Is the incubator temperature monitored during incubation, either manually or by a continuous recording device, and the results reviewed and documented?	Unknown		6.2
185.00	Are the incubators used for microbiological testing placed in a location outside of any classified area or SRPA and kept away from areas where compounding or sterile processing activities are carried out?	Unknown		6.2

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Data Evaluation and Action Levels:			6.2
186.00	Air Sampling Action Levels (cfu/cubic meter (1000L) of air per plate) are within the appropriate range: *ISO Class 5 - >1* *ISO Class 7 - >10* *ISO Class 8 - >100*	Yes		6.2
187.00	Are cfu counts evaluated against the action levels and in relation to previous data to identify adverse results and/or trends?	Yes		6.2
187.01	If two pieces of media were collected at a single location, are all recovered growth documented and action levels are applied individually to each plate/device (ie, results from each cubic meter of air sampled are compared to the action level for that area)?	N/A		6.2
188.00	If levels measured during the viable air monitoring program exceed the action levels for the ISO classification levels of the area sampled, is the cause investigated, and corrective action is taken?	Yes		6.2
188.01	Is the corrective action plan dependent on the cfu count and the microorganism recovered?	Yes	New Jersey requires reporting to board of pharmacy within 48 hours, decommissioning the PEC until retesting is complete and passed and board of pharmacy is notified of the passing results.	6.2
188.02	If levels measured during viable air sampling exceed the levels, is an attempt made to identify any microorganism recovered to the genus level with the assistance of a qualified individual?	Yes		6.2
188.03	Is the corrective action plan documented?	Yes		6.2
188.04	*Recommendation: The extent of the investigation is consistent with the deviation and includes an evaluation of trends.*	Yes		6.2

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Monitoring Surfaces for Viable Particles:			6.3
189.00	Are all sampling sites and procedures described in the facility's SOP?	Yes		6.3
	Surface Sampling: Timing and Locations			6.3
190.00	Is surface sampling of all classified areas and all PECs conducted at least monthly for the detection of microbial contamination?	Yes		6.3
191.00	Is each classified area sampled?	Yes		6.3
192.00	Is the DPA of the PEC, and any equipment permanently contained in the PEC, sampled?	Yes		6.3
193.00	Are work surfaces in classified areas near the PEC, frequently touched surfaces in classified areas, and pass-through enclosure(s) for all classified areas evaluated to determine the locations that pose the greatest risk of harboring microbial contamination?	Yes		6.3
194.00	Is surface sampling performed at the end of the radiopharmaceutical aseptic activities or shift, but before the area has been cleaned and disinfected?	Yes		6.3
195.00	Do radiopharmaceutical personnel consider the appropriate exposure and contamination prevention measures prior to and while collecting samples?	Yes		6.3
196.00	If the worker assesses that the risk for exposure is not in conformance with ALARA safety standards, are measures taken to eliminate the risk (eg, implementation of appropriate shielding, performing the sampling at a later time or alternate day)?	Yes		6.3

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Sampling Procedures:			6.3
197.00	Are surface sampling devices (eg, plates, paddles, or slides) containing microbial growth media used for sampling flat surfaces?	Yes		6.3
198.00	Are CoAs from the manufacturer verified that the media meet the expected growth promotion, pH, and sterilization requirements?	Yes		6.3
199.00	Do surface sampling devices contain general microbial growth media (eg, TSA) supplemented with neutralizing additives (eg, lecithin and polysorbate 80) to neutralize the effects of any residual disinfecting agents?	Yes		6.3
200.00	If used, do contact plates have a raised convex surface?	Yes		6.3
201.00	Are sterile swabs wetted with sterile water or a sterile neutralizing buffer used when sampling irregular surfaces and difficult-to-reach locations, such as crevices, corners, and spaces between surfaces?	N/A		6.3
202.00	After sampling, is the sampled area thoroughly cleaned and disinfected?	Yes		6.3
203.00	Are the following procedures for surface sampling on flat surfaces used?	Yes		6.3
203.01	Remove the cover from the surface sampling device. Firmly press, using a rolling motion, if possible, the media surface onto the surface to be sampled. The surface sampling device will leave a residue of growth medium on the sample site. After sampling, use sterile 70% IPA to remove residue. Cover each surface sampling device.	Yes		6.3
203.02	If using plates, invert the plates.	Yes		6.3

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
203.03	Incubate the surface sampling devices at 30°–35° C for no less than 48 hours. Examine for growth. Record the total number of discrete colonies of microorganisms on each media device as cfu/sample on an environmental sampling form based on sample type (ie, surface). Include sample location and date.	Yes		6.3
203.04	Incubate the sampling device at 20°–25° C for no less than 5 additional days. Examine the media plates for growth. Record the total number of discrete colonies of microorganisms (cfu/sample) on the environmental sampling record based on sample type (ie, surface). Include sample location and date.	Yes		6.3
204.00	Does the facility use two samples for each sampling location?	No		6.3
204.01	Are both TSA?	N/A		6.3
204.02	Is one TSA and one Fungal?	N/A		6.3
204.03	Is each sample incubated in a separate incubator?	N/A		6.3
204.04	Is one sample media incubated at 30°–35° C for no less than 48 hours?	N/A		6.3
204.05	If fungal media are used as one of the samples, is it fungal media sample incubated the at 20°–25° C or no less than 5 days?	N/A		6.3
204.06	Are the total number of discrete colonies of microorganisms on each sample counted as cfu per sample?	N/A		6.3
204.07	Are the results of the sampling recorded?	N/A		6.3

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Cleaning and Disinfecting			7
208.00	Are all cleaning and disinfecting activities performed by trained and appropriately garbed personnel using facility approved agents and procedures described in written SOPs?	Yes		7
209.00	Is cleaning performed in the direction of most to least clean areas?	Yes		7
210.00	Are the frequency, method(s), and location(s) of cleaning, disinfecting, and sporicidal agent use established in written SOPs, in accordance with the manufacturer's instructions when available, or based on sound microbiological cleaning techniques when unavailable, and followed by all cleaning personnel?	Yes		7
210.01	Is the manufacturer's direction or published data for the minimum contact time followed for the cleaning, disinfecting, and sporicidal agents used?	Yes		7
210.02	When sterile 70% IPA is used, is it allowed to dry?	Yes		7
211.00	Are all cleaning, disinfecting, and application of sporicidal agents documented according to facility SOPs?	Yes		7
212.00	Are surfaces cleaned prior to being disinfected unless an Environmental Protection Agency (EPA)-registered (or equivalent) one-step disinfectant cleaner is used to accomplish both the cleaning and disinfection in one step?	Yes		7
212.01	After cleaning and disinfecting or the application of a one-step disinfectant cleaner in a PEC, is sterile 70% IPA applied to remove any residue?	Yes		7

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
213.00	Does cleaning and disinfecting surfaces occur at the minimum frequencies in Table 5 or if activities are not performed daily, cleaning and disinfecting completed before initiating activities?	Yes		7
214.00	Is the act of reducing or removing radioactivity (radioactive decontamination) from an object or surface balanced with the risk of spreading radioactive contamination?	Yes		7
214.01	*Recommendation: Areas shielded until radiation exposure levels lowered.*	Yes		7
214.02	Is this balance specified in SOPs (eg, trigger levels for safe cleaning)?	Yes		7
214.03	*Recommendation: The PEC is checked for radioactive contamination prior to cleaning and disinfecting to prevent spreading radioactive contamination in the PEC.*	Yes		7
	Minimum Frequency for Cleaning and Disinfecting Surfaces in Classified Areas and within the perimeter of the SRPA:			7
215.00	Does Cleaning of the PEC(s) and equipment inside the PEC(s) and/or PEC and the equipment inside the PEC(s) located in a hot-cell occurs in the following situations?	Yes		7
215.01	Prior to performing sterile processing of radiopharmaceuticals on each day that activities are carried out, are the walls, bars, torso shield and any exposed surface of equipment inside the PEC cleaned to the extent possible as specified by the equipment manufacturer or the assessment of a qualified individual (eg, microbiologist or industrial hygienist)?	Yes		7
215.02	Is radioactive contamination shielded with appropriate temporary material, providing the material is covered with low-lint absorbent pads or has equivalent low shedding properties?	Yes		7

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
216.00	Does disinfecting of the PEC(s) and equipment inside the PEC(s) and/or PEC and the equipment inside the PEC(s) located in a hot-cell occur in the following situations?	Yes		7
216.01	Following cleaning on each day that activities are carried out, are exposed surfaces of the equipment disinfected to the extent possible as specified by the equipment manufacturer or the assessment of a qualified individual (eg, microbiologist or industrial hygienist)?	Yes		7
216.02	When used, are low-lint absorbent pads removed and the PEC surveyed for radioactive contamination prior to disinfecting?	Yes		7
216.03	Are new pads replaced after disinfecting or as required after spills?	Yes		7
217.00	Does Cleaning and Disinfecting occurs **DAILY** for the following?	No		7
217.01	PEC(s) and equipment inside the PEC(s)	Yes		7
217.02	Surface of sink(s)	No		7
217.03	PEC and equipment inside the PEC(s) located in a hot cell.	Yes		7
217.04	Hot-cells (all interior surfaces, dependent on design, equipment, and shielding present)	N/A		7
217.05	Work surface(s) outside the PEC	Yes		7
217.06	Floor(s)	Yes		7
218.00	Does Cleaning and Disinfecting occurs **MONTHLY** for the following?	Yes		7
218.01	Ceiling(s)	Yes		7

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Cleaning, Disinfecting and Sporicidal Agents:		***Note to Inspector**: Some EPA-registered (or equivalent) one-step disinfectant cleaners may have sporicidal properties.*	7.1
220.00	Are cleaning and disinfecting agents selected and used with careful consideration of compatibilities, effectiveness, and user safety?	Yes		7.1
221.00	Are considerations when selecting and using disinfectants include their anti-microbial activity, inactivation by organic matter, residue, shelf life, preparation requirements of the agent, and suitability for surfaces being disinfected?	Yes		7.1
221.01	After the disinfectant is applied on the surface to be disinfected, is the disinfectant allowed to dwell for the minimum contact time specified by the manufacturer, during which time the surface cannot be disturbed?	Yes		7.1
222.00	Is only sterile 70% IPA used in the ISO Class 5 PEC?	Yes		7.1
223.00	Are sporicidal agents used at least monthly on all surfaces in classified areas and SRPAs?	Yes		7.1
	Cleaning Supplies:			7.2
224.00	Are all cleaning supplies (eg, wipers and mop heads), with the exception of tool handles and holders, low-lint?	Yes		7.2
225.00	*Recommendation: All cleaning supplies (eg, wipers and mop heads), with the exception of tool handles and holders are disposable.*	Yes		7.2
225.01	If disposable cleaning supplies are used, are they discarded after each cleaning activity?	Yes		7.2
226.00	Are reusable cleaning tools made of cleanable materials (eg, no wooden handles) and are cleaned and disinfected before and after each use?	Yes		7.2

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
227.00	Are reusable cleaning tools dedicated for use in the classified areas or SRPAs and are not removed from these areas except for disposal?	Yes		7.2
228.00	Are reusable cleaning tools discarded after an appropriate amount of time, to be determined based on the condition of the tools?	Yes		7.2
229.00	*Recommendation: Cleaning supplies and solutions used in the classified areas and SRPAs are be monitored for radioactive contamination after use and prior to disposal, as per facility SOPs.*	Yes		7.2
230.00	Are cleaning supplies used in the classified areas and SRPAs disposed in a manner that minimizes the potential for dispersing particulates into the air (eg, with minimal agitation, away from work surfaces)?	Yes		7.2
	Cleaning and Disinfecting the PEC:			7.3
231.00	Is the PEC cleaned and disinfected at the minimum frequencies specified in Table 5?	Yes		7.3
232.00	If the PEC contains a removable work tray, are all sides of the work tray and the area underneath the work tray cleaned and disinfected at least monthly?	Yes		7.3
233.00	If necessary are all surfaces of the PEC surveyed for radioactive contamination and follow facility SOPs to decontaminate?	Yes		7.3
234.00	If necessary, any particles, debris, or residue removed with an appropriate solution (eg, Sterile Water for Injection or Sterile Water for Irrigation) using sterile, low-lint wipers?	Yes		7.3

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
242.00	Are any items to be transferred into the PEC from the classified area or SRPA disinfected with a sterile disinfectant (eg, sterile 70% IPA)?	Yes		7.4
243.00	If radiopharmaceuticals are being processed by remote means in a hot-cell, the opening of sterile packages (eg, syringes, luer lock caps) may not be possible by remote means within the ISO Class 5 area.			7.4
243.01	In this case, are the syringes opened and appropriately labeled outside of the ISO Class 5 environment and placed in disinfected shielding, immediately prior to the forthcoming dispensing cycle?	N/A		7.4
	Disinfecting Critical Sites:			7.5
244.00	Are critical sites (eg, vial stoppers) wiped with sterile 70% IPA? Note: If the vial shield top is then closed, the septum is disinfected again with sterile 70% IPA prior to another needle puncture.	Yes		7.5
245.00	Is the critical site wiped ensuring that both chemical and mechanical actions are used to remove contaminants?	Yes		7.5
246.00	Is the sterile 70% IPA allowed to dry before piercing critical sites?	Yes		7.5
247.00	Is the septum wiped with sterile 70% IPA frequently whenever multiple punctures are occurring (eg, removing several individual doses from a multiple-dose container)?	Yes		7.5

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Cleaning and Disinfecting Items from Patient Care Area:			7.6
248.00	Is radiation shielding and equipment used in the classified area/SRPA or PEC that is exposed to patient care areas during the process of administration cleaned and disinfected before returning to any classified area (eg, buffer or ante-room) or SRPA in accordance with the Centers for Disease Control and Prevention Guidelines 1 classified as noncritical equipment requiring low-risk disinfection?	Yes		7.6
249.00	Are syringes that have been used in a patient care area not brought back into the classified area (eg, buffer or ante-room) or SRPA for re-assaying or disposal unless the syringe is sealed inside an impervious container (eg, sealed plastic bag) that is disinfected prior to entry into the classified area or SRPA?	Yes		7.6
250.00	Is equipment that has been exposed to needles and syringes contaminated with blood-borne pathogens and RAMs considered mixed waste (eg, syringe shields and syringe carrying containers)?	Yes		7.6
250.01	Is this equipment cleaned and disinfected through actions regulated by the facility's SOPs?	Yes		7.6
250.02	Is equipment that contained or was in contact with mixed waste cleaned and disinfected with an appropriate agent(s) for blood?	Yes		7.6
	Assigning BUDs:			8
251.00	Does the pharmacy have policies and SOPs appropriate to the assignment of BUD and maintain documentation of applicable study results and calculations?	Yes		8
252.00	*Recommendation: Studies of radiolabeling efficiency and radiochemical stability employ quality control (QC) testing methods described in the manufacturer's package insert, USP monographs and general chapters, or other equivalent testing methods and are sufficiently rigorous to allow statistical confidence in the results.*	Yes		8

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
253.00	Does the pharmacy have SOPs to collect and evaluate complaints associated with the use of radiopharmaceuticals having assigned BUDs?	Yes		8
254.00	*Recommendation: Policies and SOPs are also in place to reevaluate the assigned BUD based on complaints, which may include repeating studies and/or performing additional studies on radiolabeling efficiency and/or radiochemical stability.*	Yes		8
255.00	Does the individual responsible for the manipulation assign the BUD based on established testing data, either performed in-house or obtained from peer reviewed literature?	Yes		8
256.00	Preparation Conditions for Sterile Radiopharmaceuticals: *Describe condition used at the pharmacy in notes section (Table 7).*		PEC with ISO Class 5 and SEC with ISO Class 7 with ISO Class 8 anteroom.	8
257.00	For compounded preparations (sterile and nonsterile) plus preparations with minor deviations, is BUD dependent on maintenance of quality and purity including radiochemical purity, radionuclidic purity and other applicable parameters as specified in individual monographs or as clinically appropriate?	Yes		8
258.00	Assignment of BUD for a radiopharmaceutical considers several factors, as appropriate. Issues of concern include all but are not limited to the following:	Yes	The assigned BUD is based on a 90% tag.	8
259.00	*Recommendation: The assigned BUD does not exceed the sterility-related times listed in Table 7 unless a longer time is justified by Sterility tests per <71>.*	Yes	The pharmacy performs sterility testing once a year for the items with the most manipulations and the most dispensed, by compounding, allowing the isotope to decay and then completing a sterility test.	8
260.00	Radiochemical Purity - Is the assigned BUD based on stability studies in which these variables are controlled and are representative of the conditions of actual use?	Yes		8

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
261.00	*Recommendation: For factors that allow a range of values (eg, storage temperature, quantity of radioactivity, radioactivity concentration), studies are conducted at the extreme of the ranges.*	Yes		8
262.00	Radionuclidic purity - USP monographs for Tc-99m radiopharmaceuticals require that the radionuclidic impurity Mo-99 not exceed 0.15 µCi Mo-99 per mCi Tc-99m at the time of administration.	Yes		8
263.00	Are calculations of radionuclidic purity at future times necessary to ensure compliance throughout the assigned BUD?	Yes		8
264.00	Age of the generator eluate - Extension of the BUD for Tc-99m pertechnetate intended for radiolabeling of kits take into account the build-up of Tc-99 and peroxides over time.	Yes		8
265.00	Number of particles - For radiolabeled particulates, the number of particles per unit radioactivity increases over time as the radionuclide decays. Calculation of the number of MAA particles in the patient dose is conducted to ensure compliance with the prescribed particle range throughout the assigned BUD.	Yes		8
266.00	Specific Activity - For some receptor-based radiopharmaceuticals, the mass quantity may influence uptake. In such situations, the assigned BUD ensures that the patient dose contains no more than the specified mass.	N/A		8
267.00	Container Type – The assigned BUD is determined in the proper storage container.	Yes		8
268.00	*Cell Viability – Recommendation: The assigned BUD is as short as circumstances reasonably allow so as to maximize cell viability.*	Yes		8

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
269.00	In the case of manufactured radiopharmaceuticals that are distributed to nuclear pharmacies or other healthcare facilities for terminal distribution/dispensing, the assigned BUD of the dispensed dose cannot exceed the expiration date/time of the manufactured radiopharmaceutical(s).	Yes		8
270.00	In the case of radiopharmaceuticals prepared from kits, the BUD of a dispensed dose cannot exceed the assigned BUD of the finished kit preparation.	Yes		8
271.00	A radiopharmaceutical may not exceed the shortest BUD of any of its components.	Yes		8
	Documentation:			9
272.00	Are applicable records (hard-copy or electronic), including policies and SOPs, maintained for all activities involved in repackaging, preparing, preparing with minor deviations, compounding, and dispensing radiopharmaceuticals?	Yes		9
273.00	Do such records include all but are not limited to the following?	Yes		9
273.01	Personnel training and testing including visual assessment of aseptic technique competency	Yes		9
273.02	Validation	Yes		9
273.03	Garbing	Yes		9
273.04	Hand hygiene	Yes		9
273.05	Equipment/environment cleaning and disinfecting	Yes		9
273.06	Gloved fingertip and thumb sampling	Yes		9
273.07	Media fill evaluation initially	Yes		9
273.08	Media fill follow up testing at specified intervals	Yes		9

		Observations	Notes	USP Reference(s)
	Master Formulation Record:			9.1
275.00	Preparations with minor deviations or compounding have a MFR. *Note: A MFR is not required for a preparation following the manufacturer's instructions.*	Yes		9.1
276.00	Do the elements of the MFR include at a minimum the following?	Yes		9.1
276.01	Name of the radiopharmaceutical	Yes		9.1
276.02	Name or ID number, pharmacy, strength, purity, quality, and quantity of ingredients with validated documentation (eg, CoA)	Yes		9.1
276.03	Detailed procedure (eg, heating, components, incubation time)	Yes		9.1
276.04	Range of radioactivity	Yes		9.1
276.05	Range of volume	Yes		9.1
276.06	Equipment to be used	Yes		9.1
276.07	PEC and SEC to be used, if applicable	Yes		9.1
276.08	Quality control tests to be performed for final release of the radiopharmaceutical (eg, radiochemical purity, pH)	Yes		9.1
276.09	Procedures for depyrogenation and sterility procedures and validations, as applicable, including limits	N/A		9.1
276.10	Trained Personnel	Yes		9.1
276.11	Garbing procedure, if different than standard procedure	N/A		9.1
276.12	Container(s)	Yes		9.1
276.13	Reference source of the BUD assignment and storage conditions	Yes		9.1

	Records for Preparation with Minor Deviations/Compounding:			9.2
277.00	Does the record for preparation with minor deviation or compounding includes at a minimum, as applicable, the following?	Yes		9.2
277.01	Name of the radiopharmaceutical	Yes		9.2
277.02	Physical form (eg capsule or solution)	Yes		9.2
277.03	Name and quantity of ingredients including calibration time for radioactive ingredients (eg, 100 mCi Tc 99m sodium pertechnetate @ 1300)	Yes		9.2
277.04	Total volume	Yes		9.2
277.05	Reference to the MFR	Yes		9.2
277.06	Any deviation from the MFR, if applicable	N/A		9.2
277.07	Name of vendor or manufacturer, lot numbers, and expiration dates of all ingredients and components	Yes		9.2
277.08	Name of the person who prepared and name of the supervising personnel (eg, ANP)	Yes		9.2
277.09	Date and time of preparation	Yes		9.2
277.10	Assigned internal identification number (eg, lot number)	Yes		9.2
277.11	Unique reference [eg, prescription, order number(s)]	Yes		9.2
277.12	Assigned BUD and storage requirements	Yes		9.2
277.13	Documentation of QC results	Yes		9.2

Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Preparation			10
278.00	The individual responsible for preparing the radiopharmaceutical(s) ensures that the final preparation complies with quality and purity specifications throughout the assigned BUD.	Yes		10
279.00	Do the quality and purity specifications include, as appropriate for the preparation, the following?	Yes		10
279.01	Radionuclidic purity	Yes		10
279.02	Radiochemical purity	Yes		10
279.03	Chemical purity	Yes		10
279.04	Physical and chemical properties	Yes		10
	Preparation Following Manufacturer Instructions			10.1
	Nonsterile Preparations			10.1
280.00	For nonsterile preparations, manufacturer preparation instructions are followed (eg, I-131 NaI capsules or solution), taking into account appropriate radiation safety considerations and environmental controls, if applicable (eg, negative air pressure area, chemical fume hood, activated charcoal filters when handling a potentially volatile radionuclide).	N/A		10.1
281.00	*Recommendation: The area is cleaned and uncluttered to ensure the overall integrity and quality of the prepared radiopharmaceutical(s).*	N/A		10.1
282.00	*Recommendation: There is a documented process for activities (eg, cleaning) between the preparation cycles of different nonsterile products, to decrease the likelihood of contamination from other prepared products.*	N/A		10.1

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Sterile Preparations			10.1
283.00	For sterile preparations (including intravascular devices), manufacturer preparation instructions are followed, taking into account appropriate radiation safety considerations, appropriate environmental controls, and aseptic handling practices to maintain sterility.	Yes		10.1
284.00	The minimum environmental standard for the preparation of sterile radiopharmaceuticals beyond immediate-use is within an ISO Classified area or device.	Yes		10.1
	Preparation with Minor Deviations			10.2
285.00	In some cases, radiopharmaceuticals are prepared with minor deviations from manufacturer instructions that are necessary to accommodate circumstances not contemplated in the FDA-approved labeling.	Yes		10.2
285.01	Deviations from manufacturer preparation instructions for radiopharmaceuticals maintain the same ingredients but may differ in their proportions.	Yes		10.2
286.00	The minor deviations utilized require appropriate in-house QC testing, designed to validate the radiochemical purity of the product for the entirety of the BUD or are supported by appropriate peer-reviewed publications.	Yes	The pharmacy uses in-house QC testing.	10.2
287.00	Do the pharmacy radiopharmaceutical preparations with minor deviations include all of the following when applicable?	Yes		10.2
287.01	Altering the quantity of radioactivity or volume added to the vial	Yes		10.2
287.02	Changes in step-by-step operations (eg, dilute Tc-99m sodium pertechnetate after rather than before addition to the vial)	N/A		10.2
287.03	Using alternative devices or equipment (eg, a heating block rather than a hot water bath, using a different sized needle, different shielding materials)	Yes		10.2
287.04	Using QC test methods other than those described in the product labeling (eg, radiochemical purity)	N/A		10.2
287.05	Filtering Tc-99m sulfur colloid	Yes		10.2
287.06	Other, (if so, describe in the notes)	N/A		10.2

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Preparation of Radiolabeled Blood Components		***Note to Inspector:*** *Handling blood and radiolabeling of blood components requires special attention to biological risks and need to be handled with standard precautions using aseptic technique to prevent the introduction of new microorganisms into the preparation that will be administered.*	10.3
288.00	The preparation BUD does not exceed 6 hours after the blood sample is obtained from the patient or blood bank.	Yes		10.3
289.00	Equipment and supplies are never shared with other activities unless they are first thoroughly cleaned and disinfected.	Yes		10.3
290.00	Do special precautions when radiolabeling of blood components for non-immediate use include the following?	Yes		10.3
290.01	There is complete physical separation (either fixed or non-fixed wall) of areas where blood products are handled from areas where non-blood products are handled. An ISO Class 5 BSC located in an ISO Class 7 buffer area is required for blood-labeling processes. If more than one ISO Class 5 PEC is located within the ISO Class 7 buffer area, policies and SOPs are in place to include certification that the SEC meets conditions of air quality at maximum occupancy under dynamic operating conditions.	Yes		10.3
290.02	One radiolabeling procedure per PEC at a time. Blood products from more than one patient are never manipulated at the same workstation at the same time. Each area has dedicated supplies, equipment, and waste disposal to eliminate sharing of these items or overlap in pathways.	Yes		10.3
290.03	Thorough cleaning and disinfection of the ISO Class 5 BSC and all reusable equipment within, occurs prior to starting another blood component radiolabeling procedure.	Yes		10.3
290.04	If a dedicated dose calibrator is not available, then a means of preventing the blood container(s) from contaminating the dose calibrator is used or the dose calibrator dipper and liner is cleaned and disinfected following the radio assay.	N/A		10.3

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
290.05	Centrifuge is located within the ISO Class 7 buffer area that is dedicated for blood component radiolabeling processes.	Yes	Each BSC has an individual centrifuge.	10.3
290.06	Dedicated (per each radiolabeling procedure) consumable products (eg, 0.9% sodium chloride injection, diluent, tubes, syringes, and other supplies) necessary for each individual patient radiolabeling procedure.	Yes		10.3
290.07	All tubes and syringes in contact with the patient's blood components are clearly labeled with the patient's name and at least one additional identifier (eg, date of birth, medical record number, barcode).	Yes	The labels include the patient's name and a "tracking" number that is a barcode.	10.3
290.08	Dedicated syringe shields and vial shields.	Yes		10.3
290.09	Any garb that enters the ISO Class 5 BSC is removed and replaced before handling anything else not related to performing this procedure.	Yes		10.3
290.10	Removal of all disposable items from the ISO Class 5 BSC is utilized in each radiolabeling procedure.	Yes		10.3
290.11	Cleaning and disinfection of all reusable equipment and components (eg, BSC, centrifuge, dose calibrator, syringe shields, vial shields, syringe transport shields and delivery cases) is done after each radiolabeling procedure prior to any further use. Policies and SOPs address cleaning and disinfection processes including the use of an EPA-registered (or equivalent) one-step disinfectant cleaner with activity against blood-borne pathogens followed by sterile 70% IPA. Sterile 70% IPA alone is not sufficient.	Yes		10.3
290.12	After the completion of blood radiolabeling procedures, 4.5 Hand Hygiene and Garbing requirements for Buffer Areas and segregated Radiopharmaceutical Processing Area are followed.	Yes		10.3

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Preparation of Radiolabeled Red Blood Cells for Immediate Use			10.4
291.00	Is In vitro red blood cell labeling prepared with the following conditions?	N/A		10.4
291.01	A dedicated space for blood handling is designated through the entirety of the blood radiolabeling process. This area is free from clutter and not used for any other radiopharmaceutical preparation or handling until the completion of cleaning and disinfection.	N/A		10.4
291.02	Only one radiolabeling procedure is performed at a time or there are documented processes that maintain the integrity of samples and environment.	N/A		10.4
291.03	Dedicated equipment is used for blood radiolabeling procedure (eg, L-block, syringe shield, vial shield, forceps, needle recapper).	N/A		10.4
291.04	If a dedicated dose calibrator is not available, then a means of preventing the blood container(s) from contaminating the dose calibrator or a cleaning and disinfecting procedure with an appropriate product is used to decontaminate the dipper and liner of the dose calibrator following the radio assay	N/A		10.4
291.05	A cleaning and disinfecting procedure with an appropriate agent(s) is used to decontaminate the area and equipment prior to and after the radiolabeling is complete and all disposable components have been discarded	N/A		10.4
291.06	All requirements in 4.4 Hand Hygiene and Garbing for Immediate Use Preparations are followed.	N/A		10.4
291.07	The start time of the preparation begins with the initial container puncture or the exposure of a critical site (eg, syringe tip, needle hub or needle) to ambient air, whichever is first.	N/A		10.4
291.08	The compounded product has a BUD of 1 hour	N/A		10.4

Verified Pharmacy Program® Inspection Form

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Compounding		***Note to Inspector:*** *The combining, mixing, pooling, or otherwise altering (excluding preparation with minor deviations) of a conventionally manufactured radiopharmaceutical or synthesizing/formulating a radiopharmaceutical from bulk drug substances and radionuclides.*	11
292.00	Each compounding activity is based on a pre-established written procedure and includes maintenance of compounding records.	Yes		11
292.01	The compounding record provides traceability for components and person(s) involved.	Yes		11
293.00	All sterile compounding, using aseptic technique, is performed in an ISO 5 PEC. Compounding employees are using appropriate aseptic technique. May require inspector to garb and enter clean/buffer room. Pay attention to first air, entry and exit of materials in ISO Class 5 PEC, appropriate frequent sanitization of gloves, appropriate cleaning and cleanliness of the direct compounding area (DCA). ***When applicable, Compounding MUST be observed***, *if compounding is not being performed at the time of survey mark item as "No".*	Yes		11
293.01	If compounding is not being performed at the time of survey, ask that a compounding pharmacist or technician prepare a compound for you to observe the compounding process. *If the pharmacy staff refuses or is unable to perform compounding for you to observe, document on the "**Denial of Authorization**" form. List individual who signs the Denial of Authorization.*			11
294.00	Compounding is not be performed for any radiopharmaceutical(s) that has been withdrawn from the market because of safety or lack of effectiveness, unless part of an institutional review board approved investigational study.	Yes		11
295.00	Radiopharmaceuticals that are essentially copies of marketed FDA-approved radiopharmaceuticals are not be compounded unless there is a change that produces a clinical difference for an identified individual patient, as determined by a prescriber.	N/A	The pharmacy does not compound any essential copies.	11

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Compounding Nonsterile Radiopharmaceuticals		***Note to Inspector:*** *Compounding nonsterile radiopharmaceuticals is the combining, mixing, diluting, pooling, reconstituting or otherwise altering a drug or bulk drug substance other than as provided by the manufacturer's package insert to create a nonsterile radiopharmaceutical.*	11.1
296.00	Areas designated for nonsterile compounding are cleaned, uncluttered and separated from areas designated for sterile radiopharmaceuticals.	N/A		11.1
297.00	*Recommendation: Compounding takes into account RAM licensing requirements for appropriate radiation safety considerations and utilize appropriate environmental controls, if applicable.*	N/A		11.1
298.00	The placement of equipment and materials are designed to prevent cross-contamination.	N/A		11.1
299.00	When feasible, disposable material is used to reduce the chance of cross-contamination.	N/A		11.1
300.00	Each compound has a unique MFR.	N/A		11.1
301.00	The preparation information is documented on a compounding record.	N/A		11.1
302.00	The MFR details the selection of all components.	N/A		11.1
303.00	**The ingredients obtained from sources in this preferential order:** FDA-approved product; FDA-registered facility; and lastly, if the ingredients for the compound are not available from either of these two sources, the MFR details the selection of a material that is suitable for the intended use.	N/A		11.1

Verified Pharmacy Program® Inspection Form

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
304.00	The MFR establishes the identity, strength, purity, and quality of the ingredients by validated means (eg, CoA).	N/A		11.1
305.00	Requirements for nonsterile oral meal components are limited to common food grade description and are not required to establish identity by validated means.	N/A		11.1
306.00	A BUD for the compounded radiopharmaceutical is validated, taking into account the stability of the ingredients, any intermediate containers, the final container, and the storage conditions.	N/A		11.1
306.01	A BUD cannot be extended past the labeled expiration date of any component in the compound.	N/A		11.1
306.02	If the compounded radiopharmaceutical(s) includes components from other preparations or preparations with minor deviations, the BUD of the final compounded radiopharmaceutical does not exceed the shortest remaining BUD of any of those components.	N/A		11.1
	Sterile Compounding		***Note to Inspector**: Kit-splitting (also referred to as "fractionation") may be used to meet patient need.*	11.2
307.00	Do personnel responsible for compounding consider all possible interactions between the components, such as altered chemical stability, radiochemical stability, solubility, or other parameters (eg, osmolality) related to changes in pH, excipients, or other factors, in determining an appropriate BUD?	N/A		11.2
308.00	Do the compounding activities involve the addition of a conventionally manufactured drug product (eg, Ascorbic Acid Injection, Lidocaine Hydrochloride Injection, Sodium Bicarbonate Injection) approved by the appropriate regulatory agency to a radiopharmaceutical?	N/A		11.2
309.00	Does the pharmacy split conventionally marketed kits?	N/A		11.2

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
310.00	Do personnel responsible consider all possible interactions of kit components with these other containers (eg, container walls, closures), as well as possible alterations in stability (eg, physical stability, chemical stability) that may affect radiolabeling yields or performance parameters, when determining an appropriate BUD?	N/A		11.2
310.01	Systematic QC testing is performed to validate the appropriateness of a particular BUD.	N/A		11.2
	Sterile Compounding Using Nonsterile Drug Substance or Components			11.3
311.00	Some sterile compounding activities involve the use of materials other than commercially marketed products, such as drug substances and/or radionuclides.	N/A		11.3
311.01	If one or more materials or components are not certified to be sterile and pyrogen-free, a sterilization procedure (eg, filtration with bubble point testing) and testing described in <85> is performed. Record calibration date of the bubble test pressure gauge, as applicable.	N/A		11.3
312.00	The designated person for compounding is responsible for ensuring that the final preparation complies with pre-established standards or acceptance criteria for identity, quality, and purity.	N/A		11.3
313.00	The designated person considers all possible interactions between the components, such as altered chemical stability, radiochemical stability, solubility, or other parameters (eg, osmolality) related to changes in pH, excipients, or other factors, in determining an appropriate BUD.	N/A		11.3
313.01	Testing to validate the appropriateness of a particular BUD may be required.	N/A		11.3
314.00	If compounding involves a bulk drug substance, the radiopharmaceutical complies with standards of an applicable USP or NF monograph, if one exists, or be a component of an approved drug product.	N/A		11.3

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
314.01	A bulk drug substance includes a radionuclide, a ligand, or other substance, such as a precursor that becomes an active ingredient in the final radiopharmaceutical.	N/A		11.3
315.00	Each bulk drug substance is manufactured by drug establishments registered with FDA and be accompanied by a valid CoA or equivalent testing procedures.	N/A		11.3
316.00	If compounding involves excipients or other inactive ingredients, the excipients or other inactive ingredients comply with standards of an applicable USP or NF monograph, if one exists.	N/A		11.3
317.00	It is also acceptable that any excipients or other inactive ingredients be approved products, manufactured by a drug establishment registered with the FDA.	N/A		11.3
	Dispensing and Radio assay		*Note to Inspector: Dispensing refers to the manipulations necessary to transfer the prescribed or ordered amount of radiopharmaceutical into the final container (eg, syringe or vial).*	12.1
318.00	Labeling of the final patient-ready dose or ordered amount of a radiopharmaceutical is also a component of the dispensing process.	Yes		12.1
319.00	Except for an unopened manufacturer container, the final dose or ordered amount is radio assayed (ie, in a dose calibrator).	Yes		12.1
320.00	*Recommendation: The measured activity is mathematically corrected for radioactive decay to the time of scheduled administration (calibration time).*	Yes		12.1
321.00	The activity at calibration time is always be within federal, state, and local variance limits.	Yes		12.1

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Labeling			12.2
322.00	*Recommendation: All personnel distributing and/or dispensing radiopharmaceuticals verify that any labeling is in compliance with regulatory agencies.*	Yes		12.2
323.00	Is the inner container (eg syringe, vial) labeled with all of the following?	Yes		12.2
323.01	Standard radiation symbol	Yes		12.2
323.02	The words "Caution—Radioactive Material"	Yes		12.2
323.03	For all therapeutic and blood-products, the patient name/identifier	Yes		12.2
323.04	Radionuclide and chemical form (generic name)	Yes		12.2
323.05	Radioactivity at the date and time of calibration	Yes		12.2
324.00	Is the outer shielding (eg, syringe or vial shielding) labeled with all the following?	Yes		12.2
324.01	Standard radiation symbol	Yes		12.2
324.02	The words "Caution—Radioactive Material"	Yes		12.2
324.03	For all therapeutic and blood-products, the patient name/identifier	Yes		12.2
324.04	The radionuclide and chemical form (generic name)	Yes		12.2

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
324.05	Radioactivity with units at time of calibration and the calibration time	Yes		12.2
324.06	Volume or number of units (eg, 2 capsules), as applicable	Yes		12.2
324.07	Product expiration or BUD, as applicable, and any special storage and handling requirements for non-immediate use (eg, refrigeration, resuspension)	Yes		12.2
324.08	Route of administration	Yes		12.2
	Direct Infusion Systems			12.3
325.00	Do the operations of the direct infusion systems follow the "Instructions for Use" in the device labeling?	N/A		12.3
326.00	Are each of the following parameters considered by the operator of the system?	N/A		12.3
326.01	Setup attachment or needle-puncture should be performed in a defined environment	N/A		12.3
326.02	Aseptic handling in ambient air with a maximum BUD of 10 hours is allowed for these direct infusion systems	N/A		12.3
326.03	The 0.9% sodium chloride bag attached to the device may only be punctured once and may be used for no more than 10 hours. The bag is labeled with the date and time of puncture and the BUD	N/A		12.3
326.04	Any nonsterile parts of the device that may encounter the septum of the radiopharmaceutical vial is disinfected with sterile 70% IPA prior to puncturing the vial with the needle	N/A		12.3

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
326.05	The septum of any vial and the ports of any diluent bag is wiped with sterile 70% IPA prior to puncturing	N/A		12.3
326.06	When puncturing the vial in ambient air, it is only punctured once	N/A		12.3
326.07	If there are problems with the infusion device, no sterile container(s) associated with the system is repunctured or transferred to a PEC for further manipulations and the container, with contents, is discarded	N/A		12.3
	Transporting Generators Between Facilities			12.4
327.00	Are the following standards followed if transporting generators between facilities?	N/A		12.4
327.01	The generator needle and/or ports are capped in ISO Class 8 air or better with sterile protectors	N/A		12.4
327.02	The generator is packaged and transported in a manner to maintain the integrity and sterility of the generator system	N/A		12.4
	Repackaging			13
328.00	If the facility repackages, are the following applicable?	Yes		13
328.01	Removes conventionally manufactured radiopharmaceutical(s) from the container in which it was distributed by the original manufacturer and placing it into a different container without further manipulation of the product.	Yes		13

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
328.02	Places the contents of multiple containers of the same finished drug product into one container, as long as the container does not include other ingredients	Yes		13
329.00	Does the facility repackage nonsterile radiopharmaceuticals (eg, I-131 sodium iodide oral capsules)?	N/A		13
330.00	Does the facility repackage sterile radiopharmaceuticals (eg, thallous chloride Tl 201 injection)?	Yes		13
331.00	Unopened manufacturer dosage units (eg, capsules, Xe-133 vials) are not radioassayed.	Yes		13
332.00	The repackaged radiopharmaceutical is radioassayed (ie, in a dose calibrator), if it is not an unopened manufacturer dosage unit.	Yes		13
333.00	*Recommendation: The inner container is labeled with all of the following:*	Yes		13
333.01	*Standard radiation symbol*	Yes		13
333.02	*The words "Caution—Radioactive Material"*	Yes		13
333.03	*The radionuclide and chemical form (generic name)*	Yes		13
333.04	*Radioactivity with units at time of calibration and the calibration time*	Yes		13
334.00	*Recommendation: The outer container is labeled with all of the following:*	Yes		13
334.01	*Standard radiation symbol*	Yes		13
334.02	*The words "Caution—Radioactive Material"*	Yes		13
334.03	*The radionuclide and chemical form (generic name)*	Yes		13
334.04	*Radioactivity with units at time of calibration and the calibration time*	Yes		13

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
334.05	*Volume, or number of units (eg, capsules), as applicable*	Yes		13
334.06	*Product expiration or BUD, as applicable*	Yes		13
334.07	*Special storage and handling instructions*	N/A		13
	Quality Assurance and Quality Control			14
335.00	QA and QC programs are formally established and documented in SOPs that ensure that all aspects of the handling of radiopharmaceuticals are conducted in accordance with this chapter and applicable federal, state, and local laws and regulations.	Yes		14
336.00	A designated person ensures that the facility has formal, written QA and QC programs. List this person in the notes.	Yes	Kristin Anson, Quality Manager (Corporate).	14
337.00	Do QA and QC programs establish a system which include of all of the following?	Yes		14
337.01	Adherence to procedures	Yes		14
337.02	Prevention and detection of errors and other quality problems	Yes		14
337.03	Evaluation of complaints and adverse events	Yes		14
337.05	Appropriate investigations and corrective actions	Yes		14
338.00	The SOPs describe the roles, duties, and training of the personnel responsible for each aspect of the QA program.	Yes		14

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
339.00	The overall QA and QC program is reviewed at least once every 12 months by the designated person. List last date of review in notes.	Yes	The PIC is performing a review at this time, therefore the last review is ongoing in May of 2024.	14
340.00	The results of the review are documented, and appropriate corrective action taken, if needed.	Yes		14
	Notification About and Recall of Out-of-Specification Dispensed Radiopharmaceuticals			14.1
341.00	If a radiopharmaceutical is dispensed or administered before the results of release testing are known, does the facility have all of the following SOPs in place?	N/A	All quality control testing is complete before doses are released.	14.1
341.01	Immediately notify the prescriber of a failure of specifications with the potential to cause patient harm (eg, sterility, strength, purity, bacterial endotoxin, or other quality attributes)	N/A		14.1
341.02	Determine whether a recall is necessary	N/A		14.1
342.00	Does the SOP for recall of out-of-specification dispensed radiopharmaceuticals contain all of the following procedures?	N/A		14.1
342.01	Determine the severity of the problem and the urgency for the implementation and completion of the recall	N/A		14.1
342.02	Determine the distribution of any affected radiopharmaceutical, including the date and quantity	N/A		14.1
342.03	Identify patients who have received the radiopharmaceutical	N/A		14.1

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
342.04	Outline the disposition and reconciliation of the recalled radiopharmaceutical	N/A		14.1
343.00	Does the facility document the implementation of the recall procedures?	N/A		14.1
344.00	Is the recall is reported to appropriate regulatory bodies as required by laws and regulations of the applicable regulatory jurisdiction (eg, state board of pharmacy, state health department)?	N/A		14.1
	Complaint Handling			14.2
345.00	Has the nuclear pharmacy developed and implemented SOPs for handling complaints? Note: Complaints may include concerns or reports on the quality and container labeling of, or possible adverse reactions to, a specific radiopharmaceutical.	Yes		14.2
346.00	Does the designated person review all complaints to determine if they indicate potential quality problems with the radiopharmaceutical?	Yes		14.2
346.01	If a complaint indicates potential quality issues with radiopharmaceuticals, is an investigation into the potential cause of the issue completed?	Yes		14.2
346.02	Does the investigation consider whether the quality problem could extend to other radiopharmaceuticals?	Yes		14.2
346.03	Is corrective action, if necessary, implemented for all potentially affected radiopharmaceuticals?	Yes		14.2
346.04	Does the investigation consider whether to initiate a recall of potentially affected radiopharmaceuticals and whether to cease sterile compounding until all underlying problems have been identified and corrected?	Yes		14.2

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
347.00	Is a readily retrievable record (written or electronic) of each complaint kept by the facility, regardless of the source of the complaint (eg, e-mail, telephone, mail)?	Yes		14.2
348.00	Does the record contain all of the following?	Yes		14.2
348.01	The name of the complainant	Yes		14.2
348.02	The date the complaint was received	Yes		14.2
348.03	The nature of the complaint	Yes		14.2
348.04	The response to the complaint	Yes		14.2
348.05	If known, the name and strength of the radiopharmaceutical and the assigned internal identification number (eg, prescription, order, or lot number).	Yes		14.2
349.00	Does the record also include the findings of any investigation and any follow-up?	Yes		14.2
350.00	Are records of complaints easily retrievable for review and evaluation for possible trends?	Yes	Records of complaints are not maintained onsite, the PIC would need to reach out to corporate quality team for review of previous complaints to evaluate for possible trends.	14.2
351.00	Are records retained in accordance with the record keeping requirements?	Yes		14.2
352.00	Is a radiopharmaceutical that is returned in connection with a complaint quarantined until it is destroyed after completion of the investigation and in accordance with applicable jurisdictional laws and regulations?	Yes		14.2

NABP developed this inspection form for sole use by NABP, boards of pharmacy, government agencies that regulate drug distributors, and for internal use by the named facility participating in the VPP. Disclosure of this form to a third party or use of the form by a third party is strictly prohibited without NABP's prior written authorization.

National Association of Boards of Pharmacy®
Verified Pharmacy Program® Inspection Form

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS USA INC
e-Profile ID: 1285742
Inspection Date: 5/22/2024 & 5/24/2024

		Observations	Notes	USP Reference(s)
	Adverse Event Reporting			14.3
353.00	Are adverse events potentially associated with the quality of radiopharmaceuticals reported in accordance with the facility's SOPs and all applicable jurisdictional laws and regulations?	Yes		14.3
354.00	*Recommendation: Adverse events potentially associated with the quality of the radiopharmaceutical preparation are reported to the applicable jurisdictional regulatory body (eg, state boards of pharmacy, state health departments, FDA's MedWatch program for human drugs).*	Yes	The PIC stated it would be reported to the manufacturer and would report to FDA MedWatch if all customers who received doses from the vial had a similar complaint.	14.3

The information and comments obtained are based on USP General Chapter <825> Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging
An inspection against current Good Manufacturing Practices (cGMPs) was not conducted. There may be some overlap in concepts.

Acronym	Definition
ACPH	Air changes per hour
ALARA	As low as reasonably achievable
ANDA	Abbreviated new drug application
ANP	Authorized nuclear pharmacist
AU	Authorized user
BLA	Biologics license application
BSC	Biological safety cabinet
BUD	Beyond-use date
CETA	Controlled Environment Testing Association
cfu	Colony-forming unit
CoA	Certificate of analysis
DPA	Direct processing area
EPA	Environmental Protection Agency
FDA	Food and Drug Administration
FDCA	Food, Drug, and Cosmetic Act
HEPA	High-efficiency particulate air
HVAC	Heating, ventilation, and air conditioning
IND	Investigational new drug
IPA	Isopropyl alcohol
ISO	International Organization for Standardization
LAFW	Laminar airflow workbench
MAA	Macroaggregated albumin
MEA	Malt extract agar
MFR	Master Formulation Record
NDA	New drug application
NRC	Nuclear Regulatory Commission
PEC	Primary engineering control
PET	Positron emission tomography
RAM	Radioactive material
RDRC	Radioactive drug research committee
RH	Relative humidity
SDA	Sabouraud dextrose agar
SEC	Secondary engineering control
SOP	Standard operating procedure
SRPA	Segregated radiopharmaceutical processing area
TSA	Trypticase soy agar

Term	Definition
Dispense/dispensing	Pursuant to a patient specific prescription, labeled with patient name at the pharmacy
Distribute/distributing	Delivered/sent to a practitioner or health care facility for office use or further dispensing, no prescription, not labeled with a patient name at the pharmacy.
Type of Practice: Central Fill/Processing/ Shared Services	Where part of the prescription processing and dispensing process occurs at another location
Type of Practice: Closed Door	Such as a mail order facility, prescriptions cannot be picked up at the facility, all are sent
Type of Practice: HMO/PBM only	Limited to only the beneficiaries of the specific insurance program - no cash patients
Type of Practice: Institutional	Such as a hospital or jail
Type of Practice: Internet Pharmacy	Pharmacy advertises on the internet, patients fill/refill prescriptions and revise patient profile information on-line.
Type of Practice: Investigational Drugs, Clinical Trials or Research	Approved to handle investigational drugs
Type of Practice: Long Term Care	Nursing Home pharmacy
Type of Practice: Manufacturer	Registered with the FDA as a manufacturer
Type of Practice: Open to the Public	Patients are able to come into the pharmacy to pick up filled prescriptions and interact with a pharmacist

NABP developed this inspection form for sole use by NABP, boards of pharmacy, government agencies that regulate drug distributors, and for internal use by the named facility participating in the VPP. Disclosure of this form to a third party or use of the form by a third party is strictly prohibited without NABP's prior written authorization.

Type of Practice: Outsourcing Facility	Registered with the FDA as an Outsourcing Facility
Type of Practice: Provides Office Use	Distributes prescription and/or compounded preparations to providers for administration or resale. No prescription, not labeled with a patient name by the pharmacy.
Type of Practice: Specialty Pharmacy	Business is primarily with specialty drugs and works with specific disease states
Type of Practice: Telepharmacy	Pharmacy oversees a remote location staffed by a technician supervised via audio/visual system by a pharmacist at this facility.
Type of Practice: Traditional retail	Also known as Community Pharmacy.
Type of Practice: Veterinary Pharmacy	Pharmacy business is primarily or exclusively for animals.
Type of Practice: Wholesale Distributor	Pharmacy is licensed or registered as a wholesale distributor
Glossary	
Administration:	The direct and immediate application of a radiopharmaceutical to a patient by injecting, infusing, ingesting, or otherwise providing a radiopharmaceutical in its final form.
Airlock:	A space with interlocked doors, constructed to maintain air pressure control when items move between two adjoining areas.
Ante-room:	An ISO Class 8 or cleaner area with fixed walls and doors where personnel hand hygiene, garbing procedures, and other activities that generate high particulate levels are performed. The ante-room is the transition area between the unclassified area in a facility and the classified buffer area.
Aseptic processing or preparation:	A process by which separate, sterile components (eg, drugs, containers, or closures) are brought together under conditions that maintain their sterility.
Aseptic technique:	Methods utilized during the processing of radiopharmaceuticals to keep objects and areas free of microorganisms and thereby minimize infection risk to the patient. It is accomplished through practices that maintain the microbe count at a nearly irreducible number.
As low as (is) reasonably achievable (ALARA):	The effort to maintain exposures to ionizing radiation as far below the dose limits as practical. These efforts should be consistent with the purpose for which the licensed activity is undertaken, in relation to utilization of licensed materials in the public interest. Limiting exposure time, using adequate shielding, and maintaining the most distance possible from all radioactive sources (i.e., time, distance, shielding) are the basic principles for successfully following ALARA guidelines.
Authorized nuclear pharmacist (ANP):	A pharmacist recognized by the U.S. Nuclear Regulatory Commission or an Agreement State agency as having met training and experience requirements for the practice of nuclear pharmacy.
Authorized user (AU):	A physician recognized by the U.S. Nuclear Regulatory Commission or an Agreement State agency as meeting training and experience requirements for specified medical uses of radioactive material.
Beyond-use date (BUD):	The assigned date and time beyond which the radiopharmaceutical must not be administered.
Biological safety cabinet (BSC) Class II:	A ventilated cabinet with an open front and inward and downward unidirectional HEPA-filtered airflow and HEPA-filtered exhaust. The BSC is designed to provide worker protection from exposure to biohazardous material and to provide an ISO Class 5 or better environment for preparing sterile radiopharmaceuticals.
Blood components:	Any constituent of blood that is separated by physical or mechanical means (eg, red cells, white cells, platelets)
Buffer area:	An ISO Class 8 or cleaner area with fixed walls and doors where PEC(s) that generate and maintain an ISO Class 5 environment are physically located. The buffer area may only be accessed through the ante-room.
Chemical purity:	The fraction of the total chemical species present in the radiopharmaceutical as the specified chemical component(s). A chemical impurity is the presence of an unwanted non-radioactive chemical.
Classified area:	An area that maintains an air quality classification based on the ISO guidelines (i.e., ante-room, buffer area). See ISO class.
Cleaning agent:	A material for the removal of residues (eg, dirt, debris, microbes, and residual drugs or chemicals) from surfaces.
Compounding:	The combining, mixing, pooling, or otherwise altering (excluding preparation with minor deviations) of a conventionally manufactured radiopharmaceutical or synthesizing/formulating a radiopharmaceutical from bulk drug substances and radionuclides. See Preparation with minor deviations.
Container–closure system:	The packaging components that contain or come in contact with the radiopharmaceutical and maintain the integrity of the radiopharmaceutical contained within. Examples include (but are not limited to) vials, tubes and syringes.
Critical site:	A location that includes any component or fluid pathway surface (eg, vial septa, injection ports) or openings (eg, needle hubs) that, when exposed is at risk for contamination by direct contact with air (eg, ambient area or HEPA-filtered), moisture (eg, oral and mucosal secretions), or touch.
Designated person:	One or more individuals assigned to be responsible and accountable for the performance and operation of the radiopharmaceutical processing facility and for personnel who prepare, compound, dispense, and repackage radiopharmaceuticals.
Direct infusion system:	An FDA-cleared medical device used to dispense and/or administer radiopharmaceuticals to multiple patients. The standards of this chapter pertain to devices with ambient air that lack and ISO Class 5 environment.
Direct processing area (DPA):	An area within the ISO Class 5 PEC where critical sites are exposed to unidirectional HEPA-filtered air, also known as first air.
Disinfectant:	A chemical or physical agent used on inanimate surfaces and objects to destroy microbiological contamination (eg, fungi, viruses, and bacteria) when used in the appropriate concentrations and for the appropriate contact times. Sporicidal disinfectant agents are considered a special class of disinfectants that also are effective against bacterial endospores and fungal spores.

Copyright © March 2024 National Association of Boards of Pharmacy® (NABP®). All rights reserved. NABP developed this inspection form for sole use by NABP, boards of pharmacy, government agencies that regulate drug distributors, and for internal use by the named facility participating in the VPP. Disclosure of this form to a third party or use of the form by a third party is strictly prohibited without NABP's prior written authorization.

Dispensing:	The manipulation or labeling of a radiopharmaceutical to render it in its final form for administration, typically obtained from a single-dose or multiple-dose container (eg, withdrawing a volume of finished product or preparation from a vial into a syringe). Dispensing is performed under the supervision of a physician or pharmacist and for radiopharmaceuticals includes dilution with an appropriate diluent or adjusting the activity in an individual dosage.
Dose pooling:	The combining of doses from two or more syringes to meet one patient's need, also see "repackaging".
Dose splitting:	The splitting of a patient-ready unit dose for use with more than one patient.
Dynamic operating conditions:	Conditions in the SRPA or classified area in which operating personnel are present and performing actual or simulated activities. The PEC should contain equipment and materials regularly used for radiopharmaceutical processing (eg, low-lint absorbent pads, dose calibrator, syringe shields).
Expiration date:	For conventionally manufactured radiopharmaceuticals, the specified date (and time) beyond which the product must not be administered. The expiration date is determined by the manufacturer.
First air:	The air exiting the HEPA filter in a unidirectional air stream.
Garb:	Gloves, gowns, shoe covers, head (covers ears and all hair) and facial hair covers, masks, and other items designed to reduce particle shedding from personnel and minimize the risk of microbiological contamination to radiopharmaceuticals.
High efficiency particulate air (HEPA) filtration:	Using a tested and certified air filter designed to remove 99.97% of airborne particles measuring 0.3-micron or greater in diameter from the air passing through it.
Hot-cell:	A device used for the shielding and containment of radioactive materials. The shielding material(s) (eg, lead) is generally incorporated into the structure of the unit itself. Radiopharmaceutical personnel carry out the majority of the tasks within the hot-cell from the exterior of the unit. This is accomplished by the use of remote manipulation systems (eg, manipulator arms, automated dispensing system) of various designs. Numerous air quality configurations of the hot-cell may exist, including integrated HEPA filtration systems to render all or a specified portion (DPA) of the device capable of certifying to a controlled ISO Class 5 environment. In other situations, the hot-cell offers only radiation protection and a laminar flow PEC, capable of achieving an ISO Class 5 environment, is placed within the enclosure to allow for safe aseptic manipulations. A hot-cell may also be referred to by other designations (eg, shielded isolator with laminar flow, PET dispensing station, manipulator hot-cell, shielded isolators for dispensing, radiopharmaceutical dispensing isolator).
Hot lab:	Unclassified radiopharmaceutical processing area located within a hospital or clinical site that is only appropriate for immediate use radiopharmaceuticals if there is not an ISO 5 PEC within SRPA located within the area.
Immediate use:	A preparation (including preparations with minor deviations) and/or dispensing of a sterile radiopharmaceutical that is limited for a single patient. Only sterile conventionally manufactured drug products (eg, NDA, ANDA) or drugs produced under an approved IND or RDRC protocol may be used. Administration must begin within 1 hour of the first container puncture or exposure of any critical site involved (eg, syringe tip, needle hub or needle) to ambient air, whichever is first.
Individual dose (unit dose):	A radiopharmaceutical in its final form ready for administration (eg, capsule, sterile solution in a syringe) consisting of the amount (dose) prescribed, ordered, or other intended for an individual patient or research subject.
Inverse square law:	The specified physical quantity or intensity of a radiation emission is inversely proportional to the square of the distance from the source of the emission.
ISO class:	A quality classification from the International Organization for Standardization based on quantity and size of particles per volume of air.
Kit:	Conventionally manufactured package containing all ingredients required to prepare a radiopharmaceutical with the exception of the radionuclide.
Kit-splitting (fractionation):	The act of dividing the contents of a kit vial and transferring aliquots into other containers for storage and subsequent radiolabeling.
Ligand:	An ion or molecule that incorporates a metal atom to form a coordination complex.
Line of demarcation:	A visible line on the floor that separates the clean and less clean sides of the ante-room.
Low-lint wiper:	A wiper exhibiting few, if any, fibers or other particulates, visible without magnification, which are separate from, or easily removed from, the wiper material in a dry condition.
Master Formulation Record (MFR):	A document or set of documents specifying the starting materials with their quantities and the packaging materials, together with a description of the procedures and precautions required to produce a specified quantity of a finished preparations as well as the processing instructions, including the in-process controls.
Media-fill test:	A simulation used to qualify processes and personnel engaged in sterile radiopharmaceutical processing to ensure that the processes and personnel are able to prepare radiopharmaceuticals without microbiological contamination. Molar mass: The measured mass that is attained from a molar amount of a given substance (eg, element, compound).
Molar mass:	The measured mass that is attained from a molar amount of a given substance (eg, element, compound). It is generally expressed with units such as g/mol and kg/mol.
Multiple-dose container:	A container of a radiopharmaceutical for administration that is designed to contain more than one patient dose of the radiopharmaceutical.

Copyright © March 2024 National Association of Boards of Pharmacy® (NABP®). All rights reserved. NABP developed this inspection form for sole use by NABP, boards of pharmacy, government agencies that regulate drug distributors, and for internal use by the named facility participating in the VPP. Disclosure of this form to a third party or use of the form by a third party is strictly prohibited without NABP's prior written authorization.

Negative-pressure area:	An area that is maintained at lower pressure than the adjacent spaces, and therefore the net airflow is into the area. This area is appropriate for volatile or gaseous radionuclides and radiopharmaceuticals (eg, I-131 NaI, N-13 ammonia) and intended to lend a measure of protection for the radiation workers and the general public.
One-step disinfectant cleaner:	A product with an EPA-registered claim (or equivalent) that it can clean and disinfect a nonporous surface in the presence of light to moderate organic soiling without a separate cleaning step.
Pass-through:	An enclosure with sealed doors on both sides to ensure that both doors are not opened at the same time. The pass-through is positioned between two spaces creating an airlock for the purpose of minimizing particulate transfer while moving materials from one space to another.
Perimeter:	A visible demarcation on the floor that defines the boundaries of the SRPA.
Positive-pressure area:	An area that is maintained at higher pressure than the adjacent spaces, and therefore the net airflow is out of the area.
Preparation:	The act of combining a conventionally manufactured kit with a conventionally manufactured radionuclide following manufacturer's recommended instructions. Mixing, reconstituting, combining, diluting, or repackaging of a radiopharmaceutical, or other such acts, performed in accordance with directions contained in the FDA-approved labeling.
Preparation with minor deviations:	The act of preparing a conventionally manufactured kit with a conventionally manufactured radionuclide with volume, and/or radioactivity, and/or step-by-step deviations from the manufacturers recommended labeling while ensuring that the final preparation maintains appropriate radiochemical and radionuclidic purity for the entirety of the BUD. Examples of minor deviations include, but are not limited to, altering the amount of activity or volume added to the vial, changes in step-by-step operations (eg, dilute Tc-99m solution after, rather than before, addition to the vial, use of a venting needle or filter), using alternative devices or equipment (eg, a heating block rather than a hot water bath), and using alternative radiochemical purity testing methods.
Primary engineering control (PEC):	A device or zone that provides an ISO Class 5 air quality environment for sterile processing.
Pyrogen:	A substance that induces a febrile reaction in a patient.
Quality assurance (QA):	The system of procedures, activities, and oversight that ensures that radiopharmaceutical processing consistently meets quality standards.
Quality control (QC):	The sampling, testing, and documentation of results that, taken together, ensure that specifications have been met before release of the radiopharmaceutical.
Radioactive materials (RAM) license:	A document(s) issued by the US NRC or an Agreement State agency that authorizes various activities involving the use of radioactive materials. These uses can include possession, research and development, distribution, medical use, and other purposes not included in this list. Only those activities specifically authorized are allowed.
Radioassay:	Measurement of the quantity of radioactivity present in a container using a suitable and calibrated instrument, such as a well-type ionization chamber (i.e., dose calibrator).
Radiochemical purity:	The ratio, expressed as a percentage, of the radioactivity of the intended active radiopharmaceutical ingredient to the total radioactivity of all radioactive ingredients and impurities present in the radiopharmaceutical preparation (see Radioactivity <821>).
Radionuclidic purity:	The ratio, expressed as a percentage, of the radioactivity of the intended radionuclide to the total radioactivity of all radionuclides in the radiopharmaceutical preparation (see <821>).
Radiopharmaceutical (radiopharmaceutical preparation/radioactive drug):	(See <821>.) A finished dosage form that contains a radioactive substance in association with one or more other ingredients and that is intended to diagnose, stage a disease, monitor treatment, or provide therapy. A radiopharmaceutical includes any non-radioactive reagent kit or radionuclide generator that is intended to be used in the preparation of any such substance. The terms "radiopharmaceutical" and "radioactive drug" are commonly used interchangeably.
Repackaging:	The act of removing a conventionally manufactured radiopharmaceutical from the container in which it was distributed by the original manufacturer and placing it into a different container without further manipulation of the product. Repackaging also includes the act of placing the contents of multiple containers (eg, vials) of the same finished drug product into one container, as long as the container does not include other ingredients. Radiopharmaceutical manipulation in any other way, including reconstitution, dilution, mixing, or combination with another ingredient, is not considered repackaging.
Restricted area:	Any area to which access is controlled for the protection of individuals from exposures to radiation and radioactive materials.
Secondary engineering control (SEC):	The area where the PEC is placed (eg, a classified area or an SRPA). It incorporates specific design and operational parameters required to minimize the risk of microbial contamination.
Segregated radiopharmaceutical processing area (SRPA):	A designated, unclassified space, area, or room with a defined (by facility procedures) perimeter that contains a PEC. An SRPA is only suitable for radiopharmaceutical preparation (with and without minor deviations), dispensing, and repackaging. If the SRPA is used to elute radionuclide generators it must have ISO Class 8 particle count non-viable particle count air quality.
Shielding:	Barriers of appropriate radiation attenuating material, used for radiopharmaceuticals, to protect the personnel. These barriers can be general in nature (eg, L-block, hot-cell), as to afford protection from a radiation field, or specific to a container used to hold a particular radiopharmaceutical (eg, syringe shield, vial shields, "pigs").
Single-dose container:	A container of a radiopharmaceutical for administration that is designed for use with a single patient as a single administration.
Specific activity:	The radioactivity of a radionuclide per unit mass of the compound involved with the radionuclide (see Radioactivity—Theory and Practice <821>). The units of specific activity involve those for the activity (eg, mCi, MBq, Ci, GBq)and those for the unit of mass (eg, µg, mmol)

NABP developed this inspection form for sole use by NABP, boards of pharmacy, government agencies that regulate drug distributors, and for internal use by the named facility participating in the VPP. Disclosure of this form to a third party or use of the form by a third party is strictly prohibited without NABP's prior written authorization.

Sporicidal agent:	A chemical or physical agent that destroys bacterial and fungal spores when used in sufficient concentration for a specified contact time. It is expected to kill all vegetative microorganisms.
Start of preparation:	Time at which a vial septum is punctured or a component container is opened (eg, removal of cap on a pre-filled syringe), whichever comes first.
Sterility:	The absence of viable microorganisms.
Strength:	The radioactivity concentration of the radiopharmaceutical at the calibration time (see <821>). Strength is expressed as the quantity of radioactivity on a volume basis (eg, mCi/mL or MBq/mL).
Unclassified space:	A space not required to meet any ISO air cleanliness classification.
Unrestricted area:	An area in which a person should not be exposed to radiation levels in excess of 2 millirems in any 1 h from external sources.
Use-by time:	For radiopharmaceuticals prepared from kits, the time period after preparation during which the radiopharmaceutical should be used or administered, as suggested or stated in the manufacturer's prescribing information.

SUMMARY OF UNSATISFACTORY CONDITIONS

	DEFICIENCY	CHECK IF *
1)	The PIC stated there is no formal process for the designated person to evaluate individuals who have a condition that may interfere with their ability to safely compound.	
2)	Based on the records reviewed, the pharmacy missed visual observation of some personnel in 2022 and 2023. All of the personnel have been visually observed in 2024.	
3)	The SOP for the air and surface monitoring program does not include a diagram, but it has a description of locations where personnel should collect a surface sample.	
4)	The PIC has been trained in air sampling. The equipment is only used if the pharmacy has a failure when air sampling is conducted by the third-party vendor every 6 months. The internal personnel have not been trained in surface sampling.	
5)	Monthly surface sampling is conducted after production is completed and not during dynamic conditions. When the third-party vendors provides sampling, it occurs during dynamic conditions.	
6)	The pharmacy contracts with a third-party for viable air sampling every six months during the recertification. It is unknown if the personnel from the third-party vendor follow the manufacturer's instructions. Also, it is unknown if the personnel from the third-party vendor incubate as described in the USP chapter.	
7)	The pharmacy does not have a process to clean the sink, either daily or monthly.	
8)		
9)		
10)		

IMMEDIATE CORRECTIVE ACTION IS REQUIRED (I.E., CONTINUING OPERATION WOULD CONSTITUTE A THREAT TO PUBLIC HEALTH AND WELFARE)

Pharmacy Name:	RLS (USA) Inc.
Pharmacy Address:	1 Naylon Place, Livingston NJ 07039
NABP Business e-Profile ID:	1285742
VPP Inspection Date(s):	5/24/2024
Sharing Acknowledgment:	Yes — By typing "Yes" you acknowledge that all response documentation will be made available to the Boards of Pharmacy and state regulators upon their request

Facility Response to Verified Pharmacy Program® (VPP®) Inspection

Type of Response (Choose from Drop Down)	VPP Inspection Report Page No.	VPP Inspection Report Item No.	Facility Response/Corrective Action/Comments	Estimated Date of Completion For Corrective Action Taken	Attachment Included (Y/N)	Title of Document (Must be indicated at top of document attachment)
Clarification or Further Explanation	Pg 22 of 96	15.02	Policy 6.2 Personnel Hygiene, Qualifications and Training indicates the State Licensed RPh on duty is the designated responsible person for evaluation of personnel who pose a higher risk of contamination to the products and environment and if the individual should be excluded from working in sterile processing areas until their conditions are resolved. SOP 6.2.1 Clean Room Entry indicates that persons with rash, sunburn, weeping sores, conjunctivitis, or an active repiratory infection shall not enter the clean room. These established procedures were not communicated at the time of the inspection.	06/14/2024	Y	Policy 6.2 Personnel Hygiene, Qualifications, and Training; SOP 6.2.1 Clean Room Entry
Clarification or Further Explanation	Pg 27 of 96	44.00	At the end of calendar year 2023, the PIC self-identified the missed visual observations of some personnel during 2022 and 2023. A corrective action was implemented to complete all missed observational assessments as soon as possible. To prevent reoccurance, the PIC implemented a calendar notification system of pending due dates in order to complete these tasks in a timely and compliant manner.	06/14/2024	N	
Updates/New SOPs or P&Ps	Pg 48 of 96	159.00	RLS internal Form 31 EM Sampling Log has been updated to include a keyed diagram to all routine air and surface sample locations.	06/14/2024	Y	Form 31A Livingston In-House Air Monitoring Record; Form 31S Livingston IN-House Surface Monitoring Record
Clarification or Further Explanation	Pg 48 of 96	160.00	For clarification, RLS (USA) does not perform its own routine air sampling. Air sampling is only conducted by RLS staff if out of compliance samples are recovered by the third party provider and after investigation, corrective actions and remediation are complete. The PIC is trained on using the air sampler and has been the only person who has operated the air sampler as a result of an excursion event. At no time has anyone operated an air sampler for environmental monitoring without being trained on proper use. In the event of a future air sample excursion and to ensure retest sampling is conducted in a timely manner, training on SOP 6.3.6 SAS Air Sampler Operations has been assigned to all of staff pharmacists.	6/14/2024	N	

This VPP Inspection response and documentation has been provided directly by the pharmacy in response to its VPP Inspection. The content of this response has not been verified or modified by NABP at this point in time, except to check for completeness of any attachments provided.

Facility Response to Verified Pharmacy Program® (VPP®) Inspection

Type of Response (Choose from Drop Down)	VPP Inspection Report Page No.	VPP Inspection Report Item No.	Facility Response/Corrective Action/Comments	Estimated Date of Completion For Corrective Action Taken	Attachment Included (Y/N)	Title of Document (Must be indicated at top of document attachment)
Clarification or Further Explanation	Pg 49 of 96	165.00	Per USP standards, surface samples are required to be taken at the end of aseptic operations, prior to cleaning and disinfection. In comliance with current USP<797> and <825>, RLS SOP 6.3.3 Environmental Monitoring: In-House Sampling, requires surface samples to be taken at the end of aseptic operations but before cleaning and disinfection have been completed. The third-party vendor is provided and follows RLS SOP 6.3.3. The third-party vendor does not take surface samples during dynamic conditions. Confusing language in the third-party vendor report has been removed and language has been added regarding proper timing of surface samples in relationship to aseptic processing. Further, USP<825> and RLS SOP 6.3.3 require radiation surveys prior to surface sampling to ensure personnel exposures are as low as reasonably achievable (ALARA). Requirements for radiation surveys to ensure ALARA principles prior to surface samples is further rationale why surface samples are not taken during dynamic conditions. Interviews with staff confirm that all surface samples taken by staff and third-party vendors are in compliance with USP standards and RLS standard operating procedures.	6/14/2024	Y	SOP 6.3.3 Environmental Monitoring: In-House Sampling; Microbial Test Results
Clarification or Further Explanation	Pg 51 of 96	173.01	The contracted third party vendor has amended their microbial test reports to include the requirement of using testing equipment per the manufacturers' instructions.	6/14/2024	Y	Microbial Test Results
Clarification or Further Explanation	Pg 51 of 96	173.04	Certification reports do indicate incubation conditions and duration on the page(s) titled Final Report: Microbiological Analysis, of 30-35°C for at least 48 hours and an additional 120-168 hours at 20-25°C. These incubation times and temperatures are compliant with USP chapters and RLS standard operating procedures. The location of the incubation time and temperatures were present but not identified on the documentation at the time of the inspection.	6/14/2024	Y	Microbial Test Results
Clarification or Further Explanation	Pg 60 of 96	217.02	SOP 6.4.1.2 ISO 7 & 8 Cleaning and Disinfecting requires daily cleaning and disinfecting of hand hygiene sinks located both inside and outside of the ISO environments and documented on Form 76 Cleaning/Disinfection Log: Hand Hygiene Sink. Monthly cleaning and disinfecting with a sporicidal agent is requried per this SOP and documented on Form 76 Cleaning/Disinfection Log: Monthly General Dispensing Areas.	6/14/2024	Y	SOP 6.4.1.2 ISO 7 & 8 Cleaning and Disinfecting Form 76 Cleaning/Disinfection Log: Monthly General Dispensing Areas; Form 76 Cleaning/Disinfection Log: Hand Hygiene Sink

This VPP Inspection response and documentation has been provided directly by the pharmacy in response to its VPP Inspection. The content of this response has not been verified or modified by NABP at this point in time, except to check for completeness of any attachments provided.

SOP 6.2.1 Clean Room Entry

I. Purpose

To describe the hand hygiene and garbing technique for clean room entry.

II. Scope

This applies to all Nuclear Pharmacy sites.

III. Responsibilities

It is the responsibility of the Pharmacy Manager or designee to oversee policy compliance for personnel under his/her supervision. All Nuclear Pharmacy employees and contractors will adhere to this procedure.

IV. Definitions

A. Buffer Area- The area where a primary engineering control (PEC) is physically located.
B. Clean Room Apparel- Apparel that is simply constructed, easily cleaned, with no nap or pile, full-length pants and socks. Clean room apparel must be freshly laundered and donned at the beginning of each work shift. Clean room apparel may be worn throughout the facility during the employee's work shift. Scrubs are preferred.
C. **Clean Room Dedicated Shoes- Shoes that are donned inside the ante room and only worn inside the clean room environment.**
D. Facility Dedicated Shoes – Shoes donned at the pharmacy worn during the work shift, only worn inside the facility. Shoes shall be constructed of low particulate materials such as leather, plastic or rubber that contain minimal exposed organic content. Facility dedicated shoes are not worn outside of the facility.
E. Street Clothes/Street Shoes – Refers to clothing and shoes that have been worn outside the facility.
F. Overalls- A one-piece clean room garment that fully encases clothing

V. Related Documents

Form 77: Weekly Shoe Cleaning Log

VI. Equipment and Materials

A. Shoe covers or dedicated clean room shoes with sinks inside ante rooms
B. Hair Net/Bouffant
C. Face masks
D. Beard covers to be worn when necessary to assure all facial hair is covered.
E. Approved disposable clean room or low particulate laboratory coats or overalls
F. Sterile - Powder free gloves
G. Disposable clean room/low particulate over sleeves (blood processing)

VII. Procedure

A. General Guidelines for Employee and Visitor Clean Room Entry
   1. Persons with rash, sunburn, weeping sores, conjunctivitis, or an active respiratory infection shall not enter the clean room.
   2. Eating, drinking, chewing gum, combing hair, smoking, use of personal electronic devices, or personal cell phones, is strictly prohibited. Company approved headsets may be donned for business calls only.
   3. Artificial nails are prohibited. Natural unpainted nails shall be kept neat and trimmed.
   4. Remove all cosmetics and visible jewelry including lanyards, necklaces, watches, earrings, and rings.

5. Remove personal outer garments (e.g., coats, hats, scarves, sweaters, vests).
6. Clean room apparel shall be freshly laundered and donned at the facility each work shift.
7. Clean room apparel is not required if overalls are donned per this procedure.
8. Clean room apparel shall only be worn for one work shift and shall not be worn outside of the facility prior to clean room entry.
9. If apparel is worn outside the facility, it must be replaced with freshly laundered attire for clean room entry or completely covered with clean room overalls.
10. Clean room pants shall fully cover lower limbs without dragging on the floor.
11. Socks must be worn to ensure no exposed skin on the lower extremities.
12. Clean room shirts must allow for washing to the elbows without being touched or adjusted after hand hygiene is performed.
13. If employees or visitors leave the facility, clean room apparel may be removed and re-donned during a single work shift.
14. **Street shoes are not to be worn into the clean room environments. The only exception to this is in the case of a visitor or those who don overalls. In these cases, shoe covers may be donned over street shoes immediately outside the clean room environment before hand hygiene is completed. When crossing the gown room line of demarcation, street shoes covered with shoe covers shall be treated as facility dedicated shoes and covered with a second pair of shoe covers.**
15. Facility **and clean room** dedicated shoes shall be:
    a. Cleaned by the employee wearing the shoes once per work week.
    b. Cleaned after each visitor use.
    c. Cleaning of facility dedicated shoes shall consist of spraying the outer surfaces with a list A agent for the required contact time and wiping down with a low lint towel.
    d. Record weekly cleaning of facility **and clean room** dedicated shoes on Form 77: Weekly Shoe Cleaning Log.
16. Shoe covers shall be placed over facility dedicated shoes without touching shoes, as the gown room line of demarcation is crossed. Shoe covers which contact the dirty side shall be replaced.
17. **If clean room dedicated shoes are worn, they shall be donned as the gown room line of demarcation is crossed in such a manner as to minimize touching of shoes with freshly washed hands, and to prevent stocking feet from coming in contact with clean room floor.**
18. Clean room lab coats and overalls will have elastic cuffs and may be reused during one work shift if not contaminated.
    a. Coats and overalls for reuse shall be turned inside out and hung up on the clean side of the line of demarcation.
    b. Overalls shall not be allowed to touch the floor when donning, doffing or hanging for later use during the shift.
19. Clean room garb shall be inspected while donning. No garb shall be used if it is found defective or torn. If garb becomes damaged while wearing, it shall be replaced.
20. No clean room garb other than **dedicated clean room shoes and** shoe covers shall touch the floor on the clean side of the gown room line of demarcation. If garb contacts the floor, it shall be discarded and replaced.
21. Clean room garb shall be worn appropriately and completely.
    a. Hair nets and beard covers shall cover all hair
    b. Face masks shall always cover the nostrils and mouth

c. Face masks shall be pinched across the bridge of the nose and the top edge smoothed to the cheeks to prevent slipping
d. Gloves shall cover the cuff of the clean room coat
e. Clean room coats shall be completely closed to the neck.

22. Access to clean rooms shall be performed hands free by using your arm or elbow to engage the lever type door handle or push plate.
23. Personnel entering the WBC Prep room shall perform hand hygiene prior to entry. No other clean room garb is required in this area.

B. Apparel for All Persons Entering the Clean Room

1. Follow all general hygiene and garbing guidelines for employee and visitor clean room entry.
2. Remove street clothes (pants, shirts, shoes) in the area designated by the facility and don freshly laundered clean room apparel and facility dedicated shoes (if used). Note: If overalls are to be donned, street clothes do not need to be removed.
3. Secure long hair as needed to eliminate manipulation during hand hygiene or clean room garbing.
4. Restricted area lab coats **must** be worn while in the facility's restricted area.

C. Hand Hygiene and Garbing When Sinks are Outside the Ante Room

1. Remove restricted area lab coat and hang up near the hand hygiene sink.
2. Ensure personal dosimeters are worn. Note: ring badges should be removed for hand washing and immediately put back on after drying. Employees shall avoid touch contact with surfaces.
3. Remove debris from under fingernails with a nail cleaner and warm running water.
4. Wash hands and forearms for at least 30 seconds with unscented soap.
   a. Scrub brushes should not be used as they can damage the skin.
   b. Carefully wash all surfaces of hands and forearms including around each finger and thumb.
   c. Rinse with clean water.
5. Dry hands and forearms thoroughly with low lint towels.
   a. Do not allow freshly washed hands to touch surfaces, clothing, or unwashed skin surfaces prior to entering the ante room. Note: allowance for touching of ring badges.
6. Walk across the entry door tacky mat to remove surface dirt from shoes.
7. Enter the clean room with hands free entry.
8. Don dedicated clean room shoes or shoe covers over facility shoes as the line of demarcation is crossed. Do not allow dedicated shoes or shoe covers to touch the dirty side of the line of demarcation
9. Don the following garb in this order: hair bouffant, face mask, and beard cover as needed to ensure all head and facial hair is covered. Use mirrors provided.
10. Perform hand antisepsis cleansing using an alcohol-based hand rub and following manufacturer's directions for use.
11. Don an appropriate clean room lab coat ensuring it is fully closed to the neckline or a disposable overall consistent with site procedures.
    a. Don a disposable lab coat if entering the WBC area to perform a leukocyte labeling procedure.
    b. Don a laundered or disposable lab coat consistent with site procedure if entering the Dispensing or Prep areas.

c. Donning of an overall must be completed without allowing the overall to touch the floor. Overalls must completely cover all street clothes.

12. Don sterile gloves using aseptic technique described in this procedure.
13. Enter room using hands free entry.

D. Hand Hygiene and Garbing When Sinks are Inside the Ante Room

1. Remove general laboratory coat and hang on the coat hooks provided outside the Gown room.
2. Ensure personal dosimeters are worn.
3. Walk across the clean room entry door tacky mat to remove surface dirt from shoes.
4. Enter the clean room with hands free entry.
5. Don shoe covers or dedicated clean room shoes as line of demarcation is crossed to the clean side of the ante room. Do not allow dedicated shoes or shoe covers to touch the dirty side of the line of demarcation.
6. Don the following garb in this order: hair bouffant, face mask, and beard cover as needed to ensure all head and facial hair is covered. Use mirrors provided.
7. Remove debris from under the fingernails with a nail cleaner under warm running water. Note: ring badges should be removed for hand washing and immediately put back on after drying. Employees shall avoid touch contact with any surfaces.
8. Wash hands and forearms for at least 30 seconds with unscented soap.
   a. Scrub brushes should not be used as they can damage the skin.
   b. Carefully wash all surfaces of hands and forearms including around each finger and thumb.
   c. Rinse with clean water.
9. Dry hands and forearms thoroughly with low lint towels.
   a. Do not allow freshly washed hands to touch surfaces, clothing or unwashed skin.
10. Perform hand antisepsis cleansing using an alcohol based hand rub and following manufacturer's directions for use.
11. Don an appropriate clean room lab coat ensuring it is fully closed to the neckline or a disposable overall consistent with site procedures.
    a. Don a disposable lab coat if entering the WBC area to perform a cell labeling procedure.
    b. Don a laundered or disposable lab coat consistent with our site procedure if entering the Dispensing or Prep areas.
    c. Donning of an overall must be completed without allowing the overall to touch the floor. Overalls must completely cover all street clothes.
12. Don sterile gloves using aseptic technique described in this procedure.
13. Enter rooms using hands free entry.

E. Donning Sterile Gloves

1. Employees and visitors shall aseptically don sterile gloves according to the following:
   a. Choose the proper glove size for your hands.
   b. Open the outer wrapper of the glove package and place the inner paper wrapper containing the sterile gloves on a clean surface.
   c. Without touching the inside of the package, expose the sterile gloves by unfolding the flaps away from the gloves. Turn the paper so the L and R symbols are facing you.
   d. Using the opposite hand, grasp the folded edge of the glove cuff for the dominant hand, touching only the inside surface of the glove.
   e. Moving slightly back from the sterile opened glove package, carefully pull the glove over the

dominant hand. Avoid skin contact with the outside surface of the glove. Allow the cuff to stay turned down on itself.

f. Using the sterile gloved hand, slide the fingers under the cuff of the second glove. Do not touch the inside of the cuff with your gloved hand.
g. Gently lift and insert your ungloved hand into the glove. Ease the glove on by pushing on the inside fold of the cuff. Turn back the cuff when the glove is on and fully cover the cuff of the clean room coat.
h. Turn back the cuff of the first glove without touching the inside of the first glove to fully cover the cuff of the clean room coat. Adjust gloves for comfort.
i. Check gloves for rips or tears. If no defects are visible, aseptically dispose of packaging and spray all newly donned glove surfaces with sterile 70% IPA.

2. Sterile gloves shall be donned as part of the garbing procedure performed in the Gown room.
3. If gloves are removed, care must be taken not to touch surfaces in the cleanroom with bare hands, including handles on hot waste cans and door levers.
4. Perform hand antisepsis cleansing using an alcohol based hand rub and following the manufacturer's directions of use, prior to donning each pair of sterile gloves.
   Note: **Double gloving is not required** but if double gloving, the initial layer of sterile gloves will be sprayed with sterile IPA whenever donning the top layer of sterile gloves.

F. Garbing Requirements for WBC Room Entry

Employees entering the WBC areas of the clean room shall follow the garbing procedure outlined in the WBC garbing procedure.

G. Exiting the Clean Room

1. Gloves and shoe covers shall be surveyed prior to exiting and properly disposed if contaminated.
   a. Follow site procedures to prevent spread of contamination.
2. If another operator is in the process of donning garb for clean room entry, do not de-garb. Wait until the other operator is fully garbed before initiating de-garbing procedure.
3. If the employee is going to re-enter during a single work shift, they may remove the lab coat or overall on the clean side of the line of demarcation and hang up on hooks provided so the inside of the coat is facing outward.
4. If the employee is not re-entering during the work shift, do not remove the lab coat or overall.
5. **If dedicated clean room shoes are worn, remove them and don facility dedicated shoes as the line of demarcation is crossed. Stocking feet must not touch clean room floors.**
6. If shoes covers are worn, cross over the line of demarcation to the dirty side wearing the remaining garb. Once shoe covers touch the dirty side, you cannot re-cross the line of demarcation, new shoe covers need to be donned for re-entry.
7. Disinfect hands or gloved hands with alcohol-based hand sanitizer to avoid spreading skin contamination on doorknobs or other touch surfaces and exit the clean room.
8. Remove remaining garb and dispose. Hair covers, shoe covers, face masks, and lab coats/overalls removed from the clean room cannot be reused.
9. Remove facility dedicated shoes and store in the designated area before exiting the facility.

VIII. Training

Personnel performing these tasks shall be trained on this procedure.

Document History		
Version	**Date**	**Brief Description of Change**
1	01 June 2020	New Document
2	01 Dec 2020	Update for compliance to USP<825>, change to garbing sequence: hand rub use prior to donning frock, remove air dryer use- require low lint towels for hand drying.
2.1	1 Nov 2021	Administrative
2.2	1 Apr 2023	Added definition for clean room dedicated shoes. Added clarifying language regarding clean room dedicated shoes as garbing option. Removed references to required face shields during WBC labeling. Clarified double gloving as optional.

Form 31S: Livingston In-House Surface Monitoring Record

Record Retention: CY + 5 years

Incubate samples 30-35°C for no less than 48 hours, count CFUs and indicate as "CFU Count #1. Then immediately incubate samples 20-25°C for no less than 5 additional days, count CFUs and indicate as "CFU Count #2. Total of count 1 + count 2 must be less than the action limit or the sample fails. Operator shall verify correct incubator temp at initial time of incubation. Daily incubation temps are recorded on local Form 28. See SOP 6.3.3 for full procedure and actions to be taken upon failures.

Form 31S: Livingston In-House Surface Monitoring Record

Record Retention: CY + 5 years

Livingston Facility Surface Sample Map

Policy 6.2: Personnel Hygiene, Qualifications and Training

I. Purpose

To ensure all pharmacy personnel are properly trained, qualified, and to support infection prevention and control measures and to maintain the ISO classified environments.

II. Scope

This policy applies to all Nuclear Pharmacy sites.

III. Responsibilities

The Pharmacy Manager or Pharmacist-on-Duty will oversee policy compliance for personnel under his/her supervision. All Pharmacy employees and contractors will adhere to this policy.

IV. Definitions

A. PEC- Primary Engineering Control

B. Designated person (DP)- One or more individuals assigned to be responsible and accountable for the performance and operation of the radiopharmaceutical processing facility and for personnel who prepare, compound, dispense, and repackage radiopharmaceuticals.

V. Related Documents

Form 165 Designated Persons List

VI. Policy

A. Personnel Hygiene/Infection Control

1. All who enter an ISO classified environment shall follow SOP 6.2.1 Clean Room Entry.
2. All who prepare sterile drug products shall follow SOP 6.2.2 Aseptic Technique & Preparation.
3. All who perform deliveries shall follow SOP 8.1.5 Customer RAM Deliveries & Returns.
4. All shall follow SOP 6.2.6 Infection Prevention and Control & Influenza Vaccine Program.
5. All required garb and supplies shall be provided.

B. Training Scope and Responsibilities

1. Employees and vendors will receive training on policies and procedures in this manual that pertain to their assigned job duties prior to performing those duties.
    a. Training materials are the written policies and procedures in this manual.
2. Employees and vendors shall receive training on policy and procedure changes that pertain to their assigned job duties when changes are implemented.
    a. Training material shall be the updated policies and procedures.
3. Pharmacy employees will receive initial and annual retraining pertaining to their assigned job duties in order to support and maintain ISO classified areas which cover the following topics:
    a. Quality Assurance program overview
    b. Hand hygiene and garbing
    c. Proper clean room behavior
    d. Key practices to maintaining the classified environment
    e. Proper cleaning and disinfection of secondary engineering controls
    f. Understanding of primary and secondary engineering controls
    g. Proper documentation practices

4. Compounding and dispensing personnel shall receive initial and annual retraining pertaining to their assigned job duties in order to support and maintain ISO classified areas. This training shall cover the following topics:
    a. Proper donning and maintenance of sterile gloves
    b. Understanding the primary engineering control and first air
    c. Proper cleaning and disinfection of a primary engineering controls
    d. Aseptic manipulations and key practices to maintain an ISO 5 environment
5. Quality program responsibilities and Designated Person required training are outlined in Attachment B: Responsibility/Training List.
6. Designated Persons assigned responsibilities by the Pharmacist in Charge (PIC) shall be documented on Form 165.
    a. Form 165 shall be updated by the PIC and maintained on file.

C. Core Competency Assessments
1. Personnel or vendors must prove core competency, as applicable to their duties prior to performing aseptic tasks beyond immediate use.
2. These qualifications must be completed initially, then successfully repeated at intervals as described in SOPs.
3. Core competency qualifications must be repeated prior to resuming duties if the person has not performed the process in more than 6 months.
    a. Form 107 Non-Sterile Compounding observational assessment
    b. Form 114 Cleaning Vendor Assessment
    c. Form 116 (appropriate version depending on environment or local regulation)- Garbing and Hand Hygiene observational assessment
    d. Form 117- Aseptic Technique observational assessment
    e. Form 118- Cleaning and Disinfecting PEC observational assessment
    f. Initial gloved fingertip sampling as outlined in SOP 6.2.4
    g. Media-fill testing as outlined in SOPs 6.2.3 and 7.1.3.
4. Core competency qualifications may be completed at a different facility if all SOPs, environments, and equipment used for product preparation are identical.
    a. PICs are responsible for confirming their local regulations allow core competency qualifications to be shared from another facility.
5. Upon request, site personnel core competencies shall be uploaded into Teams Facility Folders for remote monitoring purposes by the Quality Assurance Department.

D. Observational Assessments
1. **Observational assessments of other processes not identified as a core competency, shall be performed at the frequencies indicated in Attachment A: Observational Assessment List.**
2. **PICs are responsible for confirming their local regulations and completing observational assessments as required.**

Policy 6.2: Personnel Hygiene, Qualifications and Training

LIST OF ATTACHMENTS

Attachment A: Observational Assessment List
Attachment B: Responsibility/Training List

DOCUMENT HISTORY		
Version	**Date**	**Brief Description of Change**
1	1 June 2020	New Document
2	1 Dec 2020	Update for 825 revisions, requirement for core competency training and retraining for 6-month lapse in performing aseptic duties. Added Attachment A: Observational Assessment List to clarify and maintain complete list of observational assessment. Added assessments for Hand Hygiene Tracker, QC, Product Receipt, Production Run/Product Setup, and non-sterile compounding. Added Attachment B: Responsibilities/Training List.
2.1	1 Nov 2021	Administrative
2.2	1 Nov 2022	JC Finding- Require core competencies are uploaded into Teams Facility Folder for review upon QA request. Require review of local regulations before sharing core competencies across facilities. Update Attachment B to remove QA Lead from list and clarify designated person training requirements. Add Form 165 to document Designated Person(s).
2.3	1 Apr 2023	Clarified core competency qualifications and required observational assessments to align with USP<795> and <825>. Identified observational assessments of non-core competencies as "per local regulation".

Policy 6.2: Personnel Hygiene, Qualifications and Training

Attachment A: Observational Assessment List- Below is a list of tasks and duties critical to the quality program. For each task/duty an employee performs, they shall be trained on the policies and procedures associated with that task/duty and their performance assessed using the forms listed.

Task/Duty	Associated Policies and Procedures (State/site specific versions if applicable)	Assessment Form	Frequency
***Core Competency:** Non-sterile Compounding	SOP 3.3.5 Dispensing & Distributing I-131 SOP 3.3.10 Compounding I-123 Capsules	Form 107 Non-Sterile Compounding Assessment	Initial and Annual Reassessment
***Core Competency:** Monthly Cleanroom Cleaning by Vendor	SOP 6.2.1 (listed to ensure training on entry for vendor) SOP 6.4.1 Cleaning and Disinfecting the Clean Room	Form 114 Cleaning Vendor Assessment	Initial and Annual *Reassessment
***Core Competency:** Cleanroom Entry	SOP 6.2.1 Clean Room Entry	Form 116 Hand Hygiene and Garbing Assessment	Initial and Annual *Reassessment
***Core Competency:** Aseptic Product Preparation	SOP 6.2.2 Aseptic Technique & Preparation	Form 117 Aseptic Technique Assessment	Initial and Annual *Reassessment
***Core Competency:** Cleaning and Disinfecting	SOP 6.4.1 Cleaning and Disinfecting the Clean Room	Form 118 Cleaning and Disinfecting Assessment	Initial and Annual *Reassessment
Cleanroom Certification by Vendor	*SOP 6.2.1 *SOP 6.3.1 *Vendor may be responsible nationally for vendor employee training requirements. Records available upon request.	Form 115 Certification Vendor Assessment	Initial and Annual Reassessment
Driving Company Vehicle	SOP 5.1.5 Motor Vehicle Safety SOP 8.1.5 Customer RAM Deliveries and Returns	Form 68 Driving and Delivery Assessment and License Validation	Initial and Annual Retraining
Aseptic Operations/Customer Deliveries	SOP 6.2.1 Clean Room Entry SOP 6.2.2 Aseptic Technique & Preparation SOP 8.1.5	Form 141 Hand Hygiene Tracker	Biannual- January and July
Quality Control (QC)	TM Module: Quality Control Testing Procedures QC procedures in each Master Formula performed	Form 100 QC Assessment	Per Local Regulation
Product Receipt and Storage	Policy 3.2 Ordering, Receiving, and Tracing SOP 3.2.2 Receiving RAM and Cold Kits SOP 3.2.3 Medication & Component Storage SOP 3.2.4 High Alert Medication	Form 103 Product Receipt and Storage Assessment	Per Local Regulation
Production Run and Product Setup	Policy 3.3 Order Processing, Preparation, Dispensing and Distribution SOP 3.3.2 Product Preparation SOP 3.3.3 Dispensing and Distribution	Form 106 Production Run and Product Setup Assessment	Per Local Regulation

*Core Competency: Observational Assessment must be repeated prior to resuming duties if employee has not performed aseptic processing in more than 6 months. See Policy for additional requalification requirements.

Policy 6.2: Personnel Hygiene, Qualifications and Training

Attachment B: Responsibility/Training List- Below is a list of responsibilities critical to the quality program and identified in USP<825>. Personnel designated as responsible shall be trained as listed here:

Responsibility:	**Designated Role/Training Requirements:**
The QA Program Manager is responsible for ensuring each facility has a formal, written QA and QC programs that establish a system of:	
o Adherence to procedures	QA Manager- No additional training requirements
o Prevention and detection of errors and other quality problems	QA Manager- No additional training requirements
o Evaluation of complaints and adverse events	QA Manager- No additional training requirements
o Appropriate investigations and corrective actions	QA Manager- No additional training requirements
The PIC of each facility is responsible for the following:	
Training, qualifications, and evaluations of the QA Lead	PIC- No additional training requirements
Ensuring radiopharmaceutical processing areas, SEC and PECs are located, operated, maintained, monitored, and certified to have appropriate air quality.	PIC- No additional training requirements
Ensuring manufactured sterile products are used when available for the compounded sterile product or active pharmaceutical ingredient. If an active pharmaceutical ingredient cannot be obtained from a FDA-registered facility, the designated person(s) must select an acceptable and reliable source as described in USP<797>.	PIC- No additional training requirements
Ensuring final preparations comply with pre-established standards or acceptance criteria for identity, quality, and purity, and must consider all possible interactions between the components, such as altered chemical stability, radiochemical stability, solubility, or other parameters (e.g., osmolality) related to changes in pH, excipients, or other factors, in determining an appropriate BUD.	PIC- No additional training requirements
Ensuring that standard operating procedures (SOPs) are appropriate and are implemented, which includes ensuring that personnel demonstrate competency in performing every procedure that relates to their job function.	PIC- No additional training requirements
Reviewing the QA and QC program at least once every 12 months. The results of the review must be documented, and appropriate corrective action taken, if needed to ensure SOPs reflect current practices and regulatory requirements.	PIC- No additional training requirements
Ensuring any changes or alterations to a QA or QC program SOPs are approved, documented, and fully implemented.	PIC- No additional training requirements
Ensuring literature or analytical testing is consulted to determine if compounded sterile products (CSP) exposed to temperatures above or below the storage temperature limits, are expected to retain their integrity or quality. If this cannot be determined, the CSP must be discarded.	PIC- No further training requirements.
Review all customer complaints to determine if they indicate potential quality problems with the radiopharmaceutical.	PIC- No further training requirements.
The Staff RPh on duty is responsible for the following:	
Adhering to all aspects of the quality assurance program and supervising staff to ensure aseptic procedures are followed.	State Licensed RPh on duty- No further training requirements.
Evaluation of personnel who may pose a higher risk of contamination to the products and environment and will determine if the individual should be excluded from working in sterile processing areas until their conditions are resolved.	State Licensed RPh on duty- No further training requirements.

Notifying the PIC of any deviations in the quality program during their work shift that may affect the identity, quality, or purity of prepared products prior to dispensing.	State Licensed RPh on duty- No further training requirements.
The facility PIC may retain the following responsibilities or may assign to a Designated Person (DP) who has been trained on applicable SOPs and as indicated:	
Review of quality program logs and documents for completion, compliance to internal procedure and accuracy.	DP shall be trained on each SOP in the Aseptic and Quality Assurance Program that has been assigned to their responsibilities under the supervision and to the satisfaction of the PIC.
Review all certification and recertification records. The number of personnel present in each PEC and SEC during total particle count tests and dynamic smoke pattern tests must be documented and maintained.	DP shall be trained on SOPs 6.3.1 Certification & Performance of ISO Environments, and 6.3.3 Environmental Monitoring, under the supervision and to the satisfaction of the PIC.
Perform garbing and hand hygiene training to current SOP Perform garbing and hand hygiene observational assessments Perform employee initial garbing gloved fingertip testing	DP shall be a state licensed RPh, or Technician who has passed initial gloved fingertip testing and passed an observational assessment Form 116 completed by the PIC within 12 months.
Perform PEC cleaning and disinfecting training to current SOP Perform cleaning and disinfecting observational assessment	DP shall be a state licensed RPh, or Technician who has passed an observational assessment Form 118 completed by the PIC within 12 months
Perform aseptic technique training to current SOP Perform aseptic observational assessments	DP shall be a state-licensed RPh, or Technician who has passed media-fill/gloved fingertip tests, and an observational assessment on Form 117 completed by the PIC within 12 months.
Aid and assist employees performing media-fill testing/gloved fingertip testing	DP shall be a state-licensed RPh, or Technician with previously passed media-fill(s) and gloved fingertip tests within 12 months.
Perform follow up to ensure corrective actions are taken if problems, deviations, failures, or errors are identified. Corrective actions and follow up must be documented.	DP shall be a state licensed RPh, or Technician trained on Policy 4.3 and all associated SOPs.

Statement of Responsibility

1. I am the Group Chief Operating Officer (title) for RLS (USA) Inc. (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be responsible for any violations of pharmacy law that may occur in the Pharmacy owned by such owner(s), shareholder(s), member(s), or partner(s).
3. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be named in any action taken by the Nevada State Board of Pharmacy against the Pharmacy.
4. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) cannot require or permit the pharmacist(s) in said Pharmacy to violate any provision of local, state, or federal laws or regulations pertaining to the practice of pharmacy.
5. I further understand and acknowledge that Nevada law requires that each pharmacy located inside the State of Nevada employ only pharmacists, intern pharmacists, pharmaceutical technicians, and technicians in training that are licensed by the Nevada State Board of Pharmacy. (NRS 639.100).
6. I further understand and acknowledge that Nevada law requires that each pharmacy located outside the State of Nevada engaged in providing pharmacy services into Nevada employs at least one pharmacist licensed by the Nevada State Board of Pharmacy who will be responsible for any prescription dispensed to a patient located in Nevada and responsible for any acts or omissions of pharmacy personnel who are not registered with the Board. (NRS 639.2328).

Disciplinary Summary
RLS (USA) Inc. Pharmacies

RLS (USA) Inc., f/k/a Amersham Health Nuclear, Medical Pharmacy, 1 Naylon Place, Livingston, NJ 07039

March 8, 2004: New Jersey Board of Pharmacy issued a $225.00 penalty and requested a letter of corrective action as a result of violations of N.J.A.C 13:39-12.2(e) (Prescription label does not have the chemical form of the radioactive drug) and N.J.A.C 13:39-12.4(c) (Missing a current text in the category of "General Practice of Pharmacy") found during an inspection conducted on 12/19/2003. RLS (USA) Inc. satisfied all requirements of the corrective action, paid the fine, and remains in good standing with the New Jersey Board of Pharmacy.

RLS (USA) Inc., f/k/a/ Med-Physics, Inc., d/b/a/ GE Healthcare, 1 Naylon Place, Livingston, NJ 07039

May 19, 2017: New Jersey Board of Pharmacy issued a $5,500.00 penalty and requested a letter of corrective action as a result of violations of N.J.A.C 13:39-11.24(a)6 (Adequate efforts were not made to ensure the pharmacy's quality assurance program) and N.J.A.C 13:39-11.24(a)10 (When test results indicated that the cleanroom did not meet the standards established, the pharmacy failed to immediately cease using the cleanroom that was out of compliance until such time that the cleanroom met the requisite standards) found during an inspection conducted on 8/10/2016. The pharmacy paid the fine and met all requirements of the corrective action, and remains in good standing with the New Jersey Board of Pharmacy.

RLS (USA) Inc., 1283 Mountain View Alviso Road Ste. A - B, Sunnyvale, CA 94089

February 14, 2024: RLS (USA) Inc. failed to follow its written policies and procedures when, on dates ranging from 12/30/2022 to 6/26/2023, it failed to remove pharmacy equipment from use following microbial contamination. This resulted in a violation of California pharmacy law for which the Board issued a Citation. No fine was assessed and the pharmacy took corrective action to address the violations. The pharmacy remains in good standing with the California Board of Pharmacy.

RLS (USA) Inc., 16259 Stagg Street, Ste A, Van Nuys, CA 91406

October 11, 2024: RLS (USA) Inc. failed to timely notify the California Board of Pharmacy upon a change in the Pharmacist-in-Charge. RLS (USA) Inc. operated without an approved PIC for the pharmacy and was fined a total of $1500. RLS complied with all requirements of the citation and the pharmacy remains in good standing with the California Board of Pharmacy.

Re: Inspection Report #8-1066.6
Inspection Date: 12/19/03

Dear Mr. Marzocca:

This letter is to advise you that the New Jersey State Board of Pharmacy has had an opportunity to review information concerning the above inspection report.

Upon review of all available information, the Board has preliminarily found that you have violated:

N.J.A.C. 13:39-12.2(e)
Prescription label does not have the chemical form of the radioactive drug.
$25.00

N.J.A.C. 13:39-12.4(c)
Missing a current text in the category of "General Practice of Pharmacy".
$200.00

The Board has determined that it will offer you an opportunity to settle this matter and thereby avoid the initiation for disciplinary proceedings. Should you wish to avail yourself of this opportunity, you should sign the attached acknowledgment and agree to the following:

1. Pay a penalty in the amount of **$225.00** and provide to the Board a Letter of Corrective Action. (To be paid immediately upon your signing of the attached acknowledgment.)

Alternatively, you may waive your right to a hearing and submit a written statement or explanation to the Board. The Board will then consider your submission and render a final decision, which may include any of the terms set forth above. This disposition will be a public record.

If you do not wish to settle this matter, you may request a hearing. In that event, this letter will serve as notice of the charges against you and a hearing will be scheduled before the Board. At that hearing you may, either personally or with the assistance of an attorney, submit determination concerning the charges of unlawful activity. You should be aware that in making its final decision, the Board may, if unlawful activity has been proven, assess civil penalties in an amount greater than that herein offered in this letter. Additionally, the Board may, if the facts are found to so warrant, enter an order, requiring you to reimburse certain monies, directing you to cease and desist from engaging in unlawful acts and/or requiring you to pay costs incurred by the Board. Should you have any questions concerning this letter or the settlement offer herein, I suggest that you contact the Board at (973).504-6450.

The enclosed certification should be completed and returned to the Board **within fifteen (15) days following your receipt of this letter.** In the event that the Board receives no response from you within this time, the Board's settlement offer will be withdrawn, and the allegations contained here in shall be deemed admitted, and the Board will proceed to finally review that matter and enter an appropriate order.

CERTIFICATION

I, JOHN MARZOCCA, hereby acknowledge that I have read and reviewed the Board's letter dated March 8, 2004 regarding allegations of violations of the Board's enabling act and/or regulations.

Please Check One:

☐ I acknowledge the conduct which has been charged and agree to:

1. Cease and desist in engaging in the conduct alleged and pay a penalty in the amount of **$225.00** (to be paid upon signing of this certification).

2. Send a **Letter of Corrective Action**, as requested by the Board, with this certification.

I am also aware that the action taken against me by the Board herein is a matter of public record, and that the Board's letter and this certification are public documents.

☑ I hereby waive any rights I may have to a hearing in this matter and defend myself against any charges, but ask the Board to consider my explanation before the rendering its final decisions. I understand that the Board may order any of the terms specified in its letter and that the certifications are public documents.

☐ I request a formal administrative hearing to contest the charges specified by the Board. I understand that I will be advised of the time, date and place for that hearing at another time. I am aware that I may be represented by an attorney and that at the time of the hearing I may submit to the Board, testimony and documentation relevant to the charges. I understand that in making its final decision, the Board may, if unlawful activity has been proven, assess civil penalties in an amount greater than that herein offered in its letter and may order such other remedies as it may deem appropriate. I am also aware that this proceeding is a matter of public record and that the Board's letter and this certification are public documents.

Joanne Boyer
Executive Director
Division of Consumer Affairs
New Jersey Board of Pharmacy
124 Halsey Street
Newark, NJ 07101

Dear Ms. Boyer:

We are in receipt of your letter dated 8 March 2004 concerning the alleged deficiencies sited during an inspection of our Livingston, New Jersey facility conducted 19 December 2003. The alleged deficiencies as stated in your letter are listed below for ease of reference:

N.J.A.C.13:39-12.4(c)
Missing a current edition of a text in the category of "General Practice of Pharmacy".

We at Amersham Health believe that in the spirit of, and pursuant to, New Jersey State Board of Pharmacy Regulations, current texts via computer access, pertaining to the General Practice of Pharmacy meet these requirements of N.J.A.C.13:39-12.4(c). The two texts are USP/NF via internet access, and Pass Assured, a computer text used by our pharmacy technicians to prepare for the PTCB certification test. This computer text covers the following items in the general practice of pharmacy:

Pharmacy Law
Terminology
Calculations
Metric Conversions
Dosage Forms
Aseptic Techniques
Pharmacy Operations
Third Party Reimbursements.

The above notwithstanding, Amersham Health has also purchased a current edition of Remington's "The Science and Practice of Pharmacy" on 11 March 2004.

N.J.A.C.13:39-12.2(e)
Prescription label does not have the chemical form of the radioactive drug.

Amersham Health was unable to locate the definition of chemical form within New Jersey Board of Pharmacy Regulations so we reverted to the DOT interpretation. The Chemical form of a radioactive drug is required on all DOT Bills-of-Lading for radioactive deliveries and is addressed by the U.S D.O.T. under 49 CFR 172.203, and is defined as "a generic chemical description is acceptable for chemical form". Under these conditions Amersham Health can only interpret "chemical form" in NJAC 13:39-12.2(e) to be the name of the radiopharmaceutical drug. Attachment 1 contains an actual prescription label listing the name of the radionuclide (i.e., Tc-99m, In-111, etc...) along with the actual generic chemical (radiopharmaceutical/brand) name of the drug (i.e., Myoview, MAA, MDP, etc...). Amersham Health believes that if one interpreted "chemical form", as "inorganic salt", then all radioactive prescriptions have the potential of being "mislabeled". For example, Tc99mMyoview, Tc99mMDP, Tc99mMag 3, and Tc99mDTPA are "different" radiopharmaceutical drugs used to diagnose different organs within the body. Following the current board of pharmacy labeling

guidelines, and interpreting chemical form as inorganic salt, then all five prescription labels would read "Tc99m Inorganic Salt". The actual drug(brand) name would not have to appear on the label pursuant to regulation, which would cause all five prescriptions to be identical which in turn could be described as "mislabeled". Therefore the only way to assure that a radioactive prescription is not "mislabeled" is to interpret chemical form to be the name of the radiopharmaceutical. The name of the radiopharmaceutical currently appears on all Amersham Health prescriptions.

Based on this understanding Amersham Health respectfully requests that the both "deficiencies" be rescinded, and would like to request an informal meeting to discuss the matter with the board.

If you have any questions or require any additional information, please contact me at (973) 533-9109, or Richard Hughes, Corporate Radiation Safety Officer at (609) 514-6647.

Sincerely,

John Marzocca R.Ph

RE: Inspection Report #8-1066.6

Dear Mr. Marzocca:

The Board reviewed your letter of March 31, 2004 in which you offered mitigation concerning the above referenced Inspection Report.

It was the decision of the Board at the May 26, 2004 meeting, to mitigate the following violation(s):

N.J.A.C.13:39-12.2(e) for $25.00 and deny the mitigation for N.J.A.C.13:39-12.4(c)for $200.00

Please submit the remaining balance in the amount of $200.00 along with a letter of corrective action.

Yours truly,

Joanne Boyer

Re: Inspection #8-1066-16-X
Date of Inspection: August 10, 2016

Dear Mr. Marzocca:

This letter is to advise you that the New Jersey State Board of Pharmacy has had an opportunity to review information concerning the above inspection report.

Upon review of all available information, the Board has preliminarily found that you have violated those items listed on Attachment A.

The Board has determined that it will offer you an opportunity to settle this matter and thereby avoid the initiation for disciplinary proceedings. Should you wish to avail yourself of this opportunity, you **MUST SIGN THE ATTACHED CERTIFICATION** and agree to the following:

PAY A PENALTY IN THE AMOUNT OF $5,500.00 and **PROVIDE TO THE BOARD A LETTER OF CORRECTIVE ACTION.** (To be paid immediately upon your signing of the attached acknowledgment.)

Alternatively you may waive your right to a hearing and submit a written statement or explanation to the Board. The Board will then consider your submission and render a final decision, which may include any of the terms set forth above. This disposition will be a public record. Please take notice that if the Board determines that the initial inspection findings require a reinspection to ensure that cited deficiencies have been properly addressed, you may be subject to any costs associated with the reinspection.

If you do not wish to settle this matter, you may request a hearing. In that event, this letter will serve as notice of the charges against you and a hearing will be scheduled before the Board. At that hearing you may, either personally or with the assistance of an attorney, submit

New Jersey Is An Equal Opportunity Employer • Printed on Recycled Paper and Recyclable

determination concerning the charges of unlawful activity. You should be aware that in making its final decision, the Board may, if unlawful activity has been proven, assess civil penalties in an amount greater than that herein offered in this letter. Additionally, the Board may, if the facts are found to so warrant, enter an order, requiring you to reimburse certain monies, direction you to cease and desist from engaging in unlawful acts and/or requiring you to pay costs incurred by the Board. Should you have any questions concerning this letter or the settlement offer herein, I suggest that you contact the Board at (973) 504-6450.

The enclosed Certification MUST be completed and returned to the Board within fifteen (15) days following your receipt of this letter. In the event that the Board receives no response from you within this time, the Board's settlement offer will be withdrawn, and the allegations contained herein shall be deemed admitted, and the Board will proceed to finally review that matter and enter an appropriate order.

Please Check One:

[✓] I acknowledge the conduct which has been charged and agree to:

1. **Cease and desist from engaging in the conduct alleged and pay a penalty in the amount of $5,500.00** (to be paid upon signing of this Certification).

2. **Send a Letter of Corrective Action,** as requested by the Board, with this Certification.

I am also aware that the action taken against me by the Board herein is a matter of public record, and that the Board's letter and this Certification are public documents.

[ ] I hereby waive any rights I may have to a hearing in this matter and defend myself against any charges, but ask the Board to consider my explanation before rendering its final decisions. I understand that the Board may order any of the terms specified in its letter and that the Certification are public documents.

[ ] I request a formal administrative hearing to contest the charges specified by the Board. I understand that I will be advised of the time, date and place for that hearing at another time. I am aware that I may be represented by an attorney and that at the time of the hearing I may submit to the Board, testimony and documentation relevant to the charges. I understand that in making its final decision, the Board may, if unlawful activity has been proven, assess civil penalties in an amount greater than that herein offered in its letter and may order such other remedies as it may deem appropriate. I am also aware that this proceeding is a matter of public record and that the Board's letter and this Certification are public documents.

ATTACHMENT A

36. **Med-Physics, Inc., d/b/a GE Healthcare** - 1 Naylon Place, Livingston, New Jersey 07039
Pharmacist-In-Charge: John Marzocca
Bureau File #8-1066-16-X, **Period:** 8/10/16
Reference: Board of Pharmacy inspection conducted per N.J.S.A.45:1-18, N.J.S.A.45:14-48(a)11&12 and a request from the Board to inspect all pharmacies that engage in compounding sterile preparations.

Details

CITE	DESCRIPTION	FINE
N.J.A.C.13:39-11.24(a)6	Adequate efforts were not made to ensure the pharmacy's quality assurance program. Specifically, on June 17, 2015, the pharmacy's internal surface sampling detected a total of twenty-two (22) Colony Forming Units (CFUs) from various locations, including support table used in sterile compounding, the prep room and the pass through. On January 11, 2016, internal surface sampling detected one (1) CFU from the ISO 5 hood, one (1) CFU from Tech Hood 2 and one (1) CFU from Biologic Safety Cabinet (BSC) 6. Sixty-nine (69) CFUs were detected at various testing sites, including support tables, support cars and the dispensing room. On June 27, 2016, according to the pharmacy's internal surface sampling, four (4) CFUs were detected at BSC support table 1, four (4) CFUs were detected at BSC support table 6, one (1) CFU at cart 2 and three (3) CFUs at a general support table. Additionally, a total of twenty-one (21) CFUs were found in the gowning room. On all of these occasions, the pharmacy failed to analyze the species to the genus level in order to exclude the possibility of the existence of highly pathogenic species. By reviewing the cleaning log for the month of June 2016, the pharmacy failed to specify the details of cleaning in the event of CFU detection.	**$3,000.00**

N.J.A.C.13:39-11.24(a)10	When test results indicated that the cleanroom did not meet the standards established, the pharmacy failed to immediately cease using the cleanroom that was out of compliance until such time that the cleanroom met the requisite standards. Specifically, on September 28, 2015, during the environmental monitoring tsts conducted by ENV Services, a laboratory equipment certification company, air sampling detected multiple CFUs in the dispensing room, the gowning room, the prep room, the White Blood Cell (WBC) anteroom and the WBC prep room. The nature of the CFUs detected in these areas was deemed non-highly pathogenic. The quantities of CFUs were below action level. Air Sample number 10 detected one (1) CFU in the center of the WBC Room and the species was identified as fungal in nature. This finding was deemed as Out-of-Compliance (OOC). On the following day, September 29, 2015, ENV Services detected one (1) CFU in the dispensing room, classified as ISO Class 7. The species was identified as fungal in nature. This finding was again deemed as OOC. John Marzocca, RPIC acknowledged that upon learning the test results on October 9, 2015, the pharmacy failed to cease using the affected equipment. The cleaning log for the month of October 2015 failed to indicate that the pharmacy performed triple cleaning in order to address these findings. On October 19, 2016, during a follow-up visit by Inv. Qi to the pharmacy, Mr. Marzocca stated that during the most recent environmental monitoring test performed by ENV Services, the maximum CFU count for two (2) ISO classified areas was exceeded. Air sampling detected one (1) CFU of genus in fungi nature from one of the BSC units, ISO Class 5, as well as thirteen (13) CFUs from one of the support tables. The CFUs detected were a highly pathogenic species. Mr. Marzocca stated that the pharmacy followed the N.J.A.C. regulation this time and ceased using the affected equipment.	**$2,500.00**

	Daily and weekly cleaning procedures were reviewed in detail. Upon review, it appeared that the pharmacy updated the cleaning frequency, cleaning methods and cleaning materials since my August 2016 visit.	
TOTAL: $5,500.00

Anthony Rubinaccio R.Ph
Executive Director
New Jersey Board of Pharmacy
124 Halsey Street
Newark, NJ 07101

Dear Mr. Rubinaccio

In response to NJ Board of Pharmacy letter Dated May 19, 2017 concerning inspection #8-1066-16-X, please find the enclosed signed certification letter with a check for $5500. Below are the corrective actions:

1. Contact plate surface samples are currently conducted in-house biannually. Any microbial recovery will be analyzed by an independent third party company, such as Nelson Labs 6280 South Redwood Road, Salt Lake City Utah. This is in addition to our cleanroom certification company (ENV) collecting and analyzing environmental air and surface samples biannually and identifying all recovered microbes to the genus level.
2. In 2016, we and our third-party certification vendor (ENV) enacted more stringent garbing, cleaning, and clean room entry procedures. Prior to these new protocols ENV would wheel in testing equipment from the street into our clean room without thoroughly cleaning the equipment and transportation carts. ENV now requires and supplies their technicians with clean room coveralls to wear during certification procedures. ENV technicians also thoroughly clean their testing equipment which is properly maintained for clean room entry and transfer all necessary equipment to GE clean room carts prior to certification testing.
3. In 2016 we have also changed our protocols to a more aggressive daily "cleaning and disinfection" of our primary and secondary engineering controls. We now use germicidal cleaning and disinfecting agents daily in addition to using sterile 70% isopropyl alcohol in the primary engineering controls. Prior to this change we used germicidal agents weekly and 70% isopropyl alcohol daily. We have also started a rotation of a sporicidal agent in our cleaning and disinfecting procedures.

If you have any questions, please do not hesitate to contact me at 973-533 9109

Sincerely,

John Marzocca R.Ph

March 28, 2017

Anthony Rubinaccio R.Ph
Executive Director
New Jersey Board of Pharmacy
124 Halsey Street
Newark, NJ 07101

Dear Mr. Rubinaccio

In response to NJ Board of Pharmacy letter Dated march 9, 2017 concerning the observations identified during an inspection of our Livingston New Jersey Nuclear Pharmacy conducted August 10, 2016. The observations stated in your letter are listed below for ease of reference:

[N.J.A.C.13:39-1124(a)6]- Adequate efforts were not made to ensure the pharmacy's quality assurance program.

Although this regulation does not make any reference to internal sampling to be analyzed for species to the genus to exclude the possibility of the existence of highly pathogenic species, Medi-Physics, Inc. d/b/a/ GE Healthcare Livingston NJ, has added this to our environmental monitoring protocols. Contact plate samples incubated on site which show organism growth will be analyzed by an independent certified third party laboratory for ID'ing to genus level. Additionally, our cleanroom certification company (ENV) shall continue to take environmental samples for air and surface contamination biannually during re-certification procedures. All growth recovered from third party vendor sampling shall also be ID'd to genus level.

[N.J.A.C.13:39-24(a)10]-When test results indicated that the cleanroom did not meet the standards established, the pharmacy failed to immediately cease using the primary engineering controls or cleanroom that was out of compliance until such time that the cleanroom met the requisite standards.

The Livingston Pharmacy did not take action to immediately cease using secondary engineering controls on September 28, 2015, as a result of the environmental monitoring tests, due to the fact the we were unaware of this requirement per 13:39-24(a)10 until the **January 2016** New Jersey Board of Pharmacy newsletter article titled- Regulation Regarding Out-of-Compliance Cleanrooms and Primary Engineering. Our Standard Operating Procedures, at the time required us to immediately deep clean the area of concern, perform an investigation to determine action necessary to eliminate recurrence of the contamination, and retest prior to reuse. After further review of the information in that newsletter, the Livingston Pharmacy is in the process of updated

6017

protocols to include 13:39-24(a)10. At this time, we are in compliance with this regulation as evidenced by our SOP's as well as Mr. Qi's follow up visit on October 19, 2016 stating that ENV services monitoring found a maximum CFU count exceeded in a BSC hood which was taken out of service until an EVN re-test was performed.

If you any questions or require any additional information, please contact me at (973) 533-9009.

Sincerely,

John Marzocca R.Ph

RE: Inspection Report #8-1066-16X for the period:08/10/2016

Dear Mr. Marzocca:

The New Jersey Board of Pharmacy (the "Board") has received the above mentioned inspection report, a copy of which is included with this letter, and has requested that you respond to the following items within **ten (10) days** of receipt of this letter:

1) Please provide a detailed response to the inspector's observations and any "areas of concern" noted for each citation in the "Report of Inspection" on pages #1 through #5. Your response should include an explanation for each issue noted, as well as what steps you have taken (or are planning to take) to address each item.

2) Please provide a detailed response for each citation and any "areas of concern" noted on page #1 of "Exhibit #15". You do not need to respond to items a second time, if you addressed a citation as part of your response to the "Report of Inspection" section. Again, your response should include an explanation for each issue noted, as well as what steps you have taken (or are planning to take) to address each item.

Feel free to include any additional supporting documentation you feel the Board should consider when reviewing your response. The Board will review this report and your response to this letter at the next available Board meeting.

Failure to respond and provide this information within ten (10) days from receipt of this letter will constitute a failure of a duty to cooperate pursuant to N.J.A.C. 13:45C-1.3 and may result in disciplinary action by the Board, including suspension of your permit to operate a pharmacy and/or to engage in sterile compounding.

Sincerely,

GLOSSARY

OrganismName	Description
Bacillus infantis	
Micrococcus luteus	Can be found in many places such as the human skin, water, dust, and soil. Generally thought of as harmless bacterium, but there have been rare cases of Micrococcus infections in people with compromised immune systems.
Staphylococcus epidermidis	A coagulase-negative Staphylococcus that is part of the normal human flora, typically the skin flora, and less commonly the mucosal flora. Although S. epidermidis is not usually pathogenic, patients with compromised immune systems are at risk of developing infection. These infections are generally hospital-acquired. S. epidermidis is a particular concern for people with catheters or other surgical implants because it is known to form biofilms that grow on these devices.

USP <797>Supplemental Information

1. Growth Media
   - 1.1. A general microbiological growth medium such as Soybean-Casein Digest Medium (also known as Trypticase Soy Broth (TSB) or agar (TSA) shall be used to support the growth of bacteria.
   - 1.2. Malt Extract Agar (MEA) or suitable substitute shall be used to support the growth of fungi.
   - 1.3. Media used for surface sampling shall be supplemented with additives to neutralize the effects of disinfecting agents (e.g., TSA with Lethicin and Polysorbate 80).
   - 1.4. Incubate inverted bacterial media for 2-3 days at 33-37°C and fungal for 5-7 days at 26-30°C.

2. Viable Sampling
   - 2.1. Air:
     - 2.1.1. Shall be performed dynamically at least semiannually (i.e. every 6 months) in ALL ISO Class environments.
     - 2.1.2. Impact shall be the preferred method volumetric sampling, settling plates are not sufficient.
     - 2.1.3. 400-1000 litersof air shall be tested at each location and reported as CFU/m³ of air.
   - 2.2. Surface:
     - 2.2.1. Shall be performed dynamically in ALL ISO classified areas on a periodic basis (contact plates and/or swabs) and shall be done at the conclusion of compounding.
     - 2.2.2. Results are reported as CFU per sampled unit area.

3. Gloved Fingertip Testing
   - 3.1. Shall be performed for all CSP risk level compounding.
   - 3.2. Immediately after gowning, the evaluator shall collect a gloved fingertip and thumb sample from both hands on a general microbiological media (TSA).
   - 3.3. Initial gloved fingertip/thumb sampling procedure requires (0 CFU) no less than 3 times before initially being allowed to compound CSPs for human use.
   - 3.4. Re-evaluation of all compounding personnel shall occur at least annually for low- and medium-risk level CSPs and semianmually for high-risk.
   - 3.5. CFU action level shall be based on the total number of CFU on both gloves and not per hand.
   - 3.6. Should be reported separately as number of CFU per employee per hand (left hand, right hand).

4. Media-Fill Testing
   - 4.1. Shall be performed initially before beginning to prepare CSPs and at least annually thereafter for low- and medium-risk level; and semiannually for high-risk.
   - 4.2. Shall be evaluated using sterile fluid bacterial (TSA) culture media-fill verification.
   - 4.3. Media-filled vials shall be incubated with a range of 33-37° C for 14 days.

5. Reporting Information
   - 5.1. Highly pathogenic microorganisms (e.g., Gram-negative rods, coagulase positive staphylococcus, molds, and yeasts) must be immediately remedied, regardless of CFU count. Any CFU count that exceeds its respective action level shall have an investigation into the source of contamination, shall be eliminated, the affected area cleaned, and resampling performed.
   - 5.2. Positive controls are unopened samples submitted for growth promotion testing (inoculation) which eliminates false negatives. Negative controls are unopenedsamples submitted for incubation solely which eliminates false positives.
     - 5.2.1. There should be a positive and negative control for each lot number of every media type used.
   - 5.3. MRL is the minimum reporting limit for a sample.
   - 5.4. Results found in this report are solely tied to the project above and the samples therein.

This test report and data shall not be reproduced except in full, without the written approval of the laboratory. The results obtained apply only to the samples tested and are reflective of the conditions at the time of this test.This document is proprietary, all rights to content are reserved by M-BioLabs, Inc. This is a controlled document in electronic form and available by access to MBL servers, authorized distribution media or stamped controlled in red. Distribution of proprietary documentation is expressly forbidden without written consent of MBL Management.

ATTN: WERNER GRUNER, PRS
1283 MOUNTAIN VIEW ALVISO RD STE A-B
SUNNYVALE, CA 94089

RE: CI 2023 103137
RLS USA INC
PHY 57865

The attached Citation, ("Citation") is being issued pursuant to Business and Professions Code section 125.9 and California Code of Regulations, title 16, section 1775 et. seq., for violations of the laws and regulations that govern the practice of pharmacy in California. (For exact language refer to the California Pharmacy Law and Index, located on the Board's web site, at www.pharmacy.ca.gov, under Forms and Publications).

The attached Citation references the specific statutes and regulations violated, and defines each violation charged. The attached Citation details the conduct that resulted in the issuance of the Citation.

IT IS YOUR RESPONSIBILITY TO READ THE ENTIRE CITATION AND INSTRUCTIONS, TO UNDERSTAND THE PROCESS FOR CONTESTING THE CITATION AND IF CONTESTING THE CITATION TO RESPOND WITHIN THE FOLLOWING TIME FRAMES:

- February 28, 2024: Any contest of the Citation by request for an informal Office Conference must be received by the Board.
- March 15, 2024: Any contest of the Citation by request for a formal Appeal must be received by the Board.

The issuance of a Citation by the Board of Pharmacy is considered an administrative action and substantiated resolution of a complaint and/or investigation. The acceptance of the Citation(s) shall not constitute an admission of the violation(s) charged.

No fine has been assessed with this Citation and no proof of abatement has been ordered.

If the Board does not receive a written request to contest this Citation within 30 days of the issue date, you will be deemed to have waived your right to contest this Citation. The Citation shall then become the final order of the Board. Please be advised that if not contested this Citation will become a part of the Board's records and constitute a public record for purposes of disclosure.

If you have any questions regarding this Citation please contact Joshua Monforte, Citation and Fine Analyst at (916) 518-3014.

Anne Sodergren
EXECUTIVE OFFICER

INSTRUCTION

Read the Following Carefully and Thoroughly

You are hereby served with a Citation issued by the Executive Officer of the California State Board of Pharmacy or her designee. The following instructions are provided to assist you in your timely completion of the Citation process.

Unless contested, Citations are final 30 days from the date of service. Acceptance of a Citations is not an admission of the violation charged. A Citation becomes part of your record, and remains there for five years. It can be used as an aggravating factor for future violations. Citations are public information and as such may be released to the public in accordance with the Public Records Act and Information Practices Act.

CONTESTING THE CITATION (CCR §1775.4)

If you wish to contest all or part of your Citation you may request an informal office conference or an appeal before an administrative law judge, or both. If you wish to request both you must submit both forms. If you prevail at the office conference your request for an appeal shall be deemed withdrawn. Please note that the time frames that allow you to request an office conference and an appeal run concurrently. You must submit your request(s) according to the following instructions:

REQUEST FOR OFFICE CONFERENCE (CCR §1775.4 subd. (b))

- Complete attached "Request for Office Conference".
- Mail form to arrive at the Board office no later than February 28, 2024 to the address at the bottom of the form.
- You will be advised by the Board in writing as to the date and time of your appearance.
- You are allowed one postponement.

An office conference is not a hearing. It is an informal discussion of the events that took place, and an opportunity for you to present information and mitigating factors pertaining to the Citation that you would like considered. The Executive Officer and or her designee represent the Board of Pharmacy at this meeting. One other individual of your choice may accompany you to this meeting. Office conferences are not open to the public. There is no discovery available in this process. You will not be allowed to present or question witnesses. However, you may present any written statements or documents that you believe are relevant.

After your office conference, the Citation may be affirmed, modified or dismissed. You will be advised of the decision in writing within 14 calendar days from the date of the conference. If the Citation is affirmed you will have 30 days from the date of the decision letter to comply with the conditions of your Citation. If the Citation is modified, the Citation originally issued shall be considered withdrawn and a new Citation will be issued. The decision issued after the office conference shall be deemed to be a final order with regard to the Citation issued, including the administrative fine levied, and/or an order of abatement.

REQUEST FOR APPEAL (CCR § 1775.4 subd. (a))

- Complete attached "Request for Hearing".
- Mail form to arrive at the Board office no later than March 15, 2024 to the address at the bottom of the form.
- You will be advised in writing as to the date and time of your hearing.

An appeal is a formal adjudicative hearing before an Administrative Law Judge. A Deputy Attorney General will represent the Board of Pharmacy at this hearing. These proceedings shall be conducted in accordance with the provisions of Chapter 5, commencing with Section 11500 of Part 1 of Division 3 of Title 2 of the Government Code.

If you have any questions regarding any enclosed documents please contact Joshua Monforte, Citation and Fine Analyst at (916) 518-3014.

JURISDICTION: Bus. & Prof. Code § 4314; CCR, title 16, § 1775; Bus. & Prof. Code § 4301, subd. (o)

VIOLATION CODE SECTION	OFFENSE
CCR, Title 16, § 1751.3 subd. (a)	**Sterile Compounding Policies and Procedures; Any pharmacy engaged in compounding sterile drug preparations shall maintain written policies and procedures for compounding...**
CCR, Title 16, § 1751.4(a)	**Facility and Equipment Standards for Sterile Compounding; No sterile drug preparation shall be compounded if it is known, or reasonably should be known, that the compounding environment fails to meet criteria specified in the pharmacy's written policies and procedures for the safe compounding of sterile drug preparations**

CONDUCT:

Failure to follow policies and procedures: CCR 1751.3(a) states in pertinent part, any pharmacy engaged in compounding sterile drug preparations shall maintain written policies and procedures for compounding. Any material failure to follow the pharmacy's written policies and procedures shall constitute a basis for disciplinary action. RLS USA Inc. located at 1283 Mountain View, Alviso Rd Ste A-B, Sunnyvale, CA 94089 was not compliant. Specifically, on at least 12/30/22 and 6/26/23 RLS USA Inc. failed to immediately remove its ISO Class 5 PEC from use following air microbial contamination action level exceedance as required in RLS USA Inc.'s Standard Operating Procedure "6.3.1 Certification of ISO Classified Environments." This was a violation of pharmacy law.

Unsafe compounding of sterile drug preparations: CCR 1751.4(a) states, no sterile drug preparation shall be compounded if it is known, or reasonably should be known, that the compounding environment fails to meet criteria specified in the pharmacy's written policies and procedures for the safe compounding of sterile drug preparations. RLS USA Inc. located at 1283 Mountain View, Alviso Rd Ste A-B, Sunnyvale, CA 94089 was not compliant. Between at least 12/30/22 and 1/11/23, and between at least 6/26/23 and 7/14/23, RLS USA Inc. compounded sterile preparations in a laminar flow work bench which was identified as having microbial growth exceeding the action level defined in the pharmacy's written policies and procedures. This was a violation of pharmacy law.

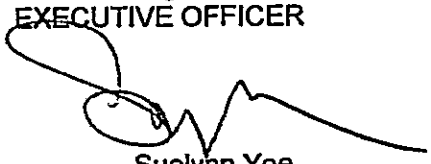
RE: CI 2024 105586
RLS USA INC
PHY 57866

The attached Citation and Fine, ("Citation") is being issued pursuant to Business and Professions Code section 125.9 and California Code of Regulations, title 16, section 1775 et. seq., for violations of the laws and regulations that govern the practice of pharmacy in California. (For exact language refer to the California Pharmacy Law and Index, located on the Board's web site, at www.pharmacy.ca.gov, under Pharmacy Law and Regulation).

The attached Citation references the specific statutes and regulations violated, defines each violation charged and specifies any fine(s) assessed. The attached Citation details the conduct that resulted in the issuance of the Citation.

IT IS YOUR RESPONSIBILITY TO READ THE ENTIRE CITATION AND INSTRUCTIONS, TO UNDERSTAND THE PROCESS FOR CONTESTING THE CITATION AND TO RESPOND TO THE CITATION WITHIN THE FOLLOWING TIME FRAMES:



- November 10, 2024: Unless the Citation is contested payment of fine(s) must be received by the Board.
- October 25, 2024: Any contest of the Citation by request for an informal Office Conference must be received by the Board.
- November 10, 2024: Any contest of the Citation by request for a formal Appeal must be received by the Board.

The issuance of a Citation by the Board of Pharmacy is considered an administrative action and substantiated resolution of a complaint and/or investigation. If a hearing is not requested to contest the Citation(s), payment of any fine(s) shall not constitute an admission of the violation(s) charged. Payment in full of the fine(s) assessed shall be represented as a satisfactory resolution of the matter in any public disclosure. (Business and Professions Code section 125.9; California Code of Regulations section 1775).

Additionally, if, at the time of license renewal, the Board has not received full payment of assessed fine(s) and a request to contest the Citation has not been received within the time frames specified, the license shall not be renewed until the assessed fine(s) and renewal fee/s are paid in full.

If you have any questions regarding this Citation please contact Suelynn Yee, Citation and Fine Analyst at (916) 518-3013.

INSTRUCTION

Read the Following Carefully and Thoroughly

You are hereby served with a Citation issued by the Executive Officer of the California State Board of Pharmacy or her designee. The following instructions are provided to assist you in your timely completion of the Citation process.

PAYMENT OF FINE

- Payment must be made by **November 10, 2024.**
- Make check or money order payable to the Board of Pharmacy. Do not submit cash.
- Attach the enclosed "copy" of your Citation

Mail payment to: State Board of Pharmacy
Attn: Cashier
2720 Gateway Oaks Drive, Suite 100
Sacramento, CA 95833

Unless contested, Citations are final 30 days from the date of service. Payment of a fine is not an admission of the violation charged. A Citation becomes part of your record, and remains there for five years. It can be used as an aggravating factor for future violations. Citations are public information and as such may be released to the public in accordance with the Public Records Act and Information Practices Act.

CONTESTING THE CITATION (CCR §1775.4)

If you wish to contest all or part of your Citation you may request an informal office conference or an appeal before an administrative law judge, or both. If you wish to request both you must submit both forms. If you prevail at the office conference your request for an appeal shall be deemed withdrawn. Please note that the time frames that allow you to request an office conference and an appeal run concurrently. You must submit your request(s) according to the following instructions:

REQUEST FOR OFFICE CONFERENCE (CCR §1775.4 subd. (b))

- Complete attached "Request for Office Conference".
- Mail form to arrive at the Board office no later than October 25, 2024 to the address at the bottom of the form.
- You will be advised by the Board in writing as to the date and time of your appearance.
- You are allowed one postponement.

An office conference is not a hearing. It is an informal discussion of the events that took place, and an opportunity for you to present information and mitigating factors pertaining to the Citation that you would like considered. The Executive Officer and or her designee represent the Board of Pharmacy at this meeting. One other individual of your choice may accompany you to this meeting. Office conferences are not open to the public. There is no discovery available in this process. You will not be allowed to present or question witnesses. However, you may present any written statements or documents that you believe are relevant.

After your office conference, the Citation may be affirmed, modified or dismissed. You will be advised of the decision in writing within 14 calendar days from the date of the conference. If the Citation is affirmed you will have 30 days from the date of the decision letter to comply with the conditions of your Citation. If the Citation is modified, the Citation originally issued shall be considered withdrawn and a new Citation will be issued. The decision issued after the office conference shall be deemed to be a final order with regard to the Citation issued, including the administrative fine levied, and/or an order of abatement.

REQUEST FOR APPEAL (CCR § 1775.4 subd. (a))

- Complete attached "Request for Hearing".
- Mail form to arrive at the Board office no later than November 10, 2024 to the address at the bottom of the form.
- You will be advised in writing as to the date and time of your hearing.

An appeal is a formal adjudicative hearing before an Administrative Law Judge. A Deputy Attorney General will represent the Board of Pharmacy at this hearing. These proceedings shall be conducted in accordance with the provisions of Chapter 5, commencing with Section 11500 of Part 1 of Division 3 of Title 2 of the Government Code.

If you have any questions regarding any documents enclosed please contact Suelynn Yee, Citation and Fine Analyst at (916) 518-3013.

BOARD OF PHARMACY
DEPARTMENT OF CONSUMER AFFAIRS
STATE OF CALIFORNIA

CITATION AND FINE

Citation Number	Name, License No
CI 2024 105586	RLS USA INC, PHY 57866

JURISDICTION: Bus. & Prof. Code § 4314; CCR, title 16, § 1775; Bus. & Prof. Code § 4301, subd. (o)

VIOLATION CODE SECTION	OFFENSE	AMT OF FINE
Bus. & Prof. Code § 4113(F)	Pharmacist-in-Charge: Notification to Board; if a pharmacy is unable, in the exercise of a reasonable diligence, to identify within 30 days a permanent replacement pharmacist-in-charge to propose to the board on the notification form, the pharmacy may instead provide on that form the name of any pharmacist who is an employee, officer or administrator of the pharmacy...	$500.00
Bus. & Prof. Code § 4305 subd. (b)	Operation of a pharmacy for more than 30 days without supervision or management by a pharmacist-in-charge shall constitute grounds for disciplinary action	$1,000.00

CONDUCT:

Business and Professions Code section 4113(f) requires a licensee to, when unable to identify a permanent pharmacist-in-charge within 30 days of the date when a pharmacist-in-charge (PIC) ceases to act, provide the name of a pharmacist, owner, or manager to act as an interim pharmacist-in-charge for a period not to exceed 120 days. Specifically, on March 13, 2024, the Board received an Application for Change of Pharmacist-In-Charge from RLS USA Inc, which had been signed under penalty of perjury by a corporate officer, the disassociated PIC, and the newly designated PIC. The form indicated that the prior interim PIC, Anahita Malekakhlagh (RPH 73484), had disassociated on March 11, 2024 and that Scott Hudek (RPH 49826) took over as the permanent PIC on the same date. However, Anahita Malekakhlagh's (RPH 73484) interim period, which had begun on August 25, 2023, had previously expired on December 22, 2023. Anahita Malekakhlagh (RPH 73484) acted as the interim PIC from August 25, 2023 to March 11, 2024, 199 days.

Business and Professions Code section 4305(b) authorizes the Board to take disciplinary action against a licensee for operation of a pharmacy for more than 30 days without the supervision or management of a pharmacist-in-charge (PIC). Specifically, on March 13, 2024, the Board received an Application for Change of Pharmacist-In-Charge from RLS USA Inc, which had been signed under penalty of perjury by a corporate officer, the disassociated PIC, and the newly designated PIC. The application declared that Scott Hudek (RPH 49826) had taken over as the permanent PIC on March 11, 2024. However, as RLS USA Inc failed to pay their Application for Change of Pharmacist-In-Charge's application fee until July 11, 2024, the Board was unable to approve Scott Hudek (RPH 49826) as the permanent PIC until July 11, 2024. RLS USA Inc operated without a Board approved PIC from March 11, 2024 through July 10, 2024, 121 days.

CITATION ISSUED ON: October 11, 2024	TOTAL AMOUNT OF FINE(S): $1,500.00
PAYMENT OF FINE(S) DUE BY: November 10, 2024	

NEVADA STATE BOARD OF PHARMACY
985 Damonte Ranch Parkway, Suite 206 – Reno, NV 89521 – 775-850-1440

Sterile Compounding Questionnaire

Rev (09/11/2024)

This application cannot be returned by fax or email.
We must have an original signature to process.

Approval of this completed questionnaire is required for an existing pharmacy, new pharmacy and/or out-sourcing facility applicant who wish to engage in preparing, compounding, dispensing, and furnishing sterile compounded products to Nevada patients or consumers.

Please provide a thorough response to the questions below and provide any necessary supporting documents.
-For a new pharmacy or out-sourcing facility applicant, submit this completed form with your application.
-For an existing pharmacy, send the completed form to the address indicated above.

Section 1: General Information

Pharmacy Name: RLS (USA) Inc.

NV Pharmacy or Outsourcing facility license # (if applicable): PH04663

City: Wood Dale State: IL Zip: 60191

Mailing Address (if different from physical address): Same as physical Address

City: N/A State: N/A Zip: N/A

Telephone: 603-595-6642 Toll Free # (NAC 639.708, NRS 639.23286): 800-242-8004

Fax: 603-595-8583 Contact Email: licensing@rls.bio

Website: https://rls.bio/

Nevada Business License # (if applicable) N/A

Supervising/Managing Pharmacist Name (NRS 639.220): Arasally Rodriguez

Supervising/Managing Pharmacist NV Pharmacist Registration #: 24298

Name of Designated Person(s) as defined by revised USP-797 guidelines: Arasally Rodriguez

Email of Designated Person(s): licensing@rls.bio

Telephone of Designated Person(s): 603-595-6642

Section 2: Sterile Compounding Questions (Use a separate piece of paper if additional space is needed.)

1. What risk level sterile compounding will your facility be performing (check all that apply)?

☐ Category 1 ■ Category 2 ☐ Category 3

If you marked **"Category 3"**, you must also complete **section 4.**

2. If compounding Category 2 products is the location performing sterility and endotoxin testing (if required) to obtain extended beyond-use dates? ☐ Yes ■ No

3. If compounding Category 2 products is the location performing aseptically processed CSPs or terminally sterilized CSPs? ■ Aseptic ☐ Terminal

4. Is the pharmacy following the new garbing requirements listed in the revised USP-797 guidelines? ■ Yes ☐ No

5. When was the most recent certification for the ISO classified areas? 2/4/25

6. What is the frequency of the recertification for the ISO classified areas? every 6 months

7. Were there any follow-up items required from the most recent certification report? ☐ Yes ■ No

8. If preparing Category 2 or Category 3 CSPs from non-sterile starting components are the pre-sterilization procedures such as weighing and mixing completed in an ISO Class 8 or better environment? ☐ Yes ■ No

9. If compounding Category 1 CSPs and Category 2 CSPs how often is surface sampling of all classified areas and pass-through chambers conducted? Monthly

10. Will you be performing sterile hazardous drug compounding? ☐ Yes ■ No

If you marked **"Yes"**, you must also complete **section 3.**

11. List the sterile compounded products that you will be compounding for Nevada patients or consumers:

Radiopharmaceutical only pepared or compounded in compliance with USP <825>

12. What laboratory performs your sterility or endotoxin testing?

Name: N/A

Address: _____

City: _____ State: _____ Zip: _____

Telephone: _____

13. What is your procedure for visual inspection of compounded sterile products?

Visual inspection of Radiopharmaceuticals in compliance with radiation safety ALARA principals.

14. How often do you perform glove fingertip and medial fill testing?

Every 6 Months

15. Describe your initial and ongoing training program for all personnel performing sterile compounding:

All new hires personnel performing sterile compounding must be licensed or registered in compliance with local regulations. Initial training is assigned based on job titles/duties performed through an electronic platform. Personnel are trained on all policies and procedures associated with their job duties. Annual retraining is tracked, completed, and maintained using the electronic platform.

16. Describe the cleaning procedure for your primary and secondary engineering controls, including the frequency of cleaning and the names of cleaning, disinfectant, sporicidal, and/or deactivation and decontamination agents used:

See attached SOP's 6.4.1, 6.4.1.1 and 6.4.1.2

17. Who performs the sterile compounding process at your facility?

All products are prepared by or under the direct supervision of the licensed, authorized nuclear pharmacist on duty.

18. Who is responsible and accountable for the sterile compounding process at your facility?

The PIC is responsible and accountable for the sterile compounding process.

19. If products are shipped/mailed, what shipping conditions are used to ensure product safety/efficacy?

RLS (USA) Inc. is a Nuclear Pharmacy dispensing radiopharmaceuticals in compliance with USP <825>. All transportation of prepared radiopharmaceuticals are completed by trained staff or contracted courier services in climate controlled vehicles in DOT-7A, Type A certified packaging designed and tested to maintain the quality and integrity of the product. Where temperature monitoring is required. RLS (USA) Inc. utilizes appropriate ColdMark indicators to ensure proper temperature is maintained during shipping.

Section 3: Sterile Hazardous Compounding Questions (Complete this section ONLY if you be performing Sterile Hazardous Compounding.)		
1. What type of primary engineering controls will you be using in your facility? N/A		
2. Are you complying with all USP 800 guidelines?	☐ Yes	☐ No
3. Have your employees who compound with hazardous drugs signed an acknowledgement that they understand the risks associated with this process?	☐ Yes	☐ No
4. Is your BSC or CACI vented 100% to the outside?	☐ Yes	☐ No
5. Do you have a negative pressure buffer room at your facility?	☐ Yes	☐ No
6. Will you be compounding with antineoplastic HDs or HD API?	☐ Yes	☐ No
7. If yes, are the drugs stored in an externally ventilated, negative pressure room?	☐ Yes	☐ No
8. Will you be utilizing a closed system transfer device?	☐ Yes	☐ No
9. If yes, list the name of the device:		

10. What information is provided to the patient or consumer on the proper handling and disposal of hazardous drugs products/containers?

11. Describe your initial process for training new employees prior to compounding sterile hazardous drugs?

Section 4: Sterile Category 3 Compounding Questions (Complete this section ONLY if you will be performing Category 3 Compounding.)

1. List the specific Category 3 sterile products that your facility compounds:
N/A

2. What is the frequency for ongoing garbing, gloved fingertip and thumb sampling, and media fill testing for compounding personnel?

3. Is the pharmacy meeting all of the additional garbing requirements for compounding Category 3 CSPs as defined by the revised USP-797 guidelines? ☐ Yes ☐ No

4. What is the frequency for completing volumetric active air sampling?

5. What is the frequency for completing surface sampling?		
6. What is the frequency for using sporicidal agents?		
7. Is an endotoxin test performed for all products compounded from one or more nonsterile component?	☐Yes	☐No
8. Is the BUD assigned supported by stability data obtained using a stability-indicating analytical method?	☐Yes	☐No

I certify under penalty of perjury that the information contained in this form is accurate, true and complete in all material respects. I understand that making any false representation in this form is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire form and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. In the event the form is approved I agree to comply with all applicable federal and state statutes and regulations governing this license or registration and understand that any violation may result in discipline.

Illinois Emergency Management Agency and Office of Homeland Security Office of Nuclear Safety	RLS (USA) Inc.	RAM	IL-01052-01 Exp: 3/31/2028

Inspector Notes: Facility non-resident licenses are held in Indiana and Wisconsin. The wholesale distributor license is maintained and was previously used for the distribution of I-123 Ioflupane, a C-II drug. Per the PIC, the wholesale distribution license was required by the DEA. The WD license is no longer used. There is no wholesale distribution at this time. There is no insulin stocked and no ReliOn insulin was observed. There are no platforms used that are a marketplace for pharmacies to buy, sell, or bid on overstock and short-date prescription drugs. There is no semaglutide compounded.

Documents collected as part of the inspection.
To obtain a copy of these documents please contact the facility directly. They are not included in the final report.

Definitions: DISPENSE means to provide a prescription product or compound pursuant to a patient-specific prescription.
DISTRIBUTE means to provide a prescription product or compound to a prescriber or health care entity for office use or stock and is NOT patient specific - is not labeled with the patient name at the pharmacy. HD means drugs on the National Institute for Occupational Safety and Health (NIOSH) list of HD such as hormones, chemotherapy, etc. There are currently no radiopharmaceuticals which are considered NIOSH HDs.

National Association of Boards of Pharmacy®
Verified Pharmacy Program® Inspection Form

Nuclear Pharmacy Inspection - General

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes
	General Pharmacy		
1.00	Is the Designated Person present for the inspection?	Yes	
2.00	Is the PIC (or nuclear pharmacy manager/director) present for the inspection? *If no, list the nuclear pharmacist on duty.*	Yes	
3.00	Are photographs allowed during the inspection (no Protected Health Information (PHI))?	Yes	
	General Operations and Licensure		
4.00	Are pharmacy licenses, permits and registrations (state, controlled substance, DEA, etc.) posted?	Yes	All facility and personnel licenses are posted on a bulletin board in the office area.
5.00	Is the RSO the same as is listed on the radioactive materials (RAM) license?	Yes	
6.00	Is the PIC an Authorized Nuclear Pharmacist (ANP) on the RAM license or other retrievable documentation as confirmed by the NRC or agreement state?	Yes	
7.00	Is the most recent board of pharmacy inspection report available for review? *Record the date of the last inspection and how frequently the pharmacy is routinely inspected by the board.*	N/A	There has been no inspection by the Illinois Board of Pharmacy.
7.01	Were any deficiencies noted? *Indicate the deficiencies and note whether they were corrected.*	N/A	
8.00	Is the most recent NRC (and/or state radiation control agency) inspection report available for review? *If yes, note the state and the date of the inspection and frequency of inspections by other states.*	Yes	The last Illinois Emergency Management Agency inspection was dated 3/21/2023. The PIC is not aware of any regularly scheduled inspections by Illinois or any state.
8.01	Were any deficiencies noted? *Indicate the deficiencies and note whether they were corrected.*	Yes	Please see Doc01_Gen8.01 for the inspection deficiencies and the facility's response to and action plan for the noted deficiencies.

Verified Pharmacy Program® Inspection Form

Nuclear Pharmacy Inspection - General

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes
9.00	Has this pharmacy been inspected by any other state for which it holds a license? *If yes, note the state and the date of the inspection and frequency of inspections by other states.*	No	
10.00	Is the pharmacy operating under an exemption or restriction granted by the state in which the pharmacy is located or by any other state in which the pharmacy is licensed? *If yes, note the exemption or restriction.*	No	
11.00	Is the pharmacy operating under a waiver or variance granted by the state in which the pharmacy is located or by any other state in which the pharmacy is licensed? *If yes, note the waiver or variance.*	No	
12.00	Has the pharmacy been inspected or visited by the DEA? *If yes, indicate the inspection/visit date and note any deficiencies. Also note how frequently the pharmacy is inspected/visited by the DEA.*	Yes	The DEA inspected the facility on 8/11/2014 and left a Notice of Inspection Form DEA-82. The DEA does not regularly inspect the facility.
13.00	Has the pharmacy been inspected by the FDA? *If yes, indicate the inspection date and note any deficiencies, significant correspondence, or if a "483" was issued and date, and response and date. Also note how frequently the pharmacy is inspected by the FDA.*	No	
14.00	Has the pharmacy been inspected by the Environmental Protection Agency (EPA), Department of Transportation (DOT) or any other outside agency? *If yes, indicate the inspection date and note any deficiencies related to pharmacy practice.*	Yes	The DOT inspected the facility on 2/9/2006. The deficiency documented as a "Probable Violation" was "Failure to provide security awareness to a new employee. The company has no record of security awareness training for Dorsey Chappelle, hired Sept 2005." The deficiency was corrected.
15.00	Does the pharmacy hold any accreditations or certifications? *If yes, indicate which and collect most recent date of survey.*	Yes	The pharmacy holds an accreditation from The Joint Commission for Home Care Accreditation # 535863. dated 9/9/2022 and valid for 36 months.
16.00	Has the pharmacy held any accreditations or certifications in the past that they no longer hold?	No

National Association of Boards of Pharmacy®
Verified Pharmacy Program® Inspection Form

Nuclear Pharmacy Inspection - General

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes
17.00	Were any deficiencies detected on the last internal audit? *List date of last audit and note any deficiencies found and action plan to correct.*	Yes	The last internal audit was dated 12/14/2023. Please see Doc02_Gen17.00 for the full report including deficiencies and the corrective action plan.
	Policy and Management		
18.00	Are policies and procedures for the program maintained in the pharmacy in an immediately retrievable form? *Indicate if hard copy, electronic, or both.*	Yes	P & P are electronic and on the corporate shared drive.
19.00	Are the P&Ps reviewed and updated regularly? *Indicate the review frequency and who performs the reviews.*	Yes	The Management of Change program requires the PIC to review the P & P quarterly and make suggestions for improvement.
20.00	Are systems in place for the ongoing monitoring of state and federal laws/regulations for changes? *Give details of the system and resources, or indicate if it is a corporate process and who is responsible overall as well as at the site.*	Yes	The corporate RSO reviews state and federal regulations and communicates them to the facility. The PIC receives bulletins and emails from the boards of pharmacy for the licensed states.
21.00	Is there a statement in the P&P, or are other means used to ensure that the most stringent laws/regulations are followed? *Describe system details.*	Yes	This is part of the corporate P & P.
22.00	Does the pharmacy maintain all required records, including but not limited to prescription files, on site? *Record how long records are kept. If not on site, where?*	Yes	All records are maintained onsite. Record retention varies with the record type, with prescription records maintained for five years.

Verified Pharmacy Program® Inspection Form

Nuclear Pharmacy Inspection - General

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes
23.00	Does the pharmacy have access to appropriate law references including state and federal regulations (including state regulations for all states in which the facility is licensed and NRC)? *Indicate if they are hard copies or are accessed online (demonstrate access) or both.*	Yes	Access to law references is both hard copy and electronic.
24.00	Does the pharmacy have access to other references as required by state law? (eg appropriate dosage and toxicology references). *Indicate if they are hard copies or are accessed online or both.*	Yes	Dosage and toxicology references are both hard copy and electronic.
25.00	Does the pharmacy have access to appropriate practice specific references? Nuclear, geriatric, pediatric, etc. *List and indicate if hard copy or online or both.*	Yes	Practice-specific references are both electronic and hard copy. The most frequently used are the hard copies of Fundamentals of Nuclear Medicine, by Stabin, and Radiopharmaceuticals in Nuclear Pharmacy and Nuclear Medicine, by Kowalsky.
26.00	Are Safety Data Sheets (SDS) [formerly known as Material Safety Data Sheets (MSDS)] up to date and available to personnel for drugs and chemicals used in the pharmacy (including those for compounding, if applicable)? *Verify that personnel can access them and are familiar with the format.*	Yes	
27.00	Does the pharmacy have a hazardous waste handling and collection system? *Indicate how often waste is collected and the vendor(s) used.*	Yes	Hazardous waste is picked up by Stericycle on as needed basis.
	Product Ordering, Receipt and Inventory		
28.00	Is the pharmacy restricted to buying prescription drugs from certain WDs or manufacturers?	Yes	
28.01	If restricted, does the PIC approve the vendors? *If not, who does approve (corporate)?*	No	
29.00	Are all orders received when the pharmacy is open or placed in a secure area if the pharmacy is closed?	Yes	Orders are received only when the pharmacy is staffed and a pharmacist present.

Verified Pharmacy Program® Inspection Form

Nuclear Pharmacy Inspection - General

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes
30.00	Does the pharmacy purchase any compounded radiopharmaceuticals from other entities for dispensing to patients? *If so, describe which compounded radiopharmaceuticals and from where they are purchase (collect name and license of other entity).*	No	
31.00	Does the pharmacy make any sterile or nonsterile compounded radiopharmaceuticals using bulk powder or liquid (APIs)? *Indicate bulk products and vendors used.*	No	
32.00	Does the pharmacy use active ingredients that are not from an FDA facility? *If so, indicate sources.*	No	
33.00	Does the computer system track on-hand quantities of products? *Who can adjust the on-hand quantities, and are adjustments tracked?*	Yes	Only a pharmacist can adjust quantities and all entries and adjustments are tracked.
34.00	Are orders generated and sent by the computer for prescription products, including controlled substances? *Who can alter the orders before they are sent?*	No	A pharmacist must process the order. There are standing orders for generators.
35.00	Does the pharmacy maintain required inventories (such as change in PIC, theft/loss, etc)? *Indicate which.*	N/A	There are no controlled substances stocked.
36.00	Are incidents of diversion or resignation/termination of personnel for cause reported? *Indicate agencies/law enforcement to whom reports are made.*	Yes	The Board of Pharmacy would be notified and local law enforcement may be contacted dependent on the circumstances.
37.00	Does the pharmacy have a complete physical inventory of products performed at least once yearly? *If cycle counting, indicate the process.*	Yes	There is a monthly inventory and reconciliation with the system records.
38.00	Does the pharmacy have a system in place to track prescription drug products in order to detect diversion or theft? *Describe process (for example, inventory or shrink report tools used, perpetual inventory in computer, etc).*	Yes	There is a perpetual inventory in the pharmacy system.
39.00	Are all products inspected upon receipt to detect any packaging issues, damage, etc.? *Describe what happens if products are damaged.*	Yes	Damaged RAM material requires a notification to the RSO who determines handling. Non-RAM material is quarantined and the source is notified of the issue.

National Association of Boards of Pharmacy®
Verified Pharmacy Program® Inspection Form

Nuclear Pharmacy Inspection - General

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes
40.00	How are outdated, damaged, or recalled products segregated? *Indicate how often the pharmacy checks for out-of-date products.*	Yes	The system maintains expiration dates and expiration dates are reviewed at the time of use. There is no regularly scheduled review of expiration dates.
41.00	Are non-RAM expired or damaged products destroyed on site? *View documentation. If "no", note the name of the reverse distributor.*	No	Stericycle is the reverse distributor.
	Prescription/Order Processing		
42.00	Are any portions of the prescription processing performed at a different location? *If so, explain. Indicate whether there is a central fill/central processing agreement in place.*	No	
43.00	Does the pharmacy obtain a copy or verify of the RAM license (of the facility to which the radiopharmaceutical will be delivered) issued by the State Radiation Control Agency or the NRC?	Yes	
44.00	Is there a procedure to obtain a RAM license for the facility when a license cannot be obtained or verified?	Yes	The facility is contacted for license verification or a timely renewal letter. The state may be contacted for validation of the facility RAM license if necessary.
45.00	Does the pharmacy have electronic prescription capability? *Indicate whether it is for non-controlled substances, controlled substances, or both.*	Yes	The facility uses WebOLO for online ordering.
46.00	Is the pharmacy computer system provided routine maintenance and is the information backed up? *Indicate the frequency of backup and if the backup data is stored off site .*	Yes	The system is backed up daily, and maintained on corporate servers and a cloud.
47.00	Is there a continuity plan should the system become inoperable? *Describe how data will be retrieved.*	Yes	There is a local backup system that allows full operation. When the main system is operable, the data from the backup system must be re-entered.

National Association of Boards of Pharmacy®
Verified Pharmacy Program® Inspection Form

Nuclear Pharmacy Inspection - General

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes
	Patient Profiles and Communication		
48.00	Does the patient information gathered include patient contact information, age or date of birth, and gender, as required by the State Board of Pharmacy?	Yes	Only the patient's name is normally provided. The facility may require and request the patient's weight for some doses.
49.00	For therapy doses, does the pharmacy receive appropriate information to assess correct dosage, such as geriatric or pediatric weight-based doses, as required by the State Board of Pharmacy and/or Radioactive Materials Regulatory Agency?	Yes	
50.00	Does the pharmacist perform an evaluation of the dose, safety, and intended use of the preparation to be compounded?	Yes	The radiologist may be contacted for information if necessary.
51.00	Does the pharmacy take back prescription drugs from customers (eg clinic, prescriber, etc.)? If so, describe.	Yes	Unused doses may be accepted from prescribers or clinics and destroyed.
52.00	Are providers instructed on the signs of product instability or contamination (as appropriate) and to report any changes in the physical characteristics of the product to the pharmacy?	Yes	
	Patient Confidentiality		
53.00	Is there a HIPAA policy in place for employees, vendors, and contractors?	Yes	
54.00	Do employees deemed nonessential to patient care have access to confidential patient information, such as delivery personnel, etc.?	No

National Association of Boards of Pharmacy®
Verified Pharmacy Program® Inspection Form

Nuclear Pharmacy Inspection - General

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes
55.00	Is access to the pharmacy system limited to appropriate personnel? *Password protected, access limited by job type, access revoked as appropriate such as upon termination, access to patient information in the computer is tracked.*	Yes	Passwords are assigned by corporate IT with access based on the employee's role. Access is revoked upon termination of employment. All access into the system is tracked.
56.00	Are confidential documents shredded? *Indicate if In-house or by a service and list service in notes if applicable.*	Yes	Shred-It is used.
57.00	Does the pharmacy destroy PHI including labeled prescription vials?	Yes	There are no vials used.
58.00	Does the crisis plan include security of paper and electronic patient information?	Yes	
	Prescription Packing and Transporting		
59.00	Does the pharmacy utilize employee drivers to deliver prescriptions to patients and/or facilities?	Yes	
60.00	Does the pharmacy utilize other services/carriers to deliver prescriptions to patients and/or facilities? *Indicate carriers used.*	No	
61.00	Is there is a tracking system in place to verify delivery of prescription products? *Indicate if signatures obtained or how tracked.*	Yes	An Apple Encore GPS tracking system is used with iPhones assigned to each driver. The package barcode is scanned and the barcode at the facility is scanned and must be a match.
62.00	Are deliveries of RAM directly to a secure location at a health care facility?	Yes	
63.00	Is only authorized packaging used?	Yes	
64.00	Is the packaging tamper-evident?	Yes	WBC packages are padlocked. Other deliveries use shrink wrap on the pig and zip ties on the carton.

Nuclear Pharmacy Inspection - General

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes
	Personnel Qualifications		
65.00	Is there a process for periodic verification of validity of personnel licenses (registrations)? *Describe the process.*	Yes	The PIC maintains a spreadsheet of all personnel licenses and reviews the primary source verification website annually.
66.00	Are all personnel wearing name tags that clearly identify if they are a pharmacist or a technician? *What about other positions?*	Yes	All employees wear a picture ID with name and position held.
67.00	If the pharmacy uses relief personnel from outside agencies to perform sterile compounding, the training and certifications are verified. *View documentation.*	N/A	
68.00	Does the pharmacy have a technician policy that specifies what a technician is allowed and not allowed to do?	Yes	
69.00	Does the pharmacy maintain the proper technician-to-pharmacist ratio? *Indicate ratio used and the maximum number of staff who work at the same time.*	Yes	The maximum number of licensed personnel working at any time is one technician and three pharmacists
70.00	Do employees undergo background checks upon hire? *Indicate if performed periodically for existing employees.*	Yes	Only initial criminal background checks are performed.
71.00	Do employees undergo drug testing upon hire? *Indicate if performed periodically for existing employees and if it is random, for cause, or both.*	Yes	There is a voluntary post-accident drug testing policy.
72.00	Is there a performance review process and is it documented? *If yes, how often?*	Yes	The performance review is an annual process.
73.00	Is a procedure for corrective or disciplinary action in place and documented?	Yes

Nuclear Pharmacy Inspection - General

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes
	Facility and Security		
74.00	Is entry to prescription product storage and processing areas limited to task-critical employees?	Yes	
75.00	Is entry into the handling areas limited to task-critical employees (limited to only the pharmacist(s) and other trained and authorized pharmacy personnel)?	Yes	
76.00	Are drugs secured to prevent unauthorized removal or access?	Yes	
77.00	Does the pharmacy have a working security/alarm system in place? *If yes, describe.*	Yes	ADT manages the security system which consists of magnetic door sensors, motion detection devices, and glass break sensors. The main door is a keyed lock with key pass access for all other doors. Access is based on the employee's job description and role. Alarms are sent by phone call and text message to the PIC, and a phone tree if there is no response.
78.00	Does the pharmacy have cameras? *If yes, record how long images are retained.*	Yes	Images are maintained for 90 days or more.
79.00	Does anyone have access to the pharmacy after hours in the absence of the pharmacist? *Explain.*	No	
80.00	Do pharmacy staff remain in the pharmacy if the pharmacist is absent on a meal break?	Yes	
80.01	If so, is there a policy regarding what activities may or may not be allowed during the pharmacist's absence?	Yes

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Nonsterile Radiopharmaceuticals			1.1
1.00	Does the pharmacy compound nonsterile radiopharmaceuticals? *If so, list which of the following do they compound (eg Oral Capsules, oral solutions, other (if other, list those products in the notes)).*	Yes	Oral capsules and oral solutions are compounded.	1.1
2.00	Does the pharmacy obtain conventionally manufactured nonsterile drug products for dispensing? *If so, list those products in the notes.*	No		1.1
3.00	Does the pharmacy obtain compounded nonsterile preparations from 503B-registered outsourcing facilities for dispensing? *If so, list those products/outsourcers in the notes.*	No		1.1
	Sterile Radiopharmaceuticals			1.2
4.00	Does the pharmacy compound sterile radiopharmaceuticals? *If so, list which of the following do they compound in the notes. (eg, intravenous, intrathecal, intraperitoneal, subcutaneous, intradermal, inhalations, ophthalmics, intra-organ instillations)*	Yes	The pharmacy compounds intravenous and inhalation radiopharmaceuticals.	1.2
5.00	Does the pharmacy obtain conventionally manufactured sterile drug products for dispensing? *If so, list those products in the notes.*	Yes	In111 DTPA	1.2
6.00	Does the pharmacy obtain compounded sterile preparations from 503B-registered outsourcing facilities for dispensing? *If so, list those products/outsourcers in the notes.*	No		1.2
7.00	Does the pharmacy compound sterile preparations involving one or more nonsterile components?	No		1.2
8.00	If the pharmacy compounds sterile preparations requiring a sterilization procedure, is testing (eg filtration with bubble point testing) performed prior to dispensing?	N/A		1.2
9.00	If the pharmacy compounds injectable sterile preparations involving one or more components that are not certified to be pyrogen-free, is pyrogen testing performed prior to dispensing?	N/A		1.2

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Immediate Use of Sterile Radiopharmaceuticals			3
10.00	Does the pharmacy prepare and dispense sterile radiopharmaceuticals in a patient care setting as immediate use?	No		3
11.00	Does the pharmacy prepare immediate use sterile radiopharmaceuticals in an ambient environment without primary or secondary engineering controls?	N/A		3
12.00	Does handling for immediate use sterile radiopharmaceuticals in an ambient environment lacking primary and secondary engineering controls when intended for a single patient meet the following requirements? as applicable:	N/A		3
12.01	Are preparations (including minor deviations) and/or dispensing limited to use for a single patient?	N/A		3
12.02	Are preparation (including preparations with minor deviations) components sterile, conventionally manufactured drug products (eg, NDA, ANDA)?	N/A		3
12.03	Are dispensing of drug products produced under an approved IND or RDRC protocol?	N/A		3
12.04	Are manipulations for any unit doses (eg, decreasing the dosage, needle changes) or dispensing for one patient (eg, withdrawing a dose) ?	N/A		3
12.05	Are preparations labeled for administration within 1 hour of the first container puncture or exposure of any critical site involved (eg, syringe tip, needle hub or needle) to ambient air, whichever is first?	N/A		3
12.06	Are all components involved (eg, Tc-99m sodium pertechnetate syringe or vial, final prepared radiopharmaceutical kit vial, diluent vial) discarded within 1 hour of being punctured or after use for a single patient administration, whichever is first?	N/A		3
12.07	Does the pharmacy indicate that dose pooling (combining doses from two or more syringes to meet one patient's need) is performed as immediate use? Is any residual activity that remains is immediately discarded and not utilized for any other patient?	N/A		3

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
12.08	Does pharmacy staff follow proper hand hygiene and garbing?	N/A		3
12.09	Does the pharmacy follow 10.4 Preparation of Radiolabeled Red Blood Cells for Immediate Use for red blood cell labeling?	N/A		10.4
12.10	Does the pharmacy follow 12.2 Labeling for labeling?	N/A		12.2
12.11	Is area for sterile preparation and/or dispensing functionally separate from nonsterile compounding area (eg, radiolabeling food) during the time of use?	N/A		
12.12	Does the pharmacy require a segregated radiopharmaceutical processing area (SRPA), classified area, or PEC?	N/A		
12.13	Are the number of steps or punctures limited?	N/A		
12.14	Does the pharmacy require personnel to complete the aseptic qualifications as detailed in 4.1 Aseptic Qualifications (eg, aseptic technique training with documented assessment, media fill challenge, gloved fingertip testing)?	N/A		4.1
12.15	Is adding non-radioactive, sterile and commercially manufactured pharmaceutical(s) only applicable if performing immediate use. *While adding a non-radioactive, sterile and commercially manufactured pharmaceutical (eg, lidocaine) to a unit dose is otherwise considered compounding, it is allowed for immediate use purposes as long as all of the above are adhered to.*	N/A		
12.16	Is dose splitting (splitting a unit dose for administration to more than one patient) performed as immediate use?	N/A

Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
12.17	If performed, is dose splitting done in an ISO class 5 PEC in either an SRPA or in an ISO class 8 or better buffer area? *Note where this is performed.*	N/A		
	Personnel Qualifications, Training, and Hygiene			4
13.00	Are personnel trained to work with radiopharmaceuticals per policies and standard operating procedures (SOPs) authorized by an ANP or AU (eg physician)?	Yes		4
14.00	Do personnel follow these policies or SOPs of the ANP or AU (eg physician) and work under their supervision?	Yes		4
14.01	Are personnel trained in blood-borne pathogens (as appropriate)?	Yes		4
15.00	Are individuals entering a handling area properly garbed and maintain proper personal hygiene to minimize the risk of contamination to the environment and/or radiopharmaceuticals?	Yes		4
15.01	Are individuals who have a condition that may pose a higher potential of contaminating the radiopharmaceutical and the environment with microorganisms (eg, rashes, sunburn, recent tattoos, oozing sores, conjunctivitis, or active respiratory infection) reported to their supervisor?	Yes		4
15.02	Is the designated person responsible for evaluating whether these individuals should be excluded from working in sterile processing areas before their conditions are resolved?	Yes		4
16.00	Have all personnel of reproductive capability who handle, or compound radiopharmaceuticals/radioactive materials confirmed in writing they understand the risks of handling radiopharmaceuticals/radioactive materials?	Yes		4
17.00	Is there documentation of training for other employees (including drivers, warehouse, receiving, administrative, clerks, etc.) who may have contact with radiopharmaceuticals/radioactive materials on handling the spills associated with these?	Yes		4

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
18.00	Can personnel demonstrate knowledge and can verbalize the principles of the safe use of RAM – time (working quickly/efficiently), distance (not handling RAM directly, using tongs), and shielding (using lead containers and shields in work areas)?	Yes		4
19.00	Can personnel demonstrate a knowledge of emergency procedures and are able to point out the locations of the eyewash station, emergency spill kit, and can verbalize how to handle contamination including reporting?	Yes		4
	Aseptic Qualifications		***Note to Inspector:*** *Check two (2) employee personnel files for documentation (1 RPh and 1 Tech), as appropriate*	4.1
20.00	Do personnel prove competency under the observation of a designated person, as applicable to their jobs, prior to performing radiopharmaceutical aseptic tasks (that are beyond immediate use). *Note– these can be completed at a different site if all SOPs are identical for the applicable job function.*	Yes	Files were reviewed for John Perino, pharmacist and Ryszarda Turala, technician.	4.1
21.00	Do the minimum qualifications include the following?	Yes		4.1
21.01	Aseptic technique with a documented assessment (written or electronic)	Yes		4.1
21.02	Garbing and hand hygiene, as defined by policies and SOPs	Yes		4.1
21.03	PEC cleaning and disinfecting	Yes		4.1

Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
21.04	Gloved fingertip and thumb sampling	Yes		4.1
21.05	Media-fill testing (not required for non-compounding personnel)	Yes		4.1
	Gloved Fingertip and Thumb Sampling			4.1
22.00	Is gloved fingertip and thumb sampling required for all personnel who enter and perform tasks in an ISO Class 5 PEC (eg, aseptic manipulations, cleaning the PEC)?	Yes		4.1
23.00	Is gloved fingertip and thumb sampling performed initially on both hands, immediately following hand hygiene and garbing?	Yes		4.1
23.01	Is successful completion of initial gloved fingertip and thumb sampling defined as zero colony- forming units (cfu)?	Yes		4.1
24.00	Is subsequent gloved fingertip and thumb sampling after media-fill testing defined as ≤3 cfu (total for both hands)?	Yes		4.1
25.00	Is the gloved fingertip and thumb sampling performed with touch plates or other devices (eg, plates, paddles, or slides) that contain a general microbial growth agar [eg, trypticase soy agar (TSA) soybean–casein digest media] supplemented with neutralizing additives (eg, lecithin and polysorbate 80) which support both bacterial and fungal growth?	Yes		4.1

Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
26.00	Per P&P review, gloves are not disinfected immediately before touching the sampling device.	Yes		4.1
27.00	Is a gloved fingertip and thumb sample from both hands collected by rolling finger pads and thumb pad over the agar surface, using a separate sampling device for each hand?	Yes		4.1
28.00	Are the plates incubated in an incubator at 30°–35° C for no less than 48 h, and then at 20°–25° C for no less than 5 additional days?	Yes		4.1
	Media-Fill Testing			4.1
29.00	Is media-fill testing done for all personnel who prepare, compound, dispense, and repackage sterile radiopharmaceuticals?	Yes		4.1
30.00	Is testing reflective of the actual manipulations to be carried out by the individual and simulate the most challenging and stressful conditions to be encountered in the worker's duties?	Yes		4.1
31.00	Are media-fill tests documented as defined by the facility's policies and SOPs?	Yes		4.1
32.00	*Recommendation: Are media-fill tests be performed at the end of a work session in the PEC.*	Yes		4.1
33.00	Are media-fill tests performed with a commercial source of soybean–casein digest medium?	Yes		4.1
34.00	Do those performing sterile-to-sterile processing activities start with sterile media?	Yes		4.1
35.00	Do those performing nonsterile-to-sterile compounding use a nonsterile soybean–casein digest powder to make a solution?	N/A		4.1

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
35.01	Is dissolved nonsterile commercially available soybean–casein digest medium in nonbacteriostatic water to make a 3% nonsterile solution?	N/A		4.1
35.02	Is the final media manipulated in a manner that simulates nonsterile-to-sterile compounding activities?	N/A		4.1
35.03	Is the final media prepared with at least 1 container as the positive control to demonstrate growth promotion, which is indicated by visible turbidity upon incubation?	N/A		4.1
36.00	Does the certificate of analysis (CoA) include documentation of growth promotion testing for each lot of media used?	Yes		4.1
37.00	Once the media-fill simulation is completed and the final containers are filled with the test medium, are the media filled containers incubated for 7 days at 20°–25° C followed by 7 days at 30°–35° C to detect a broad spectrum of microorganisms? Note: Failure is indicated by visible turbidity or other visual manifestations of growth in the medium in 1 or more container–closure unit(s) on or before 14 days.	Yes		4.1
38.00	In the event of failure, are results of the evaluation and corrective actions documented and the documentation maintained to provide a record and long-term assessment of personnel competency?	Yes		4.1
39.00	Do media and components used include the following?	Yes		4.1
39.01	manufacturer	Yes		4.1
39.02	expiration date	Yes		4.1
39.03	lot number	Yes		4.1
40.00	Does the documentation include at a minimum the following?	Yes		4.1

		Observations	Notes	USP Reference(s)
40.01	starting temperature for each interval of incubation	Yes		4.1
40.02	dates of incubation	Yes		4.1
40.03	results	Yes		4.1
40.04	name of the person evaluated	Yes		4.1
40.05	evaluation date	Yes		4.1
40.06	evaluation time	Yes		4.1
	Reevaluation, Retraining, and Requalification			4.2
41.00	Do personnel who fail visual observation of hand hygiene, garbing, and aseptic technique, gloved fingertip and thumb sampling, or media-fill testing successfully pass reevaluations in the deficient area(s) before they can resume processing of sterile radiopharmaceuticals?	Yes		4.2
42.00	Are all failures, retraining, and re-evaluations documented?	Yes		4.2
43.00	Do personnel successfully complete requalification in the core competencies via demonstrated through observation, written testing, and hands-on demonstration of skills?	Yes		4.2

Verified Pharmacy Program® Inspection Form

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Timing of Reevaluation and Requalification			4.2
44.00	**Visual observation**: Are personnel visually observed while performing hand hygiene, garbing SOPs, and aseptic technique procedures both initially, and then at least once every 12 months?	Yes		4.2
45.00	**Gloved fingertip and thumb sampling**: Do personnel perform fingertip and thumb sampling 3 times initially, and then every 12 months (in conjunction with media-fill testing).	Yes		4.2
46.00	**Media-fill testing:** After initial qualification, is a media-fill test of all personnel engaged in sterile radiopharmaceutical processing performed at least every 12 months (in conjunction with gloved fingertip and thumb sampling)?	Yes		4.2
47.00	**Cleaning and disinfecting:** Does the pharmacy retrain and requalify personnel in the cleaning and disinfecting of sterile processing areas every 12 months or in conjunction with any change(s) in cleaning and disinfecting SOPs, whichever is sooner?	Yes		4.2
48.00	**After a pause in sterile radiopharmaceutical processing:** Are personnel that have not performed radiopharmaceutical processing in more than 6 months requalified in all core competencies before resuming duties?	Yes		4.2
49.00	**Sterile compounding using a nonsterile drug substance or components:** Are personnel who perform sterile compounding using a nonsterile drug substance or components requalified in all core competencies every 6 months?	N/A	There are no nonsterile drugs or components used.	4.2

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Ancillary Personnel			4.3
50.00	Are personnel who are authorized to be within the sterile processing area and do not handle sterile preparations required to complete all training and testing other than training on media-fill testing ?	N/A	There are no personnel authorized to be within the sterile processing area who do not handle sterile preparations.	4.3
51.00	Do other personnel or visitors (eg, auditors, regulators, student observers) comply with garbing and gloving SOPs without the need to prove competency?	Yes		4.3
	Hand Hygiene and Garbing for Immediate Use Preparations			4.4
52.00	**Hand hygiene:** Do personnel wash hands and arms to the wrists with soap and water or use a suitable alcohol-based hand rub with a time based on institution policies to reduce bioburden on the hands?	Yes		4.4
53.00	**Garbing:** Immediately after hand hygiene, do personnel don a clean coat/gown that has not been exposed to a patient or patient care area, and either don sterile gloves or don nonsterile disposable gloves and then disinfect the gloves with sterile 70% IPA?	Yes		4.4
54.00	Is a different lab coat worn to care for a patient than the coat/gown used for radiopharmaceutical preparation?	N/A	There is no patient care area.	4.4
	Hand Hygiene and Garbing for Buffer Areas and Segregated Radiopharmaceutical Processing Area			4.5
55.00	Before entering the SRPA or buffer area, do personnel remove all the following (as applicable)? *(Radiation dosimetry devices are allowed, as required by the RAM license).*	Yes		4.5
55.01	Outer garments (eg, bandanas, coats, hats, jackets, sweaters, vests)	Yes		4.5
55.02	All cosmetics	Yes		4.5

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
55.03	All hand, wrist, and other exposed jewelry including piercings that could interfere with the effectiveness of the garbing	Yes		4.5
55.04	Nail products (eg, artificial nails, polish, extenders). {Natural nails kept neat and trimmed.}	Yes		4.5
55.05	Ear buds	Yes		4.5
55.06	Headphones	Yes		4.5
56.00	Are electronic devices that are not necessary for compounding or other required tasks banned from the SRPA?	N/A	There is no SRPA.	4.5
57.00	Do personnel don shoe covers, head/hair/facial hair cover(s) and face masks? Note – these items are donned in an order that eliminates the greatest risk of contamination, as defined in facility SOPs.	Yes	Dedicated shoes are used, or shoe covers for visitors.	4.5
58.00	Does the process before entering the buffer area or SRPA include the following?	Yes		4.5
58.01	Remove visible debris from underneath fingernails under warm running water using a disposable nail cleaner	Yes		4.5
58.02	Wash hands and arms up the elbows with soap and water for at least 30 seconds and then dry using low-lint towels	Yes		4.5
58.03	Electronic hand dryers are not permitted	Yes		4.5

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
58.04	Hand antisepsis cleansing is performed using a suitable alcohol-based hand rub	Yes		4.5
58.05	Don a low-lint gown with sleeves that fit snugly around the wrist and enclosed at the neck. *Note: Disposable gowns are preferred.*	Yes	Gowns are laundered and not disposable.	4.5
58.06	If reusable gowns are used, a clean gown is donned daily.	Yes		4.5
58.07	Aseptically don sterile, powder-free gloves. Gloves completely and snugly cover the ends of the gown cuffs so that skin on the wrists and upper hands is completely enveloped.	Yes		4.5
59.00	Does the routine process include the following?	No		4.5
59.01	Do personnel periodically apply sterile 70% IPA to gloves while balancing the risk of radioactivity contamination; due to touching or handling potentially nonsterile materials?	No	The pharmacist observed during compounding frequently used sterile 70% IPA to sanitize the gloves. However, on one occasion during the observation, the pharmacist used the IPA, made notes on the documents, and then re-entered the hood without further sanitizing.	4.5
59.02	Do personnel inspect the gloves they are wearing for holes, punctures, radioactivity contamination, or tears?	Yes		4.5
59.03	If a defect, radioactivity contamination, or malfunction is detected, do personnel immediately do the following?	Yes		4.5
59.04	Remove the gloves	Yes		4.5
59.05	Repeat antiseptic hand cleansing using an alcohol-based hand rub	Yes		4.5
59.06	Don new sterile gloves	Yes		4.5
59.07	Personnel avoid touch contamination of container septa, needles, syringe and needle hubs, and other critical sites	Yes		4.5

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
60.00	Do exiting processes for buffer area or SRPA include the following?	Yes		4.5
60.01	Shoe covers, head/hair/facial hair cover(s), face masks and gloves are properly disposed of	Yes		4.5
60.02	New PPE is used for each re-entry	Yes		4.5
60.03	Gowns may be re-used within the same shift if maintained to minimize contamination (eg away from sinks)	Yes		4.5
60.04	Gowns are in a classified area or,	Yes		4.5
60.05	Gown are kept in (or immediately outside of) the SRPA	N/A	There is no SRPA.	4.5
	Facility Design and Environmental Controls			5.1
61.00	Is the facility is designed to minimize airborne contamination (for sterile radiopharmaceutical facilities)?	Yes		5.1
62.00	Is the facility is well-lighted?	Yes		5.1
63.00	Are the refrigerator and freezer restricted to drug products only (no food)?	Yes		5.1
64.00	Are the temperatures in classified areas and SRPA continuously maintained at 25 degrees C or cooler?	Yes		5.1

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
65.00	Are the temperatures monitored in the classified areas and SRPA each day that they are used, either manually or by a continuous recording device?	Yes	Temperatures are recorded manually once daily.	5.1
66.00	Are the temperature readings of the classified areas and SRPA documented at least once daily or stored in a continuous recording device and retrievable?	Yes	Temperatures are recorded manually once daily.	5.1
67.00	Are the temperature readings reviewed as described in the facility's SOPs?	Yes		5.1
68.00	Are free-standing air conditioners used within the classified area or SRPA?	No		5.1
69.00	Are temperature monitoring devices calibrated and verified for accuracy at least every 12 months or as required by the manufacturer?	Yes		5.1
70.00	*Recommendation: The humidity in classified areas and SRPA are continuously maintained at a relative humidity (RH) below 60%.*	Yes		5.1
71.00	Is the humidity monitored in the classified areas and SRPA each day that it is used, either manually or by a continuous recording device?	Yes	The humidity is recorded manually once daily.	5.1
72.00	Are the humidity readings of the classified areas and SRPA documented at least once daily or stored in a continuous recording device and retrievable?	Yes	The humidity is recorded manually once daily.	5.1
73.00	Are the humidity readings reviewed as described in the facility's SOPs?	Yes		5.1
74.00	Are free-standing humidifiers/dehumidifier used within the classified area or SRPA?	No		5.1

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
75.00	Are humidity monitoring devices calibrated and verified for accuracy at least every 12 months or as required by the manufacturer?	Yes		5.1
76.00	Is the designated person responsible to ensure the following?	Yes		5.1
76.01	Does each area related to sterile radiopharmaceutical processes meet the classified air quality standard appropriate for the activities to be conducted in that area?	Yes		5.1
76.02	Are ISO Class 5 PECs located, operated, maintained, monitored, and certified to have appropriate air quality?	Yes		5.1
	Types of Secondary Engineering Controls and Design:			5.1
77.00	Were placement of doors, door surfaces, and movement of the door, all of which can affect airflow, considered when designing doors for a sterile radiopharmaceutical processing facility?	Yes		5.1
78.00	Are tacky surfaces not used in ISO-classified areas?	Yes		5.1
79.00	Are the PEC located in a SEC?	Yes		5.1
80.00	When the PEC is located in an SEC which is an ISO-classified buffer room with an ante room, does all of the following apply?	Yes		5.1
80.01	Is the ISO-classified ante-room and buffer area separated from the surrounding unclassified areas of the facility with fixed walls and doors?	Yes		5.1

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
80.02	Are facility design and controls in place to minimize the flow of lower-quality air into the more controlled areas?	Yes		5.1
80.03	Is the air supplied to the classified areas introduced through HEPA filters that are located in the ceiling?	Yes		5.1
80.04	Are returns low on the wall unless a visual smoke study demonstrates an absence of stagnant airflow where particulate will accumulate?	Yes		5.1
80.05	Is a smoke study of the PEC repeated whenever a change to the placement of the PEC within the area is made?	Yes		5.1
80.06	Is the classified areas equipped with a pressure-differential monitoring system?	Yes		5.1
80.07	Does the ante-room have a line of demarcation to separate the clean side from the less clean side?	Yes		5.1
80.08	Is the ante-room entered through the less clean side, and the clean side is the area closest to the buffer area?	Yes		5.1
80.09	Is required garb worn prior to crossing the line of demarcation?	Yes		5.1
81.00	When the PEC is located in an SEC, which is an unclassified area, without an ante room or buffer area (aka SRPA), the following apply:	N/A		5.1
81.01	Only sterile radiopharmaceutical preparation, preparation with minor deviations, dispensing, and repackaging may be performed in an SRPA	N/A		5.1
81.02	The SRPA is located away from unsealed windows, doors that connect to the outdoors, and traffic flow which may adversely affect the air quality in the PEC.	N/A		5.1
81.03	A visible perimeter establishes the boundaries of the SRPA.	N/A		5.1

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
81.04	Access to the SRPA is restricted to authorized personnel and required materials.	N/A		5.1
81.05	An SRPA is not located adjacent to environmental control challenges	N/A		5.1
81.06	If the SRPA meets ISO Class 8 total airborne particle count specifications, it can also be used for storage and elution of non-direct infusion radionuclide generators (eg, Tc-99m)	N/A		5.1
82.00	If a pass-through is used to prevent influx of contaminants, both doors are never opened at the same time.	Yes		5.1
83.00	*Recommendation: Interlocking mechanisms are used in the pass-through(s).*	Yes		5.1
	The Radiopharmaceutical Processing Environment:			5.1
84.00	Is the PEC certified to meet ISO Class 5 or better conditions (3520 particle count (with limit ≥0.5 µm) per cubic meter) under dynamic operating conditions?	Yes		5.1
85.00	Is the airflow in the PEC unidirectional (laminar flow)?	Yes		5.1
86.00	Is "first air" at the face of the filter free from airborne particulate contamination?	Yes		5.1

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
87.00	Is the HEPA-filtered air supplied in the direct processing area (DPA) at a velocity sufficient to sweep particles away from aseptic processing areas and maintain unidirectional airflow as much as possible during operations, given the limitations added from the radiation shielding in the DPA?	Yes		5.1
88.00	Are in situ air pattern analyses via smoke studies conducted at the critical area to demonstrate unidirectional airflow and sweeping action under dynamic conditions?	Yes		5.1
	Types of PECs and Placement:			5.1
89.00	Does the placement of the PEC allow for cleaning around the PEC?	Yes		5.1
90.00	**Laminar airflow workbench (LAFW):** Does a LAFW used for preparing radiopharmaceuticals provide vertical unidirectional HEPA-filtered airflow?	Yes		5.1
91.00	In cases where the LAFW is located within the segregated containment area of a hot-cell, it is acceptable for a horizontal unidirectional HEPA-filtered airflow pattern to be utilized.	Yes		5.1
92.00	**Placement of PEC:** Is the PEC located out of traffic patterns and away from area air currents that could disrupt the intended airflow patterns inside the PEC?	Yes		5.1

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
92.01	If used only to prepare, prepare with minor deviations, dispense, or repackage sterile radiopharmaceuticals the ISO Class 5 PEC may be placed in an unclassified SRPA.	N/A	There is no SRPA.	5.1
92.02	If used to compound sterile radiopharmaceuticals, the PEC is located within an ISO Class 7 or better buffer area with an ISO Class 8 or better anteroom.	Yes		5.1
93.00	Is a dynamic airflow smoke pattern test performed initially and at least every 6 months to ensure that the PEC is properly placed into the facility and that workers understand how to utilize the unidirectional airflow to maintain first air as much as possible given the limitations added from the radiation shielding in the DPA?	Yes		5.1
	Air-Exchange Requirements		***Note to Inspector:*** *Airflow is measured in terms of the number of HEPA-filtered air changes per hour (ACPH). SRPA do not have an ACPH requirement.*	
94.00	For ISO-classified rooms, does the total ACPH maintain the ISO class under dynamic operating conditions?	Yes		
95.00	Are at least 15 ACPH of the total air change rate in a room come from the HVAC through HEPA filters located in the ceiling?	Yes		
96.00	Is there a minimum of 30 total HEPA-filtered ACPH supplied to ISO Class 7 areas?	Yes		
96.01	Does HEPA-filtered air from the PEC, added to the HVAC-supplied HEPA-filtered air, increase the total HEPA-filtered ACPH to at least 30 ACPH?	Yes		

Copyright © March 2024 National Association of Boards of Pharmacy® (NABP®). All rights reserved. Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
96.02	If the PEC is used to meet the minimum total ACPH requirements, is the PEC not turned off except for maintenance?	Yes		
96.03	Are both the ACPH from HVAC contributed from the PEC, and the total ACPH documented on certification reports?	Yes		
97.00	Is a minimum of 20 ACPH of HEPA-filtered air supplied to ISO Class 8 areas?	Yes		
97.01	Are ante-rooms where activity levels are high, required more HEPA-filtered ACPH to maintain ISO Class 8 under dynamic operating conditions?	Yes		
97.02	Are the total ACPH documented on certification reports?	Yes		
	Creating Areas to Achieve Easily Cleanable Conditions			5.2
	Classified Areas:			5.2
98.00	Are the surfaces of ceilings, walls, floors, doors, door frames, fixtures, shelving, work surfaces, counters, and cabinets in the classified area smooth, impervious, free from cracks and crevices, and non-shedding, so they can be cleaned and disinfected, and to minimize spaces in which microorganisms and other contaminants can accumulate?	Yes		5.2
99.00	*Recommendation: Surfaces are resistant to damage by cleaning agents, disinfectants, and tools used to clean.*	Yes		5.2
100.00	Are junctures between the ceiling and the walls and between the wall and the floor sealed to eliminate cracks and crevices where dirt can accumulate?	Yes		5.2
101.00	If ceilings consist of inlaid panels, are each panel caulked or otherwise sealed and secured to seal them to the support frame?	Yes		5.2
102.00	Are walls constructed of or covered with a durable material (eg, epoxy-painted walls or heavy-gauge polymer) and the integrity of the surface maintained?	Yes		5.2

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
103.00	Are panels joined together and sealed to each other and the support structure?	Yes		5.2
104.00	Do floors include coving to the sidewall or the juncture between the floor and wall are caulked?	Yes		5.2
105.00	*Recommendation: Classified areas minimize dust-collecting overhangs such as utility pipes, ledges, and windowsills.*	Yes		5.2
106.00	If overhangs or ledges are present, are they easily cleanable?	Yes		5.2
107.00	Is the exterior lens surface of ceiling light fixtures smooth, mounted flush, and sealed?	Yes		5.2
108.00	Are any other penetrations through the ceiling or walls sealed?	Yes		5.2
	SRPA:			5.2
109.00	Is the SRPA and all surfaces (eg, walls, floors, counters, equipment) within the SRPA clean, uncluttered, and dedicated to sterile radiopharmaceutical processing activities?	N/A		5.2
110.00	*Recommendation: Surfaces in the SRPA are smooth, impervious, free from cracks and crevices, and non-shedding, so they can be easily cleaned and disinfected, and to minimize spaces in which microorganisms and other contaminants can accumulate.*	N/A		5.2
111.00	*Recommendation: Surfaces are be resistant to damage by cleaning agents, disinfectants, and tools used to clean.*	N/A		5.2
112.00	*Recommendation: Dust-collecting overhangs such as utility pipes, ledges, and windowsills are minimized.*	N/A		5.2
113.00	If overhangs or ledges are present, are they easily cleanable?	N/A		5.2

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Water Sources:			5.3
114.00	*Recommendation: Sinks are hands-free use with a closed system of soap (ie, non-refillable).*	Yes		5.3
115.00	In facilities with an ante room and buffer room, is the sink placed inside or outside of the ante room? *Note placement, inside or outside.*	Yes	The sink is outside of the ante room.	5.3
115.01	If the sink is located outside of the ante-room, it is located in a clean space to minimize the risk of bringing in contaminants into the anteroom.	Yes	The sink is located in a clean space and well away from the anteroom door. The sink faucet showed significant signs of rust and deterioration. Please see Photo01_Nuclear115.01	5.3
115.02	If the sink is located inside the ante-room, describe where it is located.	N/A		5.3
115.03	The buffer area does not contain plumbed water sources [eg, sink(s), eyewash(es), shower(s), or floor drain(s)].	Yes		5.3
115.04	The ante room does not contain floor drain(s).	Yes		5.3
116.00	*Recommendation: If installed, sprinkler systems in classified areas are recessed & covered and are easily cleanable.*	Yes		5.3
117.00	In facilities with a SRPA design:	[redacted]	N/A	5.3
117.01	Is the sink accessible but located at least 1 m from the PEC and generators, if present?	N/A		5.3
117.02	Is the sink not located inside the perimeter of the SRPA?	N/A		5.3

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Placement and Movement of Materials:			5.4
118.00	Are only furniture, equipment, and other materials necessary permitted in the classified area or SRPA?	Yes		5.4
118.01	*Recommendation: Are furniture, equipment and materials low-shedding and easily cleaned & disinfected.*	Yes		5.4
118.02	Does the number, design, location, and manner of furniture, equipment and material installation not adversely impact environmental air quality and promote effective cleaning and disinfecting?	Yes		5.4
119.00	Are shipping carton(s) or other corrugated or uncoated cardboard not allowed in the classified area or SRPA?	Yes		5.4
120.00	Are carts used to transport components or equipment into classified areas constructed from nonporous materials with cleanable casters and wheels?	Yes		5.4
121.00	In a classified area, are carts not moved from the dirty side to the clean side of the anteroom unless the entire cart, including casters, is cleaned and disinfected?	N/A	Carts are not used to move materials in the anteroom. Carts are dedicated to the clean room only.	5.4
122.00	Are all items wiped with low-lint wipers and an appropriate disinfectant by personnel wearing gloves before they are brought into the clean side of ante-room(s), pass-through(s), into an SRPA or into an ISO 5 PEC?	Yes		5.4

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Classified Areas:			5.5
123.00	Are activities and tasks carried out within the buffer area limited to only those necessary?	Yes		5.5
124.00	Are food and drinks exposed in patient care and treatment areas not in the ante-rooms or buffer areas?	N/A	There are no patient care and treatment areas.	5.5
125.00	When processing activities require the manipulation of blood-derived or other biological material (eg, radiolabeling patient's or donor's blood cells) do the following occur?	Yes		5.5
125.01	Are the manipulations clearly separated from routine material-handling procedures and equipment used in radiopharmaceutical preparation activities?	Yes		5.5
125.02	Are manipulations controlled by specific SOPs to avoid any cross-contamination?	Yes		5.5

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Remote Aseptic Processing Involving a Hot-Cell:		*Note to Inspector: In settings where tasks are carried out within the hot-cell enclosure not within an ISO-classified space by remote means (ie, no direct intervention by personnel into the ISO Class 5 space), it is not necessary for personnel to don the garbing described in this chapter for that environment to carry out these aseptic manipulations or to perform other routine tasks in the general area where the hot-cell is located.*	5.6
126.00	Does a hot-cell device provide an inherent physical segregation for the ISO Class 5 aseptic processing area?	N/A	There is no hot cell in this facility.	5.6
127.00	If the hot-cell is located in an ISO-classified space, do personnel garb according to requirements of <825> for that environment?	N/A		5.6
128.00	If hand and arm incursions into the interior of the hot-cell occur causing personnel to stage the required materials and supplies, do personnel garb in relation to the contamination risk associated with the individual hot-cell/ISO Class 5 relationship?	N/A		5.6
129.00	For situations where a PEC device is located within a hot-cell, all the following apply:	N/A		5.6
129.01	Do dynamic airflow smoke pattern tests show that the staging of supplies and materials in the demarcated PEC area does not allow the influx of unclassified air into the PEC?	N/A		5.6
129.02	For interventions that are outside of the PEC, do personnel garb in nonsterile gloves and a low-particulate lab coat?	N/A		5.6
129.03	If the hot-cell has failed the airflow smoke pattern test, are personnel required to garb differently?	N/A		5.6
130.00	For situations where the hot-cell is an integrated HEPA filtration system with a clear demarcated area that is a PEC, the following apply:	N/A		5.6
130.01	Do dynamic airflow smoke pattern tests show that the staging of supplies and materials into the demarcated PEC area does not allow the influx of less than ISO Class 5 quality air into the PEC?	N/A		5.6

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
130.02	If a failure of the airflow smoke pattern test require personnel to garb in accordance with 4.5 Hand Hygiene and Garbing for Buffer Areas and Segregated Radiopharmaceutical Processing Area for all incursions into the PEC.	N/A		5.6
131.00	For other hot-cell/PEC configurations and technologies that may exist, the following apply:	N/A		5.6
131.01	Does verification (either by airflow smoke pattern tests or other manufacturer specified methods) ensure, upon each certification, that the staging of materials and supplies does not allow for the intrusion of less than ISO Class 5 air into the designated ISO Class 5 space?	N/A		5.6
131.02	Does failure of the airflow smoke pattern test require personnel to garb in accordance with 4.5 Hand Hygiene and Garbing for Buffer Areas and Segregated Radiopharmaceutical Processing Area for all incursions into the hot-cell?	N/A		5.6
	Environmental Controls:			5.7
132.00	Do all RAM users comply with the conditions specified in their approved RAM license application and regulations, and RAM license conditions may supersede the following requirements for environmental controls? Refer to the RAM license for pressure requirements, as applicable.	Yes		5.7
133.00	Do positive pressure environments have a minimum differential positive pressure of 0.02-inch water column between each ISO-classified area (eg, between the buffer area and ante-room)?	Yes		5.7
134.00	Is the pressure differential between the ante-room and the unclassified area no less than a positive 0.02-inch water column?	Yes		5.7
134.01	Is the buffer area, if present, positive pressure compared to the ante-room?	Yes		5.7

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
134.02	Is the ante-room, if present, positive pressure compared to unclassified portions of the restricted area?	Yes		5.7
135.00	Is the restricted area, in the presence of volatile or airborne radiopharmaceuticals, negative pressure compared to the unrestricted area?	Yes		5.7
136.00	Is the SRPA negative pressure compared to unrestricted areas in the presence of volatile or airborne radiopharmaceuticals (eg, I-131 sodium iodide and Xe-133 gas)?	N/A	There is no SRPA.	5.7
	Establishing and Maintaining Pressure Differentials:			5.7
137.00	Any time a pressure differential is required, is there a pressure monitoring device?	Yes		5.7
138.00	In a classified area, is a pressure differential monitoring system used to continuously monitor the pressure differential between the ante-room(s) and buffer area(s) and between the ante- room and the general environment outside the classified area(s) or area(s)?	Yes		5.7
139.00	Are the results from the pressure monitoring system reviewed and documented at least daily on days the area is used?	Yes		5.7
140.00	All pressure monitoring devices are tested for accuracy and required performance at least every 6 months.	Yes		5.7

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Ambient Atmosphere for Immediate Use Preparations:			5.7
141.00	All of the following requirements met in ambient atmosphere environments:	N/A		5.7
141.01	Is non-patient care space, functionally separate (not necessarily a different area) from the patient care area, such as a radiopharmaceutical handling space, or hot lab, in a hospital, clinic, or mobile coach?	N/A		5.7
141.02	Is there a designated area for medication preparation that is clean and free from clutter?	N/A		5.7
141.03	Is it a low traffic area (ie, limited number of people going in and out or moving around the area during times that radiopharmaceutical processing is being carried out)?	N/A		5.7
	SRPA with Vertical Flow ISO Class 5 PEC(s) for Radiopharmaceutical Preparations:			5.7
142.00	Does the SRPA with Vertical Flow ISO Class 5 PEC(s) for Radiopharmaceutical Preparations meet the following requirements?	N/A		5.7
142.01	Area surrounding the PEC may be ambient (unclassified) atmosphere.	N/A		5.7
142.02	Area is clean, uncluttered, and dedicated to the processing of radiopharmaceuticals.	N/A		5.7
142.03	Appropriate for preparation, preparation with minor deviations, repackaging, and dispensing of radiopharmaceuticals.	N/A		5.7
142.04	An area that is used to store and elute non-direct infusion radionuclide generators (eg, Tc-99m) must meet ISO Class 8 total airborne particle-count specifications.	N/A		5.7

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	An ISO Class 8 Buffer Area with Vertical Flow ISO Class 5 PEC(s) with an Adjacent ISO Class 8 Ante-Room:		***Note to Inspector** : Activities - preparation, preparation with minor deviations, repacking, and dispensing of radiopharmaceuticals; storage & elution of non-direct infusion radionuclide generators.*	5.7
143.00	ISO Class 8 Buffer Area with Vertical Flow ISO Class 5 PEC(s) with an Adjacent ISO Class 8 Ante-Room environment is appropriate for all activities listed in SRPA with Vertical Flow ISO Class 5 PEC(s) for Radiopharmaceutical Preparations.	N/A	The anteroom is ISO Class 7.	5.7
	An ISO Class 7 Buffer Area with Vertical Flow ISO Class 5 PEC(s) with an Adjacent ISO Class 8 Ante-Room:		***Note to Inspector** : Activities - preparation, preparation with minor deviations, repacking, and dispensing of radiopharmaceuticals; storage & elution of non-direct infusion radionuclide generators.*	5.7
144.00	ISO Class 7 Buffer Area with Vertical Flow ISO Class 5 PEC(s) with an Adjacent ISO Class 8 Ante-Room environment is appropriate for all activities listed in An ISO Class 8 Buffer Area with Vertical Flow ISO Class 5 PEC(s) with an Adjacent ISO Class 8 Ante-Room and sterile compounding.	N/A	The anteroom is ISO Class 7.	5.7
	Hot-Cell:		***Note to Inspector** : Activities - preparation, preparation with minor deviations, repacking, and dispensing of radiopharmaceuticals; storage & elution of non-direct infusion radionuclide generators.*	5.7
145.00	Hot-Cell environment is appropriate for all activities listed in SRPA with Vertical Flow ISO Class 5 PEC(s) for Radiopharmaceutical Preparations.	N/A	There is no hot cell.	5.7
	Certification of PEC and Environment in which the PEC is located:			5.7
146.00	Certification of the classified areas, including the PEC, is performed initially.	Yes		5.7
147.00	Recertification is performed at least every 6 months.	Yes		5.7
148.00	Procedures outlined in the current CETA certification guide for Sterile Compounding Facilities, or an equivalent guideline, are followed.	Yes		5.7

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
149.00	Airflow testing is performed to determine acceptability of the air velocity, the air exchange rate, and area pressure cascade to ensure that air consistently flows from most to least clean areas, and that the appropriate quality of air is maintained under dynamic operating conditions.	Yes		5.7
150.00	HEPA filter integrity testing is performed (HEPA filters are leak tested after installation and as part of recertification).	Yes		5.7
151.00	Total Particle Counts testing is performed and conducted under dynamic operating conditions using calibrated electronic equipment.	Yes		5.7
152.00	Smoke Visualization Studies are performed under either simulated or dynamic operating conditions to demonstrate unidirectional airflow and sweeping action over and away from the preparation(s).	Yes		5.7
153.00	Are other equivalents for certifying the PEC performed and documented per facility SOPs, in cases where technologies exist for hot-cell and PEC configurations that are not consistent for certification by the current CETA standards?	N/A		5.7
154.00	In this case, the PEC maintains the environmental equivalent for total particle counts and the protection of the ISO Class 5 area from intrusions of lesser controlled air.	N/A		5.7
	Daily Monitoring of Environment:			5.7
155.00	The temperature and humidity is monitored in the SRPA or area containing a hot-cell, and if in a classified area the pressure is monitored, each day that radiopharmaceutical handling occurs, either manually or by a continuous recording device.	Yes	This is performed manually.	5.7
156.00	Does Monitoring include the following?	Yes		5.7
156.01	*Recommendation: Relative humidity is kept at 60% or lower*	Yes		5.7

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
156.02	Are temperature continuous readings confirmed daily to have remained within the acceptable range?	Yes		5.7
156.03	Are relative humidity continuous readings confirmed daily to have remained within the acceptable range?	Yes		5.7
156.04	Are excursion documented and, if applicable, appropriate corrective actions taken?	Yes		5.7
156.05	Are temperature monitoring devices verified for accuracy every 12 months or as required by the manufacturer?	Yes		5.7
156.06	Are monitoring of pressure differentials performed?	Yes		5.7
	Microbial Air and Surface Monitoring:			6
157.00	Has the pharmacy developed and implemented written air and surface monitoring procedures for all sterile radiopharmaceutical classified areas?	Yes		6
158.00	Are air and surface monitoring results and the corrective actions documented, and records readily retrievable as required by jurisdictional laws and regulations?	Yes		6
	General Monitoring Requirements:			6.1
159.00	Is the air and surface monitoring program clearly described in the established SOPs of the facility and include a diagram of the sampling locations, SOPs for collecting samples, frequency of sampling, size of samples (eg, surface area, volume of air), time of day of sampling in relation to activities in the classified areas, and action levels that will trigger corrective action?	Yes		6.1
159.01	Are samples obtained from locations that pose the highest possible contamination risk to the sterile radiopharmaceuticals involved with the operation's processes and are likely to be representative of the conditions throughout the area?	Yes		6.1

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
160.00	Are personnel who operate the equipment trained in the proper operation of the air and surface sampling equipment to ensure accurate and reproducible sampling?	Yes		6.1
161.00	Are all air sampling devices serviced and calibrated as recommended by the manufacturer?	Yes		6.1
162.00	Does the microbiological air and surface monitoring program include viable impact volumetric airborne particulate sampling and surface sampling?	Yes		6.1
163.00	Are air and surface sampling performed initially for PECs & classified areas in a facility to establish a baseline level of environmental quality?	Yes		6.1
164.00	After initial sampling, are the PECs & classified area(s) monitored according to the minimum frequencies?	Yes		6.1
165.00	Are air and surface sampling conducted during actual or simulated dynamic operating conditions to confirm that the required environmental quality in classified areas is maintained?	Yes		6.1
166.00	Is sampling carried out at the conclusion of sterile radiopharmaceutical processing but prior to cleaning and disinfecting the surface area?	Yes		6.1
167.00	Is sampling performed in all of the following circumstances?	Yes		6.1
167.01	In conjunction with the certification of new facilities and equipment?	Yes		6.1
167.02	After any modification of facilities or equipment	Yes		6.1
167.03	In response to identified problems (eg, positive growth in sterility tests of compounded radiopharmaceuticals)?	Yes		6.1

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
167.04	In response to identified trends (eg, repeated positive gloved fingertip sampling results or failed media-fill testing involving more than one operator where a review of the operator technique shows no reasonable flaws in process; repeated observations of air or surface contamination)?	Yes		6.1
167.05	In response to changes that could impact the controlled area environments (eg, significant change in cleaning process or the agents involved)?	Yes		6.1
168.00	Is regular review of the sampling data performed to detect trends such as elevated levels of microbial bioburden, elevated levels of nonviable particulates, or other adverse changes within the environment?	Yes		6.1
169.00	Are results reviewed in conjunction with personnel data (ie, training records, visual observations, competency assessments) to assess the state of control and to identify potential risks of contamination?	Yes		6.1
170.00	Is Prompt corrective action in response to any adverse findings taken to maintain the necessary environmental quality for handling sterile radiopharmaceutical?	Yes		6.1
171.00	Is data also reviewed following corrective actions to confirm that the actions taken have been effective in achieving the required air and surface quality levels?	Yes		6.1
	Monitoring Air Quality for Viable Airborne Particles:			6.2
	Viable Air Sampling: Timing and Locations			6.2
172.00	Volumetric active air sampling of all classified areas (eg, ISO Class 5 PEC and ISO Class 7 and 8 areas) using an impaction device are conducted during dynamic operating or simulated operating conditions at least every 6 months.	Yes		6.2
173.00	Does viable air sampling include the following?	Yes		6.2

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
173.01	Following the manufacturer's instructions for operation of the air sampling device, including placement of media?	Yes		6.2
173.02	Using the sampling device, test at least 1 cubic meter or 1000 liters of air from each location sampled?	Yes		6.2
173.03	At the end of the sampling, retrieve the media plates/devices and cover?	Yes		6.2
173.04	Inverting the media and incubate at 30°–35° C for no less than 48 hours. Examine for growth. Record the total number of discrete colonies of microorganisms on each plate as cfu/m3 of air on an environmental sampling form based on sample type (ie, viable air). Include sample location and date?	Yes		6.2
173.05	Incubates the inverted media at 20°–25° C for no less than 5 additional days? Examines the media plates for growth? Records the total number of discrete colonies of microorganisms on each plate as cfu/m3 of air on an environmental sampling form based on sample type (ie, viable air)? Includes sample location and date?	Yes		6.2
174.00	To shorten the overall incubation period, can two samples be collected for each sample location and incubated concurrently?	No	The two-sample procedure is not used.	6.2
175.00	Both samples could be TSA, or one sample could be TSA and the other fungal media [eg, malt extract agar (MEA) or sabouraud dextrose agar (SDA)]. Describe samples in notes.	N/A		6.2
176.00	Each sample is incubated in a separate incubator.	N/A		6.2
177.00	One sample is incubated at 30°–35°C for no less than 48 hours and the other sample is incubated at 20°–25° C for no less than 5 days.	N/A		6.2

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
178.00	Fungal media samples are incubated at 20°–25° C for no less than 5 days.	N/A		6.2
179.00	The count of the total number of discrete colonies of microorganisms are done on each sample and these results are recorded as cfu per sample.	N/A		6.2
180.00	Are the results of the sampling recorded on an environmental sampling form based on sample type (ie, viable air) and include the sample location, and sample date?	N/A		6.2
181.00	Are general microbiological growth medium that supports the growth of bacteria and fungi used (eg, TSA medium)?	Yes		6.2
182.00	Do CoA(s) from the manufacturer verify that the medium meets the expected growth promotion, pH, and sterilization requirements?	Yes		6.2
183.00	Are samples incubated in a temperature monitored incubator with a calibrated measuring device?	Yes		6.2
184.00	Is the incubator temperature monitored during incubation, either manually or by a continuous recording device, and the results reviewed and documented?	Yes	Monitoring is manual.	6.2
185.00	Are the incubators used for microbiological testing placed in a location outside of any classified area or SRPA and kept away from areas where compounding or sterile processing activities are carried out?	Yes		6.2

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Data Evaluation and Action Levels:			6.2
186.00	Air Sampling Action Levels (cfu/cubic meter (1000L) of air per plate) are within the appropriate range: *ISO Class 5 - >1* *ISO Class 7 - >10* *ISO Class 8 - >100*	Yes		6.2
187.00	Are cfu counts evaluated against the action levels and in relation to previous data to identify adverse results and/or trends?	Yes		6.2
187.01	If two pieces of media were collected at a single location, are all recovered growth documented and action levels are applied individually to each plate/device (ie, results from each cubic meter of air sampled are compared to the action level for that area)?	N/A		6.2
188.00	If levels measured during the viable air monitoring program exceed the action levels for the ISO classification levels of the area sampled, is the cause investigated, and corrective action is taken?	Yes		6.2
188.01	Is the corrective action plan dependent on the cfu count and the microorganism recovered?	Yes		6.2
188.02	If levels measured during viable air sampling exceed the levels, is an attempt made to identify any microorganism recovered to the genus level with the assistance of a qualified individual?	Yes		6.2
188.03	Is the corrective action plan documented?	Yes		6.2
188.04	*Recommendation: The extent of the investigation is consistent with the deviation and includes an evaluation of trends.*	Yes		6.2

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Monitoring Surfaces for Viable Particles:			6.3
189.00	Are all sampling sites and procedures described in the facility's SOP?	Yes		6.3
	Surface Sampling: Timing and Locations			6.3
190.00	Is surface sampling of all classified areas and all PECs conducted at least monthly for the detection of microbial contamination?	Yes		6.3
191.00	Is each classified area sampled?	Yes		6.3
192.00	Is the DPA of the PEC, and any equipment permanently contained in the PEC, sampled?	Yes		6.3
193.00	Are work surfaces in classified areas near the PEC, frequently touched surfaces in classified areas, and pass-through enclosure(s) for all classified areas evaluated to determine the locations that pose the greatest risk of harboring microbial contamination?	Yes		6.3
194.00	Is surface sampling performed at the end of the radiopharmaceutical aseptic activities or shift, but before the area has been cleaned and disinfected?	Yes		6.3
195.00	Do radiopharmaceutical personnel consider the appropriate exposure and contamination prevention measures prior to and while collecting samples?	Yes		6.3
196.00	If the worker assesses that the risk for exposure is not in conformance with ALARA safety standards, are measures taken to eliminate the risk (eg, implementation of appropriate shielding, performing the sampling at a later time or alternate day)?	Yes		6.3

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Sampling Procedures:			6.3
197.00	Are surface sampling devices (eg, plates, paddles, or slides) containing microbial growth media used for sampling flat surfaces?	Yes		6.3
198.00	Are CoAs from the manufacturer verified that the media meet the expected growth promotion, pH, and sterilization requirements?	Yes		6.3
199.00	Do surface sampling devices contain general microbial growth media (eg, TSA) supplemented with neutralizing additives (eg, lecithin and polysorbate 80) to neutralize the effects of any residual disinfecting agents?	Yes		6.3
200.00	If used, do contact plates have a raised convex surface?	Yes		6.3
201.00	Are sterile swabs wetted with sterile water or a sterile neutralizing buffer used when sampling irregular surfaces and difficult-to-reach locations, such as crevices, corners, and spaces between surfaces?	No		6.3
202.00	After sampling, is the sampled area thoroughly cleaned and disinfected?	Yes		6.3
203.00	Are the following procedures for surface sampling on flat surfaces used?	Yes		6.3
203.01	Remove the cover from the surface sampling device. Firmly press, using a rolling motion, if possible, the media surface onto the surface to be sampled. The surface sampling device will leave a residue of growth medium on the sample site. After sampling, use sterile 70% IPA to remove residue. Cover each surface sampling device.	Yes		6.3
203.02	If using plates, invert the plates.	Yes		6.3

Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Cleaning and Disinfecting			7
208.00	Are all cleaning and disinfecting activities performed by trained and appropriately garbed personnel using facility approved agents and procedures described in written SOPs?	Yes		7
209.00	Is cleaning performed in the direction of most to least clean areas?	Yes		7
210.00	Are the frequency, method(s), and location(s) of cleaning, disinfecting, and sporicidal agent use established in written SOPs, in accordance with the manufacturer's instructions when available, or based on sound microbiological cleaning techniques when unavailable, and followed by all cleaning personnel?	Yes		7
210.01	Is the manufacturer's direction or published data for the minimum contact time followed for the cleaning, disinfecting, and sporicidal agents used?	Yes		7
210.02	When sterile 70% IPA is used, is it allowed to dry?	Yes		7
211.00	Are all cleaning, disinfecting, and application of sporicidal agents documented according to facility SOPs?	Yes		7
212.00	Are surfaces cleaned prior to being disinfected unless an Environmental Protection Agency (EPA)-registered (or equivalent) one-step disinfectant cleaner is used to accomplish both the cleaning and disinfection in one step?	Yes	One-step Envirocide Surface Disinfectant Cleaner is used.	7
212.01	After cleaning and disinfecting or the application of a one-step disinfectant cleaner in a PEC, is sterile 70% IPA applied to remove any residue?	Yes		7

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
213.00	Does cleaning and disinfecting surfaces occur at the minimum frequencies in Table 5 or if activities are not performed daily, cleaning and disinfecting completed before initiating activities?	Yes		7
214.00	Is the act of reducing or removing radioactivity (radioactive decontamination) from an object or surface balanced with the risk of spreading radioactive contamination?	Yes		7
214.01	*Recommendation: Areas shielded until radiation exposure levels lowered.*	Yes		7
214.02	Is this balance specified in SOPs (eg, trigger levels for safe cleaning)?	Yes		7
214.03	*Recommendation: The PEC is checked for radioactive contamination prior to cleaning and disinfecting to prevent spreading radioactive contamination in the PEC.*	Yes		7
	Minimum Frequency for Cleaning and Disinfecting Surfaces in Classified Areas and within the perimeter of the SRPA:			7
215.00	Does Cleaning of the PEC(s) and equipment inside the PEC(s) and/or PEC and the equipment inside the PEC(s) located in a hot-cell occurs in the following situations?	Yes		7
215.01	Prior to performing sterile processing of radiopharmaceuticals on each day that activities are carried out, are the walls, bars, torso shield and any exposed surface of equipment inside the PEC cleaned to the extent possible as specified by the equipment manufacturer or the assessment of a qualified individual (eg, microbiologist or industrial hygienist)?	Yes		7
215.02	Is radioactive contamination shielded with appropriate temporary material, providing the material is covered with low-lint absorbent pads or has equivalent low shedding properties?	Yes		7

Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Cleaning, Disinfecting and Sporicidal Agents:		***Note to Inspector**: Some EPA-registered (or equivalent) one-step disinfectant cleaners may have sporicidal properties.*	7.1
220.00	Are cleaning and disinfecting agents selected and used with careful consideration of compatibilities, effectiveness, and user safety?	Yes	All agents used are determined by corporate.	7.1
221.00	Are considerations when selecting and using disinfectants include their anti-microbial activity, inactivation by organic matter, residue, shelf life, preparation requirements of the agent, and suitability for surfaces being disinfected?	Yes		7.1
221.01	After the disinfectant is applied on the surface to be disinfected, is the disinfectant allowed to dwell for the minimum contact time specified by the manufacturer, during which time the surface cannot be disturbed?	Yes		7.1
222.00	Is only sterile 70% IPA used in the ISO Class 5 PEC?	Yes		7.1
223.00	Are sporicidal agents used at least monthly on all surfaces in classified areas and SRPAs?	N/A	There is no SRPA.	7.1
	Cleaning Supplies:			7.2
224.00	Are all cleaning supplies (eg, wipers and mop heads), with the exception of tool handles and holders, low-lint?	Yes		7.2
225.00	*Recommendation: All cleaning supplies (eg, wipers and mop heads), with the exception of tool handles and holders are disposable.*	Yes		7.2

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
225.01	If disposable cleaning supplies are used, are they discarded after each cleaning activity?	Yes		7.2
226.00	Are reusable cleaning tools made of cleanable materials (eg, no wooden handles) and are cleaned and disinfected before and after each use?	Yes	All are stainless steel.	7.2
227.00	Are reusable cleaning tools dedicated for use in the classified areas or SRPAs and are not removed from these areas except for disposal?	yes		7.2
228.00	Are reusable cleaning tools discarded after an appropriate amount of time, to be determined based on the condition of the tools?	yes	Only handles and heads are reusable and are made of stainless steel.	7.2
229.00	*Recommendation: Cleaning supplies and solutions used in the classified areas and SRPAs are be monitored for radioactive contamination after use and prior to disposal, as per facility SOPs.*	Yes		7.2
230.00	Are cleaning supplies used in the classified areas and SRPAs disposed in a manner that minimizes the potential for dispersing particulates into the air (eg, with minimal agitation, away from work surfaces)?	Yes		7.2
	Cleaning and Disinfecting the PEC:			7.3
231.00	Is the PEC cleaned and disinfected at the minimum frequencies specified in Table 5?	Yes		7.3
232.00	If the PEC contains a removable work tray, are all sides of the work tray and the area underneath the work tray cleaned and disinfected at least monthly?	N/A	There is no removable work tray.	7.3

Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
233.00	If necessary are all surfaces of the PEC surveyed for radioactive contamination and follow facility SOPs to decontaminate?	Yes		7.3
234.00	If necessary, any particles, debris, or residue removed with an appropriate solution (eg, Sterile Water for Injection or Sterile Water for Irrigation) using sterile, low-lint wipers?	Yes		7.3
235.00	Is a cleaning agent applied followed by a disinfecting agent or an EPA-registered (or equivalent) one-step disinfectant cleaner and ensure that the contact time specified per manufacturer instructions is achieved?	Yes		7.3
236.00	Is sterile 70% IPA applied?	Yes		7.3
237.00	Are the surfaces allowed to dry completely before beginning activities?	Yes		7.3
238.00	Is the PEC wiped with a sporicidal agent at least monthly?	Yes		7.3
	Disinfecting Supplies for Classified Areas and SRPAs:			7.4
239.00	Are shipping carton(s) or other corrugated or uncoated cardboard prohibited in the classified area (eg, clean side of ante-room) or within the perimeter of the SRPA?	Yes		7.4
240.00	Before items are introduced into a classified area or SRPA, are they wiped with a sporicidal agent, EPA-registered (or equivalent) one-step disinfectant cleaner, or sterile 70% IPA using low-lint wipers?	Yes	Oxivir 1, a disinfectant cleaner is used, followed by sterile 70% IPA.	7.4

Verified Pharmacy Program® Inspection Form

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
241.00	After the sporicidal or sterile disinfectant is applied onto the surface, is the agent allowed to dwell on the surface for the minimum contact time specified by the manufacturer?	Yes		7.4
241.01	Is the agent used for disinfecting the packaging compatible with the packaging and not render the product label unreadable?	Yes		7.4
242.00	Are any items to be transferred into the PEC from the classified area or SRPA disinfected with a sterile disinfectant (eg, sterile 70% IPA)?	Yes		7.4
243.00	If radiopharmaceuticals are being processed by remote means in a hot-cell, the opening of sterile packages (eg, syringes, luer lock caps) may not be possible by remote means within the ISO Class 5 area.	[redacted]	N/A	7.4
243.01	In this case, are the syringes opened and appropriately labeled outside of the ISO Class 5 environment and placed in disinfected shielding, immediately prior to the forthcoming dispensing cycle?	N/A		7.4
	Disinfecting Critical Sites:			7.5
244.00	Are critical sites (eg, vial stoppers) wiped with sterile 70% IPA? Note: If the vial shield top is then closed, the septum is disinfected again with sterile 70% IPA prior to another needle puncture.	Yes		7.5
245.00	Is the critical site wiped ensuring that both chemical and mechanical actions are used to remove contaminants?	Yes		7.5
246.00	Is the sterile 70% IPA allowed to dry before piercing critical sites?	Yes		7.5
247.00	Is the septum wiped with sterile 70% IPA frequently whenever multiple punctures are occurring (eg, removing several individual doses from a multiple-dose container)?	Yes		7.5

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Cleaning and Disinfecting Items from Patient Care Area:			7.6
248.00	Is radiation shielding and equipment used in the classified area/SRPA or PEC that is exposed to patient care areas during the process of administration cleaned and disinfected before returning to any classified area (eg, buffer or ante-room) or SRPA in accordance with the Centers for Disease Control and Prevention Guidelines 1 classified as noncritical equipment requiring low-risk disinfection?	N/A	There is no patient care area.	7.6
249.00	Are syringes that have been used in a patient care area not brought back into the classified area (eg, buffer or ante-room) or SRPA for re-assaying or disposal unless the syringe is sealed inside an impervious container (eg, sealed plastic bag) that is disinfected prior to entry into the classified area or SRPA?	N/A		7.6
250.00	Is equipment that has been exposed to needles and syringes contaminated with blood-borne pathogens and RAMs considered mixed waste (eg, syringe shields and syringe carrying containers)?	N/A		7.6
250.01	Is this equipment cleaned and disinfected through actions regulated by the facility's SOPs?	N/A		7.6
250.02	Is equipment that contained or was in contact with mixed waste cleaned and disinfected with an appropriate agent(s) for blood?	N/A		7.6
	Assigning BUDs:			8
251.00	Does the pharmacy have policies and SOPs appropriate to the assignment of BUD and maintain documentation of applicable study results and calculations?	Yes	All BUDs are assigned by corporate.	8
252.00	*Recommendation: Studies of radiolabeling efficiency and radiochemical stability employ quality control (QC) testing methods described in the manufacturer's package insert, USP monographs and general chapters, or other equivalent testing methods and are sufficiently rigorous to allow statistical confidence in the results.*	Yes		8

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
253.00	Does the pharmacy have SOPs to collect and evaluate complaints associated with the use of radiopharmaceuticals having assigned BUDs?	Yes		8
254.00	*Recommendation: Policies and SOPs are also in place to reevaluate the assigned BUD based on complaints, which may include repeating studies and/or performing additional studies on radiolabeling efficiency and/or radiochemical stability.*	Yes		8
255.00	Does the individual responsible for the manipulation assign the BUD based on established testing data, either performed in-house or obtained from peer reviewed literature?	No	All BUDs are assigned by corporate.	8
256.00	Preparation Conditions for Sterile Radiopharmaceuticals: *Describe condition used at the pharmacy in notes section (Table 7).*	[redacted]	Dispensing, repackaging, preparation, preparation with minor deviations, and compounding using sterile components are completed in an ISO Class 5 PEC with an ISO Class 7 buffer room and anteroom. Radiolabeled blood components are manipulated in an ISO Class 5 BSC with an ISO Class 7 buffer room and anteroom.	8
257.00	For compounded preparations (sterile and nonsterile) plus preparations with minor deviations, is BUD dependent on maintenance of quality and purity including radiochemical purity, radionuclidic purity and other applicable parameters as specified in individual monographs or as clinically appropriate?	Yes		8
258.00	Assignment of BUD for a radiopharmaceutical considers several factors, as appropriate. Issues of concern include all but are not limited to the following:	Yes		8
259.00	*Recommendation: The assigned BUD does not exceed the sterility-related times listed in Table 7 unless a longer time is justified by Sterility tests per <71>.*	Yes		8
260.00	Radiochemical Purity - Is the assigned BUD based on stability studies in which these variables are controlled and are representative of the conditions of actual use?	Yes		8
261.00	*Recommendation: For factors that allow a range of values (eg, storage temperature, quantity of radioactivity, radioactivity concentration), studies are conducted at the extreme of the ranges.*	Yes		8

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
262.00	Radionuclidic purity - USP monographs for Tc-99m radiopharmaceuticals require that the radionuclidic impurity Mo-99 not exceed 0.15 µCi Mo-99 per mCi Tc-99m at the time of administration.	Yes		8
263.00	Are calculations of radionuclidic purity at future times necessary to ensure compliance throughout the assigned BUD?	Yes		8
264.00	Age of the generator eluate - Extension of the BUD for Tc-99m pertechnetate intended for radiolabeling of kits take into account the build-up of Tc-99 and peroxides over time.	Yes		8
265.00	Number of particles - For radiolabeled particulates, the number of particles per unit radioactivity increases over time as the radionuclide decays. Calculation of the number of MAA particles in the patient dose is conducted to ensure compliance with the prescribed particle range throughout the assigned BUD.	Yes		8
266.00	Specific Activity - For some receptor-based radiopharmaceuticals, the mass quantity may influence uptake. In such situations, the assigned BUD ensures that the patient dose contains no more than the specified mass.	Yes		8
267.00	Container Type – The assigned BUD is determined in the proper storage container.	Yes		8
268.00	*Cell Viability – Recommendation: The assigned BUD is as short as circumstances reasonably allow so as to maximize cell viability.*	yes		8
269.00	In the case of manufactured radiopharmaceuticals that are distributed to nuclear pharmacies or other healthcare facilities for terminal distribution/dispensing, the assigned BUD of the dispensed dose cannot exceed the expiration date/time of the manufactured radiopharmaceutical(s).	yes		8
270.00	In the case of radiopharmaceuticals prepared from kits, the BUD of a dispensed dose cannot exceed the assigned BUD of the finished kit preparation.	Yes		8
271.00	A radiopharmaceutical may not exceed the shortest BUD of any of its components.	Yes		8

Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Documentation:			9
272.00	Are applicable records (hard-copy or electronic), including policies and SOPs, maintained for all activities involved in repackaging, preparing, preparing with minor deviations, compounding, and dispensing radiopharmaceuticals?	Yes		9
273.00	Do such records include all but are not limited to the following?	Yes		9
273.01	Personnel training and testing including visual assessment of aseptic technique competency	Yes		9
273.02	Validation	Yes		9
273.03	Garbing	Yes		9
273.04	Hand hygiene	Yes		9
273.05	Equipment/environment cleaning and disinfecting	Yes		9
273.06	Gloved fingertip and thumb sampling	Yes		9
273.07	Media fill evaluation initially	Yes		9
273.08	Media fill follow up testing at specified intervals	Yes		9
273.09	Equipment maintenance and cleaning/disinfecting	Yes		9
273.10	End product radiochemical purity and other testing, as applicable, results of preparations, preparations with minor deviations, and compounded preparations	Yes		9
273.11	Master Formulation Record (MFR) for preparation with minor deviation(s) and compounding	Yes		9

		Observations	Notes	USP Reference(s)
277.03	Name and quantity of ingredients including calibration time for radioactive ingredients (eg, 100 mCi Tc 99m sodium pertechnetate @ 1300)	Yes		9.2
277.04	Total volume	Yes		9.2
277.05	Reference to the MFR	Yes		9.2
277.06	Any deviation from the MFR, if applicable	Yes		9.2
277.07	Name of vendor or manufacturer, lot numbers, and expiration dates of all ingredients and components	Yes		9.2
277.08	Name of the person who prepared and name of the supervising personnel (eg, ANP)	Yes		9.2
277.09	Date and time of preparation	Yes		9.2
277.10	Assigned internal identification number (eg, lot number)	Yes		9.2
277.11	Unique reference [eg, prescription, order number(s)]	Yes		9.2
277.12	Assigned BUD and storage requirements	Yes		9.2
277.13	Documentation of QC results	Yes		9.2
	Preparation			10
278.00	The individual responsible for preparing the radiopharmaceutical(s) ensures that the final preparation complies with quality and purity specifications throughout the assigned BUD.	Yes		10
279.00	Do the quality and purity specifications include, as appropriate for the preparation, the following?	Yes		10
279.01	Radionuclidic purity	Yes		10

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
279.02	Radiochemical purity	Yes		10
279.03	Chemical purity	Yes		10
279.04	Physical and chemical properties	Yes		10
	Preparation Following Manufacturer Instructions			10.1
	Nonsterile Preparations			10.1
280.00	For nonsterile preparations, manufacturer preparation instructions are followed (eg, I-131 NaI capsules or solution), taking into account appropriate radiation safety considerations and environmental controls, if applicable (eg, negative air pressure area, chemical fume hood, activated charcoal filters when handling a potentially volatile radionuclide).	Yes		10.1
281.00	*Recommendation: The area is cleaned and uncluttered to ensure the overall integrity and quality of the prepared radiopharmaceutical(s).*	Yes		10.1
282.00	*Recommendation: There is a documented process for activities (eg, cleaning) between the preparation cycles of different nonsterile products, to decrease the likelihood of contamination from other prepared products.*	Yes		10.1
	Sterile Preparations			10.1
283.00	For sterile preparations (including intravascular devices), manufacturer preparation instructions are followed, taking into account appropriate radiation safety considerations, appropriate environmental controls, and aseptic handling practices to maintain sterility.	Yes		10.1
284.00	The minimum environmental standard for the preparation of sterile radiopharmaceuticals beyond immediate-use is within an ISO Classified area or device.	Yes		10.1

Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Preparation with Minor Deviations			10.2
285.00	In some cases, radiopharmaceuticals are prepared with minor deviations from manufacturer instructions that are necessary to accommodate circumstances not contemplated in the FDA approved labeling.	Yes		10.2
285.01	Deviations from manufacturer preparation instructions for radiopharmaceuticals maintain the same ingredients but may differ in their proportions.	Yes		10.2
286.00	The minor deviations utilized require appropriate in-house QC testing, designed to validate the radiochemical purity of the product for the entirety of the BUD or are supported by appropriate peer-reviewed publications.	Yes		10.2
287.00	Do the pharmacy radiopharmaceutical preparations with minor deviations include all of the following when applicable?	Yes		10.2
287.01	Altering the quantity of radioactivity or volume added to the vial	Yes		10.2
287.02	Changes in step-by-step operations (eg, dilute Tc-99m sodium pertechnetate after rather than before addition to the vial)	Yes		10.2
287.03	Using alternative devices or equipment (eg, a heating block rather than a hot water bath, using a different sized needle, different shielding materials)	Yes		10.2
287.04	Using QC test methods other than those described in the product labeling (eg, radiochemical purity)	Yes		10.2
287.05	Filtering Tc-99m sulfur colloid	Yes		10.2
287.06	Other, (if so, describe in the notes)	No		10.2

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Preparation of Radiolabeled Blood Components		***Note to Inspector:*** *Handling blood and radiolabeling of blood components requires special attention to biological risks and need to be handled with standard precautions using aseptic technique to prevent the introduction of new microorganisms into the preparation that will be administered.*	10.3
288.00	The preparation BUD does not exceed 6 hours after the blood sample is obtained from the patient or blood bank.	Yes		10.3
289.00	Equipment and supplies are never shared with other activities unless they are first thoroughly cleaned and disinfected.	Yes	Equipment and supplies are never shared.	10.3
290.00	Do special precautions when radiolabeling of blood components for non-immediate use include the following?	Yes		10.3
290.01	There is complete physical separation (either fixed or non-fixed wall) of areas where blood products are handled from areas where non-blood products are handled. An ISO Class 5 BSC located in an ISO Class 7 buffer area is required for blood-labeling processes. If more than one ISO Class 5 PEC is located within the ISO Class 7 buffer area, policies and SOPs are in place to include certification that the SEC meets conditions of air quality at maximum occupancy under dynamic operating conditions.	Yes		10.3
290.02	One radiolabeling procedure per PEC at a time. Blood products from more than one patient are never manipulated at the same workstation at the same time. Each area has dedicated supplies, equipment, and waste disposal to eliminate sharing of these items or overlap in pathways.	Yes		10.3
290.03	Thorough cleaning and disinfection of the ISO Class 5 BSC and all reusable equipment within, occurs prior to starting another blood component radiolabeling procedure.	Yes		10.3
290.04	If a dedicated dose calibrator is not available, then a means of preventing the blood container(s) from contaminating the dose calibrator is used or the dose calibrator dipper and liner is cleaned and disinfected following the radioassay.	N/A	Dose calibrators are dedicated.	10.3

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
290.05	Centrifuge is located within the ISO Class 7 buffer area that is dedicated for blood component radiolabeling processes.	Yes		10.3
290.06	Dedicated (per each radiolabeling procedure) consumable products (eg, 0.9% sodium chloride injection, diluent, tubes, syringes, and other supplies) necessary for each individual patient radiolabeling procedure.	Yes		10.3
290.07	All tubes and syringes in contact with the patient's blood components are clearly labeled with the patient's name and at least one additional identifier (eg, date of birth, medical record number, barcode).	Yes	A patient barcode is used in addition to the name.	10.3
290.08	Dedicated syringe shields and vial shields.	Yes		10.3
290.09	Any garb that enters the ISO Class 5 BSC is removed and replaced before handling anything else not related to performing this procedure.	Yes		10.3
290.10	Removal of all disposable items from the ISO Class 5 BSC is utilized in each radiolabeling procedure.	Yes		10.3
290.11	Cleaning and disinfection of all reusable equipment and components (eg, BSC, centrifuge, dose calibrator, syringe shields, vial shields, syringe transport shields and delivery cases) is done after each radiolabeling procedure prior to any further use. Policies and SOPs address cleaning and disinfection processes including the use of an EPA-registered (or equivalent) one-step disinfectant cleaner with activity against blood-borne pathogens followed by sterile 70% IPA. Sterile 70% IPA alone is not sufficient.	Yes		10.3
290.12	After the completion of blood radiolabeling procedures, 4.5 Hand Hygiene and Garbing requirements for Buffer Areas and segregated Radiopharmaceutical Processing Area are followed.	Yes		10.3

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Preparation of Radiolabeled Red Blood Cells for Immediate Use			10.4
291.00	Is In vitro red blood cell labeling prepared with the following conditions?	N/A	There are no immediate use radiolabeled red blood cells.	10.4
291.01	A dedicated space for blood handling is designated through the entirety of the blood radiolabeling process. This area is free from clutter and not used for any other radiopharmaceutical preparation or handling until the completion of cleaning and disinfection.	N/A		10.4
291.02	Only one radiolabeling procedure is performed at a time or there are documented processes that maintain the integrity of samples and environment.	N/A		10.4
291.03	Dedicated equipment is used for blood radiolabeling procedure (eg, L-block, syringe shield, vial shield, forceps, needle recapper).	N/A		10.4
291.04	If a dedicated dose calibrator is not available, then a means of preventing the blood container(s) from contaminating the dose calibrator or a cleaning and disinfecting procedure with an appropriate product is used to decontaminate the dipper and liner of the dose calibrator following the radioassay	N/A		10.4
291.05	A cleaning and disinfecting procedure with an appropriate agent(s) is used to decontaminate the area and equipment prior to and after the radiolabeling is complete and all disposable components have been discarded	N/A		10.4
291.06	All requirements in 4.4 Hand Hygiene and Garbing for Immediate Use Preparations are followed.	N/A		10.4
291.07	The start time of the preparation begins with the initial container puncture or the exposure of a critical site (eg, syringe tip, needle hub or needle) to ambient air, whichever is first.	N/A		10.4
291.08	The compounded product has a BUD of 1 hour	N/A		10.4

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Compounding		***Note to Inspector:*** *The combining, mixing, pooling, or otherwise altering (excluding preparation with minor deviations) of a conventionally manufactured radiopharmaceutical or synthesizing/formulating a radiopharmaceutical from bulk drug substances and radionuclides.*	11
292.00	Each compounding activity is based on a pre-established written procedure and includes maintenance of compounding records.	Yes		11
292.01	The compounding record provides traceability for components and person(s) involved.	Yes		11
293.00	All sterile compounding, using aseptic technique, is performed in an ISO 5 PEC. Compounding employees are using appropriate aseptic technique. May require inspector to garb and enter clean/buffer room. Pay attention to first air, entry and exit of materials in ISO Class 5 PEC, appropriate frequent sanitization of gloves, appropriate cleaning and cleanliness of the direct compounding area (DCA). ***When applicable, Compounding MUST be observed****. If compounding is not being performed at the time of survey mark item as "No"*	Yes		11
293.01	If compounding is not being performed at the time of survey, ask that a compounding pharmacist or technician prepare a compound for you to observe the compounding process. *If the pharmacy staff refuses or is unable to perform compounding for you to observe, document on the "**Denial of Authorization**" form. List individual who signs the Denial of Authorization.*	[redacted]	N/A	11
294.00	Compounding is not be performed for any radiopharmaceutical(s) that has been withdrawn from the market because of safety or lack of effectiveness, unless part of an institutional review board approved investigational study.	Yes		11
295.00	Radiopharmaceuticals that are essentially copies of marketed FDA-approved radiopharmaceuticals are not be compounded unless there is a change that produces a clinical difference for an identified individual patient, as determined by a prescriber.	Yes		11

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Compounding Nonsterile Radiopharmaceuticals		***Note to Inspector:*** *Compounding nonsterile radiopharmaceuticals is the combining, mixing, diluting, pooling, reconstituting or otherwise altering a drug or bulk drug substance other than as provided by the manufacturer's package insert to create a nonsterile radiopharmaceutical.*	11.1
296.00	Areas designated for nonsterile compounding are cleaned, uncluttered and separated from areas designated for sterile radiopharmaceuticals.	Yes		11.1
297.00	*Recommendation: Compounding takes into account RAM licensing requirements for appropriate radiation safety considerations and utilize appropriate environmental controls, if applicable.*	Yes		11.1
298.00	The placement of equipment and materials are designed to prevent cross-contamination.	Yes		11.1
299.00	When feasible, disposable material is used to reduce the chance of cross-contamination.	Yes		11.1
300.00	Each compound has a unique MFR.	Yes		11.1
301.00	The preparation information is documented on a compounding record.	Yes		11.1
302.00	The MFR details the selection of all components.	Yes		11.1
303.00	**The ingredients obtained from sources in this preferential order:** FDA-approved product; FDA-registered facility; and lastly, if the ingredients for the compound are not available from either of these two sources, the MFR details the selection of a material that is suitable for the intended use.	Yes	Only FDA-approved products are used.	11.1
304.00	The MFR establishes the identity, strength, purity, and quality of the ingredients by validated means (eg, CoA).	Yes		11.1

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
305.00	Requirements for nonsterile oral meal components are limited to common food grade description and are not required to establish identity by validated means.	N/A	There are no meal components compounded.	11.1
306.00	A BUD for the compounded radiopharmaceutical is validated, taking into account the stability of the ingredients, any intermediate containers, the final container, and the storage conditions.	Yes		11.1
306.01	A BUD cannot be extended past the labeled expiration date of any component in the compound.	Yes		11.1
306.02	If the compounded radiopharmaceutical(s) includes components from other preparations or preparations with minor deviations, the BUD of the final compounded radiopharmaceutical does not exceed the shortest remaining BUD of any of those components.	N/A		11.1
	Sterile Compounding		***Note to Inspector**: Kit-splitting (also referred to as "fractionation") may be used to meet patient need.*	11.2
307.00	Do personnel responsible for compounding consider all possible interactions between the components, such as altered chemical stability, radiochemical stability, solubility, or other parameters (eg, osmolality) related to changes in pH, excipients, or other factors, in determining an appropriate BUD?	Yes		11.2
308.00	Do the compounding activities involve the addition of a conventionally manufactured drug product (eg, Ascorbic Acid Injection, Lidocaine Hydrochloride Injection, Sodium Bicarbonate Injection) approved by the appropriate regulatory agency to a radiopharmaceutical?	Yes	Lidocaine HCl injection may be used.	11.2
309.00	Does the pharmacy split conventionally marketed kits?	No		11.2
310.00	Do personnel responsible consider all possible interactions of kit components with these other containers (eg, container walls, closures), as well as possible alterations in stability (eg, physical stability, chemical stability) that may affect radiolabeling yields or performance parameters, when determining an appropriate BUD?	Yes	Corporate assigns all BUDs.	11.2
310.01	Systematic QC testing is performed to validate the appropriateness of a particular BUD.	N/A		11.2

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Sterile Compounding Using Nonsterile Drug Substance or Components			11.3
311.00	Some sterile compounding activities involve the use of materials other than commercially marketed products, such as drug substances and/or radionuclides.	No	There is no nonsterile to sterile compounding performed.	11.3
311.01	If one or more materials or components are not certified to be sterile and pyrogen-free, a sterilization procedure (eg, filtration with bubble point testing) and testing described in <85> is performed. Record calibration date of the bubble test pressure gauge, as applicable.	N/A		11.3
312.00	The designated person for compounding is responsible for ensuring that the final preparation complies with pre-established standards or acceptance criteria for identity, quality, and purity.	N/A		11.3
313.00	The designated person considers all possible interactions between the components, such as altered chemical stability, radiochemical stability, solubility, or other parameters (eg, osmolality) related to changes in pH, excipients, or other factors, in determining an appropriate BUD.	N/A		11.3
313.01	Testing to validate the appropriateness of a particular BUD may be required.	N/A		11.3
314.00	If compounding involves a bulk drug substance, the radiopharmaceutical complies with standards of an applicable USP or NF monograph, if one exists, or be a component of an approved drug product.	N/A		11.3
314.01	A bulk drug substance includes a radionuclide, a ligand, or other substance, such as a precursor that becomes an active ingredient in the final radiopharmaceutical.	N/A		11.3
315.00	Each bulk drug substance is manufactured by drug establishments registered with FDA and be accompanied by a valid CoA or equivalent testing procedures.	N/A		11.3

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
316.00	If compounding involves excipients or other inactive ingredients, the excipients or other inactive ingredients comply with standards of an applicable USP or NF monograph, if one exists.	N/A		11.3
317.00	It is also acceptable that any excipients or other inactive ingredients be approved products, manufactured by a drug establishment registered with the FDA.	N/A		11.3
	Dispensing and Radioassay		*Note to Inspector: Dispensing refers to the manipulations necessary to transfer the prescribed or ordered amount of radiopharmaceutical into the final container (eg, syringe or vial).*	12.1
318.00	Labeling of the final patient-ready dose or ordered amount of a radiopharmaceutical is also a component of the dispensing process.	Yes		12.1
319.00	Except for an unopened manufacturer container, the final dose or ordered amount is radioassayed (ie, in a dose calibrator).	Yes		12.1
320.00	*Recommendation: The measured activity is mathematically corrected for radioactive decay to the time of scheduled administration (calibration time).*	Yes		12.1
321.00	The activity at calibration time is always be within federal, state, and local variance limits.	Yes		12.1
	Labeling			12.2
322.00	*Recommendation: All personnel distributing and/or dispensing radiopharmaceuticals verify that any labeling is in compliance with regulatory agencies.*	Yes		12.2
323.00	Is the inner container (eg syringe, vial) labeled with all of the following?	Yes		12.2
323.01	Standard radiation symbol	Yes		12.2
323.02	The words "Caution—Radioactive Material"	Yes		12.2

Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Direct Infusion Systems			12.3
325.00	Do the operations of the direct infusion systems follow the "Instructions for Use" in the device labeling?	N/A	There are no direct infusion systems.	12.3
326.00	Are each of the following parameters considered by the operator of the system?	N/A		12.3
326.01	Setup attachment or needle-puncture should be performed in a defined environment	N/A		12.3
326.02	Aseptic handling in ambient air with a maximum BUD of 10 hours is allowed for these direct infusion systems	N/A		12.3
326.03	The 0.9% sodium chloride bag attached to the device may only be punctured once and may be used for no more than 10 hours. The bag is labeled with the date and time of puncture and the BUD	N/A		12.3
326.04	Any nonsterile parts of the device that may encounter the septum of the radiopharmaceutical vial is disinfected with sterile 70% IPA prior to puncturing the vial with the needle	N/A		12.3
326.05	The septum of any vial and the ports of any diluent bag is wiped with sterile 70% IPA prior to puncturing	N/A		12.3
326.06	When puncturing the vial in ambient air, it is only punctured once	N/A		12.3
326.07	If there are problems with the infusion device, no sterile container(s) associated with the system is repunctured or transferred to a PEC for further manipulations and the container, with contents, is discarded	N/A		12.3

Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Transporting Generators Between Facilities			12.4
327.00	Are the following standards followed if transporting generators between facilities?	N/A	There is no transportation of generators.	12.4
327.01	The generator needle and/or ports are capped in ISO Class 8 air or better with sterile protectors	N/A		12.4
327.02	The generator is packaged and transported in a manner to maintain the integrity and sterility of the generator system	N/A		12.4
	Repackaging			13
328.00	If the facility repackages, are the following applicable?	Yes		13
328.01	Removes conventionally manufactured radiopharmaceutical(s) from the container in which it was distributed by the original manufacturer and placing it into a different container without further manipulation of the product.	No		13
328.02	Places the contents of multiple containers of the same finished drug product into one container, as long as the container does not include other ingredients	Yes		13
329.00	Does the facility repackage nonsterile radiopharmaceuticals (eg, I-131 sodium iodide oral capsules)?	Yes		13
330.00	Does the facility repackage sterile radiopharmaceuticals (eg, thallous chloride Tl 201 injection)?	Yes	Indium-111 DTPA may be repackaged.	13
331.00	Unopened manufacturer dosage units (eg, capsules, Xe-133 vials) are not radioassayed.	No		13

Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Quality Assurance and Quality Control			14
335.00	QA and QC programs are formally established and documented in SOPs that ensure that all aspects of the handling of radiopharmaceuticals are conducted in accordance with this chapter and applicable federal, state, and local laws and regulations.	Yes		14
336.00	A designated person ensures that the facility has formal, written QA and QC programs. *List this person in the notes.*	Yes	Janice Swett, a staff pharmacist, is the lead person for QA and QC and reports to Otha Bright, the designated person and PIC.	14
337.00	Do QA and QC programs establish a system which include of all of the following?	Yes		14
337.01	Adherence to procedures	Yes		14
337.02	Prevention and detection of errors and other quality problems	Yes		14
337.03	Evaluation of complaints and adverse events	Yes		14
337.05	Appropriate investigations and corrective actions	Yes		14
338.00	The SOPs describe the roles, duties, and training of the personnel responsible for each aspect of the QA program.	Yes		14
339.00	The overall QA and QC program is reviewed at least once every 12 months by the designated person. *List last date of review in notes.*	No	The PIC stated he reviews the QA and QC program monthly but was not able to find the last review.	14
340.00	The results of the review are documented, and appropriate corrective action taken, if needed.	No	The PIC stated that the program is reviewed monthly but there has been no documentation of the review.	14

	Notification About and Recall of Out-of-Specification Dispensed Radiopharmaceuticals			14.1
341.00	If a radiopharmaceutical is dispensed or administered before the results of release testing are known, does the facility have all of the following SOPs in place?	N/A	Radionuclidic potency and purity testing are performed before release. There is no other testing required.	14.1
341.01	Immediately notify the prescriber of a failure of specifications with the potential to cause patient harm (eg, sterility, strength, purity, bacterial endotoxin, or other quality attributes)	N/A		14.1
341.02	Determine whether a recall is necessary	N/A		14.1
342.00	Does the SOP for recall of out-of-specification dispensed radiopharmaceuticals contain all of the following procedures?	Yes		14.1
342.01	Determine the severity of the problem and the urgency for the implementation and completion of the recall	Yes		14.1
342.02	Determine the distribution of any affected radiopharmaceutical, including the date and quantity	Yes		14.1
342.03	Identify patients who have received the radiopharmaceutical	Yes		14.1
342.04	Outline the disposition and reconciliation of the recalled radiopharmaceutical	Yes		14.1
343.00	Does the facility document the implementation of the recall procedures?	Yes		14.1
344.00	Is the recall is reported to appropriate regulatory bodies as required by laws and regulations of the applicable regulatory jurisdiction (eg, state board of pharmacy, state health department)?	Yes		14.1

		Observations	Notes	USP Reference(s)
	Complaint Handling			14.2
345.00	Has the nuclear pharmacy developed and implemented SOPs for handling complaints? Note: Complaints may include concerns or reports on the quality and container labeling of, or possible adverse reactions to, a specific radiopharmaceutical.	Yes		14.2
346.00	Does the designated person review all complaints to determine if they indicate potential quality problems with the radiopharmaceutical?	Yes		14.2
346.01	If a complaint indicates potential quality issues with radiopharmaceuticals, is an investigation into the potential cause of the issue completed?	Yes		14.2
346.02	Does the investigation consider whether the quality problem could extend to other radiopharmaceuticals?	Yes		14.2
346.03	Is corrective action, if necessary, implemented for all potentially affected radiopharmaceuticals?	Yes		14.2
346.04	Does the investigation consider whether to initiate a recall of potentially affected radiopharmaceuticals and whether to cease sterile compounding until all underlying problems have been identified and corrected?	Yes		14.2
347.00	Is a readily retrievable record (written or electronic) of each complaint kept by the facility, regardless of the source of the complaint (eg, e-mail, telephone, mail)?	Yes	Records of complaints are maintained electronically.	14.2
348.00	Does the record contain all of the following?	Yes		14.2
348.01	The name of the complainant	Yes		14.2
348.02	The date the complaint was received	Yes		14.2
348.03	The nature of the complaint	Yes		14.2
348.04	The response to the complaint	Yes		14.2

National Association of Boards of Pharmacy®
Verified Pharmacy Program® Inspection Form

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
348.05	If known, the name and strength of the radiopharmaceutical and the assigned internal identification number (eg, prescription, order, or lot number).	Yes		14.2
349.00	Does the record also include the findings of any investigation and any follow-up?	Yes		14.2
350.00	Are records of complaints easily retrievable for review and evaluation for possible trends?	Yes		14.2
351.00	Are records retained in accordance with the record keeping requirements?	Yes		14.2
352.00	Is a radiopharmaceutical that is returned in connection with a complaint quarantined until it is destroyed after completion of the investigation and in accordance with applicable jurisdictional laws and regulations?	Yes		14.2
	Adverse Event Reporting			14.3
353.00	Are adverse events potentially associated with the quality of radiopharmaceuticals reported in accordance with the facility's SOPs and all applicable jurisdictional laws and regulations?	Yes		14.3
354.00	*Recommendation: Adverse events potentially associated with the quality of the radiopharmaceutical preparation are reported to the applicable jurisdictional regulatory body (eg, state boards of pharmacy, state health departments, FDA's MedWatch program for human drugs).*	Yes		14.3

The information and comments obtained are based on USP General Chapter <825> Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging
An inspection against current Good Manufacturing Practices (cGMPs) was not conducted. There may be some overlap in concepts.

Acronym	Definition
ACPH	Air changes per hour
ALARA	As low as reasonably achievable
ANDA	Abbreviated new drug application
ANP	Authorized nuclear pharmacist
AU	Authorized user
BLA	Biologics license application
BSC	Biological safety cabinet
BUD	Beyond-use date
CETA	Controlled Environment Testing Association
cfu	Colony-forming unit
CoA	Certificate of analysis
DPA	Direct processing area
EPA	Environmental Protection Agency
FDA	Food and Drug Administration
FDCA	Food, Drug, and Cosmetic Act
HEPA	High-efficiency particulate air
HVAC	Heating, ventilation, and air conditioning
IND	Investigational new drug
IPA	Isopropyl alcohol
ISO	International Organization for Standardization
LAFW	Laminar airflow workbench
MAA	Macroaggregated albumin
MEA	Malt extract agar
MFR	Master Formulation Record
NDA	New drug application
NRC	Nuclear Regulatory Commission
PEC	Primary engineering control
PET	Positron emission tomography
RAM	Radioactive material
RDRC	Radioactive drug research committee
RH	Relative humidity
SDA	Sabouraud dextrose agar
SEC	Secondary engineering control
SOP	Standard operating procedure
SRPA	Segregated radiopharmaceutical processing area
TSA	Trypticase soy agar

Term	Definition
Dispense/dispensing	Pursuant to a patient specific prescription, labeled with patient name at the pharmacy
Distribute/distributing	Delivered/sent to a practitioner or health care facility for office use or further dispensing, no prescription, not labeled with a patient name at the pharmacy.
Type of Practice: Central Fill/Processing/ Shared Services	Where part of the prescription processing and dispensing process occurs at another location
Type of Practice: Closed Door	Such as a mail order facility, prescriptions cannot be picked up at the facility, all are sent
Type of Practice: HMO/PBM only	Limited to only the beneficiaries of the specific insurance program - no cash patients
Type of Practice: Institutional	Such as a hospital or jail
Type of Practice: Internet Pharmacy	Pharmacy advertises on the internet, patients fill/refill prescriptions and revise patient profile information on-line.

NABP developed this inspection form for sole use by NABP, boards of pharmacy, government agencies that regulate drug distributors, and for internal use by the named facility participating in the VPP. Disclosure of this form to a third party or use of the form by a third party is strictly prohibited without NABP's prior written authorization.

Type of Practice: Investigational Drugs, Clinical Trials or Research	Approved to handle investigational drugs
Type of Practice: Long Term Care	Nursing Home pharmacy
Type of Practice: Manufacturer	Registered with the FDA as a manufacturer
Type of Practice: Open to the Public	Patients are able to come into the pharmacy to pick up filled prescriptions and interact with a pharmacist
Type of Practice: Outsourcing Facility	Registered with the FDA as an Outsourcing Facility
Type of Practice: Provides Office Use	Distributes prescription and/or compounded preparations to providers for administration or resale. No prescription, not labeled with a patient name by the pharmacy.
Type of Practice: Specialty Pharmacy	Business is primarily with specialty drugs and works with specific disease states
Type of Practice: Telepharmacy	Pharmacy oversees a remote location staffed by a technician supervised via audio/visual system by a pharmacist at this facility.
Type of Practice: Traditional retail	Also known as Community Pharmacy.
Type of Practice: Veterinary Pharmacy	Pharmacy business is primarily or exclusively for animals.
Type of Practice: Wholesale Distributor	Pharmacy is licensed or registered as a wholesale distributor
Glossary	
Administration:	The direct and immediate application of a radiopharmaceutical to a patient by injecting, infusing, ingesting, or otherwise providing a radiopharmaceutical in its final form.
Airlock:	A space with interlocked doors, constructed to maintain air pressure control when items move between two adjoining areas.
Ante-room:	An ISO Class 8 or cleaner area with fixed walls and doors where personnel hand hygiene, garbing procedures, and other activities that generate high particulate levels are performed. The ante-room is the transition area between the unclassified area in a facility and the classified buffer area.
Aseptic processing or preparation:	A process by which separate, sterile components (eg, drugs, containers, or closures) are brought together under conditions that maintain their sterility.
Aseptic technique:	Methods utilized during the processing of radiopharmaceuticals to keep objects and areas free of microorganisms and thereby minimize infection risk to the patient. It is accomplished through practices that maintain the microbe count at a nearly irreducible number.
As low as (is) reasonably achievable (ALARA):	The effort to maintain exposures to ionizing radiation as far below the dose limits as practical. These efforts should be consistent with the purpose for which the licensed activity is undertaken, in relation to utilization of licensed materials in the public interest. Limiting exposure time, using adequate shielding, and maintaining the most distance possible from all radioactive sources (i.e., time, distance, shielding) are the basic principles for successfully following ALARA guidelines.
Authorized nuclear pharmacist (ANP):	A pharmacist recognized by the U.S. Nuclear Regulatory Commission or an Agreement State agency as having met training and experience requirements for the practice of nuclear pharmacy.
Authorized user (AU):	A physician recognized by the U.S. Nuclear Regulatory Commission or an Agreement State agency as meeting training and experience requirements for specified medical uses of radioactive material.
Beyond-use date (BUD):	The assigned date and time beyond which the radiopharmaceutical must not be administered.
Biological safety cabinet (BSC) Class II:	A ventilated cabinet with an open front and inward and downward unidirectional HEPA-filtered airflow and HEPA-filtered exhaust. The BSC is designed to provide worker protection from exposure to biohazardous material and to provide an ISO Class 5 or better environment for preparing sterile radiopharmaceuticals.
Blood components:	Any constituent of blood that is separated by physical or mechanical means (eg, red cells, white cells, platelets)
Buffer area:	An ISO Class 8 or cleaner area with fixed walls and doors where PEC(s) that generate and maintain an ISO Class 5 environment are physically located. The buffer area may only be accessed through the ante-room.
Chemical purity:	The fraction of the total chemical species present in the radiopharmaceutical as the specified chemical component(s). A chemical impurity is the presence of an unwanted non-radioactive chemical.
Classified area:	An area that maintains an air quality classification based on the ISO guidelines (i.e., ante-room, buffer area). See ISO class.
Cleaning agent:	A material for the removal of residues (eg, dirt, debris, microbes, and residual drugs or chemicals) from surfaces.
Compounding:	The combining, mixing, pooling, or otherwise altering (excluding preparation with minor deviations) of a conventionally manufactured radiopharmaceutical or synthesizing/formulating a radiopharmaceutical from bulk drug substances and radionuclides. See Preparation with minor deviations.
Container–closure system:	The packaging components that contain or come in contact with the radiopharmaceutical and maintain the integrity of the radiopharmaceutical contained within. Examples include (but are not limited to) vials, tubes and syringes.

NABP developed this inspection form for sole use by NABP, boards of pharmacy, government agencies that regulate drug distributors, and for internal use by the named facility participating in the VPP. Disclosure of this form to a third party or use of the form by a third party is strictly prohibited without NABP's prior written authorization.

Critical site:	A location that includes any component or fluid pathway surface (eg, vial septa, injection ports) or openings (eg, needle hubs) that, when exposed is at risk for contamination by direct contact with air (eg, ambient area or HEPA-filtered), moisture (eg, oral and mucosal secretions), or touch.
Designated person:	One or more individuals assigned to be responsible and accountable for the performance and operation of the radiopharmaceutical processing facility and for personnel who prepare, compound, dispense, and repackage radiopharmaceuticals.
Direct infusion system:	An FDA-cleared medical device used to dispense and/or administer radiopharmaceuticals to multiple patients. The standards of this chapter pertain to devices with ambient air that lack and ISO Class 5 environment.
Direct processing area (DPA):	An area within the ISO Class 5 PEC where critical sites are exposed to unidirectional HEPA-filtered air, also known as first air.
Disinfectant:	A chemical or physical agent used on inanimate surfaces and objects to destroy microbiological contamination (eg, fungi, viruses, and bacteria) when used in the appropriate concentrations and for the appropriate contact times. Sporicidal disinfectant agents are considered a special class of disinfectants that also are effective against bacterial endospores and fungal spores.
Dispensing:	The manipulation or labeling of a radiopharmaceutical to render it in its final form for administration, typically obtained from a single-dose or multiple-dose container (eg, withdrawing a volume of finished product or preparation from a vial into a syringe). Dispensing is performed under the supervision of a physician or pharmacist and for radiopharmaceuticals includes dilution with an appropriate diluent or adjusting the activity in an individual dosage.
Dose pooling:	The combining of doses from two or more syringes to meet one patient's need, also see "repackaging".
Dose splitting:	The splitting of a patient-ready unit dose for use with more than one patient.
Dynamic operating conditions:	Conditions in the SRPA or classified area in which operating personnel are present and performing actual or simulated activities. The PEC should contain equipment and materials regularly used for radiopharmaceutical processing (eg, low-lint absorbent pads, dose calibrator, syringe shields).
Expiration date:	For conventionally manufactured radiopharmaceuticals, the specified date (and time) beyond which the product must not be administered. The expiration date is determined by the manufacturer.
First air:	The air exiting the HEPA filter in a unidirectional air stream.
Garb:	Gloves, gowns, shoe covers, head (covers ears and all hair) and facial hair covers, masks, and other items designed to reduce particle shedding from personnel and minimize the risk of microbiological contamination to radiopharmaceuticals.
High efficiency particulate air (HEPA) filtration:	Using a tested and certified air filter designed to remove 99.97% of airborne particles measuring 0.3-micron or greater in diameter from the air passing through it.
Hot-cell:	A device used for the shielding and containment of radioactive materials. The shielding material(s) (eg, lead) is generally incorporated into the structure of the unit itself. Radiopharmaceutical personnel carry out the majority of the tasks within the hot-cell from the exterior of the unit. This is accomplished by the use of remote manipulation systems (eg, manipulator arms, automated dispensing system) of various designs. Numerous air quality configurations of the hot-cell may exist, including integrated HEPA filtration systems to render all or a specified portion (DPA) of the device capable of certifying to a controlled ISO Class 5 environment. In other situations, the hot-cell offers only radiation protection and a laminar flow PEC, capable of achieving an ISO Class 5 environment, is placed within the enclosure to allow for safe aseptic manipulations. A hot-cell may also be referred to by other designations (eg, shielded isolator with laminar flow, PET dispensing station, manipulator hot-cell, shielded isolators for dispensing, radiopharmaceutical dispensing isolator).
Hot lab:	Unclassified radiopharmaceutical processing area located within a hospital or clinical site that is only appropriate for immediate use radiopharmaceuticals if there is not an ISO 5 PEC within SRPA located within the area.
Immediate use:	A preparation (including preparations with minor deviations) and/or dispensing of a sterile radiopharmaceutical that is limited for a single patient. Only sterile conventionally manufactured drug products (eg, NDA, ANDA) or drugs produced under an approved IND or RDRC protocol may be used. Administration must begin within 1 hour of the first container puncture or exposure of any critical site involved (eg, syringe tip, needle hub or needle) to ambient air, whichever is first.
Individual dose (unit dose):	A radiopharmaceutical in its final form ready for administration (eg, capsule, sterile solution in a syringe) consisting of the amount (dose) prescribed, ordered, or other intended for an individual patient or research subject.
Inverse square law:	The specified physical quantity or intensity of a radiation emission is inversely proportional to the square of the distance from the source of the emission.
ISO class:	A quality classification from the International Organization for Standardization based on quantity and size of particles per volume of air.
Kit:	Conventionally manufactured package containing all ingredients required to prepare a radiopharmaceutical with the exception of the radionuclide.

Copyright © March 2024 National Association of Boards of Pharmacy® (NABP®). All rights reserved. NABP developed this inspection form for sole use by NABP, boards of pharmacy, government agencies that regulate drug distributors, and for internal use by the named facility participating in the VPP. Disclosure of this form to a third party or use of the form by a third party is strictly prohibited without NABP's prior written authorization.

Kit-splitting (fractionation):	The act of dividing the contents of a kit vial and transferring aliquots into other containers for storage and subsequent radiolabeling.
Ligand:	An ion or molecule that incorporates a metal atom to form a coordination complex.
Line of demarcation:	A visible line on the floor that separates the clean and less clean sides of the ante-room.
Low-lint wiper:	A wiper exhibiting few, if any, fibers or other particulates, visible without magnification, which are separate from, or easily removed from, the wiper material in a dry condition.
Master Formulation Record (MFR):	A document or set of documents specifying the starting materials with their quantities and the packaging materials, together with a description of the procedures and precautions required to produce a specified quantity of a finished preparations as well as the processing instructions, including the in-process controls.
Media-fill test:	A simulation used to qualify processes and personnel engaged in sterile radiopharmaceutical processing to ensure that the processes and personnel are able to prepare radiopharmaceuticals without microbiological contamination. Molar mass: The measured mass that is attained from a molar amount of a given substance (eg, element, compound).
Molar mass:	The measured mass that is attained from a molar amount of a given substance (eg, element, compound). It is generally expressed with units such as g/mol and kg/mol.
Multiple-dose container:	A container of a radiopharmaceutical for administration that is designed to contain more than one patient dose of the radiopharmaceutical.
Negative-pressure area:	An area that is maintained at lower pressure than the adjacent spaces, and therefore the net airflow is into the area. This area is appropriate for volatile or gaseous radionuclides and radiopharmaceuticals (eg, I-131 NaI, N-13 ammonia) and intended to lend a measure of protection for the radiation workers and the general public.
One-step disinfectant cleaner:	A product with an EPA-registered claim (or equivalent) that it can clean and disinfect a nonporous surface in the presence of light to moderate organic soiling without a separate cleaning step.
Pass-through:	An enclosure with sealed doors on both sides to ensure that both doors are not opened at the same time. The pass-through is positioned between two spaces creating an airlock for the purpose of minimizing particulate transfer while moving materials from one space to another.
Perimeter:	A visible demarcation on the floor that defines the boundaries of the SRPA.
Positive-pressure area:	An area that is maintained at higher pressure than the adjacent spaces, and therefore the net airflow is out of the area.
Preparation:	The act of combining a conventionally manufactured kit with a conventionally manufactured radionuclide following manufacturer's recommended instructions. Mixing, reconstituting, combining, diluting, or repackaging of a radiopharmaceutical, or other such acts, performed in accordance with directions contained in the FDA-approved labeling.
Preparation with minor deviations:	The act of preparing a conventionally manufactured kit with a conventionally manufactured radionuclide with volume, and/or radioactivity, and/or step-by-step deviations from the manufacturers recommended labeling while ensuring that the final preparation maintains appropriate radiochemical and radionuclidic purity for the entirety of the BUD. Examples of minor deviations include, but are not limited to, altering the amount of activity or volume added to the vial, changes in step-by-step operations (eg, dilute Tc-99m solution after, rather than before, addition to the vial, use of a venting needle or filter), using alternative devices or equipment (eg, a heating block rather than a hot water bath), and using alternative radiochemical purity testing methods.
Primary engineering control (PEC):	A device or zone that provides an ISO Class 5 air quality environment for sterile processing.
Pyrogen:	A substance that induces a febrile reaction in a patient.
Quality assurance (QA):	The system of procedures, activities, and oversight that ensures that radiopharmaceutical processing consistently meets quality standards.
Quality control (QC):	The sampling, testing, and documentation of results that, taken together, ensure that specifications have been met before release of the radiopharmaceutical.
Radioactive materials (RAM) license:	A document(s) issued by the US NRC or an Agreement State agency that authorizes various activities involving the use of radioactive materials. These uses can include possession, research and development, distribution, medical use, and other purposes not included in this list. Only those activities specifically authorized are allowed.
Radioassay:	Measurement of the quantity of radioactivity present in a container using a suitable and calibrated instrument, such as a well-type ionization chamber (i.e., dose calibrator).
Radiochemical purity:	The ratio, expressed as a percentage, of the radioactivity of the intended active radiopharmaceutical ingredient to the total radioactivity of all radioactive ingredients and impurities present in the radiopharmaceutical preparation (see Radioactivity <821>).
Radionuclidic purity:	The ratio, expressed as a percentage, of the radioactivity of the intended radionuclide to the total radioactivity of all radionuclides in the radiopharmaceutical preparation (see <821>).

Copyright © March 2024 National Association of Boards of Pharmacy® (NABP®). All rights reserved. NABP developed this inspection form for sole use by NABP, boards of pharmacy, government agencies that regulate drug distributors, and for internal use by the named facility participating in the VPP. Disclosure of this form to a third party or use of the form by a third party is strictly prohibited without NABP's prior written authorization.

Radiopharmaceutical (radiopharmaceutical preparation/radioactive drug):	(See <821>.) A finished dosage form that contains a radioactive substance in association with one or more other ingredients and that is intended to diagnose, stage a disease, monitor treatment, or provide therapy. A radiopharmaceutical includes any non-radioactive reagent kit or radionuclide generator that is intended to be used in the preparation of any such substance. The terms "radiopharmaceutical" and "radioactive drug" are commonly used interchangeably.
Repackaging:	The act of removing a conventionally manufactured radiopharmaceutical from the container in which it was distributed by the original manufacturer and placing it into a different container without further manipulation of the product. Repackaging also includes the act of placing the contents of multiple containers (eg, vials) of the same finished drug product into one container, as long as the container does not include other ingredients. Radiopharmaceutical manipulation in any other way, including reconstitution, dilution, mixing, or combination with another ingredient, is not considered repackaging.
Restricted area:	Any area to which access is controlled for the protection of individuals from exposures to radiation and radioactive materials.
Secondary engineering control (SEC):	The area where the PEC is placed (eg, a classified area or an SRPA). It incorporates specific design and operational parameters required to minimize the risk of microbial contamination.
Segregated radiopharmaceutical processing area (SRPA):	A designated, unclassified space, area, or room with a defined (by facility procedures) perimeter that contains a PEC. An SRPA is only suitable for radiopharmaceutical preparation (with and without minor deviations), dispensing, and repackaging. If the SRPA is used to elute radionuclide generators it must have ISO Class 8 particle count non-viable particle count air quality.
Shielding:	Barriers of appropriate radiation attenuating material, used for radiopharmaceuticals, to protect the personnel. These barriers can be general in nature (eg, L-block, hot-cell), as to afford protection from a radiation field, or specific to a container used to hold a particular radiopharmaceutical (eg, syringe shield, vial shields, "pigs").
Single-dose container:	A container of a radiopharmaceutical for administration that is designed for use with a single patient as a single administration.
Specific activity:	The radioactivity of a radionuclide per unit mass of the compound involved with the radionuclide (see Radioactivity—Theory and Practice <821>). The units of specific activity involve those for the activity (eg, mCi, MBq, Ci, GBq)and those for the unit of mass (eg, µg, mmol)
Sporicidal agent:	A chemical or physical agent that destroys bacterial and fungal spores when used in sufficient concentration for a specified contact time. It is expected to kill all vegetative microorganisms.
Start of preparation:	Time at which a vial septum is punctured or a component container is opened (eg, removal of cap on a pre-filled syringe), whichever comes first.
Sterility:	The absence of viable microorganisms.
Strength:	The radioactivity concentration of the radiopharmaceutical at the calibration time (see <821>). Strength is expressed as the quantity of radioactivity on a volume basis (eg, mCi/mL or MBq/mL).
Unclassified space:	A space not required to meet any ISO air cleanliness classification.
Unrestricted area:	An area in which a person should not be exposed to radiation levels in excess of 2 millirems in any 1 h from external sources.
Use-by time:	For radiopharmaceuticals prepared from kits, the time period after preparation during which the radiopharmaceutical should be used or administered, as suggested or stated in the manufacturer's prescribing information.

Observation Header

Tracer Instructions:	Review site quality program compliance on a quarterly basis. Reviews are due by the last day of each month following the calendar quarter. Corrective actions to non-compliant findings which do not require an investigation shall be documented by assigning as associated task in this tool. Findings requiring investigations to determine cause and implement effective corrective actions shall be entered into the SAP system for proper documentation and tracking to closure.
Observation Title: Quality Lead- Quarterly QA Program Review - Janice, Swett - 06/12/2023 10:23.740 AM	
Observation Status: Complete	**Regions:** West
Observation Date: 05/31/2023	**Department:** Wood Dale, IL
Total Completed Observations: 1	**Staff Interviewed:**
Survey Team:	**Unique Identifier:**
Medical Staff:	**Equipment Observed:**
Location:	**Contracted Service:**
Note:	

Questions (* = Required)

Cleaning/Maintenance and Infection Control

1.* Monthly quality self-inspection results been reviewed, corrective actions taken if required and corrective actions are appropriate and effective. ☐ N/A

Instructions: Review the monthly quality self-inspections for your facility to confirm compliance.

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

2.* If the facility uses a third party vendor for cleaning the clean room, have all scheduled cleanings been completed per SOP, within the required time frame and documentation is clearly written and complete? ☐ N/A

Instructions: Review third party vendor clean room cleaning records for period under review, sign and date when review is completed. Confirm that the vendor has completed all scheduled cleanings on time (monthly cleaning every 30 days), appropriate cleaning agents are used per SOP and all records are complete, accurate, clearly written, signed as required and good documentation practices are followed.

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

© 2024 Joint Commission Resources

3.* Have all Clean Room equipment and environment filters been replaced or inspected as required by SOP and is proper documentation maintained? ☐ N/A

Instructions: Review Form 111 Filter Maintenance Record for timely completion of tasks required and proper documentation. LFH pre-filters are to be changed bi-annually unless otherwise required by local regulations, cart pass-thru filters are changed quarterly, air return filters (low wall air returns in clean rooms) are deep cleaned bi-annually.

Compliant?	Num: 1	Den: 1	Comp%: 100.00
◉Yes ○No			

EQ.02.01.01 EP 1 - The organization performs routine and preventive maintenance on medical equipment used by staff in the provision of care, treatment, or services at defined intervals and according to the manufacturers' guidelines. The organization documents the performance of these checks. Note: If the manufacturer does not have guidelines for routine and/or preventive maintenance, the organization establishes such guidelines. For example, the organization may choose to have discussions with the manufacturer, observe its own failure rates for the equipment, examine maintenance schedules of like products, or use any other method that is effective.

4.* Has quarterly HVAC service been completed as required by SOP and is Form 112 Maintenance Checklist on file? ☐ N/A

Instructions: Review HVAC maintenance records on file. Confirm that service is completed during each quarter, annual maintenance service schedule is completed once per year and service provider is completing Form 112 for each service.

Compliant?	Num: 1	Den: 1	Comp%: 100.00
◉Yes ○No			

EQ.02.01.01 EP 1 - The organization performs routine and preventive maintenance on medical equipment used by staff in the provision of care, treatment, or services at defined intervals and according to the manufacturers' guidelines. The organization documents the performance of these checks. Note: If the manufacturer does not have guidelines for routine and/or preventive maintenance, the organization establishes such guidelines. For example, the organization may choose to have discussions with the manufacturer, observe its own failure rates for the equipment, examine maintenance schedules of like products, or use any other method that is effective.
EQ.02.01.01 EP 2 - The organization performs basic safety and operational checks on medical equipment used by staff in the provision of care, treatment, or services, according to organization policy and the manufacturers' guidelines. The organization documents the performance of these checks.

5.* Have all laminar flow hoods LFH and biological safety cabinet BSC disinfection procedures been properly completed as required and documented accordingly? ☐ N/A

Instructions: Review Form 25 LFH and BSC disinfection logs for period under review. Confirm that all units were cleaned each day of use and frequency is appropriate as required by SOP and local regulations. Confirm an "A" agent for used daily, all entries are clearly written and good documentation practices are followed. Confirm that deep clean is performed at required frequency.

Compliant?	Num: 1	Den: 1	Comp%: 100.00
◉Yes ○No			

6.* Aseptic processing areas are clean and uncluttered. All clean rooms have been cleaned each day of use as required by SOP and documented properly on Form 76. Monthly cleaning tasks performed timely and documented properly. ☐ N/A

Instructions: Review cleaning logs for period under review, sign and date when review is completed. Confirm that rooms were cleaned each day of use and monthly cleaning is performed. Confirm all documentation entries are complete and clearly written. Good documentation practices are followed.

EQ.02.01.01 EP 1 - The organization performs routine and preventive maintenance on medical equipment used by staff in the provision of care, treatment, or services at defined intervals and according to the manufacturers' guidelines. The organization documents the performance of these checks. Note: If the manufacturer does not have guidelines for routine and/or preventive maintenance, the organization establishes such guidelines. For example, the organization may choose to have discussions with the manufacturer, observe its own failure rates for the equipment, examine maintenance schedules of like products, or use any other method that is effective.
MM.05.01.07 EP 2 - Staff use clean or sterile techniques and maintain clean, uncluttered, and functionally separate areas for product preparation to avoid contamination of medications.

7.* Are ISO classified areas in good condition, no signs of wear, or deterioration? ☐ N/A

Instructions: Look through the clean room areas, looking for broken parts, breaks/tears/bubbling flooring, loss/deterioration of caulk, paint chips, buildup of cleaning agents, etc.

Compliant?	Num: 1	Den: 1	Comp%: 100.00
◉Yes ○No			

8.* Has the restricted area been properly cleaned and maintained to aid in the control of the clean room environment? ☐ N/A

Instructions: Confirm maintenance is appropriate by observation of the restricted area for clutter and accumulation of dust/debris especially near the outer perimeter of the clean room. Documentation is not required.

Compliant?	Num: 1	Den: 1	Comp%: 100.00
◉Yes ○No			

9.* Is storage of supplies in the clean room kept to a minimum, racks clean and neatly organized and opened syringes kept to 24 hour supply? ☐ N/A

Instructions: Visually observe the storage of supplies in the clean room. Confirm that supplies kept to a minimum and stored in containers that are easily cleanable when possible. No excessive supplies are stored in any area and the areas immediately surrounding the laminar flow hoods are clear of storage racks.

Compliant?	Num: 1	Den: 1	Comp%: 100.00
◉Yes ○No			

10.* Hand hygiene practices follow the current World Health Organization (WHO) hand hygiene guidelines. (See also IC.01.04.01, EP 5) ☐ N/A

Instructions: Verify that a legible copy of the WHO hand hygiene poster is posted at the hand hygiene sink.

Compliant?	Num: 1	Den: 1	Comp%: 100.00
◉Yes ○No			

NPSG.07.01.01 EP 1 - Implement a program that follows categories IA, IB, and IC of either the current Centers for Disease Control and Prevention (CDC) and/or the current World Health Organization (WHO) hand hygiene guidelines. (See also IC.01.04.01, EP 5)

11.* Verify hand hygiene compliance tracking has been completed each January and July using Form 141 and were compliance goals met during these observations? (See also IC.03.01.01, EP 3) ☐ N/A

Instructions: Minimum acceptable overall or individual compliance goal is 80%. If less than 80% compliance was observed was the individual or entire staff re-trained and re-observed? Were the most recent observation compliance rates compared with the previous tracker? Was an improvement goal of +2% or more observed for overall facility compliance from the previous tracker until ultimate goal of 100% compliance is achieved and maintained?

Compliant?	Num: 1	Den: 1	Comp%: 100.00

NPSG.07.01.01 EP 2 - Set goals for improving compliance with hand hygiene guidelines. (See also IC.03.01.01, EP 3)
NPSG.07.01.01 EP 3 - Improve compliance with hand hygiene guidelines based on established goals.

12.* Are all deliveries being handled in a manner to reduce the possible spread of infections? (See also IC.02.02.01, EP 4) ☐ N/A

© 2024 Joint Commission Resources

Instructions: Confirm by observation and interview that distribution personnel understand and comply with segregation or covering of return packages from delivery packages, hand hygiene and equipment sanitization procedures.

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

EQ.01.01.01 EP 9 - The organization delivers medical equipment and supplies that are sanitary, clean, and undamaged.

13.* Do site distribution personnel reduce possible cross contamination of delivery packages by using proper segregation and/or coverings on return delivery packages? ☐ N/A

Instructions: Confirm by observation and interviews that distribution personnel understand and comply with measures to reduce cross contamination during delivery procedures.

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

EQ.01.01.01 EP 9 - The organization delivers medical equipment and supplies that are sanitary, clean, and undamaged.
IC.02.02.01 EP 1 - The organization implements infection prevention and control activities when doing the following: Cleaning and performing disinfection of medical supplies and devices. * Note: Disinfection is used for items such as stethoscopes and blood glucose meters. Additional cleaning and disinfecting is required for medical equipment, devices, and supplies used by patients who are isolated as part of implementing transmission-based precautions. Footnote *: For further information regarding cleaning and performing disinfection of medical equipment, devices, and supplies, refer to the website of the Centers for Disease Control and Prevention (CDC) at https://www.cdc.gov/infectioncontrol/guidelines/disinfection/#r3. (See also EQ.01.05.01, EPs 3, 4)
IC.02.02.01 EP 3 - The organization implements infection prevention and control activities when doing the following: Disposing of medical equipment, devices, and supplies in accordance with law and regulation.
IC.02.02.01 EP 4 - The organization implements infection prevention and control activities when doing the following: Storing medical equipment, devices, and supplies. (See also EQ.01.05.01, EPs 1, 2, 3, 4, 5)

14.* Are proper supplies available for clean room entry hand hygiene? ☐ N/A

Instructions: Nail pics, hand soap in non-refillable dispensing containers, and low lint towels must be used for clean room entry hand hygiene.

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

Environmental Controls and Monitoring

15.* Have the clean room and primary engineering control certification reports been reviewed for compliance and timely completion? ☐ N/A

Instructions: Confirm that third party certification reports are reviewed and all primary and secondary engineering control tests have been completed according to SOP, USP<797> and State BOP requirements. Confirm that any failures or out of compliance results are investigated and remediation actions/corrective actions are taken.

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

EQ.02.01.01 EP 5 - The organization certifies laminar flow hoods and clean rooms every 12 months. The organization documents the performance of these checks. Note: There are many ways to document the certification, such as using bar coding equipment, check marks on a tag, or an inventory.

16.* Is equipment used in compounding and to ensure proper storage conditions in calibration if required? ☐ N/A

Instructions: Review all drug storage thermometers/hygrometers, cold drug storage (refrigerator) thermometers, heat block thermometers, centrifuges, velometer and tachometer to verify that equipment is in calibration. Calibration reports shall be signed and dated to document the initial site review. Verify that calibration certificates are maintained on file for equipment currently in use and prior certificates are maintained on file for a minimum of 5 years.

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

© 2024 Joint Commission Resources

EQ.02.01.01 EP 4 - The organization periodically inspects equipment used in compounding or preparing drugs for operational effectiveness and accuracy. The organization documents the performance of these checks.

17.* Have viable air samples been taken at the appropriate frequency, at all locations as required in SOP and confirmed to be within ISO classification limits? If samples exceeded action limits, was remediation conducted and properly documented with corrective actions? Was area retested to confirm state of control? ☐ N/A

Instructions: Review certification records for period under review to confirm that viable air samples have been completed as required and are within ISO classification requirements. Confirm Action limits are not exceeded. Confirm that any exceedences are reported, investigated and corrective actions if identified are implemented and communicated to applicable employees. Confirm that follow up activities to determine effectiveness of corrective actions taken are documented. If applicable, confirm that any reporting of excursions to State Board of Pharmacy was completed.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

18.* Has contact plate surface sampling been conducted at the required frequency and confirmed to be within ISO classification action limits? If exceedences are identified, was organism(s) ID'd, remediation conducted and properly documented? ☐ N/A

Instructions: Review records during period under review to confirm that contact plate tests for surface contamination have been completed as required and are within ISO classification requirements. Confirm that SOP action limits are not exceeded. Confirm that any exceedences are ID'd by a credentialed lab, reported, investigated and corrective actions if identified are documented and communicated to applicable employees. Confirm that follow ups activities to determine effectiveness of corrective actions taken are conducted and documented. If applicable, confirm that any required reporting of excursions to State Board of Pharmacy was conducted.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

EQ.02.01.01 EP 2 - The organization performs basic safety and operational checks on medical equipment used by staff in the provision of care, treatment, or services, according to organization policy and the manufacturers' guidelines. The organization documents the performance of these checks.

19.* Are temperature and humidity readings taken each day of operations in all drug and media storage locations and verified to be within required ranges? ☐ N/A

Instructions: Review temperature and humidity logs Form 28 for period under review. Confirm proper documentation each day of operations or as required by State regulations. Documentation is clearly written, and all temperatures and humidity readings are within appropriate ranges per SOP and State BOP guidance. If out of specification results are noted, were corrective actions needed to return the area to the proper range? Were corrective actions noted or documented?

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

MM.03.01.01 EP 2 - For organizations that store medications at their site(s): The organization stores medications according to the manufacturers' recommendations or, in the absence of such recommendations, according to a pharmacist's instructions. Note: This element of performance is also applicable to sample medications.
MM.03.01.01 EP 4 - For organizations that store medications at their site(s): The organization follows a written process addressing the control of the medication between receipt by the organization and delivery to or administration at the designated site. Note: This element of performance is also applicable to sample medications.

20.* Are pressure differentials recorded each day of operations and verified to be within required ranges? ☐ N/A

Instructions: Review Form 82 pressure differential logs for period under review. Confirm that pressure differentials are documented at minimum once each day of operations, documentation is clearly written, and all pressure differentials are within appropriate ranges per SOP guidance. If out of specification results are identified, were corrective actions taken to remediate and properly documented?

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

EQ.02.01.01 EP 2 - The organization performs basic safety and operational checks on medical equipment used by staff in the provision of care, treatment, or services, according to organization policy and the manufacturers' guidelines. The organization documents the performance of these checks.

21.* **Verify environmental monitoring results have been trended on the EM trending spreadsheet and evaluated for negative trends. Negative trends if any, have been identified and actions taken as needed.** ☐ N/A

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

22.* **Are all drugs, components, drug kits, and environmental monitoring media stored correctly and are storage areas monitored using calibrated thermometers/hygrometers?** ☐ N/A

Instructions: Perform a review of the room drug storage area and drug product storage areas to ensure label storage conditions are met. If any of these products require refrigerator, freezer, or low humidity storage, these areas must be monitored using a calibrated monitoring device (thermometers and/or hygrometers). Ensure products are not stored outside of monitored areas.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

Employee Competencies and Process Validations

23.* **Have employees and third party vendors who perform duties in the clean room been visually observed for the duties they perform: initially and at frequencies as required by aseptic training policy?** ☐ N/A

Instructions: Review observational assessment Forms 114-118 on file. Confirm that initial and subsequent observational assessments have been completed on each site employee and third party vendors for all duties performed in the clean room in a timely manner. Confirm that no observational assessments are past due.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

24.* **Have all employees who perform compounding and drawing activities performed the applicable media fill validations initially prior to performing duties and been re-evaluated at the appropriate intervals in accordance with SOP?** ☐ N/A

Instructions: Review media fill records for the period under review for compliance to SOP. If a media fill failure is noted, have investigation procedures and re-evaluation as outlined been completed, documented and reported?

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

25.* **Have all employees who perform WBC labels performed a WBC media fill validation initially prior to performing duties and been re-evaluated at the appropriate intervals in accordance with SOP?** ☐ N/A

Instructions: Review WBC media fill records for the period under review for compliance to SOP. If a media fill failure is noted, have investigation procedures and re-evaluation been completed, documented and reported?

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

26.* **Have all employees who perform aseptic compounding or dose drawing performed gloved fingertip sampling as required by SOP? Initial GFT sampling must be completed on 3 separate and full garbing procedures. Re-evaluation GFTs are conducted as part of the media-fill process.** ☐ N/A

Instructions: Review gloved fingertip sampling records. Confirm that all applicable employees have completed initial triplicate fingertip sampling to verify proper garbing technique and fingertip samples during media fills to confirm aseptic technique prior to performing aseptic operations. Confirm that employees are sampled at appropriate frequency in compliance with SOP during a media fill operation. If action limits are exceeded, are investigations into the possible cause conducted, employees re-instructed, re-evaluated and properly documented in the reporting tool?

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

© 2024 Joint Commission Resources

27.* Has product sterility testing been completed annually as required by SOP or more frequently if required by local BOP rules? ☐ N/A

Instructions: Review Form 119 to confirm that sterility testing has been completed as required by SOP at minimum annually or as required by local BOP rules. If a positive sterility test was observed, was failure properly reported, investigated, corrective action if identified are implemented and communicated to applicable employees? Confirm that follow up activities to determine effectiveness of corrective actions taken are documented in the reporting tool.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

28.* Are all the staff's required licenses, certifications, or registrations, posted in the facility and not expired? Is Form 42 completed, and up-to-date? *If any licenses are due to expire within the upcoming calendar quarter, assign a TASK for that employee using this tracer, requiring them to provide proof of renewal prior to the expiration date. ☐ N/A

Instructions: Staff licenses, certifications, registrations required by the company, BOP or a State agency must be verified through the issuing agency website upon hire, and prior to each expiration. If you use floaters, their license must be checked prior to performing duties at your site, if the license has not been verified by their primary worksite site since the last renewal date. If your state requires the company maintains record of CE required for license/certification renewal, documentation must be presented to the PIC at the time of renewal and maintained on file.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

HR.01.01.01 EP 2 - The organization verifies and documents the following: - Credentials of staff using the primary source when licensure, certification, or registration is required by law and regulation to practice their profession. This is done at the time of hire and at the time credentials are renewed. - Credentials of staff (primary source not required) when licensure, certification, or registration is not required by law and regulation. This is done at the time of hire and at the time credentials are renewed. For home health agencies that elect to use The Joint Commission deemed status option: The organization maintains current licensure and qualifications in personnel records. Note 1: It is acceptable to verify current licensure, certification, or registration with the primary source via a secure electronic communication or by telephone, if this verification is documented. Note 2: A primary verification source may designate another agency to communicate credentials information. The designated agency can then be used as a primary source. Note 3: An external organization (for example, a credentials verification organization [CVO]) may be used to verify credentials information. A CVO must meet the CVO guidelines identified in the Glossary.

29.* Have the appropriate aseptic assessments been completed on any new hire or employees whos duties have changed to require entry ISO classified areas prior to entry? ☐ N/A

Instructions: All employees who enter an ISO classified area must be trained and then assessed on their aseptic techniques applicable to their assigned duties.
Entry requires: 1) Hand hygiene and garbing training and observational assessment
2) Initial Gloved fingertip tests on three separate hand hygiene and garbing entries
Cleaning/disinfecting requires: 1) Cleaning/disinfecting observational assessment for each area they are assigned duties
Product prep/dose drawing requires: 1) Aseptic technique assessment
2) Media fill/GFT testing for assigned duties

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

Training

30.* Have all employees completed the initial and annual USP training module in a timely manner? ☐ N/A

Instructions: Review training records to confirm that all new employees have completed the initial USP training module(s) appropriate to their job description and prior to performing clean room related tasks. Annual reviews are completed by all employees within the past year. No training is past due.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

31.* Are employee who perform WBC labeling and WBC Dual Verifications up to date on training required in SOP? ☐ N/A

© 2024 Joint Commission Resources

Instructions: Confirm by reviewing electronic and/or hard copy training records to confirm all employees who perform WBC labeling procedures and Dual Verifications are trained initially and annually thereafter as required by SOP.

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

32.* Do all employees who perform Therapy Order Verifications have a Form 49 on file? ☐ N/A

Instructions: Confirm that all employees who perform therapy order verifications are initially trained (Form 49 on file).

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

33.* Are Management of Change MOC activities properly implemented and communicated to site employees? ☐ N/A

Instructions: Review site electronic and/or hard copy MOC documents including training records for the quarter under review. Confirm that employees have acknowledged training on Change packets or signed hard copy training records if changes were applicable to their job duties. Verify that MOC changes have been properly implemented and new forms and procedures are being utilized.

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

34.* The PIC has reviewed SOPs associated with the overall QA/QC site program within the last 12 months against current employee practices and State BOP requirements. ☐ N/A

Instructions: This review is documented on Form 120. Corrective actions are taken to ensure SOPs reflect current practices and Fed/State regulatory requirements.

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

PI.04.01.01 EP 2 - The organization acts on improvement priorities. (See also MM.08.01.01, EP 6)

35. Confirm by review of change packet documentation that any program changes implemented during the quarter have been fully implemented and all applicable personnel have been trained on these program changes. ☐ N/A

Instructions: MOC training records are maintained on file either hard copy or electronically for all affected employees.

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

PI.04.01.01 EP 2 - The organization acts on improvement priorities. (See also MM.08.01.01, EP 6)

Compounding and Preparation

36.* Does the facility assign appropriate expiration dating to compounded drugs and drugs used in compounding procedures in compliance with policies and procedures? ☐ N/A

Instructions: Check pharmacy computer system for maximum activity and expiration times on all compounded drug products. Verify that the site has on file complete stability data by drug manufacturer for all drugs compounded beyond package insert activity and expiration time. Confirm that kit calibration times match actual compounding times within 15 minutes. Confirm that no new drugs or manufacturers were introduced during the period under review and if so, maximum activity and expiration times assigned are set to package insert or are supported by complete stability records on file. Confirm by observation and interviews that single use bag/vials of diluents used during compounding are labeled with open date/time if used during multiple runs or discarded at end of run. No single use vial or bag punctured inside an ISO 5 environment is used for more than 6 hours.

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

37. Are medications and components stored in accordance with manufacturer's recommendations or, in the absence of such recommendations, in accordance with PIC's instructions? Are high alert medications, look-a-like/sound-a-like medications properly labeled, stored and handled as indicated in SOP 3.2.4? ☐ N/A

Instructions: Confirm compliance by inspecting drug storage areas. Observe procedures and review associated documentation for compliance (Y-90, Bexxar, therapy medication, WBC labeling, etc.). Confirm proper order processing and handling of look-a-like/sound-a-like drugs as described in SOP.

Compliant?	Num: 1	Den: 1	Comp%: 100.00
◉Yes ○No			

MM.01.01.03 EP 1 - The organization identifies, in writing, its high-alert and hazardous medications. * Note: This element of performance is also applicable to sample medications. Footnote *: For a list of high-alert medications, see https://www.ismp.org/recommendations. For a list of hazardous drugs, see https://www.cdc.gov/niosh/docs/2016-161/pdfs/2016-161.pdf. (See also EC.02.02.01, EP 1)
MM.01.01.03 EP 2 - The organization follows a process for managing high-alert and hazardous medications. Note: This element of performance is also applicable to sample medications. (See also EC.02.02.01, EP 2)
MM.01.02.01 EP 1 - The organization develops a list of look-alike/sound-alike medications it stores, dispenses, or administers. Note 1: One source of look-alike/sound-alike medication name pairs is the Institute for Safe Medication Practices (https://www.ismp.org/recommendations/confused-drug-names-list). Note 2: This element of performance is also applicable to sample medications.
MM.01.02.01 EP 2 - The organization takes action to prevent errors involving the interchange of the medications on its list of look-alike/sound-alike medications. Note: This element of performance is also applicable to sample medications.
MM.01.02.01 EP 3 - The organization annually reviews and, as necessary, revises its list of look-alike/sound-alike medications. Note: This element of performance is also applicable to sample medications.
MM.03.01.01 EP 2 - For organizations that store medications at their site(s): The organization stores medications according to the manufacturers' recommendations or, in the absence of such recommendations, according to a pharmacist's instructions. Note: This element of performance is also applicable to sample medications.

38.* Are large volume parenterals divided in compliance with SOP, properly stored and labeled? ☐ N/A

Instructions: Confirm by observation that large volume parenterals are divided and labeled in compliance with SOP and given proper expiration dating.

Compliant?	Num: 1	Den: 1	Comp%: 100.00
◉Yes ○No			

39.* Are drugs which have expired, are damaged, contaminated or have been recalled properly handled and quarantined in a designated area away from active product prior to final disposal in compliance with SOP? ☐ N/A

Instructions: Confirm by review of computer inventory that expired and recalled drugs are not in active inventory. Inspect quarantined product storage area for proper segregation.

Compliant?	Num: 1	Den: 1	Comp%: 100.00
◉Yes ○No			

MM.03.01.01 EP 8 - All expired, damaged, and/or contaminated medications are removed from patient care areas and stored separately from medications available for administration. Note: This element of performance is also applicable to sample medications.
MM.05.01.17 EP 1 - The organization follows a written policy describing how it will retrieve and handle medications within the organization that are recalled or discontinued for safety reasons by the manufacturer or the US Food and Drug Administration (FDA). Note: This element of performance is also applicable to sample medications.
MM.05.01.17 EP 3 - For organizations that store or dispense medications: When a medication is recalled or discontinued for safety reasons by the manufacturer or the US Food and Drug Administration (FDA), the organization notifies the prescribers and those who dispense or administer the medication. Note: This element of performance is also applicable to sample medications.
MM.05.01.17 EP 4 - When required by law and regulation or organization policy, the organization informs patients that their medication has been recalled or discontinued for safety reasons by the manufacturer or the US Food and Drug Administration (FDA). Note: This element of performance is also applicable to sample medications.

© 2024 Joint Commission Resources

40. Confirm by review of local documents and observation that product information is properly confirmed at time of receipt and labeled with Auxiliary Control # labels and Auxiliary Barcode labels as required in SOP 3.2.2. ☐ N/A

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

MM.02.01.01 EP 4 - The organization maintains a written list of medications, including strength and dosage, for dispensing and administering. The list of medications is readily available. Note: In some settings, the term "formulary" is used instead of "list of medications available for use." The terms are synonymous. (See also MM.03.01.01, EP 1)
MM.03.01.01 EP 1 - For organizations that store medications at their site(s): The organization stores only approved medications and medications selected by the organization. (See also MM.02.01.01, EP 4)
MM.03.01.01 EP 4 - For organizations that store medications at their site(s): The organization follows a written process addressing the control of the medication between receipt by the organization and delivery to or administration at the designated site. Note: This element of performance is also applicable to sample medications.

41.* Confirm by review of local documents and that a master formula is on file in hard copy or electronic copy for each product prepared with minor deviations or compounded as described in Policy 6.5. ☐ N/A

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

42.* Confirm by review of pharmacy computer system that all maximum activities and expiration times which exceed the manufacturers recommendations are supported by stability data required in SOP 6.5.2. ☐ N/A

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

43. Confirm by review of current inventory and inventory records that only appropriate, conventionally manufactured sterile products from FDA-registered facility are used in product preparation. ☐ N/A

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

MM.02.01.01 EP 2 - The organization develops and approves criteria for selecting medications, which include the following: - Indications for use - Effectiveness - Drug interactions - Potential for errors and abuse - Adverse drug events - Sentinel event advisories - Other risks - Costs Note: This element of performance is also applicable to sample medications.
MM.02.01.01 EP 4 - The organization maintains a written list of medications, including strength and dosage, for dispensing and administering. The list of medications is readily available. Note: In some settings, the term "formulary" is used instead of "list of medications available for use." The terms are synonymous. (See also MM.03.01.01, EP 1)

44. All vial shields are properly labeled whenever radiopharmaceuticals are prepared. (See also MC.03.08.05, EP 1; MC.05.01.01, EPs 4 and 6; MM.06.01.01, EP 3) ☐ N/A

Instructions: Vial shield labels are undamaged, cleanable. Auxiliary control # labels are placed on shields prior to preparation.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

MM.05.01.09 EP 1 - Medication containers are labeled whenever medications are prepared but not immediately administered. Note 1: This element of performance does not apply to segregated pill boxes that store medications by day and time of day. Note 2: An immediately administered medication is one that an authorized staff member prepares or obtains, takes directly to a patient, and administers to that patient without any break in the process. Note 3: This element of performance is also applicable to sample medications.

Quality Events/Performance Improvement

45.* Are all quality related events reported to the facility through customer or patient complaints such as the right dose, right drug, right patient/customer, right time, on time, and product safety events such as altered biodistribution, adverse events, patient complaints etc., being properly reported in the electronic database and being investigated for appropriate corrective actions? Are external reports being made as required by law or regulation? ☐ N/A

Instructions: Confirm by reviewing reported events for complete and clearly written documentation, references to all investigation activities, identification of corrective actions and follow up documentation showing effectiveness of corrective actions. Confirm external reports are timely if needed. Confirm that site personnel can retrieve supporting documents that are not supplied as attachments to the event.

LD.03.07.01 EP 2 - As part of performance improvement, leaders, or managers delegated by leaders, do the following: - Set priorities for data collection, performance improvement activities, and patient health outcomes - Give priority to high-volume, high-risk, or problem-prone processes for performance improvement activities Note: Examples of areas of risk include blood-borne infections, wound care, undetected urinary tract infections, oxygen-related fires, and patient handoff to or from the home care organization. - Identify the frequency of data collection for performance improvement activities - Reprioritize performance improvement activities in response to changes in the internal or external environment Note: For home health agencies and hospices that elect to use The Joint Commission deemed status option: The organization's governing body is ultimately accountable for making sure that the priorities that are selected address improvements to the safety and quality of patient care. (See also PI.01.01.01, EPs 2, 12, 13; PI.02.01.01, EP 1)
PI.01.01.01 EP 12 - The organization collects data on the following: Significant medication errors. (See also LD.03.07.01, EP 2; MM.08.01.01, EP 1)
PI.01.01.01 EP 13 - The organization collects data on the following: Significant adverse drug reactions. (See also LD.03.07.01, EP 2; MM.08.01.01, EP 1)
PI.01.01.01 EP 15 - The organization collects data on the following: - Patient satisfaction with and complaints about products and services - Timeliness of response to patient questions, problems, and concerns - Impact of the organization's business practices on the adequacy of patient access to equipment, items, services, and information - Adverse events involving patients due to inadequate or malfunctioning equipment, supplies, or services (for example, injuries, accidents, signs and symptoms of infection, and hospitalizations)
PI.01.01.01 EP 2 - The organization collects data on the following: Performance improvement priorities identified by leaders. (See also LD.03.07.01, EP 2)
PI.01.01.01 EP 41 - For specialty pharmacies: The organization collects data on medication errors including the following: - Incorrect drug - Incorrect recipient - Incorrect strength of medication - Incorrect dosage form - Incorrect instructions - Incorrect quantity - Near misses
PI.01.01.01 EP 42 - For specialty pharmacies: The organization collects data on the following: - Adherence rate - Turnaround time for patient delivery of medications and associated products supplied by the specialty pharmacy Note: The organization may choose to separate data for medications that require an intervention. - Billing and coding errors

46.* Are quality events and corrective actions being properly communicated to all affected employees and employee training completed? ☐ N/A

Instructions: Confirm that events are being properly communicated to affected employees by reviewing site communications documents such as monthly safety meeting minutes or completion of training record on Form 45.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

LD.03.07.01 EP 2 - As part of performance improvement, leaders, or managers delegated by leaders, do the following: - Set priorities for data collection, performance improvement activities, and patient health outcomes - Give priority to high-volume, high-risk, or problem-prone processes for performance improvement activities Note: Examples of areas of risk include blood-borne infections, wound care, undetected urinary tract infections, oxygen-related fires, and patient handoff to or from the home care organization. - Identify the frequency of data collection for performance improvement activities - Reprioritize performance improvement activities in response to changes in the internal or external environment Note: For home health agencies and hospices that elect to use The Joint Commission deemed status option: The organization's governing body is ultimately accountable for making sure that the priorities that are selected address improvements to the safety and quality of patient care. (See also PI.01.01.01, EPs 2, 12, 13; PI.02.01.01, EP 1)
PI.01.01.01 EP 12 - The organization collects data on the following: Significant medication errors. (See also LD.03.07.01, EP 2; MM.08.01.01, EP 1)
PI.01.01.01 EP 13 - The organization collects data on the following: Significant adverse drug reactions. (See also LD.03.07.01, EP 2; MM.08.01.01, EP 1)
PI.01.01.01 EP 15 - The organization collects data on the following: - Patient satisfaction with and complaints about products and services - Timeliness of response to patient questions, problems, and concerns - Impact of the organization's business practices on the adequacy of patient access to equipment, items, services, and information - Adverse events involving patients due to inadequate or malfunctioning equipment, supplies, or services (for example, injuries, accidents, signs and symptoms of infection, and hospitalizations)
PI.01.01.01 EP 2 - The organization collects data on the following: Performance improvement priorities identified by leaders. (See also LD.03.07.01, EP 2)

47.* Are corrective actions to quality events implemented and are follow ups conducted to confirm effectiveness? ☐ N/A

© 2024 Joint Commission Resources

Instructions: Confirm by reviewing events for identified corrective actions. Do documents and/or interviews with employees confirm that corrective actions have been implemented? Have re-occurrences of the event or similar events happened which may show lack of effectiveness?

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

PI.04.01.01 EP 2 - The organization acts on improvement priorities. (See also MM.08.01.01, EP 6)
PI.04.01.01 EP 4 - The organization evaluates actions to confirm that they resulted in improvements. Note: For hospices that elect to use The Joint Commission deemed status option: The hospice's governing body is ultimately accountable for making sure that improvement actions are evaluated for effectiveness.
PI.04.01.01 EP 5 - The organization acts when it does not achieve or sustain planned improvements.

48.* Do site events show any re-occurrences or trends that have not been previously identified and that needs to be investigated for possible site or systemic corrective actions? Answer compliant if no re-occurrences or trends. ☐ N/A

Instructions: Confirm by review of site events for the period under review. Pay close attention to similar types events and look for trends that may show a breakdown of the quality system in place. If a trend is identified, an investigation into possible causes and corrective actions is to be initiated locally. If a systemic issue and corrective actions is identified a Management of Change shall be initiated.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

PI.03.01.01 EP 4 - The organization analyzes and compares internal data over time to identify levels of performance, patterns, trends, and variations.
PI.04.01.01 EP 5 - The organization acts when it does not achieve or sustain planned improvements.

49.* Have all product related complaints reported to or noted by pharmacy staff such as altered bio-distributions, adverse reactions and QC failures been reported to the drug manufacturer as required by SOP? ☐ N/A

Instructions: Review events entries for the period under review. Confirm that any product related complaints have been reported directly to the drug manufacturer.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

MM.07.01.03 EP 1 - The organization follows a written process to respond to actual or potential adverse drug events, significant adverse drug reactions, and medication errors. Note: This element of performance is also applicable to sample medications.
MM.07.01.03 EP 2 - The organization follows a written process addressing prescriber notification in the event of an adverse drug event, significant adverse drug reaction, or medication error. Note: This element of performance is also applicable to sample medications.
MM.07.01.03 EP 3 - The organization complies with internal and external reporting requirements for actual or potential adverse drug events, significant adverse drug reactions, and medication errors. Note: This element of performance is also applicable to sample medications.

50.* Has the site posted updated local communicable disease information for employees to review? ☐ N/A

Instructions: Confirm by observation that the local communicable disease postings are updated quarterly. The posting shall include influenza rates during the flu season. If an updated posting is not available, the current posting should be signed and dated as updated.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

IC.01.03.01 EP 1 - The organization identifies infection risks based on the following: - Its geographic location, community, and population served - The care, treatment, or services it provides - The analysis of its surveillance activities and other infection control data Note 1: Surveillance activities may address processes and/or outcomes. Note 2: For organizations that provide personal care and support services: Surveillance activities may include verification of infection control education for all employees and supervisor observations of employees' hand-washing techniques.
IC.01.03.01 EP 3 - The organization prioritizes the identified risks for acquiring and spreading infections. These prioritized risks are documented.

© 2024 Joint Commission Resources

51.* Has the facility completed the hand hygiene compliance tracker as required and does the facility meet company goals for hand hygiene compliance? ☐ N/A

Instructions: Confirm by reviewing local documents. If hand hygiene compliance did not meet goals, were corrective actions taken to promote compliance and were follow up observations made to confirm effectiveness of corrective actions? Current frequency is biannual (January/July of each year).

Compliant?	Num: 1	Den: 1	Comp%: 100.00
◉Yes ○No			

NPSG.07.01.01 EP 1 - Implement a program that follows categories IA, IB, and IC of either the current Centers for Disease Control and Prevention (CDC) and/or the current World Health Organization (WHO) hand hygiene guidelines. (See also IC.01.04.01, EP 5)
NPSG.07.01.01 EP 2 - Set goals for improving compliance with hand hygiene guidelines. (See also IC.03.01.01, EP 3)
NPSG.07.01.01 EP 3 - Improve compliance with hand hygiene guidelines based on established goals.

52.* Confirm the current year Organizational Goals are posted and all employees are aware/understand these goals. Do employees know how we improve our performance to our goals through Continuous Quality Improvement (CQI)? ☐ N/A

Instructions: When interviewed, can staff name a goal or a quality improvement change that was implemented within the last year, i.e., an SOP change, or local change made in response to site event trending or customer complaint?

Compliant?	Num: 1	Den: 1	Comp%: 100.00

SOP 4.4.4 Quality and Safety Self-Inspections and Program Reviews

I. Purpose

To describe quality and safety compliance self-inspections and program reviews.

II. Scope

This applies to all Nuclear Pharmacy sites.

III. Responsibility

It is the responsibility of the Pharmacy Manager or designee to oversee policy compliance for personnel under his/her supervision.

IV. Definitions

PIC- Pharmacist in Charge

V. Related Forms

Form 120 Quality Policy and Procedures Review Log

VI. Equipment and Materials:

All equipment and materials used in aseptic processing

VII. Procedure

A. Site Self-Inspections

1. Periodic self-inspections shall be conducted by each facility to ensure ongoing program and regulatory compliance.
2. Tracers with AMP® shall be used to record and maintain documentation of self-inspections either electronically or by printing a hard copy.
3. Content and minimum frequency of the self-inspections shall be determined by the QA/RA, EHS departments.
4. Tracer names and minimum required frequencies are listed in Table 1.
5. Issues identified during the self-inspections shall be documented to include the following:
    a. Description of issue identified
    b. Investigation details including root cause(s) if identified
    c. Corrective action and preventative actions (CAPAs) taken to prevent reoccurrence
    d. CAPA effectiveness evaluation if deemed necessary

B. Site Ops Metrics and Quality Program Reviews

1. Each site PIC/Manager or designee will report all Ops Metrics data by using the Ops Metrics reporting tool link on the E-Reporting and Requesting document found on Teams: https://forms.monday.com/forms/62687754c09f36ac1fa30af545d54340?r=use1

a. Ops Metrics data should be reported by the 15th of each month for the previous month.

2. Quality policies and procedures shall be reviewed annually by the PIC and documented on Form 120 for site compliance and applicability.
    a. This review will include but is not limited to the following:
    - Policy 2.2 Dose Calibrator and all associated SOPs

- Policy 2.3 Radiation Detection Equipment and all associated SOPs
- Section 3: Medication Management
- Policy 4.3 Patient Safety Events & Product Complaints and associated SOPs
- Policy 4.4 Pharmacy Regulatory Events and Inspections and associated SOPs
- Section 6: Quality Assurance- Medication Compounding
- Section 7: Blood Procedures and Controls
- Section 9: Pharmacy Wholesale Distribution

b. Any discrepancies between written procedures and state regulations shall be identified by submitting a management of change request.

3. The site PIC or designee shall review all new or revised policies and procedures and develop a local implementation plan. Hard copy Form 45 or electronic training records of implementation shall be maintained.

Table 1:

Tracer Name	Minimum Frequency	Suggested Responsibility
Monthly Vehicle Safety Check	Monthly on each company vehicle	Courier/Driver
Monthly EHS Safety Self-Inspection	Monthly	Any trained staff member
Monthly Quality Self-Inspection	Monthly	Any trained staff member
RSO- Monthly Rad Safety Inspection	Monthly	RSO
Quality Lead- Quarterly QA Program Review	Each calendar quarter	Quality Lead or Manager/PIC
EHS Lead- Quarterly Program Review	Each calendar quarter	EHS Lead or Manager/PIC
Quarterly Radioactive Medical Waste (RMW) Self-Inspections- State specific checklists for California, Florida, and New York	Each calendar quarter for sites in specified States	RSO
Biannual Hazardous Material (HMT) Self-Inspection	Biannual	EHS Lead or Manager/PIC
Biannual Form 141 Hand Hygiene Tracer Results	Every January and July	Quality Lead or Manager/PIC
Biannual Emergency Drill Confirmation	Biannual	EHS Lead or Manager/PIC
Medication Management Compliance	Annually	Manager/PIC
Annual OSHA Work Related I&I Reporting/Posting	Each year by February 1st thru April 30th	Manager/PIC
Contract Courier Observational Assessment	Optional or as needed for finding corrective actions	Any trained staff member
Packing and Shipping RAM Observational Assessment	Optional or as needed for finding corrective actions	Any trained staff member

VIII. Training

Employees performing these duties shall be trained on the procedure and the documentation tools.

LIST OF ATTACHMENTS

None

Document History		
Version	Date	Brief Description of Change
1	1 June 2020	New Document
2	1 Dec 2020	Updating SOP to remove quality audit which are now covered in SOP 4.4.3, identify required periodic self-inspections, and include form 140 on self-inspections and moved SOP # from 6.1.1 to 4.4.4.
2.1	1 Nov 2021	Administrative
2.2	1 Jul 2022	Updated for self-inspections to be recorded in Tracers with AMP tool, remove reference to Form 140.
2.3	1 Nov 2022	JC Finding- Update to identify required self-inspections by name, location, and frequency. Update to include location and required completion of Ops Metrics.

SOP 6.2.2 Aseptic Techniques & Preparation

I. Purpose:

To describe the aseptic technique used while compounding and dispensing sterile radiopharmaceuticals and pharmaceuticals.

II. Scope:

This applies to all Nuclear Pharmacy sites. Aseptic technique procedures will be employed when preparing for, and during all sterile product processing.

III. Responsibility:

It is the responsibility of the Business Unit Manager or designee to oversee policy compliance for personnel under his/her supervision. All pharmacists and supervised pharmacy support staff who prepare sterile products will adhere to these procedures.

IV. Definitions:

A. **Air curtain** – is the air boundary at the face of a LFH and BSC
B. **ALARA** – As Low as Reasonably Achievable
C. **Beyond Use Date (BUD)**- The date or time after which a compounded product or component used in compounding shall not be used.
D. **Buffer Area** – The area where the primary engineering control that generates and maintains an ISO Class 5 environment is physically located.
E. **CR** – Clean Room, which refers to all ISO classified areas
F. **Critical Sites** – Locations that include any component or fluid pathway such as vial septa, injection ports, open ampules, syringe tips, needles and needle hubs that are exposed and at risk of direct contact with air or touch contamination
G. **Critical Work Area** – Central area within the laminar air flow hood
H. **CSP** – Compounded Sterile Preparation
I. **Direct Compounding Area (DCA)** – A critical area within the ISO Class 5 primary engineering control where critical sites are exposed to unidirectional HEPA filtered air (first air)
J. **First Air** – The unidirectional air exiting the HEPA filter that is essentially particle free
K. **Multiple-Dose Containers**- A multiple-dose container for articles or preparations intended for parenteral administration only and usually containing antimicrobial preservatives.
L. **Primary Engineering Control (PEC)** –Laminar flow hood (LFH) and Biological Safety Cabinet (BSC) which provide an ISO Class 5 environment for the exposure of critical sites
M. **Secondary Engineering Control (SEC)** – Clean Room ISO Class 8 ante and ISO Class 7 buffer areas which serve as a core for the location of the PEC
N. **Single-Dose Containers** - Single-dose containers are single-unit containers for articles or preparations intended for parenteral administration only.
O. **Restricted Area** – Radiation Restricted Area as defined for each individual facility

V. Related Documents:

None

VI. Equipment and Materials:

None

VII. Procedure:

A. All employees entering the clean room shall:

1. Maintain good personal hygiene
2. Perform thorough hand cleaning
3. Select and properly don appropriate garb
4. Clean and maintain the environment in accordance with the ISO classification of each area
5. Protect personnel and compounding environments from contamination
6. Offer guidance when observing incorrect procedures and report malfunctioning equipment.

B. All employees performing aseptic operations shall:
   1. Accurately and aseptically compound and dispense sterile products
   2. Properly label all CSP
   3. Inspect all CSP prior to release

C. To aid in maintenance of ISO classified air quality and first air:
   1. Only personnel directly involved in compounding or dispensing should be in the buffer rooms while aseptic processes are in progress.
   2. Dynamic occupancy rates tested during the current certification test should not be exceeded during aseptic operations.
   3. Verify LFH has proper air velocity prior to use by visual inspection of the airflow monitor or magnahelic gauge.
      a. If the LFH airflow monitor indicates the velocity is below the manufacturer's acceptable level for operation, the pre-filters shall be replaced. If the air velocity remains below the acceptable level after changing the pre-filters, the unit shall not be used.
   3. Verify BSC has proper air velocity prior to use each day by visual inspection of the magnahelic gauge and record the reading on Form 25.
      a. A significant change in the magnahelic gauge reading the time of calibration will indicate cause for concern and the unit shall not be used until service personnel can evaluate proper function.
   4. All personnel while working in the CR shall avoid excessive and fast movement that may compromise the air quality inside the ISO Class 5 PEC. This includes:
      a. Flapping of hands to dry gloves
      b. Quick movements near a PEC or through the air curtain at the face of the PEC
      c. Placement, pulling or swinging of the dose calibrator well dipper pulley in such a way that the pulley moves in and out of the ISO Class 5 air during aseptic operations
   5. Only essential personnel and items shall be in the immediate area of an ISO Class 5 PEC during aseptic processing. The immediate area shall be a minimum of 3 feet in front of any ISO Class 5 PEC.
   6. Talking shall be kept to a minimum and directed away from the PEC during aseptic processing.
   7. Operators shall not interfere with the first air flowing directly from the PEC HEPA filter to critical sites during manipulations.
      a. Radiation safety practices must be balanced with aseptic handling practices when handling radioactive materials. The use of flanged syringe shields and recessed vial shielding may disrupt direct first air contact with the vial septum during certain handling conditions.
      b. The operators' hands or any equipment shall not be allowed to block or interrupt HEPA filtered air to critical sites e.g., unsheathed needle, open centrifuge tube, exposed barrel tip and punctured vial septum when radiation safety practices are not a factor, e.g., drawing saline into a syringe.
   8. Only supplies critical to aseptic operations may be introduced into the PEC.
      a. Items placed in the PEC shall be disinfected using a sterile wiper and sterile 70% IPA.
      b. Unit dose pigs shall be cleaned and disinfected within 24 hours prior to the production run.
      c. Equipment and absorbent material shall not obstruct airflow return grates at the front and back of the work surface.

9. Saline bags and other products or devices shall be hung in the PEC to avoid obstructing first air to the DCA and to ensure critical sites are accessed at least 6 inches from the front edge and either side wall of the PEC.
10. A minimal number of absorbent pads may be used in the PEC for ALARA purposes and shall not block airflow grates at the front or back of the PEC.
11. Only supplies immediately necessary to kit compounding and dose dispensing activities shall be in the DCA.
12. Under normal operations, PECs should never be turned off. In the event of a power failure or shut down for maintenance or service, the unit must be:
    a. Turned on and allowed to run for a minimum of 30 minutes to allow purging of contaminated air and full circulation of first air.
    b. Cleaned with a List A agent and disinfected with sterile 70% IPA prior to use.

D. General Principles of Aseptic Technique
1. Aseptic principles are used during preparation of CSPs to ensure they are free of microorganisms, pyrogens, and particulate matter. It involves the manipulation of products, vials, syringes and the shielding necessary to reduce radiation exposure with consideration to airflow to produce a sterile final product.
2. All aseptic manipulations shall be conducted in a properly prepared ISO Class 5 PEC while wearing appropriate garb.
3. Compounding, dose dispensing, removing, changing, or adding a needle, and vial or bag punctures or any action that involves exposing a critical site to potential contamination shall be considered an aseptic manipulation.
4. Vial septa and bag injection ports shall be disinfected before puncturing, after being exposed to less than ISO 5 air, and if touch contamination is known or suspected. Disinfection shall be performed:
    a. inside the PEC prior to initial puncture
    b. using a new sterile 70% IPA swab
    c. by wiping three times in the direction of the operator
    d. prior to another needle puncture if vial shield top is closed or product is removed from the ISO 5 environment
    e. frequently whenever multiple punctures are occurring
5. Critical sites such as the needle shaft and tip, the syringe plunger ribs, and barrel tip cannot be disinfected and must be discarded if touch contamination is known or suspected.
6. Care must be taken to avoid touching the plunger ribs when drawing sterile products into syringes. If plunger ribs have been or are suspected to have touch contamination:
    a. You may continue with the action of pulling product into the syringe.
    b. You may eject one time as needed e.g., during kit preparation.
    c. You may NOT move the plunger back and forth to adjust activity/volume because the product may become contaminated.
7. Needles shall be used immediately upon removing the cap and promptly recapped or discarded after use.
8. Syringes containing diluents or sterile products for future use may not have the needles removed unless replaced with a sterile cap.
9. Syringes and needles must be discarded if needles are uncapped or removed from syringes in an environment other than ISO Class 5 air quality.
10. Operators shall disinfect their gloves by spraying all surfaces with Sterile 70% IPA:
    a. Immediately after donning sterile gloves.
    b. Prior to cleaning the PEC.

c. Immediately prior to each kit preparation after all disinfected components for compounding have been properly introduced into the PEC.
d. Immediately prior to each dose drawing activity after proper line clearance has been completed and the kit has been properly introduced into the PEC.
e. Immediately prior to initiating each WBC processing action conducted inside the BSC.
f. Prior to re-entering the PEC after touching non-sterile surfaces such as phones, barcode scanners, pens, paper, carts, generators, heat block containment box, tables, etc.
g. Periodically throughout prolonged sessions of compounding or dose drawing or when suspected or known contaminant has occurred.

D. Assignment of BUDs
1. Sterile and Non-sterile prepared products:
a. Shall not exceed the manufacturer's expiration date or time of the component(s) used in compounding.
b. Non-sterile shall be compliant with current USP<795> guidelines.
c. Sterile radiopharmaceutical shall be compliant with current USP<825> guidelines.
d. Sterile radiopharmaceuticals prepared from cold kits shall be compliant with SOP 6.5.2/CASOP 6.5.2 Stability Testing when applicable.
2. Single dose containers:
a. Must be punctured within an ISO Class 5 environment with proper aseptic technique.
b. Must be properly labeled with the BUD date and time.
(a) Single-dose containers used during a single production run not exceeding 6 hours and remaining under the control of a single operator, need not be labeled but must be discarded at the end of the single production run.
c. Maximum BUD is 6 hours and must be discarded 6 hours after the initial needle puncture.
3. Multiple dose containers:
a. Must be punctured within an ISO Class 5 environment with proper aseptic technique.
b. Must be properly labeled with initial puncture date and discard date.
c. Maximum BUD is 28 days after initial needle puncture unless otherwise specified by the manufacturer.
d. BUD shall not exceed the manufacturer's expiration date.

VIII. Training

All employees who perform aseptic operations shall be trained on this procedure.

Section 4: New Managing Pharmacist/Pharmacist in Charge/Supervising Pharmacist Acknowledgement

Managing Pharmacist Name: THOMAS SCHOTIK Pharmacist Registration #: 08312

Pharmacy Name: RALEYS #120 Pharmacy License #: PH01276

Initial each statement below to indicate you have read and agree with the following:

TS I understand that as the managing pharmacist I am responsible for compliance by the pharmacy and its personnel with all state and federal laws and regulations relating to the operation of the pharmacy and the practice of pharmacy. I understand my license can be revoked or that I can be subject of disciplinary action if such laws or regulations are knowingly violated in the pharmacy in which I am the managing pharmacist.

TS I understand within 48 hours after I report for duty as the managing pharmacist, I shall complete an inventory of all controlled substances of the pharmacy pursuant to 21 CFR Part 1304 and maintain a copy of the inventory in the file at the pharmacy.

TS I understand that if I cease to be managing pharmacist of the above-named pharmacy, I will jointly, with the new managing pharmacist, take an inventory of all controlled substances.

TS I understand that as the managing pharmacist I must ensure that all loss or theft of controlled substances are reported on forms provided by the Nevada State Board of Pharmacy and Department of Public Safety within 10 days after the date of discovery of theft or loss. NRS 453.568. Federal regulations require that registrants notify the Field Division Office of the Administration in his area, in writing, of the theft or significant loss of any controlled substance, disposal receptacles or listed chemicals within one business day of discovery of such loss or theft. The registrant shall also complete and submit to the Field Division Office in his area, DEA Form 106 regarding the loss or theft (21 C.F.R. §1301.76(b) and 21 U.S.C. §830(b)(1)(C)).

TS I understand that as the managing pharmacist I must notify the Nevada State Board of Pharmacy of all employment changes of pharmacy staff within 10 days of the change. NAC 639.540

I certify under penalty of perjury that the information I have provided on this application is accurate, true and complete in all material respects. I understand that making any false representation in this application is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire application and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. In the event this application is approved I agree to comply with all applicable federal and state statutes and regulations governing this license or registration and understand that any violation may result in discipline.

NEVADA STATE BOARD OF PHARMACY

BEFORE THE NEVADA STATE BOARD OF PHARMACY

NEVADA STATE BOARD OF PHARMACY, **Petitioner,** v. **AMERICAN WELLNESS PHARMACY, Pharmacy License No. PH02705, and** **THOMAS SCHOTIK, RPH, Certificate of Registration No. 08312,** **Respondents.**	**CASE NOS. 23-063-PH-S** **23-063-RPH-S** **STIPULATION AND ORDER [SCHOTIK ONLY]**

J. David Wuest, in his capacity as Executive Secretary of the Nevada State Board of Pharmacy (Board), by and through General Counsel Brett Kandt, and Respondent Thomas Schotik, RPh, Certificate of Registration No. 08312, **HEREBY STIPULATE AND AGREE THAT:**

1. On or about June 18, 2024, Respondent was served with the Notice of Intended Action and Accusation (Accusation) on file in this matter together with the Statement to Respondent and Notice of Hearing.

2. On or about July 19, 2024, Respondent filed an Answer and Notice of Defense to the Accusation.

3. Respondent is fully aware of the right to seek the advice of counsel in this matter prior to entering into this Stipulation.

4. Respondent is aware of the right to a hearing on the matters alleged in the Accusation, the right to reconsideration, the right to appeal and any and all other rights which may be accorded to him pursuant to NRS Chapter 233B (Nevada Administrative Procedure Act), NRS Chapter 622A (Administrative Procedure Before Certain Regulatory Bodies), and NRS Chapter 639 (Nevada Pharmacy Act).

5. Conditioned on the acceptance of this Stipulation by the Board, and with the exception of the right to challenge any determination that Respondent has failed to comply with

the provisions of this Stipulation, Respondent hereby knowingly and voluntarily waives the rights to a hearing, reconsideration, appeal and any and all other rights related to this action that may be accorded to him by NRS Chapter 233B (Nevada Administrative Procedure Act), NRS Chapter 622A (Administrative Procedure Before Certain Regulatory Bodies), and NRS Chapter 639 (Nevada Pharmacy Act).

6. Respondent does not contest the allegations in the Accusation, but acknowledges that Board staff prosecuting this case could present such evidence at an administrative hearing to establish a factual basis for the violations alleged therein, *to wit,* that:

A. American Wellness Pharmacy, Pharmacy License No. PH02705, compounded and sold drug products using active ingredients that (1) do not have a United States Pharmacopoeia-National Formulary monograph; (2) are not a part of an FDA approved drug product, or (3) are not authorized to be used in pharmacy compounding pursuant to 21 USC § 353a(b)(1) or the regulations adopted pursuant thereto;

B. American Wellness Pharmacy compounded and sold high-risk sterile products with beyond use dates (BUD's) listed on the product label in excess of USP-797 guidelines based on storage conditions without documentation to support the extended BUD;

C. American Wellness Pharmacy's personnel violated NAC 639.67019, NAC 639.67067, NAC 639.67071 and/or NAC 639.757 and related provisions of 21 U.S.C. § 353a;

D. As the managing pharmacist of American Wellness Pharmacy at the time of the violations, Schotik is responsible for those violations and subject to discipline pursuant to NRS 639.210(12) and (15), NRS 639.220(1), NAC 639.510 and/or NAC 639.702; and

E. Schotik engaged in unprofessional conduct as defined in NAC 639.945(1)((i) and is therefore subject to discipline pursuant to NRS 639.210(4).

7. Those violations are pled with particularity in the Accusation and grounds for action pursuant to NRS 639.210 and NRS 639.255.

8. To resolve this matter without incurring any further costs or the expense associated with a hearing, the Board and Respondent stipulate to the following penalties. Respondent Thomas

Schotik, RPh, Certificate of Registration No. 08312, is placed on probation pursuant to NRS 639.255(1)(b) for a period of one (1) year subject to the following conditions:

A. Pursuant to NRS 639.255(1)(f) and NAC 639.955(5), Schotik shall pay a fine of Two Thousand Dollars ($2000.00) for the violations, by personal, business, certified or cashier's check or money order made payable to "State of Nevada, Office of the Treasurer," to be received by the Board's Reno office located at 985 Damonte Ranch Parkway – Suite 206, Reno, Nevada 89521, due and payable by December 1, 2024;

B. Pursuant to NRS 622.400, Schotik shall pay One Thousand Dollars ($1,000.00) to partially reimburse the Board for recoverable attorney's fees and recoverable costs incurred in investigating and prosecuting this matter, by personal, business, certified or cashier's check or money order made payable to the "Nevada State Board of Pharmacy" to be received by the Board's Reno office located at 985 Damonte Ranch Parkway – Suite 206, Reno, Nevada 89521, due and payable by December 1, 2024;

C. Schotik shall not work as managing pharmacist of any compounding pharmacy licensed by the Board while on probation;

D. Schotik shall not engage in the practice of compounding sterile drug products unless and until he completes twenty (20) extra hours of continuing education (CE) on sterile compounding, in addition to the CE hours he must otherwise complete to maintain licensure, and provides certificates demonstrating completion to the Board; and

E. Schotik shall complete ten (10) extra hours of continuing education (CE) on nonsterile compounding, in addition to the CE hours he must otherwise complete to maintain licensure, and provide certificates demonstrating completion to the Board.

Upon successful completion of probation, Respondent's Certificate of Registration No. 08312 will be fully restored.

9. Any failure by Respondent to comply with the terms of this Order may result in issuance by the Executive Secretary of an order to show cause pursuant to NAC 639.965 directing Respondent to appear before the Board at the next regularly scheduled meeting for a show cause hearing. If such a hearing results in a finding of a violation of this Order by Respondent, the Board

may impose additional discipline upon Respondent not inconsistent with the provisions of NRS Chapter 639.

10. General Counsel will present this Stipulation to the Board for approval pursuant to NRS 622.330 at the Board's regularly scheduled public meeting on September 4, 2024. Respondent will appear in person at the meeting to answer questions from the Board Members and/or Board Staff. The Board Members and Staff may discuss and deliberate regarding this Stipulation, even if Respondent or counsel are not present at the meeting.

11. The Board has discretion to accept this Stipulation, but it is not obligated to do so. If this Stipulation is approved by the Board, it shall be a public record pursuant to NRS 622.330 and shall be reported to the National Practitioner Data Bank pursuant to 42 USC § 1396r–2 and 45 CFR Part 60.

12. If the Board rejects any part or all of this Stipulation, and unless they reach an alternative agreement on the record during the hearing, the parties agree that a full hearing on the merits of this matter may be heard by the Board at a later date. The terms and admissions herein may not be used or referred to in a full hearing on the merits of this matter.

13. Subject to the approval of this Stipulation by the Board, the Board and Respondent agree to release one another from any and all additional claims arising from the facts set forth in the Accusation on file herein, whether known or unknown that might otherwise have existed on or before the effective date of this Order.

Respondent has fully considered the charges and allegations contained in the *Notice of Intended Action and Accusation* in this matter, and the terms of this Stipulation, and have knowingly and voluntarily agreed to the terms set forth herein, and waived certain rights, as stated herein.

AGREED:

LIVE YOUR MASTERY
Total Transformation

Date: April 2. 2025

Nevada State Board of Pharmacy
985 Damonte Ranch Parkway, St #206
Reno, NV, 89521

Dear Application/Reinstatement Department,

This is a letter explaining questions 2, 3 and 4 of section 6 of my application for reinstatement of my Board of Pharmacy Dangerous Drugs ONLY license.

1) I was indicted in June 2018 for a professional offense that occurred over a few short months at the end of 2016-early 2017, that was heavily influenced by domestic abuse I was suffering from with a co-worker I was working with and whom I was having romantic relations.
2) After 2.5 years in pre-trial with the federal government where I went through rigorous federal level checkin's, domestic abuse therapy, life/professional coaching, and other government restrictions & oversight, I was convicted on October 20/2020 of "illegal healthcare renumeration" in the amount of $4000 for prescribing creams and modafinil. Note, the basis for the conviction was because I had not reported the scheme my co-worked and romantic partner had unknowingly at first had pulled me into, and because there was life threatening domestic abuse (towards me and my two young children) that was silencing me from reporting.
3) I was sentenced to 3 years probation, zero months in prison, zero dollars in restitution, zero penalties, and 80 hours of community service. I was released after 1 year of federal probation since I was considered low risk and was fully in compliance with my 2.5 years of pre-trial and 1 year of probation. I was also placed on the Inspector Generals exclusion list for 5 years from November 2020 to December 2025.

[redacted]

4) I had surrendered my RN and APRN licenses In March 2021 because I did not trust myself or the medical community as a result of the drug scheme that was going on under my nose in the clinic I worked at with the person I had trusted and was in a romantic relationship with. In October 2023, after time away from nursing for more therapy and coaching, I applied for and was granted my RN license back with supervision for a period of 2 years.
5) February of this year, 2025, my RN supervision requirements were met and I was released from RN supervision and all restrictions.
6) March of this year, 2025, the Nevada State Board of Nursing fully reinstated my APRN license with prescribing privileges and without other restriction nor limitations for demonstrating compliance and growth personally and professional over the last 7 years since the incident.
7) The Inspector General is welcoming me back to accept Medicare and Medicaid without limitations, restrictions or penalty this year, December 2025, so I can serve their population of patients in the underserved community of Nevada and nationally.

Regarding the incidence that lead to my indictment that occurred 7 years ago that I had minimal involvement in (per the judges words), and the total 5.5 years of federal and other state/government oversight, I have shown complete and total compliance to the point that ALL governing agencies have come to consensus that I have been prepared and an fully ready to step back into my role as an APRN with prescribing privileges. The biggest reason for this, at this time, is also due to the trust in the federal governments rigorous and trusted due diligence to provide justice, and when requirements are met, the individual is released of consequence and be free to function in the world again, as in the second chance act. I am applying for my prescribing license back as the Nursing Board has supported and as the Federal Government's Inspector General is supporting me back to serve their clients in the full I was in prior to my removal.

The last license I need to meet my requirement to be prepared to accept Medicaid and Medicare again, per the Inspector General's letter, is for the Nevada State Board of Pharmacy to reinstate my Dangerous Drug ONLY prescribing License. To provide the

[redacted]

supporting facts to substantiate my application and explain questions 2, 3 & 4, please see the below documents.

A) Judgement of Conviction
B) My sentencing transcript where the judge state my minimal involvement and the domestic abuse perpetuating my conviction.
C) The letter from my federal probation officer from January 21 showing early probation release
D) The letter from my criminal defense attorney from 2020 giving an overview of my case
E) The RN supervision release letter from the Board of Nursing from February 2025
F) The APRN reinstatement letter from the Nevada State Board of Nursing from March 2025
G) The original Inspector General's letter showing they are welcoming me back to apply this year in (3 months before my 5 year exclusion date) in September this year (which is 5 months from now)
H) The email from the Inspector General's office stating, essentially, there would be no reason to deny or otherwise penalize or restrict me from being able to accept Medicare and Medicaid insurance, as long as all the criteria are met (**which I have met ALL criteria accept for having my prescribing license back from the Board of Pharmacy**).

I respectfully appreciate that you assist me, the Nevada State Board of Nursing, the Federal Government with reinstating my Dangerous Drugs Privileges without additional penalties nor consequence as per all of the governing bodies recommendation, so I can provide serve to the Medicare and Medicaid population as I am expected to come the end of this 2025 year.

If you have any questions or concerns, or require further information; my attorney, my nursing board representative, and the Inspector General's office, as would I, be more

[redacted]

then happy to provide you with what is needed to move forward with reinstating my license to prepare me to serve the nation.

In gratitude,

Leslie Kalyn, APRN-BC, DNP

CASE NUMBER: 2:18-cr-00169-JCM-NJK-3

SUPERVISED RELEASE

Upon release from imprisonment, you will be on supervised release for a term of:

Three (3) years.

MANDATORY CONDITIONS

1. You must not commit another federal, state or local crime.
2. You must not unlawfully possess a controlled substance.
3. You must refrain from any unlawful use of a controlled substance. You must submit to one drug test within 15 days of release from imprisonment and at least two periodic drug tests thereafter, as determined by the court, not to exceed 104 tests annually.
   ☐ The above drug testing condition is suspended, based on the court's determination that you pose a low risk of future substance abuse. *(check if applicable)*
4. ☐ You must make restitution in accordance with 18 U.S.C. §§ 3663 and 3663A or any other statute authorizing a sentence of restitution. *(check if applicable)*
5. ☑ You must cooperate in the collection of DNA as directed by the probation officer. *(check if applicable)*
6. ☐ You must comply with the requirements of the Sex Offender Registration and Notification Act (34 U.S.C. § 20901, *et seq.*) as directed by the probation officer, the Bureau of Prisons, or any state sex offender registration agency in the location where you reside, work, are a student, or were convicted of a qualifying offense. *(check if applicable)*
7. ☐ You must participate in an approved program for domestic violence. *(check if applicable)*

You must comply with the standard conditions that have been adopted by this court as well as with any other conditions on the attached page.

STANDARD CONDITIONS OF SUPERVISION

As part of your supervised release, you must comply with the following standard conditions of supervision. These conditions are imposed because they establish the basic expectations for your behavior while on supervision and identify the minimum tools needed by probation officers to keep informed, report to the court about, and bring about improvements in your conduct and condition.

1. You must report to the probation office in the federal judicial district where you are authorized to reside within 72 hours of your release from imprisonment, unless the probation officer instructs you to report to a different probation office or within a different time frame.
2. After initially reporting to the probation office, you will receive instructions from the court or the probation officer about how and when you must report to the probation officer, and you must report to the probation officer as instructed.
3. You must not knowingly leave the federal judicial district where you are authorized to reside without first getting permission from the court or the probation officer.
4. You must answer truthfully the questions asked by your probation officer.
5. You must live at a place approved by the probation officer. If you plan to change where you live or anything about your living arrangements (such as the people you live with), you must notify the probation officer at least 10 days before the change. If notifying the probation officer in advance is not possible due to unanticipated circumstances, you must notify the probation officer within 72 hours of becoming aware of a change or expected change.
6. You must allow the probation officer to visit you at any time at your home or elsewhere, and you must permit the probation officer to take any items prohibited by the conditions of your supervision that he or she observes in plain view.
7. You must work full time (at least 30 hours per week) at a lawful type of employment, unless the probation officer excuses you from doing so. If you do not have full-time employment you must try to find full-time employment, unless the probation officer excuses you from doing so. If you plan to change where you work or anything about your work (such as your position or your job responsibilities), you must notify the probation officer at least 10 days before the change. If notifying the probation officer at least 10 days in advance is not possible due to unanticipated circumstances, you must notify the probation officer within 72 hours of becoming aware of a change or expected change.
8. You must not communicate or interact with someone you know is engaged in criminal activity. If you know someone has been convicted of a felony, you must not knowingly communicate or interact with that person without first getting the permission of the probation officer.
9. If you are arrested or questioned by a law enforcement officer, you must notify the probation officer within 72 hours.
10. You must not own, possess, or have access to a firearm, ammunition, destructive device, or dangerous weapon (i.e., anything that was designed, or was modified for, the specific purpose of causing bodily injury or death to another person such as nunchakus or tasers).
11. You must not act or make any agreement with a law enforcement agency to act as a confidential human source or informant without first getting the permission of the court.
12. If the probation officer determines that you pose a risk to another person (including an organization), the probation officer may require you to notify the person about the specific risks posed by your criminal record and you must comply with that instruction. The probation officer may contact the person and confirm that you have notified the person about the specific risks posed by your criminal record.
13. You must follow the instructions of the probation officer related to the conditions of supervision.

U.S. Probation Office Use Only

A U.S. probation officer has instructed me on the conditions specified by the court and has provided me with a written copy of this judgment containing these conditions. For further information regarding these conditions, see *Overview of Probation and Supervised Release Conditions*, available at: www.uscourts.gov.

Defendant's Signature _____ Date _____

DEFENDANT: LESLIE KALYN, D.N.P./A.P.R.N., a/k/a LESLIE FETH
CASE NUMBER: 2:18-cr-00169-JCM-NJK-3

SPECIAL CONDITIONS OF SUPERVISION

1. Search and Seizure – You must submit your person, property, house, residence, office, vehicle, papers, computers (as defined in 18 U.S.C. § 1030(e)(1)), other electronic communications or data storage devices or media, to a search conducted by a United States Probation Officer. Failure to submit to a search may be grounds for revocation of release. You must warn any other occupants that the premises may be subject to searches pursuant to this condition.

The probation officer may conduct a search under this condition only when reasonable suspicion exists that you have violated a condition of supervision and that the areas to be searched contain evidence of this violation. Any search must be conducted at a reasonable time and in a reasonable manner.

2. Deportation Compliance – If you are ordered deported from the United States, you must remain outside the United States, unless legally authorized to re-enter. If you re-enter the United States, you must report to the nearest probation office within 72 hours after you return.

3. No Contact – You must not communicate, or otherwise interact, with any codefendant/coconspirators in the instant offense: Horace Paul Guerra, Nelson M. Mukuna, Robert D. Harvey, and Alejandro Alex Incera, either directly or through someone else, without first obtaining the permission of the probation office.

4. Community Service – You must complete 80 hours of community service within 24 months. The probation officer will supervise your participation in the program by approving the program (agency, location, frequency of participation, etc.). You must provide written verification of completed hours to the probation officer.

Note: A written statement of the conditions of release was provided to the Defendant by the Probation Officer in open court at the time of sentencing.

DEFENDANT: LESLIE KALYN, D.N.P./A.P.R.N., a/k/a LESLIE FETH
CASE NUMBER: 2:18-cr-00169-JCM-NJK-3

CRIMINAL MONETARY PENALTIES

The defendant must pay the total criminal monetary penalties under the schedule of payments on Sheet 6.

	Assessment	Restitution	Fine	AVAA Assessment*	JVTA Assessment**
TOTALS	$ 100.00	$ N/A	$ WAIVED	$ N/A	$ N/A

☐ The determination of restitution is deferred until _____. An *Amended Judgment in a Criminal Case (AO 245C)* will be entered after such determination.

☐ The defendant must make restitution (including community restitution) to the following payees in the amount listed below.

If the defendant makes a partial payment, each payee shall receive an approximately proportioned payment, unless specified otherwise in the priority order or percentage payment column below. However, pursuant to 18 U.S.C. § 3664(i), all nonfederal victims must be paid before the United States is paid.

Name of Payee	Total Loss***	Restitution Ordered	Priority or Percentage

TOTALS	$ 0.00	$ 0.00

☐ Restitution amount ordered pursuant to plea agreement $ _____

☐ The defendant must pay interest on restitution and a fine of more than $2,500, unless the restitution or fine is paid in full before the fifteenth day after the date of the judgment, pursuant to 18 U.S.C. § 3612(f). All of the payment options on Sheet 6 may be subject to penalties for delinquency and default, pursuant to 18 U.S.C. § 3612(g).

☐ The court determined that the defendant does not have the ability to pay interest and it is ordered that:

☐ the interest requirement is waived for the ☐ fine ☐ restitution.

☐ the interest requirement for the ☐ fine ☐ restitution is modified as follows:

* Amy, Vicky, and Andy Child Pornography Victim Assistance Act of 2018, Pub. L. No. 115-299.
** Justice for Victims of Trafficking Act of 2015, Pub. L. No. 114-22.
*** Findings for the total amount of losses are required under Chapters 109A, 110, 110A, and 113A of Title 18 for offenses committed on or after September 13, 1994, but before April 23, 1996.

DEFENDANT: LESLIE KALYN, D.N.P./A.P.R.N., a/k/a LESLIE FETH
CASE NUMBER: 2:18-cr-00169-JCM-NJK-3

ADDITIONAL TERMS FOR CRIMINAL MONETARY PENALTIES

IT IS ORDERED that this Court determined the documented loss amount for defendant Leslie Kalyn is less than $10,000.00.

DEFENDANT: LESLIE KALYN, D.N.P./A.P.R.N., a/k/a LESLIE FETH
CASE NUMBER: 2:18-cr-00169-JCM-NJK-3

SCHEDULE OF PAYMENTS

Having assessed the defendant's ability to pay, payment of the total criminal monetary penalties is due as follows:

A ☑ Lump sum payment of $ 100.00 due immediately, balance due

☐ not later than _____, or
☐ in accordance with ☐ C, ☐ D, ☐ E, or ☐ F below; or

B ☐ Payment to begin immediately (may be combined with ☐ C, ☐ D, or ☐ F below); or

C ☐ Payment in equal _____ *(e.g., weekly, monthly, quarterly)* installments of $ _____ over a period of _____ *(e.g., months or years)*, to commence _____ *(e.g., 30 or 60 days)* after the date of this judgment; or

D ☐ Payment in equal _____ *(e.g., weekly, monthly, quarterly)* installments of $ _____ over a period of _____ *(e.g., months or years)*, to commence _____ *(e.g., 30 or 60 days)* after release from imprisonment to a term of supervision; or

E ☐ Payment during the term of supervised release will commence within _____ *(e.g., 30 or 60 days)* after release from imprisonment. The court will set the payment plan based on an assessment of the defendant's ability to pay at that time; or

F ☐ Special instructions regarding the payment of criminal monetary penalties:

Unless the court has expressly ordered otherwise, if this judgment imposes imprisonment, payment of criminal monetary penalties is due during the period of imprisonment. All criminal monetary penalties, except those payments made through the Federal Bureau of Prisons' Inmate Financial Responsibility Program, are made to the clerk of the court.

The defendant shall receive credit for all payments previously made toward any criminal monetary penalties imposed.

☐ Joint and Several

Case Number Defendant and Co-Defendant Names *(including defendant number)*	Total Amount	Joint and Several Amount	Corresponding Payee, if appropriate

☐ The defendant shall pay the cost of prosecution.

☐ The defendant shall pay the following court cost(s):

☐ The defendant shall forfeit the defendant's interest in the following property to the United States:

Payments shall be applied in the following order: (1) assessment, (2) restitution principal, (3) restitution interest, (4) AVAA assessment, (5) fine principal, (6) fine interest, (7) community restitution, (8) JVTA assessment, (9) penalties, and (10) costs, including cost of prosecution and court costs.

Exhibit B

Sentencing Transcript- Judges Statement

THE COURT: All right.

All right. Having heard statements of counsel for the government, counsel for the defendant and the defendant's remarks, having read the presentence report submitted by the probation department, considering its contents and the contents of the plea agreement, the Court hereby accepts the terms of the plea agreement and will embody those terms in the sentence provided, of course overriding everything -- or the factors set forth in 18 U.S.C. Section 3553(a) which the Court always considers when determining an appropriate sentence.

So I'm going to impose a sentence of zero months, which is the low end of the guidelines. That sentence is -- is within the guide -- it's the low end of the guideline and the Court hereby adopts that. The defendant has no prior criminal record. She's been under supervision for I believe over two years and has complied with all conditions. And her role in the instant offense and the time frame of her involvement was minimal in comparison to codefendant, and she was of course in an unhealthy and abusive relationship with the codefendant during that offense -- during the commission -- during the time that that offense was committed. She -- she has two young children whom she supports and a felony conviction and probation are adequate punishment and deterrence. So zero months.

The -- let's see. That sentence is within the

Exhibit C

Official Early Probation Release

UNITED STATES DISTRICT COURT

DISTRICT OF NEVADA

* * *

UNITED STATES OF AMERICA, Plaintiff(s), v. LESLIE KAYLN, D.N.P./A.P.R.N. aka LESLIE FETH, Defendant(s).	Case No. 2:18-CR-169 JCM (NJK) ORDER

Presently before the court is Leslie Kalyn's motion for early termination of supervised release. (ECF No. 161). Neither probation (*Id.* at 1) nor the government oppose Ms. Kalyn's motion (ECF No. 163).

On July 2, 2020, pursuant to a plea agreement, Ms. Kalyn pled guilty to one count of illegal remunerations for health care referrals, a violation of 42 U.S.C. § 1320a-7b(b)(1)(A). On October 2, 2020, she was sentenced to three years of supervised release. No restitution was imposed.

Ms. Kalyn commenced her supervised release on October 2, 2020, and has been in full compliance in all areas of supervision. (ECF No. 161 at 2). Her probation officer, Matt Martinez has no objection to Ms. Kalyn's request for early release and defers to the court. (*Id.*).

After considering a subset of the 18 U.S.C. § 3553(a) sentencing factors, the court can terminate a defendant's supervised release after one year if "such action is warranted by the conduct of the defendant released and the interest of justice." 18 U.S.C. § 3583(e)(1). The subset of factors include: (1) the nature and circumstances of the offense and the history and

James C. Mahan
U.S. District Judge

characteristics of the defendant, (2) the need for deterrence, (3) the need to protect the public, (4) the need to provide the defendant with educational and vocational training or medical care, and (5) any pertinent Sentencing Commission policy statements. *Id.* The defendant need not show undue hardship stemming from his supervision. *U.S. v. Emmett*, 749 F.3d 817, 819–20 (9th Cir. 2014).

The court finds that early termination of Ms. Kalyn's supervision is warranted by her commendable conduct and the interest of justice. Ms. Kalyn has completed one year of her three-year term of supervised release with exemplary compliance. (ECF No. 161 at 3). She had a minimal role in the underlying offense, has no history of violence or recent arrests, and does not use any controlled substances. (*Id.* at 4). She does not have any special conditions requiring programming or counseling, has no outstanding restitution payments, is leading a law-abiding life, and has demonstrated successful reintegration into her community. (*Id.*)

In consideration of the § 3553(a) factors, the court grants her request.

Accordingly,

IT IS HEREBY ORDERED, ADJUDGED, and DECREED that Ms. Kalyn's motion for early termination of supervised release (ECF No. 161) be, and the same hereby is, GRANTED.

DATED December 21, 2021.

Re: Leslie Kalyn

To Whom it May Concern:

Please allow this letter to provide you background regarding Ms. Kalyn's recent felony conviction and the terms of her sentence. My office represented Ms. Kalyn with respect to charges filed against her in U.S. Federal District Court for the District of Nevada (Case No. 2:18-cr-00169-JCM-NJK-3. On July 2, 2020, pursuant to a plea agreement, Ms. Kalyn plead guilty to one count of Illegal Remunerations for Health Care Referrals, a violation of 42 U.S.C. §§ 1320a-7b(b)(1)(A). On October 1, 2020, the Court sentenced Ms. Kalyn to zero months incarceration and a period of supervised release not to exceed three years. While Ms. Kalyn's co-defendants will be held to answer for millions of dollars in losses and restitution, the Court could not determine a total loss amount to be attributable to Ms. Kalyn's case, instead concluding only that it could not find such amount to be any more than $10,000. Ms. Kalyn will not be required to pay any amount of restitution.

The court based its decision to afford Ms. Kalyn exceptional leniency on several mitigating factors surrounding her background and lesser role in the charged offense, as well as recommendations from both the United States Attorney's Office and the United States Probation Office for the District of Nevada. More specifically, Ms. Kalyn holds a doctorate in nursing practice and is an advance practice registered nurse. She has no prior criminal convictions, and at the time of the instant offense was on the heels of a tumultuous divorce. Vulnerable and financially unstable, Ms. Kalyn became romantically involved with Co-Defendant [redacted] which was the conduit for her becoming a party to the conduct that gave rise to the underlying charges against her. Ms. Kalyn's relationship with [redacted] was frought with manipulation and verbal abuse. She has long since cut all ties with [redacted] who is now in prison.

In requesting leniency, Ms. Kalyn expressed great regret for her actions and took full responsibility for her violations of the law, which are an exception in an otherwise law-abiding life. Ms. Kalyn also provided the court with letters from her supporters, including prior patients, who time and again, reiterated that the instant conduct is a significant departure from her character and life history. Perhaps more importantly, each of them also noted that Ms. Kalyn is focused on working to change the patterns and relationships that lead her to such a place so that these behaviors are never again repeated.

Although the Government asserted the court had the discretion to sentence Ms. Kalyn to 30-37 months in prison, it conceded that such a punishment did not fit her role in the alleged conduct. The United States Probation Office recommended that the court depart from the numeric

federal sentencing guidelines and impose a sentence of probation. The court agreed, finding that a period of supervised release is all that is needed to meet the ends of justice in Ms. Kalyn's case.

It is my understanding that Ms. Kalyn is now seeking to renew her professional licenses in order to continue moving forward in a manner that will have a positive impact on her community and patients. In the event you require additional information, please do not hesitate to contact my office.

Sincerely,

CHRISTIANSEN LAW OFFICES

Exhibit G

Original Inspector General's Letter of Exclusion Expiring December 2025

DEPARTMENT OF HEALTH AND HUMAN SERVICES

OFFICE OF INSPECTOR GENERAL

WASHINGTON, DC 20201

November 30, 2020

Leslie Kalyn
[redacted]

Dear Leslie Kalyn:

Re: OIG File Number L-18-40030-9

This is to notify you that you are being excluded from participation in any capacity in the Medicare, Medicaid, and **all** Federal health care programs as defined in section 1128B(f) of the Social Security Act (Act) for the minimum statutory period of 5 years. The Act defines a Federal health care program as any plan or program that provides health benefits, whether directly, through insurance, or otherwise, which is funded directly, in whole or in part, by the United States Government (other than the Federal Employees Health Benefits Program). State health care programs are defined in section 1128(h) and include plans and programs under titles XIX, V, XX, and XXI of the Act. The scope of this exclusion is broad and will have a significant effect on your ability to work in the health care field.

This action is being taken under section 1128(a)(1) of the Act and is effective 20 days from the date of this letter. See 42 U.S.C. 1320a-7(a), 42 C.F.R. 1001.101(a). This exclusion is due to your conviction as defined in section 1128(i) (42 U.S.C. 1320a-7(i)), in the United States District Court, District of Nevada, of a criminal offense related to the delivery of an item or service under the Medicare or a State health care program, including the performance of management or administrative services relating to the delivery of items or services, under any such program.

This exclusion will affect your ability to claim payment from these programs for items or services that you render; it will NOT affect your right to collect benefits under any Federal health care program such as Medicare, Medicaid, or Social Security. You may find more information regarding exclusions on the Office of Inspector General's (OIG) website, including Frequently Asked Questions and the Special Advisory Bulletin about the Effect of Exclusion. To access this site, go to http://oig.hhs.gov, click on EXCLUSIONS DATABASE, and then choose the item you would like to access.

A detailed explanation of the authority for this exclusion, its effect, and your appeal rights is enclosed and is incorporated as part of this notice by specific reference. You should read this document carefully, act upon it as necessary, and retain it for future reference.

REINSTATEMENT IS NOT AUTOMATIC. You must apply to the OIG and be granted reinstatement. Obtaining a provider number from a Medicare contractor, a State agency, or a Federal health care program does not reinstate your eligibility to participate in those programs.

Sincerely,

WILLIAM ECHOLS Digitally signed by WILLIAM ECHOLS

DEPARTMENT OF HEALTH AND HUMAN SERVICES

OFFICE OF INSPECTOR GENERAL

WASHINGTON, DC 20201

Please read carefully and retain; it contains important information about your exclusion

You are excluded from participation in any capacity in the Medicare, Medicaid, and **all** Federal health care programs as defined in section 1128B(f) of the Social Security Act. See 42 U.S.C. § 1320a-7b(f); 42 C.F.R. § 1001.2.

This exclusion significantly limits your ability to work in any capacity in the health care field in the United States. No payment will be made by any Federal health care program (such as Medicare, Medicaid, Veterans Health Administration, TRICARE, Military Direct Care System, etc.) for any items or services furnished, ordered, or prescribed by you in any capacity. For example, you are prohibited from submitting or causing claims to be submitted to Federal health care programs for items or services which you provide, and you are also prohibited from being employed to provide items or services which are billed to a Federal health care program. Such items or services could include administrative, clerical, and other activities that do not directly involve patient care or the provision of any health care related services.

An excluded person cannot be employed by a provider to perform functions paid for, in whole or in part, by any Federal health care program. Generally speaking, with rare exceptions, you may not be employed by a hospital, nursing home, or any other institutional provider that participates in Federal health care programs.

This exclusion does not affect your rights or the rights of your family members to collect benefits to which you or they may be entitled as a beneficiary under any Federal program such as Medicare, Medicaid, or Social Security.

Under 42 U.S.C. § 1320a-7(d), the Office of Inspector General (OIG) is required to notify all applicable State agencies of your exclusion. The OIG's exclusion is in addition to any sanction an individual State or other Federal agency may impose under its own authority. Notice will be provided to the public and other parties in accordance with 42 U.S.C. §§ 1320a-7(c), (d), and (e).

Any service you provide is a non-covered service. Therefore, notwithstanding 42 U.S.C. 1395w-4(g)(4), you cannot submit claims or cause claims to be submitted for payment under any Federal health care program. Violations of the conditions of your exclusion may subject you to criminal prosecution and/or the imposition of civil monetary penalties and the denial of your reinstatement to the programs. See 42 U.S.C. § 1320a-7a(a)(1)(D); 42 U.S.C. § 1320a-7b(a)(3); 42 C.F.R. § 1001.3002(a)(2).

YOUR REINSTATEMENT IS NOT AUTOMATIC. You will not be reinstated at the conclusion of the minimum period of exclusion, or anytime thereafter, UNLESS YOU APPLY TO THE OIG AND ARE GRANTED REINSTATEMENT to the Medicare and all Federal health care programs under the provisions of 42 U.S.C. § 1320a-7(g) and 42 C.F.R. §§ 1001.3001–.3005. If you were excluded because you lost your license, you may not apply for reinstatement until (1) your license has been restored by the licensing board or agency which originally took the disciplinary action against you, (2) you have obtained a professional health care license in any State, or (3) have been excluded as a result of this action for a minimum of 3 years. See 42 C.F.R. 1001.501(c) for details and exceptions. The request must be made in writing and emailed to sanction@oig.hhs.gov or faxed to (202) 691-2298. Upon receipt of the request, the OIG will notify you of the information and documentation it requires to reach a decision on your reinstatement.

Obtaining a license, moving to another State, or obtaining a provider number from a Medicare contractor, a State agency, or a Federal health care program does not reinstate your eligibility to participate in those programs.

(04/20 Edition)

DEPARTMENT OF HEALTH AND HUMAN SERVICES

OFFICE OF INSPECTOR GENERAL

WASHINGTON, DC 20201

HOW TO APPEAL YOUR EXCLUSION

If you disagree with this action, you may request a hearing before an administrative law judge (ALJ). You may file a request for a hearing before an ALJ only on the issues of: (i) whether the Inspector General has a basis for the imposition of the sanction, and/or (ii) whether the length of exclusion is unreasonable.

A request for hearing must be made in writing within 60 days of receiving the Office of Inspector General's (OIG) notice of exclusion. The date you receive the OIG's notice of exclusion will be presumed to be five (5) days after the date of such notice unless there is a reasonable showing to the contrary.

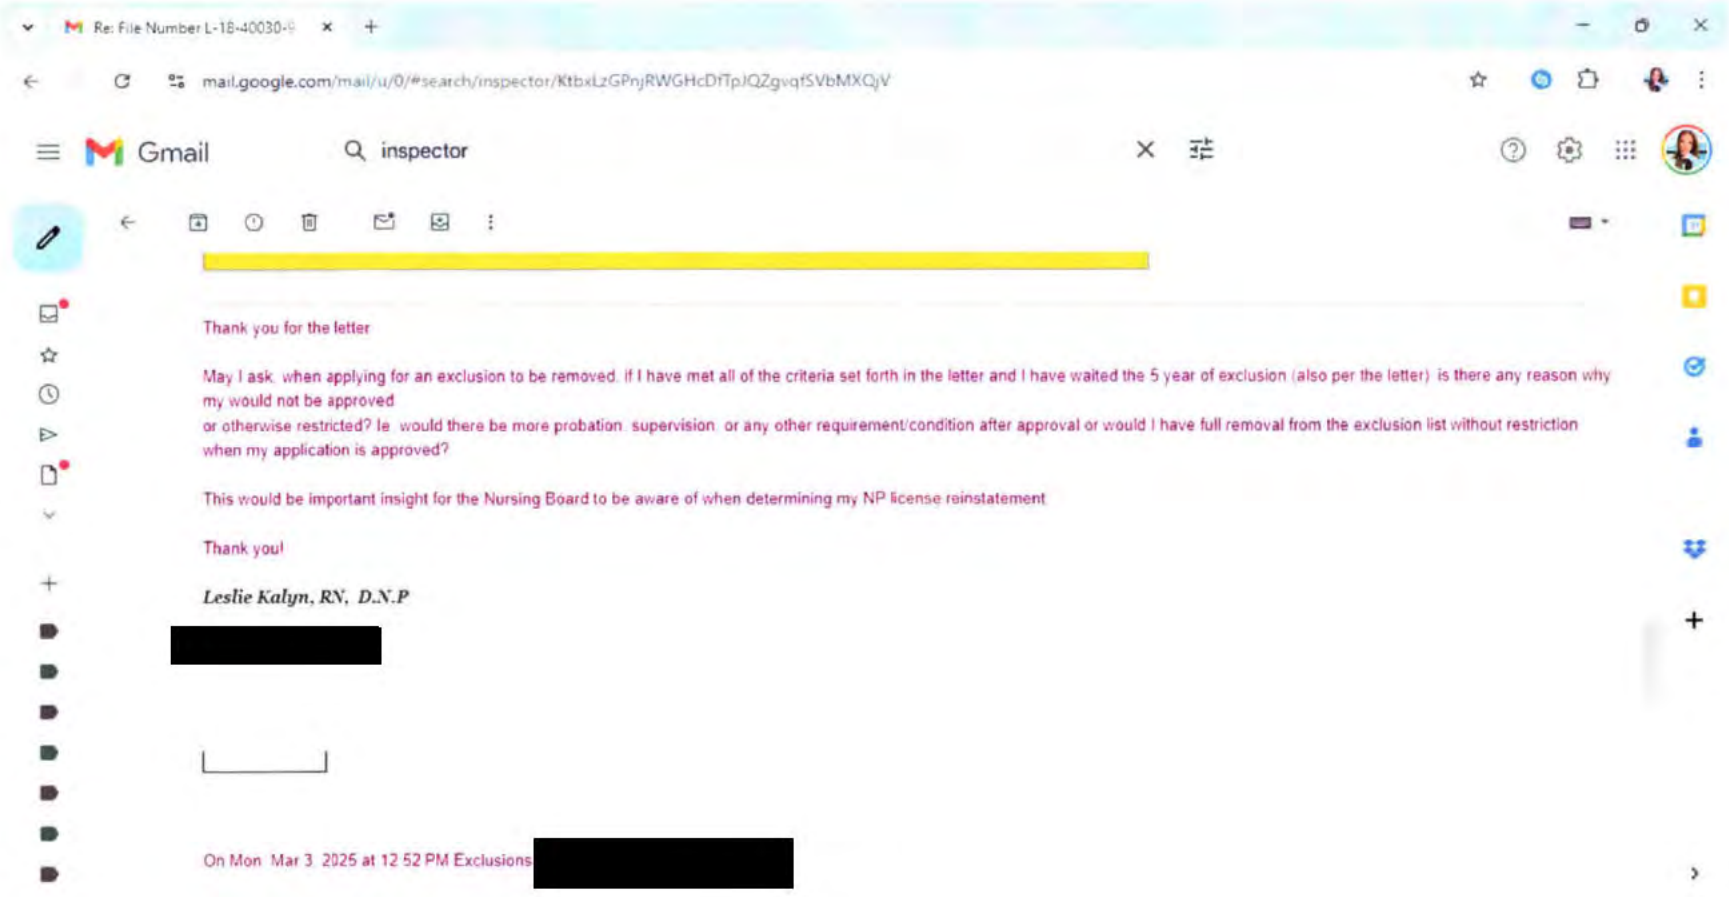
Your request for hearing must be accompanied by a copy of the OIG's notice of exclusion, a statement as to the specific issues or findings with which you disagree, along with the basis for your contention that the specific issues and/or findings are incorrect.

Your request for hearing should be filed with the Departmental Appeals Board electronic filing system website (DAB E-File) at https://dab.efile.hhs.gov. To file a new appeal using DAB E-File, you must first register a new account, by: (1) clicking "Register" on the DAB E-File home page; (2) entering the information requested on the "Register New Account" form; then (3) clicking "Register Account" at the bottom of the form. If you have more than one representative, each representative must register separately to use DAB E-File on your behalf.

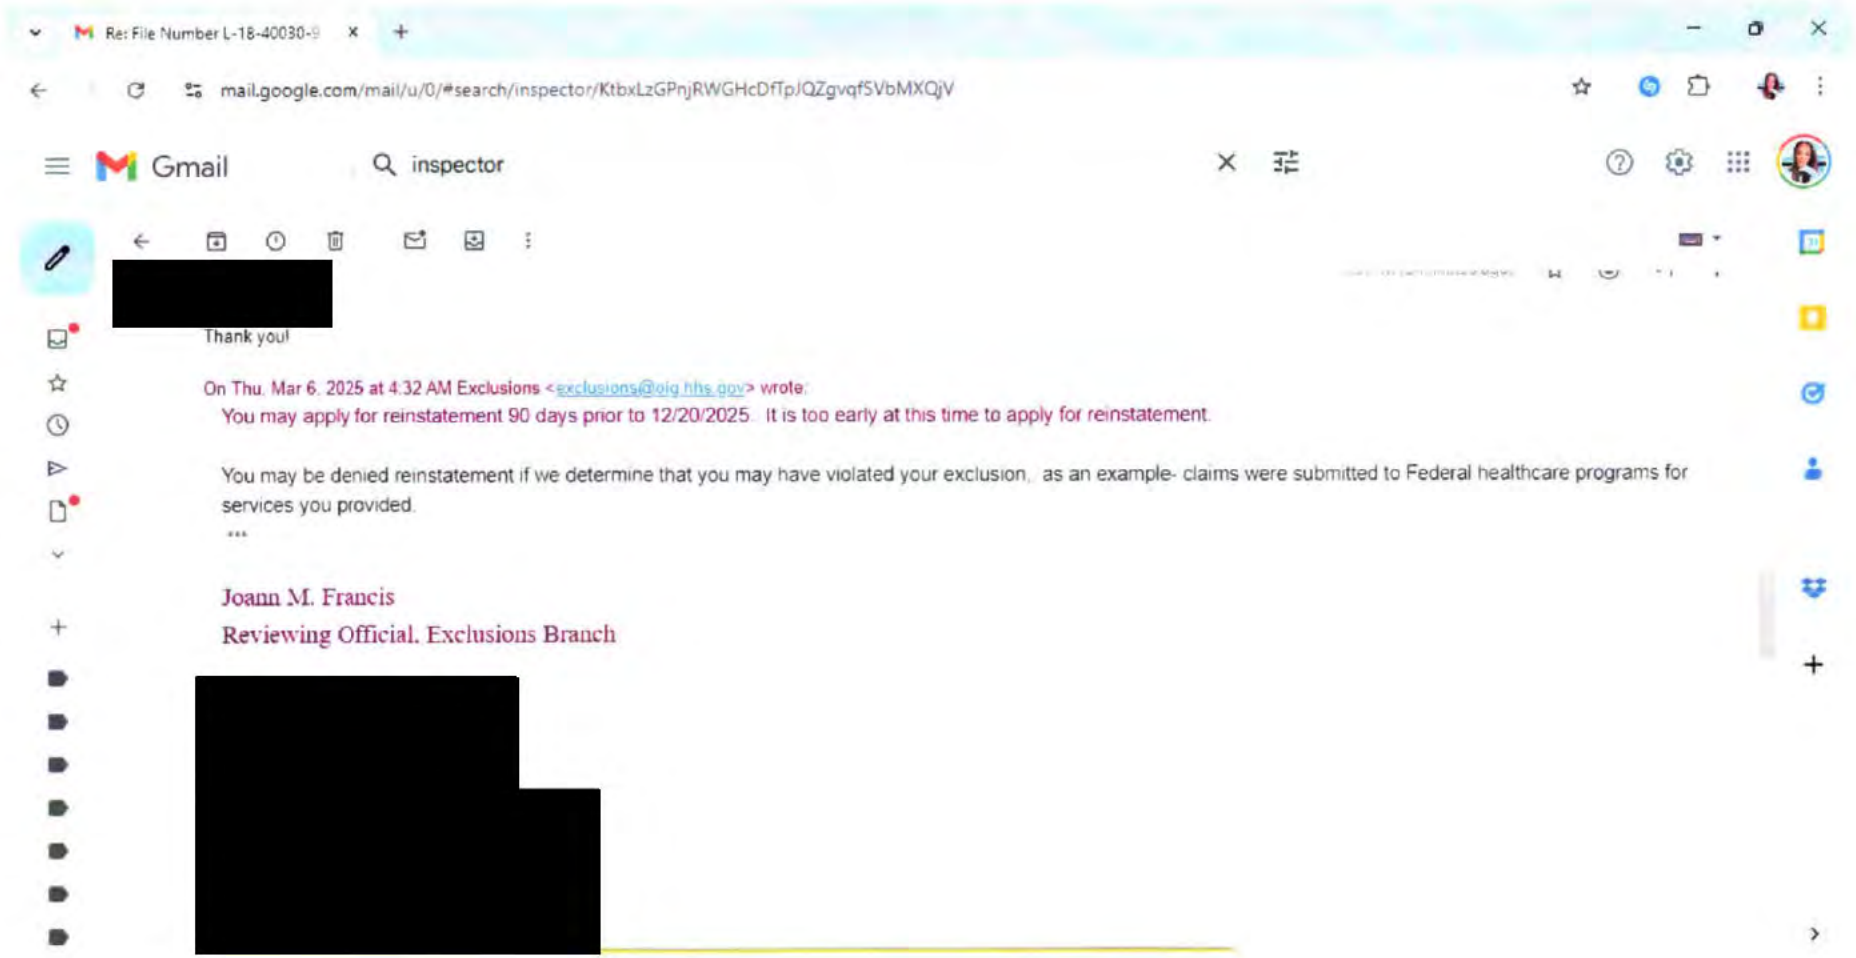
The e-mail address and password provided during registration must be entered on the login screen https://dab.efile.hhs.gov/login to access DAB E-File. A Registered User's access to DAB E-File is restricted to the appeals for which he or she is a party or authorized representative. Once registered, you may file your appeal by:

- Clicking the "File New Appeal" link on the "Manage Existing Appeals" screen, then clicking "Civil Remedies Division" (CRD) on the "File New Appeal" screen; and
- Entering and uploading the requested information and documents on the "File New Appeal – Civil Remedies Division" form.

All documents must be submitted in Portable Document Format (PDF). Any document, including a request for hearing, will be deemed to have been filed on a given day, if it is uploaded to DAB E-File on or before 11:59 p.m. eastern time of that day. A party that files a request for hearing via DAB E-File will be deemed to have consented to accept electronic service of appeal-related documents that OIG files, or CRD issues on behalf of the ALJ, via DAB E-File. Correspondingly, OIG will also be deemed to have consented to electronic service. More detailed instructions on DAB E-File for CRD cases can be found on the link to CRD E-File Procedures on the File New Appeal Screen for CRD appeals.



In the event you are unable to file a hearing request using the DAB E-File system, you may submit all of the required information by mail to:



Director, Civil Remedies Division
Departmental Appeals Board, MS 6132
Room G-644, Cohen Building
330 Independence Avenue, SW
Washington, D.C. 20201

Thank you for the letter
May I ask: when applying for an exclusion to be removed: if I have met all of the criteria set forth in the letter and I have waited the 5 year of exclusion (also per the letter): is there any reason why my would not be approved
or otherwise restricted? Ie: would there be more probation: supervision: or any other requirement/condition after approval or would I have full removal from the exclusion list without restriction when my application is approved?
This would be important insight for the Nursing Board to be aware of when determining my NP license reinstatement
Thank you!

Primary Source Board of Nursing Report Summary for

LESLIE ERIN KALYN [NCSBN ID: 20482095]

Wednesday, April 09 2025 02:22:13 PM

The legend below provides details related to the statuses for advanced practice registered nurses (APRNs) only

Active– *ascribed to APRNs who meet the requirements for licensure, but do not meet the requirements, or have not applied for, prescribing privileges.*

Active Prescribing– *ascribed to all APRNs who have been granted authority to prescribe all legend drugs and may include Schedule CIII-V*

Active Prescribing – CII – *ascribed to all APRNs who have been granted authority to prescribe within the Schedule CII-V category, and is not required to obtain a protocol with a collaborative physician.*

Active Prescribing-CII-COLL – *ascribed to all APRNs who have been granted authority to prescribe within the Schedule CII-V category, and have provided a copy of his/her current protocol with a collaborative physician.*

Active Prescribing -D– *ascribed to all APRNs who have been granted authority to prescribe and dispense all legend drugs and may include Schedule CIII-V*

Active Prescribing – CII – D *ascribed to all APRNs who have been granted authority to prescribe and dispense within the Schedule CII-V category, and is not required to obtain a protocol with a collaborative physician.*

Active Prescribing-CII-COLL –D *ascribed to all APRNs who have been granted authority to prescribe and dispense within the Schedule CII-V category, and have provided a copy of his/her current protocol with a collaborative physician.*

APRNs must also apply with the Nevada State Board of Pharmacy and/or DEA before they can prescribe in Nevada.

If an APRN wishes to remove the protocol requirement they must submit a letter on letterhead from their employer to the Nevada State Board of Nursing verifying that they have worked a minimum of 2 years or 2,000 hours as an APRN.

Details related to License / Certificate Status can be found at the bottom of this page.

OPINION NO. 2025-01

BOARD OF PHARMACY; CONTROLLED SUBSTANCES; DRUGS/DRUG ADDICTS; FOOD AND DRUG; HEALTH; HEALTH CARE PROVIDERS; HOMEOPATHIC MEDICINE; LICENSES; MEDICINE; OSTEOPATHY; STATE BOARD OF HOMEOPATHIC MEDICAL EXAMINERS: Nevada law, specifically NRS 453, 454 and 639 do allow a licensed homeopathic physician in Nevada to possess, administer, prescribe, and dispense controlled substances and dangerous drugs. However, the administration and prescription of said drugs and substances is strictly limited to only the drugs and substances used in accepted homeopathic medicine practice, and only in the very limited amounts permitted in accepted homeopathic practice.

Helen Park, Pharm.D., President
Nevada State Board of Pharmacy
985 Damonte Ranch, Pkwy #206
Reno, Nevada 89521

Dear President Park,

Pursuant to NRS 228.150, you have requested an opinion from this office regarding Nevada's pharmacy and controlled substance statutes, including Nevada Revised Statutes ("NRS") 453, 454 and 639. Specifically, you have asked whether a licensed homeopathic physician, who is not otherwise licensed as an allopathic or osteopathic physician in Nevada, may possess, administer, prescribe, and dispense controlled substances and dangerous drugs under Nevada law. This letter addresses that question.

QUESTION

Whether a licensed homeopathic physician, who is not otherwise licensed as an allopathic or osteopathic physician in Nevada, may possess, administer, prescribe, and dispense controlled substances and dangerous drugs under Nevada law.

SHORT ANSWER

Current Nevada law allows singly licensed homeopathic providers, who are not also licensed as either an allopath or osteopath, to possess, administer, and prescribe both dangerous drugs and controlled substances. However, the administration and prescription of said drugs and substances by a singly licensed homeopathic provider are strictly limited to only the drugs and substances used in accepted homeopathic medicine practice, and only in the very limited amounts permitted in accepted homeopathic practice. For example, common homeopathic practice generally limits utilization of a controlled substance to heavy dilution of a single pill of the drug, versus common allopathic or osteopathic practice, which may allow for the prescription of dozens of pills of the same drug. Various legal mechanisms are in place to monitor and enforce these limits to drugs and dosage.

For dangerous drugs, the prescription of drugs that are (1) not recognized for use in homeopathic medical practice, or (2) are in amounts/dosages beyond what is commonly allowed, is policed and enforced as part of the Nevada Board of Homeopathic Medical Examiners' (NBHME) supervision of its licensees. Failure of any singly licensed provider to adhere to the appropriate limitations would likely be considered malpractice and subject the licensee to disciplinary action from NBHME, which could include revocation of the provider's license to practice.

For controlled substances, the singly licensed homeopathic provider must obtain a controlled substances registration from the Nevada Board of Pharmacy. The Board of Pharmacy has wide discretion and considers numerous factors to determine if any single provider is apt to safely prescribe and utilize controlled substances. For example, a singly licensed homeopathic provider (or any licensed provider for that matter) who has a history of malpractice and/or past disciplinary action may be properly denied a controlled substance registration. Even if a singly licensed homeopathic provider is granted a controlled substance registration, the Board of Pharmacy may continue to closely monitor that provider to ensure that it is utilizing and prescribing controlled substances consistent with accepted homeopathic

practice. Any utilization of non-approved substances and/or use of approved substances in amounts that exceed the generally accepted practice of homeopathic medicine would be grounds for the Board of Pharmacy to initiate disciplinary action against the provider.

ANALYSIS

Background

Under NRS 0.040, the definition of "physician" includes a "homeopathic physician" and the practice of homeopathy. NRS 454.000958 defines "practitioner" to include a "physician…who holds a valid license to practice his or her profession in this State[.]" "Homeopathic medicine" and "homeopathy", as currently defined and described in NRS 630A.040, mean a system of medicine "employing substances of animal, vegetable, chemical or mineral origin[.]" This includes "Nosodes and sarcodes," which are generally defined as inactivated disease products of human, animal, or vegetable origin, or cultures of microorganisms. For the purposes of this opinion, a homeopathic provider who is not at present time concurrently licensed as either an allopathic or osteopathic provider is determined and referred to as "singly licensed."

Definitions

Dangerous Drugs. "Dangerous drugs," as defined in NRS 454.201, generally include drugs, other than controlled substances, that can only be dispensed via prescription because they present a danger if used in an unsupervised manner. Under NRS 454.213, persons authorized to "possess and administer a dangerous drug," include a "practitioner." NRS 454.215 also allows a "practitioner" to dispense "dangerous drugs." Since the statutory definition of "practitioner" includes a "physician," and the statutory definition of a "physician" includes a licensed homeopathic physician, current Nevada law does allow a licensed homeopathic physician to possess, administer, and/or dispense (*i.e.*, prescribe) "dangerous drugs." In accordance with previous Attorney General and Counsel opinions, however, a singly licensed homeopathic provider's ability to possess, administer, and/or prescribe dangerous drugs is limited to only those drugs and in only those amounts generally allowed in homeopathic practice pursuant to The Homeopathic Pharmacopoeia of the United States (HPUS).

There is no separate registration or license for "dangerous drugs" in Nevada. Monitoring and enforcement for ensuring that a singly licensed homeopathic provider only prescribes substances and amounts in accordance

with generally accepted homeopathic medicine practice comes directly from NBHME.

Controlled Substances. The possession, administration, and/or prescription of "controlled substances" by a singly licensed homeopathic provider requires examination of NRS 453, Nevada's "Uniform Controlled Substances Act." Nevada law requires physicians to register with the Nevada State Board of Pharmacy to possess, administer, prescribe or dispense a controlled substance.[1] NRS 630A.370(3) states that one of the grounds for the Board of Pharmacy to initiate disciplinary proceedings against a homeopathic licensee is "[a]dministering, dispensing or prescribing any controlled substance, except as authorized by law." *Id.* (emphasis added). The emphasized language at the end of NRS 630A.370(3) appears to assume that there is some legal means for a homeopathic licensee to prescribe controlled substances.

"Practitioners" who can possess, administer, and dispense controlled substances included homeopathic providers. *See* NRS 453.375, NRS 453.377. Per NRS 453.226, any practitioner who wishes to engage in the dispensing of any controlled substance within the State of Nevada must obtain registration from the Board of Pharmacy on a biennial basis. The Nevada Board of Pharmacy has wide discretion to determine on a case-by-case basis whether an applying practitioner is suitable to receive the required registration to administer, dispense, or prescribe a controlled substance. *See* NRS 453.231 (listing various factors for consideration, including "any" factors relevant to and consistent with public health and safety).

Under NRS 453.231, the Nevada Board of Pharmacy may exempt controlled substances listed as schedule I and/or II even if it otherwise grants a controlled license registration to a particular practitioner under NRS 453.231. NRS 453.236 also allows the Nevada Board of Pharmacy to suspend or restrict a registrant's ability to possess, administer and prescribe certain controlled substances as part of disciplinary action. Finally, a practitioner looking to prescribe controlled substances must obtain and maintain a federal Drug Enforcement Agency license that must be renewed every 3 years, as well as create a Nevada Prescription Monitoring Account.

[1] See NRS 453.126, 453.226(1), NRS 453.375(1)(a), 453.377(1) and (3), 639.23505, 454.213(1)(a), and 454.215(1) and (3).

Previous Attorney General Opinions

Since the time "homeopathic physicians" were added to the statutory definition of "physician" in 1985, two Nevada Attorney General opinions have addressed the question of whether these practitioners can legally possess, dispense, and/or administer controlled substances and/or dangerous drugs. AGO 93-21 (1993) concluded that homeopathic physicians could possess, dispense and administer drugs, but only those that are found in the HPUS. This conclusion was largely based on the language of NRS 630A.040, which limited the authority of homeopathic physicians to write prescriptions to only substances in the HPUS and in only the dosages found in the HPUS. AGO 93-21 concluded, based on the definitions found in the HPUS, that "[n]o known allopathic drugs regularly stocked by Nevada pharmacists would be 'sarcodes'".

A 1999 Attorney General Opinion, AGO 99-06, similarly determined that a NBHME regulation that allowed singly licensed homeopathic physicians to prescribe "pharmaceutical preparations"[2] exceeded the grant of authority delegated to NBHME and was therefore invalid. The regulation in question sought to allow licensed homeopathic providers to prescribe the same drugs and in the same doses as allopathic or osteopathic licensed providers. The reasoning behind the regulation was that all licensed homeopathic providers had received allopathic or osteopathic training sufficient to meet the prescription requirements in at least one state or country. AGO 99-06 expressly endorsed its 1993 opinion and again concluded that the ability of singly licensed homeopathic providers to "possess, dispense and administer controlled substances and dangerous drugs" should be limited to only those substances, and in only those limited doses, expressly approved and allowed by the HPUS.

Legislative Counsel Opinion

In 2000, considering the same NBHME regulation, the State Legislative Counsel (the "Counsel") issued an opinion finding that homeopathic physicians could prescribe controlled substances and dangerous drugs within the course of practicing certain alternative therapies.[3] The Counsel recognized that Attorney General opinions are non-binding and disclaimed the ability of such

[2] This term was expressly limited to exclude "narcotic drugs or opiates that are listed as schedule II-controlled substances pursuant to chapter 453 of NRS, except as those substances may be described for use in the official [HPUS]".

[3] Legislative Counsel Opinion date 1/31/2000.

opinions to invalidate regulations otherwise properly adopted in compliance with the provisions of NRS 233B and filed with the Nevada Secretary of State.

The Counsel's opinion is limited, however, and ultimately aligns with the previous Attorney General opinions in its conclusions and effect. In allowing for the prescription of scheduled controlled substances as medically appropriate in practicing an approved alternative therapy, the Counsel specifically exempts the prescription of "narcotic drugs and opiates that are listed as schedule II-controlled substances pursuant to chapter 453 of NRS, except as those substances may be described for use in the official Homeopathic Pharmacopoeia of the United States[.]" The Counsel's opinion states that, even if a homeopathic provider had the authority and ability to prescribe drugs as a licensed allopathic or osteopathic provider (*i.e.* "a doctor of medicine"), it would not be in the same doses as those providers. Finally, the Counsel concludes that the allowable extent of a singly licensed homeopathic provider prescribing controlled substances and/or dangerous drugs is strictly limited to the substances expressly recognized in common homeopathic practice (*i.e.*, the HPUS) and only in the intentionally and significantly limited doses called for in those therapies, such as the "one-pill rule."

The Counsel also notes that, in its opinion, the NBHME regulation at issue did not purport to grant a singly licensed homeopathic provider *carte blanche* authority to prescribe controlled substances and dangerous drugs, but rather in only the very limited doses and manners necessary for alternative therapies recognized in the HPUS. The opinion thus fairly aligns with the Attorney General opinions of 1993 and 1999, which discussed explicit and significant limitations on the ability of singly licensed homeopathic providers to prescribe certain drugs.

District Court Ruling

A relatively recent Nevada District Court decision—in which the court held that a physician who held an active allopathic or osteopathic license at the time of application for a homeopathic license does not need to have an active allopathic or osteopathic license at the time they seek to renew the homeopathic license—is likewise consistent with the 1993 and 1999 Attorney General opinions.[4] The Court found that, based on statutory construction and differently listed requirements for a homeopathic license "application" versus a homeopathic license "renewal", (NRS 630A.230 vs. NRS 630A.325,

[4] *See Gerber, H.D.M. v. State of Nevada ex rel.*, 2JD, Case No. CV-17-02142 (2018).

respectively), an applicant for initial homeopathic licensure must be licensed as either an allopathic or osteopathic provider but need not still be a licensed allopathic or osteopathic provider at the time they seek to renew their homeopathic license.

This case does not interfere with the Pharmacy Board's authority, under NRS 630A.225, to initiate disciplinary proceedings and/or revoke the homeopathic license of a provider who has had any other medical license or certificate in another jurisdiction revoked for gross medical negligence.

CONCLUSION

Singly licensed homeopathic physicians in Nevada may prescribe "dangerous drugs" as defined in NRS 454.201, but only as long as said "dangerous drugs" are recognized and included in the Homeopathic Pharmacopoeia of the United States (HPUS) and generally accepted homeopathic medical practice. Singly licensed homeopathic providers are also limited in the amounts/dosages of "dangerous drugs" they can utilize or prescribe to an amount not exceeding accepted homeopathic medical practice. Any deviation from accepted practice could and should be grounds for the initiation of disciplinary action by the Board of Homeopathic Medical Examiners.

Similarly, singly licensed homeopathic providers may use and prescribe controlled substances, but only after obtaining required registrations from the Nevada Board of Pharmacy and DEA, and only as is expressly allowed in the HPUS and generally accepted homeopathic practice. Even singly licensed homeopathic providers who have obtained the required Board of Pharmacy registration may only use and prescribe certain substances, and only in the limited doses allowed for in the HPUS. Failure of a singly licensed homeopathic provider to strictly adhere to these limitations on controlled substances subjects said provider to disciplinary action by the Board of Pharmacy, up to and including revocation of the provider's controlled substance registration.
