This resulted in an unlicensed individual performing the duties of a pharmacy technician without a pharmacy technician license. In addition, Sav-on Pharmacy #536 also paid a $10,000 civil penalty ($50,000 total, with $40,000 stayed pending no further similar violations for three years) and as part of the stipulation, Albertsons audited compliance with a Quality Assurance Plan at all Oregon drug outlets quarterly for a period of three years and submitted quarterly reports to the Board. There were no additional restrictions placed on Sav-on Pharmacy #536's registration that would affect its ability to operate as a pharmacy in the State of Oregon. CIVIL SETTLEMENT AGREEMENT

This Civil Settlement Agreement ("Agreement") is entered by and between the United States Attorney's Office for the Western District of Louisiana, acting on behalf of the United States Department of Justice and the United States Drug Enforcement Administration ("DEA") (collectively referred to as the "United States") and DEA registrants Albertsons Pharmacy #2798 - BA7593482; Albertsons/Sav-on Pharmacy #709 – BA3075048; Albertsons/Sav-on Pharmacy #3747 – BA7088532; Albertsons/Sav-on Pharmacy #775 – BA6985228; Albertsons/Sav-on Pharmacy #3713 – BA2552114; Albertsons/Sav-on Pharmacy #714 – BA0282703; Albertsons/Sav-on Pharmacy #775 – BA6985228; Albertsons/Sav-on Pharmacy #3215 – BA2244123 operated by Albertson's LLC (collectively "Albertsons")(each a "Party" and collectively the "Parties").

RECITALS

A. Albertsons owns and operates numerous pharmacies that are or were registered with DEA as dispensers of Schedule II – V controlled substances under the provisions of the Comprehensive Drug Abuse Prevention and Control Act of 1970, 21 U.S.C. §801 *et seq.* (Controlled Substances Act or "CSA").

B. While pharmacies are typically dispensers of drugs, when returning, transferring or disposing of controlled substances, they are bound by the requirements applicable to suppliers of controlled substances. 21 C.F.R. §1305.06. These requirements include completing the supplier's portion of the DEA 222 form, recording the number of containers and recording the date of shipping. See 21 C.F.R. §§1304.22 and 1305.13.

C. Albertsons acknowledges that its DEA-registered pharmacies were and are required to comply with the CSA and the regulations promulgated thereunder, including the requirements described in Paragraph B.

D. The United States contends that Albertsons failed to comply with the regulations in certain instances and that these failures subject Albertsons to civil penalties under 21 U.S.C. §§842(a)(10) and (c)(1)(B).

E. This Agreement is neither an admission of liability by Albertsons nor a concession by the United States that its claims are not well founded.

F. To avoid the delay, expense, inconvenience, and uncertainty of litigating the above-referenced claims, and in consideration of the mutual promises and obligations of this Agreement, the Parties agree and covenant as follows:

TERMS AND CONDITIONS

1. Paragraphs A-F set forth above are fully adopted herein.

2. For purposes of this Agreement, "Covered Conduct" shall mean the written preparation and completion of the DEA 222 forms identified on Appendix A.

3. Albertsons shall pay to the United States the total sum of TEN THOUSAND U.S. DOLLARS ($10,000.00) (the "Settlement Amount"), within seven (7) business days after the Effective Date of this Agreement by electronic funds transfer pursuant to the written instructions provided to Albertsons by the United States Attorney's Office for the Western District of Louisiana. Failure of Albertsons to pay the Settlement Amount as set forth herein will void this Agreement and, in such an event, the United States may pursue any and all available remedies against Albertsons for any of the Covered Conduct herein.

4. In consideration of the above and subject to the exceptions contained in paragraph 5, the United States fully and finally releases the Albertsons from any claims (including attorney's fees, costs and expenses of every kind and however denominated) that the United States has asserted or could have asserted against Albertsons for the Covered Conduct. Albertsons also agrees to fully and finally release the United States, including the DEA and its

agents, from any claims (including attorney's fees, costs and expenses of every kind and however denominated) related to the investigation, prosecution, and settlement of the Covered Conduct.

5. Notwithstanding the release given in Paragraph 4 of this Agreement, the United States specifically reserves and does not release:

i. Any administrative action by the DEA based on or related to the Covered Conduct, but which does not solicit or impose civil penalties;

ii. Any federal criminal liability;

iii. Any criminal, civil or administrative claim arising under Title 26, United States Code (Internal Revenue Code);

iv. Any liability under the False Claims Act, 31 U.S.C. §3729 or the Program Fraud Civil Remedies Act, 31 U.S.C. § 3801-3812;

v. Any liability to the United States (or its agencies) for any conduct other than the Covered Conduct; and/or

vi. Any liability based on obligations created by this Agreement.

6. Nothing in the Agreement constitutes an agreement by the United States concerning the characterization of the Settlement Amount for purposes of the Internal Revenue law, Title 26 of the United States Code.

7. This Agreement binds and is intended to benefit only the Parties. This Agreement is not intended to be, and shall not be interpreted to constitute, a release of any person or entity not identified or referred to herein.

8. Each Party shall bear its own legal or other costs incurred in connection with this matter, including the preparation, execution and performance of this Agreement.

9. Each Party and signatory to this Agreement represents that he, she or it freely and voluntarily enters into this Agreement without any degree of duress or compulsion.

10. This Agreement is governed by the laws of the United States. Each Party may seek judicial enforcement of this Agreement upon a material breach by the other Party. The Parties agree that the jurisdiction and venue for any dispute arising between and among the Parties will be the United States District Court for the Western District of Louisiana.

11. For the purposes of construing this Agreement, the Agreement shall be deemed to have been drafted by all Parties to this Agreement and shall not be construed against any Party for that reason in any subsequent dispute.

12. This Agreement constitutes the complete agreement between the Parties. All material representations, understandings, and promises of the Parties are contained in this Agreement. Each of the Parties expressly agrees and acknowledges that, in entering this Agreement, it is relying on only the statements and promises expressly set forth in this written Agreement. This Agreement cannot be amended, nor any provisions waived, except in writing and when signed by all Parties to this Agreement.

13. The undersigned individuals represent and warrant that they are fully authorized to execute this Agreement on behalf of the Parties listed below.

14. This Agreement may be executed in counterparts, including by facsimile, pdf, or other electronic form or signature, each of which constitutes an original and all of which constitute one and the same Agreement.

16. The Parties may disclose the existence of and information about this Agreement to the public without restriction.

17. This Agreement shall be effective (final and binding) on the date of signature by the last signatory to the Agreement (the "Effective Date" of this Agreement).

AGREED BOARD ORDER #2019-01547

RE: IN THE MATTER OF
SAVON PHARMACY #135
(PHARMACY LICENSE #18610)

BEFORE THE TEXAS STATE
BOARD OF PHARMACY

On this day came on to be considered by the Texas State Board of Pharmacy (Board) the matter of pharmacy license number 18610 issued to Savon Pharmacy #135 (Respondent), 4415 West 7th, Texarkana, Texas 75501.

By letter dated June 21, 2019, the Board gave preliminary notice to Respondent of its intent to take disciplinary action. This action was taken as a result of an investigation which produced evidence indicating that Respondent may have violated:

Sections 551.003(19) and (26); 565.001(a)(1), (2), (12) and (13); and 565.002(a)(3) of the Texas Pharmacy Act, TEX. OCC. CODE ANN. Title 3, Subtitle J (2017); and

Sections 281.7(a)(3), (12) and (13); 291.31(1), (15), (16), (17), (20) and (32); 291.32(c)(1)(E) and (F); 291.32(c)(2)(B), (D), (E) and (H); 291.33(c)(1)(A) and (B); 291.33(c)(2)(A); 291.34(a); 291.34(c)(3)(G); 291.34(e)(2)(C); and 295.3(b) of the Texas Pharmacy Board Rules, 22 TEX. ADMIN. CODE (2018), in that allegedly:

COUNTS

(1) On or about January 30, 2018, Sahar Naim Abed, while acting as an employee (staff pharmacist) of Savon Pharmacy #135, 4415 West 7th Street, Texarkana, Texas 75501, dispensed doxepin 100 mg capsules to R.C., a 73-year-old patient, on a new electronically transmitted prescription calling for doxycycline 100 mg capsules. The prescription was incorrectly data entered into the pharmacy's data processing system by a pharmacy technician, and the data entry was incorrectly verified by Ms. Abed. The prescription vial was labeled 20 doxepin 100 mg capsule with directions to "take one capsule by mouth twice daily with food for 10 days." Patient R.C. took approximately six doses of the wrong drug as directed by the label, and experienced adverse effects, including disorientation, urinary retention, and exacerbation of a preexisting prostate condition. The prescription was assigned prescription number 6762459.

(2) On or about January 30, 2018, Sahar Naim Abed, while acting as an employee (staff pharmacist) of Savon Pharmacy #135, 4415 West 7th Street, Texarkana, Texas 75501, failed to evaluate and identify the clinically significant high dosage of the dispensed prescription described above in Count (1). Patient R.C. had not previously received a prescription for doxepin from the pharmacy. For adult patients, the recommended initial daily oral dosage of doxepin is 75 mg, and may be titrated upward to achieve a higher desired dose. The prescription as dispensed instructed patient R.C. to take an initial dosage

of 100 mg twice daily, resulting in an initial daily dosage of 200 mg, which is more than two-and-a-half times the recommended initial daily oral dosage.

(3) On or about January 30, 2018, Sahar Naim Abed, while acting as an employee (staff pharmacist) of Savon Pharmacy #135, 4415 West 7th Street, Texarkana, Texas 75501, failed to evaluate and identify the clinically significant drug-disease interactions of the dispensed prescription described above in Count (1). Patient R.C. had previously received an antihypertensive, namely lisinopril 2.5 mg tablets, from the pharmacy. It is recommended that doxepin be used with caution in patients, especially elderly patients, with hypertension, due to the increased risk for adverse cardiovascular effects. The pharmacy's data processing system alerted Ms. Abed that doxepin 100 mg tablets should be used with "extreme caution" given patient R.C.'s history of lisinopril use, and there is no documentation regarding the steps taken by Ms. Abed to avoid or resolve the problem or demonstrating that she consulted with the prescriber.

(4) On or about January 30, 2018, Sahar Naim Abed, while acting as an employee (staff pharmacist) of Savon Pharmacy #135, 4415 West 7th Street, Texarkana, Texas 75501, failed to evaluate and identify the clinically significant rational therapy-contraindications of the dispensed prescription described above in Count (1). Patient R.C. had previously received tamsulosin 0.4 mg capsules from the pharmacy, which is indicated for the treatment of the signs and symptoms associated with benign prostatic hyperplasia, including urinary retention. Doxepin is contraindicated in patients with severe urinary retention, and it is recommended that the drug be used with caution in patients with risk factors for urinary retention.

(5) On or about January 30, 2018, Sahar Naim Abed, while acting as an employee (staff pharmacist) of Savon Pharmacy #135, 4415 West 7th Street, Texarkana, Texas 75501, failed to provide verbal patient counseling to patient R.C. on the prescription described above in Count (1).

(6) On or about January 30, 2018, Savon Pharmacy #135, 4415 West 7th Street, Texarkana, Texas 75501, failed to maintain complete and accurate records of dispensing for the prescription described above in Count (1). Specifically, the patient medication record and daily dispensing log do not contain information that the prescription was dispensed to patient R.C.

An informal conference was held in the Board's office on September 10, 2019, with Nicholas Ryan LaBarbera, R.Ph., Divisional Pharmacy Manager, Albertson's Companies, Inc., on behalf of Respondent, and Nanette K. Beaird, Legal Counsel for Respondent, in attendance. The informal conference was heard by Board Members: Dennis F. Wiesner, R.Ph.; and Jenny Downing Yoakum, R.Ph; with Kerstin Arnold, General Counsel. Mary Martha Murphy, Staff Attorney, was also in attendance.

By signing this Order, Anthony Provenzano, Vice President, Pharmacy Compliance and Government Affairs, Albertson's Companies, Inc., on behalf of Respondent, and Respondent's counsel neither admit nor deny the truth of the matters previously set out in this Order, and agree that the Board has jurisdiction in this matter and waive the right to notice of hearing, formal administrative hearing, and judicial review of this Order.

The parties acknowledge that this Order resolves the allegations set forth herein, and agree to the terms and conditions set forth in the ORDER OF THE BOARD below.

ORDER OF THE BOARD

THEREFORE, PREMISES CONSIDERED, the Board does hereby ORDER that:

(1) Respondent's license is reprimanded.

(2) Respondent shall pay an administrative penalty of three thousand five hundred dollars ($3,500) due one hundred twenty (120) days after the entry of this Order.

(3) Respondent shall develop and implement policies and procedures for a Continuous Quality Improvement Program for purposes of preventing and handling dispensing errors. The Continuous Quality Improvement Program shall include pharmacist peer review in compliance with guidelines approved by Board staff. In addition, the policies and procedures for pharmacist peer review shall state that:

(a) The peer review committee will:

- review incident reports;
- determine what caused errors;
- make recommendations to correct the problem that caused the errors; and
- monitor the changes to determine if the changes have improved the operation of Respondent and reduced errors.

(b) The peer review committee must be comprised of at least two employees of Respondent, including the pharmacist-in-charge and other pharmacist(s) or personnel who are employees of Respondent. The committee shall not be solely comprised of a district or regional manager/supervisor and the pharmacist-in-charge and shall not be used for personnel evaluation purposes.

(c) The peer review committee will meet regularly, and no less than quarterly.

(d) The peer review committee will make a record indicating:

- date of meeting;
- location of meeting;
- names of persons attending the meeting;

- description of activities;
- discussion of problems in Respondent's operation (e.g., work flow, dispensing process);
- findings;
- description of recommendations; and
- review of actions or changes relating to individuals, systems, or processes made as a result of previous recommendations.

(4) Respondent shall submit a report and/or documentation of such policies and procedures to Board staff within one hundred twenty (120) days after the entry of this Order. Copies of forms used by Respondent to collect the data on errors committed at the pharmacy (i.e., incident report forms) must be submitted to Board staff, as well as any other peer review forms that have been developed by Respondent. Additionally, records of the peer review committee, as described in subparagraph (d) above, shall be maintained for two (2) years at the location of Respondent and made available for inspection by Board employees.

(5) Respondent shall be responsible for all costs relating to compliance with the requirements of this Order.

(6) Respondent shall allow Board staff to directly contact Respondent on any matter regarding the enforcement of this Order.

(7) Failure to comply with any of the requirements in this Order constitutes a violation and shall be grounds for further disciplinary action. The requirements of this Order are subject to the Texas Pharmacy Act, TEX. OCC. CODE ANN., Title 3, Subtitle J (2019), and Texas Pharmacy Board Rules, 22 TEX. ADMIN. CODE (2019).

And it is so ORDERED.

THIS ORDER IS A PUBLIC RECORD.

STATE OF COLORADO

Case No. 2019-3314

STIPULATION AND FINAL AGENCY ORDER

IN THE MATTER OF DISCIPLINARY PROCEEDINGS REGARDING THE IN-STATE PRESCRIPTION DRUG OUTLET REGISTRATION IN THE STATE OF COLORADO OF SAFEWAY PHARMACY #3836, REGISTRATION NO. PDO 441,

Respondent Pharmacy.

IT IS HEREBY STIPULATED AND AGREED by and between the Colorado State Board of Pharmacy ("Board") and Safeway Pharmacy #3836, ("Respondent Pharmacy") to resolve all matters pertaining to Board Case Number 2019-3314, as follows:

FINDINGS AND CONCLUSIONS

1. The Board has jurisdiction over Respondent Pharmacy, its registration as an in-state prescription drug outlet, and the subject matter of this Stipulation and Final Agency Order ("Final Agency Order") pursuant to provisions of the Pharmacists, Pharmacy Businesses, and Pharmaceuticals Act at Title 12, Article 280, C.R.S. (2019).

2. Respondent Pharmacy was originally registered in the State of Colorado on or about October 17, 2002, being issued registration #PDO 441, and has been so registered at all times relevant to this disciplinary action.

3. Respondent Pharmacy's address of record with the Board and current location is 200 Quebec St., #400, Denver, CO 80230.

4. Respondent Pharmacy admits these findings and hereby waives any further proof in this or any other proceeding before the Board regarding the following facts.

5. On September 18, 2018, Respondent Pharmacy entered into a Stipulation and Final Agency Order ("2018 Order"). The 2018 Order was entered into as a result of an inspection of Respondent Pharmacy on April 2, 2018, during which a Board inspector found nine (9) repeated deficiencies from previous inspections:

   a. All prescriptions for anabolic steroids were not labeled with an indication for use (two (2) prescriptions). This was a repeated deficiency from the 2016 and 2017 inspections.

b. Administration records did not include the site of administration (ten (10) or more patients). This was a repeated deficiency from the 2015, 2016, and 2017 inspections.

c. Administration records did not include the date the VIS was provided to the patient (nine (9) or more patients). This was a repeated deficiency from the 2016 and 2017 inspections.

d. Compounding records did not include the lot number of each ingredient used in a preparation and identity of pharmacist approving/checking the preparation (two (2) prescriptions). This was a repeated deficiency from the 2016 and 2017 inspections.

e. Transferred orders did not include the address of transferring pharmacy (one (1) prescription had no street, city, or state). This was a repeated deficiency from the 2015 and 2016 inspections.

f. A beyond-use date was assigned to a compounded preparation that exceeded what is allowed in Board Rule 21.10.80. Prescription numbers 6387271 (magic mouth wash) and 6410794 (rocky mountain oral rinse) had one-year BUD's, in the absence of stability studies. This was a repeated deficiency from the 2016 and 2017 inspections. Consequently, Respondent Pharmacy assigned a beyond use date to a compounded preparation that exceeded the expiration dates of individual ingredients used in the preparation (two (2) prescriptions).

Our processes are based on the newer usp 797 guidelines that reference category 1,2, and 3 in place of the older Low, Medium, High risk levels. We follow the BUD guidelines that are established in USP 797 tables 12,13 and 14. For dates that extend beyond the guidance that those tables provide, we send out for 3rd party testing. This testing involves a method suitability testing, and stability indicating assay. We also test for microbial growth with an AET test, and a test for enclosure that is used to dispense and store the finished compounded medication. Based on the results of these 3rd party tests we would establish our BUD's for anything beyond what is listed in the aforementioned 797 tables.

6. What laboratory performs this additional testing?

Name: Compounders International Analytical Laboratory

Address: 4760 Castleton Way suite A

City: Castle Rock State: CO Zip: 80109

Section 4: Sterile High Risk Compounding Questions (Complete this section ONLY if you will be performing High Risk Compounding.)

1. List the specific high risk sterile products that your facility compounds:

PLEASE SEE ATTACHED

2. What sterilization methods are utilized at your facility?

Sterilization by filtration

3. Does your facility utilize biological indicators? ☒ Yes ☐ No

4. If yes, describe how they are utilized:

We use the SporView BI system
Place the BI(s) inside a tray or peel pouch, whichever is representative of the load being processed.
Place one or more BIs in the most challenging area in the sterilizer (i.e. bottom shelf near the door, over the drain of a large sterilizer or on the middle shelf of a smaller sterilizer).
Process the load according to manufacturer's instructions
After processing, remove the BI(s) and verify that the chemical indicator has turned brown.
Allow the BI(s) to cool for at least 10 minutes.
Activate the processed BI(s) by crushing the inner glass media tube.
For Steam Indicators:
Incubate the BI(s) in the appropriate incubator (60°C Dry Block Incubator) for 24 hours. An unprocessed BI shall be incubated to serve as a positive control.
For Dry Heat Indicators
Incubate the BI(s) in the appropriate incubator (37°C) for seven days. An unprocessed BI shall be incubated to serve as a positive control.
Check the tubes for spore growth. Growth is indicated by a color change of the media from purple to yellow and/or turbidity.
Document all results on the appropriate compounding record or sterilization cycle printout.
If positive results are observed, immediately quarantine the involved CSP(s) and notify the designated person or the compounding pharmacist.

On February 7, 2025 FarmaKeio AR responded to the Warning Letter and there was no further substantive contact from the Board. Importantly, an Arkansas Warning Letter is not discipline.

Pharma Source Direct, Inc. ("PSD")

9. MS BOP Licensure Denial; Resolved in 2023 In 2023, Pharma Source Direct, Inc. ("PSD") was denied a Wholesale Distributor License by the Mississippi Board of Pharmacy because PSD drop-shipped goods from an upstream trading partner that was not licensed in Mississippi. PSD submitted the Wholesaler Distributor license application at the direction of the Mississippi Board of Pharmacy. PSD subsequently ceased its drop-shipping operations from this upstream trading partner, and the Board approved PSD's Wholesale Distributor License (No. 18920).
10. [CO BOP License Surrender and Reapplication; Completed in 2025] The following is not a result of any disciplinary action, but rather, an updated designation required by the Colorado Board of Pharmacy. On August 28, 2025, the Colorado Board of Pharmacy conducted a Wholesale Drug Outlet inspection of PSD's facility and advised PSD to apply for a Manufacturer license. Upon receipt of its application, the Board advised PSD that two registrations cannot be held by the same location. Accordingly, PSD relinquished its

Wholesale Drug Outlet license on September 29, 2025, and received its Manufacturer License on September 29, 2025, to avoid any gap in licensure.

13. What is your procedure for visual inspection of compounded sterile products?

At the completion of compounding, before releasing and dispensing, the CSP must be visually inspected to determine whether the physical appearance of the CSP is as expected (e.g., free of inappropriate visible particulates or other foreign matter, discoloration, or other defects). The CSP label must be visually inspected to confirm that the CSP and its labeling match the prescription or medication order. The inspection also must include a visual inspection of container closure integrity (e.g., checking for leakage, cracks in the container, or improper seals). Any CSP found to be of unacceptable quality (e.g., observed defect) must be promptly rejected, clearly labeled as rejected, and segregated from active stock to prevent use before appropriate disposal. When a CSP will not be released or dispensed on the day of preparation, a visual inspection must be conducted immediately before it is released or dispensed to make sure that the CSP does not exhibit any defects such as precipitation, cloudiness, or leakage, which could develop during storage. Any CSP found to be of unacceptable quality (e.g., observed defects) must be promptly rejected, clearly labeled as rejected, and segregated from active stock to prevent use before appropriate disposal. Defects that indicate sterility or stability problems must be investigated to determine the cause according to the facility's SOPs.

14. How often do you perform glove fingertip and medial fill testing?

Personnel must successfully complete an initial garbing competency evaluation no fewer than 3 separate times.
The 3 successful completions must be in succession.
The garbing competency eval consists of a visual observation and gloved fingertip and thumb sampling (GFT) of both hands.
Aseptic manipulation competency must occur initially and at least every 3 months thereafter.

15. Describe your initial and ongoing training program for all personnel performing sterile compounding:

All personnel who compound or have direct oversight of compounding personnel must be initially trained and qualified by demonstrating knowledge and competency in compounding CSPs according to the requirements of USP 797 before being allowed to perform their job functions independently.

16. Describe the cleaning procedure for your primary and secondary engineering controls, including the frequency of cleaning and the names of cleaning, disinfectant, sporicidal, and/or deactivation and decontamination agents used:
1. Cleaning/Disinfection Agents Used:
Cleaner (Germicidal): Sterile TB1 3300 (1 minute dwell), Disinfectant: Sterile 70% Isopropyl Alcohol (IPA), Sporicidal Agent: Sterile Peridox RTU (3-minute dwell). All cleaning performed top to bottom, clean to dirty, using sterile, lint-free wipes, and fully documented.

2. Primary Engineering Controls (PECs):
a) Cleaned and disinfected with Sterile 70% IPA before each shift, before each batch, and between APIs/batches. After daily compounding: cleaned with Sterile TB1 3300 followed by Sterile 70% IPA.
b) Weekly: Cleaned with Sterile Peridox RTU followed by Sterile 70% IPA.
c) Monthly: Full clean (all internal surfaces) using Sterile Peridox RTU followed by Sterile 70% IPA.

3. Secondary Engineering Controls (Buffer and Ante Rooms):
a) Daily: Floors, counters, work surfaces cleaned with Sterile TB1 3300, then disinfected with Sterile 70% IPA.
b) Weekly: Floors, counters, all surfaces and shelving cleaned with Sterile Peridox RTU followed by Sterile 70% IPA.
c) Monthly: Floors, counters, all surfaces, walls, ceilings, and storage bins cleaned with Sterile Peridox RTU, followed by Sterile 70% IPA.

See attached list of employees and their roles.

18. Who is responsible and accountable for the sterile compounding process at your facility?

The PIC and designated person.

19. If products are shipped/mailed, what shipping conditions are used to ensure product safety/efficacy?

Validated cooler packaging and ice.

Section 3: Sterile Hazardous Compounding Questions (Complete this section ONLY if you be performing Sterile Hazardous Compounding.)		
1. What type of primary engineering controls will you be using in your facility?		
2. Are you complying with all USP 800 guidelines?	Yes	No
3. Have your employees who compound with hazardous drugs signed an acknowledgement that they understand the risks associated with this process?	Yes	No
4. Is your BSC or CACI vented 100% to the outside?	Yes	No
5. Do you have a negative pressure buffer room at your facility?	Yes	No
6. Will you be compounding with antineoplastic HDs or HD API?	Yes	No

SERMORELIN ACETATE injection

2. What is the frequency for ongoing garbing, gloved fingertip and thumb sampling, and media fill testing for compounding personnel?

For personnel compounding Category 3 CSPs, the aseptic manipulation competency must occur initially and at least every 3 months thereafter.

3. Is the pharmacy meeting all of the additional garbing requirements for compounding Category 3 CSPs as defined by the revised USP-797 guidelines? Yes No

4. What is the frequency for completing volumetric active air sampling?

Within 30 days prior to the commencement of any Category 3 compounding and at least monthly thereafter regardless of the frequency of compounding Category 3 CSPs. Air sampling sites must be selected in all classified areas.

5. What is the frequency for completing surface sampling? Surface sampling of all classified areas, and pass-through chambers connecting to classified areas, must be completed prior to assigning a BUD longer than the limits established in Table 13, and at least weekly on a regularly scheduled basis regardless of the frequency of compounding Cat 3 CSPs. Surface cleaning must be conducted within the PEC used to prepare Cat 3 CSPs, at the end of each batch before cleaning and disinfection occurs, unless a self-enclosed robotic device is used. When a self-enclosed robotic device is used as the PEC, surface sampling must be conducted at least daily at the end of compounding operations, before cleaning and disinfection occurs.		
6. What is the frequency for using sporicidal agents? We follow the guidance of Table 10 in USP 797. Weekly and monthly sporicidal application based on surface/location type.		
7. Is an endotoxin test performed for all products compounded from one or more nonsterile component?	[Yes]	No
8. Is the BUD assigned supported by stability data obtained using a stability-indicating analytical method?	[Yes]	No

I certify under penalty of perjury that the information contained in this form is accurate, true and complete in all material respects. FarmaKeio Outsourcing

2. [FDA 483s, Warning Letter, & Recall; Pending] On October 30, 2019, FarmaKeio Outsourcing, LLC ("**FarmaKeio Outsourcing**"), an outsourcing facility that will be owned by the same owners as FarmaKeio as of the closing date, received a Form FDA 483. On July 29, 2021, FDA issued a Warning Letter to FarmaKeio Outsourcing. On July 29, 2024, FarmaKeio submitted a letter to FDA requesting official close-out of the October 2019 Form FDA 483 and July 2021 Warning Letter. FDA responded that a re-inspection would be necessary prior to close-out, and on September 5, 2025, FarmaKeio Outsourcing received a Form FDA 483 following the inspection. On October 16, 2025, upon FDA's recommendation, FarmaKeio Outsourcing decided to conduct a voluntary recall of all strengths of the Testosterone/Triamcinolone Acetonide Pellets and Testosterone Pellets within expiry that were (a) produced on or before April 30, 2025, and (b) did not contain documentation of being processed through the validated metal detector system approved for use on April 9, 2025. 3. [OH BOP Allegations; Settled] Effective October 1, 2024, FarmaKeio Outsourcing entered into a settlement agreement with the Ohio Board of Pharmacy, in which FarmaKeio Outsourcing acknowledged it neither admits nor denies allegations regarding sales of non-narcotic prescription drugs to a facility operating without an Ohio-issued license.

[MA BOP Allegations; Pending] On December 10, 2024, FarmaKeio Outsourcing received a letter from the Massachusetts Board of Pharmacy, alleging that FarmaKeio Outsourcing failed to timely notify the Board of the Ohio matter described above. FarmaKeio Outsourcing disputed the allegation in a letter dated December 27, 2024, and the Board acknowledged receipt a few days later. On April 14, 2026, FarmaKeio Outsourcing received a settlement offer from the Massachusetts Board of Pharmacy and FarmaKeio Outsourcing is evaluating next steps.
5. [CA BOP Licensure Denials & Disciplinary Action; Unresolved] In May 2022, FarmaKeio Outsourcing applied for and was denied an outsourcing facility license by the California Board of Pharmacy. On June 14, 2024, FarmaKeio Outsourcing received a Letter of Admonishment from the Board regarding the alleged distribution of compounded drug

FarmaKeio AR

8. [Arkansas State Board of Pharmacy Warning Letter] FarmaKeio AR was inspected by the Arkansas Board of Pharmacy on December 16 and 17, 2024. The Board requested written follow up and FarmaKeio AR responded on January 10, 2025. On January 24, 2025 the Board issued a Warning Letter acknowledging receipt of FarmaKeio AR's responses to the Inspection but noting that "[the Board] cannot fully evaluate the adequacy of the following corrective actions and preventative actions described in [FarmaKeio AR's Inspection Form Response] because [FarmaKeio AR] did not include sufficient information or supporting documentation." On February 7, 2025 FarmaKeio AR responded to the Warning Letter and there was no further substantive contact from the Board. Importantly, an Arkansas Warning Letter is not discipline.

Pharma Source Direct, Inc. ("PSD")

9. MS BOP Licensure Denial; Resolved in 2023 In 2023, Pharma Source Direct, Inc. ("PSD") was denied a Wholesale Distributor License by the Mississippi Board of Pharmacy because PSD drop-shipped goods from an upstream trading partner that was not licensed in Mississippi. PSD submitted the Wholesaler Distributor license application at the direction of the Mississippi Board of Pharmacy. PSD subsequently ceased its drop-shipping operations from this upstream trading partner, and the Board approved PSD's Wholesale Distributor License (No. 18920).
10. [CO BOP License Surrender and Reapplication; Completed in 2025] The following is not a result of any disciplinary action, but rather, an updated designation required by the Colorado Board of Pharmacy. On August 28, 2025, the Colorado Board of Pharmacy conducted a Wholesale Drug Outlet inspection of PSD's facility and advised PSD to apply for a Manufacturer license. Upon receipt of its application, the Board advised PSD that two registrations cannot be held by the same location. Accordingly, PSD relinquished its

Wholesale Drug Outlet license on September 29, 2025, and received its Manufacturer License on September 29, 2025, to avoid any gap in licensure.

13. What is your procedure for visual inspection of compounded sterile products?

At the completion of compounding, before releasing and dispensing, the CSP must be visually inspected to determine whether the physical appearance of the CSP is as expected (e.g., free of inappropriate visible particulates or other foreign matter, discoloration, or other defects). The CSP label must be visually inspected to confirm that the CSP and its labeling match the prescription or medication order. The inspection also must include a visual inspection of container closure integrity (e.g., checking for leakage, cracks in the container, or improper seals). Any CSP found to be of unacceptable quality (e.g., observed defect) must be promptly rejected, clearly labeled as rejected, and segregated from active stock to prevent use before appropriate disposal. When a CSP will not be released or dispensed on the day of preparation, a visual inspection must be conducted immediately before it is released or dispensed to make sure that the CSP does not exhibit any defects such as precipitation, cloudiness, or leakage, which could develop during storage. Any CSP found to be of unacceptable quality (e.g., observed defects) must be promptly rejected, clearly labeled as rejected, and segregated from active stock to prevent use before appropriate disposal. Defects that indicate sterility or stability problems must be investigated to determine the cause according to the facility's SOPs.

14. How often do you perform glove fingertip and medial fill testing?

Personnel must successfully complete an initial garbing competency evaluation no fewer than 3 separate times.
The 3 successful completions must be in succession.
The garbing competency eval consists of a visual observation and gloved fingertip and thumb sampling (GFT) of both hands.
Aseptic manipulation competency must occur initially and at least every 3 months thereafter.

15. Describe your initial and ongoing training program for all personnel performing sterile compounding:

All personnel who compound or have direct oversight of compounding personnel must be initially trained and qualified by demonstrating knowledge and competency in compounding CSPs according to the requirements of USP 797 before being allowed to perform their job functions independently.

LipoA, LipoB, LipoC, BiMix, TriMix, QuadMix, Methylcobalamin, Super LipoB, NAD+

12. What laboratory performs your sterility or endotoxin testing?

Name: ARL Bio Pharma

Address: 840 Research Pkwy #546

City: Oklahoma City State: OK Zip: 73104

Telephone: 405-271-1144

13. What is your procedure for visual inspection of compounded sterile products?
Each product is examined under appropriate lighting against both white and black backgrounds to check for visible particulates, discoloration, cloudiness, container defects, correct volume, and accurate labeling. Any CSPs that fail inspection are immediately quarantined, documented, and investigated.

14. How often do you perform glove fingertip and medial fill testing?
Initially before compounding begins and at least every six months

15. Describe your initial and ongoing training program for all personnel performing sterile compounding:
Our initial training program for sterile compounding personnel includes comprehensive instruction on aseptic technique, USP <797> standards, garbing, hand hygiene, cleaning and disinfection, and proper use of equipment within ISO-classified environments. Personnel must successfully complete didactic training, pass written competency assessments, and demonstrate proficiency through media fill and glove fingertip testing before engaging in compounding. Ongoing training is conducted at least annually and includes reassessment of aseptic technique, updates on regulatory changes, refresher courses, and requalification through media fill and glove fingertip testing every six months. All training and competency assessments are documented to ensure continued compliance and quality assurance.

16. Describe the cleaning procedure for your primary and secondary engineering controls, including the frequency of cleaning and the names of cleaning, disinfectant, sporicidal, and/or deactivation and decontamination agents used:
Our cleaning procedure for primary engineering controls (PECs) such as laminar airflow workbenches and secondary engineering controls (SECs) including buffer and ante areas follows USP <797> guidelines. PECs are cleaned and disinfected at the beginning of each shift, before each batch, every 30 minutes during continuous compounding, after spills, and at the end of compounding activities. SECs, including floors, walls, and ceilings, are cleaned on a daily, monthly, or as-needed basis, depending on the surface and classification.

We use a germicidal detergent (e.g., Quat-based cleaner) for routine cleaning, followed by 70% isopropyl alcohol (IPA) for disinfection. A EPA-registered sporicidal agent (e.g., hydrogen peroxide/peracetic acid blend or bleach-based product) is applied at least monthly. For hazardous drug areas, a deactivation and decontamination agent (e.g., sodium hypochlorite) is used first, followed by cleaning and disinfection.

17. Who performs the sterile compounding process at your facility?
Sterile compounding technicians that are certified in sterile compounding and asceptic technique

18. Who is responsible and accountable for the sterile compounding process at your facility?
All sterile staff which includes pharmacy technicians and pharmacists. We also have a dedicated compliance officer overseeing all complians and regulatory processes.

19. If products are shipped/mailed, what shipping conditions are used to ensure product safety/efficacy?
We use large ice bricks and kangaroo insulated bubble mailers for cold ship items utilizing next day courier service

Re: Corrective Action Response – Inspection Findings

To Whom It May Concern,

This letter serves as the pharmacy's corrective action response to the inspection findings cited under the following rule references. All corrective actions have been implemented or are in process to ensure full compliance.

1) Rule/Law/Code: 291.34(b)(2)(B)(ii)
The pharmacy has immediately ceased dispensing controlled substance prescriptions issued by out-of-state Advanced Practice Nurses (APNs) and Physician Assistants (PAs). Prescriptions for controlled substances are now accepted only from practitioners authorized under Texas law. Prescriber verification procedures have been updated, and staff have been educated on this requirement. Pharmacy software system has been contacted in order to implement hard stops for out of state APNs and Pas for controlled substances.

2) Rule/Law/Code: 291.133(d)(6)(F)(v)
The pharmacy has implemented a revised cleaning procedure requiring daily cleaning of buffer area and ante-area floors using an appropriate cleaning agent, followed by a disinfectant when no aseptic operations are in progress. Isopropyl alcohol is no longer used as the sole cleaning agent. Cleaning logs have been updated, and staff have been trained on the revised process.

3) Rule/Law/Code: 291.133(d)(6)(H)
Procedures have been updated to ensure compounded sterile preparations are assigned Beyond-Use Dates (BUDs) not only according to sterility and endotoxin testing but with validated potency and stability testing as well. Master formulation records have been reviewed and corrected as needed. Pharmacists verify BUD assignment during final product verification, and staff have been re-trained.

The pharmacy is committed to maintaining compliance with all applicable laws and regulations and will continue to monitor processes to ensure ongoing adherence.

Sincerely,

Tabraiz Khan, PharmD
Pharmacist-in-Charge

ADMINISTRATIVE COMPLAINT

The Michigan Department of Licensing and Regulatory Affairs, Bureau of Professional Licensing, complains against Respondent as follows:

1. The Michigan Board of Pharmacy is an administrative agency established by the Public Health Code, MCL 333.1101 *et seq.* Pursuant to MCL 333.16226, the Board's Disciplinary Subcommittee (DSC) is empowered to discipline persons for violations of the Public Health Code.

3. On July 29, 2024, the Ohio Board of Pharmacy (Ohio Board) executed a Settlement Agreement against Respondent that placed a written reprimand on Respondent's license, required Respondent to complete 6 hours of approved continuing education hours, and required the payment of $500.00 in fines and costs. The

disciplinary action was based on inspection violations cited at Respondent's pharmacy, Jungle Jim's Pharmacy, located in Fairfield, Ohio. The violations included, in part, purchasing dangerous drugs from a wholesaler not licensed with the Board, improper documentation and identification regarding the dangerous drugs, and the pharmacy had a refrigerator that was monitored with a log missing weekend entries and times. A copy of the disciplinary documents, marked Exhibit A, is attached and incorporated.

COUNT I

The action by the Ohio Board, as set forth above, constitutes a final adverse administrative action by a licensure, registration, disciplinary, or certification board involving the holder of, or an applicant for, a license or registration regulated by another state, a territory of the United States, or by another country, in violation of MCL 333.16221(b)(x).

RESPONDENT IS NOTIFIED that, pursuant to MCL 333.16231(8), Respondent has 30 days from the date of receipt of this Complaint to submit a written response to the allegations contained in it. The written response shall be submitted by email to the Department of Licensing and Regulatory Affairs, Bureau of Professional Licensing **LARA-BPL-RegulationSection@michigan.gov**. If unable to submit a response by email, Respondent may submit by regular mail to the Department of Licensing and Regulatory Affairs, Bureau of Professional Licensing, P.O. Box 30670, Lansing, MI 48909.

Respondent's failure to submit an answer within 30 days is an admission of the allegations in this Complaint. If Respondent fails to answer, the Department shall transmit this Complaint directly to the DSC to impose a sanction, pursuant to MCL 333.16231(9).

5. When was the most recent certification for the ISO classified areas? 04/13/2026

6. What is the frequency of the recertification for the ISO classified areas? Every 6 months

7. Were there any follow-up items required from the most recent certification report? ☐ Yes ■ No

Address: 11111 S Wilcrest Dr S1000

City: Houston State: Tx Zip: 77099

Telephone: (800) 745-8916

13. What is your procedure for visual inspection of compounded sterile products?

After the product is compounded and removed from the room, it is visually inspected in an LED light inspection box. Each vial is put into a corner with a different background and light to spot visible particles or anything out of specification.

14. How often do you perform glove fingertip and medial fill testing?

Every 3 months.

15. Describe your initial and ongoing training program for all personnel performing sterile compounding:

Initial training is done using the materials and tests for ASHP sterile compounding training. There is an additional on the job training that is done for another 20 hours. Once ASHP training is complete employees take a 200 question test and undergo media fill and fingerprint testing. Once all of this is completed a sterile compounder will be able to work independently.

Ongoing training is reviewed every 3 months with a 40 question didactic test, fingertip test, and media fill. Any process changes are also disseminated to the team through SOPs and trained on.

16. Describe the cleaning procedure for your primary and secondary engineering controls, including the frequency of cleaning and the names of cleaning, disinfectant, sporicidal, and/or deactivation and decontamination agents used:

Cleaning agent: TB 1-3300, Disinfectant Agent: sIPA 70%, Sporicidal: Peridox RTU, and Deactivation and Decontamination agent: Peridox RTU. Cleaning procedure for primary controls. Remove visible particles, debris, or residue with an appropriate solution (e.g., SWI or SW Irrig) using sterile, low-lint wipes. When applying a sporicidal agent is required use sterile low-lint wipes to apply the sterile sporicidal disinfectant(Frequency:weekly and monthly). Using sterile, low-lint wipes, apply a sterile cleaning agent followed by a sterile disinfecting agent, or apply an EPA-registered (or equivalent), one-step disinfectant cleaner to the equipment and all interior surfaces of the PEC(Frequency:daily and after each batch). Ensure the contact time specified by the manufacturer is achieved. Using sterile low-lint wipes, apply sterile 70% IPA to equipment and all interior surfaces in the PEC. Allow the surface to dry completely before beginning compounding. Always work cleanest to dirtiest. Cleaning procedure for secondary controls. Cleaning must be performed working in the direction from the cleanest to the dirtiest areas. Ceilings start at the wall opposite the room entry door and end at the door. Floors should be mopped using slightly overlapping (by at least 25 percent) broad strokes whenever possible, moving from the least accessible and presumably "cleanest" area of the buffer room and working toward the entrance to the buffer room and then onto the anteroom. Deactivating/decontaminated, then cleaning, last disinfectant.

17. Who performs the sterile compounding process at your facility?

Sterile compounding technicians.

18. Who is responsible and accountable for the sterile compounding process at your facility?

The designated person is responsible and accountable for sterile compounding process at our facility.

19. If products are shipped/mailed, what shipping conditions are used to ensure product safety/efficacy?

We do quarterly quality assurance tests to ensure our shipping conditions are safe and effective.

Section 3: Sterile Hazardous Compounding Questions (Complete this section ONLY if you be performing Sterile Hazardous Compounding.)		
1. What type of primary engineering controls will you be using in your facility? The Pharmacy uses 2 Class II Type B2 biological safety cabinets. These are negative pressure and exhausted externally.

9. If yes, list the name of the device:		

10. What information is provided to the patient or consumer on the proper handling and disposal of hazardous drugs products/containers?

The pharmacy puts a hazard sticker on all drugs to inform the patient and anyone else who can come into contact with the prescription that they material is hazardous. The pharmacy sends out an offer to counsel the patient, with a toll free number, with each prescription that goes out. Pharmacists are able to instruct patients during counseling on how to properly handle and dispose of all hazardous drug containers. If the medication requires special handling or storage that information will be sent out with the prescription as well.

11. Describe your initial process for training new employees prior to compounding sterile hazardous drugs?

3) Facility Description

Observation
Jungle Jim's Pharmacy is a compounding and outpatient pharmacy in Fairfield, Ohio.
The pharmacy employs 15 pharmacists, 40 pharmacy technicians, 2 pharmacy interns, and 10 pharmacy support personnel.
The pharmacy utilizes certified and registered pharmacy technicians as well as pharmacy technician trainees.
The pharmacy is licensed in all states except Massachusetts (working towards licensure), Louisiana, Minnesota, Alabama, Arkansas, and Washington DC. Sterile compounds may not be sent to California.
The pharmacy compounds both hazardous and non-hazardous sterile and non-sterile preparations (hazardous is non-sterile only). Compounded products include capsules, troches, topicals (creams, ointments, gels, sprays), oral solutions/suspensions, suppositories, and injectables. The pharmacy no longer compounds pellets. The pharmacy compounds approximately 400 different drug products (though the pharmacy's majority of compounded products is limited to around 50) and dispenses approximately 1000 prescriptions daily. The pharmacy is customer-facing with patient pick up and provides delivery through USPS, UPS, and FedEx.
The pharmacy provides contracted services to an internet-based telehealth group, Ro, and other telehealth affiliates.
The pharmacy is expanding into new space on the same contiguous plot of land, but not physically connected to the existing pharmacy. Inspection of the new space was inspected and approved earlier this year. Sterile suites are not yet in place, so certification of the new space has not been reviewed.
NABP Blueprint-style inspection conducted for out of state licensure.

Of note the NIOSH tables were updated in late 2024. Answers in the inspection reports are based upon 2016 version of the NIOSH list of hazardous drugs.

4) Does the pharmacy compound non-antineoplastic hazardous drugs listed in NIOSH table 1, and/or compounds with hazardous drug preparations listed in NIOSH table 2 or 3?

Yes.

Observation
Hazardous compounding includes testosterone, estradiol, methimazole, cyclosporine, finasteride, chloramphenicol, tretinoin, oxytocin, sirolimus.

Pharmacy states it complies with USP 800

8) Do only appropriate personnel engage in compounding at a pharmacy?

Yes: Pharmacist

Yes: Certified certified pharmacy technician, registered pharmacy technician, or pharmacy technician trainee under the personal supervision of a pharmacist

Observation
The pharmacy utilizes one pharmacist and 11 certified, 2 registered pharmacy technicians, and 1 pharmacy intern.
RPhT MR has been employed less than 1 year. RPhT JH has been employed approximately 3 years and has been compounding approximately 2 years.

9) Is a pharmacist responsible for compounded drug preparations?

Yes: A pharmacist conducts the final check of a compounded drug preparation

Yes: A pharmacist is responsible for dispensing compounded drug preparations

Yes: A pharmacist maintains all compounding records

Yes: A pharmacist is responsible for the proper maintenance, cleanliness and use of all equipment used in compounding

10) Are drugs compounded pursuant to a patient specific prescription issued by a licensed health professional authorized to prescribe drugs?

Yes.

11) Does the pharmacy compound a limited quantity of drug in anticipation of a patient specific prescription based on routine, regularly observed prescribing patterns?

Yes.

Observation
The pharmacy compounds in anticipation of need. The pharmacy determines these quantities based on need and difficulty of making the specific dosage form (i.e. determining powder weight and other ingredient need).
The pharmacy typically compounds not more than a 7-day supply in advance of need for non-sterile compounds. Sterile compounds could be up to a 3-4 week advance of need.

* **12) Are labels for drugs compounded in anticipation of a patient specific prescription contain the required information? Written Response Required**

Yes: Contain the drug name, strength and quantity of each active ingredient used in the compounded drug preparation

Yes: Contain the pharmacy control number

Yes: Contain an assigned beyond-use date

Yes: Contain the identification of the repackager or outsourcing facility by name, by the final seven digits of its terminal distributor of dangerous drugs license number, or any other board approved identifier.

Yes: Contain the statement "Compounded Drug" or similar statement prominently on the label

Observation
Observed labels on anticipation compounds:

- Clomiphene citrate 28 mg capsule
- Progesterone IR 50 mg capsule
- Naltrexone 4.5 mg capsule
- Semaglutide 2.5 mg/ml vial

Tretinoin/niacinamide cream - of note, label did not include identification of the pharmacy or statement "compounded drug". Also, the container included strength but not quantity nor total package size. Compounding record indicates this product was made on 4/9/2025.
Hair Solution Rx (finasteride, minoxidil, tretinoin) - of note, label did not include identification of the pharmacy or statement "compounded drug". Also, the container did not include strength or quantity of each active ingredient. Compounding record indicates this product was made on 4/23/2025.
Semaglutide/B12 2.5 mg/1 mg/ml syringes - of note, label did not include identification of the pharmacy or the statement "compounded drug". Additionally, these syringes are not individually labeled; only the outer bag which contained the syringes was labeled. Lastly, the syringe volume was 0.8 ml but the label on the outer bag did not contain a volume of 0.8 ml specified. Therefore, the label on the outer bag does not accurately reflect the quantity per syringe. Also recommended adding a "refrigerate" auxiliary label to the outer bag as well as individual syringes.
Labels on compounded products do not bear a signature/initials of the pharmacist performing final check, but the lot number on the label corresponds to the compounding record, which does bear a pharmacist's signature. Recommended adding pharmacist initials on the compounding in advance of need label.

Corrective Action
Pharmacy to ensure products are labeled appropriately.

Compounding records have a handwritten date which corresponds to the date compounded or date of pharmacist check? There is no time of compounding documented.
The formula sheet has a printed date and time in the top left corner of the page; this represents the date/time sheet was printed but does not necessarily mean the date/time the compound was prepared. Is there documentation of the date/time of compounding? Is there documentation of the date of final check by a pharmacist?

There is only one pharmacist signature on the signature page - is the signature of the ingredient check captured? Is the signature of the final check of the compounded product?
The ingredient list includes a line for NDC, but not all ingredients have an NDC filled in. How does the pharmacy know the vendor for the products used?

Corrective Action

The designated person(s) must ensure—from available published information, from supplier documentation, or through direct challenge (e.g., filtering the CSP)—that the filters 1) are chemically and physically compatible with all ingredients in the CSP (e.g., water-miscible alcohols may damage filter integrity); 2) are chemically stable at the pressure and temperature conditions that will be used; and 3) have enough capacity to filter the required volumes. The filter dimensions and the CSP to be sterilized by filtration should permit the sterilization process to be completed without the need for replacement of the filter during the process. Filter units used to sterilize CSPs must be subjected to the manufacturers' recommended integrity testing, such as a post-use bubble point test. If multiple filters are required for the compounding process, each of the filters must pass a filter-integrity test.

If sterility testing is performed, the minimum quantity of each container to be tested for each media is specified in ☐71☐, Table 2, and the number of containers required to be tested in relation to the batch size is specified in ☐71☐, Table 3, except as described below. The maximum batch size for all CSPs requiring sterility testing must be limited to 250 final yield units.
If the number of CSPs to be compounded in a single batch is less than the number of CSPs needed for testing as specified in ☐71☐, Table 3, additional units must be compounded to perform sterility testing as follows:
If 1–39 CSPs are compounded in a single batch, the sterility testing must be performed on a number of units equal to 10% of the number of CSPs prepared, rounded up to the next whole number. For example:
If 1 CSP is compounded, 10% of 1 rounded up to the next whole number would indicate that 1 additional CSP must be prepared for sterility testing
If 39 CSPs are compounded, 10% of 39 rounded up to the next whole number would indicate that 4 additional CSPs must be prepared for sterility testing
If more than 40 CSPs are prepared in a single batch, the sample sizes specified in ☐71☐, Table 3 must be used.

Yes. There are records of investigative results and corrective actions.

Observation
Did not observe all records, but discussed records with staff.

4) Additional Information/Observations

1) Registered pharmacy technicians performing non-sterile compounding

Observation
RPhTs JH and MR perform non-sterile compounding.
Observed MR's ProFiller capsule machine training record signed off by RPh AS (Dec. 2024). Also observed MR's hazardous drug acknowledgement statement and other various training records. Training was signed by the Responsible Person or designee in May 2024 and November 2024.
Observed JH's ProFiller capsule machine training record signed off by RPh AS (Dec. 2024). Also observed JH's hazardous drug acknowledgement statement and other various training records. Training was signed by the Responsible Person or designee in August 2024 and February 2024.
Rule 4729:3-3-03 | Registered pharmacy technicians. Effective 3/7/24
(D) In order to perform non-sterile drug compounding, a registered pharmacy technician shall complete the following training requirements prior to compounding non-sterile preparations:
(5) When the responsible person or a pharmacist designated by the responsible person is satisfied with the employee's knowledge and proficiency, the responsible person or the responsible person's designee will sign the documentation records to show that the employee was appropriately trained in accordance with this rule.
(6) Ensuring registered pharmacy technicians are properly trained shall be the responsibility of the terminal distributor of dangerous drugs and the licensee's responsible person.
(7) All training requirements set forth in this paragraph shall be appropriately documented and made readily retrievable for immediate inspection by an agent of the state board of pharmacy. Documentation shall be maintained by the terminal distributor of dangerous drugs for a minimum of three years.
(G) A terminal distributor of dangerous drugs and the licensee's responsible person shall be responsible for the implementation of policies and procedures for additional training appropriate to duties and responsibilities performed by a registered pharmacy technician as well as an ongoing quality assurance plan to ensure competency.

*** 2) Does the pharmacy repackage? Written Response Required**

Observation
Observed repackaged compounded creams/topical products in the non-sterile compounding rooms. Of note, these products bore incomplete labels.
Additionally, the repackaging log was not complete with all requirements.
Observed compounded sterile semaglutide/B12 injection in 50 ml vials and individual dose syringes. Staff described the compounding process which involves making the bulk/stock solution in an IV bag and transferring the product to 50 ml sterile vials. Then, the product is further repackaged into the individual syringes. Is there a repackaging log for these transfers from container to container? The 50 ml vials and individual syringes are maintained on site for 1+ days prior to being associated to a patient-specific prescription/dispensed.

Corrective Action
Pharmacy to ensure repackaging logs and labels are compliant.
Rule 4729:5-5-17 | Drugs repackaged or relabeled by a pharmacy. Effective 12/1/20
(A) As used in this rule, "repackaging" means the act of taking a finished drug product from the container in which it was distributed by the original manufacturer and placing it into a different container without further manipulation of the drug. Repackaging also includes the act of placing the contents of multiple containers (e.g., vials) of the same finished drug product into one container, as long as the container does not include other ingredients. If a drug is manipulated in any other way, including if the drug is reconstituted, diluted, mixed, or combined with another ingredient, that act is not considered repackaging.
(D) Labels of drugs repackaged by and stored within a pharmacy prior to being dispensed shall contain, but not be limited to, the following:
(1) Name of drug, strength, and dosage form;
(2) National drug code or universal product code, if applicable, which may be embedded in a bar code or quick response (QR) code on the label;
(3) The identification of the repackager by name or by the final seven digits of the terminal distributor of dangerous drugs license number;
(4) Pharmacy control number;
(5) The beyond-use date of the repackaged drug in accordance with the guidance listed in paragraph (C) of this rule.
(F) A record of all drugs repackaged and stored within a pharmacy prior to being dispensed shall be kept in a readily retrievable manner for at least three years or one year past manufacturer's expiration date, whichever is greater. This record shall include the following:
(1) Name of drug, strength, dosage form, and quantity;
(2) National drug code or universal product code, if applicable, which may be embedded in a bar code or quick response (QR) code on the label;
(3) Manufacturer's or distributor's control number;
(4) Manufacturer's or distributor's name, if a generic drug is used;
(5) Pharmacy control number;
(6) Manufacturer's or distributor's expiration date;
(7) The pharmacy's beyond-use date in accordance with the guidance listed in paragraph (C) of this rule;
(8) The positive identification of the individual responsible for the repackaging of the drug; and
(9) The positive identification of the pharmacist conducting the final verification of the repackaged drug to confirm the accuracy of the drug and conformity to the requirements of this rule prior to dispensing or distribution.

*** 3) Additional Information/Observations Written Response Required**

Observation
Pharmacy dispenses prescriptions for Ro (an online telehealth company).

- Ro is a separate system from the outpatient/compounding dispensing software (Pioneer).
- Prescribers enter prescription information directly into the Ro system. The Ro system calls these entries "electronic rxs".
- Pharmacists and technicians log in to the Ro system directly with unique usernames and passwords.
- Pharmacists and/or technicians will print batches of prescription labels that have been automatically generated from prescriber entered prescriptions.
- Technicians fill the prescriptions using compounded product and the printed labels.
- All filled prescriptions then go to pharmacists for verification.
- Pharmacists scan the barcode on the label prescription to bring up the prescription information to complete the final verification of the prescription. System captures and documents the pharmacist performing the check.
- Pharmacists have access to the original entered prescription information, verification information, and the prescriber notes.
- Pharmacists verify the auto-generated label and product against the prescriber-entered information and the prescriber notes.
- Pharmacists click a "verify" button on the screen if they determine all information is correct. Pharmacists then will sign a log-book at the end of the day.
- If a pharmacist determines there is an issue with a prescription they can send the prescription directly back to the prescriber for modification/clarification.

Working as if it was an inpatient hospital order system, however this is an outpatient pharmacy. No actual data entry is being performed by pharmacy staff.

Corrective Action
Why does the pharmacy receive orders instead of prescriptions?

Rule 4729:5-3-11 | Transmission of outpatient prescriptions. Effective 12/1/2020

(A) Oral transmission by a prescriber or a prescriber's agent of an original outpatient prescription authorized by a prescriber shall comply with the requirements of rule 4729:5-5-15 of the Administrative Code. For any oral outpatient prescription transmitted by an agent of a prescriber, the prescriber's agent must provide the agent's first and last name when transmitting the prescription. An oral prescription may be transmitted by a prescriber or prescriber's agent to a recording device or voice mail service.

(B) Original written outpatient prescriptions shall be authorized and signed by a prescriber, in the same manner as the prescriber would sign a check or legal document, and may be transmitted by the prescriber or the prescriber's agent by facsimile machine to a pharmacy.

(1) The facsimile of the prescription must include the identification number of the facsimile machine which is used to transmit the prescription, the full name of the prescriber and, if applicable, the full name of the prescriber's agent transmitting the prescription to the pharmacy.

(2) The prescription must comply with the requirements of rule 4729:5-5-15 of the Administrative Code.

(3) The original prescription signed by the prescriber from which the facsimile is produced shall not be issued to the patient. The original prescription signed by the prescriber must remain with the patient's records at the location where it was issued for three years from the date of issuance. Following the successful transmission of the prescription, the word "VOID" or "FAXED" shall be written or stamped on the face of the original prescription in a manner that does not destroy any of the original information contained on the prescription.

(4) Outpatient prescriptions for schedule II controlled substances may be transmitted by facsimile in accordance with 21 C.F.R. 1306.11 (5/1/2019) and shall meet the facsimile requirements of this rule.

(C) Outpatient prescriptions may be transmitted by means of an electronic prescription transmission system that complies with the prescription requirements in rule 4729:5-5-15 of the Administrative Code.

(1) An outpatient prescription transmitted by means of an electronic prescription transmission system shall include the full name of the prescriber's agent transmitting the prescription.

(2) A controlled substance outpatient prescription shall only be transmitted by means of an electronic prescription transmission system if the system complies with 21 CFR 1311 (5/1/2019).

(3) Except as provided in paragraphs (C)(4) and (C)(5) of this rule, no prescriptions may be transmitted by means of an electronic prescription transmission system that converts the prescription into a computer-generated fax or scanned image.

(4) A non-controlled prescription may be transmitted by means of an electronic prescription transmission system that converts the prescription into a computer-generated fax or scanned image if all the following apply:

(a) The transmission is conducted by means of a board approved system that meets the prescription requirements of rule 4729:5-5-15 of the Administrative Code.

(b) The prescription transmission system operates within a closed-system. A closed system includes any system whereby prescription information is transmitted directly between:

(i) Any division, subsidiary, parent or affiliated or related company under common ownership and control; or

(ii) One or more contracted entities. Contracted means having a written agreement (to include business associate agreements) between one or more prescribers and a pharmacy and shall not include a third-party intermediary unless otherwise approved by the board.

(5) A non-controlled prescription may be converted into a computer-generated fax by a board approved third-party intermediary only if the conversion is necessitated by a temporary telecommunication outage of the third-party intermediary or receiving pharmacy.

8) Substance Abuse and Mental Health Resources for Healthcare Professionals

1) Substance Abuse and Mental Health Resources for Healthcare Professionals

Observation
The healthcare profession is not immune to substance use disorder and mental health conditions. Such medical conditions impair a healthcare professional's competency, ability, and judgment. Substance use disorder and/or mental health conditions that are left untreated may not only cause a healthcare professional to risk their career, but may also endanger the life of a patient. These medical conditions can be effectively treated, and it is possible for healthcare professionals that are in treatment or recovery to return to practice.

The State of Ohio Board of Pharmacy encourages all healthcare professionals who may be struggling with substance use disorder or mental health condition to seek help. JJ OH Inspection 4.28.25 Corrective Action

2.3) Drugs compounded in a pharmacy (OAC 4729:7-2-03)

12) Are labels for drugs compounded in anticipation of a patient specific prescription contain the required information?

Corrective Action: All labels have been updated with the appropriate information and labeled upon compound completion.

2.6.2) Personnel Training and Evaluation

4) Do SOPs describe training requirements for personnel who do not compound and only perform functions such as in-process

Corrective Action: A new training program has been updated for all non-compounding staff that perform any function with the compounded product. A new binder will be created to document and track all training that will be required annually.

2.6.4) Buildings and Facilities

5) Is temperature monitoring equipment calibrated or verified for accuracy?

Corrective Action: Manual temperature logs have been added to all fridges and monitored twice a day. Manual temperature checks will be used to verify the accuracy of the TempStick that are used for constant monitoring. Additionally, JJ is adding a yearly verification of TempStick with an ice bath.

2.6.6.2) Components

5) COMPONENTS OTHER THAN APIs: Do other components used in compounding comply with USP 795?

Corrective Action: We have updated our intake policy to make sure we have CoA on all components that come in regardless of where they come from. We have reached out and received the CoAs on the products that were previously missing.

2.7.10.3) Sterilization by Filtration

1) Are filters used for sterilization of CSPs appropriate for pharmaceutical use?

Corrective Action: We have switched to a new filter that has literature of all required testing. Volume filtered is documented <385ml to 1150ml. All filters used will be documented with the bubble point test on the master formulary.

https://internationalfilterproducts.com/cdn/shop/files/D65RDS065S020LFLM-PH-ETO_-_Technical_Data_Sheet_08f30a29-9110-4bdc-ab9f-399b56633da8.pdf?v=9596934681704851525

2) Does the pharmacy have filters that are physically and chemically compatible with all ingredients in a filtered CSP?

Corrective Action: Filter literature shows that all excipients are compatible with the filter. Testing potency is done before and after usage to ensure no retention. Added the name of the filter, lot, expiration date, and bubble point test results, and pH on all master formulary records.

2.7.11) Master Formulation and Compounding Records

2) Do master formulas contain the required information?

Corrective Action: All testing was previously performed added in a section of the MFR to document results on the records. Added the name of the filter, lot, expiration date, and bubble point test results, and pH on all master formulary records.

2.7.12) Release Inspections and Testing

5) Are the proper number of containers tested for sterility?

Corrective Action: We have revised our MFR to reflect USP 797 and all batch size is now limited to 250 units and as per 71, appropriate samples will be sent for testing.

4) Additional Information/Observations

2) Does the pharmacy repackage?

Corrective Action: Confirmed with compounding pharmacists that no IV bag is being used. We have added a repackaging document to be filled out at the time of the repackaging. Pharmacy is moving forward with switching to vials and is going to be filled directly from the batch to eliminate the need for repackaging. Patient education will be created and sent to all patients to ensure proper injection.

3) Additional Information/Observations

Corrective Action: To the best of our understanding, the outpatient prescriptions we receive contain all the elements required by Ohio Administrative Code Rule 4729:5-5-15. Pharmacists are responsible for verifying that prescriptions are complete and valid prior to dispensing.

Secondary engineering controls, including compounding areas and cleanroom surfaces, are cleaned daily and as needed. The cleaning process involves a multi-step approach: surfaces are first cleaned with a detergent or general-purpose cleaning agent to remove debris, followed by disinfection using 70% isopropyl alcohol for routine disinfection. Sporicidal agents are used periodically, typically weekly or after a contamination event, to eliminate bacterial spores, while deactivation and decontamination agents are applied as needed for hazardous drug handling areas. 6. What is the frequency of the recertification for the ISO classified areas? every 6 months

7. Were there any follow-up items required from the most recent certification report? ☐ Yes ■ No

8. If preparing Category 2 or Category 3 CSPs from non-sterile starting components are the pre-sterilization procedures such as weighing and mixing completed in an ISO Class 8 or better environment? ■ Yes ☐ No

9. If compounding Category 1 CSPs and Category 2 CSPs how often is surface sampling of all classified areas and pass-through chambers conducted? Monthly

10. Will you be performing sterile hazardous drug compounding? ☐ Yes ■ No

If you marked **"Yes"**, you must also complete **section 3.**

11. List the sterile compounded products that you will be compounding for Nevada patients or consumers:

Anti-aging, Longevity, Erectile Dysfunction medications, such as Trimix

Telephone: 800-745-8916

13. What is your procedure for visual inspection of compounded sterile products?

Our procedure requires that all compounded sterile products undergo 100% visual inspection prior to release. After compounding, each container is examined under adequate lighting against a black-and-white contrasting background to assess container–closure integrity (no cracks, leaks, or defects) and solution appearance (no visible particulates, cores, precipitate, discoloration, or cloudiness inconsistent with the formulation). At final verification the pharmacist performs another visual inspection, which includes reviewing the compounding record and visually inspecting the finished container and labels to ensure correct drug, strength, volume, route, and beyond-use date. Any product failing visual inspection is quarantined and discarded according to policy.

14. How often do you perform glove fingertip and medial fill testing?

Every 6 months

15. Describe your initial and ongoing training program for all personnel performing sterile compounding:

Our initial and ongoing sterile compounding training is structured, documented, and performed on a defined schedule. For initial training, all personnel complete ACPE-accredited sterile compounding coursework through PharmacyStars before independently compounding. This includes didactic modules on USP <797>, aseptic technique, environmental monitoring, cleaning and disinfecting, and compounding documentation. Personnel must also successfully complete and document gloved fingertip testing (GFT) and media fill testing in PharmacyStars prior to being authorized to compound. For ongoing training and competency, PharmacyStars assigns required sterile compounding courses to each staff member on an automatic 12-month cycle, and completion is tracked within the system. Gloved fingertip testing and media fill testing are also scheduled and logged in PharmacyStars at least every 6 months for all compounding

16. Describe the cleaning procedure for your primary and secondary engineering controls, including the frequency of cleaning and the names of cleaning, disinfectant, sporicidal, and/or deactivation and decontamination agents used:

We follow a written cleaning schedule for all PECs and SECs using TB1, Peridox, and sterile 70% IPA. PEC work surfaces are cleaned and disinfected with TB1 and sterile 70% IPA at the beginning of each shift, before each batch, after spills, and when contamination is suspected; sporicidal cleaning with Peridox is performed at least monthly and after any known or suspected contamination event. Secondary engineering controls are cleaned with TB1 (e.g., floors daily when compounding, work surfaces and high-touch areas at least daily), with Peridox used monthly for sporicidal activity, and sterile 70% IPA used for routine disinfection of critical work surfaces. All cleaning is performed in a top-to-bottom, clean-to-dirty manner using appropriate wipes and is documented on cleaning logs.

General Pharmacy: Drug Recall, Quarantine, Return & Destruction		
	SOP # 9.0	**Version# 1.0**
Facility: **Artisan Drug**		Date Written: 9/1/2025
Approved By: PIC	Effective Date: 9/1/2025	Expiration Date: 10/8/2026
Review Date: 10/8/2025	Reviewed By: PIC	Archived Date:

PURPOSE

To ensure the prompt identification, secure quarantine, and compliant return or destruction of any recalled, expired, damaged, defective, or otherwise unusable drug products in accordance with FDA recall guidelines, state Board of Pharmacy rules, DEA and environmental regulations (when applicable).
This SOP helps prevent dispensing of compromised products, protects patient safety, and maintains a clear chain-of-custody record for all recalled or destroyed medications.

SCOPE

Applies to all prescription and over-the-counter medications, compounded products, and stock removed from active inventory due to:

- FDA or manufacturer recalls (Class I–III)
- Wholesaler or regulatory safety notices
- Expired, damaged, or defective inventory
- Patient-returned products
- Products compromised during emergencies (e.g., flood, power outage, temperature excursion)

POLICY

1. PIC Oversight
    a. The Pharmacist-in-Charge (PIC) or designee is responsible for monitoring recall notifications, initiating product quarantine, documenting all actions, and ensuring compliant product disposition.
2. Recall Monitoring
    a. The PIC or designee must monitor recall communications from:
        i. FDA Enforcement Reports and Safety Alerts
        ii. Wholesalers, manufacturers, and regulatory agencies
    b. Identified affected products are immediately flagged in the pharmacy management system and located in physical inventory.
3. Quarantine of Affected Products
    a. Recalled, expired, or unusable products are removed from active stock immediately and placed in a clearly marked "Quarantine – Do Not Dispense" area.
    b. Access to the quarantine area is limited to authorized personnel.
    c. Quarantined items must never be dispensed under any circumstances.
4. Patient & Prescriber Notification
    a. If a recalled product has already been dispensed, the PIC or pharmacist contacts affected patients and their prescribers promptly with instructions, per recall notice or regulatory requirement.

   b. All outreach attempts and communications are documented in the patient profile and in the Medication Recall Quarantine Disposal Log.
5. Return, Credit & Disposal
   a. Follow manufacturer or wholesaler instructions for return and credit of recalled products.
   b. Return authorization forms, shipping receipts, and chain-of-custody documents must be retained.
   c. If on-site destruction is required or allowed (e.g., expired compounded products, damaged stock):
      i. PIC must approve destruction and ensure use of compliant disposal methods (e.g., pharmaceutical or hazardous-waste protocols).
6. Emergency-Related Product Integrity
   a. Products compromised by power failure, flooding, temperature excursions, or similar emergencies are:
      i. Quarantined immediately
      ii. Assessed for stability per manufacturer guidelines
      iii. Logged and either returned or destroyed following this SOP
   b. Any excursions must also be logged per the Environmental Monitoring SOP (EdgeX/PharmacyStars).

PROCEDURES

1. Recall Monitoring & Identification
   a. Review FDA recall bulletins and wholesaler/manufacturer communications as they are issued.
   b. Identify affected lots/NDCs in the pharmacy inventory system.
   c. Pull all matching products from shelves immediately.
2. Quarantine Process
   a. Move identified items to the designated quarantine area with clear signage.
   b. Complete the Medication Recall Quarantine Disposal Log with:
      i. Product name, strength, dosage form
      ii. Lot number, NDC, quantity affected
      iii. Reason for recall or quarantine
      iv. Date quarantined and initials of staff
      v. Final disposition (returned/destroyed)
3. Patient Notification & Follow-Up
   a. PIC or pharmacist contacts patients/prescribers if dispensed stock is affected.

   b. Document date, time, and outcome of all communications in both the log and patient profile.
4. Return / Credit
   a. Follow instructions from manufacturer/wholesaler for returning product.
   b. Retain return authorizations, chain-of-custody forms, and shipping receipts for at least 2 years.
5. On-Site Destruction
   a. Obtain PIC approval prior to destruction.
   b. Use appropriate waste-disposal method per product type (e.g., hazardous-drug bin, reverse distributor).
   c. Log the following in the Destruction Log:
      i. Product name, strength, dosage form, quantity
      ii. Reason for destruction

		Observation	Inspector Notes	USP Reference(s)
41.2	**Surfaces** within the cleanroom suite and SCA are sampled at the **frequencies** specified by USP for viable particle surface sampling. ***Inspector note: Category 1 and Category 2 CSP surface sampling frequency is monthly and Category 3 compounding is weekly, regardless of the frequency of compounding Category 3 CSPs.*** ***Additionally, surface sampling is to be performed within the PEC used to prepare Category 3 CSPs, at the end of each batch, before cleaning and disinfection occurs unless a self-enclosed robot is used. If a self-enclosed robot is used, frequency is at least once daily at the end of compounding operations.*** ***For facilities compounding any Category 3 CSPs, a surface sampling must be completed prior to assigning BUDs longer than the limits established in Table 13.***	Yes	Facility performs monthly surface sampling.	6.3, 6.3.1, 14.4.2
41.3	The pharmacy uses an appropriate microbiological growth media for sampling. ***Inspector note: An appropriate microbiological growth media means a surface sampling device with a raised convex surface for sampling flat surfaces is used that contain general microbial growth media that supports the growth of bacteria and fungi (eg, TSA supplemented with additives that neutralize effects of any disinfecting agent, eg, lecithin and polysorbate 80), accompanied by a COA that verifies that the media meets expected growth promotion, pH, and sterilization requirements. Per USP, "sterile swabs wetted with sterile water or a sterile neutralizing buffer may be used when sampling irregular surfaces and difficult-to-reach locations such as crevices, corners, and spaces between surfaces."***	Yes		6.3.2 Box 6
